

The Final EIS determined that the Full Implementation Alternative and Partial Implementation Alternative would have potentially significant adverse impacts on waters of the U.S., including wetlands, from the construction and operation of new facilities and infrastructure. Adverse impacts on all other resources analyzed in the Final EIS, including the 100-year floodplain on DAAF, would be less-than-significant under either action alternative. Adherence to applicable regulatory permitting requirements would mitigate significant adverse effects on waters of the U.S. to the extent possible. Management measures would be implemented to avoid or minimize less-than-significant adverse impacts on all other resources. Both action alternatives would have beneficial effects on land use, plans, and aesthetics, and the management of hazardous materials and waste on the airfield.

In compliance with Executive Order (E.O.) 11988, *Floodplain Management* and E.O. 11990, *Protection of Wetlands*, the Army prepared a FONPA explaining its decision to implement the Proposed Action in the 100-year floodplain and wetlands on DAAF.

The Army conducted a 45-day public review and comment period for the Draft EIS and Draft FONPA between July 24 and September 8, 2020, including two publicly accessible teleconferences on August 24, 2020. Comments received during the public comment period were considered by the Army and are addressed accordingly in the Final EIS. None of the comments required substantive changes to the Proposed Action, alternatives, or impact analysis.

The Final EIS and FONPA are being made available to the public for 30 days in accordance with the Army NEPA regulations under 32 CFR 651. Electronic copies of these documents will be available for review or download on Fort Belvoir's website at: <https://home.army.mil/belvoir/index.php/about/Garrison/directorate-public-works/environmental-division>. Due to closures of public facilities associated with the COVID-19 pandemic, printed copies of the Final EIS and FONPA will not be made available at local public libraries. A printed copy of the Final EIS or FONPA may be requested from Fort Belvoir DPW-ED at the phone number or email address provided above.

The Army will prepare and publish its Record of Decision (ROD) for the Proposed Action no sooner than 30 days after the publication of this NOA for the Final EIS. The ROD will identify the Environmentally Preferred Alternative,

the Army's Selected Alternative for implementing the Proposed Action, and the mitigation and protective measures that will be incorporated to prevent or minimize potential adverse impacts. Publication of the ROD will formally conclude the NEPA process for the DAAF ADP EIS.

The contract clause at DFARS 252.204-7010, as prescribed at DFARS 204.470-3, is included in contracts for research and development or major defense acquisition programs involving fissionable materials (e.g., uranium, plutonium, neptunium, thorium, americium); other radiological source materials; or technologies directly related to nuclear power production, including nuclear or radiological waste materials.

The clause requires a contractor to provide written notification to the applicable DoD program manager and a copy of the notification to the contracting officer if the contractor is required to report its activities under the U.S.-IAEA Additional Protocol. Upon such notification, DoD will determine if access may be granted to IAEA inspectors, or if a national security exclusion should be applied.
