owner, operator, and/or other responsible party of [the] petroleum UST system for the cost of generating duplicate data,” insofar as this text pertains to the State Fund.

(8) 0400–18–01–06(3)(f), insofar as it provides eligibility requirements for the State Fund.

(9) 0400–18–01–06(7)(c), insofar as it provides for reimbursement from the State Fund.

(10) Appendix 0400–18–01–07–A, as to the text “transport and” in (4)(a) and (4)(e), insofar as these provisions pertain to the transportation of a tank.

(11) 0400–18–01–08(5)(a) and (b), insofar as these provisions establish eligibility requirements for the State Fund.

(12) 0400–18–01–09(1) through (16), insofar as these provisions regulate disbursements, coverage, and fund eligibility regarding the State Fund and provide for approval of corrective action contractors and recovery of State costs.

(13) 0400–18–01–09(18) is external insofar as it pertains to the severability of the rule.

(14) 0400–18–01–10, insofar as it establishes a system and schedule for the collection of fees under the UST Act.

(15) 0400–18–01–12(3), insofar as it establishes eligibility requirements for the State Fund.

(16) 0400–18–01–12(4), insofar as it pertains to the payment of annual tank fees.

(17) 0400–18–01–14 is external insofar as it contains record retention obligations on the State agency, not a regulated entity.

(2) Statement of legal authority. The Attorney General’s Statement, signed on October 3, 2018, though not incorporated by reference, is referenced as part of the approved underground storage tank program under subtitle I of RCRA, 42 U.S.C. 6991 et seq.

(3) Demonstration of procedures for adequate enforcement. The “Demonstration of Adequate Enforcement Procedures” submitted on October 15, 2018, though not incorporated by reference, is referenced as part of the approved underground storage tank program under subtitle I of RCRA, 42 U.S.C. 6991 et seq.

(4) Program description. The program description and any other material submitted on October 15, 2018, though not incorporated by reference, are referenced as part of the approved underground storage tank program under subtitle I of RCRA, 42 U.S.C. 6991 et seq.

(5) Memorandum of Agreement. The Memorandum of Agreement between EPA Region 4 and TDEC, signed by the EPA Regional Administrator on October 12, 2018, though not incorporated by reference, is referenced as part of the approved underground storage tank program under subtitle I of RCRA, 42 U.S.C. 6991 et seq.

3. Amend appendix A to part 282 by revising the entry for Tennessee to read as follows:

Appendix A to Part 282—State Requirements Incorporated by Reference in Part 282 of the Code of Federal Regulations

Tennessee

(A) The statutory provisions include:

1. 68–215–101 Short Title.

2. 68–215–103 Definitions, except (17)(A)(iii) and (iv).

3. 68–215–104 Prohibitions, except (3) and (4).

4. 68–215–105 Minimum standards. 68–215–106 Notice; certificates and certification; except (a)(6), (b)(1), (b)(2), and (c) through (f).

5. 68–215–107 Supervision; orders; enforcement; rules and regulations; except (a) through (g)(1).

6. 68–215–110 Fund; environmental assurance fee; except (b) through (h).

8. 68–215–113 Repealed.

13. 68–215–202 Ownership of petroleum site or petroleum underground storage tank or property on which a petroleum site or petroleum underground tank is located.

14. 68–215–203 Operation prior to and after foreclosure.

15. 68–215–204 Participation in the management.

(B) The regulatory provisions include:

0400–18–01–01 Program Scope, Definitions, and Proprietary Information Applicability; except (4)(i) and (iv) of the definition for “Responsible party” and (5).

0400–18–01–02 UST Systems: Installation and Operation; except (1)(a) and (4)(e)(iii)(I)IV.

0400–18–01–03 Notifications, Reporting, and Record Keeping.

0400–18–01–04 Release Detection; except (1)(e).

0400–18–01–05 Release Reporting, Investigation, and Confirmation; except (1)(b) and (c).

0400–18–01–06 Petroleum Release Response, Remediation, and Risk Management; except for the text “The fund shall not reimburse the owner, operator, and/or other responsible party of petroleum UST systems for the cost of generating duplicate data” in (2)(b)1. Also, except (3)(f), (7)(c), and (11)(b) and (c).

0400–18–01–08 Financial Responsibility; except (5)(a), (5)(b), (20), and (21).

0400–18–01–12 Indicia of Ownership; except (3) and (4).

0400–18–01–13 Reserved.

0400–18–01–16 Certified Operator Program.

0400–18–01–17 UST Systems with Field-Constructed Tanks and Airport Hydrant Systems.

(C) Copies of the Tennessee statutes and regulations that are incorporated by reference are available from the Tennessee Department of Environment and Conservation, Division of Underground Storage Tanks, William R. Snodgrass Tennessee Tower, 12th Floor, 312 Rosa L. Parks Ave., Nashville, TN 37243; Phone number: (615) 532–0730; website: https://www.tn.gov/environment/program-areas/ust-underground-storage-tanks/ust/rules-and-policies.html.

[F.R. Doc. 2021–19339 Filed 9–8–21; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

National Priorities List

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (“CERCLA” or “the Act”), as amended, requires that the National Oil and Hazardous Substances Pollution Contingency Plan (“NCP”) include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants or contaminants throughout the United States. The National Priorities List (“NPL”) constitutes this list. The NPL is intended primarily to guide the Environmental Protection Agency (“the EPA” or “the agency”) in determining which sites warrant further investigation. These further investigations will allow the EPA to assess the nature and extent of public health and environmental risks associated with the site and to determine what CERCLA-financed remedial action(s), if any, may be appropriate. This rule adds four sites to the General Superfund section of the NPL.
A. May I review the documents relevant to this final rule?
B. What documents are available for review at the EPA Headquarters docket?
C. What documents are available for review at the EPA regional dockets?
D. How do I access the documents?
E. How may I obtain a current list of NPL sites?

IV. Statutory and Executive Order Reviews
A. May I review the documents relevant to this final rule?
B. What is the NCP?
C. What is the National Priorities List (NPL)?
D. How are sites listed on the NPL?
E. What happens to sites on the NPL?
F. Does the NPL define the boundaries of sites?
G. How are sites removed from the NPL?
H. May the EPA delete portions of sites from the NPL as they are cleaned up?
I. What is the Construction Completion List (CCL)?
J. What is the Site-wide Ready for Anticipated Use measure?
K. What is state/tribal correspondence concerning NPL Listing?

II. Availability of Information to the Public
A. May I review the documents relevant to this final rule?
B. What documents are available for review at the EPA Headquarters docket?
C. What documents are available for review at the EPA regional dockets?
D. How do I access the documents?
E. How may I obtain a current list of NPL sites?

III. Contents of This Final Rule
A. Additions to the NPL
B. What did the EPA do with the public comments it received?

IV. Statutory and Executive Order Reviews
A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Executive Order 13771: Reducing Costs
B. Paperwork Reduction Act (PRA)
C. Executive Order 13132: Federalism
D. Regulatory Flexibility Act (RFA)
E. Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets guidelines and procedures for responding to releases and threatened releases of hazardous substances, or releases or substantial threats of releases into the environment of any pollutant or contaminant that may present an imminent or substantial danger to the public health or welfare. The EPA has revised the NCP on several occasions. The most recent comprehensive revision was on March 8, 1990 (55 FR 8666). As required under section 105(a)(8)(A) of CERCLA, the NCP also includes “criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable, taking into account the potential urgency of such action, for the purpose of taking removal action.” “Removal” actions are defined broadly and include a wide range of actions taken to clean up, prevent or otherwise address releases and threatened releases of hazardous substances, pollutants or contaminants (42 U.S.C. 9601(23)).

C. What is the National Priorities List (NPL)?

The NPL is a list of national priorities among the known or threatened releases of hazardous substances, pollutants or contaminants throughout the United States. The list, which is appendix B of the NCP (40 CFR part 300), was required under section 105(a)(8)(B) of CERCLA, as amended. Section 105(a)(8)(B) defines the NPL as a list of “releases” and the highest priority “facilities” and requires that the NPL be revised at least annually. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a...
release of hazardous substances, pollutants or contaminants. The NPL is of only limited significance, however, as it does not assign liability to any party or to the owner of any specific property. Also, placing a site on the NPL does not mean that any remedial or removal action necessarily need be taken.

For purposes of listing, the NPL includes two sections, one of sites that are generally evaluated and cleaned up by the EPA (the “General Superfund section”) and one of sites that are owned or operated by other Federal agencies (the “Federal Facilities section”). With respect to sites in the Federal Facilities section, these sites are generally being addressed by other Federal agencies. Under Executive Order 12580 (52 FR 2923, January 29, 1987) and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody or control, although the EPA is responsible for preparing a Hazard Ranking System (“HRS”) score and determining whether the facility is placed on the NPL.

D. How are sites listed on the NPL?

There are three mechanisms for placing sites on the NPL for possible remedial action (see 40 CFR 300.425(c) of the NCP): (1) A site may be included on the NPL if it scores sufficiently high on the HRS, which the EPA promulgated as appendix A of the NCP (40 CFR part 300). The HRS serves as a screening tool to evaluate the relative potential of uncontrolled hazardous substances, pollutants or contaminants to pose a threat to human health or the environment. On December 14, 1990 (55 FR 51532), the EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. On January 9, 2017 (82 FR 2760), a subsurface intrusion component was added to the HRS to enable the EPA to consider human exposure to hazardous substances or pollutants and contaminants that enter regularly occupied structures through subsurface intrusion when evaluating sites for the NPL. The current HRS evaluates four substances or pollutants and air. As a matter of agency policy, the Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends disassociation of individuals from the release.

- The EPA determines that the release poses a significant threat to public health.
- The EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

The EPA promulgated an original NPL of 406 sites on September 8, 1983 (48 FR 40658) and generally has updated it at least annually.

E. What happens to sites on the NPL?

A site may undergo remedial action financed by the Trust Fund established under CERCLA (commonly referred to as the “Superfund”) only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1). (“Remedial actions” are those “consistent with a permanent remedy, taken instead of or in addition to removal actions” (40 CFR 300.51).) However, under 40 CFR 300.425(b)(2), placing a site on the NPL “does not imply that monies will be expended.” The EPA may pursue other appropriate authorities to respond to the releases, including enforcement action under CERCLA and other laws.

F. Does the NPL define the boundaries of sites?

The NPL does not describe releases in precise geographical terms; it would be neither feasible nor consistent with the limited purpose of the NPL (to identify releases that are priorities for further evaluation), for it to do so. Indeed, the precise nature and extent of the site are typically not known at the time of listing.

Although a CERCLA “facility” is broadly defined to include any area where a hazardous substance has “come to be located” (CERCLA section 101(9)), the listing process itself is not intended to define or reflect the boundaries of such facilities or releases. Of course, HRS data (if the HRS is used to list a site) upon which the NPL placement was based will, to some extent, describe the release(s) at issue. That is, the NPL site would include all releases evaluated as part of that HRS analysis. When a site is listed, the approach generally used to describe the relevant release(s) is to delineate a geographical area (usually the area within an installation or plant boundaries) and identify the site by reference to that area. However, the NPL site is not necessarily coextensive with the boundaries of the installation or plant, and the boundaries of the installation or plant are not necessarily the “boundaries” of the site. Rather, the site consists of all contaminated areas within the area used to identify the site, as well as any other location where that contamination has come to be located, or from where that contamination came.

In other words, while geographic terms are often used to designate the site (e.g., the “Jones Co. Plant site”) in terms of the property owned by a particular party, the site, properly understood, is not limited to that property (e.g., it may extend beyond the property due to contaminant migration), and conversely may not occupy the full extent of the property (e.g., there are uncontaminated parts of the identified property, they may not be, strictly speaking, part of the “site”). The “site” is thus neither equal to, nor confined by, the boundaries of any specific property that may give the site its name, and the name itself should not be read to imply that this site is coextensive with the entire area within the property boundary of the installation or plant. In addition, the site name is merely used to help identify the geographic location of the contamination; and is not meant to constitute any determination of liability at a site. For example, the name “Jones Co. plant site,” does not imply that the Jones Company is responsible for the contamination located on the plant site.

EPA regulations provide that the remedial investigation (“RI”) “is a process undertaken . . . to determine the nature and extent of the problem presented by the release” as more information is developed on site contamination, and which is generally performed in an interactive fashion with the feasibility study (“FS”) (40 CFR 300.5). During the RI/FS process, the release may be found to be larger or smaller than was originally thought, as more is learned about the source(s) and the migration of the contamination. However, the HRS inquiry focuses on an evaluation of the threat posed and therefore the boundaries of the release need not be exactly defined. Moreover, it generally is impossible to discover the full extent of where the contamination “has come to be located” before all necessary studies and remedial work are completed at a site. Indeed, the known
boundaries of the contamination can be expected to change over time. Thus, in most cases, it may be impossible to describe the boundaries of a release with absolute certainty.

Further, as noted previously, NPL listing does not assign liability to any party or to the owner of any specific property. Thus, if a party does not believe it is liable for releases on discrete parcels of property, it can submit supporting information to the agency at any time after it receives notice it is a potentially responsible party.

For these reasons, the NPL need not be amended as further research reveals more information about the location of the contamination or release.

G. How are sites removed from the NPL?

The EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e). This section also provides that the EPA shall consult with states on proposed deletions and shall consider whether any of the following criteria have been met:

(i) Responsible parties or other persons have implemented all appropriate response actions required;
(ii) All appropriate Superfund-financed response has been implemented and no further response action is required; or
(iii) The remedial investigation has shown the release poses no significant threat to public health or the environment and taking of remedial measures is not appropriate.

H. May the EPA delete portions of sites from the NPL as they are cleaned up?

In November 1995, the EPA initiated a policy to delete portions of NPL sites where cleanup is complete (60 FR 55465, November 1, 1995). Total site cleanup may take many years, while portions of the site may have been cleaned up and made available for productive use.

I. What is the Construction Completion List (CCL)?

The EPA also has developed an NPL construction completion list (“CCL”) to simplify its system of categorizing sites and to better communicate the successful completion of cleanup activities (58 FR 12142, March 2, 1993). Inclusion of a site on the CCL has no legal significance.

Sites qualify for the CCL when: (1) Any necessary physical construction is complete, whether or not final cleanup levels or other requirements have been achieved; (2) the EPA has determined that the response action should be limited to measures that do not involve construction (e.g., institutional controls); or (3) the site qualifies for deletion from the NPL. For more information on the CCL, see the EPA’s internet site at https://www.epa.gov/superfund/construction-completions-national-priorities-list-npl-sites-number.

J. What is the Sitewide Ready for Anticipated Use measure?

The Sitewide Ready for Anticipated Use measure represents important Superfund accomplishments and the measure reflects the high priority the EPA places on considering anticipated future land use as part of the remedy selection process. See Guidance for Implementing the Sitewide Ready-for-Reuse Measure, May 24, 2006, Office of Solid Waste and Emergency Response (OSWER) 9365.0–36. This measure applies to final and deleted sites where construction is complete, all cleanup goals have been achieved, and all institutional or other controls are in place. The EPA has been successful on many occasions in carrying out remedial actions that ensure protectiveness of human health and the environment for current and future land uses, in a manner that allows contaminated properties to be restored to environmental and economic vitality. For further information, please go to https://www.epa.gov/superfund/about-superfund-cleanup-process#reuse.

K. What is state/tribal correspondence concerning NPL listing?

In order to maintain close coordination with states and tribes in the NPL listing decision process, the EPA’s policy is to determine the position of the states and tribes regarding sites that the EPA is considering for listing. This consultation process is outlined in two memoranda that can be found at the following website: https://www.epa.gov/superfund/statetribal-correspondence-concerning-npl-site-listing.

The EPA has improved the transparency of the process by which state and tribal input is solicited. The EPA is using the web and where appropriate more structured state and tribal correspondence that: (1) Explains the concerns at the site and the EPA’s rationale for proceeding; (2) requests an explanation of how the state intends to address the site if placement on the NPL is not favored; and (3) emphasizes the transparent nature of the process by informing states that information on their responses will be publicly available.

A model letter and correspondence between the EPA and states and tribes where applicable, is available on the EPA’s website at https://www.epa.gov/superfund/statetribal-correspondence-concerning-npl-site-listing.

II. Availability of Information to the Public

A. May I review the documents relevant to this final rule?

Yes, documents relating to the evaluation and scoring of the sites in this final rule are contained in dockets located both at the EPA headquarters and in the EPA regional offices.

An electronic version of the public docket is available through https://www.regulations.gov (see table below for docket identification numbers). Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facilities identified in section II.D.

<table>
<thead>
<tr>
<th>Site name</th>
<th>City/county, state</th>
<th>Docket ID No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Billings PCE</td>
<td>Billings, MT</td>
<td>EPA–HQ–OLEM–2020–0395</td>
</tr>
<tr>
<td>Northwest Odessa Groundwater</td>
<td>Odessa, TX</td>
<td>EPA–HQ–OLEM–2020–0397</td>
</tr>
</tbody>
</table>
B. What documents are available for review at the EPA Headquarters docket?

The headquarters docket for this rule contains the HRS score sheets, the documentation record describing the information used to compute the score, a list of documents referenced in the documentation record for each site and any other information used to support the NPL listing of the site.

C. What documents are available for review at the EPA regional dockets?

The EPA regional dockets contain all the information in the headquarters docket, plus the actual reference documents containing the data principally relied upon by the EPA in calculating or evaluating the HRS score. These reference documents are available only in the regional dockets.

D. How do I access the documents?

You may view the documents, by appointment only, after the publication of this rule. The hours of operation for the headquarters docket are from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. Please contact the regional dockets for hours. For addresses for the headquarters and regional dockets, see ADDRESSES section in the beginning portion of this preamble.

E. How may I obtain a current list of NPL sites?

You may obtain a current list of NPL sites via the internet at https://www.epa.gov/superfund/national-priorities-list-npl-sites-site-name or by contacting the Superfund docket (see contact information in the beginning portion of this document).

III. Contents of This Final Rule

A. Additions to the NPL

This final rule adds the following four sites to the General Superfund section of the NPL. These sites are being added to the NPL based on an HRS score of 28.50 or above.

<table>
<thead>
<tr>
<th>State</th>
<th>Site name</th>
<th>City/county</th>

</tr>
</tbody>
</table>

B. What did the EPA do with the public comments it received?

The EPA reviewed all comments received on the sites in this rule and responded to all relevant comments. The EPA is adding four sites to the NPL in this final rule. All four sites were proposed for addition to the NPL on September 3, 2020 (85 FR 54970).

The EPA received two comments on the proposed for the Cherokee Zinc-Weir Smelter site. One of the commenters indicated that they would like to see liability for cleanup assigned at the listing stage and questions the addition of liability concerns to the Superfund NPL process. Liability is not considered in evaluating a site under the HRS. The NPL serves primarily as an informational tool for use by the EPA in identifying those sites that appear to present a significant risk to public health or the environment. Listing a site on the NPL does not reflect a judgment on the activities of the owner(s) or operator(s) of a site. It does not require those persons to undertake any action, nor does it assign any liability to any person. This position, stated in the legislative history of CERCLA, has been explained more fully in the Federal Register (48 FR 40658, September 8, 1983, and 53 FR 23988, June 24, 1988).

In addition to the comment regarding liability, there was one comment that is not related to the proposal of the site. The EPA received one comment on the Billings PCE site regarding the site address and description of the site. The commenter asserted that the site address appeared limited to the Big Sky Linen facility despite the multiple possible sources identified in supporting material. The commenter stated that the EPA should revise the HRS documentation record and the site summary to reflect the multiple possible sources of contamination associated with the site. The EPA has revised the street address for the Billings PCE site at promulgation to the intersection of 3rd St. W and Miles Ave., Billings, Montana, the approximate center of the area of observed exposure. The EPA has also revised the HRS documentation record at promulgation to include the new site address.

Additionally, while not commented on, the EPA noted that the trichloroethylene benchmark concentrations shown in HRS documentation record Table 17 contain truncated values and are inconsistent with those documented in Reference 2 of the HRS supporting documentation. The EPA has revised the HRS documentation record at promulgation to: Include the corrected benchmark concentrations in Table 17; remove from Table 17 3 samples whose trichloroethylene concentrations fall below the corrected benchmarks; and adjust the Level I concentrations, Level II concentrations, and population factor values and targets factor category value accordingly. Based on these corrections, the subsurface intrusion component score and HRS site score remain unchanged.

The EPA has revised the HRS documentation record and the site summary to reflect the multiple possible sources of contamination associated with a site. The EPA also revised the HRS documentation record at promulgation to include the new site address.

The EPA received one comment on the Pioneer Metal Finishing Inc site expressing concern for environmental justice and air pollution impacts on minority communities but did not express support or opposition to listing the site.

The EPA received two comments supporting the listing of the Northwest Odessa Groundwater site, with one commenter expressing concerns regarding the health impacts of the plume and the other expressing concern that the groundwater plume is spreading and impacting nearby mixed commercial and residential areas. One additional comment was a duplicate of the comment submitted on the Pioneer Metal Finishing Inc site.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at https://www.epa.gov/laws-regulations/laws-and-executive-orders.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.
B. Executive Order 13771: Reducing Regulation and Controlling Regulatory Costs

This action is not an Executive Order 13771 regulatory action because this action is not significant under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA. This rule does not contain any information collection requirements that require approval of the OMB.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. This rule listing sites on the NPL does not impose any obligations on any group, including small entities. This rule also does not establish standards or requirements that any small entity must meet and imposes no direct costs on any small entity. Whether an entity, small or otherwise, is liable for response costs for a release of hazardous substances depends on whether that entity is liable under CERCLA 107(a). Any such liability exists regardless of whether the site is listed on the NPL through this rulemaking.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local, or tribal governments or the private sector. Listing a site on the NPL does not itself impose any costs. Listing does not mean that the EPA necessarily will undertake remedial action. Nor does listing require any action by a private party, state, local or tribal governments or determine liability for response costs. Costs that arise out of site responses result from future site-specific decisions regarding what actions to take, not directly from the act of placing a site on the NPL.

F. Executive Order 13132: Federalism

This final rule does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the National Government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. Listing a site on the NPL does not impose any costs on a tribe or require a tribe to take remedial action. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive order. This action is not subject to Executive Order 13045 because this action itself is procedural in nature (adds sites to a list) and does not, in and of itself, provide protection from environmental health and safety risks. Separate future regulatory actions are required for mitigation of environmental health and safety risks.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations because it does not affect the level of protection provided to human health or the environment. As discussed in Section I.C. of the preamble to this action, the NPL is a list of national priorities. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a release of hazardous substances, pollutants or contaminants. The NPL is of only limited significance as it does not assign liability to any party. Also, placing a site on the NPL does not mean that any remedial or removal action necessarily need be taken.

L. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Provisions of the CRA or section 305 of CERCLA may alter the effective date of this regulation. Under 5 U.S.C. 801(b)(1), a rule shall not take effect, or continue in effect, if Congress enacts (and the President signs) a joint resolution of disapproval, described under section 802. Another statutory provision that may affect this rule is CERCLA section 305, which provides for a legislative veto of regulations promulgated under CERCLA. Although INS v. Chadha, 462 U.S. 919, 103 S. Ct. 2794 (1983), and Bd. of Regents of the University of Washington v. EPA, 86 F.3d 1214,1222 (D.C. Cir. 1996), cast the validity of the legislative veto into question, the EPA has transmitted a copy of this regulation to the Secretary of the Senate and the Clerk of the House of Representatives.

If action by Congress under either the CRA or CERCLA section 305 calls the effective date of this regulation into question, the EPA will publish a document of clarification in the Federal Register.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Natural resources, Oil pollution, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: August 31, 2021.

Barry N. Breen,
Acting Assistant Administrator, Office of Land and Emergency Management.

For the reasons set out in the preamble, title 40, chapter I, part 300, of the Code of Federal Regulations is amended as follows:

PART 300—NATIONAL OIL AND HAZARDOUS SUBSTANCES POLLUTION CONTINGENCY PLAN

1. The authority citation for part 300 continues to read as follows:

Table 1 of appendix B to part 300 is amended by adding the entries for “KS,” “Cherokee Zinc—Weir Smelter,” “MT,” “Billings PCE,” “NJ,” “Pioneer Metal Finishing Inc,” and “TX,” “Northwest Odessa Groundwater” in alphabetical order by state to read as follows:

**Appendix B to Part 300—National Priorities List**
