SUPPLEMENTARY INFORMATION: This system of records contains information regarding applicants for and beneficiaries of benefits chiefly administered by the Veterans Benefits Administration (VBA). This system is a core system for VBA programs. This system of records does not directly address health or memorial benefits administered respectively by the Veterans Health Administration or the National Cemetery Administration, the other two of the three Administrations within VA. This system was first published on March 3, 1976, and last amended on February 14, 2019, to reaffirm the establishment of the Veterans Benefits Management System (VBMS) eFolder as the official record for Veterans claims processing, management, adjudication, and appeals, propose the plan to properly dispose of paper duplicate copies and other physical media after imaging and upload into the eFolder, and to begin using the eFolder as an integrated benefits repository for records related to VA Insurance and Loan Guarantee benefits.

VA is proposing to update this SORN to include the addition of two new applications that will be used by Vocational Rehabilitation and Employment (VR&E) counselors and/or Veteran participants: The Electronic Virtual Assistant (e-VA) and the Case Management Solution (CMS). e-VA is an active, artificial intelligence-enabled application that alleviates the burden of compliance, data entry, communications, documentation, and repetitive tasks in order to empower VR&E resources to focus their time on Veteran participants’ needs, fulfilling the organization’s mission of guiding Veteran participants to successful outcomes. e-VA’s web-based capabilities allow for bi-directional automated and on-demand text and email communication between VA’s VR&E counselors and Veterans who are seeking to use or are actively enrolled in VR&E programs. It provides program participants with the ability to submit documentation such as training certificates, training receipts, or employment verification documents using their mobile devices. It will also enable system-generated, interactive appointment scheduling, rescheduling and cancellation, plus keep Veterans updated by providing announcements and broadcast messages.

CMS is a Software as a Service application that will be used to automate the application process for VR&E, assign and transfer claimant files between VR&E counselors and stations, communicate with claimants, manage and record awards and payments to claimants, provide metrics on VR&E services, and ensure appropriate access controls are enabled for the system. CMS’s web-based capabilities allow for bi-directional, automated, and on-demand integration between CMSs and numerous VA systems, improving the automation, consistency and efficiency of VR&E counselors’ work with claimants. It will also enable interaction with the e-VA system to ensure the value of both technologies is available to the VR&E counselors.

VA is also adding fiduciary records to this system as part of the retirement of legacy Beneficiary Fiduciary Field System (BFBS) that was covered under “Supervised Fiduciary/Beneficiary and General Investigative Records—VA” (37VA27). With the sunset of the BFBS system, Fiduciary records will be managed and stored in VBMS, which will serve as the primary application for the delivery of Fiduciary benefits to VA beneficiaries. In addition to the name, mailing address, Social Security number, medical record information, and financial information specific to VA Beneficiaries, VBMS will also store information on individuals/organizations serving as fiduciaries. This will include the name, mailing address, Social Security or tax identification number, and credit and criminal histories of individuals/organizations who are currently VA-appointed fiduciaries, who previously served as VA-appointed fiduciaries, or who were considered for service as VA-appointed fiduciaries. The purpose of maintaining these records is to qualify the individual/organization for service as a fiduciary and provide oversight of fiduciary activities. As such, additional Categories of Individuals, Categories of Records, Routine Uses, and other information specific to the VA Fiduciary program are being added to this system.

VA is also proposing to add the Filipino Loyalty File as a type of record stored in this system. The Filipino Loyalty File is a group of records relating generally to the loyalty of Filipino nationals during the Japanese occupation of the Philippine Islands during World War II (WWII). Most of the records were created or collected by Army investigative or intelligence units after the War and are used to help determine eligibility for VA benefits for Filipino nationals who served on behalf of the American cause during the War. Additionally, VA is updating the name of the Virtual VA system to...

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The BDN, Legacy Content Manager (LCM), Corporate WINRS, VETSNET, The Image Management System (TIMS), Long Term Solution (LTS), CMS and the VBMS are data telecommunication terminal systems. For Compensation and Pension-related claims, records (or information contained in records) are no longer maintained on paper documents in claims folders (C-folders), but are now 100% digitized and stored in the VBMS electronic folder (VBMS eFolder). In 2012, VA declared the VBMS eFolder to be the official record for all documentation submitted to VA pursuant to claims for Compensation and Pension benefits. All paper documents VA receives pursuant to a Compensation or Pension claim are converted to a digital image via VA's electronic imaging process and uploaded into the VBMS eFolder. An electronically-imaged document in the VBMS eFolder is the official copy of record for adjudicating claims for VA Compensation or Pension benefits. When VA decision makers adjudicate claims for Compensation or Pension benefits, they rely solely on the electronic image contained in the VBMS eFolder, irrespective of whether a document is initially submitted to VA in electronic or paper format. VA decision makers do not have access to the original paper source documents during the claims adjudication process. Once a paper source document is electronically imaged and uploaded into the eFolder, VA considers the electronic image to be the official copy of record, while the physical paper document is reclassified as a duplicate copy. All duplicate copies of the official record are subject to destruction in accordance with applicable procedures and laws (please see the Retention and Disposal section for further details.)

VR&E and Education claims are maintained on paper, electronic folders, and on automated storage media (e.g., microfilm, microfiche, magnetic tape and disks). Texts and emails from the Veterans pursuant to a VR&E claim are stored in the Corporate Database as a Corporate WINRS Case Note, which becomes the official record. Any texts and emails stored in the cloud/contractor server are considered duplicate copies. Such information may be accessed through BDN, VBMS, CMS, TIMS, LTS, and VETSNET terminals. BDN, LCM, Corporate WINRS, VETSNET, and VBMS terminal locations include VA Central Office, regional offices, VA health care facilities, Veterans Integrated Service Network offices, DoD Finance and Accounting Service Centers and the U.S. Coast Guard Pay and Personnel Center. Remote on-line access is also made available to authorized remote sites, representatives of claimants and to attorneys of record for claimants. A VA claimant must execute a prior written consent or a power of attorney authorizing access to his or her claims records before VA will allow the representative or attorney to have access to the claimant’s automated claims records. Access by representatives and attorneys of record is to be used solely for the purpose of assisting an individual claimant whose records are accessed in a claim for benefits administered by VA. Information relating to receivable accounts owed to VA, designated the Centralized Accounts Receivable System (CARS), is maintained on magnetic tape, microfiche and microfilm. CARS is accessed through a data telecommunications terminal system at St. Paul, Minnesota.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

File folders, whether paper or electronic, are indexed by name of the individual and VA file number. Automated records are indexed by name, VA file number, payee name and type of benefit. Employee productivity is measured using automated systems. At the conclusion of a monthly reporting period, the generated listing is indexed by employee BDN identification number. Records in CAVR may only be retrieved by social security number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

All claims files folders for Compensation and Pension claims are electronically imaged and uploaded into the VBMS eFolder. Once a file is electronically imaged and established by VA as the official record, its paper contents (with the exception of documents that are on hold due to pending litigation, and service treatment records and other documents that are the property of DoD), are reclassified as duplicate—non record keeping—copies of the official record, and will be destroyed in accordance with Records Control Schedule VB–1, Part 1 Section XIII, Item 13–052.100 as authorized by NARA. All paper documentation that is not the property of VA (e.g., DoD-owned documentation) is currently stored by VA after scanning, pending a policy determination as to its final disposition. All documentation being held pursuant to active litigation is held in its native format during the pendency of the litigation. All VBMS eFolders are stored on a secure VA server, pending permanent transfer to NARA where they will be maintained as historical records. Once an electronic record has been transferred into NARA custody, the record will be fully purged and deleted from the VA system in accordance with governing records control schedules.
using commercial off the shelf (COTS) software designed for the purpose. Once purged, the record will be unavailable on the VA system, and will only be accessible through NARA.

Prior to destruction of any paper source documentation reclassified as duplicate copies, VA engages in a comprehensive and multi-layered quality control and validation program to ensure material that has been electronically imaged is completely and accurately uploaded into the VBMS eFolder. To guarantee the integrity and completeness of the record, VA engages in industry-best practices, using state-of-the-art equipment, random sampling, independent audit, and 100% VA review throughout the claims adjudication process. Historically, VA’s success rate in ensuring the accuracy and completeness of the electronic record routinely and consistently exceeds 99%. Furthermore, no paper document is ever destroyed while any related claim or appeal for VA benefits is still pending. VA waits 3 years after the final adjudication of any claim or appeal before destroying the paper duplicate copies that have been scanned into the VBMS eFolder. As noted, the electronic image of the paper document is retained indefinitely as a permanent record either by VA or NARA.

Decisions to destroy VR&E paper counseling records are to be made in accordance with Records Control Schedule (RCS), RCS V8–1, Part I, Field in Section VII, dated January 31, 2014. Automated storage media containing temporary working information are retained until a claim is decided, and then destroyed. All other automated storage media are retained and disposed of in accordance with disposition authorization approved by NARA. Education file folders in paper are retained at the servicing Regional Processing Office. Education paper folders may be destroyed in accordance with the times set forth in the VBA Records Management, Records Control Schedule V8–1, Part I, Section VII, as authorized by NARA.

Employee productivity records are maintained for two years after which they are destroyed by shredding or burning. File information for CAIVRS is provided to HUD by VA on magnetic tape. After information from the tapes has been read into the computer the tapes are returned to VA for updating. HUD does not keep separate copies of the tapes.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

1. Physical Security:

(a) Access to working spaces and claims folder file storage areas in VA regional offices and centers is restricted to VA employees on a need-to-know basis. Generally, file areas are locked after normal duty hours and the offices and centers are protected from outside access by the Federal Protective Service or other security personnel. Employee claims file records and claims file records of public figures are stored in separate locked files. Strict control measures are enforced to ensure that access to and disclosure from these claims file records are limited to a need-to-know basis. Duplicate paper copies after imaging are stored in NARA-compliant facilities, pending destruction.

(b) Access to BDN, LCM, Corporate WINRS, VETSNET, CMS, and VBMS data telecommunication networks are by authorization controlled by the site security officer who is responsible for authorizing access to the BDN, LCM, VBMS and VETSNET by a claimant’s representative or attorney approved for access in accordance with VA regulations. The site security officer is responsible for ensuring that the hardware, software and security practices of a representative or attorney satisfy VA security requirements before granting access. The security requirements applicable to the access of automated claims files by VA employees also apply to the access of automated claims files by claimants’ representatives or attorneys. The security officer is assigned responsibility for privacy-security measures, especially for review of violation logs, information logs and control of password distribution, including password distribution for claimants’ representatives.

(c) Access to data processing centers is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons provided access to computer rooms are escorted.

(d) Employee production records are identified by the confidential BDN and VETSNET employee identification number, and are protected by management/supervisory personnel from unauthorized disclosure in the same manner as other confidential records maintained by supervisors.

2. BDN, LCM, VETSNET, CMS, e-VA, and VBMS System Security:

(a) Usage of the BDN, LCM, Corporate WINRS, VETSNET, e-VA and VBMS systems is protected by the usage of "login" identification passwords and authorized function passwords. The passwords are changed periodically. These same protections apply to remote access users.

(b) At the data processing centers, identification of magnetic tapes and disks containing data is rigidly enforced using labeling techniques. Automated storage media, which are not in use, are stored in tape libraries, which are secured in locked rooms. Access to programs is controlled at three levels: Programming, auditing and operations. Access to the data processing centers where HUD maintains CAIVRS is generally restricted to center employees and authorized subcontractors. Access to computer rooms is restricted to center employees and authorized operational personnel through electronic locking devices. All other persons granted access to computer rooms are escorted. Files in CAIVRS use social security numbers as identifiers. Access to information files is restricted to authorized employees of participating agencies and authorized employees of lenders who participate in the agencies’ programs. Access is controlled by agency distribution of passwords. Information in the system may be accessed by use of a touch-tone telephone by authorized agency and lender employees on a “need-to-know” basis.

3) e-VA and CMS System Security:

A unique SSL certificate has been generated for this connection which provides authentication for the e-VA and CMS applications, which enables an encrypted connection. Short Message Service (SMS) text messages are processed using a secure SMS gateway hosted by Twilio. The client’s first and last name (the only PII in the text message) are encrypted when the information is passed back and forth. Emails are processed by AWS Simple Email Service (SES) using Transport Layer Security (TLS) protocol, which is a cryptographic protocol designed to provide communications security over a computer network. All emails to participants are sent from a single email address (eva@eva.va.gov).

RECORD ACCESS PROCEDURES:

Veterans and authorized parties have a statutory right to request a copy of or an amendment to a record in VA’s possession at any time under the Freedom of Information Act (FOIA) and the Privacy Act (PA). VA has a decentralized system for fulfilling FOIA and PA requests. The type of information or records an individual is seeking will determine the location to which a request should be submitted. For records contained within a VA
claims folder (Compensation and Pension claims), or military service medical records in VA’s possession, the request will be fulfilled by the VA Records Management Center. Authorized requestors should mail their Privacy Act or FOIA requests to: Department of Veterans Affairs, Claims Intake Center, P.O. Box 4444, Janesville, WI 53547–4444, DID: 608–373–6690.

For other benefits records maintained by VA (to include Vocational Rehabilitation & Employment, Insurance, Loan Guaranty or Education Service) submit requests to the FOIA/Privacy Act Officer at the VA Regional Office serving the individual’s jurisdiction. Address locations for the nearest VA Regional Office are listed at VA Locations Link.

Any individuals who have questions about access to records may also call 1–800–327–1000. Information about how to contact Fiduciary services can be found here: https://www.benefits.va.gov/FIDUCIARY/contact-us.asp.

CONTESTING RECORD PROCEDURES:
See Record access procedures above.

NOTIFICATION PROCEDURES:
Any individual, who wishes to determine whether a record is being maintained in this system under his or her name or other personal identifier, or wants to determine the contents of such record, should submit a written request or apply in person to the nearest VA regional office or center. Address locations are listed at VA Locations Link.

VA employees wishing to inquire whether the system of records contains employee productivity information about themselves should contact their supervisor at the regional office or center of employment.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:
There is no category of records in this system that has been identified as exempt from any section of the Privacy Act.
