ACTION: Draft environmental impact statement; request for comment and public comment meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft Environmental Impact Statement (EIS) for Westinghouse Electric Company, LLC’s (WEC’s) license renewal application to continue to operate its Columbia Fuel Fabrication Facility (CFFF) for an additional 40 years. The CFFF is located in Hopkins, South Carolina, and manufactures nuclear fuel assemblies for commercial nuclear power plants. The WEC’s license renewal renewal request, if granted as proposed, would allow the CFFF to continue to be a source of nuclear fuel for commercial nuclear power plants for 40 years from the date the NRC approves the renewal.

DATES: The NRC staff will hold a virtual public meeting through online webinar and teleconference call on the draft EIS at 6:00 p.m. (ET) on August 26, 2021. The NRC staff will present the preliminary findings documented in the draft EIS and receive public comments during this virtual, transcribed public meeting. Members of the public are invited to submit comments by September 20, 2021. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

III. Discussion

The NRC is issuing for public comment the draft EIS for WEC’s license renewal application, which includes the NRC staff’s analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. Based on the NRC staff’s review of the license renewal application request, which includes the environmental report, supplemental documents, and the licensee’s responses to the NRC staff’s requests for additional information; (ii) consultation with Federal, State, and Tribal agencies and input from other stakeholders; and (iii) independent review as documented in the assessments summarized in the draft EIS, the NRC staff has concluded that the proposed action would result in small impacts on all resource areas except for groundwater resources for which the impacts would be small to moderate.
