Filing System (IBFS). The versions of FCC Forms 314, 315, and 316 to be used by International Bureau licensees were renamed as FCC Form 314–IBFS, FCC Form 315–IBFS and FCC Form 316–IBFS. These forms will only be used by the International Broadcast stations in IBFS.

Under 47 CFR 73.3540, the filings of the FCC Forms 314–IBFS, 315–IBFS, and 316–IBFS are required when applying for consent for assignment of a broadcast station construction permit or license. In addition, the applicant must notify the Commission when an approved assignment or transfer of control of a broadcast station construction permit or license has been consummated.

The FCC Forms 314, 315, and 316 were previously shared between the Media Bureau and the International Bureau. The forms were used by the International Bureau for International Broadcast stations and by the Media Bureau for other broadcast licenses. These FCC Forms were previously approved by Office of Management and Budget (OMB) for use by Media Bureau licensees under OMB 3060–0031 and OMB 3060–0009. Due to an administrative error, however, the information collections in 47 CFR 73.3540 did not have a current OMB approval with a control number that explicitly includes International Broadcast stations in the collection.

The obligations in 47 CFR 73.3540 (Application for voluntary assignment or transfer of control) were initially promulgated as a Part 1 rule, 47 CFR 1.540, prior to PRA, and in 1979, the Commission redesignated that provision as 47 CFR 73.3540 in an effort to restructure and consolidate all broadcast rules into Part 73 rules (44 FR 38496).

On April 1, 1981, the collections in 47 CFR 73.3540 for transfers of control and assignments of broadcast stations (OMB 3060–0009, OMB 3060–0031) were approved. These approved collections cover the use of FCC Forms 314, 315, and 316. Due to an administrative error, however, currently, these OMB approved information collections do not explicitly include International Broadcast stations’ applications and their use of these FCC forms.

Specifically, the Commission modified its rules to mandate the electronic filing of, among other things, applications for International Broadcast Stations, including applications for voluntary assignments and transfers of control. These mandatory electronic filing requirements will reduce costs and administrative burdens, result in greater efficiencies, facilitate faster and more efficient communications, and improve transparency to the public. The changes to section 73.3540 (c) and (d) state that “[f]or International Broadcast Stations, the application shall be filed electronically in the International Bureau Filing System (IBFS).” There are currently fewer than 20 International Broadcast stations subject to obligations in section 73.3540, and the International Bureau receives an average of one application involving voluntary transactions per year pursuant to section 73.3540.

General Description of Collection: There has been no change in the method or substance of this information collection. The number of institutions subject to the record keeping requirements has decreased from eight (8) to two (2). In 2008 the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the FDIC issued a supervisory guidance document related to the supervisory review process of capital adequacy (Pillar 2) in connection with the implementation of the Basel II Advanced Capital Framework.1 Sections 37, 41, 43 and 46 of the guidance include possible information collections. Section 37 provides that banks should state clearly the definition of capital used in any aspect of its internal capital adequacy assessment process (ICAAP) and document any changes in the internal definition of capital. Section 41 provides that banks should maintain thorough documentation of its ICAAP. Section 43 specifies that the board of directors should approve the bank’s ICAAP, review it on a regular basis and approve any changes. Section 46 recommends that boards of directors periodically review the assessment of overall capital adequacy and analyze how measures of internal capital adequacy compare with other capital measures such as regulatory or accounting.
