IV. Cancellation Order

Pursuant to FIFRA section 6(f) (7 U.S.C. 136d(f)), EPA hereby approves the requested cancellations of the registrations identified in Table 1 of Unit II. Accordingly, the Agency hereby orders that the product registrations identified in Table 1 of Unit II are canceled. V. What is the Agency's authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the EPA

Administrator may approve such a request. The notice of receipt for this action was published for comment in the **Federal Register** of February 17, 2021 (86 FR 9932) (FRL-10019-59). The comment period closed on August 16, 2021.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. The existing stocks provisions for the products subject to this order are as follows.

The registrants may continue to sell and distribute existing stocks of products listed in Table 1 of Unit II until September 5, 2022, which is 1-year after the publication of the Cancellation Order in the **Federal Register**.

Persons other than the registrants may sell, distribute, or use existing stocks of products listed in Table 1 of Unit II until existing stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products.

Abstract: The Clean Watersheds Needs Survey (CWNS) is required by Clean Water Act (CWA) Sections 205(a) and 516. It is a periodic inventory of existing and planned publicly owned wastewater conveyance and treatment facilities, combined sewer overflow correction, stormwater management and other water pollution control facilities in the United States, as well as an estimate of how many of these facilities need to be built. The CWNS is a joint effort between EPA and the states. The CWNS collects cost and technical data from states that are associated with publicly owned treatment works (POTWs) and other water pollution control facilities, existing and planned. The respondents who provide this information to EPA are state agencies responsible for environmental pollution control and local facility contacts who provide documentation to the states. Periodically, the states request data or documentation from contacts at the facility or local government level. These respondents are referred to as facilities.

No confidential information is used, nor is sensitive information collected that would be protected from release under the Public Information Act. EPA achieves national consistency in the final results through the application of uniform guidelines and validation techniques.

Form Numbers: None.

Respondents/affected entities: States, Territories, and Local Facilities.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 56 States and Territories, 5,349 Local Facilities (total).

Frequency of response: Every 4 years.

Total estimated burden: 9,645 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$505,004 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 541 hours and \$134,820 in the total estimated respondent burden compared with the ICR previously approved by OMB. This increase is based upon an increase in facility universe, as well as an adjustment in labor rates and benefits.

Director, Regulatory Support Division.

Needs and Uses: In 2012, the Commission replaced the decades-old requirement that commercial and noncommercial television stations maintain public files at their main studios with a requirement to post most of the documents in those files to a central, online public file hosted by the Commission. On January 28, 2016, the Commission adopted a Report and Order ("R&O") in MB Docket No. 14-127, FCC 16-4, In the Matter of Expansion of Online Public File Obligations to Cable and Satellite TV Operators and Broadcast and Satellite Radio Licensees, expanding the requirement that public inspection files be posted to the FCC-hosted online public file database to satellite TV (also referred to as "Direct Broadcast Satellite" or "DBS") providers and to satellite radio (also referred to as "satellite Digital Audio Radio Services" or "SDARS") licensees, among other entities. The Commission stated that its goal is to make information that these entities are already required to make publicly available more accessible while also reducing costs both for the government and the public sector. The Commission took the same general approach to transitioning these entities to the online file that it took with television broadcasters in 2012, tailoring the requirements as necessary to the different services. The Commission also took similar measures to minimize the effort and cost entities must undertake to move their public files online. Specifically, the Commission required entities to upload to the online public file only documents that are not already
