SUPPLEMENTARY INFORMATION:

I. Background

BSEE maintains the BSEE–01, Investigations Case Management System (CMS), system of records. The purpose of this system of records is to manage, track and report civil administrative investigations related to operations on the Outer Continental Shelf (OCS). BSEE conducts investigations on safety concerns, environmental risks and incidents which includes but is not limited to reportable injuries, the loss or damage of property, and possible violations of Federal laws and regulations.

While BSEE conducts civil administrative investigations rather than criminal investigations the Bureau may make referrals of possible criminal activity to internal and external law enforcement organizations as appropriate for investigation. Records include known or suspected civil violations; information related to possible criminal activities; incident-related information and observations from other sources; protection efforts; information to justify funding requests and expenditures; investigator training; referrals and/or recommendations related to incident investigations; and evidence.

Incident and non-incident data related to activity occurring on the OCS is collected in support of investigations, regulatory enforcement, homeland security, and security (physical, personnel, stability, environmental, and
