SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. Background Information

On March 9, 2021, EPA proposed to approve elements of a SIP submission from Ohio regarding the infrastructure requirements of CAA section 110 for the 2015 ozone NAAQS. The infrastructure requirements are designed to ensure that the structural components of each state’s air quality management program are adequate to meet the state’s responsibilities under the CAA. An explanation of the CAA requirements, a detailed analysis of the revisions, and

EPA’s reasons for proposing approval were provided in the notice of proposed rulemaking and will not be restated here.

The public comment period for this proposed rule ended on April 9, 2021. During the comment period, EPA received 3 comments that covered a variety of topics including: Support of the proposed action and questions regarding how EPA ensures that states are complying with the approved SIP; what other measures beyond the SIP states must follow; how EPA determines if emissions from one state impact air quality in another state; and how EPA informs the public of adverse air quality conditions. All of the comments received are included in the docket for this action.

We do not consider these comments to be germane or relevant to the specifics of this action and therefore not adverse to this action. The comments lack the required specificity to the proposed SIP revision and the relevant requirements of CAA section 110. Moreover, none of the comments address a specific regulation or provision in question, or recommend a different action on the SIP submission from what EPA proposed. Therefore, we are finalizing our action as proposed.

II. Final Action

EPA is approving most elements of a submission from Ohio certifying that its current SIP is sufficient to meet the infrastructure requirements in CAA sections 110(a)(1) and (2) with respect to the 2015 Ozone NAAQS. EPA’s final actions for the state’s satisfaction of infrastructure SIP requirements, by element of section 110(a)(2) are contained in the table below.

Element	2015 ozone NAAQS
(A)—Emission limits and other control measures	A
(B)—Ambient air quality monitoring/data system	A

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
 - Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
 - Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
 - Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).
- In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).
- The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General

of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 12, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)
