Congressional, federal, and state officials. The online tool is expected to enhance better insights on GRPP’s Congressional engagements, and to enhance the ability for more centralized and trackable delivery of information to Congress.

A new Purpose is being added toSOR100.200, Employee Performance Records, along with a new Category of Records and record retention and disposal policy that pertain to records maintained by the online tool. III. Description of the Modified System of Records

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on information to members of Congress and their staff, and to track the number of engagements with members of Congress and their staff for internal reporting purposes. GRPP will also enter notes in the tool to memorialize details of engagements with members of Congress and Congressional staff that will be maintained to provide historical perspectives to all GRPP personnel who may be involved in future engagements with the same officials.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service is proposing to modify USPS SOR 100.200 Employee Performance Records to support the implementation of an online tool by the GRPP department that will be used to more effectively manage relationships with Congressional, federal, and state officials. Implementation of the use of the online tool is expected to enhance legislative and public policy research, tracking and analysis capabilities, gain better insights on GRPP’s Congressional engagements, and to enhance the ability for more centralized and trackable delivery of information to Congress.

Additionally, GRPP will use the communications features of the tool to send educational and advocacy communications and records Management Office, 202–268–3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the Federal Register when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service is proposing revisions to an existing system of records (SOR) to support the implementation of an online tool that will be used to track meetings and interactions for the Government Relations and Public Policy department within the Postal Service.

I. Background

The Government Relations and Public Policy (GRPP) department is responsible for managing public policy issues at all levels. This includes legislation and other policies affecting the Postal Service, as well as developing public policy strategy, tactics and messaging, and serving as the primary representative with Congress, the Executive Branch, and other government leaders. GRPP is implementing the use of an online tool used by public policy professionals across all industries to manage relationships with Congressional, federal, and state officials. The online tool also provides public policy professionals with enhanced legislative and public policy research and analysis tools. GRPP will primarily use the online tool to research and track legislative and public policy actions of members of Congress and Congressional committees to determine if such action could impact the Postal Service. Additionally, GRPP will use the communications features of the tool to send educational and advocacy.
