II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a proposed collection of information to OMB for review entitled "Standards for Protection Against Radiation." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on March 22, 2021 (86 FR 15273).

1. *The title of the information collection*: Part 20 of title 10 of the *Code of Federal Regulations* (10 CFR),

"Standards for Protection Against Radiation."

2. *OMB approval number*: An OMB control number has not yet been assigned to this proposed information collection.

3. *Type of submission*: New.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: Annually for most reports and at license termination for reports dealing with decommissioning.

6. *Who will be required or asked to respond*: NRC licensees and Agreement State licensees, including those requesting license terminations. Types of licensees include civilian commercial, industrial, academic, and medical users of nuclear materials. Licenses are issued for, among other things, the possession, use, processing, handling, and importing and exporting of nuclear materials, and for the operation of nuclear reactors.

7. *The estimated number of annual responses*: 52,359.

8. *The estimated number of annual respondents*: 25,225.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 769,396.

10. *Abstract*: 10 CFR part 20 establishes standards for protection against ionizing radiation resulting from activities conducted under licenses issued by the NRC and by Agreement States. These standards require the establishment of radiation protection programs, maintenance of radiation protection programs, maintenance of radiation records, recording of radiation received by workers, reporting of incidents which could cause exposure to radiation, submittal of an annual report to NRC and to Agreement States of the results of individual monitoring, and submittal of license termination information. These mandatory requirements are needed to protect occupationally exposed individuals from undue risks of excessive exposure to ionizing radiation and to protect the health and safety of the public.

Dated: July 29, 2021.
