The enhancement of survival permits authorize the incidental taking of the covered species associated with routine agricultural activities, implementation of BMAs, and the potential future return of the enrolled property to the baseline or elevated baseline conditions identified in the respective Site Plan Agreement. Under the enhancement of survival permits, Site Plan Agreements, and Agreement, the permittees specify the restoration and/or enhancement, and management activities to be carried out on the enrolled properties and a timetable for implementing those activities. NMFS prepared a biological opinion under section 7(a)(2) of the ESA to determine whether NMFS' actions of entering into the Agreement and the 14 associated Site Plan Agreements, and issuing the 14 section 10(a)(1)(A) enhancement of survival permits, would result in jeopardy to the covered species or destroy or adversely modify their designated critical habitat. NMFS determined that these actions would not result in jeopardy or destruction or adverse modification of designated critical habitat. NMFS also determined that the Agreement and Site Plan Agreements will result in a net conservation benefit for the covered species and meet all required standards of NMFS' Safe Harbor Policy (64 FR 32717; June 17, 1999). The Agreement and Site Plan Agreements specify baseline or elevated baseline conditions for the enrolled properties and include restoration/enhancement activities that will be completed by the permittee to achieve the specified conditions. The

Agreement also contains a monitoring component and an Adaptive Management Program that requires the permittees to ensure compliance with the terms and conditions of the Agreement, and to ensure that the baseline or elevated baseline conditions of habitat for the covered species occur on the enrolled properties. Results of the monitoring efforts will be provided to NMFS by the permittees in annual reports for the duration of the 20-year permit term. In addition to reviewing annual reports submitted by SWCG, NMFS, and CDFW will conduct a five-year review to assess the effectiveness of the Agreement.

At the end of the permit term and Agreement, the enhancement of survival permits authorize the permittees to incidentally take covered species associated with a return to baseline or elevated baseline conditions if desired and in compliance with the terms and conditions of the permits.

Office of the Secretary

[Docket ID: DoD–2021–OS–0083]

Privacy Act of 1974; System of Records

AGENCY: Defense Information Systems Agency (DISA), Department of Defense (DoD).

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the DoD is modifying and reissuing a current system of records titled Enterprise Application and Services Forest (EASF), K890.15. This system of records was originally established by the DISA to collect and maintain records on the core active directory (AD) Infrastructure (domain controllers) for Enterprise Services such as DoD Enterprise Email (DEE), Identity Synchronization Services (IdSS), and DoD Enterprise Portal Service (DEPS). It is an Enterprise-wide hierarchical directory structure designed to employ greater centralization and standardization of network management for user data, security, and distributed resources and services across the DoD Enterprise. This system of records notice (SORN) is being updated to make various compliance changes as well as add DoD's standard routine uses.

DATES: This system of records is effective upon publication; however, comments on the Routine Uses will be accepted on or before September 9, 2021. The Routine Uses are effective at the close of the comment period.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal:* <https://www.regulations.gov>.

Follow the instructions for submitting comments.

* *Mail:* DoD cannot receive written comments at this time due to the COVID–19 pandemic. Comments should be sent electronically to the docket listed above.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at <https://www.regulations.gov> as they are

received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mrs. Jeanette M. Weathers-Jenkins, DISA Privacy Officer, 6914 Cooper Ave, Fort Meade, MD 20755–7090, or by phone at (301) 225–8158.

SUPPLEMENTARY INFORMATION:

I. Background

The DISA is modifying the K890.15 EASF system of records to allow the provision of user accounts, and to authenticate users to DoD enterprise Web applications (*e.g.*, Defense Collaboration Services, Defense Enterprise Portal, DEE) for non-dual persona personnel with DoD's Personal Identity Verification (PIV)—Authentication (Auth) certificate, rather than DoD's Email signing certificate. Subject to public comment, the DoD proposes to update this SORN to add the standard DoD routine uses (routine uses A through I) and to allow for additional disclosures outside DoD related to the purpose of this system of records. Additionally, the following sections of this SORN are being modified as follows: (1) To the Authority for Maintenance of the System section to update citation(s) and add additional authorities; (2) purpose of the system to improve clarity; (3) to the Categories of Individuals Covered by the System section to expand the individuals covered and Categories of Records to clarify how the records relate to the revised Category of Individuals; (4) Record Source Categories to account for Five Eyes partners and Coalition partners exchange in order to populate the information into the Five Eyes national directory; (5) Routine Uses to align with DoD's standard routine uses; (6) to the Administrative, Technical, and Physical Safeguards to update the individual safeguards protecting the personal information; (7) to the Record Access Procedures section to reflect the
