SUPPLEMENTARY INFORMATION:

I. General Information

A. Public Comment Information

Any interested person may submit comments on the draft permits using the

mechanisms listed above. As of the date of this document, a public hearing has not been scheduled. Within the comment period, interested persons may also submit a request, to the contact listed above, that EPA hold a public hearing pursuant to 40 CFR 124.12, concerning the draft permits. Such requests shall state the nature of the issues proposed to be raised at the hearing. A public hearing may be held at least thirty (30) days after public notice if the Regional Administrator finds that response to this document indicates significant public interest. All comments and requests for public hearings must be received in writing by the close of the public comment period. At the time of the final decision on these draft permits, EPA will respond to all significant comments and make responses available in the docket after the PN period has closed, within the final fact sheet associated with the final permits.

B. Submitting CBI

Do not submit this CBI to EPA through <http://regulations.gov> or email. If you intend to submit CBI information, please email or call: Alysia Tien, Wastewater Section, (303) 312-7021 or tien.alysia@epa.gov to make arrangements prior to submission. When submitting, clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM, mark the outside of the disk or CD ROM as CBI and identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket.

II. Background

The proposed draft permits are similar to the existing permits and will authorize discharge of wastewater in accordance with the terms and conditions described therein. The fact sheet for the draft permits is also provided, in the docket listed above, and provides detailed information on: The decisions used to set limitations, the specific geographic areas covered by the draft permits, information on monitoring schedules, inspection requirements, and other regulatory decisions or requirements.

Issuance of these permits will cover discharges from wastewater lagoon systems located in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. The draft permits are geographic by state, with the permit

coverage specified by Indian reservations in the state [specific permit coverage areas below]; any land held in trust by the United States for an Indian tribe; and any other areas which are Indian country within the meaning of 18 U.S.C. 1151.

III. Summary of Draft Permits

Coverage under the draft permits will be limited to lagoon systems treating primarily domestic wastewater and will include two categories of coverage; discharging lagoons (DIS), and lagoons expected to have no discharge but with the potential to discharge (NODIS). The effluent limitations for discharging lagoons are primarily based on the Federal Secondary Treatment Regulation (40 CFR part 133). However, if more stringent and/or additional effluent limitations were considered necessary to comply with applicable water quality standards, etc., those limitations and the basis for them are explained in the fact sheet and will be imposed by written notification to the permittee. Lagoon systems under the NODIS category are required to have no discharge except in accordance with the specific provisions of the permit (e.g., bypass). Self-monitoring, operation and maintenance, routine inspection and other requirements are also included in the draft permits. Where tribes have Clean Water Act (CWA) section 401(a)(1) certification authority, EPA has requested certification that the draft permits comply with applicable provisions of the CWA and any currently approved tribal water quality standard, in accordance with processes outlined in 40 CFR part 124.

IV. Other Legal Requirements

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not subject to submission to the Office of Management and Budget (OMB) for formal review.

B. Executive Order 12898: Federal Actions To Address Environmental Justice (EJ) in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629 (February 16, 1994)) establishes federal executive policy on EJ. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make EJ part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA conducted an EJ Analysis, which is described in Section VII of the fact sheet. EPA has preliminarily determined that the draft permits will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations based on the effluent limits and reporting requirements contained therein. EPA requests comment on this preliminary determination and/or any modifications EPA could make to the proposed permits to address EJ concerns.
