Based on the NRC staff's (i) review of the license renewal application request, which includes the environmental report, supplemental documents, and the licensee's responses

to the NRC staff's requests for additional information; (ii) consultation with Federal, State, and Tribal agencies and input from other stakeholders; and (iii) independent review as documented in the assessments summarized in the draft EIS, the NRC staff has concluded that the proposed action would result in small impacts on all resource areas except for groundwater resources for which the impacts would be small to moderate.

Interim Storage Partners Consolidated Interim Storage Facility Project

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental impact statement; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing its final Environmental Impact Statement (FEIS) for Interim Storage Partners' (ISP's) license application to construct and operate a consolidated interim storage facility (CISF) for spent nuclear fuel (SNF) and Greater-Than-Class C (GTCC) waste, along with a small quantity of mixed oxide (MOX) fuel. The proposed CISF would be located on an approximately 130-hectare (320-acre) site, within the approximately 5,666-hectare (14,000-acre) Waste Control Specialists (WCS) site in Andrews County, Texas. The proposed action is the issuance of an NRC license authorizing a CISF to store up to 5,000 metric tons of uranium (MTUs) [5,500 short tons] of SNF for a license period of 40 years.

DATES: The FEIS referenced in this document is available on August 6, 2021.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is making available the FEIS for the license application submitted by ISP to construct and operate a CISF for SNF and GTCC waste, along with a small quantity of MOX fuel, which are collectively referred to in the EIS as SNF, and composed primarily of spent uranium-based fuel. The NRC published the draft EIS in the **Federal Register** on May 8, 2020 (85 FR 27447), and the Environmental Protection Agency noticed the availability of the draft EIS on May 8, 2020 (85 FR 27412). The public comment period on the draft EIS ended on November 3, 2020, and the comments received are addressed in the FEIS. The FEIS is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

The NRC is issuing the FEIS for an application from ISP requesting a license to authorize construction and operation of a CISF for SNF at the WCS site in Andrews County, Texas. ISP's

proposed location for its CISF is on an approximately 130-hectare (320-acre) site, within the approximately 5,666-hectare (14,000-acre) WCS site in Andrews County, Texas. The proposed action is the issuance of an NRC license authorizing a CISF to store up to 5,000 MTUs [5,500 short tons] of SNF for a license period of 40 years.

The FEIS is being issued as part of the NRC's process to decide whether to issue a license to ISP pursuant to 10 CFR part 72. In this FEIS, the NRC staff has assessed the potential environmental impacts to construct and operate the proposed CISF. The NRC staff assessed the impacts of the proposed action and the No-Action alternative on land use; transportation; geology and soils; water resources; ecological resources; air quality; noise; historical and cultural resources; visual and scenic resources; socioeconomics; environmental justice, public and occupational health, and waste management. Additionally, the FEIS analyzes and compares the benefits and costs of the proposed action and the No-Action alternative. In preparing this FEIS, the NRC staff also considered, evaluated, and addressed the public comments received on the draft EIS. Appendix D of the FEIS summarizes the public comments received and the NRC's responses.

After comparing the impacts of the proposed action to those of the No-Action alternative, the NRC staff, in accordance with the requirements in part 51 of 10 CFR, recommends the proposed action, subject to the determinations in the staff's safety review of the application. This recommendation is based on (i) the ISP license application, which includes an environmental report and supplemental documents, and ISP's responses to the NRC staff's requests for additional information; (ii) the NRC staff's consultation with Federal, State, tribal, local agencies, and input from other stakeholders, including members of the public; (iii) the NRC staff's independent review; and (iv) the NRC staff's assessments provided in the FEIS.

Dated: July 29, 2021.

Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
