SUPPLEMENTARY INFORMATION:

Title: FERC-520 (Application for Authority to Hold Interlocking Directorate Positions).

OMB Control No.: 1902-0083.

Type of Request: Three-year extension of the FERC-520 information collection requirements with no revisions to the current requirements.

Abstract: FERC Form No. 520 is an application requesting FERC authorization for officers and directors of regulated public utilities to simultaneously hold positions of officers and directors of certain other entities. Section 305(b)(1) of the Federal Power Act (FPA)¹ prohibits the holding of specific interlocking positions unless the Commission has authorized the holding of such interlocks upon a determination that neither public nor

private interests will be adversely affected.

FERC-520 consists of three information collection activities. A “full application,” in accordance with 18 CFR 45.8, provides detailed information about the positions for which authorization is sought, including a description of duties. Submission of a more streamlined “informational report,” in accordance with 18 CFR 45.9, is a condition for an automatic grant of authorization to hold interlocking directorates. This automatic authorization is available only to certain types of officers and directors. Finally, a “notice of change,” in accordance with 18 CFR 45.5, is required within 60 days after an officer or director resigns or withdraws from Commission-authorized interlocked positions or if the applicant is not re-elected or reappointed to the interlocked position. However, no notice of change is required if the only change is: (1) A resignation or withdrawal from fewer than all position held between or among affiliated public utilities; (2) a reelection or reappointment to a position that was previously authorized; or (3) holding a different or additional interlocking position that would qualify for automatic authorization under 18 CFR 45.9.

Types of Respondents: Officers and directors of public utilities seeking authorization to hold interlocking directorates.

Estimate of Annual Burden: For full applications, 16 responses annually, and per-response burdens of 50 hours and \$69,600. For informational reports, 500 responses annually, and per-response burdens of 8 hours and \$348,000. For notices of change, 100 responses annually, and per-response burdens of 0.25 of an hour and \$2,175. The total estimated burdens per year are 616 responses, 4,825 hours and \$419,775. These burdens are itemized in the following table:

Number of respondents	Number of respondents	Annual number of responses per respondent	Total number of responses (column A × column B)	Average burden & cost per response ²	Total annual burden hours & total annual cost (column C × column D)	Cost per respondent (column E ÷ column A)
	A	B	C	D	E	F
Full Application	16	1	16	50 hrs.; \$4,350	800 hrs.; \$69,600	\$4,350
Informational Report	500	1	500	8 hrs.; \$696	4,000 hrs.; \$348,000	\$696
Notice of Change	100	1	100	0.25 hrs.; \$21.75 ...	25 hrs.; \$2,175	\$21.75

¹ 16 U.S.C 825d(b)(1).

² Commission staff estimates that the average industry hourly cost for this information collection is approximated by the current FERC 2021 average

hourly costs for wages and benefits, *i.e.*, \$87.00/hour.

Number of respondents	Number of respondents	Annual number of responses per respondent	Total number of responses (column A × column B)	Average burden & cost per response ²	Total annual burden hours & total annual cost (column C × column D)	Cost per respondent (column E ÷ column A)
	A	B	C	D	E	F
Totals	616	N/A	616	N/A	4,825 hrs.; \$419,775	N/A

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Title: FERC-725A (Mandatory Reliability Standards for the Bulk-Power System).

OMB Control No.: 1902-0244.

Type of Request: Three-year extension of the FERC-725A information collection requirements with no changes to the current reporting requirements.

Abstract: On August 8, 2005, the Electricity Modernization Act of 2005, which is Title XII, Subtitle A, of the Energy Policy Act of 2005 (EPAct 2005), was enacted into law.¹ EPAct 2005 added a new section 215 to the FPA, which requires a Commission-certified electric reliability organization (ERO) (FERC-725) to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval. Once approved, the Reliability Standards may be enforced by the ERO, subject to Commission oversight or the Commission can independently enforce Reliability Standards (FERC-725A).²

On February 3, 2006, the Commission issued Order No. 672, implementing section 215 of the FPA.³ Pursuant to Order No. 672, the Commission certified one organization, NERC, as the ERO.⁴ The ERO is required to develop Reliability Standards, which are subject to Commission review and approval. The Reliability Standards will apply to users, owners and operators of the Bulk-Power System, as set forth in each Reliability Standard.

On March 16, 2007, the Commission issued Order No. 693, a Final Rule adding part 40, a new part, to the

¹ Energy Policy Act of 2005, Public Law 109-58, Title XII, Subtitle A, 119 Stat. 594, 941 (2005), to be codified at 16 U.S.C. 824o.
