DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31382; Amdt. No. 3967]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective August 5, 2021. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of August 5, 2021.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flights safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial
number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on July 23, 2021.

Wade E.K. Terrell,

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

2. Part 97 is amended to read as follows:

42709 Federal Register / Vol. 86, No. 148 / Thursday, August 5, 2021 / Rules and Regulations
DEPARTMENT OF ENERGY
Federal Energy Regulatory Commission

18 CFR Parts 4 and 5

[Docket No. RM20–21–000; Order No. 877]
Removing Profile Drawing Requirement for Qualifying Conduit Notices of Intent and Revising Filing Requirements for Major Hydroelectric Projects 10 MW or Less

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Final rule.

SUMMARY: In this final rule, the Federal Energy Regulatory Commission (Commission) is amending its regulations governing the filing requirements for qualifying conduits and certain major hydroelectric power projects. Specifically, the Commission is removing the requirement that a notice of intent to construct a qualifying conduit include a profile drawing showing the source of the hydroelectric potential in instances where a dam would be constructed in association with the facility and extending the licensing requirements that currently apply to major projects up to 5 megawatts (MW) to major projects 10 MW or less, consistent with the amended definition of a small hydroelectric power project in the 2013 HREA.

DATES: This rule is effective October 4, 2021.

SUPPLEMENTARY INFORMATION:

I. Background

1. By this final rule, the Federal Energy Regulatory Commission (Commission or FERC) is amending parts 4 and 5 of its regulations governing the filing requirements for qualifying conduits and certain major hydroelectric power projects. The Commission, under Part I of the Federal Power Act (FPA), licenses hydropower projects that are developed by non-Federal entities including individuals, private entities, states, municipalities, electric cooperatives, and others.

2. The Hydropower Regulatory Efficiency Act of 2013 (2013 HREA) 1 was signed into law on August 9, 2013. As explained below, changes implemented in response to the 2013 HREA form the basis for these revisions to the Commission’s regulations.

II. Notice of Proposed Rulemaking

3. On February 18, 2021, the Commission issued a notice of proposed rulemaking (NOPR) proposing to: (1) Remove the requirement that a notice of intent to construct a qualifying conduit include a profile drawing showing the source of the hydroelectric potential in instances where a dam would be constructed in association with the facility; and (2) extend the licensing requirements that currently apply to major projects up to 5 megawatts (MW) to major projects 10 MW or less, consistent with the amended definition of a small hydroelectric power project in the 2013 HREA. 2 The Commission did not receive any comments in response to the NOPR. The proposal set forth in the NOPR and the Commission’s determination are discussed below.

III. Discussion

A. Qualifying Conduit

4. The NOPR explained that the 2013 HREA amended section 30 of the FPA to create a subset of small conduit facilities that are categorically excluded from the licensing and exemption requirements of the FPA. In 2014, the Commission issued Order No. 800, which became effective February 23, 2015, defining a “qualifying conduit hydropower facility” at § 4.30(b)(26) of its regulations. 3 Subsequently, section 30 of the FPA was amended by the
