SUPPLEMENTARY INFORMATION: A number of standards issued by the OSHA contain requirements for equipment, products, or materials. These standards often specify that employers use only equipment, products, or material tested or approved by a Nationally Recognized Testing Laboratory. This requirement ensures that employers use safe equipment, products, or materials in complying with the standards. Accordingly, OSHA promulgated the regulation 29 CFR 1910.7, “definition and requirements for a nationally recognized testing laboratory.” The Regulation specifies procedures that organizations must follow to apply for, and to maintain, OSHA’s recognition to test and certify equipment, products, or material for this purpose. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 28, 2021 (86 FR 28913).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.
