

rearmost structural element of the trailer has a ground clearance of less than 22 inches and therefore is excluded from the requirements of a rear impact guard under FMVSS Nos. 224 and that FMVSS 223 therefore does not apply. Petitioner provided photographs depicting the measurements of the ground clearance of the rearmost structural member of the trailer that appear to support this claim.

Petitioner also contends that the Subject Vehicle is capable of meeting the requirements set forth in 49 CFR part 565 (Vehicle Identification Number Requirements) and 49 CFR part 567 (Certification) by affixing a certification label to the trailer on the “Left Front Half at Shoulder Height” that contains the VIN number of the Subject Vehicle.

III. Public Comments

A Notice of Receipt of the Petition was published in the **Federal Register** for public comment for a period of 30 days. 86 FR 48476 (Aug. 30, 2021). No public comment was submitted in response to the Notice of Receipt.

IV. NHTSA’S Analysis

A petition to determine import eligibility must include all information required under the applicable authorities and must also include data, views, and arguments demonstrating the conclusions advanced by the petition. In this case, the Petition includes information demonstrating that the following FMVSS requirements are met by the Subject Vehicle as manufactured.

FMVSS No. 119 (New Pneumatic Tires)—Petitioner has shown the vehicle, as manufactured, is equipped with compliant tires, by direct inspection and submitted photographs depicting tires that bear the relevant “DOT” markings/symbols and all required information for U.S. DOT certification.

FMVSS No. 121 (Air Brake Systems)—Petitioner has shown the vehicle, as manufactured, is equipped with a compliant braking system, by direct inspection, submitted photographs, and a service brake and park brake actuation and release timing test report, which demonstrated that the results are within the required specifications for compliance.

FMVSS Nos. 223 (Rear Impact Guards) and 224 (Rear Impact Protection)—Petitioner has shown the vehicle meets the definition of a “[l]ow chassis vehicle” and is excluded from requiring a rear impact guard per the requirements of FMVSS No. 224 and that FMVSS No. 223 is therefore not applicable to the Subject Vehicle, by submitting photographs depicting a ground clearance of the rear most

structural member within 12 inches of the rear of the trailer to be less than 22 inches above ground.

Petitioner also demonstrated that the Subject Vehicle, as manufactured, is capable of being modified to conform to FMVSS No. 108 (Lamps, Reflective Devices and Associated Equipment). Although Petitioner failed to demonstrate the Subject Vehicle meets the requirements for retroreflective tape on the back of the vehicle, NHTSA concludes that the vehicle is capable of being modified to meet these requirements with the addition of retroreflective tape in the location specified in the standard. Petitioner has shown the Subject Vehicle meets all other lighting and conspicuity requirements of the standard, by submitting photographs depicting the DOT marking of the compliant lamps and the location of other retroreflective tape.

Additionally, and as stated by Petitioner, the Subject Vehicle will need to be modified to conform to the requirements set forth in 49 CFR part 565 (Vehicle Identification Number Requirements) and 49 CFR part 567 (Certification) by affixing a safety certification label to the trailer on the “Left Front Half at Shoulder Height” that contains the VIN number of the vehicle.

V. Agency Decision

Petitioner has demonstrated that the Subject Vehicle is either compliant with or capable of being readily altered to comply with all applicable FMVSS, and the petition is therefore granted.

Authority: 49 U.S.C. 30141(a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.
