

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[MD Docket No. 21–190; FCC 21–98; FRS 46814]

Assessment and Collection of Regulatory Fees for Fiscal Year 2021

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission revises its Schedule of Regulatory Fees to recover an amount of \$374,000,000 that Congress has required the Commission to collect for fiscal year 2021. Section 9 of the Communications Act of 1934, as amended, provides for the annual assessment and collection of regulatory fees under respectively.

DATES: Effective September 22, 2021. To avoid penalties and interest, regulatory fees should be paid by the due date of September 24, 2021.

FOR FURTHER INFORMATION CONTACT: Roland Helvajian, Office of Managing Director at (202) 418–0444.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Report and Order, FCC 21–98, MD Docket No. 21–190, adopted on August 25, 2021 and released on August 26, 2020. The full text of this document is available for public inspection by downloading the text from the Commission’s website at http://transition.fcc.gov/Daily_Releases/Daily_Business/2017/db0906/FCC-17-111A1.pdf.

I. Administrative Matters

A. Final Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act of 1980 (RFA), the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) relating to this *Report and Order*. The FRFA is located at the end of this document.

B. Final Paperwork Reduction Act of 1995 Analysis

2. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

C. Congressional Review Act

2. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that these rules are non-major under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of this Report & Order to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

3. In this *Report and Order*, we adopt a schedule to collect the \$374,000,000 in congressionally required regulatory fees for fiscal year (FY) 2021. The regulatory fees for all payors are due on September 24, 2021.

4. This *Report and Order* addresses the issues that were raised in the *FY 2021 Notice of Proposed Rulemaking* including: (i) The use of non-geographic numbers in the calculation of the number of subscribers for each commercial mobile radio service (CMRS) provider; (ii) ending our phase-in of direct broadcast satellite (DBS) regulatory fees, and have the Media Bureau-based DBS regulatory fee category to be in the same fee category as cable television and internet Protocol Television (IPTV); (iii) continuing to assess regulatory fees for full service broadcast television on population-based methodology that we used for FY 2020, including changes that we adopted previously for stations in Puerto Rico; (iv) apportioning NGSO regulatory fees between the new NGSO fee subcategories for “less complex” NGSO systems and “other” NGSO systems, taking into account the relative benefits provided to them from our oversight and regulatory activities; and (v) extending our streamlined waiver provisions adopted in FY 2020 for FY 2021. These issues are discussed below.

II. Report and Order

A. Issues Raised by Commenters

5. *Broadband DATA Act Implementation.* As part of our FY 2021 appropriation, Congress directed the Commission to assess and collect \$374 million in regulatory fees, of which \$33 million is to be made available for implementing the Broadband DATA Act. Among other things, the Broadband DATA Act requires the Commission to collect standardized, granular data on the availability and quality of both fixed and mobile broadband internet access services, to create a common dataset of all locations where fixed broadband internet access service can be installed (the Fabric), and to create publicly available coverage maps.

6. Several commenters representing the broadcast industry object to the assessment on broadcasters of any portion of the \$33 million designated by Congress to cover the costs of implementation of the Broadband DATA Act as part of the Commission’s FY 2021 appropriation. They argue that broadcasters are not regulated by nor do they benefit from implementation of the Broadband DATA Act. Specifically, that these Broadband DATA Act costs are not overhead costs because they pertain only to certain Commission core bureaus and identifiable entities, namely, broadband service providers, that are regulated by and benefit from the Commission’s activities implementing the legislation.

7. Therefore, we adjust the Commission’s approach to account for the unusual circumstances accompanying the Broadband DATA Act earmark. While we categorize the costs of implementation of the Broadband DATA Act as indirect costs consistent with our normal methodology, in this limited instance, given the one-time nature and magnitude of the earmark, the statutory text, the legislative history, and the record in this proceeding, we exclude one group of regulatees—broadcasters or “Media Services” licensees—from their share of these indirect costs. While we modify our methodology here with respect to the \$33 million earmark, this one-time modification is consistent with the Commission’s longstanding goals of implementing a fair, sustainable, and administrable regulatory fee regime.

8. *Auction FTEs.* Several commenters contend that the Commission should include auctions FTEs in the calculation of indirect and overhead expenses. In other words, excluding Wireless Telecommunications Bureau FTEs who work on auction issues artificially depresses the costs attributable to the wireless industry and, disadvantages Media Bureau regulatees, as the Media Bureau has substantially fewer of its FTEs classified as auction employees. We find, however, that including auctions FTEs would be inconsistent with section 9 of the Act and therefore decline to accept this proposal. Section 9 of the Communications Act requires the Commission to assess and collect regulatory fees to recover the costs of carrying out the Commission’s functions equal to the amount of the Commission’s salaries and expenses appropriations each fiscal year. Auctions FTEs are not included in the calculation of regulatory fees because our methodology excludes all auction-related FTEs and their overhead from the regulatory fee calculations. Auctions

expenses are separately funded and not part of the Commission's appropriation supported by regulatory fees. The Commission recovers the costs of developing and implementing its section 309(j) spectrum auctions program as an offsetting collection against auction proceeds and subject to an annual cap.

9. *Office of Engineering and Technology Activities.* Commenters contend that the Commission should require users of unlicensed spectrum and/or equipment manufacturers to pay regulatory fees to support the Commission's Office of Engineering and Technology's (OET's) work on the management of spectrum for unlicensed use and authorization of equipment. We decline the commenters' request to revisit our fundamental regulatory fees methodology, and their proposal to create one or more new regulatory fee payor categories consisting of unlicensed spectrum users and/or equipment manufacturers, which under our current methodology would effectively transform OET into a "core bureau" and transform OET FTEs into "direct" FTEs. The Commission has not treated OET as a core bureau and has considered its FTEs' work to be "indirect" activities for which all payors of regulatory fees have been responsible.

10. *Exempt Noncommercial Stations.* A broadcast commenter contends that broadcasters should not be responsible for the regulatory fees of exempt noncommercial stations. The RAY BAUM'S Act specifically exempted non-commercial radio and television stations from regulatory fees. And because Congress has mandated collection of regulatory fees equal to the annual appropriation, the \$374 million must be collected from all non-exempt regulatory fee payors. As a result, we find it is consistent with section 9 of the Act to include those costs that are attributable to all regulatees in each bureau's revenue requirement because all of the regulatees in that fee category, whether they pay regulatory fees or not, benefit from the oversight and regulation of that bureau.

B. Commercial Mobile Radio Service Regulatory Fees Calculation

11. We adopt our proposal to include non-geographic numbers in the calculation of the number of subscribers for each Commercial Mobile Radio Service (CMRS) provider. The inclusion of non-geographic numbers does not increase the total amount collected from the CMRS industry but will reduce the per subscriber fee. In the *FY 2021 NPRM*, we determined that, with the inclusion of non-geographic numbers,

there would be 504 million payment units, and the estimated regulatory fee would be 15 cents per subscriber. As we explained in the *FY 2021 NPRM*, non-geographic numbers are assigned numbers but not associated with any particular geographic area. They are included in Numbering Resource Utilization Forecast (NRUF) Report data and fall within the definition of assigned numbers. Historically, non-geographic numbers were commonly used for "follow me" services, which allowed a consumer to receive a call at different locations, and were not used for independent subscribers. For that reason, the Commission did not previously include these numbers in the CMRS subscriber count estimates because it would result in double counting of subscribers. More recently, however, non-geographic numbers are increasingly used for machine-to-machine calling, such as wireless alarm monitoring and car emergency services subscriptions. Therefore, counting non-geographic numbers for regulatory fee purposes is no longer duplicative of the geographic number. No commenters oppose our proposal, and we therefore adopt it.

C. Direct Broadcast Satellite Fees

12. We adopt our proposal to complete the phase-in of the DBS regulatory fee and place all DBS, cable television, and internet Protocol television (IPTV) providers in the same fee category at the same per subscriber regulatory fee. Direct Broadcast Satellite (DBS) service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic "dish" antenna at the subscriber's location. DBS providers are multichannel video programming distributors (MVPDs), as defined in section 602(13) of the Act. The Media Bureau oversees the regulation of MVPDs, including the two providers of DBS in the United States: DISH Network and DIRECTV. Upon adoption of this *Report and Order*, the Commission will include cable, IPTV, and DBS in the same fee category. Commenters also request that the Commission use updated MVPD subscriber numbers that are closer in time to the release of the Commission's annual regulatory fee order. While we understand this concern, we are unable to administratively accommodate this request. Since DBS subscriber information is not reported to the Commission, it would be difficult for the Commission to permit DBS providers to pay based on their most recent subscriber count in June, for example, because this subscriber count

information would only become known to the Commission when DBS providers make their payment in late September. Therefore, we decline to make this change on the reporting date of DBS subscriber information.

D. Full-Service Television Broadcaster Fees

1. *FY 2021 Regulatory Fees*

13. We adopt the use of the population-based methodology for full-service television broadcasters for FY 2021, as proposed. In FY 2020, the Commission completed the transition to a population-based full-power broadcast television regulatory fee, finding it to be more equitable. In the FY 2021 NPRM, we proposed adopting a factor of .8525 of one cent (\$.008525) per population served for FY 2021 full-power broadcast television station fees. We are, however, adopting a lower fee factor, .7793 of one cent (\$.007793). This lower fee factor is a result of excluding radio and television broadcasters from the \$33 million portion of our appropriation that is earmarked for implementation of the Broadband DATA Act. The population data for each licensee and the population-based fee (population multiplied by \$.007793) for each full-power broadcast television station, including each satellite station, is listed in Table 7. Some commenters argue that the Commission's resources in oversight and regulation do not increase or decrease depending on the population served by a broadcaster, and therefore we should not base the regulatory fee on the population served. These commenters do not, however, offer an alternative proposal that would be fair and reasonable to small and large broadcasters. As we have previously stated, the Commission's methodology need not reach scientific precision, but simply be reasonable.

2. *Stations in Puerto Rico*

14. We adopt the same adjustments to population count for FY 2021 for TV broadcasters in Puerto Rico that we provided those broadcasters in FY 2020. Previously, a group of broadcasters in Puerto Rico argued that our methodology overstates the population served by Puerto Rico stations because the mountainous terrain conditions result in the TVStudy overstating the population served. They also argued that significant and measurable drops in Puerto Rico's population resulting from an exodus caused in part by Hurricane Maria overstated that the population counts underlying the TVStudy. To address these concerns, in the *FY 2020 Report and Order*, the Commission

reduced the population counts used in the TVStudy by 16.9%, or the decline between the last census in 2010 and the current population estimate. Additionally, the Commission limited the market served by primary television stations and commonly owned satellite broadcast stations in Puerto Rico to no more than 3.10 million people, the latest population estimate. We find that since commenters on this issue do not oppose the Commission's actions, we adopt our proposals in the *FY 2021 NPRM* to adjust the population and to limit the market served by all stations to the total population.

E. Toll-Free Numbers

15. We decline to revise our rules and remove a Responsible Organizations (RespOrgs)'s responsibility to pay regulatory fees for toll-free numbers. Toll-free numbers allow callers to reach the called party without being charged for the call. With toll-free calls, the charge for the call is paid by the called party (the toll-free subscriber) instead. Historically, the Commission has not assessed regulatory fees on toll-free numbers under the rationale that the entities controlling the numbers, wireline and wireless carriers, were paying regulatory fees based on either revenues or subscribers. For reasons discussed in the *FY 2014 Report and Order* and the *FY 2015 Report and Order*, the Commission established a regulatory fee obligation for RespOrgs that manage toll-free numbers, beginning in FY 2015, so that toll-free numbers are allocated in an equitable and orderly manner that serves the public interest under section 251(e)(1) of the Act.

16. A commenter contends that the regulatory fee for toll-free numbers should be assessed differently for entities that are not carriers, arguing that carriers that report revenues on FCC Form 499s, should be responsible for the payment of regulatory fees. Commenter contends that clients should remit the fee to the Commission under their own FCC Registration Numbers. We disagree and continue to believe that the existing process is orderly and equitable. While we recognize that many RespOrgs offset their fee payments to the Commission by passing these fees on to their customers who use the toll-free numbers, this practice is not mandatory. The statutory responsibility for payment of the regulatory fee rests solely with the regulated entity, the RespOrg, and not with customers of the RespOrg. Therefore, it is the responsibility of the RespOrg to pay the full amount of toll-free regulatory fees to the Commission by the fee due date.

F. Submarine Cable Regulatory Fees

17. We adopt our proposal to use the same tiers for assessing fees on submarine cable operators for FY 2021 as in FY 2020, which are based on the "lit" capacity of the fiber-optic submarine cable. International bearer circuits (IBCs) consist of terrestrial and satellite circuits and submarine cable systems. Prior to 2009, IBC regulatory fees were collected based on 64 kbps circuits for each of the three types of facilities used to provide international service. In 2009, at the request of a large number of submarine cable operators ("2009 Consensus Proposal"), the Commission changed the methodology for assessing IBC fees and began to assess fees on a per cable landing license basis, with higher fees for larger submarine cable systems and lower fees for smaller submarine cable systems. The Commission concluded that this methodology served the public interest and was competitively neutral because it included both common carriers and non-common carriers. Through FY 2019, the Commission continued to assess fees for international service provided over terrestrial and satellite facilities based on a per 64 kbps basis with the proportion of 87.6% for submarine cable operators, and 12.4% for terrestrial and satellite facilities based on relative capacity at the time. Later, the Commission adopted a five-tier structure for assessing fees on submarine cables systems, with larger systems paying more based on lit capacity, and a per gigabits per second (Gbps) assessment on active circuit capacity for terrestrial and satellite facilities.

18. In the *FY 2020 Report and Order*, the Commission revised the allocation of IBC fees and adopted new tiers for the fees. The Commission concluded that a ratio attributing 95% to submarine cables and 5% to terrestrial and satellite circuits would be more reasonable than the historic ratio. The Commission found again that capacity was an appropriate measure by which to assess IBC fees. The Commission rejected the use of a flat rate for submarine cables and adjusted the tiers for submarine cables. Subsequently, in the *FY 2021 NPRM*, we proposed to use the same tiers for assessing fees on submarine cable operators as the Commission adopted in the *FY 2020 Report and Order*. We find there are no significant changes in our regulatory framework and oversight of submarine cables, or changes in the marketplace, to reevaluate our fee framework based on lit capacity. As the Commission has previously stated, lit capacity is a

reasonable basis to assess regulatory costs among the submarine cable regulatees that benefit from the Commission's work. We therefore find sufficient reason to adopt submarine cable systems fees based on lit capacity.

G. Space Station Regulatory Fees

1. NGSO Regulatory Fees—Less Complex and Other

19. In 2020, the Commission adjusted the allocation of FTEs among GSO and NGSO space station and earth station operators. The Commission noted the disparity in number of units between GSO space stations (98) and NGSO systems (seven), and observed that many space stations can be operated under a single NGSO license while counting as a single unit for regulatory fee purposes, but only one satellite can be operated per GSO space station regulatory fee unit. To ensure that regulatory fees more closely reflect the work of FTEs' oversight and regulation for each category, the Commission allocated 80% of space station regulatory fees to GSOs and 20% of the space station regulatory fees to NGSOs.

20. In the Further Notice of Proposed Rulemaking attached to the *FY 2020 Report and Order*, the Commission sought comment on adopting subcategories of NGSO systems for regulatory fee purposes. Based on comments received, we concluded that space systems planning to communicate with 20 or fewer U.S. authorized earth stations that are primarily used for Earth Exploration Satellite Service (EESS) and/or Automatic Identification System (AIS) are significantly less complex to regulate than other types of NGSO systems. We concluded that this category of "less complex" systems does in fact require fewer Commission resources for several reasons. Such systems rarely involve resource-intensive NGSO processing rounds, based on their ability to share with other operators in the requested frequency bands. The "Other" types of NGSO systems typically have a more global presence, thereby requiring significantly more resources in connection with international forums. These other NGSO systems also have significant spectrum needs and involve a variety of frequency bands, technical issues, and services, constituting a significant part of the International Bureau's NGSO work and resource allocation. We therefore adopted two new fee subcategories: "less complex" NGSO systems and all other NGSO systems identified as "other" NGSO systems, both under the broader category of "Space Stations (Non-Geostationary Orbit)" with an 20/

80 allocation within the NGSO fee category. We proposed a 20/80 allocation (in the FY 2021 NPRM) within the category of NGSO fees, with “less complex” NGSO systems responsible for 20% of NGSO regulatory fees and the remaining NGSO systems (“other”) responsible for 80% of NGSO regulatory fees.

21. Several commenters disagree generally with creating NGSO subcategories, arguing that operators should not pay differing fees based on whether an NGSO system is “less complex.” Below, we discuss the NGSO subcategories and the allocation of the NGSO fees among the NGSO subcategories.

a. NGSO Space Station Subcategories

22. We reject commenters’ arguments that we should not have adopted the “less complex” and “other” subcategories within the NGSO regulatory fee category. Our decision is based on the fact that commenters primarily rely on arguments that were fully considered and addressed as part of our decision in the Report and Order accompanying the *FY 2021 NPRM*, providing no new arguments or citing no new developments. Thus, our decision to create two NGSO fee subcategories incorporated elements of the specific proposals, and our decision-making process did not constitute an “abrupt reversal” or “abrupt change in direction,” but was based on a fully developed record following a notice and comment rulemaking.

23. We also disagree with the contention that we “attached misplaced significance” to application processing costs in determining the amount of Commission resources used in the oversight and regulation of NGSO systems because we took into consideration processing round procedures in concluding that certain NGSO systems require fewer Commission resources. Section 9 of the Communications Act requires the Commission to recover, through regulatory fees, the total amount of its appropriation each year. The Commission must consider all FTE time costs in recovering its regulatory fees. We perform a holistic analysis of our regulation of NGSO systems and the FTE time accorded the oversight and regulation thereof, including rulemakings benefiting those systems, which are directly relevant for purposes of assessing regulatory fees. In so doing, we look at the overall FTE time spent in oversight and regulation of the types of NGSO systems and identify examples of proceedings involving certain NGSO systems.

24. Finally, we reject commenters’ allegations that the consideration of earth stations is overly simplistic. Comparative complexity in earth station siting and licensing is not relevant to our analysis to determine whether an NGSO space system is less complex to regulate. Regulatory fees for earth stations are separately assessed from space stations fees. Although individual earth station applications may differ in terms of Commission resources required to process, those activities are not relevant to determine whether a space system planning to communicate with such an earth station is a complex system or not. Similarly, we disagree with arguments that space station systems communicating with larger numbers of earth stations are not likely to require more Commission oversight and regulatory activities. While an earth station blanket license application for technically-identical user terminals may in some instances be fairly easily processed, the ongoing activities associated with regulating the corresponding NGSO space station system will be more intensive, because the number of earth stations is an indicator that the space system itself is more complex. Furthermore, we also disagree with the contention that our consideration of numbers of earth stations presupposes that EESS systems require no more than 20 earth stations to support their network. Our experience has shown that authorized EESS systems typically communicate with fewer than 20 earth stations in the United States, and takes into account earth stations owned and operated by a third party that communicate with a particular NGSO system. As indicated, we are using “fewer than 20 earth stations” as a proxy and at the application stage, if we determine that a space system is planning to communicate with more than 20 earth stations based on the system design, such system design and plans would indicate that the space system would not fall into the “less complex” system category for regulatory fee purposes. Nothing in the record, or our analysis of the resources the International Bureau devotes to NGSO oversight and regulation, demonstrates that we erred in adopting an additional NGSO space station regulatory fee category for “less complex” NGSO systems.

b. 20/80 NGSO Regulatory Fee Allocation

25. We adopt our proposal from the *FY 2021 NPRM* to allocate 20% of NGSO regulatory fees to “less complex” NGSO systems and 80% of NGSO regulatory fees to “other” NGSO

systems. In so doing, we consider the record, our experience, and analysis of the time International Bureau FTEs devote to oversight and regulation of “less complex” and “other” NGSO systems. While some commenters agree with the 20/80 allocation, others disagree. Many of those commenters disagree with the underlying creation of the “less complex” NGSO fee category, as adopted. The Commission considered various aspects of the Commission’s oversight and the amount of FTE time devoted to the subcategories of NGSOs, specifically on the number of applications processed, the number of changes made to the Commission’s rules, and the number of FTEs working on oversight for each category of operators. Here, in evaluating the FTE time devoted to the subcategories to develop the proposed 20/80 allocation, we considered the adjudicatory role of the Commission in connection with different types of NGSO systems—which is typically more intensive for those systems authorized as part of processing rounds. We also considered the number of rulemakings over the last several years, as well as current rulemakings, and which types of NGSO systems were implicated in those rulemaking activities, and we considered the various international activities that Commission staff engage in and how those activities benefit the different types of NGSO systems. We then considered the number of FTEs typically working on processing round issues/adjudications on an ongoing basis, compared the number of FTEs working on various rulemakings, and considered the number of FTEs in the International Bureau that engage in various international activities and forums, and the extent to which such activities benefit each category of NGSO system. Our allocation percentage is based on our quantitative experience (approximate numbers of FTE hours spent in a year) and expert judgement, and such calculation remains to be the best approximation of our FTE cost allocation at this time, based on the record before us. The fees must be administrable, and we note again that the Commission’s methodology need not reach scientific precision and instead must simply be reasonable.

2. NGSO Regulatory Fees—Satellites Authorized Under Multiple Call Signs

26. We find it premature to make a determination how the Commission’s regulatory fees should apply to NGSO satellites operating as an integrated NGSO system, but authorized under multiple call signs. Several commenters to the *FY 2021 NPRM* asked us to clarify

whether NGSO satellites operating as an integrated NGSO system, but authorized under multiple call signs, should be considered part of the same system—and therefore be assessed a single regulatory fee. Specifically, commenters suggest that the Commission should consider NGSO satellites operating as part of the system—but authorized under multiple call signs (even by different operators)—as one “system” for purposes of NGSO regulatory fees. The Commission does not currently have any authorized NGSO systems that fit the description of a multi-regulatee/multi-call sign NGSO system. The answer is likely to be fact-specific, and involve a determination of what exactly constitutes an NGSO “system” and where the space stations in the “system” are operated by different entities. In the case of GSO space stations, it is clear when there are multiple licensees associated with the same physical satellite. The situation is less clear for NGSO systems because the situation could quickly become factually complex where different space stations in the “system” are described as attributable to different entities for regulatory fee purposes. We will continue to apply the general presumption that NGSO systems operated by different licensees or market access grantees constitute different NGSO systems.

H. Flexibility for Regulatory Payors Due to COVID-19 Pandemic

27. As proposed in the *FY 2021 NPRM*, we extend the temporary COVID-19 regulatory fee relief measures that were implemented in our *FY 2020 Report and Order*. Last year, the Commission adopted certain relief measures to address concerns raised by commenters about financial hardship caused by the COVID-19 pandemic. Comments received in response to the *FY 2021 NPRM* indicate that the financial hardship caused by the pandemic have continued into the 2021 fiscal year. Accordingly, we find good reason to continue the same relief measures we adopted in *FY 2020* for *FY 2021*.

28. Specifically, for *FY 2021*, we again waive section 1.1166 of our rules, to the extent necessary, to permit parties seeking regulatory fee waiver, deferral and/or installment payment relief for financial hardship reasons related to the pandemic. Those parties may make a single request for all forms of relief sought, whether in combination or in the alternative, and may submit all such requests for relief electronically to the Commission via a dedicated email address. For *FY 2021*, the email address

is 2021regfeerelief@fcc.gov.

Additionally, we partially waive our red-light rule to allow debtors that are experiencing financial hardship to nonetheless request relief with respect to their regulatory fees. As we provided in *FY 2020*, however, such regulatees are required to resolve all delinquent debt by paying it in full, entering into an installment agreement to repay it, and/or if applicable, curing all payment and other defaults under existing installment agreements. We believe the existing waiver standard together with the measures described above will work as designed, to provide fee relief to those regulatees most in need.

29. Regulatees whose businesses have been hurt by the pandemic, but not to the extent required to receive a waiver, reduction, or deferral, may be eligible to pay their *FY 2021* fees in installments under section 1.1914 of our rules. For those regulatees, we exercise our discretion under section 3717(a) of the Debt Collection Improvement Act of 1996, as amended, to reduce the interest rate the Commission charges on installment payments to a nominal rate and we suspend our down payment requirement. We also recognize that demonstrating financial hardship caused by the pandemic may require different financial documentation than the documentation the Commission has traditionally accepted. While the burden of proving financial hardship remains with the party requesting it, we again direct the Managing Director to work with individual regulatees that have filed requests if additional documents are needed to render a decision on the request. Finally, we direct the Managing Director to release one or more public notices describing in more detail the relief we have described herein.

We remind regulatees that we cannot relax the standard for granting a waiver or deferral of fees, penalties, or other charges for late payment of regulatory fees under section 9A of the Act. Under the statute, the Commission may only waive a regulatory fee, penalty or interest if it finds there is good cause for the waiver and that the waiver is in the public interest. The Commission has only granted financial hardship waivers when the requesting party has shown it “lacks sufficient funds to pay the regulatory fees and to maintain its service to the public.” Other statutory limitations include that the Commission must act on waiver requests individually, and cannot extend the deadline we set for payment of fees beyond September 30.

III. Procedural Matters

30. Included below are procedural items as well as our current payment and collection methods.

31. *Credit Card Transaction Levels*. In accordance with *Treasury Financial Manual*, Volume I, Part 5, Chapter 7000, Section 7045—*Limitations on Card Collection Transactions*, the highest amount that can be charged on a credit card for transactions with federal agencies is \$24,999.99. Transactions greater than \$24,999.99 will be rejected. This limit applies to single payments or bundled payments of more than one bill. Multiple transactions to a single agency in one day may be aggregated and treated as a single transaction subject to the \$24,999.99 limit. Customers who wish to pay an amount greater than \$24,999.99 should consider available electronic alternatives such as Visa or MasterCard debit cards, ACH debits from a bank account, and wire transfers. Each of these payment options is available after filing regulatory fee information in Fee Filer. Further details will be provided regarding payment methods and procedures at the time of *FY 2021* regulatory fee collection in Fact Sheets, <https://www.fcc.gov/regfees>.

32. *Payment Methods*. Pursuant to an Office of Management and Budget (OMB) directive, the Commission is moving towards a paperless environment, extending to disbursement and collection of select federal government payments and receipts. In 2015, the Commission stopped accepting checks (including cashier’s checks and money orders) and the accompanying hardcopy forms (e.g., Forms 159, 159-B, 159-E, 159-W) for the payment of regulatory fees. During the fee season for collecting regulatory fees, regulatees can pay their fees by credit card through Pay.gov, ACH, debit card, or by wire transfer. Additional payment instructions are posted on the Commission’s website at <http://transition.fcc.gov/fees/regfees.html>. The receiving bank for all wire payments is the U.S. Treasury, New York, NY (TREAS NYC). Any other form of payment (e.g., checks, cashier’s checks, or money orders) will be rejected. For payments by wire, a Form 159-E should still be transmitted via fax so that the Commission can associate the wire payment with the correct regulatory fee information. The fax should be sent to the Federal Communications Commission at (202) 418-2843 at least one hour before initiating the wire transfer (but on the same business day) so as not to delay crediting their account. Regulatees should discuss arrangements (including bank closing

schedules) with their bankers several days before they plan to make the wire transfer to allow sufficient time for the transfer to be initiated and completed before the deadline. Complete instructions for making wire payments are posted at <https://www.fcc.gov/licensing-databases/fees/wire-transfer>.

33. *De Minimis Regulatory Fees, Section 9(e)(2) Exemption.* Under the de minimis rule, and pursuant to our analysis under section 9(e)(2) of the Act, a regulatee is exempt from paying regulatory fees if the sum total of all of its annual regulatory fee liabilities is \$1,000 or less for the fiscal year. The de minimis threshold applies only to filers of annual regulatory fees, not regulatory fees paid through multi-year filings, and it is not a permanent exemption. Each regulatee will need to reevaluate the total annual fee liability each fiscal year to determine whether it meets the de minimis exemption.

34. *Standard Fee Calculations and Payment Dates.* The Commission will accept fee payments made in advance of the window for the payment of regulatory fees. The responsibility for payment of fees by service category is as follows:

- *Media Services:* Regulatory fees must be paid for initial construction permits that were granted on or before October 1, 2020 for AM/FM radio stations, VHF/UHF broadcast television stations, and satellite television stations. Regulatory fees must be paid for all broadcast facility licenses granted on or before October 1, 2020.

- *Wireline (Common Carrier) Services:* Regulatory fees must be paid for authorizations that were granted on or before October 1, 2020. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date. Audio bridging service providers are included in this category. For Responsible Organizations (RespOrgs) that manage Toll Free Numbers (TFN), regulatory fees should be paid on all working, assigned, and reserved toll free numbers as well as toll free numbers in any other status as defined in section 52.103 of the Commission's rules. The unit count should be based on toll free numbers managed by RespOrgs on or about December 31, 2020.

- *Wireless Services:* CMRS cellular, mobile, and messaging services (fees based on number of subscribers or telephone number count): Regulatory fees must be paid for authorizations that were granted on or before October 1, 2020. The number of subscribers, units, or telephone numbers on December 31,

2020 will be used as the basis from which to calculate the fee payment. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *Wireless Services, Multi-year fees:* The first eight regulatory fee categories in our Schedule of Regulatory Fees pay "small multi-year wireless regulatory fees." Entities pay these regulatory fees in advance for the entire amount period covered by the ten-year terms of their initial licenses, and pay regulatory fees again only when the license is renewed, or a new license is obtained. We include these fee categories in our rulemaking to publicize our estimates of the number of "small multi-year wireless" licenses that will be renewed or newly obtained in FY 2021.

- *Multichannel Video Programming Distributor Services (cable television operators, CARS licensees, DBS, and IPTV):* Regulatory fees must be paid for the number of basic cable television subscribers as of December 31, 2020. Regulatory fees also must be paid for CARS licenses that were granted on or before October 1, 2020. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date. For providers of DBS service and IPTV-based MVPDs, regulatory fees should be paid based on a subscriber count on or about December 31, 2020. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services (Earth Stations and Space Stations):* Regulatory fees must be paid for (1) earth stations and (2) geostationary orbit space stations and non-geostationary orbit satellite systems that were licensed and operational on or before October 1, 2020. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services (Submarine Cable Systems, Terrestrial and Satellite Services):* Regulatory fees for submarine cable systems are to be paid on a per cable landing license basis based on lit circuit capacity as of December 31, 2020. Regulatory fees for terrestrial and satellite IBCs are to be paid based on active (used or leased) international bearer circuits as of December 31, 2020 in any terrestrial or satellite transmission facility for the provision of

service to an end user or resale carrier. When calculating the number of such active circuits, entities must include circuits used by themselves or their affiliates. For these purposes, "active circuits" include backup and redundant circuits as of December 31, 2020. Whether circuits are used specifically for voice or data is not relevant for purposes of determining that they are active circuits. In instances where a permit or license is transferred or assigned after October 1, 2020, responsibility for payment rests with the holder of the permit or license as of the fee due date.

35. *Commercial Mobile Radio Service (CMRS) and Mobile Services Assessments.* The Commission compiled data from the Numbering Resource Utilization Forecast (NRUF) report that is based on "assigned" telephone number (subscriber) counts that have been adjusted for porting to net Type 0 ports ("in" and "out"). We have included non-geographic numbers in the calculation of the number of subscribers for each CMRS provider in Tables 2 and the CMRS regulatory fee rate in Table 3. CMRS provider regulatory fees are calculated and should be paid based on the inclusion of non-geographic numbers. CMRS providers can adjust the total number of subscribers, if needed. This information of telephone numbers (subscriber count) will be posted on the Commission's electronic filing and payment system (Fee Filer).

36. A carrier wishing to revise its telephone number (subscriber) count can do so by accessing Fee Filer and follow the prompts to revise their telephone number counts. Any revisions to the telephone number counts should be accompanied by an explanation or supporting documentation. The Commission will then review the revised count and supporting documentation and either approve or disapprove the submission in Fee Filer. If the submission is disapproved, the Commission will contact the provider to afford the provider an opportunity to discuss its revised subscriber count and/or provide additional supporting documentation. If we receive no response from the provider, or we do not reverse our initial disapproval of the provider's revised count submission, the fee payment must be based on the number of subscribers listed initially in Fee Filer. Once the timeframe for revision has passed, the telephone number counts are final and are the basis upon which CMRS regulatory fees are to be paid. Providers can view their final telephone counts online in Fee

Filer. A final CMRS assessment letter will not be mailed out.

37. Because some carriers do not file the NRUF report, they may not see their telephone number counts in Fee Filer. In these instances, the carriers should compute their fee payment using the standard methodology that is currently in place for CMRS Wireless services (*i.e.*, compute their telephone number counts as of December 31, 2020), and submit their fee payment accordingly. Whether a carrier reviews its telephone number counts in Fee Filer or not, the Commission reserves the right to audit the number of telephone numbers for which regulatory fees are paid. In the event that the Commission determines that the number of telephone numbers that are paid is inaccurate, the Commission will bill the carrier for the difference between what was paid and what should have been paid.

38. *Effective Date.* Providing a 30-day period after **Federal Register** publication before this Report and Order and Notice of Proposed Rulemaking,

becomes effective as normally required by 5 U.S.C. 553(d) will not allow sufficient time to collect the FY 2021 fees before FY 2021 ends on September 30, 2021. For this reason, pursuant to 5 U.S.C. 553(d)(3), we find there is good cause to waive the requirements of section 553(d), and this Report and Order and Notice of Proposed Rulemaking will become effective upon publication in the **Federal Register**. Because payments of the regulatory fees will not actually be due until late September, persons affected by the Report and Order will still have a reasonable period in which to make their payments and thereby comply with the rules established herein.

39. *Final Regulatory Flexibility Analysis.* As required by the Regulatory Flexibility Act of 1980 (RFA) the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) relating to this Report and Order. The FRFA is contained in the back of this document.

40. *Paperwork Reduction Act of 1995 Analysis.* This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

41. *Congressional Review Act.* The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that these rules are non-major under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of this Report and Order and Notice of Proposed Rulemaking to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Space Stations (Non-Geostationary, Other)	10	1	4,023,000	3,435,525	343,553	343,555	3,435,550
Space Stations (Non-Geostationary, Less Complex)	7	1	858,880	122,697	122,695	858,865
***** Total Estimated Revenue to be Collected	338,940,733	373,897,672	373,920,077
***** Total Revenue Requirement	339,000,000	374,000,000	374,000,000
Difference	(59,267)	(102,328)	(79,923)

Notes on Table 2

¹ The fee amounts listed in the column entitled "Rounded New FY 2021 Regulatory Fee" constitute a weighted average broadcast regulatory fee by class of service. The actual FY 2021 regulatory fees for AM/FM radio station are listed on a grid located at the end of Table 3.

² The AM and FM Construction Permit revenues and the Digital (VHF/UHF) Construction Permit revenues were adjusted, respectively, to set the regulatory fee to an amount no higher than the lowest licensed fee for that class of service. Reductions in the Digital (VHF/UHF) Construction Permit revenues, and in the AM and FM Construction Permit revenues, were offset by increases in the revenue totals for Digital television stations by market size, and in the AM and FM radio stations by class size and population served, respectively.

³ The MDS/MMDS category was renamed Broadband Radio Service (BRS). See Amendment of Parts 1, 21, 73, 74 and 101 of the Commission's Rules to Facilitate the Provision of Fixed and Mobile Broadband Access, Educational and Other Advanced Services in the 2150–2162 and 2500–2690 MHz Bands, Report & Order and Further Notice of Proposed Rulemaking, 19 FCC Rcd 14165, 14169, para. 6 (2004).

⁴ The chart at the end of Table 3 lists the submarine cable bearer circuit regulatory fees (common and non-common carrier basis) that resulted from the adoption of the Assessment and Collection of Regulatory Fees for Fiscal Year 2008, Report and Order and Further Notice of Proposed Rulemaking, 24 FCC Rcd 6388 (2008) and Assessment and Collection of Regulatory Fees for Fiscal Year 2008, Second Report and Order, 24 FCC Rcd 4208 (2009). The Submarine Cable fee in Table 2 is a weighted average of the various fee payers in the chart at the end of Table 3.

⁵ The actual digital television regulatory fees to be paid by call sign are identified in Table 7.

TABLE 3—FY 2021 SCHEDULE OF REGULATORY FEES

[Regulatory fees for the categories shaded in gray are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed.]

Fee category	Annual regulatory fee (U.S. \$s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90)	25
Microwave (per license) (47 CFR part 101)	25
Marine (Ship) (per station) (47 CFR part 80)	15
Marine (Coast) (per license) (47 CFR part 80)	40
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category)	10
PLMRS (Shared Use) (per license) (47 CFR part 90)	10
Aviation (Aircraft) (per station) (47 CFR part 87)	10
Aviation (Ground) (per license) (47 CFR part 87)	20
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90) (Includes Non-Geographic telephone numbers)	.15
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90)	.08
Broadband Radio Service (formerly MMDS/MDS) (per license) (47 CFR part 27)	605
Local Multipoint Distribution Service (per call sign) (47 CFR part 101)	605
AM Radio Construction Permits	610
FM Radio Construction Permits	1,070
AM and FM Broadcast Radio Station Fees	See Table Below
Digital TV (47 CFR part 73) VHF and UHF Commercial Fee Factor	* \$.007793
Digital TV Construction Permits	5,100
Low Power TV, Class A TV, TV/FM Translators & FM Boosters (47 CFR part 74)	320
CARS (47 CFR part 78)	1,555
Cable Television Systems (per subscriber) (47 CFR part 76), Including IPTV (per subscriber) and Direct Broadcast Satellite (DBS) (per subscriber)	.98
Interstate Telecommunication Service Providers (per revenue dollar)	.00400
Toll Free (per toll free subscriber) (47 CFR section 52.101(f) of the rules)	.12
Earth Stations (47 CFR part 25)	595
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100)	116,855
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25) (Other)	343,555
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25) (Less Complex)	122,695
International Bearer Circuits—Terrestrial/Satellites (per Gbps circuit)	\$43
Submarine Cable Landing Licenses Fee (per cable system)	See Table Below

* See Appendix G for fee amounts due, also available at <https://www.fcc.gov/licensing-databases/fees/regulatory-fees>.

FY 2021 RADIO STATION REGULATORY FEES

Population served	AM Class A	AM Class B	AM Class C	AM Class D	FM Classes A, B1 & C3	FM Classes B, C, C0, C1 & C2
<=25,000	\$975	\$700	\$610	\$670	\$1,070	\$1,220
25,001–75,000	1,465	1,050	915	1,000	1,605	1,830
75,001–150,000	2,195	1,575	1,375	1,510	2,410	2,745
150,001–500,000	3,295	2,365	2,060	2,265	3,615	4,125

FY 2021 INTERNATIONAL BEARER CIRCUITS—SUBMARINE CABLE SYSTEMS

Submarine cable systems (capacity as of December 31, 2020)	Fee ratio (units)	FY 2021 regulatory fees
Less than 50 Gbps	.0625	\$9,495

FY 2021 INTERNATIONAL BEARER CIRCUITS—SUBMARINE CABLE SYSTEMS—Continued

Submarine cable systems (capacity as of December 31, 2020)	Fee ratio (units)	FY 2021 regu- latory fees
50 Gbps or greater, but less than 250 Gbps125	18,990
250 Gbps or greater, but less than 1,500 Gbps25	37,980
1,500 Gbps or greater, but less than 3,500 Gbps5	75,955
3,500 Gbps or greater, but less than 6,500 Gbps	1.0 Unit	151,910
6,500 Gbps or greater	2.0	303,820

Table 4—Sources of Payment Unit Estimates for FY 2021

In order to calculate individual service fees for FY 2021, we adjusted FY 2020 payment units for each service to more accurately reflect expected FY 2021 payment liabilities. We obtained our updated estimates through a variety of means and sources. For example, we used Commission licensee data bases, actual prior year payment records and industry and trade association projections, when available. The databases we consulted include our Universal Licensing System (ULS), International Bureau Filing System (IBFS), Consolidated Database System (CDBS), Licensing and Management System (LMS) and Cable Operations and Licensing System (COALS), as well as

reports generated within the Commission such as the Wireless Telecommunications Bureau’s *Numbering Resource Utilization Forecast*. Regulatory fee payment units are not all the same for all fee categories. For most fee categories, the term “units” reflect licenses or permits that have been issued, but for other fee categories, the term “units” reflect quantities such as subscribers, population counts, circuit counts, telephone numbers, and revenues.

We sought verification for these estimates from multiple sources and, in all cases, we compared FY 2021 estimates with actual FY 2020 payment units to ensure that our revised estimates were reasonable. Where appropriate, we adjusted and/or

rounded our final estimates to take into consideration the fact that certain variables that impact on the number of payment units cannot yet be estimated with sufficient accuracy. These include an unknown number of waivers and/or exemptions that may occur in FY 2021 and the fact that, in many services, the number of actual licensees or station operators fluctuates from time to time due to economic, technical, or other reasons. When we note, for example, that our estimated FY 2021 payment units are based on FY 2020 actual payment units, it does not necessarily mean that our FY 2021 projection is exactly the same number as in FY 2020. We have either rounded the FY 2020 number or adjusted it slightly to account for these variables.

Fee category	Sources of payment unit estimates
Land Mobile (All), Microwave, Marine (Ship & Coast), Aviation (Aircraft & Ground), Domestic Public Fixed.	Based on Wireless Telecommunications Bureau (WTB) projections of new applications and renewals taking into consideration existing Commission licensee data bases. Aviation (Aircraft) and Marine (Ship) estimates have been adjusted to take into consideration the licensing of portions of these services on a voluntary basis.
CMRS Cellular/Mobile Services	Based on WTB projection reports, and FY 2020 payment data.
CMRS Messaging Services	Based on WTB reports, and FY 2020 payment data.
AM/FM Radio Stations	Based on CDBS data, adjusted for exemptions, and actual FY 2020 payment units.
Digital TV Stations (Combined VHF/UHF units)	Based on LMS data, fee rate adjusted for exemptions, and population figures are calculated based on individual station parameters.
AM/FM/TV Construction Permits	Based on CDBS data, adjusted for exemptions, and actual FY 2020 payment units.
LPTV, Translators and Boosters, Class A Television	Based on LMS data, adjusted for exemptions, and actual FY 2020 payment units.
BRS (formerly MDS/MMDS) LMDS	Based on WTB reports and actual FY 2020 payment units. Based on WTB reports and actual FY 2020 payment units.
Cable Television Relay Service (CARS) Stations	Based on data from Media Bureau’s COALS database and actual FY 2020 payment units.
Cable Television System Subscribers, Including IPTV Subscribers.	Based on publicly available data sources for estimated subscriber counts and actual FY 2020 payment units.
Interstate Telecommunication Service Providers	Based on FCC Form 499–Q data for the four quarters of calendar year 2020, the Wireline Competition Bureau projected the amount of calendar year 2020 revenue that will be reported on the 2021 FCC Form 499–A worksheets due in April 2021.
Earth Stations	Based on International Bureau licensing data and actual FY 2020 payment units.
Space Stations (GSOs & NGSOs)	Based on International Bureau data reports and actual FY 2020 payment units.
International Bearer Circuits	Based on International Bureau reports and submissions by licensees, adjusted as necessary, and actual FY 2020 payment units.
Submarine Cable Licenses	Based on International Bureau license information, and actual FY 2020 payment units.

Table 5—Factors, Measurements, and Calculations That Determine Station Signal Contours and Associated Population Coverages

AM Stations

For stations with nondirectional daytime antennas, the theoretical

radiation was used at all azimuths. For stations with directional daytime antennas, specific information on each day tower, including field ratio, phase, spacing, and orientation was retrieved, as well as the theoretical pattern root-mean-square of the radiation in all directions in the horizontal plane (RMS)

figure (milliVolt per meter (mV/m) @1 km) for the antenna system. The standard, or augmented standard if pertinent, horizontal plane radiation pattern was calculated using techniques and methods specified in sections 73.150 and 73.152 of the Commission’s rules. Radiation values were calculated

for each of 360 radials around the transmitter site. Next, estimated soil conductivity data was retrieved from a database representing the information in FCC Figure R3. Using the calculated horizontal radiation values, and the retrieved soil conductivity data, the distance to the principal community (5 mV/m) contour was predicted for each of the 360 radials. The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2010 block centroids were contained in the polygon. (A block centroid is the center point of a small area containing population as computed by the U.S. Census Bureau.) The sum of

the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

FM Stations

The greater of the horizontal or vertical effective radiated power (ERP) (kW) and respective height above average terrain (HAAT) (m) combination was used. Where the antenna height above mean sea level (HAMSL) was available, it was used in lieu of the average HAAT figure to calculate specific HAAT figures for each of 360 radials under study. Any available directional pattern information was applied as well, to produce a radial-specific ERP figure. The HAAT and ERP

figures were used in conjunction with the Field Strength (50–50) propagation curves specified in 47 CFR 73.313 of the Commission’s rules to predict the distance to the principal community (70 dBu (decibel above 1 microVolt per meter) or 3.17 mV/m) contour for each of the 360 radials. The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2010 block centroids were contained in the polygon. The sum of the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

Notes:

- ¹ Call signs WIPM and WIPR are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ² Call signs WNJX and WAPA are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ³ Call signs WKAQ and WORA are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁴ Call signs WOLE and WLII are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁵ Call signs WVEO and WTCV are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁶ Call signs WJPX and WJWN are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁷ Call signs WAPA and WTIN are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁸ Call signs WSUR and WLII are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ⁹ Call signs WVOZ and WTCV are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ¹⁰ Call signs WJPX and WKPV are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ¹¹ Call signs WMTJ and WQTO are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ¹² Call signs WIRS and WJPX are stations in Puerto Rico that are linked together with a total fee of \$24,160.
- ¹³ Call signs WRFB and WORA are stations in Puerto Rico that are linked together with a total fee of \$24,160.

TABLE 8—FY 2020 SCHEDULE OF REGULATORY FEES

[Regulatory fees for the categories shaded in gray are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed.]

Fee category	Annual regulatory fee (U.S. \$s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90)	25
Microwave (per license) (47 CFR part 101)	25
Marine (Ship) (per station) (47 CFR part 80)	15
Marine (Coast) (per license) (47 CFR part 80)	40
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category)	10
PLMRS (Shared Use) (per license) (47 CFR part 90)	10
Aviation (Aircraft) (per station) (47 CFR part 87)	10
Aviation (Ground) (per license) (47 CFR part 87)	20
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90)	.17
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90)	.08
Broadband Radio Service (formerly MMDS/MDS) (per license) (47 CFR part 27)	560
Local Multipoint Distribution Service (per call sign) (47 CFR, part 101)	560
AM Radio Construction Permits	610
FM Radio Construction Permits	1,075
AM and FM Broadcast Radio Station Fees	See Table Below
Digital TV (47 CFR part 73) VHF and UHF Commercial Fee Factor	* \$.007837
Digital TV Construction Permits	4,950
Low Power TV, Class A TV, TV/FM Translators & FM Boosters (47 CFR part 74)	315
CARS (47 CFR part 78)	1,300
Cable Television Systems (per subscriber) (47 CFR part 76), Including IPTV	.89
Direct Broadcast Service (DBS) (per subscriber) (as defined by section 602(13) of the Act)	.72
Interstate Telecommunication Service Providers (per revenue dollar)	.00321
Toll Free (per toll free subscriber) (47 CFR section 52.101 (f) of the rules)	.12
Earth Stations (47 CFR part 25)	560
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100)	98,125
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25)	223,500
International Bearer Circuits—Terrestrial/Satellites (per Gbps circuit)	\$41
Submarine Cable Landing Licenses Fee (per cable system)	See Table Below.

* See Appendix G for fee amounts due, also available at <https://www.fcc.gov/licensing-databases/fees/regulatory-fees>.

FY 2020 RADIO STATION REGULATORY FEES

Population served	AM Class A	AM Class B	AM Class C	AM Class D	FM Classes A, B1 & C3	FM Classes B, C, C0, C1 & C2
<=25,000	\$975	\$700	\$610	\$670	\$1,075	\$1,225
25,001–75,000	1,475	1,050	915	1,000	1,625	1,850

IV. Final Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was included in the *Notice of Proposed Rulemaking (NPRM)* for fiscal year 2021. The Commission sought written public comment on these proposals including comment on the IRFA. This Final Regulatory Flexibility Analysis (FRFA) conforms to the IRFA.

A. Need for, and Objectives of, the Report and Order

2. In the Report and Order, the Commission adopts a regulatory fee schedule to collect \$374,000,000 in congressionally required regulatory fees for fiscal year (FY) 2021. Under section 9 of the Communications Act of 1934, as amended, (Communications Act or Act), regulatory fees are mandated by Congress and collected to recover the regulatory costs associated with the Commission’s enforcement, policy and rulemaking, user information, and international activities in an amount that can be reasonably expected to equal the amount of the Commission’s annual appropriation. The objective in the Report for adopting the regulatory fee schedule is to comply with the Congressional mandate to recover the total amount of the Commission’s annual appropriation, from the various industries for which the Commission provides oversight or regulation, based on the number of full time employees (FTEs) involved in such oversight and regulation in the licensing bureaus.

B. Summary of the Significant Issues Raised by the Public Comments in Response to the IRFA

3. None.

C. Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

4. No comments were filed by the Chief Counsel for Advocacy of the Small Business Administration.

D. Description and Estimate of the Number of Small Entities to Which the Rules Will Apply

5. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules and policies, if adopted. The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.” In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act. A “small business concern” is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

6. *Small Businesses, Small Organizations, Small Governmental Jurisdictions, Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe here, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration’s (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 30.7 million businesses.

7. Next, the type of small entity described as a “small organization” is generally “any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.” The Internal Revenue Service (IRS) uses a revenue benchmark of \$50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2018, there were approximately 571,709 small exempt organizations in the U.S. reporting revenues of \$50,000

or less according to the registration and tax data for exempt organizations available from the IRS.

8. Finally, the small entity described as a “small governmental jurisdiction” is defined generally as “governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.” U.S. Census Bureau data from the 2017 Census of Governments indicate that there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number there were 36,931 general purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,040 special purpose governments— independent school districts with enrollment populations of less than 5ll governmental jurisdictions.”

9. *Wired Telecommunications Carriers.* The U.S. Census Bureau defines this industry as “establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including Voice over internet Protocol (VoIP) services, wired (cable and IPTV) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.” The SBA has developed a small business size standard for Wired Telecommunications Carriers, which consists of all such companies having 1,500 or fewer employees. U.S. Census Bureau data for 2012 show that there were 3,117 firms that operated that year. Of this total, 3,083 operated with fewer

than 1,000 employees. Thus, under this size standard, the majority of firms in this industry can be considered small.

10. *Local Exchange Carriers (LECs)*. Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. The closest applicable NAICS Code category is Wired Telecommunications Carriers. Under the applicable SBA size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 show that there were 3,117 firms that operated for the entire year. Of that total, 3,083 operated with fewer than 1,000 employees. Thus under this category and the associated size standard, the Commission estimates that the majority of local exchange carriers are small entities.

11. *Incumbent LECs*. Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange services. The closest applicable NAICS Code category is Wired Telecommunications Carriers. Under the applicable SBA size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 indicate that 3,117 firms operated the entire year. Of this total, 3,083 operated with fewer than 1,000 employees. Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses that may be affected by our actions. According to Commission data, one thousand three hundred and seven (1,307) Incumbent Local Exchange Carriers reported that they were incumbent local exchange service providers. Of this total, an estimated 1,006 have 1,500 or fewer employees. Thus, using the SBA's size standard the majority of incumbent LECs can be considered small entities.

12. *Competitive Local Exchange Carriers (Competitive LECs), Competitive Access Providers (CAPs), Shared-Tenant Service Providers, and Other Local Service Providers*. Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate NAICS Code category is Wired Telecommunications Carriers and under that size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 indicate that 3,117 firms operated during that year. Of that number, 3,083 operated with fewer than 1,000 employees. Based on these data, the Commission concludes that the majority of Competitive LECs, CAPs, Shared-Tenant Service Providers, and Other Local Service Providers, are small

entities. According to Commission data, 1,442 carriers reported that they were engaged in the provision of either competitive local exchange services or competitive access provider services. Of these 1,442 carriers, an estimated 1,256 have 1,500 or fewer employees. In addition, 17 carriers have reported that they are Shared-Tenant Service Providers, and all 17 are estimated to have 1,500 or fewer employees. Also, 72 carriers have reported that they are Other Local Service Providers. Of this total, 70 have 1,500 or fewer employees. Consequently, based on internally researched FCC data, the Commission estimates that most providers of competitive local exchange service, competitive access providers, Shared-Tenant Service Providers, and Other Local Service Providers are small entities.

13. *Interexchange Carriers (IXCs)*. Neither the Commission nor the SBA has developed a small business size standard specifically for Interexchange Carriers. The closest applicable NAICS Code category is Wired Telecommunications Carriers. The applicable size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 indicate that 3,117 firms operated for the entire year. Of that number, 3,083 operated with fewer than 1,000 employees. According to internally developed Commission data, 359 companies reported that their primary telecommunications service activity was the provision of interexchange services. Of this total, an estimated 317 have 1,500 or fewer employees. Consequently, the Commission estimates that the majority of interexchange service providers are small entities.

14. *Prepaid Calling Card Providers*. Neither the Commission nor the SBA has developed a small business size standard specifically for prepaid calling card providers. The appropriate NAICS code category for prepaid calling card providers is Telecommunications Resellers. This industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA has developed a small business size standard for the

category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 show that 1,341 firms provided resale services during that year. Of that number, 1,341 operated with fewer than 1,000 employees. Thus, under this category and the associated small business size standard, the majority of these resellers can be considered small entities. According to Commission data, 193 carriers have reported that they are engaged in the provision of prepaid calling cards. All 193 carriers have 1,500 or fewer employees. Consequently, the Commission estimates that the majority of prepaid calling card providers are small.

15. *Local Resellers*. The SBA has not developed a small business size standard specifically for Local Resellers. The SBA category of Telecommunications Resellers is the closest NAICS code category for local resellers. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. Under the SBA's size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data from 2012 show that 1,341 firms provided resale services during that year. Of that number, all operated with fewer than 1,000 employees. Thus, under this category and the associated small business size standard, the majority of these resellers can be considered small entities. According to Commission data, 213 carriers have reported that they are engaged in the provision of local resale services. Of these, an estimated 211 have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that the majority of local resellers are small entities.

16. *Toll Resellers*. The Commission has not developed a definition for Toll Resellers. The closest NAICS Code Category is Telecommunications Resellers. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of

telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. MVNOs are included in this industry. The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees. 2012 Census Bureau data show that 1,341 firms provided resale services during that year. Of that number, 1,341 operated with fewer than 1,000 employees. Thus, under this category and the associated small business size standard, the majority of these resellers can be considered small entities. According to Commission data, 881 carriers have reported that they are engaged in the provision of toll resale services. Of this total, an estimated 857 have 1,500 or fewer employees. Consequently, the Commission estimates that the majority of toll resellers are small entities.

17. *Other Toll Carriers.* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. The closest applicable NAICS code category is for Wired Telecommunications Carriers, as defined in paragraph 6 of this IRFA. Under that size standard, such a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2012 show that there were 3,117 firms that operated that year. Of this total, 3,083 operated with fewer than 1,000 employees. Thus, under this size standard, the majority of firms in this industry can be considered small. According to Commission data, 284 companies reported that their primary telecommunications service activity was the provision of other toll carriage. Of these, an estimated 279 have 1,500 or fewer employees. Consequently, the Commission estimates that most Other Toll Carriers are small entities.

18. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless

internet access, and wireless video services. The appropriate size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2012 show that there were 967 firms that operated for the entire year. Of this total, 955 firms had employment of 999 or fewer employees and 12 had employment of 1,000 employees or more. Thus under this category and the associated size standard, the Commission estimates that the majority of wireless telecommunications carriers (except satellite) are small entities.

19. *Television Broadcasting.* This Economic Census category “comprises establishments primarily engaged in broadcasting images together with sound.” These establishments operate television broadcast studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA has created the following small business size standard for such businesses: Those having \$41.5 million or less in annual receipts. The 2012 Economic Census reports that 751 firms in this category operated in that year. Of that number, 656 had annual receipts of \$25,000,000 or less. Based on this data we therefore estimate that the majority of commercial television broadcasters are small entities under the applicable SBA size standard.

20. The Commission has estimated the number of licensed commercial television stations to be 1,377. Of this total, 1,258 stations (or about 91 percent) had revenues of \$41.5 million or less, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on November 16, 2017, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission has estimated the number of licensed noncommercial educational television stations to be 384. Notwithstanding, the Commission does not compile and otherwise does not have access to information on the revenue of NCE stations that would permit it to determine how many such stations would qualify as small entities. There are also 2,300 low power television stations, including Class A stations (LPTV) and 3,681 TV translator stations. Given the nature of these services, we will presume that all of these entities qualify as small entities

under the above SBA small business size standard.

21. In assessing whether a business concern qualifies as “small” under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, another element of the definition of “small business” requires that an entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific television broadcast station is dominant in its field of operation. Accordingly, the estimate of small businesses to which rules may apply does not exclude any television station from the definition of a small business on this basis and is therefore possibly over-inclusive. Also, as noted above, an additional element of the definition of “small business” is that the entity must be independently owned and operated. The Commission notes that it is difficult at times to assess these criteria in the context of media entities and its estimates of small businesses to which they apply may be over-inclusive to this extent.

22. *Radio Stations.* This Economic Census category “comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in their own studio, from an affiliated network, or from external sources.” The SBA has established a small business size standard for this category as firms having \$41.5 million or less in annual receipts. Economic Census data for 2012 show that 2,849 radio station firms operated during that year. Of that number, 2,806 firms operated with annual receipts of less than \$25 million per year, 17 with annual receipts between \$25 million and \$49,999,999 million and 26 with annual receipts of \$50 million or more. Therefore, based on the SBA’s size standard the majority of such entities are small entities.

23. According to Commission staff review of the BIA/Kelsey, LLC’s Media Access Pro Radio Database as of January 2018, about 11,261 (or about 99.9 percent) of 11,383 commercial radio stations had revenues of \$41.5 million or less and thus qualify as small entities under the SBA definition. The Commission has estimated the number of licensed commercial AM radio stations to be 4,633 stations and the number of commercial FM radio stations to be 6,738, for a total number of 11,371. We note the Commission has

also estimated the number of licensed noncommercial (NCE) FM radio stations to be 4,128. Nevertheless, the Commission does not compile and otherwise does not have access to information on the revenue of NCE stations that would permit it to determine how many such stations would qualify as small entities. We also note, that in assessing whether a business entity qualifies as small under the above definition, business control affiliations must be included. The Commission's estimate therefore likely overstates the number of small entities that might be affected by its action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, to be determined a "small business," an entity may not be dominant in its field of operation. We further note, that it is difficult at times to assess these criteria in the context of media entities, and the estimate of small businesses to which these rules may apply does not exclude any radio station from the definition of a small business on these basis, thus our estimate of small businesses may therefore be over-inclusive. Also, as noted above, an additional element of the definition of "small business" is that the entity must be independently owned and operated. The Commission notes that it is difficult at times to assess these criteria in the context of media entities and the estimates of small businesses to which they apply may be over-inclusive to this extent.

24. *Cable Companies and Systems (Rate Regulation)*. The Commission has also developed its own small business size standards, for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers nationwide. Industry data indicate that there are 4,600 active cable systems in the United States. Of this total, all but five cable operators nationwide are small under the 400,000-subscriber size standard. In addition, under the Commission's rate regulation rules, a "small system" is a cable system serving 15,000 or fewer subscribers. Commission records show 4,600 cable systems nationwide. Of this total, 3,900 cable systems have fewer than 15,000 subscribers, and 700 systems have 15,000 or more subscribers, based on the same records. Thus, under this standard as well, we estimate that most cable systems are small entities.

25. *Cable System Operators (Telecom Act Standard)*. The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is "a cable operator

that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." As of 2019, there were approximately 48,646,056 basic cable video subscribers in the United States. Accordingly, an operator serving fewer than 486,460 subscribers shall be deemed a small operator if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed \$250 million in the aggregate. Based on available data, we find that all but five cable operators are small entities under this size standard. We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

26. *Direct Broadcast Satellite (DBS) Service*. DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic "dish" antenna at the subscriber's location. DBS is included in SBA's economic census category "Wired Telecommunications Carriers." The Wired Telecommunications Carriers industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution; and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. The SBA determines that a wireline business is small if it has fewer than 1,500 employees. U.S. Census Bureau data for 2012 indicates that 3,117 wireline companies were operational during that year. Of that number, 3,083 operated with fewer than 1,000

employees. Based on that data, we conclude that the majority of wireline firms are small under the applicable SBA standard. Currently, however, only two entities provide DBS service, which requires a great deal of capital for operation: DIRECTV (owned by AT&T) and DISH Network. DIRECTV and DISH Network each report annual revenues that are in excess of the threshold for a small business. Accordingly, we must conclude that internally developed FCC data are persuasive that, in general, DBS service is provided only by large firms.

27. *All Other Telecommunications*. The "All Other Telecommunications" category is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Establishments providing internet services or voice over internet protocol (VoIP) services via client-supplied telecommunications connections are also included in this industry. The SBA has developed a small business size standard for All Other Telecommunications, which consists of all such firms with annual receipts of \$35 million or less. For this category, U.S. Census Bureau data for 2012 shows that there were 1,442 firms that operated for the entire year. Of those firms, a total of 1,400 had annual receipts less than \$25 million and 15 firms had annual receipts of \$25 million to \$49,999,999. Thus, the Commission estimates that the majority of "All Other Telecommunications" firms potentially affected by our action can be considered small.

28. *RespOrgs*. Responsible Organizations, or RespOrgs, are entities chosen by toll free subscribers to manage and administer the appropriate records in the toll free Service Management System for the toll free subscriber. Although RespOrgs are often wireline carriers, they can also include non-carrier entities. Therefore, in the definition herein of RespOrgs, two categories are presented, *i.e.*, Carrier RespOrgs and Non-Carrier RespOrgs.

29. *Carrier RespOrgs*. Neither the Commission, the U.S. Census, nor the SBA have developed a definition for Carrier RespOrgs. Accordingly, the Commission believes that the closest NAICS code-based definitional categories for Carrier RespOrgs are

Wired Telecommunications Carriers, and Wireless Telecommunications Carriers (except satellite).

30. The U.S. Census Bureau defines *Wired Telecommunications Carriers* as “establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies.

Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.” The SBA has developed a small business size standard for Wired Telecommunications Carriers, which consists of all such companies having 1,500 or fewer employees. U.S. Census Bureau data for 2012 show that there were 3,117 firms that operated that year. Of this total, 3,083 operated with fewer than 1,000 employees. Based on that data, we conclude that the majority of Carrier RespOrgs that operated with wireline-based technology are small.

31. The U.S. Census Bureau defines *Wireless Telecommunications Carriers (except satellite)* as establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves, such as cellular services, paging services, wireless internet access, and wireless video services. The appropriate size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. Census data for 2012 show that 967 Wireless Telecommunications Carriers operated in that year. Of that number, 955 operated with less than 1,000 employees. Based on that data, we conclude that the majority of Carrier RespOrgs that operated with wireless-based technology are small.

32. *Non-Carrier RespOrgs*. Neither the Commission, the U.S. Census, nor the SBA have developed a definition of Non-Carrier RespOrgs. Accordingly, the Commission believes that the closest NAICS code-based definitional categories for Non-Carrier RespOrgs are “Other Services Related to Advertising” and “Other Management Consulting Services.”

33. The U.S. Census defines *Other Services Related to Advertising* as comprising establishments primarily engaged in providing advertising services (except advertising agency services, public relations agency services, media buying agency services, media representative services, display advertising services, direct mail advertising services, advertising material distribution services, and marketing consulting services). The SBA has established a size standard for this industry as annual receipts of \$16.5 million dollars or less. Census data for 2012 show that 5,804 firms operated in this industry for the entire year. Of that number, 5,612 operated with annual receipts of less than \$10 million. Based on that data we conclude that the majority of Non-Carrier RespOrgs who provide toll-free number (TFN)-related advertising services are small.

34. The U.S. Census defines *Other Management Consulting Services* as establishments primarily engaged in providing management consulting services (except administrative and general management consulting; human resources consulting; marketing consulting; or process, physical distribution, and logistics consulting). Establishments providing telecommunications or utilities management consulting services are included in this industry. The SBA has established a size standard for this industry of \$16.5 million dollars or less. Census data for 2012 show that 3,683 firms operated in this industry for that entire year. Of that number, 3,632 operated with less than \$10 million in annual receipts. Based on this data, we conclude that a majority of non-carrier RespOrgs who provide TFN-related management consulting services are small.

35. In addition to the data contained in the four (see above) U.S. Census NAICS code categories that provide definitions of what services and functions the Carrier and Non-Carrier RespOrgs provide, Somos, the trade association that monitors RespOrg activities, compiled data showing that as of July 1, 2016 there were 23 RespOrgs operational in Canada and 436 RespOrgs operational in the United States, for a total of 459 RespOrgs currently registered with Somos.

E. Description of Projected Reporting, Recordkeeping and Other Compliance Requirements

36. This Report and Order does not adopt any new reporting, recordkeeping, or other compliance requirements.

F. Steps Taken To Minimize Significant Economic Impact on Small Entities and Significant Alternatives Considered

37. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its approach, which may include the following four alternatives, among others: (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

38. The methodology adopted by the Commission for using the population-based calculations for TV broadcasters was initially adopted because it is a fairer methodology for the smaller broadcasters. The Commission is using this methodology for this year, too. The changes for Puerto Rican broadcasters were adopted by the Commission in order to give relief for these broadcasters, some of which may be small entities, and the Commission is also using this methodology this year. Finally, the waiver process that we adopted previously and are continuing in 2021 was adopted to provide relief to entities that have suffered financial hardship in the COVID-19 pandemic, which includes small entities.

39. In addition, under the Commission’s *de minimis* rule, under section 9(e)(2) of the Act, a regulatee is exempt from paying regulatory fees if the sum total of all of its annual regulatory fee liabilities is \$1,000 or less for the fiscal year. The *de minimis* threshold applies only to filers of annual regulatory fees.

V. Ordering Clauses

40. Accordingly, *it is ordered* that, pursuant to the authority found in sections 4(i) and (j), 9, 9A, and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 159, 159A, and 303(r), this Report and Order *is hereby adopted*.

41. *It is further ordered* that the FY 2021 section 9 regulatory fees assessment requirements and the rules set forth in this Report and Order *are adopted* as specified herein.

42. *It is further ordered* that this Report and Order *shall be effective* upon publication in the **Federal Register**.

43. *It is further ordered* that the Commission’s Consumer and Governmental Affairs Bureau, Reference

Information Center, *shall send* a copy of this Report and Order, including the Final Regulatory Flexibility Analysis in this document, to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Federal Communications Commission.

Marlene Dortch,

Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications

Commission 47 CFR part 1 is amended as follows:

Part 1 of Title 47 of the Code of Federal Regulations is amended to read as follows:

PART 1—PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 47 U.S.C. chs. 2, 5, 9, 13; 28 U.S.C. 2461 note, unless otherwise noted.

■ 2. Section 1.1151 of the Commission’s rules is revised to read as follows:

§ 1.1151 Authority to prescribe and collect regulatory fees.

Authority to impose and collect regulatory fees is contained in section 9 of the Communications Act, as amended by sections 101–103 of title I of the Consolidated Appropriations Act of 2018 (Pub. L. 115–141, 132 Stat. 1084), 47 U.S.C. 159, which directs the Commission to prescribe and collect annual regulatory fees to recover the cost of carrying out the functions of the Commission.

■ 3. Section 1.1152 is revised to read as follows:

§ 1.1152 Schedule of annual regulatory fees for wireless radio services.

TABLE 1 TO § 1.1152

Exclusive use services (per license)	Fee amount
1. Land Mobile (Above 470 MHz and 220 MHz Local, Base Station & SMRS) (47 CFR part 90):	
(a) New, Renew/Mod (FCC 601 & 159)	\$25.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159)	25.00
(c) Renewal Only (FCC 601 & 159)	25.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159)	25.00
220 MHz Nationwide:	
(a) New, Renew/Mod (FCC 601 & 159)	25.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159)	25.00
(c) Renewal Only (FCC 601 & 159)	25.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159)	25.00
2. Microwave (47 CFR part 101) (Private):	
(a) New, Renew/Mod (FCC 601 & 159)	25.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159)	25.00
(c) Renewal Only (FCC 601 & 159)	25.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159)	25.00
3. Shared Use Services:	
Land Mobile (Frequencies Below 470 MHz—except 220 MHz):	
(a) New, Renew/Mod (FCC 601 & 159)	10.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159)	10.00
(c) Renewal Only (FCC 601 & 159)	10.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159)	10.00
Rural Radio (47 CFR part 22):	
(a) New, Additional Facility, Major Renew/Mod (Electronic Filing) (FCC 601 & 159)	10.00
(b) Renewal, Minor Renew/Mod (Electronic Filing)	10.00
Marine Coast:	
(a) New Renewal/Mod (FCC 601 & 159)	40.00
(b) New, Renewal/Mod (Electronic Filing) (FCC 601 & 159)	40.00
(c) Renewal Only (FCC 601 & 159)	40.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159)	40.00
Aviation Ground:	
(a) New, Renewal/Mod (FCC 601 & 159)	20.00
(b) New, Renewal/Mod (Electronic Filing) (FCC 601 & 159)	20.00
(c) Renewal Only (FCC 601 & 159)	20.00
(d) Renewal Only (Electronic Only) (FCC 601 & 159)	20.00
Marine Ship:	
(a) New, Renewal/Mod (FCC 605 & 159)	15.00
(b) New, Renewal/Mod (Electronic Filing) (FCC 605 & 159)	15.00
(c) Renewal Only (FCC 605 & 159)	15.00
(d) Renewal Only (Electronic Filing) (FCC 605 & 159)	15.00
Aviation Aircraft:	
(a) New, Renew/Mod (FCC 605 & 159)	10.00
(b) New, Renew/Mod (Electronic Filing) (FCC 605 & 159)	10.00
(c) Renewal Only (FCC 605 & 159)	10.00
(d) Renewal Only (Electronic Filing) (FCC 605 & 159)	10.00
4. CMRS Cellular/Mobile Services (per unit) (FCC 159)	1.15
5. CMRS Messaging Services (per unit) (FCC 159)	2.08
6. Broadband Radio Service (formerly MMDS and MDS)	605
7. Local Multipoint Distribution Service	605

¹ These are standard fees that are to be paid in accordance with § 1.1157(b) of this chapter.

²These are standard fees that are to be paid in accordance with § 1.1157(b) of this chapter.

■ 4. Section 1.1153 is revised to read as follows:

§ 1.1153 Schedule of annual regulatory fees and filing locations for mass media services.

TABLE 1 TO § 1.1153

Radio [AM and FM] (47 CFR part 73)	Fee amount
1. AM Class A:	
≤25,000 population	\$975
25,001–75,000 population	1,465
75,001–150,000 population	2,195
150,001–500,000 population	3,295
500,001–1,200,000 population	4,935
1,200,001–3,000,000 population	7,410
3,000,001–6,000,000 population	11,105
>6,000,000 population	16,665
2. AM Class B:	
≤25,000 population	700
25,001–75,000 population	1,050
75,001–150,000 population	1,575
150,001–500,000 population	2,365
500,001–1,200,000 population	3,540
1,200,001–3,000,000 population	5,320
3,000,001–6,000,000 population	7,975
>6,000,000 population	11,965
3. AM Class C:	
≤25,000 population	610
25,001–75,000 population	915
75,001–150,000 population	1,375
150,001–500,000 population	2,060
500,001–1,200,000 population	3,085
1,200,001–3,000,000 population	4,635
3,000,001–6,000,000 population	6,950
>6,000,000 population	10,425
4. AM Class D:	
≤25,000 population	670
25,001–75,000 population	1,000
75,001–150,000 population	1,510
150,001–500,000 population	2,265
500,001–1,200,000 population	3,390
1,200,001–3,000,000 population	5,090
3,000,001–6,000,000 population	7,630
>6,000,000 population	11,450
5. AM Construction Permit	610
6. FM Classes A, B1 and C3:	
≤25,000 population	1,070
25,001–75,000 population	1,605
75,001–150,000 population	2,410
150,001–500,000 population	3,615
500,001–1,200,000 population	5,415
1,200,001–3,000,000 population	8,130
3,000,001–6,000,000 population	12,185
>6,000,000 population	18,285
7. FM Classes B, C, C0, C1 and C2:	
≤25,000 population	1,220
25,001–75,000 population	1,830
75,001–150,000 population	2,745
150,001–500,000 population	4,125
500,001–1,200,000 population	6,175
1,200,001–3,000,000 population	9,270
3,000,001–6,000,000 population	13,895
>6,000,000 population	20,850
8. FM Construction Permits	1,070
TV (47 CFR part 73)	
Digital TV (UHF and VHF Commercial Stations):	
1. Digital TV Construction Permits	5,100
2. Television Fee Factor	*.007793
Low Power TV, Class A TV, FM Translator, & TV/FM Booster (47 CFR part 74)	320

* Per population count.

■ 5. Section 1.1154 is revised to read as follows:

§ 1.1154 Schedule of annual regulatory charges for common carrier services.

TABLE 1 TO § 1.1154

Radio facilities	Fee amount
1. Microwave (Domestic Public Fixed) (Electronic Filing) (FCC Form 601 & 159)	\$25.00
Carriers:	
1. Interstate Telephone Service Providers (per interstate and international end-user revenues (see FCC Form 499-A)00400
2. Toll Free Number Fee	*.12

* Per Toll Free Number.

■ 6. Section 1.1155 is revised to read as follows:

§ 1.1155 Schedule of regulatory fees for cable television services.

TABLE 1 TO § 1.1155

	Fee amount
1. Cable Television Relay Service	\$1,555
2. Cable TV System, Including IPTV (per subscriber), and DBS (per subscriber)98

■ 7. Section 1.1156 is revised to read as follows:

§ 1.1156 Schedule of regulatory fees for international services.

stations. The following schedule applies for the listed services:

(a) *Geostationary orbit (GSO) and non-geostationary orbit (NGSO) space*

TABLE 1 TO PARAGRAPH (a)

Fee category	Fee amount
Space Stations (Geostationary Orbit)	\$116,855
Space Stations (Non-Geostationary Orbit)—Other	343,555
Space Stations (Non-Geostationary Orbit)—Less Complex	122,695
Earth Stations: Transmit/Receive & Transmit only (per authorization or registration)	595

(b) *International terrestrial and satellite Bearer Circuits.* (1) Regulatory fees for International Bearer Circuits are to be paid by facilities-based common carriers that have active (used or leased) international bearer circuits as of December 31 of the prior year in any terrestrial or satellite transmission facility for the provision of service to an end user or resale carrier, which

includes active circuits to themselves or to their affiliates. In addition, non-common carrier terrestrial and satellite operators must pay a fee for each active circuit sold or leased to any customer, including themselves or their affiliates, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. “Active circuits” for

purposes of this paragraph (b) include backup and redundant circuits. In addition, whether circuits are used specifically for voice or data is not relevant in determining that they are active circuits.

(2) The fee amount, per active Gbps circuit will be determined for each fiscal year.

TABLE 2 TO PARAGRAPH (b)(2)

International terrestrial and satellite (capacity as of December 31, 2020)	Fee amount
Terrestrial Common Carrier and Non-Common Carrier; Satellite Common Carrier and Non-Common Carrier	\$43*

* Per Gbps circuit.

(c) *Submarine cable.* Regulatory fees for submarine cable systems will be

paid annually, per cable landing license, for all submarine cable systems

operating based on their lit capacity as of December 31 of the prior year. The fee amount will be determined by the Commission for each fiscal year.

TABLE 3 TO PARAGRAPH (c)—FY 2021 INTERNATIONAL BEARER CIRCUITS—SUBMARINE CABLE SYSTEMS

Submarine cable systems (lit capacity as of December 31, 2020)	Fee ratio (units)	FY 2020 regulatory fees
Less than 50 Gbps0625	\$9,495
50 Gbps or greater, but less than 250 Gbps125	18,990
250 Gbps or greater, but less than 1,500 Gbps25	37,980
1,500 Gbps or greater, but less than 3,500 Gbps5	75,955
3,500 Gbps or greater, but less than 6,500 Gbps	1.0	151,910
6,500 Gbps or greater	2.0	303,820
