FEDERAL REGISTER

Vol. 86 Friday

No. 221 November 19, 2021

Book 1 of 2 Books

Pages 64795–65522

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 86 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

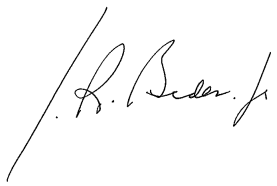
The President

Presidential Determination No. 2022–04 of November 12, 2021



Presidential Determination Pursuant to Section 1245(d)(4)(B) and (C) of the National Defense Authorization Act for Fiscal Year 2012

Memorandum for the Secretary of State[,] the Secretary of the Treasury[, and] the Secretary of Energy

By the authority vested in me as President by the Constitution and the laws of the United States, after carefully considering the reports submitted to the Congress by the Energy Information Administration, including the report submitted in August 2021, and other relevant factors, including global economic conditions, the level of spare capacity, and the availability of strategic reserves, I determine, pursuant to section 1245(d)(4)(B) and (C) of the National Defense Authorization Act for Fiscal Year 2012, Public Law 112–81, and consistent with prior determinations, that there is a sufficient supply of petroleum and petroleum products from countries other than Iran to permit a significant reduction in the volume of petroleum and petroleum products purchased from Iran by or through foreign financial institutions.

I will continue to monitor this situation closely.

The Secretary of State is authorized and directed to publish this determination in the *Federal Register*.

Proclamation 10309 of November 16, 2021

Suspension of Entry as Immigrants and Nonimmigrants of Persons Responsible for Policies or Actions That Threaten Democracy in Nicaragua

By the President of the United States of America

A Proclamation

In light of the importance to the United States of fostering democratic processes and institutions in Nicaragua to help the Nicaraguan people achieve their aspirations for democracy, and given the suppression of human rights and democracy in Nicaragua, I have determined that it is in the interest of the United States to restrict and suspend the entry into the United States, as immigrants and nonimmigrants, of members of the Government of Nicaragua, led by President Daniel Ortega, including his spouse and Vice President Rosario Murillo, and others described in this proclamation who formulate, implement, or benefit from policies or actions that undermine or injure democratic institutions or impede the return to democracy in Nicaragua.

The repressive and abusive acts of the Ortega government and those who support it compel the United States to act. The Ortega government's crackdown on opposition leaders, civil society leaders, and journalists in preparation for the November 2021 Nicaraguan presidential and legislative elections harms the institutions and processes essential to a functioning democracy. The Ortega government's undemocratic, authoritarian actions have crippled the electoral process and stripped away the right of Nicaraguan citizens to choose their leaders in free and fair elections.

The Ortega government's detention of and denial of fair trial guarantees to peaceful protesters, civil society leaders, private sector leaders, student leaders, political leaders, journalists, and presidential candidates in Nicaragua stifles political discourse and the democratic process. Police and prison authorities contribute to the repressive climate the Ortega government promotes by carrying out politically motivated arrests and detentions of individuals exercising their human rights and holding political prisoners incommunicado, without access to lawyers, family members, and needed medical care. Family members and the media have reported that some prisoners have lost significant weight in detention, cannot walk unassisted, have been held in solitary confinement, and are subjected to frequent, extensive interrogations. The physical and psychological abuse of political prisoners at the hands of police and prison authorities is intolerable and cannot stand.

The Ortega government controls multiple security services, including non-uniformed, armed, and masked parapolice, who abuse persons to further the Ortega government's authoritarian agenda, including by harassing, threatening, and committing violence against those opposed to the government. Members of the Nicaraguan National Police (NNP), along with violent mobs of pro-government supporters also controlled by government actors, have attacked religious institutions in retaliation for their support for political and religious leaders.

Municipal officials, acting on direct orders from the Ortega government, have directed violence against pro-democracy protesters in their communities and other local actors opposed to the government. For example, mayors

and mayors' offices loyal to the Ortega government have organized and channeled state funds to parapolice groups engaged in violent repression. These municipal officials wield enormous political power and discretionary budget authority, conferred upon them from the highest levels of the Ortega government. The climate of fear established and perpetuated by these municipal officials has diminished the possibility of free and fair elections and undermined democracy in Nicaragua.

The judiciary has failed the Nicaraguan people by aiding and abetting the Ortega government's use of politically motivated charges to lock up political prisoners. By stacking the judiciary with government-controlled judges and prosecutors, the Ortega government has abused the justice system to silence critics. Authorities have held many political prisoners incommunicado for months, without access to their lawyers, and with no knowledge of the spurious charges presented against them.

The widespread impunity for crimes committed against opposition actors; the persistent corruption practiced by Nicaraguan government officials in the performance of public functions that has eroded democratic institutions; and the continued failure of President Daniel Ortega, Vice President Rosario Murillo, Nicaraguan government officials, and others to support the rule of law, human rights, and other principles of high priority to the United States demand a forceful response.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by the authority vested in me by the Constitution and the laws of the United States, including sections 212(f) and 215(a) of the Immigration and Nationality Act (8 U.S.C. 1182(f) and 1185(a)) and section 301 of title 3, United States Code, hereby find that the unrestricted immigrant and nonimmigrant entry into the United States of persons described in section 1 of this proclamation would, except as provided for in section 4 of this proclamation, be detrimental to the interests of the United States, and that their entry should be subject to certain restrictions, limitations, and exceptions. I therefore hereby proclaim the following:

Section 1. *Suspension and Limitation on Entry*. The entry into the United States, as immigrants or nonimmigrants, of the following persons is hereby suspended:

(a) Members of the Government of Nicaragua, including elected officials and their staff members;

(b) Mayors, vice mayors, or political secretaries who planned, ordered, assisted, aided and abetted, committed, or otherwise participated in, including through command responsibility, serious abuses or violations of human rights to punish peaceful protestors or deny Nicaraguans fundamental freedoms, or who attempted or conspired to do so;

(c) Officials of Nicaragua's security services, including the Nicaraguan Military, NNP, Directorate of Special Police Operations, parapolice groups, and paramilitary groups;

(d) Officials of the Nicaraguan penitentiary administration;

(e) Senior members of the Nicaraguan judiciary, Public Prosecutors Office, and Ministry of the Interior;

(f) Members of Nicaraguan government ministries, regulatory agencies, parastatal companies, higher education administrators and faculty, and elected officials who undertake actions, including human rights abuses, to deny services to those who make peaceful efforts to demand the return to democracy in Nicaragua;

(g) Non-government persons who serve as agents of or act at the behest of those described in subsections (a)–(f) of this section to facilitate or derive financial benefit from policies or actions, including electoral fraud, human rights abuses, or corruption, that undermine or injure democratic institutions or impede the return to democracy in Nicaragua; and

(h) The spouses, sons, and daughters of persons described in subsections (a)–(g) of this section.

Sec. 2. *Authority of the Secretary of State to Identify Covered Individuals.* Persons covered by section 1 of this proclamation shall be identified by the Secretary of State, or the Secretary of State's designee, in the Secretary of State's sole discretion, pursuant to such procedures as the Secretary of State may establish.

Sec. 3. *Implementation of Suspension and Limitation on Entry.* The Secretary of State shall implement this proclamation as it applies to visas pursuant to such procedures as the Secretary of State, in consultation with the Secretary of Homeland Security, may establish. The Secretary of Homeland Security shall implement this proclamation as it applies to the entry of noncitizens pursuant to such procedures as the Secretary of Homeland Security, in consultation with the Secretary of State, may establish.

Sec. 4. *Scope of Suspension and Limitation on Entry.* Section 1 of this proclamation shall not apply to:

(a) Any lawful permanent resident of the United States;

(b) Any individual who has been granted asylum by the United States, any refugee who has already been admitted to the United States, or any individual granted withholding of removal or protection under the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, and nothing in this proclamation shall be construed to affect any individual's eligibility for asylum, refugee status, withholding of removal, or protection under the Convention Against Torture, consistent with the laws and regulations of the United States;

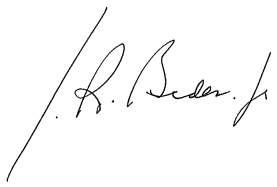
(c) Any person otherwise covered by section 1 of this proclamation, upon determination by the Secretary of State that the person has ceased actions that undermine democratic institutions and taken concrete steps to help restore democracy in Nicaragua; or

(d) Any person otherwise covered by section 1 of this proclamation, upon determination by the Secretary of State that the person's entry would not be contrary to the interests of the United States, including when the Secretary of State so determines, based on a recommendation of the Attorney General, that the person's entry would further important United States law enforcement objectives. In exercising this responsibility, the Secretary of State shall consult the Secretary of Homeland Security on matters related to admissibility or inadmissibility within the authority of the Secretary of Homeland Security.

Sec. 5. *Termination.* This proclamation shall remain in effect until terminated by the President. The Secretary of State shall, as circumstances warrant, recommend whether the President should continue, modify, or terminate this proclamation.

Sec. 6. *General Provisions.* (a) Nothing in this proclamation shall be construed to impair or otherwise affect:

(i) United States Government obligations under applicable international agreements;



(ii) the authority granted by law to an executive department or agency, or the head thereof; or

(iii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This proclamation shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This proclamation is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of November, in the year of our Lord two thousand twenty-one, and of the Independence of the United States of America the two hundred and forty-sixth.

Rules and Regulations

Federal Register
Vol. 86, No. 221
Friday, November 19, 2021

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–1029; Project Identifier MCAI–2020–01126–T; Amendment 39–21777; AD 2021–22–04]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2019–21–10, which applied to all Airbus SAS Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes. AD 2019–21–10 required a one-time eddy current conductivity measurement of certain structural parts of the outer flaps to determine if the incorrect alloy was used, and replacement if necessary. This AD continues to require a one-time eddy current conductivity measurement of certain structural parts of the outer flaps to determine if the incorrect alloy was used, and replacement if necessary; and also requires a new one-time eddy current conductivity measurement of certain other structural parts of the outer flaps to determine if the parts were properly heat treated, and replacement if necessary; and includes additional affected airplanes; as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. This AD was prompted by a quality control review, which determined that the wrong aluminum alloy was used to manufacture several structural parts and by the issuance of an updated list of suspected parts, including those that may have been improperly heat treated. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2021.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* internet: *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this IBR material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1029.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1029; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3223; email: *sanjay.ralhan@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020–0174, dated August 5, 2020 (EASA AD 2020–0174) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for all Airbus SAS Model A318–111, –112, –121, and –122 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–211, –212, –214, –215, –216, –231, –232, and –233 airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes. Model A320–215 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this AD therefore does not include those airplanes in the applicability.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2019–21–10, Amendment 39–19776 (84 FR 63794, November 19, 2019) (AD 2019–21–10). AD 2019–21–10 applied to all Airbus SAS Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes. The NPRM published in the **Federal Register** on November 20, 2020 (85 FR 74299). The NPRM was prompted by a quality control review, which determined that the wrong aluminum alloy was used to manufacture several structural parts and by the issuance of an updated list of suspected parts, including those that may have been improperly heat treated. The NPRM proposed to continue to require a one-time eddy current conductivity measurement of certain structural parts of the outer flaps to determine if the incorrect alloy was used, and replacement if necessary, as specified in EASA AD 2019–0012, dated January 24, 2019 (which corresponds to FAA AD 2019–21–10). The NPRM also proposed to require a new one-time eddy current conductivity measurement of certain other structural parts of the outer flaps to determine if the parts were properly heat treated, and replacement if necessary, and to include additional affected airplanes, as specified in EASA AD 2020–0174.

The FAA is issuing this AD to address structural parts that may not meet the certified life limit, which could result in failure of the flap trailing edge and reduced controllability of the airplane. See the MCAI for additional background information.

Comments

The FAA gave the public the opportunity to participate in developing this final rule. The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Include All Required Airplanes in the SUMMARY of the NPRM

Bradley Schrock requested the FAA include the additional required Airbus Model airplanes in the **SUMMARY** section of the NPRM. The commenter pointed out that the additional models could easily be overlooked if the reader were to only read the **SUMMARY** of the NPRM.

The FAA does not agree to revise the **SUMMARY** of this final rule. Operators are required to follow the applicability of the AD, which is specified in paragraph (c) of this AD. While the **SUMMARY** of this final rule doesn't specify all airplanes affected by this AD, it does specify that the FAA is adding airplanes to the applicability. Additionally, in the Background section of this final rule, the FAA has included all airplane models that are affected by this AD. Further, the **SUMMARY** section is a preamble requirement for all documents published in the **Federal Register** and must follow drafting requirements prescribed by the Office of the Federal Register (OFR). The **SUMMARY** section briefly provides context for the document within the **Federal Register**/CFR publication system; it does not summarize the content of the document. Adding the requested airplane models does not follow the OFR's requirements for the **SUMMARY** section. The FAA has not changed this final rule in this regard.

Request To Revise Compliance Statement in Paragraph (f) of the Proposed AD for Model A321 Airplanes

Delta Air Lines (DAL) requested that the FAA revise the compliance statement in paragraph (f) of the proposed AD for Model A321 airplanes. DAL suggested that paragraph (f) of the NPRM be revised to read: ''Comply with this AD within the compliance times specified, unless already done. For A321 operators, the earliest date that compliance may have occurred is 29MAY2020 (the issuance date of [EASA] PAD 19–100R1).'' DAL pointed out that the suspected parts are line replaceable units (LRUs) with off-wing Instructions for Continued Airworthiness, and that these parts comprise a pool of rotable parts. DAL then specified that no revision of the service information referenced in EASA AD 2020–0174 has included the serial numbers of outer flap tabs. DAL stated that EASA AD 2020–0174 allows the use of any revision of the service information for the determination of these suspected parts. Further, DAL argued that, for Model A321 operators, the use of any service information revision for determination of suspected part applicability is inadequate for the identification of suspected outer flap tabs. DAL asserted that before May 29, 2020, comparison with the outer flap serial number lists within the service information referenced in EASA AD 2020–0174 could allow inadvertent exclusion of an outer flap tab that is included in the quality escape population.

The FAA does not agree to revise the compliance statement in paragraph (f) of this AD. As stated previously, EASA AD 2020–0174 takes precedence over the service information referenced therein and this AD requires using EASA AD 2020–0174 for determining suspected parts. EASA AD 2020–0174 specifies using the service information only for accomplishing the required inspections and not for identifying the suspected parts. The FAA has determined EASA AD 2020–0174 addresses the unsafe condition on the universe of suspected parts. Further, the FAA has determined that the information provided by EASA and the manufacturer is adequate information for accomplishing the required actions. The FAA has not changed this AD regarding this issue.

Request To Add Exception To Clarify the Definition of Suspected Improperly Heat Treated (IHT) Parts

DAL requested that the FAA revise the NPRM to include an exception to EASA AD 2020–0174 to clarify the definition of suspected IHT parts for Model A321 airplanes. DAL specified that, for Model A321 airplanes, the suspected IHT parts are constituent parts of the outer flap tabs, not the outer flaps as defined in EASA AD 2020–0174. DAL mentioned that if not clarified, the definition could introduce confusion for operators of Model A321 airplanes.

The FAA does not agree to include an exception to EASA AD 2020–0174. Appendix 2 of EASA AD 2020–0174 refers to the airplane manufacturer serial numbers, flap serial numbers, and the flap tab part numbers, based on the airplane configuration at the time of delivery to the first operator. Therefore, the FAA has determined that, even though the definition specified in EASA AD 2020–0174 does not explicitly state that, for Model A321 airplanes the suspected IHT parts are constituent to the outer flap tabs, the information necessary to make that determination is already included in Appendix 2 of EASA AD 2020–0174, which the definition references. The FAA has not changed this AD regarding this issue.

Request To Include Additional Service Information for Determining Affected Parts

DAL requested that the FAA revise the NPRM to include Airbus In-Service Information (ISI) Document 57.50.00022, which DAL stated includes outer flap and outer flap tab part number definitions for the serial numbers defined in Appendix 1 and Appendix 2 of EASA AD 2020–0174. DAL pointed out that Appendix 1 and Appendix 2 of EASA AD 2020–0174 do not contain any outer flap or outer flap tab (Model A321) part numbers, instead specifying the suspected part population by LRU serial number. DAL also mentioned that Airbus does not consider the Model A321 flap tab serial numbers to be Aircraft Inspection Report (AIR) recordable within each airplane's delivery records. DAL implied that most operators would have difficulty tracing outer flap tab serial numbers to specific airplane manufacturer serial numbers. DAL also stated that there has been enough operator demand for clarification from the manufacturer that Airbus released ISI 57.50.00022. DAL noted that ISI 57.50.00022 is not referenced in the service information specified by EASA AD 2020–0174.

The FAA disagrees with the request. This AD is based on EASA AD 2020–0174, which is based on the configuration of the airplane at the time of delivery (as indicated in Notes 2 and 3 of EASA AD 2020–0174). It is not possible for the FAA to know all of the operator-specific part numbers and serial numbers installed on all of the airplanes affected by this AD or EASA AD 2020–0174. Therefore, it is the operator's responsibility to track these parts, so that they can identify discrepant parts as defined in the EASA AD and apply appropriate corrective actions. If an operator's fleet configuration, including part tracking system, does not allow compliance with the requirements of this AD, then that operator must present a customized plan for AD compliance for the applicable airplane with a request for an alternative method of compliance (AMOC) under the provisions of paragraph (i)(1) of this AD. It is impractical for the FAA to customize an AD in a way that meets operator's specific requirements for compliance. The FAA has not changed this AD regarding this issue.

Request To Include an Exception to the Method of Compliance

DAL requested that the FAA add an exception to include a statement that,

for demonstration of compliance with Paragraph (5) of EASA AD 2020–0174, the part serial number does not need to be positively identified, provided that it can be determined that the part is serviceable using the definition provided in EASA AD 2020–0174. DAL mentioned that the service information specified in EASA AD 2020–0174 does not contain part numbers for suspected parts, and instead the only part numbers within the service information appendices are the part numbers of potentially discrepant structural parts, which on Model A321 airplanes are not serialized. DAL pointed out that verbatim application of the service information might cause improper evaluation of parts for applicability of the suspected part definition. DAL continued to point out that the service information conflicts with EASA AD 2020–0174, and that EASA AD 2020–0174 bounds the suspected outer flap tab population by outer flap tab serial number in Appendix 2 of EASA AD 2020–0174. DAL then pointed out that verbatim application of the service information on Model A321 airplanes could introduce the possibility that the inspection of an outer flap tab with potentially discrepant internal structure is not completed.

The FAA does not agree to include the requested exception. This AD requires EASA AD 2020–0174, which is based on the configuration of an airplane at the time of delivery. As specified in EASA AD 2020–0174, if a serial number cannot be identified, then that part is defined as a suspected part. EASA AD 2020–0174 takes precedence over any instructions specified in the service information it references. Therefore, operators can comply with the requirements of this AD. However, once this AD is published, any person may present sufficient data and rationale and request approval of an AMOC under the provisions of paragraph (i)(1) of this AD. The FAA has not changed this AD regarding this issue.

Conclusion

The FAA reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this final rule as proposed, except for minor editorial changes. The FAA has determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for addressing the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

EASA AD 2020–0174 describes procedures for a one-time eddy current conductivity measurement of certain structural parts of the outer flaps to determine if the incorrect alloy was used, and replacement if necessary; and a one-time eddy current conductivity measurement of certain other structural parts of the outer flaps to determine if the parts were properly heat treated, and replacement if necessary. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 63 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS *

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2019-21-10	6 work-hours × $85 per hour = $510	$0	$510	$32,130
New actions	5 work-hours × $85 per hour = $425	0	425	26,775

* Table does not include estimated costs for reporting.

The FAA estimates that it takes about 1 work-hour per product to comply with the reporting requirement in this AD. The average labor rate is $85 per hour. Based on these figures, the FAA estimates the cost of reporting the inspection results on U.S. operators to be $5,355, or $85 per product.

The FAA has received no definitive data on which to base the cost estimates for the on-condition replacement specified in this AD.

According to the manufacturer, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators. The FAA does not control warranty coverage for affected operators. As a result, the FAA has included all known costs in the cost estimate.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the

distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2019–21–10, Amendment 39–19776 (84 FR 63794, November 19, 2019); and

■ b. Adding the following new AD:

2021–22–04 Airbus SAS: Amendment 39–21777; Docket No. FAA–2020–1029; Project Identifier MCAI–2020–01126–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 27, 2021.

(b) Affected ADs

This AD replaces AD 2019–21–10, Amendment 39–19776 (84 FR 63794, November 19, 2019) (AD 2019–21–10).

(c) Applicability

This AD applies to all Airbus SAS airplanes identified in paragraphs (c)(1) through (4) of this AD, certificated in any category.

(1) Model A318–111, –112, –121, and –122 airplanes.

(2) Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes.

(4) Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by a quality control review, which determined that the wrong aluminum alloy was used to manufacture several structural parts and by the issuance of an updated list of suspected parts, including those that may have been improperly heat treated. The FAA is issuing this AD to address structural parts that may not meet the certified life limit, which could result in failure of the flap trailing edge and reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0174, dated August 5, 2020 (EASA AD 2020–0174).

(h) Exceptions to EASA AD 2020–0174

(1) Where EASA AD 2020–0174 refers to its effective date, this AD requires using the effective date of this AD.

(2) The ''Remarks'' section of EASA AD 2020–0174 does not apply to this AD.

(3) Where paragraphs (7) and (8) of EASA AD 2020–0174 mandate a parts installation limitation, this AD requires the following parts installation limitation: From the effective date of this AD, only serviceable parts as defined in EASA AD 2020–0174 are allowed to be installed on any airplane.

(4) Where any service information referenced in EASA AD 2020–0174 specifies reporting, this AD requires reporting all inspection results at the applicable time specified in paragraph (h)(4)(i) or (ii) of this AD. If operators have reported findings as part of obtaining any corrective actions approved by Airbus SAS's EASA Design Organization Approval (DOA), operators are not required to report those findings as specified in this paragraph.

(i) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(ii) If the inspection was done before the effective date of this AD: Submit the report within 90 days after the effective date of this AD.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraphs (h)(4) and (i)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(4) *Paperwork Reduction Act Burden Statement:* A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory as required by this AD. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

(j) Related Information

For more information about this AD, contact Sanjay Ralhan, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3223; email: *sanjay.ralhan@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0174, dated August 5, 2020.

(ii) [Reserved]

(3) For EASA AD 2020–0174, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu*; internet: *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. [Docket No. FAA–2021–0508; Project Identifier MCAI–2021–00070–T; Amendment 39–21747; AD 2021–20–09]

RIN 2120–AA64

Airworthiness Directives; ATR–GIE Avions de Transport Régional Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2021–03–03, which applied to certain ATR–GIE Avions de Transport Régional Model ATR72 airplanes. AD 2021–03–03 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2021–03–03, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of March 31, 2021 (86 FR 11103, February 24, 2021).

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0508.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0508; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3220; email *shahram.daneshmandi@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0020, dated January 15, 2021 (EASA AD 2021–0020) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for all ATR–GIE Avions de Transport Régional Model ATR72 airplanes.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021–03–03, Amendment 39–21406 (86 FR 11103, February 24, 2021) (AD 2021–03–03). AD 2021–03–03 applied to certain ATR–GIE Avions de Transport Régional Model ATR72 airplanes. The NPRM published in the **Federal Register** on July 20, 2021 (86 FR 38239). The NPRM was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The NPRM proposed to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in EASA AD 2021–0020.

The FAA is issuing this AD to address fatigue cracking and damage in principal structural elements, which could result in reduced structural integrity of the airplane. See the MCAI for additional background information.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from the Air Line Pilots Association, International (ALPA), who supported the NPRM without change.

Conclusion

The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting this AD as proposed. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products.

Related Service Information Under 1 CFR Part 51

EASA AD 2021–0020 describes new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This AD also requires EASA AD 2020–0173, dated August 5, 2020, which the Director of the Federal Register approved for incorporation by reference as of March 31, 2021 (86 FR 11103, February 24, 2021). This material is reasonably available because the interested parties have access to it through their normal course of business

or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 23 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

The FAA estimates the total cost per operator for the retained actions from AD 2021–03–03 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2021–03–03, Amendment 39–21406 (86 FR 11103, February 24, 2021); and

■ b. Adding the following new AD:

2021–20–09 ATR–GIE Avions de Transport Régional: Amendment 39–21747; Docket No. FAA–2021–0508; Project Identifier MCAI–2021–00070–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 27, 2021.

(b) Affected ADs

This AD replaces AD 2021–03–03, Amendment 39–21406 (86 FR 11103, February 24, 2021) (AD 2021–03–03).

(c) Applicability

This AD applies to ATR–GIE Avions de Transport Régional Model ATR72–101, –102, –201, –202, –211, –212, and –212A airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before October 9, 2020.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address fatigue cracking and damage in principal structural elements, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Maintenance or Inspection Program Revision, With No Changes

This paragraph restates the requirements of paragraph (k) of AD 2021–03–03, with no changes. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before December 12, 2019, except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0173, dated August 5, 2020 (EASA AD 2020–0173). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2020–0173, With Revised Exceptions

This paragraph restates the requirements of paragraph (l) of AD 2021–03–03, with revised exceptions.

(1) Where EASA AD 2020–0173 refers to its effective date, this AD requires using March 31, 2021 (the effective date of AD 2021–03–03).

(2) The requirements specified in paragraphs (1) and (3) of EASA AD 2020–0173 do not apply to this AD.

(3) Paragraph (4) of EASA AD 2020–0173 specifies revising ''the approved AMP [aircraft maintenance program]'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, to incorporate the ''limitations, tasks and associated thresholds and intervals'' specified in paragraph (4) of EASA AD 2020–0173 within 90 days after March 31, 2021 (the effective date of AD 2021–03–03).

(4) Except as provided by paragraph (2) of EASA AD 2020–0173, the initial compliance time for doing the tasks specified in paragraph (4) of EASA AD 2020–0173 is at the applicable ''associated thresholds'' specified in paragraph (4) of EASA AD 2020–0173, or within 90 days after March 31, 2021 (the effective date of AD 2021–03–03), whichever occurs later.

(5) The provisions specified in paragraphs (5) and (6) of EASA AD 2020–0173 do not apply to this AD.

(6) The ''Remarks'' section of EASA AD 2020–0173 does not apply to this AD.

(i) Retained Restrictions on Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (m) of AD 2021–03–03, with a new exception. Except as required by paragraph (j) of this AD, after the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals, are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2020–0173.

(j) New Maintenance Program Revision

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2021–0020,

dated January 15, 2021 (EASA AD 2021–0020). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2021–0020

(1) Where EASA AD 2021–0020 refers to its effective date, this AD requires using the effective date of this AD.

(2) The requirements specified in paragraphs (1) and (2) of EASA AD 2021–0020 do not apply to this AD.

(3) Paragraph (3) of EASA AD 2021–0020 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(4) Except as provided by Note 1 of EASA AD 2021–0020, the initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2021–0020 is at the applicable ''thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2021–0020, or within 90 days after the effective date of this AD, whichever occurs later.

(5) The provisions specified in paragraphs (4) and (5) of EASA AD 2021–0020 do not apply to this AD.

(6) The ''Remarks'' section of EASA AD 2021–0020 does not apply to this AD.

(l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2021–0020.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (n) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or ATR–GIE Avions de Transport Régional's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Related Information

For more information about this AD, contact Shahram Daneshmandi, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3220; email *shahram.daneshmandi@faa.gov.*

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on December 27, 2021.

(i) European Union Aviation Safety Agency (EASA) AD 2021–0020, dated January 15, 2021.

(ii) [Reserved]

(4) The following service information was approved for IBR on March 31, 2021 (86 FR 11103, February 24, 2021).

(i) European Union Aviation Safety Agency (EASA) AD 2020–0173, dated August 5, 2020.

(ii) [Reserved]

(5) For EASA AD 2021–0020 and AD 2020–0173, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on November 14, 2021.

Ross Landes,

Deputy Director for Regulatory Operations, Compliance & Airworthiness Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0880; Project Identifier MCAI–2021–00685–T; Amendment 39–21779; AD 2021–22–06]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 747–400F series airplanes. This AD was prompted by the determination that more restrictive tasks and limitations are necessary. This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate more restrictive tasks and limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective December 6, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 6, 2021.

The FAA must receive comments on this AD by January 3, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Airworthiness Products Section,

Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *https://www.regulations.gov* under Docket No. FAA–2021–0880.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* under Docket No. FAA–2021–0880; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Antariksh Shetty, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2021–0880; Project Identifier MCAI–2021–00685–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Antariksh Shetty, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531; email *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0138, dated June 9, 2021 (EASA AD 2021–0138) (also referred to as the MCAI), to correct an unsafe condition for certain The Boeing Company Model 747–400F series airplanes.

This AD was prompted by the determination that more restrictive tasks and limitations are necessary.

EASA approved supplemental type certificate (STC) 10068342, dated January 16, 2019, which installs a dual non-activated global navigation satellite system (GNSS) unit and antenna on The Boeing Company Model 747–400F series airplanes. EASA STC 10068342 was validated by the FAA as STC ST04393NY, dated September 3, 2019. After EASA approved the original STC, Fokker Services published an updated Instructions for Continued Airworthiness (ICA) supplement that introduced more restrictive tasks. The STC was later amended and approved by EASA as STC 10068342, Revision 1, dated March 8, 2021, and validated by the FAA as STC ST04393NY, Revision 1, dated May 3, 2021. The amended STC incorporates the updated ICA supplement. As a result, operation of an affected airplane with the original STC but without the ICA supplement could result in cracks around the antenna/unit installation.

The FAA is issuing this AD to address cracks around the antenna/unit installation, which, if unchecked, could lead to rapid decompression of the airplane. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

EASA AD 2021–0138 describes more restrictive tasks and limitations associated with the GNSS unit and antenna. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI described above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type designs.

Requirements of This AD

This AD requires accomplishing the actions specified in EASA AD 2021–0138 described previously, except for any differences identified as exceptions in the regulatory text of this AD, and except as discussed under ''Differences Between this AD and the MCAI.''

This AD requires revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (j)(1) of this AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA AD 2021–0138 is incorporated by reference in this AD. This AD requires compliance with EASA AD 2021–0138 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using common terms that are the same as the

heading of a particular section in EASA AD 2021–0138 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2021–0138. Service information required by EASA AD 2021–0138 for compliance will be available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0880 after this AD is published.

Difference Between This AD and the MCAI

Whereas EASA AD 2021–0138 applies to airplanes with EASA STC 10068342 embodied, this AD applies to airplanes with U.S. STC ST04393NY embodied. As stated previously, EASA STC 10068342 has been validated by the FAA as STC ST04393NY.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) and intervals may be used unless the actions and intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in the AMOCs paragraph under ''Additional AD Provisions.'' This new format includes a ''Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

FAA's Justification and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

There are currently no domestic operators of these products. Accordingly, notice and opportunity for prior public comment are unnecessary, pursuant to 5 U.S.C. 553(b)(3)(B). In addition, for the foregoing reason, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

Currently, there are no affected U.S.-registered airplanes. For any affected airplane that may be imported and placed on the U.S. Register in the future, the FAA provides the following cost estimates to comply with this AD.

The FAA has determined that revising the maintenance or inspection program takes an average of 90 work-hours per operator, although the FAA recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleets, the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the FAA estimates the total cost per operator to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–22–06 The Boeing Company: Amendment 39–21779; Docket No. FAA–2021–0880; Project Identifier MCAI–2021–00685–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 6, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 747–400F series airplanes, certificated in any category, equipped with a dual non-activated global navigation satellite system (GNSS) unit and antenna installed in accordance with supplemental type certificate (STC) ST04393NY, dated September 3, 2019.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by the determination that more restrictive tasks and limitations are necessary. The FAA is issuing this AD to address cracks around the antenna/unit installation, which, if unchecked, could lead to rapid decompression of the aircraft.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2021–0138, dated June 9, 2021.

(h) Exceptions to EASA AD 2021–0138

(1) Where EASA AD 2021–0138 refers to its effective date, this AD requires using the effective date of this AD.

(2) The requirements specified in paragraphs (1) and (2) of EASA AD 2021–0138 do not apply to this AD.

(3) Paragraph (3) of EASA AD 2021–0138 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(4) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2021–0138 is at the applicable ''thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2021–0138, or within 90 days after the effective date of this AD, whichever occurs later.

(5) The provisions specified in paragraph (4) of EASA AD 2021–0138 do not apply to this AD.

(6) The ''Remarks'' section of EASA AD 2021–0138 does not apply to this AD.

(i) Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2021–0138.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or EASA; or Fokker Service's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

For more information about this AD, contact Antariksh Shetty, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531; email *9-avs-nyaco-cos@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2021–0138, dated June 9, 2021.

(ii) [Reserved]

(3) For EASA AD 2021–0138, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on October 13, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0781; Project Identifier AD–2021–00775–E; Amendment 39–21831; AD 2021–24–10]

RIN 2120–AA64

Airworthiness Directives; Austro Engine GmbH Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2021–09–04 for all Austro Engine GmbH E4 and E4P model diesel piston engines. AD 2021–09–04 required replacing a certain oil pump as well as the oil filter and engine oil. This AD was prompted by reports of an oil pump blockage on E4 model diesel piston engines. This AD requires replacing a certain oil pump as well as the oil filter and engine oil. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of May 10, 2021 (86 FR 21637, April 23, 2021).

ADDRESSES: For service information identified in this final rule, contact Austro Engine GmbH, Rudolf-Diesel-Strasse 11, 2700 Weiner Neustadt, Austria; phone: +43 2622 23000; website: *www.austroengine.at.* You may view this service information at the Airworthiness Products Section, Operational Safety Branch, FAA, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0781.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0781; or in person at Docket Operations between 9 a.m. and 5 p.m.,

Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Wego Wang, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7134; fax: (781) 238–7199; email: *wego.wang@faa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021–09–04, Amendment 39–21517 (86 FR 21637, April 23, 2021), (AD 2021–09–04). AD 2021–09–04 applied to all Austro Engine GmbH E4 and E4P model diesel piston engines. The NPRM published in the **Federal Register** on September 14, 2021 (86 FR 51026). The NPRM was prompted by reports of an oil pump blockage on E4 model diesel piston engines caused by oil contamination with casting sand from the production process of oil pump part number (P/N) E4A–50–000–BHY. The root cause was found to be an improperly performed sand casted oil pump housing cleaning process. In the NPRM, the FAA proposed to continue to require replacement of an affected oil pump, identified by P/N and serial number (S/N) in Austro Engine GmbH Mandatory Service Bulletin No. MSB–E4–030/4, Revision No. 4, dated March 30, 2021. In the NPRM, the FAA also proposed to require replacement of the oil filter and engine oil.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

The FAA reviewed the relevant data and determined that air safety requires adoption of the AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Austro Engine GmbH Mandatory Service Bulletin No. MSB–E4–030/4, Revision No. 4, dated March 30, 2021 (the MSB). This service information specifies procedures for replacing the affected oil pumps installed on E4 and E4P model diesel piston engines. This service information also specifies procedures for replacing the oil filter and engine oil installed on these engines. In addition, this service information identifies the applicable S/Ns of affected E4 and E4P model diesel piston engines, the affected oil pumps requiring replacement, and an additional oil pump replacement option. The Director of the Federal Register previously approved the MSB for incorporation by reference on May 10, 2021 (86 FR 21637, April 23, 2021). This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 55 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Remove and replace the oil pump, oil filter, and engine oil.	16 work-hours × $85 per hour = $1,360	$1,488	$2,848	$156,640

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2021–09–04, Amendment 39–21517 (86 FR 21637, April 23, 2021); and
■ b. Adding the following new airworthiness directive:

2021–24–10 Austro Engine GmbH: Amendment 39–21831; Docket No. FAA–2021–0781; Project Identifier AD–2021–00775–E.

(a) Effective Date

This airworthiness directive (AD) is effective December 27, 2021.

(b) Affected ADs

This AD replaces AD 2021–09–04, Amendment 39–21517 (86 FR 21637, April 23, 2021).

(c) Applicability

This AD applies to all Austro Engine GmbH E4 and E4P model diesel piston engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 8550, Reciprocating Engine Oil System.

(e) Unsafe Condition

This AD was prompted by reports of an oil pump blockage on the E4 model diesel piston engines. The FAA is issuing this AD to prevent failure of the engine lubrication system. The unsafe condition, if not addressed, could result in failure of the engine, in-flight shutdown, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

For Austro Engine GmbH E4 and E4P model diesel piston engines having an oil pump, part number (P/N) E4A–50–000–BHY, with a serial number (S/N) listed in paragraph 1.2., Engines Affected, of Austro Engine GmbH Mandatory Service Bulletin No. MSB–E4–030/4, Revision No. 4, dated March 30, 2021 (the MSB), within the compliance time specified in Table 1 to paragraph (g) of this AD or before further flight, whichever occurs later:

(1) Remove the oil pump, P/N E4A–50–000–BHY, from service and replace with a part eligible for installation using the Accomplishment/Instructions, paragraph 2.2.1 or paragraph 2.2.2, of the MSB, as applicable.

(2) Replace the oil filter and engine oil using the Accomplishment/Instructions, paragraph 2.2.1 or paragraph 2.2.2, of the MSB, as applicable.

BILLING CODE 4910–13–P

Table 1 to Paragraph (g) – Replacement of the Oil Pump, Oil Filter, and Engine Oil

Engine Group	Engine Flight Hours (FHs) Since New as of May 10, 2021 (the effective date of AD 2021-09-04)	Compliance Time (after May 10, 2021, the effective date of AD 2021-09-04)
Group 1 engines and Group 2 engines	10 FHs or less	Within 30 days or before accumulating 10 FHs, or during the next scheduled maintenance, whichever occurs first
Group 1 engines	More than 10 FHs, but less than 50 FHs	Within 3 months or before accumulating 70 FHs since new, or during the next scheduled maintenance, whichever occurs first
Group 1 engines	50 FHs or more	Within 3 months or 20 FHs, or during the next scheduled maintenance, whichever occurs first
Group 2 engines	More than 10 FHs	Within 3 months or 100 FHs, or during the next scheduled maintenance, whichever occurs first

BILLING CODE 4910–13–C

(h) No Reporting Requirements

The reporting requirements in the Accomplishment/Instructions, paragraph 2.2., of the MSB, are not required by this AD.

(i) Installation Prohibition

After the effective date of this AD, do not install onto any engine an oil pump, P/N

E4A–50–000–BHY, with an S/N listed in paragraph 1.2., Engines Affected, of the MSB.

(j) Definitions

For the purpose of this AD:

(1) Group 1 engines are E4 model diesel piston engines in configuration ''-A'' that are installed on single-engine airplanes.

(2) Group 2 engines are E4 model diesel piston engines in configuration ''-B'' or ''-C'' and E4P model diesel piston engines that are installed on twin-engine airplanes.

(3) A ''part eligible for installation'' is an oil pump with a P/N and S/N that is not listed in paragraph 1.2., Engines Affected, of the MSB.

(k) Credit for Previous Actions

You may take credit for replacing the oil pump, oil filter, and engine oil required by paragraph (g) of this AD if you performed these replacements before the effective date of this AD using the Accomplishment/Instructions, paragraph 2.2., of Austro Engine GmbH MSB No. MSB–E4–030, Original Issue, dated February 18, 2021; Revision No. 1, dated February 23, 2021; Revision No. 2, dated March 3, 2021; or Revision No. 3, dated March 18, 2021.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *ANE-AD-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(m) Related Information

For more information about this AD, contact Wego Wang, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7134; fax: (781) 238–7199; email: *wego.wang@faa.gov.*

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following service information was approved for IBR on May 10, 2021 (86 FR 21637, April 23, 2021).

(i) Austro Engine GmbH Mandatory Service Bulletin No. MSB–E4–030/4, Revision No. 4, dated March 30, 2021.

(ii) [Reserved]

(4) For service information identified in this AD, contact Austro Engine GmbH, Rudolf-Diesel-Strasse 11, 2700 Weiner Neustadt, Austria; phone: +43 2622 23000; website: *www.austroengine.at.*

(5) You may view this service information at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(6) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: *fr.inspection@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on November 15, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0695; Project Identifier MCAI–2021–00096–R; Amendment 39–21783; AD 2021–22–10]

RIN 2120–AA64

Airworthiness Directives; Leonardo S.p.a. Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Leonardo S.p.a. Model A109E helicopters. This AD was prompted by reports that certain tail rotor gearbox assemblies were installed on Model A109E helicopters and those parts are not approved for installation on that helicopter model. Because those assemblies are not part of the type design for Model A109E helicopters, there are no overhaul or life limits included in the applicable maintenance manuals. This AD requires replacement of each affected tail rotor gearbox assembly with a serviceable part, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2021.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N 321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0695.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0695; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the EASA AD, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Andrea Jimenez, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 1600 Stewart Ave., Suite 410, Westbury, NY 11590; telephone (516) 228–7330; email *andrea.jimenez@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0031, dated January 22, 2021 (EASA AD 2021–0031) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for Leonardo S.p.A., formerly Finmeccanica S.p.A., AgustaWestland S.p.A., and Agusta S.p.A., Model A109E helicopters, all serial numbers up to 11160 inclusive.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Leonardo S.p.a. Model A109E helicopters. The NPRM published in the **Federal Register** on August 25, 2021 (86 FR 47427). The NPRM was prompted by reports that certain tail rotor gearbox assemblies were installed on Model A109E helicopters and those parts are not approved for installation on that

helicopter model. During revisions to the Model A109E technical publications it was noted that the 90-degree tail rotor gearbox assembly, part number (P/N) 109–0440–01–115, is included in the illustrated parts catalog (IPC) for helicopters with serial numbers (S/N) up to and including S/N 11160. The IPC incorrectly identifies this part number as a replacement part for P/N 109–0440–01–119 or P/N 109–0440–01–121. The NPRM proposed to require replacement of each affected tail rotor gearbox assembly with a serviceable part, as specified in EASA AD 2021–0031.

The FAA is issuing this AD to address installation of tail rotor gearbox assembly P/N 109–0440–01–115 that is not approved for installation on Model A109E helicopters. Because P/N 109–0440–01–115 is not part of the type design for Model A109E helicopters, there are no overhaul or life limits included in the applicable maintenance manuals. If a tail rotor gearbox is not properly maintained it could fail, resulting in reduced control of the helicopter. See EASA AD 2021–0031 for additional background information.

Discussion of Final Airworthiness Directive

Comments

The FAA gave the public the opportunity to participate in developing this final rule. The FAA received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products.

Related Service Information Under 1 CFR Part 51

EASA AD 2021–0031 requires replacement of a tail rotor gearbox assembly P/N 109–0440–01–115 with a serviceable part. EASA AD 2021–0031 also prohibits installation of tail rotor gearbox assembly P/N 109–0440–01–115 on any Leonardo S.p.A. Model A109E helicopter.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 70 helicopters of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement	12 work-hours × $85 per hour = $1,020	$82,500	$83,520	$5,846,400

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some of the costs may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–22–10 Leonardo S.p.a.: Amendment 39–21783; Docket No. FAA–2021–0695; Project Identifier MCAI–2021–00096–R.

(a) Effective Date

This airworthiness directive (AD) is effective December 27, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Leonardo S.p.a. Model A109E helicopters, certificated in any category, with an affected part as identified in European Union Aviation Safety Agency (EASA) AD 2021–0031, dated January 22, 2021 (EASA AD 2021–0031) installed.

(d) Subject

Joint Aircraft Service Component (JASC) Code: 6520, Tail Rotor Gearbox.

(e) Unsafe Condition

This AD was prompted by reports that certain tail rotor gearbox assemblies were installed on Model A109E helicopters and those parts are not approved for installation on that helicopter model. Because tail rotor gearbox assembly part number (P/N) 109–0440–01–115 is not part of the type design for Model A109E helicopters, there are no overhaul or life limits included in the applicable maintenance manuals. The FAA is issuing this AD to address installation of tail

rotor gearbox assembly P/N 109–0440–01–115 on Model A109E helicopters that do not have overhaul or life limits for that part. If a tail rotor gearbox is not properly maintained it could fail, resulting in reduced control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2021–0031.

(h) Exceptions to EASA AD 2021–0031

(1) Where EASA AD 2021–0031 requires compliance in terms of flight hours, this AD requires using hours time-in-service.

(2) Where EASA AD 2021–0031 refers to its effective date, this AD requires using the effective date of this AD.

(3) This AD does not mandate compliance with the ''Remarks'' section of EASA AD 2021–0031.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2021–0031 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

For more information about this AD, contact Andrea Jimenez, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 1600 Stewart Ave., Suite 410, Westbury, NY 11590; telephone (516) 228–7330; email *andrea.jimenez@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2021–0031, dated January 22, 2021.

(ii) [Reserved]

(3) For EASA AD 2021–0031, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* Internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110. This material may be found in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0695.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on October 14, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2021–0687; Project Identifier 2019–SW–029–AD; Amendment 39–21782; AD 2021–22–09]

RIN 2120–AA64

Airworthiness Directives; Leonardo S.p.a. Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Leonardo S.p.a. Model AW189 helicopters. This AD was prompted by a report that a number of fairleads that support the engine combustion chamber D1 drain hose showed evidence of heat damage. This AD requires modifying the helicopter by installing a certain engine combustion chamber D1 drain assembly, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2021.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110. It is also available in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0687.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0687; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Jacob Fitch, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–4130; email *jacob.fitch@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2019–0039, dated February 20, 2019 (EASA AD 2019–0039) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for certain Leonardo S.p.A. Model AW189 helicopters.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Leonardo S.p.a. Model AW189 helicopters. The NPRM published in the **Federal Register** on August 23, 2021 (86 FR 47033). The

NPRM was prompted by a report that a number of fairleads that support the engine combustion chamber D1 drain hose showed evidence of heat damage. The NPRM proposed to require modifying the helicopter by installing a certain engine combustion chamber D1 drain assembly, as specified in an EASA AD.

The FAA is issuing this AD to address heat damage of the engine combustion chamber D1 drain hose, which in a case where the right-hand engine is operated in the one engine inoperative (OEI) rating, the D1 drain pipe could transfer so much heat to the nearby fuel system vent pipe that its internal surface temperature could exceed the auto-ignition temperature for fuel. The unsafe condition, if not addressed, could result in undetected fire ignition in the fuel tank bay with consequent loss of the helicopter. See the MCAI for additional background information.

Comments

The FAA gave the public the opportunity to participate in developing this final rule. The FAA received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

The FAA reviewed the relevant data and determined that air safety and the public interest require adopting this final rule as proposed, except for minor editorial changes. The FAA has determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for addressing the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

EASA AD 2019–0039 requires modifying the helicopter by installing the engine combustion chamber D1 drain assembly, part number 8G7170P00111.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 4 helicopters of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Modification	4 work-hours × $85 per hour = $340	$2,557	$2,897	$11,588

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–22–09 Leonardo S.p.a.: Amendment 39–21782; Docket No. FAA–2021–0687; Project Identifier 2019–SW–029–AD.

(a) Effective Date

This airworthiness directive (AD) is effective December 27, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Leonardo S.p.a. Model AW189 helicopters, certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2019–0039, dated February 20, 2019 (EASA AD 2019–0039).

(d) Subject

Joint Aircraft Service Component (JASC) Code: 7170, Engine Drains.

(e) Unsafe Condition

This AD was prompted by a report that a number of fairleads that support the engine combustion chamber D1 drain hose showed evidence of heat damage. The FAA is issuing this AD to address such heat damage, which in a case where the right-hand engine is operated in the one engine inoperative (OEI) rating, the D1 drain pipe could transfer so much heat to the nearby fuel system vent pipe that its internal surface temperature could exceed the auto-ignition temperature for fuel. The unsafe condition, if not addressed, could result in undetected fire ignition in the fuel tank bay with consequent loss of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2019–0039.

(h) Exceptions to EASA AD 2019–0039

(1) Where EASA AD 2019–0039 requires compliance in terms of flight hours, this AD requires using hours time-in-service.

(2) Where EASA AD 2019–0039 refers to its effective date, this AD requires using the effective date of this AD.

(3) Where the service information required by EASA AD 2019–0039 specifies discarding parts, this AD requires removing those parts from service.

(4) This AD does not require the ''Remarks'' section of EASA AD 2019–0039.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2019–0039 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Special Flight Permit

Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the airplane to a location where the helicopter can be modified, provided the OEI rating is prohibited on the right-hand engine.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(l) Related Information

For more information about this AD, contact Jacob Fitch, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–4130; email *jacob.fitch@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2019–0039, dated February 20, 2019.

(ii) [Reserved]

(3) For EASA AD 2019–0039, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110. This material may be found in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0687.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on October 14, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Coast Guard

33 CFR Part 117

[Docket No. USCG–2021–0332]

RIN 1625–AA09

Drawbridge Operation Regulation; Indiana Harbor Canal, East Chicago, IN

AGENCY: Coast Guard, Department of Homeland Security (DHS).

ACTION: Final rule.

SUMMARY: The Coast Guard is altering the operating schedule that governs the Indianapolis Boulevard Bridge, mile 2.59, over the Indiana Harbor Canal at East Chicago, Indiana. Indiana Department of Transportation, the owner and operator of the bridge, has requested to stop continual drawtender service to the bridge due to a lack of openings.

DATES: This rule is effective December 20, 2021.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov.* Type USCG–2021–0332 in the ''SEARCH'' box and click ''SEARCH.'' In the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email: Mr. Lee D. Soule, Bridge Management Specialist, Ninth Coast Guard District; telephone 216–902–6085, email *Lee.D.Soule@uscg.mil.*

U.S.C. United States Code
USEPA United States Environmental Protection Agency

II. Background Information and Regulatory History

On July 28, 2021, the Coast Guard published a notice of proposed rulemaking (NPRM) entitled ''Drawbridge Operation Regulation; Indiana Harbor Canal, East Chicago, IN,'' in the **Federal Register** (86 FR 40388). There we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this regulatory change. During the comment period that ended on September 27, 2021, we did not receive any comments.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority 33 U.S.C. 499.

The Indianapolis Boulevard Bridge, mile 2.59, over the Indiana Harbor Canal is a double leaf bascule bridge that provides a horizontal clearance of 68-feet and a vertical clearance of 12-feet in the closed position with an unlimited vertical clearance in the open position based on low water datum (LWD). The Indianapolis Boulevard Bridge, mile 2.59, over the Indiana Harbor Canal is required to open on signal, and there are no previous rulemakings for this bridge to discuss. The Indiana Harbor Canal is a 3-mile long commercial waterway that serves several industries near the City of East Chicago, Indiana, including the largest integrated steelmaking facility in North America and the 1,400 acre Whiting Refinery that includes the site of the former 1889 Standard Oil of

Indiana refinery at the head of navigation. The Indianapolis Boulevard Bridge, mile 2.59, over the Indiana Harbor Canal is the last drawbridge before the head of navigation. Once the 1889 Standard Oil of Indiana refinery was torn down the bridge lost its purpose for regular openings, and the waterway silted in around the bridge preventing vessels from approaching. Approximately thirty years after the removal of the refinery, the U.S. Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (USACE) partnered to remove polluted sediments form the waterway and established a contaminated dredge spoils area above the bridge. The EPA and USACE contracted dredging company is working a few weeks each season and is the only commercial vessel requesting the bridge to open. There are no records of recreational vessels using the Indiana Harbor Canal.

IV. Discussion of Comments, Changes and the Final Rule

The Coast Guard provided a comment period of 60 days and no comments were received.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protesters.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the ability that vessels can still transit the bridge given advanced notice.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard did not receive any comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section V. A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series) which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges and is categorically excluded from further review, under paragraph L49, of Chapter 3, Table3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. In § 117.400, add paragraph (c) to read as follows:

§ 117.400 Indiana Harbor Canal.

* * * * *

(c) The Indianapolis Boulevard Bridge, mile 2.59, at East Chicago, shall open on signal if at least twelve hours' notice is given.

M.J. Johnston.

Rear Admiral, U.S. Coast Guard, Commander, Ninth Coast Guard District.

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This final rule will delay for 6 months the January 1, 2022 effective date for amendatory instruction 10.a., which addresses the reporting by manufacturers of multiple best prices connected to a value based purchasing (VBP) arrangement, of the final rule entitled, ''Medicaid Program; Establishing Minimum Standards in Medicaid State Drug Utilization Review (DUR) and Supporting Value-Based Purchasing (VBP) for Drugs Covered in Medicaid, Revising Medicaid Drug Rebate and Third Party Liability (TPL) Requirements'', published in the December 31, 2020 **Federal Register** to July 1, 2022. This final rule will also delay for 9 months the April 1, 2022 effective date of inclusion (hereinafter referred to as the inclusion date) of the U.S. territories (American Samoa, Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands) in the amended regulatory definitions of ''States'' and ''United States'' for purposes of the Medicaid Drug Rebate Program (MDRP), adopted in the interim final rule with comment period entitled, ''Medicaid Program; Covered Outpatient Drug; Further Delay of Inclusion of Territories in Definitions of States and United States'', published in the November 25, 2019 **Federal Register** to January 1, 2023. We requested public comment on the proposed delays of the applicable effective date and inclusion date and discuss the comments received in this final rule.

DATES: These regulations are effective on December 20, 2021.

FOR FURTHER INFORMATION CONTACT: Christine Hinds, (410) 786–4578.

SUPPLEMENTARY INFORMATION:

I. Background

A. Summary of Proposed Delays in Effective and Inclusion Dates of Certain Regulation Provisions

In the ''Medicaid Program; Establishing Minimum Standards in Medicaid State Drug Utilization Review (DUR) and Supporting Value-Based Purchasing (VBP) for Drugs Covered in Medicaid, Revising Medicaid Drug Rebate and Third Party Liability (TPL) Requirements: Delay of Effective Date for Provision Relating to Manufacturer Reporting of Multiple Best Prices Connected to a Value Based Purchasing Arrangement; Delay of Inclusion of Territories in Definition of States and United States'' proposed rule that published in the May 28, 2021 **Federal Register** (86 FR 28742) (hereinafter referred to as the proposed rule), CMS made two proposals. First, CMS proposed to delay the January 1, 2022 effective date for amendatory instruction 10.a. of the final rule entitled, ''Medicaid Program; Establishing Minimum Standards in Medicaid State Drug Utilization Review (DUR) and Supporting Value-Based Purchasing (VBP) for Drugs Covered in Medicaid, Revising Medicaid Drug Rebate and Third Party Liability (TPL) Requirements'' (85 FR 87000) (hereinafter referred to as the December 31, 2020 final rule), for 6 months to July 1, 2022. Second, CMS proposed to delay the April 1, 2022, inclusion date in the amended regulatory definitions of ''States'' and ''United States'', adopted in the interim final rule with comment period entitled ''Medicaid Program; Covered Outpatient Drugs; Further Delay of Inclusion of Territories in Definitions of States and United States'' (84 FR 64783), for 2 years until April 1, 2024, or in the alternative, to a date earlier than April 1, 2024, but not before January 1, 2023 based on public comments.

B. Proposed Delay of Effective Date of Amendatory Instruction 10.a.

The December 31, 2020 final rule advanced CMS' efforts to support state flexibility to enter into innovative value-based purchasing (VBP) arrangements with drug manufacturers for new and innovative, and often costly therapies, such as gene therapies, and codified new approaches required by section 1004 of the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (SUPPORT Act) (Pub. L. 115–271, enacted October 24, 2018) and the existing Medicaid DUR program to improve the clinical use of opioids and reduce the potential for abuse in Medicaid patients. In addition, it codified in regulation several changes made in recent legislation and clarified other provisions of regulations relating to the Medicaid Drug Rebate Program (MDRP).

The regulations included in the December 31, 2020 final rule went into effect on March 1, 2021, except for certain amendatory instructions, including instruction 10.a., which is effective on January 1, 2022. In the proposed rule, we proposed to delay the January 1, 2022 effective date for amendatory instruction 10.a. of the December 31, 2020 final rule on manufacturer reporting of multiple best prices connected to a VBP arrangement, to July 1, 2022, and sought public comment on the proposed delay. As discussed in the proposed rule, we believed a delay of 6 months is warranted to assure that stakeholders have the ability to implement the new VBP policy in a manner that assures patient access and quality of care are protected. We sought public comments on this proposed delay in the effective date, including the impact of this delay on affected beneficiaries. The primary reason for the original delay, and the proposed delay, was to provide more time for CMS, states, and manufacturers to make the complex system changes necessary to implement the new best price and VBP program, and assure patient access and quality of care, given the current need to devote resources to the public health emergency (PHE) relating to COVID–19 that has been in effect, and will likely remain in effect at least through 2021. On April 21, 2021, the Secretary of Health and Human Services (the Secretary) renewed the PHE initially declared on January 31,

2020, to continue giving CMS programs (including Medicaid) flexibility to support beneficiaries during the COVID–19 pandemic. This PHE was most recently renewed on October 15, 2021. In response to the PHE, CMS put in place its own pandemic plan (*https://www.cms.gov/files/document/covid-pandemic-plan.pdf*) to address the needs of its stakeholders, as well as the beneficiaries of its various programs including Medicaid. As part of that plan, CMS provided that it may approve waivers, amendments, and flexibilities for U.S. states, including the District of Columbia, and U.S. territories to allow Medicaid and CHIP programs to adapt their operations as necessary to respond to the pandemic. The pandemic plan also provided that it may make adjustments to the agency's value-based payment initiatives to allow health providers, healthcare facilities, Medicare Advantage and Part D plans, and States to focus on providing needed care to beneficiaries. In addition to the flexibilities granted to states under the PHE, the President signed into law on March 11, 2021, the American Rescue Plan Act of 2021 (ARP) (Pub. L. 117–2) to address the health care and economic needs of the country during the pandemic. This law is one of the most significant expansions of Medicaid since enactment of the Patient Protection and Affordable Care Act (Pub. L. 111–148, enacted March 23, 2010), and includes several new mandatory benefit requirements on states that will take time to implement.

We acknowledged in the December 31, 2020 final rule that the changes to the reporting of multiple best prices by manufacturers under the MDRP (a VBP policy) adopted under the amendatory instruction 10.a would require additional time to provide operational guidance and complex system changes to implement. Thus, we delayed the effective date of the VBP provision until January 1, 2022. States that opt to participate in VBP models offered by manufacturers under the multiple best price approach must ensure that beneficiaries have appropriate access to care under such arrangements by developing systems and methods to track beneficiaries and their outcomes, retrieving and evaluating the patient-specific outcomes data, and securing the cooperation of providers and beneficiaries to enter into some of the more complex outcome-based arrangements offered by the manufacturers. Thus, there will be requirements on states to develop significant capabilities to build an infrastructure that will be able to implement VBP.

We also noted that we want to be sure that our own technology infrastructure will be ready to receive multiple VBP offers from manufacturers that will report them to CMS, and subsequently report them to states. We developed a new Medicaid Drug Program (MDP) system. This MDP system will replace CMS' current legacy system with certain aspects of the system expected to be transitioned in the summer of 2022. However, because of other events that have transpired since the regulation was published on December 31, 2020, we explained in the proposed rule that we did not believe that certain aspects of the system necessary for states and manufacturers to operationalize the VBP multiple best price program would be transitioned at that time, making a January 1, 2022 effective date infeasible. We also noted that we believed that it is important to have a technically up-to-date system that is ready to support the data requirements necessary for states and manufacturers to operationalize the VBP multiple best price program. When the proposed rule was issued, we were concerned we could have a delay with operationalizing that part of the MDP system, which could mean we would not have the necessary CMS components in place by later this year to implement the program by January 1, 2022, and believed July 1, 2022, to be a more realistic target date. As noted in the proposed rule, the demands on researching, producing, and distributing COVID–19 drug treatments and vaccines have likely diverted some manufacturer financial and human resources from developing and implementing system changes that would be required to enter multiple best price offers in the MDP system.

We also stated that in the proposed rule that we understand that there was interest among patient and consumer groups, states, and manufacturers in the new multiple best price policy, and that we were committed to implementing the VBP multiple best price policy in a manner that assures that Medicaid beneficiaries have access to medications and therapies that are appropriately administered and monitored. However, we remain concerned that there are several challenges the states, providers, and manufacturers are facing during the PHE. These included those resulting from the passage of the ARP, including those relating to implementing expanded eligibility and mandatory benefit requirements under Medicaid (as described below). In summary, states, providers and manufacturers, as well as CMS, will need additional time to operationalize the multiple best prices policy under amendatory instruction 10.a.

Therefore, given the possible delay in the MDP system and the recent developments around the PHE and ARP, we explained in the proposed rule that we believe more time is critical to permit CMS and our partners—states, providers, and manufacturers—to successfully implement the multiple best prices approach so that Medicaid patients benefit from these programs to full extent possible.

Specifically, CMS and all the parties involved with the multiple best prices policies will want to make sure Medicaid patients receive the drug therapies under the VBP approach that are prescribed for them in a timely manner; that the VBP program does not create unnecessary barriers or requirements on the patient to access the drug; that they receive appropriately scheduled doses of a therapy if the patient treatment under the VBP arrangement is based on multiple doses; and that patient outcomes are tracked so that optimal patient care is provided; and, the states can obtain any additional discounts due to them from manufacturers under the VBP arrangement. We also believe it is in the best interest of the Medicaid program and Medicaid beneficiaries, in particular, that states prioritize the Medicaid eligibility and benefit requirements under the ARP (for example, expanded optional Medicaid coverage for postpartum women, expansion of COVID–19 testing and treatment services, and expansion of vaccine administration to limited benefit groups), resulting from enactment of the ARP to address beneficiary needs during the COVID–19 pandemic. Therefore, we proposed a delay to the effective date for amendatory instruction 10.a. (the multiple best price approach) of 6 months (effective July 1, 2022). By allowing more time to address the needs of Medicaid beneficiaries during the PHE, states, CMS, providers, and manufacturers will also have more time to put in place appropriate beneficiary protections as part of the multiple best price approach. Again, by delaying the effective date of the amendment permitting multiple best price reporting for 6 months, the amendatory instruction 10.a would be effective beginning July 1, 2022. In the proposed rule, CMS also stated it expects to issue additional guidance before that time on operational and policy aspects of the new VBP program, including specifications relating to beneficiary protections.

C. Proposed Delay of Inclusion Date of U.S. Territories in Amended Regulatory Definitions of ''States'' and ''United States''

The Covered Outpatient Drug (COD) final rule, published in the February 1, 2016 **Federal Register** (81 FR 5170), amended the regulatory definitions of ''States'' and ''United States'' to include the U.S. territories (American Samoa, Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands) for the purposes of the MDRP with a delayed effective date of April 1, 2017. We stated in the preamble to the final rule that U.S. territories may use existing waiver authority to elect not to participate in the MDRP consistent with the statutory waiver standards. Specifically, the Northern Mariana Islands and American Samoa may seek to opt out of participation under the broad waiver that has been granted to them in accordance with section 1902(j) of the Social Security Act (the Act). Puerto Rico, the Virgin Islands, and Guam may use waiver authority under section 1115 of the Act to waive section 1902(a)(54) of the Act, which requires state compliance with the applicable requirements of section 1927 of the Act (81 FR 5203 through 5204).

The change to the definition of ''States'' and ''United States'' under the COD final rule to include the territories would also impact the quarterly calculation of average manufacturer price (AMP) and best price by manufacturers. That is, the change requires manufacturers to include prices paid by entities in the U.S. territories in the same manner in which they include prices paid by entities located in one of the 50 states and District of Columbia (81 FR 5224) in AMP and best price. It requires manufacturers to include eligible sales and associated discounts, rebates, and other financial transactions that take place in the U.S. territories in their calculations of AMP and best price once the revised definitions of ''States'' and ''United States'' take effect, regardless of whether the U.S. territories seek to waive participation in the MDRP.

Once the COD final rule became effective, CMS began discussions with the territories regarding their participation in the MDRP. Based on those discussions, it became evident that interested territories would not be ready to participate in the MDRP by April 1, 2017. Stakeholders also reiterated the concerns in the comments to the COD final rule (81 FR 5224) that drug manufacturers will likely need to increase drug prices paid by U.S. territory Medicaid programs once the territories are included in the definitions of ''States'' and ''United States'' to avoid setting a new, lower best price. That is because if prices for drugs in the territories are lower than those in the states, then those prices could become the Medicaid best price for that drug in the entire Medicaid program. The manufacturers may then increase their drug prices in the territories to avoid this outcome, and an increase in drug prices in the territories could result in an increase in territory Medicaid drug spending without the offsetting benefit of receiving Medicaid rebates. Furthermore, the increase in Medicaid drug spending could adversely impact the availability of drugs to patients in the territories because of their Medicaid funding cap.

As a result of these initial and subsequent discussions on preparedness, the potential for increased Medicaid drug prices in certain territories, and later, due to additional impacts of natural disasters in several of the territories, CMS issued two interim final rules with comment period (IFC) to further delay the effective date for including the U.S. territories in the regulatory definitions of ''States'' and ''United States'' for purposes of the MDRP. The first, the ''Medicaid Program; Covered Outpatient Drug; Delay in Change in Definitions of States and United States'' IFC, was issued on November 15, 2016, amending the regulatory definitions of ''States'' and ''United States'' to include the U.S. territories beginning April 1, 2020, rather than to April 1, 2017 (81 FR 80003). The second, the ''Medicaid Program; Covered Outpatient Drug; Further Delay of Inclusion of Territories in Definitions of States and United States'' IFC, was published on November 25, 2019, and further delayed the inclusion date for amending the regulatory definitions of ''States'' and ''United States'' to include the U.S. territories to April 1, 2022, rather than April 1, 2020 (84 FR 64783).

For similar reasons, in addition to ensuring continued beneficiary access and quality of care protections, we proposed to amend 42 CFR 447.502 to delay the April 1, 2022 inclusion date for the amended regulatory definitions of ''States'' and ''United States'' to April 1, 2024, and sought public comment on the proposed delay. In the alternative, we proposed to finalize an earlier inclusion date, but no earlier than January 1, 2023, based on public comments received. We explained in the proposed rule that we believe an additional delay of 2 years may be warranted because it would allow the territories to focus their human and financial resources on ensuring the health and well-being of their beneficiaries during this PHE, rather than having to divert those resources to the development of systems required to participate in the MDRP, which can take several years to implement from start to finish, and sought public comments on the proposal.

As discussed in the proposed rule, we believe that in light of the pandemic and the resource demands stemming from the PHE (including those established under the ARP) on the Medicaid program and its beneficiaries, it is imperative that the territories prioritize the Medicaid eligibility and mandatory benefit requirements brought about by the ARP to address beneficiary needs during the COVID–19. Therefore, we believe that a further delay in the inclusion date of the U.S. territories in the regulatory definitions of ''States'' and ''United States'' is warranted and proposed an inclusion date beginning April 1, 2024. In the alternative, we proposed to finalize an inclusion date that may be earlier than April 1, 2024, but not before January 1, 2023, based on public comments received.

We explained in the proposed rule that by delaying the inclusion date to April 1, 2024, or in the alternative, a date earlier than April 1, 2024, but not before January 1, 2023, we are allowing the territories additional time to develop needed systems and policy changes, to avoid unintended increases in drug costs and access concerns. The needed systems must be capable of collecting, reporting, validating, and tracking drug utilization on an ongoing basis. In addition, they require extensive advance planning and budgeting.

The proposed delay in inclusion date would also benefit those territories that choose not to participate in the MDRP, which would be required to use human and financial resources that are currently focused on responding to the PHE to complete the section 1115 and section 1902(j) waiver applications that are required to waive out of MDRP participation should the current April 1, 2022 date remain in effect.

Moreover, as explained in the proposed rule, should the amended regulatory definitions of ''States'' and ''United States'' go into effect on April 1, 2022, all manufacturers' sales to the territories and prices paid will be included in the AMP and best price calculations at that time, regardless of whether the territory is participating in the MDRP. As discussed in the COD final rule (81 FR 5224), we heard from various stakeholders who stated concerns that drug manufacturers would likely be prompted to increase drug

prices, including prices paid by the U.S. territory Medicaid programs, once the territories are included in the definitions of ''States'' and ''United States.'' This is because, as currently drafted, section 1927 of the Act requires that eligible sales of drugs within the United States be included in the drug manufacturers calculation of AMP and best price. The inclusion of these prices in AMP and best price could result in the territories that receive a waiver realizing an increase in their Medicaid drug costs without the offsetting benefit of receiving Medicaid rebates. Furthermore, the increase in Medicaid costs could adversely affect territories because of their Medicaid funding cap. As noted previously in the proposed rule, that could result in an increase in drug prices in the territories, making drugs less affordable, and making it more difficult for the territories to address their own public health needs during the PHE. We believe this provides further rationale for delaying the effective date of the inclusion of the territories in the regulatory definitions of ''States'' and ''United States.'' It will ensure that during this PHE, which has the potential to extend into 2022, those territories that opt to waive participation from the MDRP will not face the additional financial burdens associated with increased Medicaid drug costs from drug manufacturers increasing drug prices to the territories.

We proposed a new inclusion date of April 1, 2024, for the amended regulatory definitions of ''States'' and ''United States'' to include the U.S. territories for purposes of the MDRP. In the alternative, we proposed to finalize an inclusion date that may be earlier than April 1, 2024, but before January 1, 2023, based on public comments received. We specifically requested comments on whether April 1, 2024, or an earlier inclusion date, but not earlier than January 1, 2023, would be more appropriate for the amended regulatory definitions. More specifically, we requested public comments that will assist us in understanding all relevant concerns related to establishing a new inclusion date, including whether territories are ready to participate in the MDRP, and whether CMS is able to execute appropriate and necessary waivers for territories that do not want to participate. In any case, manufacturers would be required to include their sales to the territories in their AMP and best price calculations based on the inclusion date finalized in a final rule, which we proposed to be April 1, 2024, or possibly earlier, but no earlier than January 1, 2023 based on public comments.

II. Response to Public Comments and Provisions of the Final Rule

In response to the proposed rule, we received 29 public comments.

A. Delay of Effective Date of Amendatory Instruction 10.a. (§ 447.505(a))

The following is a summary of the comments received and our responses on proposed delay of effective date of amendatory instruction 10.a., which addresses the reporting by manufacturers of multiple best prices connected to value based purchasing (VBP) arrangements.

Comment: Several commenters supported the proposal to delay for 6 months the January 1, 2022 effective date for amendatory instruction 10.a. of the December 31, 2020 final rule, which addresses the reporting by manufacturers of multiple best prices connected to a VBP arrangement. These commenters supported the proposed delay because of both the time as well as the state and federal resources that have been taken up by the emergence of the pandemic, implementation of Medicaid expansion under the ARP, and the focus on development, production, and distribution of vaccination efforts related to controlling the spread of the COVID–19 virus. Some commenters indicated that they do not believe that states, providers, and CMS have the infrastructure in place at this time to be able to track the necessary data related to health outcomes to properly implement VBP arrangements. They believe that the proposed delay will allow for some of this work (for example, work associated with pandemic efforts and infrastructure work to collect adequate patient data with appropriate privacy protections) to be finished without compromising care for those who need it in the interim. The commenters also noted that the proposed delay will allow CMS, states, and manufacturers time to develop and test the new MDP system, and allow CMS to develop operational guidance to facilitate multiple best price reporting.

Response: We appreciate the support of the proposed delay of the effective date of amendatory instruction 10.a. to July 1, 2022, and continue to believe that the proposed delay is necessary for CMS, manufacturers, states, and providers to engage in the work necessary to facilitate the multiple best price reporting approach. As commenters noted, we are implementing a new MDP system and, as part of that new system, will include the necessary changes to address multiple best price reporting. The additional 6 months will give us time to upgrade our new MDP system to collect multiple best prices, as well as explore and test these changes with the manufacturers and states that have been anxious to commit to the multiple best price approach. We will also use this time to issue operational guidance for states and manufacturers on reporting and accessing the multiple best price information in the MDP system.

For commenters' concerns regarding infrastructure and data collection, while we plan to provide general operational guidance, we do not plan to issue guidance on how to operationalize, evaluate, or monitor *specific* VBP arrangements as each arrangement will have its own set of specific facts and circumstances associated with the arrangement, such as the drug, the anticipated outcomes, and population included in the arrangement. A ''one size fits all'' approach to operationalizing a VBP arrangement is not possible because of the many different arrangements on the marketplace (85 FR 87018).

Comment: A few commenters urged CMS to effectuate the multiple best price reporting option as established in the final rule, but no later than the proposed delay in effective date of July 1, 2022. Several commenters, while agreeing with the proposed delay, continue to believe that the multiple best price reporting flexibility is essential to ensuring that patients benefit from VBP arrangements. One commenter in particular was disappointed that CMS was considering the proposed 6 month delay in effective date, but understood that putting in place the necessary systems and modifications for a seamless adoption of this new program is challenging. This commenter encouraged CMS to work diligently to ensure the proposed effective date of July 1, 2022 was achievable. Another commenter indicated that any further delay in effective date, beyond the 6 months proposed, will result in substantial negative repercussions for patient access to therapies that address significant unmet need, especially for Medicaid beneficiaries, and therefore, should be a one-time delay.

Response: This delay rule allows states additional time to ensure patient access by Medicaid beneficiaries to certain higher cost therapies. We will continue to assess system readiness for states, manufacturers and CMS to ensure the reporting by manufacturers of multiple best prices connected to a VBP arrangement can be effectuated in

the timeframe established in this delay rule, and we may consider further delays in future rulemaking if systems are not ready.

Comment: Several commenters provided input as to how CMS, states, and manufacturers should utilize the time associated with the proposed 6 month delay in effective date. One commenter encouraged CMS to utilize the proposed 6 month delay to issue subregulatory guidance regarding whether an arrangement would qualify as a VBP arrangement if a State Medicaid Agency is not able to access the same type of patient and outcomes data utilized in the commercial contract that resulted in the multiple best price. In other words, the commenter questioned if the state and the manufacturer will be allowed to modify the commercial sector agreement to better fit the Medicaid population, and how manufacturers will report multiple best prices when multiple commercial and/or state agencies enter into similar contracts but have different outcomes, resulting in different rebates and multiple best prices.

Response: We appreciate the commenters' recommendations for how CMS, states, and manufacturers should utilize the time associated with the proposed 6 month delay in effective date; however, these comments and recommendations are outside of the scope of this rulemaking. We note, however, that CMS plans to provide further operational guidance for states and manufacturers in the near future regarding the implementation of the multiple best price reporting.

Comment: A few commenters requested that CMS take this additional time to consult with Medicaid agencies and other stakeholders to ensure the necessary systems and technology needed to facilitate the collection and reporting of patient clinical outcomes are in place. The commenters further commented that CMS should encourage and incentivize consistency (for example, standard data reporting requirements) in these systems across states.

Response: We agree with the commenters, and as noted in the December 31, 2020 final rule, we plan to develop operational guidance regarding the final policy permitting multiple best price reporting. To that end, we have been available to manufacturers, states, and other stakeholders to discuss what is needed in MDP systems to effectuate the reporting of multiple best prices and intend to issue operational guidance associated with the MDP system changes. We expect to also provide states with guidance regarding existing Medicaid access and beneficiary protections when engaging in VBP arrangements.

With respect to the standardization of reporting systems across states, we understand that such systems would benefit states, patients, and manufacturers, as it would facilitate implementation of VBP programs, and avoid duplication of efforts. Since the MDP systems operated by CMS will not be collecting patient-specific or outcomes data associated with VBP arrangements, we will not be encouraging or providing incentives to standardized data collection reporting associated with VBP arrangements as part of the MDP system. However, we expect that states, working with their supplemental rebate contractors or other VBP vendors, as well as manufacturers, will attempt to create standardized reporting templates and formats that may become industry standards over time.

Comment: A few commenters indicated their appreciation of CMS' December 31, 2020 final rule to enhance flexibility in creating VBP arrangements; however, the commenters do not believe a 6 month delay in the effective date allows CMS sufficient time to adequately address the operational complexities and other legal hurdles (giving examples such as the federal Anti-Kickback Statute or Medicare Part B requirements) that impede adoption of VBP arrangements in a timely fashion. Therefore, the commenters stated that to leverage the full benefit of VBP arrangements, additional flexibilities and clarity are needed that cannot be provided via subregulatory guidance and urged CMS to withdraw the December 31, 2020 final rule and issue a revised proposed rule, or reopen the December 31, 2020 final rule for further public comment. A commenter indicated that while they appreciate CMS' interest in and effort to modernize the MDRP to support innovation that advances high value, patient-centered care through VBP arrangements, the final VBP multiple best price policy lacks clarity and does not consider a full range of operational hurdles. The commenter also indicated that the changes to the MDRP alone are not sufficient to reduce current barriers to VBP arrangements in the commercial market, and therefore, CMS must address the Anti-Kickback Statute (AKS), impact to Average Sales Price (ASP), and other government price reporting barriers to realize the full potential of VBP arrangements.

Another commenter expressed concerns regarding how the final rule on VBP arrangements could be gamed by manufacturers. The commenter suggested and encouraged CMS withdraw the December 31, 2020 final regulation, prohibit manufacturers from reporting multiple best prices, limit outcomes-based arrangements under a bundled approach, and clarify requirements regarding stacking discounts. The commenter expressed concern that CMS' VBP regulations, as finalized in the December 31, 2020 final rule, are not related to the Medicaid program and instead are designed to encourage specific types of contracting in the commercial market. This commenter suggested that the VBP regulations change Medicaid program requirements to achieve a goal outside of the Medicaid program and asserted that it is not appropriate to harm the Medicaid program to promote commercial contracting flexibility.

Response: The proposed rule only proposed a delay in effective date related to the VBP multiple best price reporting policy finalized in the December 31, 2020 final rule. The underlying policy itself was not a subject of the proposed rule open to public comment. Thus, comments related to the underlying policy are outside the scope of this rulemaking. At this time, we believe the 6 month delay beyond the initial delay in inclusion date from the COD final rule will be adequate for manufacturers to provide the data necessary to report multiple best prices in MDP system. Any other legal requirements that manufacturers may be subject to, such as the federal anti-kickback statute or Medicare Part B requirements, are outside of the scope of this rulemaking. However, we do intend to issue additional guidance on the interaction between VBP and Medicare Part B ASP calculations.

Comment: Some commenters continue to request additional clarity on whether, and to what extent, new VBP arrangements run afoul of the federal anti-kickback statute. The commenters indicate that CMS should work to remove barriers imposed by AKS that limit or prevent adoption of VBP arrangements.

Response: While we appreciate the comments received, these issues are outside the scope of this rulemaking. As noted above, the underlying policy regarding VBP arrangements was not a subject of the proposed rule open to public comment. Rather, the proposed rule specifically proposed a 6 month delay to the effective date for the policy permitting manufacturers to report multiple best prices related to a VBP arrangement. Questions regarding these

issues should be directed to the Office of the Inspector General (OIG).

Comment: A couple of commenters reiterated their comments provided on the ''Establishing Minimum Standards in Medicaid State Drug Utilization Review (DUR) and Supporting Value-Based Purchasing (VBP) for Drugs Covered in Medicaid, Revising Medicaid Drug Rebate and Third Party Liability (TPL) Requirements'' proposed rule that appeared in the June 19, 2020 **Federal Register** (85 FR 37256), including comments regarding the drug utilization review requirements.

Response: The DUR requirements set forth in the December 31, 2020 final rule were not a subject of this proposed rule and were not impacted by the proposed delay.

After consideration of the comments received regarding the proposed delay to amendatory instruction 10.a. of the December 31, 2020 final rule, we are finalizing the proposed July 1, 2022 effective date.

B. Delay of Inclusion Date of U.S. Territories in Amended Regulatory Definitions of ''States'' and ''United States'' (§ 447.502)

The following is a summary of the comments received and our responses on the proposed delay of the inclusion date for the U.S. territories in the definition of ''States'' and ''United States'' at § 447.502 to April 1, 2024, or, alternatively, a date that is earlier than April 1, 2024, but not before January 1, 2023 based on public comments received.

Comment: Several commenters supported the proposed delay of the April 1, 2022 inclusion date to April 1, 2024, or, alternatively, to a date earlier than April 1, 2024, but not before January 1, 2023 based on public comments. These commenters supported the proposed delay because of the territories' current need to focus on the PHE relating to COVID–19 and the time needed to prepare for the technology infrastructure changes necessary to support participation in the MDRP. The commenters also noted concern that manufacturers may increase their drug prices in the territories as a result of their participation in the MDRP. One commenter specifically noted concern as to whether the territories would be capable of participating in the MDRP prior to April 1, 2024.

Another commenter supported the proposed delay, given the various programs and processes that a state has to put in place to effectively and efficiently participate in the MDRP, such as establishing a drug manufacturer rebate billing mechanism, a state drug utilization reporting mechanism, a process to assure that all drugs of a manufacturer that sign a rebate agreement with the Secretary of HHS are covered, a dispute resolution process, and a Drug Utilization Review (DUR) program.

Another commenter supported a proposed delay of the April 1, 2022 inclusion date and suggested October 1, 2023 as an alternative inclusion date. The commenter stated that an October 1, 2023 inclusion date would provide an additional eighteen months beyond April 1, 2022 before the territories are included in the amended regulatory definitions of ''States'' and ''United States'', and believed that an October 1, 2023 inclusion date is justified because some interested territories have requested more time to prepare for MDRP participation and suggested potential policy changes to address increases in drug prices. In addition, the commenter indicated that the territories and manufacturers will need this additional time because their resources continue to be diverted to the COVID–19 pandemic response.

Another commenter found it difficult to envision territories having the infrastructure or funding in place to fully transition to the MDRP given the PHE. The commenter also noted that even if a territory was prepared to make this transition, the providers, including hospitals and others across the healthcare marketplace that prescribe and provide prescription drugs, would need to update their systems, resulting in significant confusion and patient access barriers. The commenter believed further guidance is necessary to prepare the territories for this transition, as well as the providers of care within those programs. The commenter restated these reasons for prior delays in implementing this requirement as rationale for reversing the 2016 COD final rule including territories in the definition of ''States'' and ''United States.''

Other commenters indicated that they did not support the proposed delay because one territory in particular, Puerto Rico, has made significant efforts to prepare for participation in the program. The commenter indicated that the proposed delay would be financially harmful to that territory because it has already written a request for proposal (RFP) to procure a vendor to manage participation in the MDRP, which has an expected launch date of July 1, 2022, and a delay would result in the need for multiple modifications to the territory's RFP. The commenter also noted that the territory has undertaken a significant amount of budgeting and financial forecasting as part of their efforts, which indicated that there would be a financial loss as a result of unrealized federal rebates for both brand and generic drugs if there is a delay beyond the territory's FY 2023, which runs from July 2022 through June 2023.

Response: In proposing this delay, and in finalizing a new inclusion date of January 1, 2023, we considered all public comments received, the needs of all the stakeholders, including territories and manufacturers, while considering the impact that the delay could have on access to necessary and affordable medications for the citizens of the territories, both those that would and would not participate in MDRP.

To balance the willingness of territories that want to participate, while accommodating the time to prepare waivers for those that do not, we have determined that the January 1, 2023 date, which falls within the scope of the alternative proposal, is appropriate.

Based on the information available to us at this time, we believe that of the five territories, only two will make efforts to participate in MDRP, regardless of the ultimate inclusion date, and the others will require additional time to request the applicable waivers. Of the two territories that we anticipate will make efforts to participate in MDRP, only one (Puerto Rico) has definitively indicated that they are ready and will be able to participate in MDRP as early as July 1, 2022, while the other (U.S. Virgin Islands) has previously expressed interest, but may or may not have decided whether to participate by January 1, 2023.

Those territories that do not participate will need time to prepare to waive out of the program through the appropriate Medicaid waiver mechanism.

To accommodate the resource needs of the territories during the PHE, we believe a January 1, 2023 inclusion date gives Puerto Rico the ability to participate sooner than the April 1, 2024 inclusion date, while giving the other territories a firm deadline to make a final decision to participate or waive out of the program. The timeline also recognizes the work done to date by Puerto Rico to prepare to participate in the program. Therefore, the new inclusion date for U.S. Territories in the amended regulatory definitions of ''States'' and ''United States'' for purpose of the Medicaid Drug Rebate Program will be January 1, 2023, which is the earliest new inclusion date that we could have finalized given our proposals in the proposed regulation.

We note the suggestion for a delayed inclusion date of October 1, 2023 made by one of the commenters in light of the additional time needed and requested by some territories. we believe that further delay beyond January 1, 2023 negatively impacts the progress Puerto Rico has made to prepare to participate in the program (for example, Puerto Rico has already invested significantly in consulting costs and begun the request for proposal process for a system contractor). For example, Puerto Rico has indicated it could be ready to participate in the MDRP as early as July 1, 2022, and therefore, an effective date of October 1, 2023 would push back MDRP participation by over a year from that date for the territory that has the overwhelming majority of drug spending, and which stands to benefit most from participation in MDRP.

As for the commenter's request for additional guidance, the delay can be used to help any territory that plans on participating in the program more time to prepare its beneficiaries, pharmacies, and providers. That is because participation in the MDRP will increase the availability of medications that are available in participating territories, but the territories can also use various utilization management techniques, and providers and patients may need time to be educated on how these programs will work. Moreover, a territory participating in MDRP may need technical help from us on reporting its state drug utilization data, and, for example, assuring that all its physician administered drug claims also include National Drug Code (NDC) numbers. Like our state partners, we are available to guide territories that want to participate in MDRP to assure beneficiary access to drugs, as well as to properly invoice participating manufacturers for federal rebates.

Comment: A few commenters noted their general opposition to the expansion of the MDRP beyond the 50 states and DC to include the territories. One commenter remarked that at most, CMS should limit the expansion to only requiring that rebates be paid by the manufacturers to the territories, but not require manufacturers to include sales to the territories in calculation of their AMP or determination of their Best Price because of the enormous burden and compliance concerns that such an expansion would pose on the manufacturer.

A couple of commenters, while supporting the proposed delay of the participation of the territories in the MDRP to April 1, 2024, were still concerned with the decision to include the territories in the definition of ''States'' and ''United States'' in the first place, and urged CMS to address their prior comments requesting the agency to reverse its decision to add the territories to the Medicaid rebate program.

Response: We note that the definitions of ''States'' and ''United States'' at § 447.502 were amended to include the U.S. territories for purposes of the MDRP in the COD final rule with a delayed inclusion date. We did not propose to change the underlying policy, only to delay the inclusion date. As such, comments requesting that we revisit the underlying policy are outside the scope of this rulemaking.

After consideration of the comments received regarding the proposed delay of inclusion date for the U.S. territories in the definitions of ''States'' and ''United States'' at § 447.502, we are finalizing an inclusion date of January 1, 2023.

Chiquita Brooks-LaSure, Administrator of the Centers for Medicare & Medicaid Services, approved this document on October 27, 2021.

List of Subjects in 42 CFR Part 447

Accounting, Administrative practice and procedure, Drugs, Grant programs—health, Health facilities, Health professions, Medicaid, Reporting and recordkeeping requirements, Rural areas.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

PART 447—PAYMENT FOR SERVICES

■ 1. The authority citation for part 447 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1396r–8.

■ 2. Amend § 447.502 by revising the definitions of ''States'' and ''United States'' to read as follows:

§ 447.502 Definitions.

* * * * *

States means the 50 States and the District of Columbia and, beginning January 1, 2023, also includes the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa.

United States means the 50 States and the District of Columbia and, beginning January 1, 2023, also includes the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa.

* * * * *

■ 3. Effective July 1, 2022, in paragraph (a), by revising the definition of ''Best price'' to read as follows:

§ 447.505 Determination of best price.

(a) * * *

Best price means, for a single source drug or innovator multiple source drug of a manufacturer (including the lowest price available to any entity for an authorized generic drug), the lowest price available from the manufacturer during the rebate period to any wholesaler, retailer, provider, health maintenance organization, nonprofit entity, or governmental entity in the United States in any pricing structure (including capitated payments) in the same quarter for which the AMP is computed. If a manufacturer offers a value-based purchasing arrangement (as defined at § 447.502) to all states, the lowest price available from a manufacturer may include varying best price points for a single dosage form and strength as a result of that value based purchasing arrangement.

* * * * *

Dated: November 4, 2021.

Xavier Becerra,

Secretary, Department of Health and Human Services.

[FR Doc. 2021–25009 Filed 11–17–21; 4:15 pm]

BILLING CODE 4120–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 211115–0231]

RIN 0648–BK56

Fisheries Off West Coast States; Coastal Pelagic Species Fisheries; Biennial Specifications; 2021–2022 and 2022–2023 Specifications for Pacific Mackerel

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is implementing allowable catch levels including an overfishing limit, an allowable biological catch, and an annual catch limit for Pacific mackerel in the U.S. exclusive economic zone off the West Coast (California, Oregon and Washington) for the fishing seasons 2021–2022 and 2022–2023. This rule is finalized pursuant to the Coastal Pelagic Species Fishery Management Plan. The

harvest guideline and annual catch target for the 2021–2022 fishing season are 8,323 metric tons (mt) and 7,323 mt, respectively. The harvest guideline and annual catch target for the 2022–2023 fishing season are 5,822 mt and 4,822 mt, respectively. If the fishery attains the annual catch target in either fishing season, the directed fishery will close, reserving the 1,000-mt difference between the harvest guideline and annual catch target as a set-aside for incidental landings and other sources of mortality. This rule is intended to conserve and manage the Pacific mackerel stock off the U.S. West Coast.

DATES: Effective December 20, 2021.

FOR FURTHER INFORMATION CONTACT: Taylor Debevec, West Coast Region, NMFS, (562) 619–2052, *Taylor.Debevec@noaa.gov.*

SUPPLEMENTARY INFORMATION: Under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.,* NMFS manages the Pacific mackerel fishery in the U.S. exclusive economic zone (EEZ) off the West Coast in accordance with the Coastal Pelagic Species (CPS) Fishery Management Plan (FMP). The CPS FMP and its implementing regulations require NMFS to set annual harvest specifications for the Pacific mackerel fishery based on the annual specification framework and control rules in the FMP. The control rules in the CPS FMP include the harvest guideline (HG) control rule, which in conjunction with the overfishing limit (OFL) and acceptable biological catch (ABC) rules, are used to manage harvest levels for Pacific mackerel. According to the FMP, the quota for the principal commercial fishery, the HG, is determined using the FMP-specified HG formula. The HG is based, in large part, on the current estimate of stock biomass. The biomass estimate is an explicit part of the various harvest control rules for Pacific mackerel, and as the estimated biomass decreases or increases from one year to the next, the resulting allowable catch levels similarly trend. More information on the Pacific Fishery Management Council's (Council) process for developing Pacific mackerel harvest specifications and more detail on the HG control rule are provided in the proposed rule for this action (86 FR 48969; September 1, 2021) and are not repeated here.

The purpose of this final rule is to implement these harvest specifications, which include allowable harvest levels (*i.e.,* annual catch target (ACT) and HG), an annual catch limit (ACL), and annual catch reference points (*i.e.,* OFL and ABC). The uncertainty surrounding the current biomass estimates for Pacific mackerel for the 2021–2022 and 2022–2023 fishing seasons was taken into consideration in the development of these harvest specifications. The Pacific mackerel fishing season runs from July 1 to June 30. Any Pacific mackerel harvested between July 1, 2021, and the effective date of the final rule would count toward the 2021–2022 ACT and HG.

The Council has recommended, and NMFS is implementing, Pacific mackerel harvest specifications for both the 2021–2022 and 2022–2023 fishing seasons. For the 2021–2022 Pacific mackerel fishing season these include an OFL of 12,145 mt, an ABC and ACL of 9,446 mt, a HG of 8,323 mt, and an annual ACT of 7,323 mt. For the 2022–2023 Pacific mackerel fishing season these include an OFL of 9,644 mt, and ABC and ACL of 7,501 mt, a HG of 5,822 mt, and an ACT of 4,822 mt. These catch specifications are based on the control rules established in the CPS FMP and biomass estimates of 57,832 mt (2021–2022) and 45,925 mt (2022–2023). The biomass estimates are the result of a catch-only stock assessment the NMFS' Southwest Fisheries Science Center completed in June 2021. The Council's Science and Statistical Committee, and the Council approved this stock assessment and resulting biomass estimates as the best scientific information available for management for these two fishing years at the June 2021 Council meeting.

Under this action, in the unlikely event that catch reaches the ACT in either fishing season, directed fishing would close, reserving the difference between the HG and ACT (1,000 mt) as a set-aside for incidental landings in other fisheries and other sources of mortality.[1] For the remainder of the fishing season, incidental landings in CPS fisheries would be constrained to a 45-percent incidental catch allowance (in other words, no more than 45 percent by weight of the CPS landed per trip may be Pacific mackerel); and in non-CPS fisheries, up to 3 mt of Pacific mackerel may be landed incidentally per fishing trip. The incidental set-aside is intended to allow continued operation of fisheries for other stocks, particularly other CPS stocks that may school with Pacific mackerel.

The NMFS West Coast Regional Administrator will publish a notice in the **Federal Register** announcing the date of any closure of directed fishing (when harvest levels reach or exceed the ACT). Additionally, to ensure the regulated community is informed of any closure, NMFS will also make announcements through other means available, including email to fishermen, processors, and state fishery management agencies.

On September 1, 2021, NMFS published a proposed rule in the **Federal Register** (86 FR 48969) soliciting public comments through October 1, 2021. NMFS received two comments from private citizens, one supporting the proposed rule and the other suggesting lowering the catch limit to account for uncertainty. In response to the comment on uncertainty, NMFS has determined that scientific uncertainty has been adequately incorporated in this action through the stock assessment modeling and resulting biomass estimate, as well as in the catch limit by reducing the OFL to the ABC/ACL, to the HG, and finally the ACT. The incorporation of uncertainty and precautionary reductions in the catch limit are to prevent overfishing of mackerel. Additionally, NMFS notes that the Pacific mackerel fishery has been managed with annual or biennial stock assessments and precautionary catch levels for at least the last 20 years.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this rule is consistent with the CPS FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This action does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act. There are no relevant Federal rules that may duplicate, overlap, or conflict with the final action.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Reporting and recordkeeping requirements.

[1] Directed fishing for live bait and minor directed fishing is allowed to continue during a closure of the directed fishery.

Dated: November 15, 2021.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.511, revise paragraphs (i) and (j) to read as follows:

§ 660.511 Catch restrictions.

* * * * *

(i) The following harvest specifications apply for Pacific mackerel:

(1) For the Pacific mackerel fishing season July 1, 2021, through June 30, 2022, the harvest guideline is 8,323 mt and the ACT is 7,323 mt; and

(2) For the Pacific mackerel fishing season July 1, 2022, through June 30, 2023, the harvest guideline is 5,822 mt and the ACT of 4,822 mt.

(j) When an ACT in paragraph (i) of this section has been reached or exceeded, then for the remainder of the Pacific mackerel fishing season, Pacific mackerel may not be targeted and landings of Pacific mackerel may not exceed: 45 percent of landings when Pacific mackerel are landed in CPS fisheries (in other words, no more than 45 percent by weight of the CPS landed per trip may be Pacific mackerel), or up to 3 mt of Pacific mackerel when landed in non-CPS fisheries. The NMFS West Coast Regional Administer shall announce in the **Federal Register** the date that an ACT is reached or exceeded, and the date and time that the restrictions described in this paragraph (j) go into effect.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 210217–0022; RTID 0648–XB595]

Fisheries of the Exclusive Economic Zone Off Alaska; Shortraker Rockfish in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of shortraker rockfish in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the 2021 shortraker rockfish total allowable catch (TAC) in the BSAI has been reached.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), November 16, 2021, through 2400 hours, A.l.t., December 31, 2021.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2021 shortraker rockfish TAC in the BSAI is 425 metric tons (mt) as established by the final 2021 and 2022 harvest specifications for groundfish in the BSAI (86 FR 11449, February 25, 2021). In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator) has determined that the 2021 shortraker rockfish TAC in the BSAI has been reached. Therefore, NMFS is requiring that shortraker rockfish in the BSAI be treated in the same manner as a prohibited species, as described under § 679.21(a), for the remainder of the year, except shortraker rockfish in the BSAI caught by catcher vessels using hook-and-line, pot, or jig gear as described in § 679.20(j).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting retention of shortraker rockfish in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 12, 2021.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2021.

Ngagne Jafnar Gueye,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2021–25310 Filed 11–16–21; 4:15 pm]

BILLING CODE P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 210217–0022; RTID 0648–XB592]

Fisheries of the Exclusive Economic Zone Off Alaska; Several Groundfish Species in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; apportionment of reserves; request for comments.

SUMMARY: NMFS apportions amounts of the non-specified reserve to the initial total allowable catch (ITAC) of Bering Sea (BS) Pacific ocean perch, BS trawl sablefish, Bering Sea and Aleutian Islands (BSAI) shortraker rockfish, BSAI skates, BSAI sharks, and Central Aleutian Islands and Western Aleutian

Islands (CAI/WAI) blackspotted/rougheye rockfish. This action is necessary to allow the fisheries to continue operating. It is intended to promote the goals and objectives of the fishery management plan for the BSAI management area.

DATES: Effective November 16, 2021, through 2400 hrs, Alaska local time, December 31, 2021. Comments must be received at the following address no later than 4:30 p.m., Alaska local time December 1, 2021.

ADDRESSES: Submit your comments, identified by docket number NOAA–NMFS–2020–0141, by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov/docket/NOAA-NMFS-2020-0141* click the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will post the comments for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the BSAI Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2021 ITAC of BS Pacific ocean perch was established as 9,165 metric tons (mt), the 2021 ITAC of BS trawl sablefish was established as 1,443 mt, the 2021 ITAC of BSAI shortraker rockfish was established as 425 mt, the 2021 ITAC of BSAI skates was established as 15,300 mt, the 2021 ITAC of BSAI sharks was established as 170 mt, and the 2021 ITAC of CAI/WAI blackspotted/rougheye rockfish was established as 144 mt by the final 2021 and 2022 harvest specifications for groundfish of the BSAI (86 FR 11449, February 25, 2021). In accordance with § 679.20(a)(3) the Regional Administrator, Alaska Region, NMFS, has reviewed the most current available data and finds that the ITACs for BS Pacific ocean perch, BS trawl sablefish, BSAI shortraker rockfish, BSAI skates, BSAI sharks, and CAI/WAI blackspotted/rougheye rockfish need to be supplemented from the non-specified reserve to promote efficiency in the utilization of fishery resources in the BSAI and allow fishing operations to continue.

Therefore, in accordance with § 679.20(b)(3), NMFS apportions from the non-specified reserve of groundfish to ITACs in the BSAI management area as follows: 1,617 mt to BS Pacific ocean perch, 128 mt to BS trawl sablefish, 116 mt to BSAI shortraker rockfish, 4,700 mt to BSAI skates, 347 mt to BSAI sharks, and 25 mt to CAI/WAI blackspotted/rougheye rockfish. These apportionments are consistent with § 679.20(b)(1)(i) and do not result in overfishing of any target species because the revised ITACs and total allowable catches (TACs) are equal to or less than the specifications of the acceptable biological catch in the final 2021 and 2022 harvest specifications for groundfish in the BSAI (86 FR 11449, February 25, 2021).

The harvest specification for the 2021 ITACs and TACs included in the harvest specifications for groundfish in the BSAI are revised as follows 10,782 mt for BS Pacific ocean perch, 1,571 mt for BS trawl sablefish, 541 mt for BSAI shortraker rockfish, 20,000 mt for BSAI skates, 517 mt for BSAI sharks, and 169 mt for CAI/WAI blackspotted/rougheye rockfish.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the apportionment of the non-specified reserves of groundfish to the BS Pacific ocean perch, BS trawl sablefish, BSAI shortraker rockfish, BSAI skates, BSAI sharks, and CAI/WAI blackspotted/rougheye rockfish. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 9, 2021.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Under § 679.20(b)(3)(iii), interested persons are invited to submit written comments on this action (see **ADDRESSES**) until December 1, 2021.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2021.

Fisheries of the Exclusive Economic Zone off Alaska; Pacific Cod by Catcher/Processors Using Hook-and-Line Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by catcher/processors using hook-and-line (HAL) gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the annual allowance of the 2021 total allowable catch (TAC) of Pacific cod by catcher/processors using HAL gear in the Central Regulatory Area of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), November 15, 2021, through 1200 hrs, A.l.t., December 31, 2021.

FOR FURTHER INFORMATION CONTACT: Allyson Olds, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The annual allowance of the 2021 Pacific cod TAC apportioned to catcher/processors using HAL gear in the Central Regulatory Area of the GOA is 518 metric tons (mt) as established by the final 2021 and 2022 harvest specifications for groundfish in the GOA (86 FR 10184, February 19, 2021).

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the annual allowance of the 2021 Pacific cod TAC apportioned to catcher/processors using HAL gear in the Central Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 502 mt and is setting aside the remaining 16 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by catcher/processors using HAL gear in the Central Regulatory Area of the GOA.

While this closure is effective the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the directed fishing closure for Pacific cod by catcher/processors using HAL gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 12, 2021.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2021.

Ngagne Jafnar Gueye,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 86, No. 221
Friday, November 19, 2021

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 927

[Doc. No. AMS–SC–21–0069; SC21–927–1 PR]

Pears Grown in Oregon and Washington; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement a recommendation from the Fresh Pear Committee (Committee) to increase the assessment rate established for the 2021–22 and subsequent fiscal periods. The proposed assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by December 20, 2021.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent to the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; or internet: *https://www.regulations.gov.* Comments should reference the document number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *https://www.regulations.gov.* All comments submitted in response to this proposed rule will be included in the record and will be made available to the public. Please be advised that the identity of individuals or entities submitting comments will be made public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Dale Novotny, Marketing Specialist, or Andrew Hatch, Deputy Director, Market Development Division, Specialty Crops Program, AMS, USDA; Telephone: (559) 356–8202 or Email: *dalej.novotny@usda.gov* or *Andrew.Hatch@usda.gov.*

Small businesses may request information on complying with this regulation by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, or Email: *Richard.Lower@usda.gov.*

SUPPLEMENTARY INFORMATION: This action, pursuant to 5 U.S.C. 553, proposes to amend regulations issued to carry out a marketing order as defined in 7 CFR 900.2(j). This proposed rule is issued under Marketing Order No. 927, as amended (7 CFR part 927), regulating the handling of pears grown in Oregon and Washington. Part 927 (referred to as the ''Order'') is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.'' The Committee locally administers the Order and is comprised of growers and handlers of pears operating within the production area, and a public member.

The Department of Agriculture (USDA) is issuing this proposed rule in conformance with Executive Orders 12866 and 13563. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review.

This proposed rule has been reviewed under Executive Order 13175—Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have tribal implications. AMS has determined this proposed rule is unlikely to have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed no later than 20 days after the date of the entry of the ruling.

This proposed rule would increase the assessment rate from $0.463 per 44-pound standard box or equivalent of fresh ''summer/fall'' and ''winter'' pears, the rate that was established for the 2018–19 and subsequent fiscal periods, to $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears for the 2021–22 and subsequent fiscal periods.

The Order authorizes the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. Members are familiar with the Committee's needs and with costs of goods and services in their local area, and they are in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2018–19 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate of $0.463 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears. That assessment rate continues in effect from fiscal period to fiscal period unless

modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on June 3, 2021, and unanimously recommended 2021–22 fiscal period expenditures of $8,472,263 and an assessment rate of $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears handled for the 2021–22 and subsequent fiscal periods. In comparison, the previous fiscal period's budgeted expenditures were $8,901,114. The proposed assessment rate of $0.468 is $0.005 higher than the rate currently in effect. Due to a smaller estimated 2021–22 crop, the Committee recommended increasing the assessment rate to provide adequate income that, along with reserve funds and interest income, would cover the Committee's budgeted expenses for the 2021–22 fiscal period.

Expenditures recommended by the Committee for the 2021–22 fiscal period include $391,047 for contracted administration, $159,540 for industry development, $964,476 for production research and market development, $27,200 for miscellaneous expenses, and $6,930,000 for promotion and paid advertising for ''summer/fall'' and ''winter'' varieties of fresh pears. Budgeted expenses for these items for the 2020–21 fiscal period were $388,520, $172,000, $997,394, $28,200, and $7,315,000, respectively.

The Committee derived the recommended assessment rate by considering anticipated expenses, and an estimated 2021 crop of 18,000,000 44-pound standard boxes or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears. Income derived from handler assessments, calculated at $8,424,000 (18,000,000 standard boxes or equivalent multiplied by $0.468 assessment rate), along with reserve funds and interest income ($48,263), should be adequate to cover budgeted expenses of $8,472,263.

The assessment rate proposed in this rule would continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. Dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA would evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking would be undertaken as necessary. The Committee's 2021–22 fiscal period budget, and those for subsequent fiscal periods, would be reviewed and, as appropriate, approved by USDA.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 708 growers of fresh pears in the production area and 27 handlers subject to the regulation under the Order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts of less than $1,000,000, and small agricultural service firms have been defined as those whose annual receipts are less than $30,000,000 (13 CFR 121.201).

According to the National Agricultural Statistics Service (NASS), the 2020 average grower price received for fresh pears produced in Oregon and Washington was $11.39 per standard 44-pound box or equivalent. Committee data indicates total production was 16,290,225 44-pound standard boxes or equivalent in the 2019–20 fiscal period. The total 2019–20 fiscal period value of assessable fresh ''summer/fall'' and ''winter'' pears grown in Oregon and Washington was $185,545,663 (16,290,225 44-pound standard boxes or equivalent times $11.39 per box equals $185,545,663). Dividing the crop value by the estimated number of growers (708) yields an estimated average receipt per grower of $262,070.

According to USDA Market News data, the reported average terminal price for 2020 Oregon and Washington fresh pears was $34.87 per 44-pound standard box or equivalent (data reported in 4/5 bushel). Multiplying the Committee-reported 2019–20 Oregon and Washington total production of 16,290,225 44-pound standard boxes or equivalent by the estimated average price per box or equivalent of $34.87 equals $568,040,146. Dividing this figure by 27 regulated handlers yields estimated average annual handler receipts of $21,038,524.

Therefore, using the above data, the majority of growers of Oregon and Washington fresh pears may be classified as small entities. Assuming a normal distribution, the majority of handlers of Oregon and Washington fresh pears may also be classified as small entities.

As noted above, the average price received by growers in 2020 was $11.39 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears. Given the Committee-estimated production of 18,000,000 44-pound standard boxes or equivalent of assessable fresh pears for the 2021–22 fiscal period, the total grower revenue is estimated to be $205,020,000. The total assessment revenue is expected to be $8,424,000 (18,000,000 boxes multiplied by $0.468 per box). Thus, the total assessment revenue compared to total grower revenue is 4.1 percent ($8,424,000 divided by $205,020,000).

This proposal would increase the assessment rate collected from handlers for the 2021–22 and subsequent fiscal periods from $0.463 to $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears. The Committee unanimously recommended 2021–22 fiscal period expenditures of $8,472,263 and an assessment rate of $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears handled. The proposed assessment rate of $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears is $0.005 higher than the current rate. The volume of assessable fresh ''summer/fall'' pears and ''winter'' pears in the production area for the 2021–22 fiscal period is estimated to be 18,000,000 44-pound standard boxes or equivalent. Thus, the $0.468 per 44-pound standard box or equivalent of assessable fresh ''summer/fall'' pears and ''winter'' pears should provide $8,424,000 in assessment income (18,000,000 multiplied by $0.468). Income derived from handler assessments, along with reserve funds and interest income, should be adequate to cover budgeted expenses of for the 2021–22 fiscal period.

Major expenditures recommended by the Committee for the 2021–22 fiscal

period include $391,047 for contracted administration, $159,540 for industry development, $964,476 for production research and market development, and $6,930,000 for promotion and paid advertising for ''summer/fall'' and ''winter'' varieties of fresh pears. Budgeted expenses for these items for the 2020–21 fiscal period were $388,520, $172,000, $997,394, and $7,315,000, respectively.

Due to a smaller estimated 2021–22 crop, the Committee recommended increasing the assessment rate to provide adequate income that, along with reserve funds and interest income, would cover the Committee's budgeted expenses for the 2021–22 fiscal period. Prior to arriving at this budget and assessment rate recommendation, the Committee discussed various alternatives, including maintaining the current assessment rate and, alternatively, increasing the assessment rate by a different amount. However, the Committee determined that the recommended assessment rate, along with reserve funds and interest income, should adequately fund budgeted expenses.

This proposed rule would increase the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to growers. However, these costs would be offset by the benefits derived by the operation of the Order.

The Committee's meeting was widely publicized throughout the Oregon and Washington pear industry. All interested persons were invited to attend the meeting and encouraged to participate in Committee deliberations on all issues. Like all Committee meetings, the June 3, 2021, meeting was a public meeting, and all entities, both large and small, were able to express views on this issue. Interested persons are invited to submit comments on this proposed rule, including regulatory and information collection impacts of this action on small businesses.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581–0189, Fruit Crops. No changes in those requirements would be necessary as a result of this proposed rule. Should any changes become necessary, they would be submitted to OMB for approval.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large Oregon and Washington pear handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this proposed rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *https://www.ams.usda.gov/rules-regulations/moa/small-businesses.* Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 30-day comment period is provided to allow interested persons to respond to this proposed rule. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 927

Marketing agreements, Pears, Reporting and recordkeeping requirements.

For reasons set forth in the preamble, 7 CFR part 927 is proposed to be amended as follows:

PART 927—PEARS GROWN IN OREGON AND WASHINGTON

■ 1. The authority citation for 7 CFR part 927 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. In § 927.236, revise the introductory text and paragraphs (a) and (b) to read as follows:

§ 927.236 Fresh pear assessment rate.

On and after July 1, 2021, the following base rates of assessment for fresh pears are established for the Fresh Pear Committee:

(a) $0.468 per 44-pound net weight standard box or container equivalent for any or all varieties or subvarieties of fresh pears classified as ''summer/fall'';

(b) $0.468 per 44-pound net weight standard box or container equivalent for any or all varieties or subvarieties of fresh pears classified as ''winter''; and

* * * * *

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

RIN 2120–AA64

Airworthiness Directives; Bell Textron Inc. (Type Certificate Previously Held by Bell Helicopter Textron Inc.) Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2021–15–51, which applies to Bell Textron Inc. (type certificate previously held by Bell Helicopter Textron Inc.) Model 204B, 205A, 205A–1, 205B, and 212 helicopters. AD 2021–15–51 requires removing certain main rotor hub strap pins (pin) from service and prohibits installing them on any helicopter. Since the FAA issued AD 2021–15–51, it was determined that a defective pin could also be installed on Bell Textron Inc. Model 210 helicopters. This proposed AD would continue to require the actions in AD 2021–15–51 and expand the applicability to add Model 210 helicopters. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 20, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5

p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Bell Textron, Inc., P.O. Box 482, Fort Worth, TX 76101; telephone (450) 437–2862 or (800) 363–8023; fax (450) 433–0272; email *productsupport@bellflight.com;* or at *https://www.bellflight.com/support/contact-support.* You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1003; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: David Wilson, Aerospace Engineer, DSCO Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5786; email *david.wilson@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2021–1003; Project Identifier AD–2021–01141–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to David Wilson, Aerospace Engineer, DSCO Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5786; email *david.wilson@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued Emergency AD 2021–15–51 on July 6, 2021, and it published as a Final rule; request for comments on August 9, 2021 as Amendment 39–21678 (86 FR 43406) (AD 2021–15–51). AD 2021–15–51 applies to Bell Textron Inc., Model 204B, 205A, 205A–1, 205B, and 212 helicopters with a pin part number (P/N) 204–012–104–005 with a serial number (S/N) prefix ''FNFS'' installed. AD 2021–15–51 requires removing from service all P/N 204–012–104–005 pins with an S/N prefix ''FNFS'' before further flight and prohibits installing an affected pin on any helicopter as of the effective date of the AD. AD 2021–15–51 was prompted by a fatal accident of a Model 212 helicopter in which a pin P/N 204–012–104–005 with an S/N prefix ''FNFS'' sheared off during flight, which resulted in the main rotor blade and the main rotor head detaching from the helicopter. The pin had accumulated only 20 total hours time-in-service (TIS). An inspection of a different Model 212 helicopter revealed that another pin installed, and made by the same manufacturer and with the same S/N prefix, was deformed; this pin had accumulated only 29 total hours TIS. Pins of the same P/N can also be installed on Bell Textron Inc., Model 204B, 205A, 205A–1, 205B, and 210 helicopters. Failure of the pin could result in the main rotor blade detaching from the helicopter and subsequent loss of control of the helicopter.

Actions Since AD 2021–15–51 Was Issued

Since the FAA issued AD 2021–15–51, it was determined that pin P/N 204–012–104–005 with S/N prefix ''FNFS'' can also be installed on Model 210 helicopters. Additionally, the FAA discovered that an incorrect U.S. fleet count was provided in the Costs of Compliance section of AD 2021–15–51. This proposed AD corrects that count and adds Model 210 helicopters to that count. Additionally, while AD 2021–15–51 was initially issued as an emergency AD and then published in the **Federal Register** as a Final rule; request for comments, the FAA has determined that an NPRM is appropriate to add the Model 210 helicopter to the applicability. Even though the unsafe condition exists, the four Model 210 helicopters on the U.S. Registry do not currently have an affected pin installed making immediate adoption of an AD to add the Model 210 helicopter to the applicability without providing an opportunity for public comments prior to adoption unnecessary.

Lastly, service information discussed in AD 2021–15–51 has been revised to include updated warranty information and additional accomplishment instructions for disposing of the affected pins, therefore, this proposed AD discusses this revised service information.

The FAA is proposing this AD to address the unsafe condition on these products.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type designs.

Related Service Information

The FAA reviewed the following Bell Alert Service Bulletins (ASBs), each Revision A and dated July 22, 2021:

- ASB 204B–21–74 for Model 204B helicopters, S/Ns 2001 through 2070 and 2196 through 2199;
- ASB 205–21–117 for Model 205A and 205A–1 helicopters, S/Ns 30001 through 30065, 30067 through 30165, 30167 through 30187, 30189 through 30296, and 30298 through 30332;
- ASB 205B–21–71 for Model 205B helicopters, S/Ns 30066, 30166, 30188 and 30297;
- ASB 210–21–14 for all Model 210 helicopters, and

• ASB 212–21–165 for Model 212 helicopters, S/Ns 30501 through 30999, 31101 through 31311, 32101 through 32142, and 35001 through 35103.

The ASBs specify removing all P/N 204–012–104–005 pins with an S/N prefix ''FNFS'' before further flight. The ASBs also specify that, although the investigation is still in progress, removing these pins from service is required. The ASBs state that these pins may not have been manufactured in accordance with the engineering design requirements and may therefore shear as a result of this nonconformance.

Proposed AD Requirements in This NPRM

This proposed AD would retain all of the requirements of AD 2021–15–51. This proposed AD would apply to all helicopters that were affected by AD 2021–15–51 and would add Model 210 helicopters to the applicability.

Interim Action

The FAA considers that this proposed AD would be an interim action. If final action is later identified, the FAA might consider further rulemaking.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 155 helicopters of U.S. Registry. Labor rates are estimated at $85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this proposed AD.

Replacing up to four pins would take about 20 work-hours and parts would cost about $1,756 for four pins for an estimated cost of up to $3,456 per helicopter, and up to $535,680 for the U.S. fleet.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive AD 2021–15–51, Amendment 39–21678 (86 FR 43406, August 9, 2021); and

■ b. Adding the following new airworthiness directive:

Bell Textron Inc. (Type Certificate Previously Held By Bell Helicopter Textron Inc.): Docket No. FAA–2021–1003; Project Identifier AD–2021–01141–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) action by December 20, 2021.

(b) Affected ADs

This AD replaces AD 2021–15–51, Amendment 39–21678 (86 FR 43406, August 9, 2021) (AD 2021–15–51).

(c) Applicability

This AD applies to Bell Textron Inc. (type certificate previously held by Bell Helicopter Textron Inc.) Model 204B, 205A, 205A–1, 205B, 210, and 212 helicopters, certificated in any category, with an outboard main rotor hub strap pin (pin) part number 204–012–104–005 with a serial number prefix ''FNFS'' installed.

(d) Subject

Joint Aircraft System Component (JASC) Code: 6200, Main Rotor System.

(e) Unsafe Condition

This AD was prompted by a fatal accident in which a pin sheared off during flight, which resulted in the main rotor blade and the main rotor head detaching from the helicopter. The FAA is issuing this AD to address this unsafe condition and prevent loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) For Model 204B, 205A, 205A–1, 205B, and 212 helicopters:

(i) Before further flight from August 24, 2021 (the effective date of AD 2021–15–51), remove from service any pin that is identified in paragraph (c) of this AD.

(ii) After August 24, 2021 (the effective date of AD 2021–15–51), do not install any pin that is identified in paragraph (c) of this AD on any helicopter.

(2) For Model 210 helicopters:

(i) Before further flight after the effective date of this AD, remove from service any pin that is identified in paragraph (c) of this AD.

(ii) As of the effective date of this AD, do not install any pin that is identified in paragraph (c) of this AD on any helicopter.

(h) Special Flight Permits

Special flight permits are prohibited.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, DSCO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the DSCO Branch, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: *9-ASW-190-COS@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

For more information about this AD, contact David Wilson, Aerospace Engineer,

DSCO Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5786; email *david.wilson@faa.gov.*

Issued on November 14, 2021.

Ross Landes,

Deputy Director for Regulatory Operations, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2021–0956; Airspace Docket No. 21–ANM–41]

RIN 2120–AA66

Proposed Modification of Class E Airspace; Gold Beach Municipal Airport, OR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace at Gold Beach Municipal Airport, Gold Beach, OR. This action would ensure the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before January 3, 2022.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1–800–647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2021–0956; Airspace Docket No. 21–ANM–41, at the beginning of your comments. You may also submit comments through the internet at *https://www.regulations.gov.*

FAA Order JO 7400.11F, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *https://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. FAA Order JO 7400.11F is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order JO 7400.11F at NARA, email *fr.inspection@nara.gov* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FOR FURTHER INFORMATION CONTACT: Matthew Van Der Wal, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3695.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify the Class E airspace at Gold Beach Municipal Airport, Gold Beach, OR, to support IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2021–0956; Airspace Docket No. 21–ANM–41''. The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *https://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *https://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace, extending upward from 700 feet above the surface, at Gold Beach Municipal Airport, OR. This airspace is designed to contain arriving IFR aircraft descending below 1,500 feet above the surface and departing IFR aircraft until reaching 1,200 feet above the surface. To properly contain IFR operations at the airport, the radius of the airspace should be increased from ''6.3 miles'' to ''7.2 miles'' and the extension northwest of the airport should be removed. Additionally, terminal IFR operations east of the airport are not authorized, due to terrain. Because of this limitation, a portion of the Class E airspace east of the airport should be removed.

Class E5 airspace designations are published in paragraphs 6005 of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14

CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM OR E5 Gold Beach, OR

Gold Beach Municipal Airport, OR
(Lat. 42°24′55″ N, long. 124°25′30″ W)

That airspace extending upward from 700 feet above the surface within an area beginning at 7.2 miles on the 010° bearing from the airport, then to a point at 7.2 miles on the 160° bearing from the airport, then within a 7.2-mile radius of the airport clockwise to the point of beginning 7.2 miles north of the airport.

Issued in Des Moines, Washington, on November 15, 2021.

B.G. Chew,

Acting Group Manager, Operations Support Group, Western Service Center.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

14 CFR Part 382

[Docket No. DOT–OST–2019–0180]

Accessible Lavatories on Single-Aisle Aircraft: Part 1; Reopening of Comment Period and Public Meeting

AGENCY: Office of the Secretary (OST), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking; reopening of comment period; public meeting; request for public comments.

SUMMARY: The U.S. Department of Transportation (Department or DOT), jointly with the Architectural Transportation Barriers and Compliance Board (Access Board or Board), is hosting a public meeting, to be held virtually, on a DOT notice of proposed rulemaking (NPRM) issued on January 2, 2020, and on Access Board's proposed advisory guidelines for aircraft onboard wheelchairs issued on August 20, 2019. The NPRM proposed specific measures for improving accessibility of lavatories on single-aisle aircraft for passengers with disabilities. The public meeting will focus on one aspect of this NPRM—improvements to the aircraft's onboard wheelchair (OBW). The meeting will also serve as a means for the Access Board to gather additional information on onboard wheelchair loads and onboard wheelchair casters before finalizing its advisory guidelines for aircraft onboard wheelchairs, which potentially could be a means of complying with OBW performance standards established by the Department. A Notice relating to this joint public meeting and the Access Board's reopening of the comment period for its OBW guidelines is published elsewhere in this issue of the **Federal Register**.

DATES:

Public Comments—The comment period on the proposed rule published at 85 FR 27 (Jan. 2, 2020) is reopened from December 16, 2021 (date of public meeting) to January 17, 2022.

Public Meeting—The virtual public meeting is scheduled for December 16, 2021, from 9:30 a.m. to 11:30 a.m. and from 1 p.m. to 3 p.m., Eastern Time. Requests to attend the meeting must be received by December 9, 2021. Communication access real-time translation and sign language interpretation will be provided, but requests for additional accommodations because of a disability must be received by December 9, 2021. Requests to submit written materials to be reviewed during the meeting must also be received no later than December 9, 2021. If you wish to speak during the meeting, you must submit a request by December 9, 2021. See below, **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT**, for the point of contacts for these requests.

ADDRESSES:

Public Meeting—Requests to attend the meeting must be submitted to *https://usdot.zoomgov.com/webinar/register/WN_8PChAZcLQsmDm1xathLEjw.* Requests for additional accommodations because of a disability must be submitted to *OBWpublicmeeting@dot.gov.* Requests to submit written materials to be reviewed during the meeting must be submitted to *OBWpublicmeeting@dot.gov.* If you wish to speak during the meeting, you must submit a request to DOT at *OBWpublicmeeting@dot.gov.* The virtual meeting will be open to the public, subject to any technical and/or capacity limitations, and held via the Zoom Webinar Platform. Virtual attendance information will be provided upon registration. An agenda will be provided to registered participants and placed in the docket in advance of the meeting.

Public Comments—You may file comments identified by docket number DOT–OST–2019–0180 by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building

Ground Floor, Room W12–140, Washington, DC 20590–0001.

- *Fax:* (202) 493–2251.

Instructions: You must include the agency name and docket number DOT–OST–2019–0180 or the Regulatory Identification Number (RIN) for the rulemaking at the beginning of your comment. All comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* and follow the online instructions for accessing the dockets.

FOR FURTHER INFORMATION CONTACT: To register and attend this virtual meeting, please contact the Department at: *https://usdot.zoomgov.com/webinar/register/WN_8PChAZcLQsmDm1xathLEjw.* For further information, contact Robert Gorman, DOT Senior Attorney at *robert.gorman@dot.gov* or 202–366–9342. You may also contact Wendy Marshall of the Access Board by email at *marshall@access-board.gov.*

SUPPLEMENTARY INFORMATION:

Background

In April 2016, the Department established and appointed members to the Advisory Committee on Accessible Air Transportation (ACCESS Advisory Committee or Committee) to negotiate and develop proposed regulations addressing, among other things, accessible lavatories on single-aisle aircraft.[1] During the first meeting, the Department committed to the Committee that if it came to a consensus on the terms of a proposed rule and the Department does not cast a dissenting vote on the consensus product, the Department would exercise good faith efforts to issue a proposed rule reflecting that consensus to the extent possible. The Committee gathered data, conducted meetings and site visits, and engaged in negotiations from May 2016 through November 2016.

On November 22, 2016, the ACCESS Advisory Committee reached consensus on recommendations for new regulatory proposals to improve the accessibility of lavatories on single-aisle aircraft and the Department did not cast a dissenting vote.[2] The accessible lavatory Term Sheet included agreements for both short-term and long-term accessibility improvements. The short-term improvements would be required on new single-aisle aircraft delivered three years after the effective date of the DOT final rule that implements the agreement. The short-term improvements included a proposed requirement that single-aisle aircraft with 125 or more passenger seats would have at least one lavatory with a number of accessibility features, including accessible door locks, flush handles, call buttons, faucets, and assist handles. Single-aisle aircraft with 125 or more passenger seats would also be required to include an OBW that: (1) Permits passage in the aircraft aisle; (2) fits within an available certificated OBW stowage space; and (3) accomplishes its functions without requiring modification to the interior arrangement of the aircraft or the lavatory. The Term Sheet called on the Department to ''consult with advocates, airlines, aircraft manufacturers, manufacturers of OBW, flight attendant association(s) and other stakeholders in developing these standards,'' and to ''include the proposed new standards for an OBW and replacement of OBW on existing aircraft as described above in its notice of proposed rulemaking.'' [3]

The Department determined that the most appropriate method for developing initial OBW design standards was to seek technical assistance from the Access Board.[4] The Access Board is a Federal agency that specializes in producing accessibility guidelines and standards for the built environment, transportation systems, information and communication technology, and medical diagnostic equipment. On August 20, 2019, the Access Board published in the **Federal Register** ''Proposed Advisory Guidelines for Aircraft Onboard Wheelchairs,'' and sought public comment.[5] The Access Board's guidelines provide design criteria for onboard wheelchair seats, back support, armrests, footrests, movement, stowage, stability, loads, caster wheels, assist handles, and torso and leg restraints. These guidelines provided for the OBW to be backed fully into the lavatory and positioned over the closed toilet so that the lavatory door can be completely closed. The guidelines also provided for the OBW to be maneuvered partially into lavatories in a forward direction to allow users the option to make a stand-and-pivot transfer to the toilet.

The Access Board held a public hearing on these advisory guidelines on September 12, 2019. In response to its proposed guidelines, the Access Board received over 40 comments from various interest groups and stakeholders, including people with disabilities, advocacy groups, aircraft manufacturers, trade associations, manufacturers of onboard wheelchairs, researchers, and others.[6]

On January 2, 2020, the Department published a notice of proposed rulemaking (NPRM) titled ''Accessible Lavatories on Single-Aisle Aircraft: Part 1.'' [7] This NPRM included proposals for short-term improvements to lavatory accessibility, including new proposed requirements for OBWs. In developing its own proposed rules for OBWs, the Department started with the Access Board's design-based guidelines and adapted them into more flexible performance standards. The performance standards were designed to allow manufacturers to find efficient and innovative means for meeting performance expectations. At the same time, the proposed rule states that airlines may use the Access Board's advisory guidelines for technical assistance in furnishing an OBW that meets the Department's performance standards.

Under the proposed rule, OBWs meeting the new standards must be installed on new single-aisle aircraft with an FAA-certificated maximum capacity of 125 seats or more that enter service three years after the effective date of a final rule issued by the Department in this proceeding. The proposed rule would require the OBW to be designed in such a manner as to enable the OBW to completely enter the lavatory in a backward orientation. Specifically, the proposed rule would require the OBW to fit over the closed toilet lid in a manner that permits the lavatory door to close completely. It is anticipated that the attendant would push the OBW backward into the lavatory by means of handles on the front of the OBW. After the OBW is situated over the closed toilet lid, the

[1] A full list of ACCESS Advisory Committee members and other information on the Committee may be found at *https://www.transportation.gov/access-advisory-committee;* see also *https://www.regulations.gov/docket?D=DOT-OST-2015-0246* (ACCESS Advisory Committee docket).

[7] See 85 FR 27; *https://www.federalregister.gov/documents/2020/01/02/2019-27631/accessible-lavatories-on-single-aisle-aircraft-part-1.*

door would be closed and the passenger would be able to perform non-toileting lavatory functions in privacy.

The proposed rule would also require that the OBW be designed such that it could, at a minimum, partially enter the lavatory in a forward orientation. The purpose of this provision is to facilitate a stand-and-pivot maneuver from the OBW to the toilet seat, for passengers who are able to do so. With a stand-and-pivot maneuver, the passenger would partially enter the lavatory by means of the OBW, stand up, and pivot 180 degrees to reach the toilet seat.

The proposed OBW rule also contained safety elements. For example, the proposed rule would require that the height of the OBW seat must align with the height of the aircraft seat to the maximum extent practicable, in order to permit a safe transfer between the OBW and the aircraft seat. The proposed rule would require the wheels of the OBW to lock in the direction of travel, in order to avoid contact with aircraft seats and other obstructions as it moves down the aisle. Any other moving parts of the OBW would need to be capable of being secured such that they do not move while the occupied onboard wheelchair is being maneuvered. The wheels would also be required to lock in place so as to provide stability during transfers. The OBW would be required not to tip or fall in any direction under normal operating conditions when occupied for use.

The OBW would also be required to have a padded seat and backrest, in order to preserve skin integrity, and to prevent spasticity and injury.[8] The proposed rule would also require the OBW to be free of sharp or abrasive components. The OBW would also be required to have arm supports that are sufficient to facilitate transfers; arm supports that are repositionable to permit unobstructed transfers between the OBW and the aircraft seat; torso and leg restraints to ensure stability and prevent injury; as well as a unitary foot support that would provide adequate clearance over the lavatory threshold and also allow for an unobstructed transfer between the OBW and the lavatory. Under the proposed rule, restraints would be operable by the passenger in order to permit the passenger the option to adjust the restraints unassisted. Finally, the proposed rule would require the OBW to have instructions prominently displayed for proper use.

In keeping with the ACCESS Advisory Committee's Term Sheet, airlines would not be required to modify aircraft interiors, including lavatories and existing OBW stowage spaces, in order to comply with these OBW provisions. The Department sought comment on all aspects of this critical issue of OBW stowage space. Specifically, the Department sought further data regarding: (1) The folded dimensions of OBWs currently in use on single-aisle aircraft; (2) the locations and dimensions of current OBW stowage spaces; and (3) the feasibility of designing and constructing an OBW that meets the listed performance standards, particularly including the ability to enter the lavatory in a backward orientation, while fitting into the existing OBW stowage space for that aircraft. The Department also sought comment on an alternative proposal: Whether to require OBWs to meet the new performance standards set forth in the NPRM even if stowage space must be expanded to accommodate the OBW. The Department sought comment on the costs of expanding OBW stowage spaces to meet these performance standards.

Again in keeping with the ACCESS Advisory Committee's Term Sheet, the proposed rule provided that an airline would not be responsible for the failure of third parties to furnish an OBW that complies with these proposed standards, so long as the airline notifies and substantiates to the Department the efforts it expended to obtain compliant OBWs. The Department recognized that, at present, no commercially available OBW exists that permits backward passage into an aircraft lavatory, and that while airlines may seek to procure an OBW that meets the Department's performance standards, airlines do not design or produce OBWs themselves.[9]

Finally, the proposed rule provided that if an airline replaces an OBW on an aircraft with an FAA-certificated maximum capacity of 125 seats or more three years after the effective date of the rule, then the replacement OBW must comply with DOT's new OBW standards. The Department sought comment on all aspects of the OBW proposal, including costs, benefits, and feasibility.

The comment period to the NPRM closed on March 2, 2020. The Department received relatively few comments about OBW design, and almost no comments that estimated the costs of developing or manufacturing an OBW that would comply with the standards set forth in the proposed rule. Certain disability advocates argued, among other things, that the Department's OBW standards should have tracked more closely the Access Board's design standards.[10] Representatives of the airline industry contended that the Department failed to take into account considerations such as aviation safety and the impact on flight attendants of unpacking, using, and stowing the OBW while in flight.[11] They also argued that the Department failed to adequately consult with stakeholders before issuing its OBW proposal.[12] The Department received no comments from OBW manufacturers.

Announcement of Public Meeting

Under these circumstances, the Department is of the view that it is appropriate to hold a public hearing to gather additional information on all aspects of OBW design before issuing any final binding regulation on the topic. The Department also finds that the public meeting will be an appropriate vehicle for the Access Board to gather additional information before it finalizes advisory guidelines for OBWs.

Questions Relating to DOT's NPRM Regarding OBW Design

The Department seeks further information on all aspects of its NPRM relating to OBW design, including but not limited to:

- Whether the proposed OBW design elements adequately address accessibility concerns;
- The cost and feasibility of designing, manufacturing, and implementing compliant OBWs;
- The cost of developing and implementing procedures for training

[8] DOT specifically sought comment on whether the proposed rule text adequately conveys the degree of back support and seat support necessary to properly accommodate passengers with disabilities, and if not, whether additional standards should be specified.

[9] The Department sought comment on whether there should be a deadline for an airline to notify the Department that the airline has expended its efforts to obtain compliant OBWs, and if so, how many days after an airline becomes aware of such commercial unavailability (*e.g.,* 30 days) would be appropriate for airlines to notify the Department. The Department also recognized the uncertainties surrounding the issue of whether OBWs meeting the Department's new standards can fit within existing OBW stowage spaces. The intent of the proposal was to encourage innovation in meeting the proposed standards by affirmatively requiring airlines to engage in reasonable efforts to obtain compliant OBWs from third parties. The Department sought comment on whether the ''reasonable efforts'' clause is the most appropriate means of reaching the overarching goal of ensuring that OBWs with the new accessibility features are acquired.

[10] See, *e.g.,* Comment of Paralyzed Veterans of America, *https://www.regulations.gov/comment/DOT-OST-2019-0180-0335,* at 5.

[11] See, *e.g.,* Comment of Airlines for America, *https://www.regulations.gov/comment/DOT-OST-2019-0180-0337,* at 2–3.

[12] Id.

crew in unloading, using, and stowing the OBW;

- The dimensions of current OBW stowage spaces in single-aisle aircraft;
- Whether OBWs that meet the Department's proposed accessibility standards can be stowed in existing stowage spaces; and
- Aviation safety considerations relating to unloading, using, and stowing the OBW while in flight.

We specifically invite disability advocates, airlines, aircraft manufacturers, manufacturers of OBWs, flight attendant associations, and other stakeholders to participate in the public meeting. We also encourage stakeholders and participants to file written materials in the docket when the comment period reopens, which will be from December 16, 2021 (date of public meeting) to January 17, 2022. The Department considers this public meeting, along with its prior actions in this matter, to satisfy the consultation provisions set forth in the ACCESS Advisory Committee's Term Sheet.

Questions Relating to Access Board's Proposed Voluntary Design Standards

As stated earlier, the public meeting will also allow the Access Board to gather additional information regarding its advisory guidelines containing recommended dimensions and other technical specifications for a comfortable and functional aircraft onboard wheelchair. More specifically, the Access Board is seeking additional information regarding onboard wheelchair loads and onboard wheelchair casters.

Onboard Wheelchair Loads

The overall weight capacity or load of current onboard wheelchairs varies greatly and ranges from approximately 200 to 800 pounds. In trying to determine the appropriate load, the Board looked to its *Guidelines for Aircraft Boarding Chairs* (1987), which recommends that seats support at least 723 pounds (weight of a 99th percentile male with a 3.0 safety factor). See *https://www.access-board.gov/research/completed-research/guidelines-for-aircraft-boarding-chairs.* Using updated anthropometrics, the weight of a 99th percentile male with a 3.0 safety factor would be 826 pounds. See Department of Health and Human Service Centers for Disease Control and Prevention's Anthropometric Reference Data for Children and Adults: United States, 2011–2014, Table 6, Line 1 (Aug. 2016). However, the boarding chair (used to transfer a passenger from their personal wheelchair to the airplane seat) is different than the proposed onboard wheelchair, in that a boarding chair does not need to fold for storage on the aircraft or require a cantilever design.

The Board is not aware of existing industry standards for onboard wheelchairs that are designed to allow over-the-toilet positioning. In its proposal, it reserved provisions for loads pending further information as to what loads are appropriate for an onboard wheelchair design that accomplishes the proposed functions.

Comments from the public, including aircraft manufacturers, recommended that the Board's guidelines reference load specifications in standards issued by SAE International, ''Foldable On-Board Wheelchairs for Passengers with Disabilities,'' ARP 4120C (Stabilized 2013).'' The SAE standard specifies loads for onboard wheelchair seats, seat backs, arm and foot supports, wheels, and assist handles. These referenced provisions are publicly available (read-only, not for distribution) until the close of the comment period on January 17, 2022, on SAE International's website at: *https://www.sae.org/binaries/content/assets/cm/content/standards/arp4120c_review.pdf.*

Based on its review of the comments on the proposed guidelines, the Board is considering referencing the SAE International's standard for loads for seats (3.2.9.1), arm supports (3.2.9.3), foot support (3.2.9.4), casters (3.2.9.2), and assist handles of onboard wheelchairs (3.2.9.6). The Board seeks comment on whether the loads specified in the SAE International ARP 4120C Standard are appropriate for an onboard wheelchair design that allows the chair to be positioned over the closed lavatory toilet. Alternatively, what other loads should be specified?

Onboard Wheelchair Casters (Size)

The guidelines require that caster wheels of onboard wheelchairs move independently to facilitate maneuvering within the confined space of aircraft aisles and lavatories. For safety and stability, the guidelines also require each caster to have wheel locks and swivel locks. In its proposal, the Board sought comment on whether the guidelines should specify a minimum size for caster wheels so that they are large enough to readily travers thresholds at lavatory entrances. Most commenters recommended that the guidelines specify a performance requirement instead of a minimum caster size. However, the impact of thresholds may be significant since the front assist handles will be used to back occupied onboard wheelchairs into lavatories and to pull them back out. What is the minimum caster wheel diameter that would ensure stability of the occupied onboard wheelchair and allow the chair to easily traverse the lavatory doorway threshold pushing it in and pulling it out of lavatories using only the front assist handles? The Board also requests information on the standard height of lavatory thresholds on single-aisle aircraft with 125 or more passenger seats.

Electronic Submission of Applications for Orders Under the Advisers Act and the Investment Company Act, Confidential Treatment Requests for Filings on Form 13F, and Form ADV–NR; Amendments to Form 13F

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Securities and Exchange Commission is proposing amendments to rules to convert the filing of certain applications, confidential treatment requests, and forms from paper to electronic submission. Specifically, we propose to amend our rules to require that the following types of filings be submitted via our Electronic Data Gathering, Analysis, and Retrieval (''EDGAR'') system: Applications for orders under any section of the Investment Advisers Act of 1940 (''Advisers Act'') and confidential treatment requests for filings made under section 13(f) of the Securities Exchange Act of 1934 (''Exchange Act''). We also propose rule amendments to harmonize the requirements for the submission of applications for orders

under the Advisers Act and the Investment Company Act of 1940 (''Investment Company Act''). In addition, we propose to amend other rules and a form to require the electronic submission of Form ADV–NR through the Investment Adviser Registration Depository (''IARD'') system. We also propose to require non-resident general partners and non-resident managing agents to amend their Form ADV–NR within 30 days whenever any information contained in the form becomes inaccurate by filing with the Commission a new Form ADV–NR. Further, we are re-proposing amendments to Form 13F to require managers to provide additional identifying information. Finally, we are re-proposing certain technical amendments to Form 13F, including modernizing the structure of data reporting and amending the instructions on Form 13F for confidential treatment requests in light of a recent decision of the U.S. Supreme Court.

DATES: Comments should be received on or before December 20, 2021.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/submitcomments.htm*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number S7–15–21 on the subject line.

Paper Comments

- Send paper comments to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–15–21. This file number should be included on the subject line if email is used. To help us process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's website (*http://www.sec.gov/rules/proposed.shtml*). Comments are also available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Operating conditions may limit access to the Commission's public reference room. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

Studies, memoranda, or other substantive items may be added by the Commission or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the Commission's website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

FOR FURTHER INFORMATION CONTACT: Zeena Abdul-Rahman, Senior Counsel, Sara Cortes, Senior Special Counsel, Investment Company Rulemaking Office, at (202) 551–6792; or Alexis Palascak, Senior Counsel, Investment Adviser Regulation Office, at (202) 551–6787 or *IM-Rules@sec.gov,* Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is proposing amendments to 17 CFR 232.11 (''rule 11''), 17 CFR 232.100 (''rule 100''), 17 CFR 232.101 (''rule 101''), 17 CFR 232.102 (''rule 102''), and 17 CFR 232.201 (''rule 201'') of Regulation S–T relating to electronic filing on the EDGAR system; 17 CFR 275.0–4 (''rule 0–4'') and 17 CFR 275.203–1 (''rule 203–1'') under the Advisers Act; 17 CFR 279.4 (''Form ADV–NR'') and the instructions to 17 CFR 279.1 (''Form ADV'') under the Advisers Act; 17 CFR 270.0–2 (''rule 0–2'') under the Investment Company Act; 17 CFR 240.24b–2 (''rule 24b–2'') under the Exchange Act; and 17 CFR 249.325 (''Form 13F'').

I. Background

The Commission seeks to promote efficiency, transparency, and operational resiliency by modernizing the manner in which information is submitted to us and, where appropriate, disclosed to the public. Electronic filing improves our ability to achieve these goals. Specifically, electronic filing minimizes the risks of delay in staff receiving the information via paper submissions, and it increases efficiency in the staff review process by reducing staff processing time, increasing quality assurance, and improving the ability to review and analyze information contained in electronic submissions. In addition to increasing staff efficiency of review, publicly filed electronic submissions are more readily available on our website in easily searchable formats, which benefits both investors and the asset management industry.

In addition, electronic filing capabilities have proved to be an effective measure in addressing certain of the logistical and operational issues raised by the spread of coronavirus disease (''COVID–19''). We believe that converting paper submissions to electronic submissions would allow the Commission, and those persons filing the submissions, to more effectively and efficiently navigate any future disruptive events—like COVID–19—that make the paper submission process unnecessarily burdensome, impractical, or unavailable. Further, we believe that the proposed electronic submission process better reflects the current business practices and operations of those persons that file the submissions and, as a result, would likely reduce the burden associated with submitting such filings. These benefits are among the reasons that the Commission has

transitioned filings from paper to electronic format in many contexts.[1]

We are proposing to require electronic filing of applications for orders under any section of the Advisers Act,[2] and of confidential treatment requests for filings made under section 13(f) of the Exchange Act (''13(f) Confidential Treatment Requests''). These filings would be required to be submitted through the EDGAR system.[3] In addition, we are re-proposing certain amendments to Form 13F that we originally proposed in July 2020.[4] The Commission is not re-proposing the amendments to raise the reporting thresholds for Form 13F that were included in the 2020 Form 13F Proposal. As discussed further below, and consistent with the original proposal, we are proposing (i) a requirement for an institutional investment manager[5] (''manager'') that files Form 13F to provide certain identifying information, (ii) certain technical amendments to modernize the information reported on Form 13F, consistent with its existing structured eXtensible Markup Language (''XML'') format, and (iii) a modification to instruction 2.d. of Form 13F's Confidential Treatment Instructions to update that instruction and make it consistent with a recent U.S. Supreme Court decision.[6] We also are proposing other rule amendments to harmonize the requirements for submission of applications for orders under the Advisers Act and the Investment Company Act.

Finally, we are proposing to require the electronic submission of Form ADV–NR by non-resident general partners and non-resident managing agents of investment advisers (domestic or non-resident) registered with the Commission. Form ADV–NR is filed in connection with an adviser's initial Form ADV submission and requires a non-resident general partner or managing agent of an investment adviser to appoint an agent for service of process in the United States.[7] Under the proposed amended rules, filers would be required to submit Form ADV–NR through the IARD system.

II. Discussion

A. Applications

1. Electronic Filing

Section 206A of the Advisers Act gives the Commission the authority to provide exemptions from any provision of the Advisers Act or any rule or regulation thereunder, provided the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Advisers Act.[8] Applicants seeking an exemption must apply to the Commission to obtain an order.[9] The processes for submitting an application are addressed in Advisers Act rule 0–4[10] and Commission Guidelines issued in 1985 (''1985 Release'').[11] Since the 1985 Release, the process for handling exemptive applications in the Division of Investment Management (''Division'') has evolved. While an applicant seeking Investment Company Act relief submits its application electronically to the Commission via EDGAR, an applicant seeking Advisers Act relief submits its application, as well as a proposed notice of application, in paper and in quintuplicate.[12] The paper copies of the applications are delivered to the Commission's mailroom for stamping, logging, and ultimately for routing to the Division staff. Staff then create a notification in the EDGAR system in order to assign an appropriate file number, manually upload the application onto our public website, and process the application for internal tracking. The current manual process for submitting and handling Advisers Act applications creates inefficiencies in a number of ways, including those resulting from the absence in Advisers Act rule 0–4 of a specific addressee at the Commission for applications.[13]

Moreover, in order to achieve an expeditious review of an application, applicants often, to the extent possible, adhere to applicable precedent and address any differences from prior applications.[14] Applicants and staff, accordingly, rely on the ready availability of applications that have been evaluated by the Commission and its staff. Commission staff place the applications (including amendments, notices of applications, and the resulting orders) on the Commission's website in order to improve transparency and to facilitate this reliance. Unlike other filings made in EDGAR, Advisers Act applications are not readily available to the public upon submission; instead they require the staff actions described above to be posted.

Prior to the Commission amending its rules in 2008 to mandate electronic submission of applications for orders under any section of the Investment Company Act,[15] applicants filed their

[2] Applications for registration as an investment adviser under the Advisers Act and applications for withdrawal from registration are filed via IARD. *See* 17 CFR 275.203–1; 17 CFR 275.203–2. We are not proposing to alter these requirements.

[3] The EDGAR Filer Manual, which is promulgated by the Commission, sets out the technical formatting requirements for electronic submissions. *See* 17 CFR 232.301.

[4] *See* Reporting Threshold for Institutional Investment Managers, Exchange Act Release No. 89290 (July 10, 2020) [85 FR 46016 (July 31, 2020)] (''2020 Form 13F Proposal'').

[5] The term ''institutional investment manager'' includes any person, other than a natural person, investing in or buying and selling securities for its own account, and any person exercising investment discretion with respect to the account of any other person. *See* section 13(f)(6)(A) of the Exchange Act [15 U.S.C. 78m(f)(6)]. The term ''person'' includes any natural person, company, government, or political subdivision, agency, or instrumentality of a government. *See* section 3(a)(9) of the Exchange Act [15 U.S.C. 78c(3)(9)].

[6] *Food Marketing Institute* v. *Argus Leader Media,* 139 S.Ct. 2356 (2019) (overturning the longstanding interpretation set forth in *National Parks* v. *Morton,* 498 F.2d 765 (D.C. Cir. 1974) of ''confidential'' for purposes of FOIA exemption 4).

[7] *See* proposed amended rule 203–1(d) [17 CFR 275.203–1(d)]. The proposed amendments would continue to permit a paper filing of Form ADV–NR if a continuing hardship exemption is granted under Advisers Act rule 203–3(b) [17 CFR 275.203–3].

[8] *See* section 206A of the Advisers Act [15 U.S.C. 80b–6a].

[9] Possible applicants include, but are not limited to, registered investment advisers, exempt reporting advisers, and persons not registered with the Commission but who meet the definition of investment adviser under the Advisers Act.

[10] 17 CFR 275.0–4.

[11] Commission Policy and Guidelines for Filing of Applications for Exemption from Some or All of the Provisions of the Investment Company Act of 1940 and the Investment Advisers Act of 1940, Investment Advisers Act Release No. 969 (Apr. 30, 1985) (''1985 Release'').

[12] Pursuant to rule 0–4(b), every application for an order under any provision of the Advisers Act, for which a form with instructions is not specifically prescribed, and every amendment to such application shall (among other requirements) be filed in quintuplicate. 17 CFR 275.0–4(b). Rule 0–4(g) requires that a proposed notice of the proceeding initiated by the filing of the application accompany each application as an exhibit thereto. 17 CFR 275.0–4(g).

[13] Any delay between Commission receipt and receipt by the appropriate staff member means that there is delay in public availability of the application. We propose to designate the Secretary of the Commission as the addressee for paper applications for an order under both the Advisers Act and the Investment Company Act (*e.g.,* applications made in paper pursuant to a hardship exemption under Regulation S–T). *See infra* footnotes 33 and 34 and accompanying text.

[14] *See* 1985 Release, *supra* footnote 11 (discussing that applicants should recognize the differences between their proposal and prior applications requesting similar relief and, to the extent possible, bring their proposal within applicable precedent. Further, applicants should cite and discuss applicable precedent.).

[15] *See generally* Mandatory Electronic Submission of Applications for Orders under the Investment

Continued

applications for Investment Company Act orders in paper using a similar process as those seeking orders under the Advisers Act.[16] In our experience, the transition from paper to electronic filing of Investment Company Act applications has led to more streamlined and timely application processing. Commission staff have immediate access to an Investment Company Act application through EDGAR, eliminating the need for manually processing the application. The ability to review applications in EDGAR immediately creates internal efficiencies by shortening the time to create and maintain records as well. Additionally, the Commission has received applications from parties seeking relief under both the Advisers Act and the Investment Company Act that were unable to file a single application because of the current multiple-system requirements for the differing applications.[17] Our proposal would allow such applications to be filed jointly in a single submission.

The transition to electronic submission in the Investment Company Act context has led to increased transparency for filers seeking similar relief, who can now more easily search for and replicate (as appropriate) similar applications for an exemptive order.[18] Similarly requiring Advisers Act applications to be submitted electronically in EDGAR would benefit investors, applicants, and other interested parties by making information contained in these filings more readily and immediately available and more easily searchable. We also believe that making these filings and applications immediately available in electronic format in the EDGAR database would provide a more complete and more easily reviewable picture for the investing public, to the extent such applications might inform investors' decisions with respect to selection or retention of investment advisers.[19]

a. The EDGAR Filing System

While most electronic filings made with the Commission are filed via the EDGAR system,[20] investment advisers submit certain filings and reports electronically via the IARD system (including registration applications under the Advisers Act).[21] We are proposing, however, to require electronic submission of Advisers Act applications on EDGAR.[22] We do so for a number of reasons. First, the cost to advisers of submitting electronic applications through the EDGAR system would be relatively low.[23] Second, the EDGAR system should require fewer technological changes than IARD in order to accept Advisers Act applications, as it is already designed to accept Investment Company Act applications. Third, EDGAR would allow for applications under both the Investment Company Act and the Advisers Act to be made in a single filing.[24] Fourth, the process for filing applications under the Advisers Act on EDGAR would be consistent with the process for filing applications under the Investment Company Act, which we believe would facilitate internal processing efficiencies by Commission staff. Finally, we believe that having applications under both the Investment Company Act and the Advisers Act in the same system would increase transparency for the public as users would only need to learn how to access one system to locate all relevant applications.

b. Proposed Rule Amendments

We are proposing to amend certain rules of Regulation S–T[25] and Advisers Act rule 0–4 to require electronic filing on EDGAR of applications for an order under any section of the Advisers Act. Proposed amendments to rule 101(a)(1) of Regulation S–T would include within its mandatory electronic submissions any application for an order under any section of the Advisers Act.[26] Regulation S–T includes rules concerning mandatory and permissive electronic EDGAR submissions. It also generally requires the electronic filing of any amendments and related correspondence and supplemental information pertaining to a document that is the subject of mandated EDGAR submission.[27] Additionally, Regulation S–T generally requires exhibits to an electronic filing to be filed in electronic format, absent a hardship exemption.[28] The proposed amendments to these requirements would apply to persons who submit applications under the Advisers Act, as they do to persons who

Company Act and Filings Made Pursuant to Regulation E, Securities Act Release No. 8981 (Oct. 29, 2008) [73 FR 65516 (Nov. 4, 2008)] (''2008 IC Applications Release'').

[16] The amendments mandating electronic submission of Investment Company Act exemptive applications followed a report by the Commission's Office of Inspector General that recommended a transition to electronic submission of Investment Company Act applications. *See* IM Exemptive Application Processing, SEC Office of Inspector General, Audit Report No. 408, Recommendation B (Sept. 29, 2006).

[17] For such applications, the applications under the Investment Company Act were made in HTML on EDGAR, and the Advisers Act applications were submitted in paper.

[18] *See* Amendments to Procedures With Respect to Applications Under the Investment Company Act of 1940, Investment Company Act Release No. 33921 (July 6, 2020) [85 FR 57089 (Sept. 15, 2020)] (''2020 IC Applications Procedures Release'') (adopting amendments to rules under the Investment Company Act to establish an expedited review procedure for applications that are substantially identical to recent precedent as well as a rule to establish an internal timeframe for review of applications outside of such expedited procedure). We are not proposing to extend the rules adopted in the 2020 IC Applications Procedures Release to applications for exemptions from provisions of the Advisers Act.

[19] As noted above, because of the current manual process of categorizing and uploading Advisers Act applications, there can be a delay in making a paper application public. *See supra* at text accompanying footnote 13.

[20] This includes applications for orders under any section of the Investment Company Act as well as Regulation E filings of small business investment companies and business development companies. *See* 2008 IC Applications Release, *supra* footnote 15.

[21] *See e.g.,* 17 CFR 275.203–1 (application for investment adviser registration), 275.203–2 (withdrawal from investment adviser registration), 275.203–3 (hardship exemptions from the requirement to make Advisers Act filings electronically with IARD), and 275.204–4 (reporting by exempt reporting advisers).

[22] Although investment advisers register using the IARD system, some advisers may be familiar with the EDGAR system as a result of other required filings on EDGAR, such as certain filings made pursuant to sections 13 and 16 of the Exchange Act or registration statements filed on behalf of registered investment companies they manage. *See* 17 CFR 240.13f–1, 17 CFR 240.13d–1, 15 U.S.C. 78p(a).

[23] *See infra* at text accompanying footnote 143 and section IV.A (discussing the costs associated with submitting applications electronically).

[24] For applications with multiple co-applicants (*i.e.,* if certain applicants were included for Advisers Act relief and others were included for Investment Company Act relief), the applicants would be able to submit the application with all co-applicants included in one submission. The applicants would choose one applicant to list first as the ''primary'' co-applicant. Then, they would include in the EDGAR submission the information for all other co-applicants.

[25] 17 CFR 232.11, 232.100, 232.101, 232.102 and 232.201.

[26] *See* proposed section (a)(1)(xxiii) of rule 101 of Regulation S–T. As part of such changes, we are proposing to add the term ''Investment Advisers Act'' as a defined term in rule 11 of Regulation S–T, meaning the Investment Advisers Act of 1940. *See* proposed amendments to rule 11 of Regulation S–T; *see also infra* footnote 95 (discussing other proposed non-substantive conforming edits to rule 101 of Reg S–T).

[27] *See* rule 101(a)(1) of Regulation S–T [17 CFR 232.101(a)(1)]. Related correspondence and supplemental information are not automatically disseminated publicly through the EDGAR system but are immediately available to the Commission staff.

[28] *See* rule 102(a) of Regulation S–T [17 CFR 232.102(a)]. Proposed amendments to rule 102(a) of Regulation S–T would provide that previously filed exhibits, whether in paper or electronic format, may be incorporated by reference to the extent permitted by Advisers Act rule 0–6 [17 CFR 275.0–6]. *See* EDGAR Filer Manual, Volume II: ''EDGAR Filing'' (Version 57) (Mar. 2021) (''2021 EDGAR Filer Manual''), at Sections 2.1 (EDGAR Filing Process) and 5.2 (Document Formats).

submit applications under the Investment Company Act.[29]

Rule 0–4 generally prescribes requirements for filings made under the Advisers Act.[30] Proposed amendments to rule 0–4 would require that every application for an order under any provision of the Advisers Act, for which a form with instructions is not specifically prescribed, and every amendment to such application, be filed electronically pursuant to Regulation S–T.[31] Rule 0–4's specifications for the submission of paper applications would continue to apply for any remaining paper applications, such as filings made pursuant to a hardship exemption under Regulation S–T.[32] Although we anticipate paper submissions would be rare, we propose to amend rule 0–4 to require that the Secretary of the Commission be the designated addressee of such paper submissions.[33] We propose an identical clarifying change to designate the Secretary of the Commission as addressee of any remaining paper submissions under the Investment Company Act.[34]

c. Request for Comment

We request comment on our proposal to require that applications for orders under any section of the Advisers Act be submitted electronically via EDGAR.

1. Are there burdens or other issues related to electronic filing, as opposed to paper filing, that the Commission should consider with regard to applications for an order under the Advisers Act? Should we allow (but not require) electronic submission of such applications? Should certain types of Advisers Act applications be excluded from mandatory electronic submission? If so, which types of applications should be excluded?

2. Is the EDGAR system the appropriate system for Advisers Act applications? Should the Commission use, for example, the IARD system, or a secure file transfer system instead? Would requiring Advisers Act applications to be filed on IARD be more beneficial for investors and other market participants? If so, why? Alternatively, is there another method of electronic submission that is preferable? If so, please identify the method you believe we should adopt, why you believe it should be used, and the estimated costs of such system for filers.

3. Similar to many other provisions of Regulation S–T, including the provision for Investment Company Act applications, the proposed rule does not specify a particular filing format though we anticipate the filing format would be HTML or ASCII, like many other EDGAR filings, including Investment Company Act applications. What format or formats should the rule permit for filing of Advisers Act applications? Should the Commission require a single, specified format or permit filers to select a format among two or more possible formats? What time or expense is associated with particular formats? What time or expense would be required of the public to view documents in a particular format? Would a particular format require any filers or users to license commercial software they otherwise would not, and, if so, at what expense?

4. Is there any additional information that commenters can provide with respect to the difficulties and/or considerations unique to the proposed amendments? In the event that commenters believe that any aspect of the proposed amendments would affect the costs of filing or using the information, we ask for specific details, quantitative data, and alternative approaches.

2. Availability of Hardship Exemptions

a. General

Under the proposal, temporary hardship exemptions from electronic filing would not be available for applications for orders under the Advisers Act, but continuing hardship exemptions from electronic filing would be available. Rule 201 of Regulation S–T provides that if an electronic filer experiences unanticipated technical difficulties preventing the timely preparation and submission of an electronic filing, the electronic filer may file in paper format no later than one business day after the date on which the filing was to be made, subject to certain requirements and exclusions (''temporary hardship exemption''). This temporary hardship exemption is available automatically but must be followed by a confirming electronic copy within six business days. Currently, rule 201 does not address applications for orders under the Advisers Act because such applications are filed in paper rather than filed electronically. We are proposing to amend rule 201 so it would exclude applications for orders under the Advisers Act, as it does with applications for orders under the Investment Company Act.[35] As a result, temporary hardship exemptions would not be available for applications for orders under the Advisers Act, as is the case with applications for orders under the Investment Company Act. We believe that submission exigencies or submission deadlines associated with applications for orders under the Advisers Act would be rare.

A filer may apply for a continuing hardship exemption from electronic filing under rule 202 of Regulation S–T if it cannot file all or part of a filing without undue burden or expense.[36] A continuing hardship exemption may be granted for a limited time period or indefinitely. Time-limited continuing hardship exemptions may be conditioned upon filing the document in electronic format by a certain date. Continuing hardship exemptions would be available for applications for orders under the Advisers Act under rule 202, as it is currently written, without any amendments.

b. Request for Comment

We request comment on the availability of hardship exemptions.

5. Like applications for orders under the Investment Company Act, should a temporary hardship exemption not be available for applications for orders under the Advisers Act, as proposed? Why or why not? Could there be any submission exigency or submission deadline associated with applications for orders under the Advisers Act? If so, with what frequency might such exigency occur? Alternatively, should a temporary hardship exemption be available for applications for orders under the Investment Company Act or the Advisers Act? Why or why not?

6. Like applications for orders under the Investment Company Act, should a continuing hardship exemption be available for applications for orders under the Advisers Act, as proposed?

[29] In order to clarify that all applicants for an order under the Advisers Act (and not just registered investment advisers) are subject to Regulation S–T, we also propose to amend rule 100(b) to replace the term ''registrants'' and state that ''[p]ersons or entities'' whose filings are subject to review by the Division shall be subject to the electronic filing requirements of Regulation S–T. *See* proposed amendment to section (b) of rule 100 of Regulation S–T, the wording of which would conform to section (c) of the rule.

[30] *See* 17 CFR 275.0–4.

[31] *See* proposed amendment to Advisers Act rule 0–4(b).

[32] *See id.* Regulation S–T generally requires requests for confidential treatment of an application to be filed in paper, and it provides a process for seeking a continuing hardship exemption. *See* rule 101(c)(1)(i) [17 CFR 232.101(c)(1)(i)] (confidential treatment) and rule 202 [17 CFR 232.202] (continuing hardship exemption) of Regulation S–T.

[33] *See* proposed amendment to Advisers Act rule 0–4(a).

[34] *See* proposed amendment to Investment Company Act rule 0–2(a).

[35] *See* 2008 IC Applications Release, *supra* footnote 15.

[36] 17 CFR 232.202.

Should a continuing hardship exemption not be available for applications for orders under the Investment Company Act? Why or why not?

3. Elimination of Certain Requirements

a. General

We are proposing to amend rule 0–4 governing the form of applications under the Advisers Act to harmonize the requirements with the requirements for applications under the Investment Company Act and further reduce the burden of filing such applications.[37] First, we are proposing to eliminate the requirement to have verifications of applications and statements of facts made in connection with applications notarized.[38] We believe that this requirement is unnecessary in the context of these filings.[39] In the 2008 IC Applications Release, we removed the corresponding requirement for applications for an order under the Investment Company Act,[40] and we have not had significant issues or concerns with the removal of notarizations in that context. Second, we are proposing to eliminate the requirement that applicants include proposed notices as exhibits to applications.[41] This requirement was also removed for applications under the Investment Company Act in the 2008 IC Applications Release.[42] Moreover, the elimination of this requirement for applications submitted under the Investment Company Act has resulted in reduced filing burdens for applicants. Finally, we are removing the reference to microfilming in Advisers Act rule 0–4(b) and Investment Company Act rule 0–2(b), as the Commission no longer microfilms applications for an order under either Act.[43]

b. Request for Comment

We request comment on the proposed amendments to eliminate the notarization and proposed notice requirements for Advisers Act applications, to remove the reference to microfilming in Advisers Act rule 0–4 and Investment Company Act rule 0–2, and to revise the wording in Advisers Act rule 0–4(i) related to duplicate original copies in a paper applications.

7. Should we maintain any of these requirements that we are proposing to either modify or eliminate? Why or why not? Should we instead modify, or otherwise replace, any of these requirements with alternative and/or additional requirements? If so, how should we modify and/or supplement these requirements and/or what alternatives should the rule(s) require? If we make these, or other, modifications to the Advisers Act rules, should we also make the same, or similar, modifications to the analogous rules under the Investment Company Act? If so, please describe what, if any, modifications and/or differences we should include in any amendments made to the Investment Company Act rules.

8. What costs, benefits and/or other effects might be associated with the proposed modifications? Please describe how such costs, benefits or other effects relate to the current requirements of the proposed rule.

4. Form ADV–NR

a. General

Filing Form ADV–NR is mandatory for non-resident general partners and non-resident managing agents of investment advisers and must be filed in connection with an adviser's initial Form ADV submission.[44] The Commission collects this information to ensure that a non-resident general partner or managing agent of an investment adviser appoints an agent for service of process in the United States.[45] Currently, Form ADV–NR must be filed as a paper filing submission.[46] The Commission makes Form ADV–NR publicly available by posting an update to EDGAR indicating that the Commission received a Form ADV–NR filing. Members of the public can view such updates by searching for an adviser, and can use the information in the update to request the Form ADV–NR through a Freedom of Information Act (''FOIA'') request.[47]

We are proposing amendments to Advisers Act rule 203–1 to require investment advisers' non-resident general partners and non-resident managing agents to file Form ADV–NR electronically through IARD, which is the same system advisers use to file Form ADV.[48] We anticipate that IARD would present proposed Form ADV–NR in fillable format. Members of the public would be able to view Forms ADV–NR through the same system they view Forms ADV, which is the Investment Adviser Public Disclosures (IAPD), the public interface of IARD. We believe that requiring electronic submission of Form ADV–NR would enhance our ability to collect and access the information on the form and likely reduce the burden associated with filing and processing such forms. Furthermore, we believe that requiring electronic submission of Form ADV–NR would allow filers to more effectively and efficiently navigate future disruptive events—like COVID–19—when staff and filers are unable to access their physical work facilities to complete, submit and process paper fillings. The proposed amendments would still, however, permit those required to file Form ADV–NR to file the form via paper submission if granted a hardship exemption under rule Advisers Act rule 203–3.[49] The proposed amendments would, like the current rule, require (1) advisers, non-resident general partners and a non-resident managing agents to complete and file Form ADV–NR in connection with the adviser's initial registration with the Commission; and (2) a person who becomes a non-resident general partner or a non-resident managing agent after the date the adviser files its

[37] We also propose to correct a typo in [17 CFR 275.0–4(i)] (Advisers Act rule 0–4(i)) concerning duplicate original copies in paper applications (concerning the singular and plural of ''original'').

[38] *See* rule 0–4(d) [17 CFR 275.0–4(d)]; proposed amendments to Advisers Act rule 0–4(d).

[39] Regulation S–T requires that each signatory to an electronic filing manually sign a signature page or other document authenticating, acknowledging or otherwise adopting his or her signature that appears in typed form in the electronic filing. This document must be executed before or at the time the electronic filing is made, must be retained by the filer for a period of five years, and must be made available to the Commission upon request. *See* rule 302(b) of Regulation S–T [17 CFR 232.302(b)]. Moreover, filers must submit a notarized authentication to the Commission when submitting a Form ID to gain initial access to the EDGAR filing system. We believe that these requirements provide sufficient assurance of the legitimacy of signatures contained in the electronic filings so that notarization of each application and each amended application is unnecessary.

[40] *See* 2008 IC Applications Release, *supra* footnote 15, at text accompanying nn.44 and 45.

[41] *See* rule 0–4(g) [17 CFR 275.0–4(g)]; proposed amendments to Advisers Act rule 0–4(g).

[42] *See* 2008 IC Applications Release, *supra* footnote 15, at text accompanying and following n.46.

[43] *See* proposed amendments to Advisers Act rule 0–4(b) and Investment Company Act rule 0–2(b).

[44] 17 CFR 279.4.

[45] *See* 17 CFR 279.4.

[46] *See* 17 CFR 279.4. *See also* 17 CFR 275.0–4(a).

[47] The Commission's website sets forth instructions on how to make a FOIA request, *available at https://www.sec.gov/page/office-foia-services; see* 5 U.S.C. 552.

[48] There is precedent to requiring persons other than the adviser to file a form through IARD. Independent public accountants must file [17 CFR 279.8] (''Form ADV–E'') through IARD. *See* 17 CFR 275.206(4)–2(a)(4) and 17 CFR 279.8. *See* proposed amendments to Advisers Act rule 203–1. As part of the proposed amendments, the signatures required for Form ADV–NR would also be in electronic, rather than ''wet'', format as currently required. We are also proposing conforming technical amendments to the General Instructions of Form ADV and to Form ADV–NR that describe the electronic filing requirements included in the proposed amended rules. *See* proposed amendments to 17 CFR 279.4; proposed amendments to General Instructions to Form ADV.

[49] *See* Advisers Act rule 203–3. *See also* proposed amended rule 203–1(d)(3).

initial registration with the Commission, to file Form ADV–NR with the Commission within 30 days of becoming a non-resident general partner or a non-resident managing agent.[50]

Additionally, we are proposing to require non-resident general partners and non-resident managing agents to amend their Form ADV–NR within 30 days whenever any information contained in the form becomes inaccurate by filing with the Commission a new Form ADV–NR.[51] The current form does not specify when a new Form ADV–NR must be filed with the Commission when the information on a filed Form ADV–NR becomes inaccurate.[52] We believe allowing non-resident general partners and non-resident managing agents 30 days to file a new form provides sufficient time for the filings to be made—without imposing an undue burden on filers—and would help ensure that the Commission has accurate mailing information with which to contact filers.

Proposed amended rule 203–1 also would state that Form ADV–NR is considered filed with the Commission upon acceptance by the IARD and that no fee shall be assessed for filing Form ADV–NR through IARD.[53] Proposed rule 203–1 would specify that each Form ADV–NR (and any amendment to Form ADV–NR) required to be filed under the rule is a ''report'' within the meaning of section 204 and 207 of the Advisers Act.[54] These amendments are similar to those provided for in Advisers Act rule 203–2 for Form ADV–W and are intended to provide specificity to filers regarding their filing obligations.[55]

b. Request for Comment

We request comment on the proposed amendments to require electronic submission of Form ADV–NR through IARD and the related amendments to proposed rule 203–1.

9. Should we amend rule 203–1, as proposed, to require the electronic submission of Form ADV–NR? Why or why not? Would requiring the electronic submission of Form ADV–NR likely reduce the burden of filing the form for filers?

10. Should we require the investment adviser's non-resident general partner and non-resident managing agent to file Form ADV–NR electronically, as proposed, or should we allow or require advisers to file Form ADV–NR on behalf of their non-resident general partner and non-resident managing agent? Why or why not? If advisers would file Form ADV–NR on behalf of their non-resident general partners and non-resident managing agents, how would the non-resident general partners and non-resident managing agents sign Form ADV–NR?

11. Should rule 203–1 require submission of Form ADV–NR through IARD, or an alternative system, such as EDGAR, a file transfer system, or another system? What factors should we consider when selecting a system for filing ADV–NR?

12. Should rule 203–1 require filers of Form ADV–NR to update the form within 30 days of whenever any information contained in the form becomes inaccurate by filing with the Commission a new Form ADV–NR? Should the rule specify some other amount of time? If so, please state what length of time should be allowed and why you believe that length of time to be appropriate and necessary.

B. Rule 13f–1 and Form 13F

Section 13(f) of the Exchange Act, in pertinent part, requires a manager to file a report with the Commission if the manager exercises investment discretion with respect to accounts holding certain equity securities (''13(f) Securities'') having an aggregate fair market value on the last trading day of any month of any calendar year of at least $100 million.[56] The Commission has rulemaking authority under section 13(f) to determine, among other things, the format and frequency of the reporting requirements and the information to be disclosed in each report.[57]

Section 13(f) was designed to increase the public availability of information regarding the securities holdings of managers, to consolidate the information with the Commission as a central repository of the data, and to facilitate consideration of the influence and impact of managers on the maintenance of fair and orderly securities markets and the public policy implications of that influence and impact.[58] To implement the institutional investment disclosure program mandated by Congress in section 13(f), the Commission adopted rule 13f–1 and related Form 13F under the Exchange Act.[59] Rule 13f–1 requires managers that exercise discretion over accounts holding 13(f) Securities having an aggregate fair market value of at least $100 million on the last trading day of any month of any calendar year to file quarterly reports of 13(f) Securities holdings with the Commission on Form 13F within 45 days after the last day of such calendar year and within 45 days after the last day of each of the first three calendar quarters of the subsequent calendar year.[60] In 1999, the Commission required electronic filing through EDGAR of public Form 13F reports.[61] In 2013, the Commission modernized the filing format of Form 13F by replacing the plain-text ASCII format with a structured XML format and accompanying online form.[62] In 2020, the Commission proposed, but did not adopt, certain amendments to Form 13F that would have increased the reporting threshold of Form 13F, required managers to provide additional identifying information, and made certain technical amendments to Form

[50] *See* proposed amended rule 203–1(d)(1).

[51] *See* proposed amended rule 203–1(d)(2).

[52] *See* Form ADV–NR.

[53] *See* proposed amended rule 203–1(d)(4) and (5).

[54] *See* proposed amended rule 203–1(d)(6). The fee associated with submitting Form ADV through IARD contemplates the cost of filing Form ADV–NR. Advisers Act section 207 provides that it shall be unlawful for any person willfully to make any untrue statement of a material fact in any registration application or report filed with the Commission under section 203 or 204, or willfully to omit to state in any such application or report any material fact which is required to be stated therein.

[55] *See* Advisers Act rule 203–2 [17 CFR 275.203–2]. We are also proposing conforming technical amendments to the General Instructions of Form ADV and Form ADV–NR to reflect the proposed requirement to file the form electronically through IARD.

[56] Section 13(f)(1) of the Exchange Act [15 U.S.C. 78m(f)(1)].

[57] The Commission is required under section 13(f) to adopt rules which would create a reporting and disclosure system to collect specific information concerning certain equity securities held in accounts over which certain managers exercise investment discretion. *See* Section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)]; *see also* Filing and Reporting Requirements Relating to Institutional Investment Managers, Exchange Act Release No. 15461 (Jan. 5, 1979), at 1 (''13F Quarterly Reporting Release'').

[58] *See* Filing and Reporting Requirements Relating to Institutional Investment Managers, Exchange Act Release No. 14852 (July 31, 1978) (citing to the Securities Acts Amendments of 1975: Report of the Committee on Banking, Housing and Urban Affairs United States Senate to Accompany S. 249, 94th Cong., 1st Sess. (S. Report No. 94–75) (1975), at 85 (''1975 Amendments Senate Report'')).

[59] *Id.*

[60] *See* section 13(f) of the Exchange Act [15 U.S.C. 78m(f)] and rule 13f–1 thereunder [17 CFR 240.13f–1]; *see also* 13F Quarterly Reporting Release, *supra* footnote 57. The Form 13F reports must be filed within 45 days after the last day of such calendar year and within 45 days after the last day of each of the first three calendar quarters of the subsequent calendar year. If two or more managers exercise investment discretion with respect to the same securities, only one of the managers is required to include information regarding such securities in its reports on Form 13F–HR. The other manager(s) are required to file a Form 13F notice report on Form 13F–NT stating the name of the other manager(s) reporting on their behalf.

[61] *See* Rulemaking for EDGAR System, Exchange Act Release No. 40934 (Jan. 12, 1999).

[62] Adoption of Updated EDGAR Filer Manual, Investment Company Act Release No. 30515 (May 14, 2013) [78 FR 29616 (May 21, 2013)] (''EDGAR Filer Manual Release'').

13F.[63] Finally, in 2020, as part of a series of initiatives designed to modernize the agency's filing requirements, the Commission adopted amendments to Regulation S–T that permit the use of electronic signatures when executing authentication documents in connection with certain documents filed with Commission, including Form 13F filings.[64]

Section 13(f) mandates that the Commission disseminate the information appearing in the quarterly reports to the public.[65] Congress recognized that, in some instances, public disclosure of certain types of information could have harmful market effects.[66] Thus, Section 13(f) of the Exchange Act authorizes the Commission, as it determines to be necessary or appropriate in the public interest or for the protection of investors or to maintain fair and orderly markets, to delay or prevent public disclosure of certain Form 13F information in accordance with the FOIA, which is referred to in this release as ''commercial'' information. Section 13(f) also explicitly prohibits the Commission from disclosing to the public any reported personal information that identifies the securities held by the account of a natural person or an estate or trust, other than a business trust or an investment company, which is referred to in this release as ''personal'' information.[67]

Confidential treatment for personal information, as specified in section 13(f)(4), is required for an indefinite time period if public disclosure would identify the securities held by the account of a natural person, an estate, or a trust (other than a business trust or an investment company).[68] The Commission, however, does have discretion to determine whether to grant confidential treatment requests for commercial information in accordance with section 13(f), rule 24b–2, and the FOIA.[69] The Commission provided delegated authority to the Division of Investment Management to grant, deny, or revoke a grant of confidential treatment for any application for confidential treatment that is filed under Exchange Act section 24(b) and rule 24b–2 thereunder for confidential treatment of information filed pursuant to Exchange Act section 13(f) and rule 13f–1.[70]

Currently, a manager seeking confidential treatment must file multiple lists of securities. First, it must electronically file via EDGAR a public Form 13F that identifies the securities that are required to be publicly disclosed under section 13(f) and rule 13f–1, excluding, if applicable, any security(ies) for which it is requesting confidential treatment. Second, it must file a paper 13(f) Confidential Treatment Request that includes both: (i) A separate, non-public Form 13F for the same calendar quarter that lists any 13(f) Security(ies) for which the manager is requesting confidential treatment; and (ii) a supporting request letter to substantiate the substantive basis for confidential treatment. Third, following the submission of a commercial confidential treatment request, a manager must file an amendment(s) upon the expiration or denial of confidential treatment to disclose publicly any security(ies) for which confidential treatment was requested.[71] Furthermore, the 13(f) Confidential Treatment Requests, which are filed in paper, must be filed in quintuplicate with the Commission's Office of the Secretary.[72]

The Form requires 13(f) Confidential Treatment Requests to include the Form 13F reporting information for which the manager requests confidential treatment, as well as factual support to enable the Commission to make an informed judgment as to the merits of the request.[73] The manager also must submit a public filing of Form 13F that lists the manager's quarter-end holdings, and, when confidential treatment is requested, indicates that the confidential portion of the Form 13F has been omitted and filed separately with the Commission.[74] These types of paper confidential treatment request submissions are subject to a time-consuming, manual receipt and distribution process within the Commission and could lead to undue procedural delay that can increase the time that the information receives *de facto* confidential treatment between the time a 13(f) Confidential Treatment Request is received and when the subject holdings are made public in an amendment to the requestor's public Form 13F report following either (i) a denial of a 13(f) Confidential Treatment Request, or (ii) the expiration of confidential treatment.[75] These challenges were highlighted during the COVID–19 pandemic that resulted in delays in receiving paper filings and, ultimately, in granting or denying 13(f) Confidential Treatment Requests filed with the Commission in paper.[76]

[63] *See* 2020 Form 13F Proposal, *supra* footnote 4.

[64] *See* Electronic Signatures in Regulation S–T rule 302, Exchange Act Release No. 10889 (Nov. 17, 2020) [85 FR 78224 (Dec. 4, 2020)].

[65] *See* Section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)]. Reports made on Form 13F are publicly available in XML format.

[66] 1975 Amendments Senate Report, *supra* footnote 57.

[67] *See* Sections 13(f)(4) and (5) of the Exchange Act [15 U.S.C. 78m(f)(4)] [15 U.S.C. 78m(f)(5)]; *see also* rule 24b–2(b)(2) under the Exchange Act [17 CFR 240.24b–2]; *see generally* Freedom of Information Act [5 U.S.C. 552]. The Commission amended the instructions to Form 13F pertaining to confidential treatment requests to state the procedural and substantive criteria that such requests must satisfy before they may be granted. *See* Requests for Confidential Treatment of Information Filed by Institutional Investment Managers, Exchange Act Release No. 15979 (July 6, 1979) (''1979 Confidential Treatment Amendments'').

[68] Section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)]; *see also* Requests for Confidential Treatment Filed by Institutional Investment Managers, Exchange Act Release No. 21539 (Dec. 4, 1984).

[69] *See* 1975 Amendments Senate Report, *supra* footnote 57. The Commission used this discretion to simplify the requirements for requesting confidential treatment of open risk arbitrage positions based upon a claim that the information is confidential, commercial, or financial. *See* Requests for Confidential Treatment Filed by Institutional Investment Managers, Exchange Act Release No. 22038 (May 14, 1985) (adopting requirement for good faith representations in Confidential Treatment Instruction 2.f., and limiting the confidential treatment request to a period of one year or less). The Commission also uses this discretion in evaluating confidential treatment requests for commercial information. *See* Form 13F Instructions for Confidential Treatment Requests; Rulemaking for EDGAR System, Investment Company Act Release No. 23640 (Jan. 12, 1999) (''Form 13F Instructions for Confidential Treatment Requests''); *see also* rule 24b–2(b)(2)(ii) under the Exchange Act [17 CFR 240.24b–2]; *see also* 1979 Confidential Treatment Amendments, *supra* footnote 66.

[70] *See* rule 30–5(c–1)(1) and (2) of the Commission's organizational rules [17 CFR 200.30–5].

[71] *See* Form 13F Instructions for Confidential Treatment Requests, *supra* footnote 68, at instruction 2.g. A manager may need to file multiple amendments in connection with a 13(f) Confidential Treatment Request, such as when the expiration or denial of confidential treatment occurs at different quarterly intervals for different holdings. For example, the period of confidential treatment for open risk arbitrage holdings typically varies between three, six, nine, or twelve months, based on different completion or termination dates for a proposed merger or acquisition.

[72] *See* rule 24b–2 under the Exchange Act [17 CFR 240.24b–2]; *see also* Form 13F Instructions for Confidential Treatment Requests, *supra* footnote 68.

[74] *See* rule 24b–2(b) under the Exchange Act [17 CFR 240.24b–2].

[75] *See* Office of Inspector General's Review of the SEC's 13(f) Reporting Requirements (Sept. 27, 2010), *available at https://www.sec.gov/about/offices/oig/reports/audits/2010/480.pdf; see also* rule 24b–2(c) under the Exchange Act (providing confidentiality pending a determination about the merits of a 13(f) Confidential Treatment Request), *infra* footnote 82.

[76] Staff sought to mitigate these delays by, among other things, responding to questions regarding the

1. Electronic Filings of 13(f) Confidential Treatment Requests

a. General

As part of our continuing efforts to modernize filings made with the Commission and enhance the efficiency of the Commission's process in reviewing 13(f) Confidential Treatment Requests, we are proposing amendments to Form 13F and related rules under the Exchange Act and Regulation S–T that would require managers to file requests for confidential treatment electronically via EDGAR.[77] Thus, under the proposed amendments, the 13(f) Confidential Treatment Requests that filers currently submit to the Commission in paper, typically through the mail or by express delivery, would be required to be submitted electronically via EDGAR.[78]

The Commission has permitted or required the electronic submission of other confidential treatment requests.[79] In modernizing the manner in which a confidential treatment request may be submitted, the Commission has previously stated that such rules will reduce the burden on filing entities by avoiding the filing of a separate paper submission, and where such a request is made electronically, will expedite Commission review of the requests for confidential treatment.[80] We believe that this proposal would provide significant benefits to managers that request confidential treatment and would both further the goals of section 13(f) (as noted above) and assist the Commission's review of such requests. First, electronic filings would relieve the burdens on managers of sending paper 13(f) Confidential Treatment Requests to the Commission.[81] In addition, filings made through EDGAR are easier for the Commission to receive and maintain in accordance with the Commission's record retention requirements, particularly during disruptive events like COVID–19.[82] Furthermore, the Commission would be able to review all of a manager's holdings more efficiently because 13(f) Confidential Treatment Requests would be viewable on the same system as a manager's public Form 13F filing.

Electronic filing of 13(f) Confidential Treatment Requests also would assist the staff in evaluating such requests by facilitating more prompt delivery of the requests to the reviewing staff. We believe this increased efficiency could reduce the period of *de facto* confidential treatment that accrues pending review [83] and thus ultimately allow for the quicker public dissemination of Form 13F holdings information consistent with the purpose of section 13(f), thereby enhancing the availability of public information about managers' holdings of 13(f) Securities.[84]

We considered whether we should require 13(f) Confidential Treatment Requests to be filed via a secure file transfer system other than EDGAR.[85] However, in light of the fact that all managers are already familiar with the process of making filings on EDGAR, we believe it would be less burdensome for managers to make 13(f) Confidential Treatment Request filings on EDGAR as well. We also believe such an option would be less efficient for the Commission because the non-public holdings data related to the 13(f) Confidential Treatment Request would not be viewable in the same system as the manager's other holdings.

b. Amendments to Form 13F

As discussed above, we are proposing to modify Form 13F to require electronic filing of 13(f) Confidential Treatment Requests.[86] The proposed changes to Form 13F are described in more detail below.[87]

• *Instructions for Confidential Treatment Requests.* We propose to modify the instructions to require that a 13(f) Confidential Treatment Request be filed electronically.[88] Such requests would be made electronically via EDGAR as a separate, non-public filing. Requests also would include a confidential Form 13F report that is limited to the 13(f) Securities holdings for which the manager is requesting confidential treatment. The proposed changes to the Instructions for

electronic submission of such requests through a secure file transfer service. *See* Division of Investment Management Coronavirus (COVID–19) Response FAQs, *available at https://www.sec.gov/investment/covid-19-response-faq* (stating that filers should contact the staff for questions regarding whether 13(f) Confidential Treatment Requests could be submitted electronically). The FAQs represent the views of the staff of the Division of Investment Management. They are not a rule, regulation, or statement of the Commission. The Commission has neither approved nor disapproved their content. The FAQs, like all staff statements, have no legal force or effect: They do not alter or amend applicable law, and they create no new or additional obligations for any person.

[77] *See* proposed amendments to rule 24b–2(i) under the Exchange Act; *see also* proposed amendments to Form 13F Instructions for Confidential Treatment Requests; *see also* proposed rule 101(a)(1)(xxii) and proposed amendments to rule 101(d) of Regulation S–T; *see also infra* footnote 95 and accompanying text.

[78] *Id.; see also supra* footnotes 25–28 and accompanying text (discussing proposed amendments to the electronic filing requirement of rule 101 of Regulation S–T and rule 0–4 under the Advisers Act).

[79] *See* rule 24b–2(g) (Reg. SCI requires certain entities (including clearing agencies and alternative trading systems, among others), known as SCI Entities, to report certain business events (such as systems and compliance disruptions and system intrusions) to the Commission electronically on Form SCI. Filers may file confidential treatment requests electronically for all of the information reported on Form SCI); *see also* rule 24b–2(h); *see also* Security-Based Swap Data Repository Registration, Duties, and Core Principles, Exchange Act Release No. 74246 (Feb. 11, 2015) (requires security-based swap data repositories (''SDRs'') to register and make certain electronic filings with the Commission via EDGAR. The rules require SDRs, when seeking confidential treatment, to do so electronically via EDGAR).

[80] *See* Regulation Systems Compliance and Integrity (''Reg. SCI''), Exchange Act Release No. 73639 (Nov. 19, 2014) [79 CFR 72251 (Dec. 5, 2014)], at 408 (''Reg. SCI Adopting Release'').

[81] We noted similar benefits to permitting electronic submission of confidential treatment requests in other contexts. *See* Reg. SCI Adopting Release, *supra* footnote 79, at 408–409.

[82] The Commission recognizes the importance of sound data security practices and protocols for confidential information filed electronically, including information that may be competitively sensitive. The Commission has substantial experience handling other non-public information in the course of its regular business, such as, for example, with the storage and use of non-public information reported electronically on Form PF, Form N–PORT, and Form N–LIQUID. As with all other confidential information, the staff would carefully evaluate the data security protocols that would apply to applications for confidential treatment. Drawing on its experience, the staff would work to design controls and systems for the use and handling of such applications and associated confidential data in a manner that reflects the sensitivity of the data and is consistent with the maintenance of its confidentiality. *See* Investment Company Reporting Modernization Adopting Release, Securities Act Release No. 10231 (Oct. 16, 2016), at n.470 and accompanying text.

[83] Rule 24b–2(c) under the Exchange Act preserves the confidentiality of Form 13F holdings that are the subject of a confidential treatment request pending a determination on the merits of such request. [17 CFR. 240.24b–2].

[84] *See, e.g.,* 1975 Amendments Senate Report, *supra* footnote 57, at 82 (''Thus, with the dissemination of data about institutional investment managers, an institutional disclosure program should stimulate a higher degree of confidence among all investors in the integrity of our securities markets.'').

[85] Commission staff utilized such systems for a variety of submissions during the events of COVID–19, including 13(f) Confidential Treatment Requests. *See, e.g.,* SEC Coronavirus (COVID–19) Response, Guidance and Targeted Regulatory Assistance and Relief, *available at https://www.sec.gov/sec-coronavirus-covid-19-response.* The Commission received a limited number of 13(f) Confidential Treatment Requests via such systems.

[86] *See infra* section II.B.2 (discussing other proposed amendments to Form 13F).

[87] In addition to the changes described above, Form 13F's Paperwork Reduction Act Information section would also be modified to remove duplicative information on the form relating to the form's burdens and to update certain citations to section 13(f) of the Exchange Act. *See* proposed amendments to Paperwork Reduction Act Information section of Form 13F.

[88] *See supra* footnote 76. The attached request must also include the period of time for which confidential treatment is requested, and a justification of such requested period of confidential treatment, as required by rule 24b–2(b)(2) under the Exchange Act [17 CFR 240.24b–2(b)(2)]. *See* proposed Instruction 2(e) for Confidential Treatment Requests of Form 13F.

Confidential Treatment Requests would also provide updated references to new subparagraph (i) of rule 24b–2.[89] In order to make the instructions more consistent with current rule 24b–2(b)(2), Instruction 2.e. would be amended to require the manager to ''provide justification for'' the period of time for which confidential treatment of the securities holdings is requested. In order to make the instructions more consistent with current rule 24b–2(e), Instruction 4 would be amended to state that a manager must also submit electronically its updated Form 13F at the expiration of the time period for which a manager requested confidential treatment or earlier, *e.g.,* upon the denial of the 13(f) Confidential Treatment Request.[90]

- *Summary Page.* The summary page as proposed to be amended would include all the same information currently required but would add a requirement for a manager seeking confidential treatment to indicate if confidential treatment is being requested for some or all of the manager's holdings for the quarter-end period.[91]
- *Proposed Special Instructions.* Proposed Special Instruction 6(d) would require managers to identify on the Summary Page if confidential treatment is being requested for some or all of the manager's holdings for the quarter-end period. This instruction would assist the Commission and the public in identifying whether a manager has omitted some or all of its holdings.

Proposed changes to current Special Instruction 13 would remove the EDGAR filing type designation, as such information is now found in the Commission's EDGAR Filer Manual.[92] We are also proposing to revise current Special Instruction 13 to state that filers can consult the Commission's EDGAR Filer Manual for filing instructions.[93]

c. Amendments to Rule 24b–2

We are proposing to amend rule 24b–2 to include an additional subparagraph governing the filing of confidential information required by section 13(f) of the Exchange Act.[94] New subparagraph (i) would require that managers request confidential treatment electronically for any material required to be reported on Form 13F and continue to omit the confidential portion from the materials required to be reported.

d. Amendments to Regulation S–T

Regulation S–T would be amended in connection with the mandatory electronic submission of 13(f) Confidential Treatment Requests. Rule 101(a) would be amended to add 13(f) Confidential Treatment Requests to the list of mandated electronic filings.[95] Additionally, 13(f) Confidential Treatment Requests would be added to the list of requests for confidential treatment required to be submitted in electronic format in rule 101(d).[96]

We seek comment on the proposal to require managers to file requests for confidential treatment of information pursuant to section 13(f) of the Exchange Act and rule 13f–1 thereunder electronically via EDGAR.

13. Do commenters agree that requiring electronic filing of 13(f) Confidential Treatment Requests would improve the 13(f) Confidential Treatment Request process by making it more efficient and secure? What would be the burdens, if any, associated with requiring such requests to be filed electronically?

14. Should we allow, but not require, filers to submit 13(f) Confidential Treatment Requests electronically? Why or why not?

15. Similar to many other provisions of Regulation S–T, proposed rule 101(a)(1)(xxii) of Regulation S–T does not specify a particular filing format for 13(f) Confidential Treatment Requests. We anticipate the filing format would be HTML or ASCII, like many other EDGAR filings. What format or formats should we require for filing 13(f) Confidential Treatment Requests? Should the Commission require a single, specified format or permit filers to select a format among two or more possible formats? What time or expense is associated with particular formats? What time or expense would be required of the public to view documents in a particular format? Would a particular format require any filers or users to license commercial software they otherwise would not, and, if so, at what expense?

16. We are proposing to require electronic 13(f) Confidential Treatment Requests be filed on EDGAR. As an alternative, as discussed above, should we require 13(f) Electronic Treatment Requests to be submitted via an electronic file transfer system? Would an electronic file transfer system be a more appropriate vehicle, and why? Are there any particular costs or burdens with filing such requests on EDGAR as opposed to other systems? If so, what are those costs or burdens and what are potential remedies for them?

17. We are proposing to require the entirety of a 13(f) Confidential Treatment Request, both the list of confidential holdings and the justification, to be filed electronically. As an alternative, should we require managers to complete a separate electronic report on Form 13F that would include the manager's confidential holdings in an XML format and attach the justification portion of the 13(f) Confidential Treatment Request to the Form as a separate file? Why or why not? Would filing a separate confidential electronic report on Form 13F present other burdens? Would the benefits of a separate electronic report on Form 13F be justified notwithstanding the risk of confidential information inadvertently being made public?

18. Currently, rule 24b–2(d)(2) requires the Commission to communicate its decision to deny, or revoke a previously granted, 13(f) Confidential Treatment Request to the requesting manager in paper via registered or certified mail. Should we allow the Commission to communicate its decision to deny or revoke 13(f) Confidential Treatment Requests electronically? Why or why not? If so, should such notification be made via EDGAR? Why or why not?

19. Are there any burdens or efficiencies associated with changing the filing format of 13(f) Confidential Treatment Requests from paper to electronic that we have not discussed? If so, what are these burdens or efficiencies?

2. Other Amendments to Form 13F

a. Additional Identifying Information

We are re-proposing amendments to Form 13F that would require filers to provide additional identifying information.[97] These amendments

[89] *See* proposed amendments to Form 13F; *see also infra* section II.B.1.c.

[90] Conforming amendments would be made to Instruction 2.e. to implement the proposed changes to Instruction 4.

[91] *See* proposed Summary Page of Form 13F; *see also* proposed Special Instruction 6(d) of Form 13F (requiring managers to indicate on the Form 13F summary page whether confidential treatment is being sought for some or all of the manager's holdings for the quarter-end period and to file the 13(f) Confidential Treatment Request in a separate submission).

[92] *See* proposed Special Instruction 12 of Form 13F. Under the proposal, current Special Instruction 13 of Form 13F would be renumbered to Special Instruction 12.

[93] *Id.*

[94] *See* proposed rule 24b–2(i) under the Exchange Act.

[95] *See* proposed rule 101(a)(1)(xxii) of Regulation S–T.

[96] *See* proposed amendments to rule 101(d) of Regulation S–T. We would also make non-substantive conforming edits to rules 101(a)(1)(xxi) and conforming edits to rule 101(a)(3) of Regulation S–T.

[97] The amendments related to additional identifying information that we are proposing in this document are the same as those that were

would require each Form 13F filer to provide its CRD number and SEC file number, if any.[98] If a manager is filing a Form 13F notice report on Form 13F–NT, the manager must include the CRD number and SEC file number, if any, of any other manager included in the ''List of Other Managers Reporting for this Manager'' table on the cover page.[99]

A majority of commenters to the 2020 Form 13F Proposal supported requiring this information.[100] These commenters agreed that this information would allow the Commission and other consumers of Form 13F data to identify a Form 13F filer's other regulatory filings and the interrelationships between managers who share investment discretion over 13(f) Securities more easily.[101] One commenter also stated that the requirement to include additional information would not be unduly burdensome for managers.[102] Another commenter, however, opposed this requirement stating that it did not see a need for managers to provide additional identifying information.[103] We are re-proposing these amendments because we continue to believe that it would be useful to the Commission and the public to be able to efficiently identify interrelationships between managers as well as a manager's other regulatory filings. As we stated in the 2020 Form 13F Proposal, we also believe that this information could identify for the public additional sources of market information.[104]

We seek additional comments on the following issues:

20. Should we require managers to provide their CRD number and SEC file number, if any, on Form 13F?

21. Should we require managers to provide the CRD number and SEC file number, if any, of other managers identified in their 13F report?

22. Would this additional identifying information on Form 13F be useful? If so, how? If not, why not?

23. Would disclosing this information be unduly burdensome for 13F filers?

24. Is there any information currently required that is not useful or does not have a beneficial effect for investors, reporting managers, or other users of the data? If so, are there ways we can enhance the reported information? For example, in addition to, or in lieu of, the CUSIP number for each security, should we permit managers to provide other identifiers such as a Financial Instrument Global Identifier (FIGI) for each security?[105] Why or why not? Would permitting voluntary use of an alternate identifier have a beneficial effect for investors, reporting managers, or other users of the data? What would be the costs associated with obtaining CUSIPs for investments? What would be the costs associated with obtaining a FIGI or other identifier for investments? One commenter on the 2020 Form 13F Proposal stated a belief that requiring a security identifier could increase errors in filings.[106] Do commenters agree? If so, are there measures we could take to mitigate such effects?

b. Instructions for Confidential Treatment Requests

We are proposing an amendment to the instructions on Form 13F for 13(f) Confidential Treatment Requests to require managers seeking confidential treatment for information contained in Form 13F to demonstrate that the information is customarily and actually kept private by the manager and that failure to grant the request for confidential treatment would be likely to cause harm to the manager.[107] We are proposing this amendment to conform our instructions to a June 2019 U.S. Supreme Court decision that overturned the standard for determining whether information is ''confidential'' under Exemption 4 of the FOIA on which the current instruction is based.[108]

We proposed a similar amendment in the 2020 Form 13F Proposal.[109] One commenter to the 2020 Form 13F Proposal opposed this amendment, stating its belief that the current standard is appropriate and not inconsistent with the Supreme Court decision.[110] We disagree with the

included in the 2020 Form 13F Proposal. *See* 2020 Form 13F Proposal, *supra* footnote 4.

[98] *See* proposed amendments to proposed Special Instruction 4 of Form 13F. Under the proposal, current Special Instruction 5 would be renumbered to Special Instruction 4 of Form 13F.

[99] *See supra* footnote 59 (noting that a manager can make a Form 13F–NT filing if all the securities for which the manager has investment discretion are reported by another manager). Similarly, if a manager's Form 13F–HR reports the holdings of managers other than the reporting manager, the reporting manager would be required to include the CRD number and SEC file number of those other managers in the ''List of Other Included Managers'' on the cover page. *See* proposed Special Instruction 7 of Form 13F. Under the proposal, current Special Instruction 8 would be renumbered to Special Instruction 7 of Form 13F.

[101] *Id.*

[102] WhaleWisdom 2020 Form 13F Proposal Comment Letter, *supra* footnote 99.

[103] Comment Letter of the Investment Adviser Association on File No. S7–08–20 (Sept. 29, 2020), at n.11, *available at https://www.sec.gov/comments/s7-08-20/s70820-7859973-223872.pdf* (''IAA 2020 Form 13F Proposal Comment Letter'').

[104] *See* section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)] (requiring the Commission to tabulate information contained in Form 13F reports in a manner that would ''maximize the usefulness of the information to other Federal and State authorities and the public''). The ability to identify interrelationships among managers easily could also allow third party vendors that compile Form 13F data to provide more complete information. *See* Edward Pekarek, *Hogging the Hedge? ''Bulldog's'' 13F Theory May Not be So Lucky,* 12 FORDHAM J. CORP. & FIN. LAW 1079 (2007), at n.91 (noting that most academic studies rely on 13F filings compiled quarterly by third party vendors).

[105] The 2020 Form 13F Proposal asked if the Commission should consider omitting Form 13F's requirement to provide a CUSIP number for each security and instead adopt other security identifiers such as the FIGI. Commenter responses to these suggested changes were mixed. *See, e.g.* WhaleWisdom 2020 Form 13F Proposal Comment Letter, *supra* footnote 99; Bloomberg 2020 Form 13F Proposal Comment Letter, *supra* footnote 99 (supporting the adoption of the FIGI in lieu of a CUSIP number); *but see* IAA 2020 Form 13F Proposal Comment Letter, *supra* footnote 102, and BrilLiquid 2020 Form 13F Proposal Comment Letter *supra* footnote 99 (opposing the replacement of the CUSIP number with a different identifier).

[106] IAA 2020 Form 13F Proposal Comment Letter, *supra* footnote 102.

[107] *See* proposed amendments to Instruction 2.d for Confidential Treatment Requests of Form 13F. As is currently required under this instruction, the proposed amendments would continue to require managers to show what use competitors could make of the information and how harm to the Manager could ensue.

[108] 5 U.S.C. 552(b)(4). *See Food Marketing Institute* v. *Argus Leader Media,* 139 S.Ct. 2356 (2019) (''*Food Marketing* v. *Argus Leader*'') (stating that ''[a]t least where commercial or financial information is both customarily and actually treated as private by its owner and provided to the government under an assurance of privacy, the information is 'confidential' within the meaning of Exemption 4'').

[109] *See* 2020 Form 13F Proposal, *supra* footnote 4, at nn.81–83 and accompanying text.

Continued

commenter. While we recognize that the facts of the case in the Supreme Court decision did not involve 13(f) Confidential Treatment Requests, section 13(f) requires the Commission to conduct a FOIA analysis as part of its determination of whether to grant such requests as discussed above.[111] Because FOIA Exemption 4 typically is relied on in connection with a request for confidential treatment of commercial information under section 13(f) and the Supreme Court overturned the standard on which the current instruction is based, we believe it is necessary to ensure that the instructions for 13(f) Confidential Treatment Requests are consistent with the Supreme Court's decision.[112] We seek additional comment on the following issues:

25. Does the amendment appropriately reflect the requirements of the FOIA, including the effect of the U.S. Supreme Court's June 24, 2019, decision in *Food Marketing Institute* v. *Argus Leader Media* on the type of information that is required to substantiate confidential treatment in accordance with Exchange Act sections 13(f)(4) and (5) and rule 24b–2 thereunder?

26. Are the proposed amendments sufficiently clear? If we adopted the amendments, would managers know how to comply with the new standard? Would managers require additional guidance on how to comply with the new standard? If so, what additional guidance should we provide?

c. Technical Amendments to Form 13F

In addition to the amendments discussed above, we are re-proposing certain technical amendments to Form 13F that were included in the 2020 Form 13F Proposal designed to account for the change in the required format of Form 13F submissions from the plain-text ASCII format to the structured XML data format in 2013.[113] For example, we are re-proposing amendments to simplify the rounding conventions of Form 13F by requiring all dollar values listed on Form 13F to be rounded to the nearest dollar, rather than to the nearest one thousand dollars as is currently required.[114] Additionally, we are re-proposing amendments to remove the requirement that filers, when reporting dollar values on Form 13F, omit the ''000.'' [115] As a space saving measure, current Form 13F instructs filers to omit the ''000'' and thus, for example, report a security with a value of $5 million as $5,000. As re-proposed, such a filer would report the security's value as $5,000,000. Since column width is no longer an issue with the structured XML data format, we believe that this change will reduce filer mistakes and data inaccuracies.[116] For similar reasons, we also are re-proposing to remove the 80 character limit imposed on the information filers can include on the cover page and the summary page and the 132 character limit on the information table.[117]

Two commenters on the 2020 Form 13F Proposal supported these amendments, noting that they have identified instances of data errors resulting from incorrect application of the Form 13F's rounding conventions.[118] One commenter opposed these amendments, stating that they are not aware of data inaccuracies resulting from current rounding conventions and that the implementation costs associated with these amendments would outweigh any marginal benefit from these changes.[119] Based on staff experience, we have observed instances of data errors resulting from incorrect rounding that justify the implementation costs of the change.[120] As we stated in the 2020 Form 13F Proposal, we continue to believe that these amendments would enhance the accuracy of the data provided on Form 13F and make it easier to understand and use, both for the Commission and for the public. Additionally we are proposing to remove duplicative definitions and streamline certain sections to simplify Form 13F's instructions.[121]

We request comment on our proposed technical amendments, and the following issues:

27. Should we require filers to round all dollar values listed on Form 13F to the nearest dollar and remove the requirement to omit ''000''? Should we, alternatively, maintain the current rounding conventions? Should we adopt some other rounding conventions? Should we no longer permit rounding?

28. Would our proposed technical amendments increase the accuracy of Form 13F data? Specifically, have users of 13F data encountered issues as a result of the current instructions requiring rounding and omission of the last three digits? Have filers encountered costs as a result of the current requirement?

29. Would these proposed technical amendments impose costs or burdens on filers? Please provide estimates of such costs.

30. Are there any other amendments we should make to streamline Form 13F or clarify its instructions? For example, should we amend the instructions for Form 13F to clarify how the form should be completed if a manager no longer has holdings that must be reported on Form 13F, but is required to continue to file Form 13F for the remaining quarters of a calendar year?

C. Compliance Date

We propose to provide a transition period after the effective date of the amendments to give advisers, applicants, and managers sufficient time to modify their procedures to implement the new rule requirements with regard to submitting applications for exemption under the Advisers Act and for filing Form ADV–NR. The proposed transition period would also give an adequate period of time for managers and other service providers to conduct the requisite operational changes to their systems and to establish internal processes to comply with the new electronic filing requirements of 13F Confidential Treatment Requests and implement the other amendments to Form 13F. We are proposing generally a compliance date of 6 months after the amendments' effective date. Based on our experience, we believe

13F Proposal Comment Letter'') (also stating that, if the Commission were to adopt this amendment, the Commission should provide additional guidance to managers on how they can meet the new standard).

[111] Section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)]; *see also supra* at text accompanying footnote 66.

[112] *See Food Marketing* v. *Argus Leader, supra* footnote 107 (stating that ''[n]otably lacking from dictionary definitions, early case law, or any other usual source that might shed light on the statute's ordinary meaning is any mention of the 'substantial competitive harm' requirement'').

[113] *See* 2020 Form 13F Proposal, *supra* footnote 4, at nn.74–80 and accompanying text; *see also* EDGAR Filer Manual Release, *supra* footnote 61.

[114] *See* proposed amendments to proposed Special Instruction 8 of Form 13F. Under the proposal, current Special Instruction 9 would be renumbered to Special Instruction 8.

[115] *Id.*

[116] *See* Anne Anderson & Paul Brockman, *An Examination of 13F Filings,* 41 J. FIN. RES. 295, 312–314 (2018) (the authors analyzed the accuracy of Form 13F data and concluded that mistakes in applying Form 13F's rounding guidelines leads to many discrepancies in the reported values on Form 13F).

[117] These character limits are imposed by 17 CFR 232.305 [rule 305 of Regulation S–T].

[118] *See* WhaleWisdom 2020 Form 13F Proposal Comment Letter, *supra* footnote 99; BrilLiquid 2020 Form 13F Proposal Comment Letter, *supra* footnote 99.

[119] *See* IAA 2020 Form 13F Proposal Comment Letter, *supra* footnote 102. The commenter did not provide an estimate of the implementation costs associated with this proposed change.

[120] *Id.*

[121] *See* proposed amendments to General Instruction 3. We are also proposing to delete Special Instruction 2 and renumber the remainder of the Special Instructions accordingly. Additionally, we are proposing to amend newly renumbered Special Instructions 2, 6, 7, and 10 of Form 13F. Finally, we are proposing to streamline the discussion in the Paperwork Reduction Act Section of Form 13F.

that the proposed compliance date would provide an appropriate amount of time for advisers, applicants, and managers to comply with the proposed amendments.

We seek additional comments on the following issues:

31. Is the proposed compliance date appropriate? If not, why not?

32. Is a longer or shorter period necessary for compliance with the proposed amendments? Is a longer or shorter period necessary for compliance with one or more of the particular amendments? If so, which proposed amendments, and what would be an appropriate compliance date?

33. Should we implement a tiered compliance date for each filing based on the size or other characteristics of the filer or, in the case of 13F filers, the amount of 13(f) Securities over which the filer exercises investment discretion? If so, what types or sizes of filers would need a longer compliance period, and how much more time would they need than other filers to comply?

III. Economic Analysis

A. Introduction and Primary Goals of the Proposed Regulations and Form Amendments

The Commission is sensitive to the potential economic effects of the proposed amendments to the rules and form that include, among other things, making mandatory the electronic submission of applications for orders under the Advisers Act and 13(f) Confidential Treatment Requests, and harmonizing the requirements for electronic submission of applications for orders under the Advisers Act and the Investment Company Act (collectively, the ''proposed amendments''). The economic effects include the potential benefits and costs of the proposed amendments, as well as any effects on efficiency, competition, and capital formation.

The Commission is making the proposed amendments to facilitate the efficient submission of applications for orders under the Advisers Act and requests for confidential treatment; to improve the Commission's ability to track and process such filings; to reduce burdens and inefficiencies associated with paper submissions; to allow for quicker dissemination of information to the public; and to modernize the Commission's records management processes.

With respect to the filing of applications for orders under the Advisers Act, the proposed amendments would:

- Require electronic submission of applications for orders under the Advisers Act;
- Designate EDGAR as the filing system for electronic submission;
- Eliminate the requirement to file proposed notices;
- Eliminate the requirement that applications be notarized and certain other technical requirements;
- Make temporary hardship exemptions unavailable for applications for orders under the Advisers Act;
- Designate the Secretary of the Commission as the addressee of any remaining paper submissions under Investment Company Act rules 0–2 and 0–4.

With respect to filing 13(f) Confidential Treatment Requests and Form 13F, the proposed amendments would:

- Require electronic submission of 13(f) Confidential Treatment Requests listing all 13(f) Securities and managers' objection to public disclosure of certain holdings in accordance with the requirements set forth in rule 24b–2 under the Exchange Act;
- Designate EDGAR as the filing system for electronic submissions of 13(f) Confidential Treatment Requests;
- Require that filers include additional identifying information on their Form 13F filings;
- Require all dollar values listed on Form 13F to be rounded to the nearest dollar, remove the requirement that dollar values list on Form 13F omit the ''000,'' and remove character limits on the cover and summary pages of Form 13F.

In addition, we are proposing to require that Form ADV–NR, which is currently filed in paper, be filed electronically through the IARD system. Some of the amendments we are proposing are technical in nature and we do not expect them to have significant economic effects.[122]

We have sought, where possible, to quantify the economic effects of the proposed amendments. However, the effects of the proposed amendments depend on a number of factors, some of which we cannot quantify, such as the value to different market participants of the uses of information contained in the 13(f) Confidential Treatment Requests. Therefore, some of the discussion below is qualitative in nature.

B. Economic Baseline

The economic baseline, from which we measure the proposed amendments' likely economic effects, reflects current regulatory practice as it pertains to potential applicants for orders under the Advisers Act, filers of Form ADV–NR, managers required to file Form 13F. In this section, we describe each of these baseline components.

The proposed amendments with respect to applications for orders under the Advisers Act would affect applicants seeking such orders, applicants who may seek similar orders in the future, clients of applicants, investors in funds managed by applicants, and the Commission. Applicants can include registered investment advisers, exempt reporting advisers, and persons not registered with the Commission, but who meet the definition of investment adviser under the Advisers Act, among others. As of December 31, 2020, there were approximately 13,827 registered investment advisers and 4,804 exempt reporting advisers.[123] In addition, as of December 31, 2020, there were approximately 16,796 state-registered advisers and an unknown number of foreign private advisers, who, while not registered with the Commission, may seek to file applications for orders under the Advisers Act.[124]

In accordance with Advisers Act rules, applicants seeking an order from the Commission under the Advisers Act must submit their applications, as well as a proposed notice, in paper and in quintuplicate, to the Commission's mailroom for stamping and logging.[125] Applications are ultimately routed to the Division's staff to manually upload into the EDGAR system, assign file numbers, and process for internal tracking purposes. Division staff also place the applications (including amendments, notices of applications, and the resulting orders) on the Commission's website.[126] These applications for orders available online

[122] Specifically, we do not believe that the following changes will have significant economic effects as they are likely to result in minimal costs or benefits with respect to the filing of applications for orders under the Advisers Act: (1) Removal of the reference to microfilming; (2) changing the wording related to duplicate original copies of paper applications.

[123] We calculate these estimates using the last Form ADV filing for each adviser in the 15 months prior to January 1, 2020. This allows us to exclude advisers that are technically still registered with the Commission but have not filed a Form ADV for their most recent fiscal year. We use the same approach in calculating statistics for exempt reporting advisers.

[124] Foreign private advisers do not file Form ADV. Therefore, the Commission does not have information on the number of foreign private advisers.

[125] *See* 1985 Release, *supra* footnote 11 (describing Commission internal process for receiving and reviewing Advisers Act applications).

[126] The speed with which items are posted to the Commission's website depends on the availability of staff resources; *see also supra* section II.A.1.

may inform investors' decisions with respect to the selection or retention of investment advisers as well as investment decisions regarding funds managed by these advisers. In addition, applications for orders available online provide potential precedent to be consulted by future applicants. The table below describes the number of initial applications for orders under the Advisers Act and Investment Company Act by year over the last three calendar years as posted on the Commission website.[127] The table shows that initial applications for orders under the Advisers Act are uncommon relative to applications for orders under the Investment Company Act.

TABLE 1

	2017	2018	2019	Total
Advisers Act Initial Applications	4	3	7	14
Investment Company Act Initial Applications	124	97	70	291

We estimate that, under the baseline, the costs of submitting an application for an order under the Advisers Act range from $14,182 to $221,909.[128]

The proposed amendments would affect non-resident general partners and non-resident managing agents of investment advisers, who are currently required to file Form ADV–NR as a paper filing submission, as well as their investment advisers, who currently sign Form ADV–NR.[129] The Commission received 89 Form ADV–NR filings during calendar year 2018, 53 filings during calendar year 2019, and 5 filings during calendar year 2020. We estimate that it currently costs $69 to file Form ADV–NR.[130] These amendments would also affect the Commission to the extent the amendments alter how the Commission receives and processes Form ADV–NR filings.

The proposed amendments with respect to 13(f) Confidential Treatment Requests and Form 13F would affect managers who file Form 13F, the Commission, and users of Form 13F information, including investors and other market participants. The table below describes the number of Form 13F filings and 13(f) Confidential Treatment Requests by calendar year and shows that, over the three year period from 2017–2019, only 0.92% (567/61,404) of Form 13F filings included confidential treatment requests.

TABLE 2

	2017	2018	2019	Total
Form 13F filings	19,184	20,356	21,864	61,404
13(f) Confidential Treatment Requests	186	191	190	567

[127] In order to avoid double counting, we do not include amended applications in our count of the number of initial applications filed each year.

[128] *See infra* note 1 of Table 3.

[129] *See supra* section II.A.4.a.

[130] *See infra* footnote 170.

[131] *See, e.g.,* Gompers, Paul A., and Andrew Metrick, *Institutional Investors and Equity Prices,* 116 Quarterly Journal of Economics 229 (2001); *and* Shi, Zhen, *The Impact of Portfolio Disclosure on Hedge Fund Performance,* 126 Journal of Financial Economics 36, (2017).

Form 13F has provided researchers with additional means to study the impact of institutional investors on securities markets as well as the general value of portfolio disclosures.[131] Members of the public can easily access Form 13F information in a timely manner via the EDGAR system.

Currently, managers who are not requesting confidential treatment submit a single public Form 13F on EDGAR in a custom XML structured data language created specifically for Form 13F. Managers are required to round all dollar values listed on their Form 13F to the nearest one thousand dollars, to omit the corresponding ''000'' in such dollar values, and to limit the length of the information filers include on the form's cover and summary pages to 80 and 132 characters, respectively.

Managers requesting confidential treatment must submit the following documents:[132]

- A public Form 13F, filed electronically on EDGAR in a custom XML data language, that lists the 13(f) Securities for which the Manager is not seeking confidential treatment;
- A concurrent paper 13(f) Confidential Treatment Request that includes: (1) The non-public Form 13F holdings information for all 13(f) Securities for which the Manager requests confidential treatment, and (2) a written request that addresses the section 13(f) confidential treatment requirements and provides sufficient factual support to enable the Commission to make an informed judgment as to the merits of the request. Some managers submitted confidential treatment requests electronically via a secure file transfer service to mitigate delays in receiving paper filings during the events of COVID–19.[133]

We are not able to estimate precisely the aggregate cost of filing 13F Confidential Treatment Requests for two reasons.[134] First, the costs associated with filing a 13(f) Confidential Treatment Request may vary depending on the type of request, the level of complexity involved in providing an appropriate justification for the request, and the number of holdings subject to the request. Second, the costs may also vary depending on the level of a manager's sophistication and resources. For example, some managers may be able to file 13(f) Confidential Treatment Requests in-house, while others may rely heavily on outside counsel to assist them with their requests.

C. Economic Effects

This section discusses the benefits and costs of the proposed amendments, as well as their potential effects on efficiency, competition, and capital formation. Because some of the proposed amendments are technical in nature, they will not have significant economic effects. In addition, where certain benefits or costs of electronic filing apply to multiple proposed amendments, we discuss those benefits or costs together instead of repeating such discussion for each proposed amendment.

1. Benefits

Applications for orders under the Advisers Act, Form ADV–NR, and 13(f) Confidential Treatment Requests are all currently filed with the Commission as paper filings. The most significant effect of the rule will be to require that these filings instead be submitted electronically. Electronic submission would increase the speed and accuracy with which Commission staff receives and initially processes submissions, potentially improving regulatory oversight.[135] The current process surrounding paper submissions is manual in nature, requiring processing by various staff as a filing is received and subsequently routed to the appropriate staff members within the Commission for review. In addition, electronic filings would minimize the risks of delay in staff receiving the information via paper submissions and increase efficiency in the staff review process by reducing staff processing time, increasing quality assurance. Electronic filings are also easier than paper filings for the Commission to maintain in accordance with the Commission's record retention requirements because they are easier to store, easier to access, easier to search, and easier to track.[136] Finally, electronic filings would allow filers to more effectively and efficiently navigate future disruptive events—like COVID–19—when staff and filers are unable to access their physical work facilities to complete, submit and process paper fillings.

Electronic submissions would directly benefit filers of applications for orders under the Advisers Act, Form ADV–NR, and 13(f) Confidential Treatment Requests by reducing printing and delivery costs. To the extent such savings were passed along to investors, investors could benefit indirectly as well. Overall, we expect that such cost reductions and any resulting savings to investors would be minimal.[137]

With respect to applications for orders under the Advisers Act specifically, because electronic submissions would be more quickly available on the Commission's EDGAR system, the public may be able to find and review a filing more quickly by accessing the EDGAR system through the Commission's website or through third-party websites that link to EDGAR. To the extent that applications for orders

---

[132] In the 2020 Form 13F Proposal, a commenter stated that complying with the requirements to file a 13(f) Confidential Treatment Request can be particularly time consuming and costly. *See* Comment Letter of the Private Investor Coalition on File No. S7–08–20 (Sept. 3, 2020), *available at https://www.sec.gov/comments/s7-08-20/s70820-7734926-223067.pdf* (''Private Investor Coalition 2020 Form 13F Proposal Comment Letter'').

[133] *See supra* footnote 75.

[134] In 2019, the Commission received a total of 190 13(f) Confidential Treatment Requests (CTR), of which 132 were submitted based on the ''natural person'' exception in 13(f)(4); 41 were submitted based on risk arbitrage; and 17 were based on acquisition, disposition, or other. One commenter (*see supra* footnote 132) claimed that the annual cost of filing quarterly Forms 13F and 13(f) CTR for a typical single family office ranges from $20,000–$40,000. This estimate includes single family office staff time and resources and outside advisers for the CTR filings. Since family offices do not file holdings, the Commission staff presumes that the entire $20,000–$40,000 to be associated with 13(f) CTR costs. Under the assumption that the commenter's claimed CTR costs for family offices are representative of the cost of filing for all filers, the Commission staff estimates the total cost of filing 13(f) CTRs to be $3.8 million–$7.6 million. For the low end of the range, this is calculated as $3.8 million = (132 + 41 + 17) * $20,000. For the high end of the range, this is calculated as $7.6 million = (132 + 41 + 17) * $40,000. This estimate likely understates the aggregate costs of filing 13(f) CTRs because single family offices typically request confidential treatment based on being ''natural persons'', whereas other filers may need to justify their confidential treatment requests for each holding in a given 13(f) CTR. In addition, *see infra* section IV.D for discussion of estimated burdens associated with Form 13F under the Paperwork Reduction Act, which include the cost of filing 13(f) CTRs. Specifically, Table 5 estimates that, under the baseline, the current initial burden is $13,733,909 ($13,080,138 + $435,940 + $217,831) while it is expected to be $19,816,569 under the proposed amendments, implying estimated costs, for PRA purposes, of $6,082,660 = $19,816,569 − $13,733,909 associated with the proposed amendments to Form 13F.

[135] Under the proposed rule, the format requirement for electronic filings on EDGAR would be dictated by the EDGAR Filer Manual, which allows for HTML or ASCII submissions. *See* 2021 EDGAR Filer Manual, *supra* footnote 28, at Sections 2.1 and 5.2. This flexibility should allow filers to choose the format that best suits their needs and minimizes their costs of complying with the rule. The benefits and costs discussed in this Section IV with respect to electronic filings instead of the current paper submissions are those that we would expect to be realized from HTML or ASCII formatted submissions on EDGAR. Both formats are widely used, and neither requires significant special expertise for their preparation, submission, or ingestion. Furthermore, these benefits and costs substantially arise to the same extent regardless of whether the filer chooses the ASCII or HTML format.

[136] *See supra* footnotes 15 and 16 for a discussion of our experience with similar transitions to electronic filings.

[137] *See infra* footnotes 140, 143, and 144.

inform investors' decisions with respect to the selection or retention of investment advisers, investors may be able to make such decisions more expeditiously. In addition, because applicants for orders under the Advisers Act are expected, to the extent possible, to adhere to applicable precedent, applicants and staff rely on recently evaluated applications.[138] The proposed amendments benefit future applicants and the Commission by making such applications more quickly available.

We expect that the proposed amendments regarding applications for orders under the Advisers Act and the Investment Company Act would have several economic benefits specific to both categories of these amendments. First, designating the Secretary of the Commission as the addressee for applications in paper for an order under either act would minimize the risks of delay in staff receiving the application via paper submissions and increase efficiency in the staff review process by reducing staff processing time. Second, applications under both the Investment Company Act and the Advisers Act would be in the same system, so users would only need to learn how to access one system to obtain relevant information related to an exemptive application.

Additionally, the proposed amendments include certain features designed to permit applicants to streamline the application process. The Commission has periodically received applications from parties seeking relief under both the Advisers Act and the Investment Company Act who were unable to file a single application because of the current multiple-system requirements for the differing applications.[139] Thus, the proposed amendments could result in benefits for applicants who are simultaneously applying for orders under both the Advisers Act and the Investment Company Act by allowing them to use a single electronic format and file jointly in a single submission. We expect such savings to be small because, while we do not have precise data on the number of jointly filed applications, staff experience indicates that they are rare relative to independent or non-joint applications. The proposed amendments also make changes to harmonize requirements for submission of applications for orders under the Advisers Act and Investment Company Act, including the elimination of requirements that applications be notarized and that they include proposed notices as exhibits, which would result in direct cost savings for the applicants. As detailed in Section IV, we estimate that the reduction in cost represents approximately 1% of the cost of preparing an application.[140]

We expect that the proposed amendments to rule 13f–1 and Form 13F would have several economic benefits specific to those amendments. First, to the extent that electronic submission of 13(f) Confidential Treatment Requests speeds up the initial process of getting the request to the appropriate Commission staff members, in those instances where a request for confidential treatment is denied, and assuming that there is no petition for review, the corrected holdings information should be publicly available more quickly than if the 13(f) Confidential Treatment Request had been made in paper. This reduction in the length of the *de facto* confidential treatment period of information on Form 13F could benefit users of Form 13F data and enhance investor decision making to the extent that market observers and participants use such data to inform their activities.

Second, the proposed amendments that require each Form 13F and Form 13F–NT filer to provide additional identifying information would allow the Commission and other consumers of Form 13F data to identify a Form 13F filer's other regulatory filings and the interrelationships between managers who share investment discretion over 13(f) Securities more easily. This could identify additional sources of market information for the public that increase their understanding of markets and enhance their ability to make informed investment decisions.[141]

Finally, the proposed technical amendments to Form 13F that eliminate the requirement that dollar values be rounded to the nearest thousand and that the corresponding ''000'' be omitted and remove the character limits on the cover and summary pages of the Form should benefit the Commission and users of Form 13F data by reducing filer mistakes and data inaccuracies.[142]

2. Costs

Requiring electronic submission of applications for orders under the Advisers Act could result in costs to applicants, including those associated with filing a Form ID for the first time in order to obtain the access codes needed to submit an application on the Commission's EDGAR system. As discussed in Section IV below, we expect these costs to be minimal.[143]

Similarly, non-resident general partners and non-resident managing agents of investment advisers, who currently file Form ADV–NR as a paper filing submission, might incur costs associated with switching to filing this form electronically via the IARD system. However, given that these filers are associated with investment advisers that already file Form-ADV through the IARD system, we expect that these costs would be minimal.[144]

The proposed amendments could result in additional costs associated with filing 13(f) Confidential Treatment Requests electronically. However, unlike the case of applications for orders under the Advisers Act where an applicant may have no prior experience with EDGAR and therefore may bear some initial cost, managers, by virtue of the fact that they are already filing Form 13F, are experienced in using the EDGAR system. The proposed amendments would merely change the manner in which a 13(f) Confidential Treatment Request is submitted, should a filer choose to make such a request. While filers are likely to incur some costs associated with the transition to an electronic process for the submission of 13(f) Confidential Treatment Requests, we believe these costs will be offset by the reduction in printing and delivery costs currently associated with paper submissions.[145]

The proposed amendments to Form 13F would also impose costs on managers because they would have to modify their electronic filing processes to, among other things, round dollar values on Form 13F to the nearest dollar, to discontinue omitting the ''000'' for such values, and to remove the character limits on the cover and summary pages.[146] In addition, managers may incur some costs to provide additional identifying information, though we do not believe these costs will be substantial because managers already have this information available. We do not expect the costs associated with these changes to be significant.[147]

[138] *See* 1985 Release, *supra* footnote 11.

[139] For such applications, the applications under the Investment Company Act were made in HTML on EDGAR, and the Advisers Act applications were submitted in paper.

[140] *See infra* footnote 161.

[141] *See supra* footnote 103.

[142] *See supra* footnote 115.

[143] *See infra* footnote 152.

[144] *See infra* section IV.B.1, noting that we estimate that there would be no change to our current internal burden estimate that Form ADV–NR requires an average of one hour to complete.

[145] *See infra* footnote 187.

[146] *See supra* footnote 119.

[147] *See supra* footnote 134.

3. Efficiency, Competition, and Capital Formation

Generally, because most of the proposed amendments simply streamline filing processes, we do not expect these amendments to have a significant effect on efficiency, competition, or capital formation. Nonetheless, in this section, we discuss the effects of the proposed amendments on efficiency, competition, and capital formation.

As discussed above, the proposed amendments regarding applications for orders under the Advisers Act could increase the speed at which the public has access to these applications. To the extent that applications for orders inform investors' decisions with respect to the selection or retention of investment advisers, more timely access to this information could result in more efficient decisions by investors with respect to how they select their investment advisers.

Similarly, as discussed above, the proposed technical amendments to Form 13F requiring that dollar values be rounded to the nearest dollar, that the ''000'' no longer be omitted, and the removal of character limits should increase the accuracy and utility of the information filed on Form 13F. In addition, the requirement that filers include additional identifying information when filing Form 13F should increase the usefulness of the information filed on Form 13F. To the extent the more accurate and useful data available to the public informs investment decisions, the information efficiency of the market may be enhanced.

D. Reasonable Alternatives

In formulating the proposed amendments, we considered several alternatives to the proposed amendments that retain the central requirement that filings that are currently filed on paper be filed electronically, but they differ with respect to how the filings would be made. This section discusses these alternatives.

1. Alternative Filing System for Advisers Act Orders

The proposed amendments would require investment advisers to file applications for orders under the Advisers Act on the Commission's EDGAR system. Alternatively, the Commission could require investment advisers to file applications through some other system. For example, as noted in section III.A.1.a above, advisers who register with the Commission do so through the IARD system rather than EDGAR. Thus, filing through the IARD system would offer the potential benefit of greater applicant familiarity with the filing system.

While we acknowledge that some applicants may be more familiar with the IARD system than EDGAR, we propose to make mandatory electronic submissions of Advisers Act applications on EDGAR for several reasons. First, we believe the cost to advisers would be relatively low because we are proposing to assess no filing fees associated with these submissions through EDGAR. Many advisers also likely have experience submitting electronic filings via EDGAR because their managers may already be required to submit Form 13F via EDGAR, reducing the costs associated with setting up systems and processes to comply with the amendments. Second, filing in EDGAR would allow for applications under the Investment Company Act and the Advisers Act to be filed jointly, reducing filing cost.

2. Alternative Filing System for 13(f) Confidential Treatment Requests

The proposed amendments would require managers to file 13(f) Confidential Treatment Requests on the Commission's EDGAR system. Alternatively, the Commission could require that confidential treatment requests be submitted electronically via a secure file transfer service. Some managers were able to use such a service to submit their confidential treatment requests to mitigate delays in receiving paper filings during the events of COVID–19.[148]

Requiring submission via a secure file transfer service would have the benefit that some managers may already be familiar with the process of submitting filings using such a system based on their experience over the last year. However, in light of the fact that all managers are already familiar with the process of making filings on EDGAR, we believe it would be less burdensome for managers to make 13(f) Confidential Treatment Request filings on EDGAR as well.[149] Additionally, because 13(f) Confidential Treatment Requests would be viewable on the same system as a manager's public Form 13F filing, the Commission would be able to review all of a manager's holdings efficiently.[150]

3. Single Form 13F Filing With Electronic Attachment

Rather than requiring managers to file 13(f) Confidential Treatment Requests electronically via EDGAR, we considered modifying existing Form 13F in such a way that filers would list all reportable 13(f) Securities on the form but indicate for which securities, if any, they were seeking confidential treatment. Filers would indicate that they were seeking confidential treatment for particular securities by checking a box associated with a security and also indicating the length of time for which they were seeking confidential treatment. Securities for which the filer checked the box would not be visible to public users of the EDGAR system. Filers requesting confidential treatment would still be required to attach a confidential electronic document in which they would indicate the type of confidential request and provide factual support to enable the Commission to make an informed judgment as to the merits of the request.

This alternative of a single Form 13F filing offers the benefit of slightly reducing the burden on the filer from filing multiple lists of securities to filing a single list and potentially decreasing the time between when a 13(f) Confidential Treatment Request is denied or expires and the time when an amended Form 13F is filed publicly. However, we believe that this approach would significantly increase the risk of confidential information inadvertently being made public, including by filers who complete the single form incorrectly.

E. Request for Comment

The Commission requests feedback on any aspect of the above economic analysis, including our description of the current economic baseline, the potential costs and benefits of the proposed amendments, their effect on efficiency, competition, and capital formation, and any reasonable alternatives we should consider. In addition, we request comment on the following aspect of the proposal:

34. Would filers, investors, or other members of the public realize any benefits if we required that applications for orders under the Advisers Act be submitted in a structured data language, such as a custom XML-based data language, rather than in ASCII or HTML? Please explain why or why not. If so, are there certain data fields in particular that would provide such benefits to filers, investors, and other interested parties if submitted in a

[148] *See supra* footnote 132.

[149] *See supra* footnote 84.

[150] *See supra* text following footnote 82.

structured data language? What costs would these parties incur if we required such applications to be submitted using a structured data language?

IV. Paperwork Reduction Act

The proposed rule and form amendments contain ''collections of information'' within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[151] We are submitting the proposed collections of information to the Office of Management and Budget (''OMB'') for review in accordance with 44 U.S.C. 3507(d) and 5 CFR 1320.11. The titles for the collections of information we are proposing to amend are: (i) ''Rule 0–4 under the Investment Advisers Act of 1940, General Requirements of Papers and Applications'' (OMB Control No. 3235–0633); (ii) ''Form 13F, Report of Institutional Investment Managers (pursuant to sec. 13(f) of the Securities Exchange of 1934)'' (OMB Control No. 3235–0006); and, (iii) ''Rule 0–2 and Form ADV–NR under the Investment Advisers Act of 1940'' (OMB Control No. 3235–0240). We are not proposing to amend the collections of information entitled (i) ''Form ID'' (OMB Control No. 3235–0328),[152] or (ii) ''Form ADV'' (OMB Control No. 3235–0049). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

A. Amendments to Rule 0–4

Rule 0–4 under the Advisers Act prescribes general instructions for filing papers and applications under the Advisers Act with the Commission. The proposed amendments to rule 0–4 would require that every application for an order under any provision of the Advisers Act, for which a form with instructions is not specifically prescribed, and every amendment to such application be electronically filed pursuant to Regulation S–T.[153] The proposed amendments to rule 0–4 would eliminate the requirements to have verifications of applications and statements of facts made in connection with applications notarized[154] and would eliminate the requirement that applications include proposed notices as exhibits to applications.[155] In addition, the proposed amendments to rule 0–4 would specify that paper submissions should be addressed to the Secretary of the Commission,[156] remove the reference to microfilming[157] and clarify the wording related to duplicate original copies of paper applications.[158]

Respondents to the collection of information are applying for orders of the Commission exempting them from one or more provisions of the Advisers Act. The requirements of rule 0–4 are designed to provide Commission staff with the necessary information to assess whether granting the orders of exemption is necessary and appropriate, in the public interest and consistent with the protection of investors and the intended purposes of the Act. This collection of information is necessary in order to obtain or retain benefits. Responses will not be kept confidential.

Applicants for orders under the Advisers Act file applications as they deem necessary. Applicants can include registered investment advisers, affiliated persons of registered investment advisers and entities seeking to avoid investment adviser status, among others. The Commission estimates that it receives seven initial applications per year submitted under rule 0–4 of the Advisers Act.[159] Although some applications are submitted on behalf of multiple applicants, these applicants in the vast majority of cases are related entities and are treated as a single respondent for purposes of this analysis.

1. Burden Estimate for Rule 0–4

Most of the work of preparing an application is performed by outside counsel and, therefore, imposes no internal hourly burden on the respondents.[160] We do not believe that our proposed amendments would change the burden on applicants. Likewise, we do not believe that our proposed amendments would change the number of such applications that are filed annually. Therefore, because there will continue to be no internal hourly burden we believe that the current initial and annual hour burdens for such applications remain appropriate.

We are, however, proposing to decrease the external costs associated with the existing collection of information for rule 0–4 to reflect the proposed amendments.[161] The proposed amendments would eliminate the requirement to notarize applications. The notary service is typically provided by a secretary or similar administrative employee of the applicant or the outside counsel preparing the application and represents a negligible hour or cost burden to the applicant, so elimination of the notarization requirement would reduce the cost burden only a small amount. However, we believe that these cost savings would be offset by the costs associated with transitioning to an electronic submission process, such as updating policies and procedures, recordkeeping methods and time spent learning to use the IARD system. The proposed amendments would require that paper submissions under rule 0–4 be addressed to the Secretary of the Commission, remove the reference to microfilming[162] and clarify the wording related to duplicate original copies of paper applications. These amendments decrease the applicant's cost burden. However, we believe that these cost savings would also be offset by the time and costs associated with transitioning to an electronic submission process. The proposed amendments would also eliminate the requirement that applicants include proposed notices as exhibits to applications. A proposed notice is a summary of the statements in the application. Based on staff experience, we believe that preparation of the proposed notice by outside counsel represents approximately 1% of the cost of preparing an application.[163] We estimate that the total reduction in

[151] 44 U.S.C. 3501 through 3521.

[152] The Commission estimates that each year only one applicant for an order under any provision of the Advisers Act would need to file a Form ID with the Commission in order to gain access to EDGAR. Form ID is used to request the assignment of access codes to file on EDGAR. Any applicant that has made at least one filing with the Commission via EDGAR since 2002 has been entered into the EDGAR system by the Commission and would not need to file Form ID in order to file electronically on EDGAR. However, applicants that have never made a filing with the Commission via EDGAR would need to file Form ID. We estimate that only one applicant for an order under any provision of the Advisers Act would need to file a Form ID with the Commission each year in order to gain access to EDGAR. Thus, we believe that the proposed amendments would not impose substantive new burdens on the overall population of respondents or affect the current overall cost estimates for Form ID. Therefore, we believe that the current burden and cost estimates for Form ID remain appropriate. Accordingly, we are not revising the current burden or cost estimates for Form ID.

[153] Proposed rule 0–4(b).

[154] *See* rule 0–4(d) [17 CFR 275.0–4(d)].

[155] *See* rule 0–4(g) [17 CFR 275.0–4(g)].

[156] Proposed rule 0–4(a).

[157] Proposed rule 0–4(b).

[158] Proposed rule 0–4(i).

[159] *See e.g.,* 17 CFR 275.206(4)–5(e) (providing that the Commission may, upon application, exempt an adviser from certain of the rule's restrictions, and providing a non-exclusive list of factors the Commission will consider when evaluating these applications).

[160] Nevertheless, the Commission continues to estimate one burden annual hour for administrative purposes. *See* Supporting Statement for ''Rule 0–4 under the Investment Advisers Act of 1940, General Requirements of Papers and Applications'' (OMB Control No. 3235–0633).

[161] We most recently estimated the annual cost burden to applicants of filing all applications to be $392,500.

[162] Proposed rule 0–4(b).

[163] *See* 2008 IC Applications Release, *supra* footnote 15.

the external costs would be approximately $4,091.[164]

Table 3 below summarizes the proposed cost burden estimates to applicants applying for exemptive relief under proposed rule 0–4.

TABLE 3

	Types of applications	Current external cost burden per filing [1]	Estimated reduction in external cost [2]	Estimated external cost burden per filing		Number of applications [3]	Estimated external cost burden per filing type
Adviser Act Exemptive Applications.	Well Precedented Applications.	[4] $14,182	$(141)	$14,041	x	3	$42,123
	Medium Complexity Applications.	48,282	(483)	47,799		3	143,397
	High Complexity Applications.	221,909	(2,219)	219,690		1	219,690
				Total estimated annual external cost burden for Advisers Act Applications			405,210

Notes:

[1] Based on conversations with applicants and attorneys, the cost for applications ranges from approximately $14,182 for preparing a well-precedented, routine (or otherwise less involved) application, $48,282 for preparing medium complex applications and approximately $221,909 to prepare a complex or novel application.

[2] We estimate that preparation of the proposed notice by outside counsel represents approximately 1% of the cost of preparing an application.

[3] We estimate that the Commission annually receives three of the well-precedented applications, three applications of medium complexity, and one high complexity applications.

[4] The cost outside counsel charges applicants depends on the complexity of the issues covered by the application and the time required. Based on conversations with applicants and attorneys, the cost for applications ranges from approximately $14,182 for preparing a well-precedented, routine (or otherwise less involved) application to approximately $221,909 to prepare a complex or novel application. $48,282 is the median between $14,182 and $221,909. Supporting Statement for ''Rule 0–4 under the Investment Advisers Act of 1940, General Requirements of Papers and Applications'' (OMB Control No. 3235–0633). We have adjusted these numbers to reflect changes in prices from the 2019 estimates based on the U.S. Bureau of Labor Statistic's CPI Inflation calculator. We estimate that the Commission receives one of the most time-consuming applications annually, three applications of medium complexity, and three of the least complex applications subject to rule 0–4. There are no ongoing expenses.

B. Amendment to Form ADV–NR

Rule 0–2 under the Advisers Act establishes procedures by which a person may serve process, pleadings, or other papers on a non-resident investment adviser, or on a non-resident general partner or non-resident managing agent of an investment adviser.[165] Under Rule 0–2, persons who wish to serve the above-referenced parties may do so by furnishing the Commission with one copy of the papers that are to be served along with one copy for each named party.[166] The Secretary will promptly forward a copy to each named party by registered or certified mail. If the Secretary certifies that the rule was followed, the certification constitutes evidence of service of process under Rule 0–2. Form ADV–NR is required to be submitted by an investment adviser's non-resident general partner and non-resident managing agent in connection with the adviser's initial Form ADV submission or within 30 days of becoming a non-resident after the investment adviser submits its initial Form ADV.[167] The proposed amendments would require an investment adviser's non-resident general partners and non-resident managing agents to file Form ADV–NR electronically through IARD.[168] As part of the proposed amendments, the IARD would be modified to permit non-resident general partners and non-resident managing agents to meet this filing requirement electronically without the need for specialized software or hardware. In addition, IARD would not charge a separate fee for filing the Form ADV–NR or accessing the filing system apart from what IARD charges for filing Form ADV.

The respondents to this information collection would be each non-resident general partner or non-resident managing agent of an SEC-registered investment adviser and each non-resident general partner or non-resident managing agent of an exempt reporting adviser. This collection of information is mandatory. Responses are not kept confidential. The collection of information is necessary to provide appropriate consent to permit the Commission and other parties to bring actions against non-resident partners and managing agents for violations of the federal securities laws and to enable the commencement of legal and/or regulatory actions against investment advisers that are doing business in the United States, but are not residents.

1. Burden Estimate for Form ADV–NR

[164] The total external cost reduction of 1% would amount to $4,091 given the estimated distribution of all applications: ($141 × 3) + ($483 × 3) + ($2,219 × 1) = $4,091. *See* Table 3.

[165] 17 CFR 275.0–2.

[166] 17 CFR 275.0–2.

[167] 17 CFR 279.4, 17 CFR 297.1.

[168] *See* proposed Form ADV–NR.

We estimate that proposed changes to the filing of ADV–NR would require an average of one hour to complete, the same as our current internal burden estimate. The currently approved collection of information burden in Form ADV–NR is 53 hours, which is based on our prior estimate of 53 annual responses at 1 hour per response. During 2018 to 2020 period, a total of 147 registered investment advisers and exempt reporting advisers filed reports with the Commission that included a Form ADV–NR, for an average of 49 filed reports per year.[169] Accordingly, we estimate that, based on the change in the estimate of number of filers of Form ADV–NR, the annual aggregate information collection burden for Form ADV–NR will be 49 hours, a decrease of 4 hours under the currently approved burden of 53 hours.

An adviser would likely use a combination of compliance clerks and general clerks to complete Form ADV–NR and file it with the Commission through IARD. The Commission staff estimates the hourly wage for compliance clerks to be $71 per hour, including benefits,[170] and the hourly wage for general clerks to be $63 per hour, including benefits.[171] For each burden hour, compliance clerks would perform an estimated 0.75 hours, and general clerks also would perform an estimated 0.25 hours. The total cost per response therefore would be an estimated $69,[172] for a total burden cost of $3,381.[173]

TABLE 4—SUMMARY OF THE AGGREGATE ANNUAL NUMBER OF INVESTMENT ADVISERS, TIME BURDEN, AND MONETIZED TIME BURDEN

Description	Requested	Previously approved	Change
Number of registered investment advisers and exempt reporting advisers who filed Form ADV–NR	49	53	(4)
Time burden (hours)	49	53	(4)
Monetized Time Burden (Dollars) [1]	$3,381	$3,657	$(276)

Note:
[1] *See supra* footnotes 173–176 and accompanying text.

C. Form ADV and Rule 203–1

Form ADV is the investment adviser registration form and exempt reporting adviser reporting form filed electronically with the Commission pursuant to rules 203–1 (17 CFR 275.203–1), 204–1 (17 CFR 275.204–1) and 204–4 (17 CFR 275.204–4) under the Advisers Act by advisers registered with the Commission or applying for registration with the Commission or by exempt reporting advisers filing reports with the Commission. Rule 203–1 under the Advisers Act requires every person applying for investment adviser registration with the Commission to file Form ADV.[174] The paperwork burdens associated with rules 203–1, 204–1, and 204–4 are included in the approved annual burden associated with Form ADV and thus do not entail separate collections of information. These collections of information are found at 17 CFR 275.203–1, 275.204–1, 275.204–4 and 279.1 (Form ADV itself) and are mandatory. Responses are not kept confidential.

We are proposing to amend the instructions to Form ADV and rule 203–1 to require an investment adviser's non-resident general partner and non-resident managing agents to file Form ADV–NR electronically through IARD. As discussed above, the collection of information is necessary for us to obtain appropriate consent to permit the Commission and other parties to bring actions against non-resident partners and agents for violations of the federal securities laws and to enable the commencement of legal and/or regulatory actions against investment advisers that are doing business in the United States, but are not residents.[175]

We do not believe that the proposed amendments to Form ADV or rule 203–1 would change the burden on investment advisers' application for registration with the Commission. Likewise, we do not believe that our proposed amendments would change the number of such registrations that are filed annually. Therefore, we believe that the current burden and cost estimates for Form ADV remain appropriate. Accordingly, we are not revising the current burden or cost estimates for Form ADV.

[169] The number of Form ADV–NRs filed between 2018 and 2020 were as follows: 2020, 5 filings; 2019, 53 filings; and, 2018, 89 filings. Three year average: (5 + 53 + 89)/3 = 49.

[170] Data from the SIFMA *Office Salaries in the Securities Industry 2013* report, modified by Commission staff to account for a 1,800-hour work-year and inflation, and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead, suggest that the cost for a compliance clerk is approximately $71 per hour.

[171] Data from the SIFMA *Office Salaries in the Securities Industry 2013* report, modified by Commission staff to account for a 1,800-hour work-year and inflation, and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead, suggest that the cost for a general clerk is approximately $63 per hour.

[172] (0.75 hours per compliance clerk × $71) + (0.25 hours per general clerk × $63) = $69.

[173] $69 per adviser × 49 advisers = $3,381.

[174] Rule 204–4 under the Advisers Act requires certain investment advisers exempt from registration with the Commission (''exempt reporting advisers'') to file reports with the Commission by completing a limited number of items on Form ADV. Rule 204–1 under the Advisers Act requires each registered and exempt reporting adviser to file amendments to Form ADV at least annually, and requires advisers to submit electronic filings through IARD.

[175] *See* section IV.B.

D. Amendments to Form 13F

In our most recent PRA submission for Form 13F, we estimated a total hour burden of 472,521.6 hours, with an internal cost burden of $31,186,425.60, and with no annual external cost burden.[176] In the 2020 Form 13F Proposal, the Commission expressed its belief that these estimates do not appropriately reflect the information collection costs associated with Form 13F.[177] The Commission also noted that the current burden estimates assume that the same number of hours and costs are necessary to prepare and file Form 13F–HR and the abbreviated Form 13F–NT filings, even though reports on Form 13F–HR would involve greater burdens.[178] This results in a current overestimation of the costs associated with filing Form 13F–NT. Therefore, the Commission proposed to revise the current PRA burdens associated with filing Form 13F and requested comment on whether the revised estimates accurately reflected the PRA burdens associated with filing Form 13F.[179]

Commenters generally disagreed with our proposed estimates and stated that we over-estimated the costs associated with complying with the Form 13F filing obligations.[180] Commenters stated that the advances in technology have made the process of completing and filing Form 13F highly automated, reducing the time and external costs to managers in complying with this requirement.[181] One commenter disagreed with our assumption that a compliance attorney would need to be involved with the determination of whether a manager meets the filing threshold for Form 13F.[182] However, another commenter stated that complying with the requirements to file a 13(f) Confidential Treatment Request can be particularly time consuming and costly.[183]

We have considered the comments we received on our proposed estimates and are revising the current PRA burdens associated with filing Form 13F to incorporate the feedback we received from commenters.[184] While we continue to believe that professionals beyond a compliance clerk are involved in complying with Form 13F, we agree with commenters that advances in technology over time have significantly decreased the number of hours managers spend to satisfy their compliance obligations. Additionally, we agree with commenters that using a blended rate for all the professionals involved may overestimate the costs of the time spent on complying with Form 13F.[185] After considering the comments, we also believe that the Commission's proposed revisions to the external costs associated with complying with Form 13F as well as the revisions to the PRA burdens associated with Form 13F amendments that were included in the 2020 Form 13F Proposal are appropriate. Therefore, the table below summarizes our adjustments to the current PRA estimates of complying with Form 13F based on commenter feedback as well as the initial and ongoing annual burden estimates associated with amendments to Form 13F related to the requirements for managers to provide additional identifying information and the technical amendments to Form 13F discussed above.[186] We believe that our proposed amendments to the process for filing 13(f) Confidential Treatment Requests would not change the burden of filing Form 13F Reports with the Commission.[187]

BILLING CODE 8011–01–P

[176] This estimate is based on the last time the rule's information collection was submitted for PRA renewal in 2018.

[177] *See* 2020 Form 13F Proposal, *supra* footnote 4 (explaining that the current burden estimates for Form 13F assume that all of the functions are carried out by a compliance clerk, whereas we understand that additional professionals are typically involved. The current burden estimates also do not include external costs for third-party vendors, which we understand many managers use in connection with their filings on Form 13F, or external legal counsel, who may provide advice in connection with the form's reporting requirements or actual or potential 13F Confidential Treatment Requests).

[178] *See supra* footnote 98 (explaining the difference between Form 13F–HR and Form 13F–NT).

[179] The Commission did not revise the burden hours previously estimated for Form 13F compliance. Rather, the Commission revised the internal time costs associated with complying with Form 13F by assuming that a compliance attorney and senior programmer, in addition to a compliance clerk, would be involved in completing and filing Form 13F and its related amendments and requests for confidential treatment.

[181] *Id; see also* Comment Letter of The Security Traders Association of New York, Inc. on File No. S7–08–20 (Sept. 29, 2020), *available at https://www.sec.gov/comments/s7-08-20/s70820-7860080-223918.pdf* (also stating that the Commission's estimated hourly costs of filing likely overestimates costs of reporting by using standard and equal estimate of compliance, attorney, and coding time); Comment Letter of ACN Solutions LLC on File No. S7–08–20 (Sept. 10, 2020), *available at https://www.sec.gov/comments/s7-08-20/s70820-7757531-223233.pdf* (''ACN 2020 Form 13F Proposal Comment Letter'') (stating that the Commission's estimates overstate the burdens of Form 13F on firms and estimating that managers incur $500 in external costs annually); Comment Letter of Global Endowment Management, LP on File No. S7–08–20 (Sept. 29, 2020), *available at https://www.sec.gov/comments/s7-08-20/s70820-7859976-223853.pdf* (estimating that the commenter spends 2 hours of internal time and $125 of external service provider expense each quarter); *see also* AIMA 2020 Form 13F Proposal Comment Letter, *supra* footnote 99 (also noting that the Commission did not take into account other external costs of complying with Form 13F, such as the licensing fees charges for the use of CUSIP numbers).

[182] ACN 2020 Form 13F Proposal Comment Letter, *supra* footnote 180.

[183] *See* Private Investor Coalition 2020 Form 13F Proposal Comment Letter, *supra* footnote 132 (stating that, in addition to the costs of the Form 13F, managers entitled to confidential treatment bear the burdens of preparing a 13(f) Confidential Treatment Request, including the associated expenses of engaging an attorney or other service to file a paper copy of the 13(f) Confidential Treatment Request with the Commission each quarter).

[184] We are proposing to revise the current burden estimates for Form 13F–HR and Form 13F–NT.

[185] In particular, while a compliance attorney may be involved in determining whether a manager can, or should, file a 13(f) Confidential Treatment Request for each Form 13F filing, it is unlikely that a compliance attorney will spend the same amount of time as other professionals tasked with making the Form 13F filing itself, such as a senior programmer and compliance clerk.

[186] *See supra* section II.B.2.

[187] We believe that our proposed amendments to the process for filing 13(f) Confidential Treatment Requests would reduce printing and delivery expenses that managers incur to comply with Form 13F. However, we believe that these savings would be offset by the costs associated with transitioning to an electronic submission process for 13(f) Confidential Treatment Requests. Therefore, for PRA purposes, we do not believe that these proposed amendments would change the burdens associated with complying with Form 13F. We likewise do not believe that our proposed amendments would change the number of Form 13F Reports or Form 13(f) Confidential Treatment Requests that are filed annually.

Table 5: Form 13F PRA Estimates

	Initial hours	Annual hours		Wage rate	Internal time cost	External costs[1]
REVISIONS TO CURRENT PRA BURDEN ESTIMATES						
Revised Burdens for 13F-HR Filings						
Current estimated annual burden of Form 13F-HR per filer		80.8 hours	x	$66[2]	$5,332.80	
Revised current annual estimated burden per filer		10 hours[3]	x	$202.50 (blended rate for senior programmer and compliance clerk)[4]	$2,025	$789[6]
		1 hour[3]		$368 (compliance attorney rate)[5]	$368	
Total revised estimates burden per filer		11 hours			$2,393	$789
Number of filers		5,466 filers[7]			5,466 filers	5,466 filers
Revised current annual burden of Form 13F-HR filings		60,126 hours			$13,080,138	$4,312,674
Revised Burdens for 13F-NT Filings						
Current estimated annual burden of Form 13F-NT		80.8 hours				
Revised current annual burden of Form 13F-NT per filer		4 hours	x	$71 (wage rate for compliance clerk)	$284	$300
Number of filers		1,535 filers[8]			1,535 filers	1,535 filers
		6,140 hours			$435,940	$460,500
Revised Burdens for Form 13F Amendment Filings						
Current estimated burden per amendment filing		4 hours		$66.00	$264	
Revised current estimated burden per amendment		3.5 hours[9]	x	$202.50 (blended rate for senior programmer and compliance clerk)	$708.75	$300
		0.5 hour[9]		$368 (compliance attorney rate)	$184	
Total revised estimated burden per amendment		4 hours			$892.75	$300
Number of amendments		244 amendments[10]			244 amendments	244 amendments
Revised current annual estimated burden of all amendments		976 hours			$217,831	$73,200
PROPOSED AMENDMENTS TO FORM 13F[11]						
Estimated Form 13F-HR Burdens						
Proposed Amendments to Form 13F-HR per filer (additional identifying information and technical amendments)	9 hours	3.5 hours[12]	x	$202.50 (blended rate for senior programmer and compliance clerk)[13]	$708.75	$0
	2 hours	0.67 hours[12]	x	$368 (compliance	$246.56	

				attorney rate)[13]		
Total burden of proposed amendments to Form 13F-HR per filer		4.17			$955.31	
New annual estimated Form 13F-HR burden per filer		15.17 hours			$3,348.31	$789
Number of annual filers		x 5,466 filers			× 5,466 filers	×5,466 filers
Total new annual burden		82,919.2 hours			$18,301,862.5	$4,312,674
Estimated Form 13F-NT Burdens						
Proposed Amendments to Form 13F-NT (additional identifying information)	5 hours	2.17 hours[12]	x	$202.50 (blended rate for senior programmer and compliance clerk)[14]	$439.43	$0
	1 hour	0.33 hours[12]		$368 (compliance attorney rate)[14]	$121.44	
Total burden of proposed amendments to Form 13F-NT		2.5 hours			$560.87	
New annual estimated Form 13F-NT burden per filer		6.5 hours			$844.87	$300
Number of annual filers		1,535 filers			1,535 filers	1,535 filers
Total new annual burden		9,977.5 hours			$1,296,875.45	$460,500
TOTAL ESTIMATED FORM 13F BURDEN						
Currently approved burden estimates	472,521.6 hours				$31,186,425.60	$0
Revised current burden estimates	67,242 hours				$13,733,909	$4,846,374
Burden estimates under the proposal	93,872.7 hours				$19,816,569	$4,846,374

Notes:

1. The external costs of complying with Form 13F can vary among filers. Some filers use third-party vendors for a range of services in connection with filing reports on Form 13F, while other filers use vendors for more limited purposes such as providing more user-friendly versions of the list of section 13(f) Securities. For purposes of the PRA, we estimate that each filer will spend an average of $300 on vendor services each year in connection with the filer's four quarterly reports on Form 13F-HR or Form 13F-NT, as applicable, in addition to the estimated vendor costs associated with any amendments. In addition, some filers engage outside legal services in connection with the preparation of requests for confidential treatment or analyses regarding possible requests, or in connection with the form's disclosure requirements. For purposes of the PRA, we estimate that each manager filing reports on Form 13F-HR will incur $489 for one hour of outside legal services each year.
2. $66 was the estimated wage rate for a compliance clerk in 2018.
3. The estimate reduces the total burden hours associated with complying with the reporting requirements of Form 13F-HR from 80.8 to 11 hours. We believe that this reduction adequately reflects the reduction in the time managers spend complying with Form 13F-HR as a result of advances in technology that have occurred since Form 13F was adopted. The revised estimate also assumes that an in-house compliance attorney would spend 1 hour annually on the preparation of the filing, as well as determining whether a 13(f) Confidential Treatment Request should be filed. The remaining 10 hours would be divided equally between a senior programmer and compliance clerk.
4. The $202.50 wage rate reflects current estimates of the blended hourly rate for an in-house senior programmer ($334) and in-house compliance clerk (S71). $202.50 is based on the following calculation: ($334–$71) / 2 = S202.50. The $334 per hour figure for a senior programmer is based on salary information for the securities industry compiled by the Securities Industry and Financial Markets Association's Office Salaries in the Securities Industry 2013 ("SIFMA Report"), modified by Commission staff to account for an 1800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead. The $71 per hour figure for a compliance clerk is based on salary information from the SIFMA Report, modified by Commission staff to account for an 1800-hour work-year and inflation, and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead.
5. The $368 per hour figure for a compliance attorney is based on salary information for the securities industry compiled by the Securities Industry and Financial Markets Association's Office Salaries in the Securities Industry 2013 ("SIFMA Report"), modified by Commission staff to account for an 1800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.
6. $789 includes an estimated $300 paid to a third-party vendor in connection with the Form 13F-HR filing as well as an estimated $489 for one hour of outside legal services. We estimate that Form 13F-HR filers will require some level of external legal counsel in connection with these filings.
7. This estimate is based on the number of 13F-HR filers as of December 2019.
8. This estimate is based on the number of Form 13F-NT filers as of December 2019.
9. The revised assumes that an in-house compliance attorney would spend 0.5 hours annually on the preparation of the filing amendment, as well as determining whether a 13(f) Confidential Treatment Request should be filed. The remaining 3.5 hours would be divided equally between a senior programmer and compliance clerk.
10. This estimate is based on the number of Form 13F amendments filed as of December 2019.
11. We do not believe that the proposed amendments to Form 13F would change the PRA burdens associated with filing amendments to Form 13F.
12. Includes initial burden estimates annualized over a three-year period, plus 0.5 hours of ongoing annual burden hours for a senior programmer and compliance clerk. The estimates assume that a compliance attorney would only be involved in the initial implementation of the amendments.
13. These PRA estimates assume that the same types of professionals would be involved in satisfying the proposed amendments that we believe otherwise would be involved in preparing and filing reports on Form 13F-HR.
14. These PRA estimates assume that the same types of professionals would be involved in satisfying the proposed amendments that we believe otherwise would be involved in preparing and filing reports on Form 13F-NT.

BILLING CODE 8011–01–C

E. Request for Comments

We request comment on whether our estimates for burden hours and external costs as described above are reasonable. Pursuant to 44 U.S.C. 3506(c)(2)(B), the Commission solicits comments in order to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) evaluate the accuracy of the Commission's estimate of the burden of the proposed collection

of information; (3) determine whether there are ways to enhance the quality, utility, and clarity of the information to be collected; and (4) determine whether there are ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Persons wishing to submit comments on the collection of information requirements of the proposed amendments should direct them to the OMB Desk Officer for the Securities and Exchange Commission, *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov,* and should send a copy to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090, with reference to File No. S7–15–21. OMB is required to make a decision concerning the collections of information between 30 and 60 days after publication of this release; therefore a comment to OMB is best assured of having its full effect if OMB receives it within 30 days after publication of this release. Requests for materials submitted to OMB by the Commission with regard to these collections of information should be in writing, refer to File No. S7–15–21, and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

V. Regulatory Flexibility Act Certification

Pursuant to Section 605(b) of the Regulatory Flexibility Act [188] (''RFA''), the Commission hereby certifies that the proposed amendments to rules 11, 100, 101, 102, and 201 of Regulation S–T [189] rule 0–4 under the Advisers Act [190] relating to the electronic filing of applications for orders under the Advisers Act and the Investment Company Act; rule 203–1,[191] Form ADV–NR and the instructions to Form ADV under the Advisers Act [192] relating to the electronic filing of Form ADV–NR, would not, if adopted, have a significant economic impact on a substantial number of small entities.[193] The Commission estimates that it will receive initial applications seeking relief from various provisions of the Advisers Act from six applicants per year. The Commission estimates that few, if any, of the six applicants would be small entities for the purposes of the Advisers Act and the RFA.[194] Moreover, as discussed in Sections III and IV above, the proposed amendments would have little, if any, economic impact. Therefore, there would be no significant economic impact on a substantial number of small entities.

Pursuant to Section 605(b) of the RFA,[195] the Commission hereby certifies that the proposed amendments to rule 0–2 under the Investment Company Act [196] would not, if adopted, have a significant economic impact on a substantial number of small entities.[197] As discussed in Sections III and IV above, the proposed amendments would have little, if any, economic impact. Therefore, there would be no significant economic impact on a substantial number of small entities.

Pursuant to Section 605(b) of the RFA,[198] the Commission hereby certifies that the proposed amendments to rule 24b–2 under the Exchange Act, Form 13F and rules 101(a)(1)(xxii) and 101(d) of Regulation S–T relating to the requirement that Managers electronically file requests for 13(f) Confidential Treatment Requests, along with other amendments to Form 13F, would not, if adopted, have a significant economic impact on a substantial number of small entities. The definition of the term ''small entity'' in rule 0–10 under the Exchange Act does not explicitly reference investment advisers or other investment managers. However, rule 0–10 provides that the Commission may ''otherwise define'' small entities for purposes of a particular rulemaking proceeding. For purposes of the proposed amendments relating to managers electronically filing requests for 13(f) Confidential Treatment Requests and the other amendments to Form 13F, the Commission is defining small entity by using the definition of small entity under rule 0–7(a) under the Advisers Act as more appropriate to the functions of managers.[199] The Commission believes that this definition would help ensure that all persons or entities that might be institutional investment managers under section 13(f) of the Exchange Act will be included within a category addressed by the definition. The Commission requests comments on the use of this definition.

Managers are not required to submit reports on Form 13F unless they exercise investment discretion with respect to accounts holding 13(f) Securities having an aggregate fair market value on the last trading day of any month of any calendar year of at least $100 million. Therefore, no small entities for purposes of rule 0–10 under the Exchange Act are affected by the form. Therefore, there would be no significant economic impact on a substantial number of small entities. The Commission requests written comments regarding these certifications. The Commission requests that commenters describe the nature of any impact on small businesses and provide empirical data to support the extent of the impact.

VI. Consideration of the Impact on the Economy

[188] 5 U.S.C. 605(b).

[189] 17 CFR 232.11, 232.100, 232.101, 232.102, and 232.201.

[190] 17 CFR 275.0–4.

[191] 17 CFR 274.203–1.

[192] 17 CFR 279.4; 17 CFR 279.1.

[193] For the purposes of the Advisers Act and the RFA, an investment adviser generally is a small entity if it: (i) Has assets under management having a total value of less than $25 million; (ii) did not have total assets of $5 million or more on the last day of its most recent fiscal year; and (iii) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had $5 million or more on the last day of its most recent fiscal year. 17 CFR 275.0–7(a).

[194] This estimate is based on the fact that none of the 17 initial applications received over the last three calendar years as posted on the Commission website came from small entities.

[195] *See supra* footnote 187.

[196] 17 CFR 270.0–2.

[197] For purposes of the Investment Company Act and the RFA, an investment company is a small entity if it, together with other investment companies in the same group of related investment companies, has net assets of $50 million or less as of the end of its most recent fiscal year. 17 CFR 270.0–10(a).

[198] *See supra* footnote 187.

[199] *See supra* footnote 192. Therefore, for purposes of this rulemaking and the RFA, a manager is a small entity if it: (i) Has assets under management having a total value of less than $25 million; (ii) did not have total assets of $5 million or more on the last day of its most recent fiscal year; and (iii) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent fiscal year.

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996, or ''SBREFA,'' [200] we must advise OMB whether a proposed regulation constitutes a ''major'' rule. Under SBREFA, a rule is considered ''major'' where, if adopted, it results in or is likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers or individual industries; or (3) significant adverse effects on competition, investment or innovation.

The Commission requests comment on the potential impact of the proposed amendments on the economy on an annual basis. The Commission requests that commenters provide empirical data and other factual support for their views to the extent possible.

VII. Statutory Authority

The Commission is proposing the amended rules and form under the rulemaking authority set forth in sections 3, 12, 13, 14, 15(d), 23(a), and 35A of the Exchange Act [15 U.S.C. 78c, 78l, 78m, 78n, 78o(d), 78w(a), and 78ll]; sections 8, 30, 31, and 38 of the Investment Company Act [15 U.S.C. 80a–8, 80a–29, 80a–30, and 80a–37]; and sections 203, 204, 206A, 210, and 211 of the Advisers Act [15 U.S.C. 80b–3, 80b–4, 80b–6a, 80b–10, and 80b–11].

Text of Proposed Rule and Form Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

[200] Public Law 104–121, Title II, 110 Stat. 857 (1996) (codified in various sections of 5 U.S.C., 15 U.S.C. and as a note to 5 U.S.C. 601).

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 1. The general authority citation for part 232 is revised to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78*l,* 78m, 78n, 78o(d), 78w(a), 78*ll,* 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, 80b–4, 80b–6a, 80b–10, 80b–11, 7201 *et seq.;* and 18 U.S.C. 1350, unless otherwise noted.

* * * * *

■ 2. Amend § 232.11 by adding the definition of ''Investment Advisers Act'' in alphabetical order to read as follows:

§ 232.11 Definitions of terms used in this part.

* * * * *

Investment Advisers Act. The term *Investment Advisers Act* means the Investment Advisers Act of 1940.

* * * * *

§ 232.100 [Amended]

■ 3. Amend § 232.100 paragraph (b) by removing the term ''Registrants'' and adding in its place ''Persons or entities''.

■ 4. Amend § 232.101 by:

■ a. Revising paragraph (a)(1)(iv);

■ b. In paragraph (a)(1)(xxi), removing the period at the end of the paragraph and adding in its place a semicolon;

■ c. Adding paragraphs (a)(1)(xxii) and (xxiii); and

■ d. Revising paragraph (d).

The revisions and additions read as follows:

§ 232.101 Mandated electronic submissions and exceptions.

(a) * * *

(1) * * *

(iv) Documents filed with the Commission pursuant to sections 8, 17, 20, 23(c), 24(b), 24(e), 24(f), and 30 of the Investment Company Act (15 U.S.C. 80a–8, 80a–17, 80a–20, 80a–23(c), 80a–24(b), 80a–24(e), 80a–24(f), and 80a–29) and any application for an order under any section of the Investment Company Act (15 U.S.C. 80a–1 *et seq.*). The filing of an application for an order under any section of the Investment Company Act must be made on EDGAR as required by the EDGAR Filer Manual, as defined in § 232.11 (Rule 11 of Regulation S–T). Notwithstanding § 232.104 (Rule 104 of Regulation S–T), the documents filed or furnished under this paragraph will be considered as officially filed with or furnished to, as applicable, the Commission;

* * * * *

(xxii) Confidential treatment requests filed with the Commission pursuant to section 13(f) of the Exchange Act (15 U.S.C. 78m(f)) and the rules and regulations thereunder, including Form 13F (17 CFR 249.325). The filings must be made on EDGAR in the format required by the EDGAR Filer Manual, as defined in § 232.11 (Rule 11 of Regulation S–T). Notwithstanding § 232.104 (Rule 104 of Regulation S–T), the documents filed or furnished under this paragraph will be considered as officially filed with or furnished to, as applicable, the Commission; and

(xxiii) Any application for an order under any section of the Investment Advisers Act (15 U.S.C. 80b–1 *et seq.*). The filings must be made on EDGAR in the format required by the EDGAR Filer Manual, as defined in § 232.11 (Rule 11 of Regulation S–T). Notwithstanding § 232.104 (Rule 104 of Regulation S–T), the documents filed or furnished under this paragraph will be considered as officially filed with or furnished to, as applicable, the Commission.

* * * * *

(d) All documents, including any information with respect to which confidential treatment is requested, filed pursuant to section 13(n) (15 U.S.C. 78m(n)) and section 13(f) (15 U.S.C. 78m(f)) of the Exchange Act and the rules and regulations thereunder shall be filed in electronic format.

§ 232.102 [Amended]

■ 5. Amend § 232.102 paragraph (a) by adding the phrase '', Rule 0–6 under the Advisers Act (§ 275.0–6 of this chapter)'' after ''Rule 0–4 under the Investment Company Act (§ 270.0–4 of this chapter),''

■ 6. Amend § 232.201 by revising paragraph (a) introductory text to read as follows:

§ 232.201 Temporary hardship exemption.

(a) If an electronic filer experiences unanticipated technical difficulties preventing the timely preparation and submission of an electronic filing, other than a Form 3 (§ 249.103 of this chapter), a Form 4 (§ 249.104 of this chapter), a Form 5 (§ 249.105 of this chapter), a Form ID (§§ 239.63, 249.446, 269.7 and 274.402 of this chapter), a Form TA–1 (§ 249.100 of this chapter), a Form TA–2 (§ 249.102 of this chapter), a Form TA–W (§ 249.101 of this chapter), a Form D (§ 239.500 of this chapter), an application for an order under any section of the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*), an application for an order under any section of the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*), an Interactive Data File (as defined in § 232.11), or an Asset Data File (as defined in § 232.11), the electronic filer may file the subject filing, under cover of Form TH

(§§ 239.65, 249.447, 269.10 and 274.404 of this chapter), in paper format no later than one business day after the date on which the filing was to be made.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

■ 7. The general authority citation for part 240 continues to read as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z–2, 77z–3, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78c–3, 78c–5, 78d, 78e, 78f, 78g, 78i, 78j, 78j–1, 78k, 78k–1, 78*l,* 78m, 78n, 78n–1, 78o, 78o–4, 78o–10, 78p, 78q, 78q–1, 78s, 78u–5, 78w, 78x, 78*ll,* 78mm, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3, 80b–4, 80b–11, 7201 *et seq.* and 8302; 7 U.S.C. 2(c)(2)(E); 12 U.S.C. 5221(e)(3); 18 U.S.C. 1350; Pub. L. 111–203, 939A, 124 Stat. 1376 (2010); and Pub. L. 112–106, sec. 503 and 602, 126 Stat. 326 (2012), unless otherwise noted.

* * * * *

■ 8. Amend § 240.24b–2 by:

■ a. Removing the preliminary note in its entirety;

■ b. Adding an introductory paragraph;

■ c. In paragraph (b) removing the phrase ''paragraphs (g) and (h)'' and adding in its place ''paragraphs (g) through (i)''; and

■ d. Adding paragraph (i).

The additions read as follows:

§ 240.24b–2 Nondisclosure of information filed with the Commission and with any exchange.

Except as otherwise provided in this rule, confidential treatment requests shall be submitted in paper format only, whether or not the filer is required to submit a filing in electronic format.

* * * * *

(i) An institutional investment manager shall omit the confidential portion from the material publicly filed in electronic format pursuant to section 13(f) of the Act (15 U.S.C. 78m(f)) and the rules and regulations thereunder. The institutional investment manager shall indicate in the appropriate place in the material publicly filed that the confidential portion has been so omitted and filed separately with the Commission. In lieu of the procedures described in paragraph (b) of this section, an institutional investment manager shall request confidential treatment electronically pursuant to section 13(f) of the Act (15 U.S.C. 78m(f)) and the rules and regulations thereunder.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

■ 9. The general authority citation for part 249 continues to read as follows:

Authority: 15 U.S.C. 78a *et seq.* and 7201 *et seq.;* 12 U.S.C. 5461 *et seq.;* and 18 U.S.C. 1350; Sec. 953(b), Pub. L. 111–203, 124 Stat. 1904; Sec. 102(a)(3), Pub. L. 112–106, 126 Stat. 309 (2012), Sec. 107, Pub. L. 112–106, 126 Stat. 313 (2012), Sec. 72001, Pub. L. 114–94, 129 Stat. 1312 (2015), and secs. 2 and 3 Pub. L. 116–222, 134 Stat. 1063 (2020), unless otherwise noted.

* * * * *

Note: The text of Form 13F does not, and these amendments will not, appear in the Code of Federal Regulations.

■ 10. Revise Form 13F (referenced in § 249.325) to read as follows:

OMB APPROVAL	
OMB Number:	3235-0006
Expires:	February 28, 2022
Estimated average burden hours per response	23.8

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

Form 13F

INFORMATION REQUIRED OF INSTITUTIONAL INVESTMENT MANAGERS PURSUANT TO SECTION 13(f) OF THE SECURITIES EXCHANGE ACT OF 1934 AND RULES THEREUNDER

GENERAL INSTRUCTIONS

1. Rule as to Use of Form 13F. Institutional investment managers ("Managers") must use Form 13F for reports to the Commission required by Section 13(f) of the Securities Exchange Act of 1934 [15 U.S.C. 78m(f)] ("Exchange Act") and rule 13f-1 [17 CFR 240.13f-1] thereunder. Rule 13f-1(a) provides that every Manager which exercises investment discretion with respect to accounts holding Section 13(f) securities, as defined in rule 13f-1(c), having an aggregate fair market value on the last trading day of any month of any calendar year of at least $100,000,000 shall file a report on Form 13F with the Commission within 45 days after the last day of such calendar year and within 45 days after the last day of each of the first three calendar quarters of the subsequent calendar year.

2. Rules to Prevent Duplicative Reporting. If two or more Managers, each of which is required by rule 13f-1 to file a report on Form 13F for the reporting period, exercise investment discretion with respect to the same securities, only one such Manager must include information regarding such securities in its reports on Form 13F.

   A Manager having securities over which it exercises investment discretion that are reported by another Manager (or Managers) must identify the Manager(s) reporting on its behalf in the manner described in Special Instruction 5.

   A Manager reporting holdings subject to shared investment discretion must identify the other Manager(s) with respect to which the filing is made in the manner described in Special Instruction 7.

3. Filing of Form 13F. Rule 13f-1(a)(1) provides that a Manager must file a Form 13F report with the Commission within 45 days after the end of the calendar year and each of the first three calendar quarters of the subsequent calendar year. Form 13F must be filed electronically on the Commission's Electronic Data Gathering, Analysis, and Retrieval ("EDGAR") system, unless a hardship exemption has been granted. As required by Section 13(f)(5) of the Exchange Act, a Manager which is a bank, the deposits of which are insured in accordance

with the Federal Deposit Insurance Act, must file with the appropriate regulatory agency for the bank a copy of every Form 13F report filed with the Commission pursuant to this subsection by or with respect to such bank. Filers can satisfy their obligation to file with other regulatory agencies by sending a copy either electronically (provided the Manager removes or blanks out the confidential access codes) or in paper.

4. Official List of Section 13(f) Securities. The official list of Section 13(f) securities published by the Commission ("13F List") lists the securities the holdings of which a Manager is to report on Form 13F. See rule 13f-1(c) [17 CFR 240.13f-1(c)]. Form 13F filers may rely on the current 13F List in determining whether they need to report any particular securities holding. The current 13F List is available on www.sec.gov/divisions/investment/13flists.htm. The 13F List is updated quarterly.

INSTRUCTIONS FOR CONFIDENTIAL TREATMENT REQUESTS

Pursuant to Section 13(f)(4) of the Exchange Act [15 U.S.C. 78m(f)(4)], the Commission (1) may prevent or delay public disclosure of information reported on this form in accordance with Section 552 of Title 5 of the United States Code, the Freedom of Information Act [5 U.S.C. 552], and (2) shall not disclose information reported on this form identifying securities held by the account of a natural person or an estate or trust (other than a business trust or investment company). A Manager must submit in accordance with the procedures for requesting confidential treatment any portion of a report which contains information identifying securities held by the account of a natural person or an estate or trust (other than a business trust or investment company).

SEC 1685 (1-12)	Persons who respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number

A Manager should make requests for confidential treatment of information reported on this form in accordance with rule 24b-2(i) under the Exchange Act [17 CFR 240.24b-2]. Requests relating to the non-disclosure of information identifying the securities held by the account of a natural person or an estate or trust (other than a business trust or investment company) must so state but need not, include an analysis of any applicable exemptions from disclosure under the Freedom of Information Act [17 CFR 200.80].

Paragraph (i) of rule 24b-2 requires a Manager filing confidential information with the Commission to indicate at the appropriate place in the public filing that the confidential portion has been so omitted and filed separately with the Commission. A Manager must comply with this provision by including on the Summary Page, after the Report Summary and prior to the List of Other Included Managers, a statement that confidential information has been omitted from the public Form 13F report and filed separately with the Commission.

A Manager must file electronically, in accordance with rule 101(d) of Regulation S-T [17 CFR 232.101(d)], all requests for and information subject to the request for confidential treatment filed pursuant to Section 13(f)(4) of the Exchange Act.

A Manager requesting confidential treatment must provide enough factual support for its request to enable the Commission to make an informed judgment as to the merits of the request. The request must address all pertinent factors, including all of the following that are relevant:

1. If confidential treatment is requested as to more than one holding of securities, discuss each holding separately unless the Manager can identify a class or classes of holdings as to which the nature of the factual circumstances and the legal analysis are substantially the same.

2. If a request for confidential treatment is based upon a claim that the subject information is confidential, commercial or financial information, provide the information required by paragraphs 2.a through 2.e of this Instruction except that, if the subject information concerns security holdings that represent open risk arbitrage positions and no previous requests for confidential treatment of those holdings have been made, the Manager need provide only the information required in paragraph 2.f.

   a. Describe the investment strategy being followed with respect to the relevant securities holdings, including the extent of any program of acquisition and disposition (note that the term "investment strategy," as used in this instruction, also includes activities such as block positioning).

   b. Explain why public disclosure of the securities would, in fact, be likely to reveal the investment strategy; consider this matter in light of the specific reporting requirements of Form 13F (*e.g.*, securities holdings are reported only quarterly and may be aggregated in many cases).

   c. Demonstrate that such revelation of an investment strategy would be premature; indicate whether the Manager was engaged in a program of acquisition or disposition of the security both at the end of the quarter and at the time of the filing; and address whether the existence of such a program may otherwise be known to the public.

   d. Demonstrate whether the information is customarily and actually kept private by the Manager and that failure to grant the request for confidential treatment would be likely to cause harm to the Manager; show what use competitors could make of the information and how harm to the Manager could ensue.

   e. State, and provide justification for, the period of time for which confidential treatment of the securities holdings is requested. The time period specified may not exceed one (1) year from the date that the Manager is required to file the Form 13F report with the Commission.

   f. For securities holdings that represent open risk arbitrage positions, the request must include good faith representations that:

      i. the securities holding represents a risk arbitrage position open on the last day of the period for which the Form 13F report is filed; and

      ii. the reporting Manager has a reasonable belief as of the period end that it may not close the entire position on or before the date that the Manager is required to file the Form 13F report with the Commission.

If the Manager makes these representations in writing at the time that the Form 13F is filed, the Commission will automatically accord the subject securities holdings confidential treatment for a period of up to one (1) year from the date that the Manager is required to file the Form 13F report with the Commission.

g. At the expiration of the period for which confidential treatment has been granted pursuant to paragraph 2.e or 2.f of this Instruction ("Expiration Date") and unless a de novo request for confidential treatment of the information that meets the requirements of paragraphs 2.a through 2.e of this Instruction is filed with the Commission at least fourteen (14) days in advance of the Expiration Date, the Manager will make such security holding(s) public as set forth in Confidential Treatment Instruction 4.

3. If the Commission grants a request for confidential treatment, it may delete details which would identify the Manager and use the information in tabulations required by Section 13(f)(4) absent a separate showing that such use of information could be harmful.

4. Unless a hardship exemption is available, the Manager must submit electronically within 6 business days of the expiration of confidential treatment or notification of denial, as applicable, a Form 13F amendment to its previously filed public Form 13F report(s) for the calendar quarter to list and publicly disclose the holding(s) as to which the Commission denied confidential treatment or for which confidential treatment has expired. Such Form 13F amendment must be timely filed: (i) upon the denial by the Commission of a request for confidential treatment; (ii), upon expiration of the time period for which a Manager has requested confidential treatment; or (iii) upon the expiration of the confidential treatment previously granted for a filing. If a Manager files an amendment, the amendment must not be a restatement; the Manager must designate it as an amendment which adds new holdings entries. The Manager must include at the top of the Form 13F Cover Page the following legend to correctly designate the type of filing being made:

THIS FILING LISTS SECURITIES HOLDINGS REPORTED ON THE FORM 13F FILED ON (DATE) PURSUANT TO A REQUEST FOR CONFIDENTIAL TREATMENT AND FOR WHICH (THAT REQUEST WAS DENIED/CONFIDENTIAL TREATMENT EXPIRED) ON (DATE).

SPECIAL INSTRUCTIONS

1. This form consists of three parts: the Form 13F Cover Page ("Cover Page"), the Form 13F Summary Page ("Summary Page"), and the Form 13F Information Table ("Information Table").

The Cover Page:

2. The period end date used in the report is the last day of the calendar year or quarter, as appropriate, even though that date may not be the same as the date used for valuation in accordance with Special Instruction 8.

3. Amendments to a Form 13F report must either restate the Form 13F report in its entirety or

include only holdings entries that are being reported in addition to those already reported in a current public Form 13F report for the same period. If the Manager is filing the Form 13F report as an amendment, then, the Manager must check the amendment box on the Cover Page; enter the amendment number; and check the appropriate box to indicate whether the amendment (a) is a restatement or (b) adds new holdings entries. Each amendment must include a complete Cover Page and, if applicable, a Summary Page and Information Table. See rule 13f-1(a)(2) [17 CFR 240.13f-1(a)(2)].

4. Present the Cover Page and the Summary Page information in the format and order provided in the form. If the Manager has a number assigned by the Financial Industry Regulatory Authority's Central Registration Depository system or by the Investment Adviser Registration Depository system ("CRD number"), provide the Manager's CRD number. If the Manager has a file number (*e.g.*, 801-, 8-, 866-, 802-) assigned by the Commission ("SEC file number"), provide the Manager's SEC file number. The Cover Page may include information in addition to the required information, so long as the additional information does not, either by its nature, quantity, or manner of presentation, impede the understanding or presentation of the required information. Place all additional information after the signature of the person signing the report (immediately preceding the Report Type section). Do not include any additional information on the Summary Page or in the Information Table.

5. Designate the Report Type for the Form 13F report by checking the appropriate box in the Report Type section of the Cover Page, and include, where applicable, the List of Other Managers Reporting for this Manager (on the Cover Page), the Summary Page and the Information Table, as follows:

   a. If all of the securities with respect to which a Manager has investment discretion are reported by another Manager (or Managers), check the box for Report Type "13F NOTICE," include (on the Cover Page) the List of Other Managers Reporting for this Manager, and omit both the Summary Page and the Information Table.

   b. If all of the securities with respect to which a Manager has investment discretion are reported in this report, check the box for Report Type "13F HOLDINGS REPORT," omit from the Cover Page the List of Other Managers Reporting for this Manager, and include both the Summary Page and the Information Table.

   c. If only part of the securities with respect to which a Manager has investment discretion is reported by another Manager (or Managers), check the box for Report Type "13F COMBINATION REPORT," include (on the Cover Page) the List of Other Managers Reporting for this Manager, and include both the Summary Page and the Information Table.

Summary Page:

6. Include the Report Summary, containing the Number of Other Included Managers, the Information Table Entry Total and the Information Table Value Total.

   a. Enter as the Number of Other Included Managers the total number of other Managers listed in the List of Other Included Managers, not counting the Manager filing this report.

See Special Instruction 7. If none, enter the number zero ("0").

b. Enter as the Information Table Entry Total the total number of line entries providing holdings information included in the Information Table.

c. Enter as the Information Table Value Total the aggregate fair market value of all holdings reported in this report, i.e., the total for Column 4 (Fair Market Value) of all line entries in the Information Table. The Manager must express this total as a rounded figure, corresponding to the individual Column 4 entries in the Information Table. See Special Instruction 8.

d. Check the box on the Summary Page of the public Form 13F report if confidential treatment is being requested for some or all of the Manager's holdings for this quarter-end period.

7. Include the List of Other Included Managers. Use the title, column headings and format provided.

a. If this Form 13F report does not report the holdings of any Manager other than the Manager filing this report, enter the word "NONE" under the title and omit the column headings and list entries.

b. If this Form 13F report reports the holdings of one or more Managers other than the Manager filing this report, enter in the List of Other Included Managers all such Managers together with any CRD Number or SEC file number assigned to each Manager and, if known, the Managers' respective Form 13F file numbers (The Form 13F file numbers are assigned to Managers when they file their first Form 13F). Assign a number to each Manager in the List of Other Included Managers, and present the list in sequential order. The numbers need not be consecutive. The List of Other Managers must include all other Managers identified in Column 7 of the Information Table. Do not include the Manager filing this report.

Information Table:

8. In determining fair market value, use the value at the close of trading on the last trading day of the calendar year or quarter, as appropriate. Enter values rounded to the nearest dollar.

9. A Manager may omit holdings otherwise reportable if the Manager holds, on the period end date, fewer than 10,000 shares (or less than $200,000 principal amount in the case of convertible debt securities) and less than $200,000 aggregate fair market value (and option holdings to purchase only such amounts).

10. A Manager must report holdings of options only if the options themselves are Section 13(f) securities. For purposes of the $100,000,000 reporting threshold, the Manager should consider only the value of such options, not the value of the underlying shares. The Manager must give the entries in Columns 1 through 5 and in Columns 7 and 8 of the Information Table, however, in terms of the securities underlying the options, not the options themselves. The Manager must answer Column 6 in terms of the discretion to exercise the option. The Manager must make a separate segregation in respect of securities underlying options for

entries for each of the columns, coupled with a designation "PUT" or "CALL" following such segregated entries in Column 5, referring to securities subject respectively to put and call options. A Manager is not required to provide an entry in Column 8 for securities subject to reported call options.

11. Furnish the Information Table using the table title, column headings and format provided. Provide column headings once at the beginning of the Information Table; repetition of column headings on subsequent pages is not required. Present the table in accordance with the column instructions provided in Special Instructions 11.b.i through 12.b.viii. Do not include any additional information in the Information Table. Begin the Information Table on a new page; do not include any portion of the Information Table on either the Cover Page or the Summary Page.

    a. When entering information in Columns 4 through 8 of the Information Table, list securities of the same issuer and class with respect to which the Manager exercises sole investment discretion separately from those with respect to which investment discretion is shared. Special Instruction 11.b.vi for Column 6 describes in detail how to report shared investment discretion.

    b. Instructions for each column in the Information Table:

        i. Column 1. Name of Issuer. Enter in Column 1 the name of the issuer for each class of security reported as it appears in the current 13F List published by the Commission in accordance with rule 13f-1(c). Reasonable abbreviations are permitted.

        ii. Column 2. Title of Class. Enter in Column 2 the title of the class of the security reported as it appears in the 13F List. Reasonable abbreviations are permitted.

        iii. Column 3. CUSIP Number. Enter in Column 3 the nine (9) digit CUSIP number of the security.

        iv. Column 4. Market Value. Enter in Column 4 the market value of the holding of the particular class of security as prescribed by Special Instruction 8.

        v. Column 5. Amount and Type of Security. Enter in Column 5 the total number of shares of the class of security or the principal amount of such class. Use the abbreviation "SH" to designate shares and "PRN" to designate principal amount. If the holdings being reported are put or call options, enter the designation "Put" or "Call," as appropriate

        vi. Column 6. Investment Discretion. Segregate the holdings of securities of a class according to the nature of the investment discretion held by the Manager. Designate investment discretion as "sole" (SOLE); "shared-defined" (DEFINED); or "shared-other" (OTHER), as described below:

            (A) Sole. Designate as "sole" securities over which the Manager exercised sole investment discretion. Report "sole" securities on one line. Enter the word "SOLE" in Column 6.

(B) Shared-Defined. If investment discretion is shared with controlling and controlled companies (such as bank holding companies and their subsidiaries); investment advisers and investment companies advised by those advisers; or insurance companies and their separate accounts, then designate investment discretion as "shared-defined" (DEFINED).

For each holding of DEFINED securities, segregate the securities into two categories: those securities over which investment discretion is shared with another Manager or Managers on whose behalf this Form 13F report is being filed, and those securities over which investment discretion is shared with any other person, other than a Manager on whose behalf this Form 13F report is being filed.

Enter each of the two segregations of DEFINED securities holdings on a separate line, and enter the designation "DFND" in Column 6. See Special Instruction vii for Column 7.

(C) Shared-Other. Designate as "shared-other" securities (OTHER) those over which investment discretion is shared in a manner other than that described in Special Instruction (B) above.

For each holding of OTHER securities, segregate the securities into two categories: those securities over which investment discretion is shared with another Manager or Managers on whose behalf this Form 13F report is being filed, and those securities over which investment discretion is shared with any other person, other than a Manager on whose behalf this Form 13F report is being filed.

Enter each segregation of OTHER securities holdings on a separate line, and enter the designation "OTR" in Column 6. See Special Instruction vii for Column 7.

NOTE: A Manager is deemed to share discretion with respect to all accounts over which any person under its control exercises discretion. A Manager of an institutional account, such as a pension fund or investment company, is not deemed to share discretion with the institution unless the institution actually participated in the investment decision-making.

vii. Column 7. Other Managers. Identify each other Manager on whose behalf this Form 13F report is being filed with whom investment discretion is shared as to any reported holding by entering in this column the number assigned to the Manager in the List of Other Included Managers.

Enter this number in Column 7 opposite the segregated entries in Columns 4, 5 and 8 (and the relevant indication of shared discretion set forth in Column 6) as required by the preceding special instruction. Enter no other names or numbers in Column 7.

A Manager must report the conditions of sharing discretion with other Managers

consistently for all holdings reported on a single line.

viii. Column 8. Voting Authority. Enter the number of shares for which the Manager exercises sole, shared, or no voting authority (none) in this column, as appropriate.

The Commission deems a Manager exercising sole voting authority over specified "routine" matters, and no authority to vote in "non-routine" matters, for purposes of this Form 13F report to have no voting authority. "Non-routine" matters include a contested election of directors, a merger, a sale of substantially all the assets, a change in the articles of incorporation affecting the rights of shareholders, and a change in fundamental investment policy; "routine" matters include selection of an accountant, uncontested election of directors, and approval of an annual report.

If voting authority is shared only in a manner similar to a sharing of investment discretion which would call for a response of "shared-defined" (DEFINED) under Column 6, a Manager should report voting authority as sole under subdivision (a) of Column 8, even though the Manager may be deemed to share investment discretion with that person under Special Instruction 11.b.vi.

Filing of Reports

12. Reports must be filed electronically using EDGAR in accordance with Regulation S-T. Consult the EDGAR Filer Manual and Appendices for EDGAR filing instructions.

PAPERWORK REDUCTION ACT INFORMATION

Persons who are to respond to the collection of information contained in this form are not required to respond to the collection of information unless the form displays a currently valid Office of Management and Budget ("OMB") control number.

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

■ 11. The general authority citation for part 270 continues to read as follows:

Authority: 15 U.S.C. 80a–1 *et seq.*, 80a–34(d), 80a–37, 80a–39, and Pub. L. 111–203, sec. 939A, 124 Stat. 1376 (2010), unless otherwise noted.

* * * * *

§ 270.0–2 [Amended]

■ 12. Amend § 270.0–2 by:

■ a. In paragraph (a), adding the phrase "Secretary of the" after "be delivered through the mails or otherwise to the"; and

■ b. In paragraph (b), removing the sentence "The application must be typed, printed, copied or prepared by any process which, in the opinion of the commission, produces copies suitable for microfilming."

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

■ 13. The general authority citation for part 275 continues to read as follows:

Authority: 15 U.S.C. 80b–2(a)(11)(G), 80b–2(a)(11)(H), 80b–2(a)(17), 80b–3, 80b–4, 80b–4a, 80b–6(4), 80b–6a, and 80b–11, unless otherwise noted.

* * * * *

■ 14. Amend § 275.0–4 by:

■ a. In paragraph (a)(1), adding the phrase ''Secretary of the'' after ''be delivered through the mails or otherwise to the'';

■ b. Revising paragraphs (b), (d) and (i); and

■ c. Removing and reserving paragraph (g).

The revisions read as follows:

§ 275.0–4 General requirements of papers and applications.

* * * * *

(b) *Formal specifications respecting applications.* Every application for an order under any provision of the Act, for which a form with instructions is not specifically prescribed, and every amendment to such application, shall be filed electronically pursuant to 17 CFR part 232 (Regulation S–T). Any filings made in paper, including filings made pursuant to a hardship exemption under Regulation S–T, shall be filed in quintuplicate. One copy shall be signed by the applicant, but the other four copies may have facsimile or typed signatures. Such applications shall be on paper no larger than 8½ × 11 inches in size. To the extent that the reduction of larger documents would render them illegible, those documents may be filed on paper larger than 8½ × 11 inches in size. The left margin should be at least 1½ inches wide and, if the application is bound, it should be bound on the left side. All typewritten or printed matter (including deficits in financial statements) should be set forth in black so as to permit photocopying.

* * * * *

(d) *Verification of applications and statements of fact.* Every application for an order under any provision of the Act, for which a form with instructions is not specifically prescribed, and every amendment to such application, and every statement of fact formally filed in support of, or in opposition to, any application or declaration shall be verified by the person executing the same. An instrument executed on behalf of a corporation shall be verified in substantially the following form, but suitable changes may be made in such form for other kinds of companies and for individuals:

The undersigned states that he or she has duly executed the attached ____ dated, ____20____, for and on behalf of ____ (Name of company); that he or she is the ____ (Title of officer) of such company; and that all action by stockholders, directors, and other bodies necessary to authorize the undersigned to execute and file such instrument has been taken. The undersigned further states that he or she is familiar with such instrument, and the contents thereof, and that the facts therein set forth are true to the best of his or her knowledge, information and belief.

(Signature)

* * * * *

(i) The manually signed original (or in the case of duplicate originals, one duplicate original) of all registrations, applications, statements, reports, or other documents filed under the Investment Advisers Act of 1940, as amended, shall be numbered sequentially (in addition to any internal numbering which otherwise may be present) by handwritten, typed, printed, or other legible form of notation from the facing page of the document through the last page of that document and any exhibits or attachments thereto. Further, the total number of pages contained in a numbered original shall be set forth on the first page of the document.

■ 15. Amend § 275.203–1 by adding paragraph (d) to read as follows:

§ 275.203–1 Application for investment adviser registration.

* * * * *

(d) *Form ADV–NR*—(1) *General Requirements.* Each non-resident, as defined in 17 CFR 275.0–2(b)(2) (Rule 0–2(b)(2)), general partner or a non-resident managing agent, as defined in 17 CFR 275.0–2(b)(2) (Rule 0–2(b)(1)), of any investment adviser registered, or applying for registration with, the Commission must submit Form ADV–NR (17 CFR 279.4). Form ADV–NR must be completed in connection with the adviser's initial registration with the Commission. If a person becomes a non-resident general partner or a non-resident managing agent after the date the adviser files its initial registration with the Commission, the person must file Form ADV–NR with the Commission within 30 days of becoming a non-resident general partner or a non-resident managing agent. If a person serves as a general partner or managing agent for multiple advisers, they must submit a separate Form ADV–NR for each adviser.

(2) *When an amendment is required.* Each non-resident general partner or a non-resident managing agent of any investment adviser must amend its Form ADV–NR within 30 days whenever any information contained in the form becomes inaccurate by filing with the Commission a new Form ADV–NR.

(3) *Electronic filing.* Form ADV–NR (and any amendments to Form ADV–NR) must be filed electronically through the Investment Adviser Registration Depository (IARD), unless a hardship exemption under 17 CFR 275.203–3 (Rule 203–3) has been granted.

(4) *When filed.* Each Form ADV–NR is considered filed with the Commission upon acceptance by the IARD.

(5) *Filing fees.* No fee shall be assessed for filing Form ADV–NR through IARD.

(6) *Form ADV–NR is a report.* Each Form ADV–NR (and any amendment to Form ADV–NR) required to be filed under this rule is a ''report'' within the meaning of sections 204 and 207 of the Act.

PART 279—FORMS PRESCRIBED UNDER THE INVESTMENT ADVISERS ACT OF 1940

■ 16. The authority citation for part 279 continues to read as follows:

Authority: The Investment Advisers Act of 1940, 15 U.S.C. 80b-1, *et seq.,* Pub. L. 111–203, 124 Stat. 137617.

■ 17. In Form ADV (referenced in § 279.1):

■ a. Amend the instructions to the form by revising the section entitled ''Who is required to file Form ADV–NR?''; and

■ b. Amend the instructions to the form by adding a section entitled ''How is Form ADV–NR filed?''.

The revision and addition read as follows:

Note: The text of Form ADV does not, and this amendment will not, appear in the Code of Federal Regulations.

FORM ADV (Paper Version)

• UNIFORM APPLICATION FOR INVESTMENT ADVISER REGISTRATION AND

• REPORT FORM BY EXEMPT REPORTING ADVISERS

Form ADV: General Instructions

* * * * *

19. Who is required to file Form ADV-NR?

Every *non-resident* general partner and *managing agent* of all SEC-registered advisers and *exempt reporting advisers*, whether or not the adviser is resident in the United States, must file Form ADV-NR in connection with the adviser's initial application or report. A general partner or *managing agent* of an SEC-registered adviser or *exempt reporting adviser* who becomes a *non-resident* after the adviser's initial application or report has been submitted must file Form ADV-NR within 30 days. Absent a temporary hardship, Form ADV-NR must be filed electronically through IARD.

Failure to file Form ADV-NR promptly may delay SEC consideration of your initial application.

20. How is Form ADV-NR filed?

Form ADV-NR is filed electronically with the Investment Adviser Registration Depository (IARD). Information for how to file with IARD is available on the SEC's website at www.sec.gov/iard and on www.iard.com]

■ 18. Revise § 279.4 to read as follows:

§ 279.4 Form ADV–NR, appointment of agent for service of process by non-resident general partner and non-resident managing agent of an investment adviser.

This form shall be filed and amended pursuant to § 275.203–1 of this chapter (Rule 203–1) as an appointment of agent for service of process by non-resident general partners and non-resident managing agents of an investment adviser pursuant to section 203 of the Investment Advisers Act of 1940.

Note: The next of Form ADV–NR does not, and this amendment will not, appear in the Code of Federal Regulations.

■ 19. Form ADV–NR (referenced in § 279.4) is amended by adding the sections entitled ''Instructions to Form ADV–NR'', ''Who is required to file Form ADV–NR?'' and ''How is Form ADV–NR filed?'' to read as follows:

Form ADV-NR (Paper Version)

APPOINTMENT OF AGENT FOR SERVICE OF PROCESS BY NON-RESIDENT GENERAL PARTNER AND NON-RESIDENT MANAGING AGENT OF AN INVESTMENT ADVISER

Instructions to Form ADV-NR

NOTE: Unless the context clearly indicates otherwise, all terms used in the Form have the same meaning as in the Investment Advisers Act of 1940, the General Rules and Regulations of the Commission thereunder (17 Code of Federal Regulations 275), and in the Glossary of Terms to Form ADV.

1. Who is required to file Form ADV-NR?

Every *non-resident* general partner and *managing agent* of all SEC-registered advisers and *exempt reporting advisers*, whether or not the adviser is resident in the United States, must file Form ADV-NR in connection with the adviser's initial application or report. A general partner or *managing agent* of an SEC-registered adviser or *exempt reporting adviser* who becomes a *non-resident* after the adviser's initial application or report has been submitted must file Form ADV-NR within 30 days. Absent a temporary hardship exemption, Form ADV-NR must be filed electronically.

Failure to file Form ADV-NR promptly may delay SEC consideration of your initial application.

2. How is Form ADV-NR filed?

Form ADV-NR is filed electronically with the Investment Adviser Registration Depository (IARD). Information for how to file with IARD is available on the SEC's website at www.sec.gov/iard and on www.iard.com

Form ADV-NR (Paper Version)

APPOINTMENT OF AGENT FOR SERVICE OF PROCESS BY NON-RESIDENT GENERAL PARTNER AND NON-RESIDENT MANAGING AGENT OF AN INVESTMENT ADVISER

You must submit this Form ADV-NR if you are a *non-resident* general partner or a *non-resident managing agent* of any investment adviser (domestic or *non-resident*). Form ADV-NR must be

signed and submitted in connection with the adviser's initial Form ADV submission. If the mailing address you list below changes, you must file an amended Form ADV-NR to provide the current address. If you become a *non-resident* general partner or a *non-resident managing agent* after the date the adviser files its initial Form ADV, you must file Form ADV-NR with the Commission within 30 days of the date that you became a *non-resident* general partner or a *non-resident managing agent*. If you serve as a general partner or *managing agent* for multiple advisers, you must submit a separate Form ADV-NR for each adviser.

1. Appointment of Agent for Service of Process

By signing this Form ADV-NR, you, the undersigned *non-resident* general partner or *non-resident managing agent,* irrevocably appoint each of the Secretary of the SEC, and the Secretary of State, or equivalent officer, of the state in which the adviser referred to in this form maintains its *principal office and place of business*, if applicable, and any other state in which the adviser is applying for registration, amending its registration, or submitting a *notice filing*, as your agents to receive service, and agree that such *persons* may accept service on your behalf, of any notice, subpoena, summons, *order* instituting *proceedings*, demand for arbitration, or other process or papers, and you further agree that such service may be made by registered or certified mail, in any federal or state action, administrative *proceeding* or arbitration brought against you in any place subject to the jurisdiction of the United States, if the action, *proceeding* or arbitration: (a) arises out of any activity in connection with the investment adviser's business that is subject to the jurisdiction of the United States, and (b) is *founded*, directly or indirectly, upon the provisions of: (i) the Securities Act of 1933, the Securities Exchange Act of 1934, the Trust Indenture Act of 1939, the Investment Company Act of 1940, or the Investment Advisers Act of 1940, or any rule or regulation under any of these acts, or (ii) the laws of the state in which the adviser referred to in this Form maintains its *principal office and place of business*, if applicable, or of any state in which the adviser is applying for registration, amending its registration, or submitting a *notice filing*.

2. Appointment and Consent: Effect on Partnerships

If you are organized as a partnership, this irrevocable power of attorney and consent to service of process will continue in effect if any partner withdraws from or is admitted to the partnership, provided that the admission or withdrawal does not create a new partnership. If the partnership dissolves, this irrevocable power of attorney and consent shall be in effect for any action brought against you or any of your former partners.

Signature

I, the undersigned *non-resident* general partner or *non-resident managing agent,* certify, under penalty of perjury under the laws of the United States of America, that the information contained

in this Form ADV-NR is true and correct and that I am signing this Form ADV-NR as a free and voluntary act.

PRIVACY ACT STATEMENT. Section 211(a) of the Advisers Act [15 U.S.C. § 80b-11(a)] authorizes the Commission to collect the information required by Form ADV-NR. The Commission collects this information to ensure that a non-resident general partner or managing agent of an investment adviser appoints an agent for service of process in the United States. Filing Form ADV-NR is mandatory for non-resident general partners and non-resident managing agents of investment advisers. The Commission maintains the information submitted on Form ADV-NR and makes it publicly available. The Commission may return forms that do not include required information. Intentional misstatements or omissions constitute federal criminal violations under 18 U.S.C. § 1001 and 15 U.S.C. § 80b-17. The information contained in Form ADV-NR is part of a system of records subject to the Privacy Act of 1974, as amended. The Commission has published in the Federal Register the Privacy Act System of Records Notice for these records.

SEC'S COLLECTION OF INFORMATION. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. Section 211(a) of the Advisers Act authorizes the Commission to collect the information on this Form from applicants. *See* 15 U.S.C. § 80b-11(a). Filing of this Form is mandatory for non-resident general partners or managing agents of investment advisers. The principal purpose of this collection of information is to ensure that a non-resident general partner or managing agent of an

investment adviser appoints an agent for service of process in the United States. The Commission will maintain files of the information on Form ADV-NR and will make the information publicly available. Any member of the public may direct to the Commission any comments concerning the accuracy of the burden estimate on page one of Form ADV-NR, and any suggestions for reducing this burden. This collection of information has been reviewed by the Office of Management and Budget in accordance with the clearance requirements of 44 U.S.C. § 3507.

By the Commission.

Dated: November 4, 2021.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1306

[Docket No. DEA–637]

RIN 1117–AB64

Transfer of Electronic Prescriptions for Schedules II–V Controlled Substances Between Pharmacies for Initial Filling

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Drug Enforcement Administration (DEA) is proposing to amend its regulations to allow the transfer of electronic prescriptions for schedule II–V controlled substances between registered retail pharmacies for initial filling on a one-time basis. This amendment will specify the procedure that must be followed and the information that must be documented when transferring an electronic controlled substance prescription between DEA-registered retail pharmacies.

DATES: Electronic comments must be submitted, and written comments must be postmarked, on or before January 18, 2022. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after 11:59 p.m. Eastern Time on the last day of the comment period.

All comments concerning collections of information under the Paperwork Reduction Act must be submitted to the Office of Management and Budget (OMB) on or before January 18, 2022

ADDRESSES: To ensure proper handling of comments, please reference ''Docket No. DEA–637'' on all correspondence, including any attachments.

DEA encourages all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *http://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon completion of your submission, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *Regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted, and there is no need to resubmit the same comment. Paper comments that duplicate the electronic submission are not necessary and are discouraged. Should you wish to mail a paper comment *in lieu* of an electronic comment, it should be sent via regular or express mail to: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, VA 22152.

All comments concerning collections of information under the Paperwork Reduction Act must be submitted to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for DOJ, Washington, DC 20503. Please state that your comment refers to RIN 1117–AB64/Docket No. DEA–637.

FOR FURTHER INFORMATION CONTACT: Scott A. Brinks, Regulatory Drafting and Policy Support Section, Diversion Control Division, Drug Enforcement Administration; Mailing Address: 8701 Morrissette Drive, Springfield, Virginia 22152; Telephone: (571) 776–2265.

SUPPLEMENTARY INFORMATION:

Posting of Public Comments

Please note that all comments received are considered part of the public record. They will, unless reasonable cause is given, be made available by DEA for public inspection online at *http://www.regulations.gov.* Such information includes personal identifying information (such as your name, address, etc.) voluntarily submitted by the commenter. The Freedom of Information Act applies to all comments received. If you want to submit personal identifying information (such as your name, address, etc.) as part of your comment, but do not want it to be made publicly available, you must include the phrase ''PERSONAL IDENTIFYING INFORMATION'' in the first paragraph of your comment. You must also place all of the personal identifying information you do not want made publicly available in the first paragraph of your comment and identify what information you want redacted.

If you want to submit confidential business information as part of your comment, but do not want it to be made publicly available, you must include the phrase ''CONFIDENTIAL BUSINESS INFORMATION'' in the first paragraph of your comment. You must also prominently identify the confidential business information to be redacted within the comment.

Comments containing personal identifying information and confidential business information identified as directed above will generally be made publicly available in redacted form. If a comment has so much confidential business information or personal identifying information that it cannot be effectively redacted, all or part of that comment may not be made publicly available. Comments posted to *http://www.regulations.gov* may include any personal identifying information (such as name, address, and phone number) included in the text of your electronic submission that is not identified as directed above as confidential.

An electronic copy of this document and supplemental information to this proposed rule are available at *http://www.regulations.gov* for easy reference.

Legal Authority

The Controlled Substances Act (CSA or Act) grants the Attorney General the authority to promulgate and enforce any rules, regulations, and procedures that he may deem necessary and appropriate for the efficient executions of his functions under subchapter I (Control and Enforcement) of the CSA.[1] The Attorney General has delegated this authority to the Administrator of the Drug Enforcement Administration (DEA).[2]

[1] 21 U.S.C. 871(b).

[2] 28 CFR 0.100(b).

Purpose of the Proposed Rule

Currently, DEA regulations do not address the transfer of controlled substance prescriptions (paper or electronic) between pharmacies for initial filling.[3] If a paper prescription is presented at a pharmacy that is unable to fill it, the paper prescription could be returned to the patient, and the patient could then take the prescription to another pharmacy. Although the transfer of paper prescriptions between pharmacies for initial dispensing is not addressed in the regulations, these prescriptions are inherently portable due to the format of the prescription itself.

However, electronic prescriptions are generated using an electronic application and are transmitted directly from the practitioner to the pharmacy in the form of an electronic data file. Consequently, if a pharmacy receives an electronic prescription for a controlled substance (EPCS) that it is unable to fill, the pharmacy cannot give the prescription (*i.e.,* electronic data file) to the patient to take to another pharmacy. Further, DEA regulations do not include provisions for a pharmacy to transfer an EPCS to another pharmacy; the regulations also do not describe how a pharmacy should handle an EPCS that it receives but cannot fill. At present, a pharmacy that receives an EPCS that it is unable to fill can only notify the patient that the prescription cannot be filled. In this scenario, the patient could then call the prescribing practitioner to request that a new EPCS be sent to a different pharmacy. DEA realizes that this scenario creates the potential for duplication of prescriptions if the practitioner transmits a new EPCS to a different pharmacy and does not cancel or void the original EPCS that was sent to the first pharmacy. It also recognizes that this scenario creates additional burden for patients, who have to get back in touch with the original prescribing doctor and request a new prescription.

Therefore, DEA is proposing to revise its regulations to state that, upon request, a registered retail pharmacy may transfer an EPCS to another registered retail pharmacy for initial filling. This proposed rule will also specify the procedures that retail pharmacies must follow and the information that must be documented when transferring electronic prescriptions for controlled substances in schedules II–V. DEA believes that allowing the electronic transfer of controlled substance prescriptions will decrease the potential for duplicate prescriptions and thus reduce the opportunity for diversion or misuse.

Background

The CSA and its implementing regulations specify the requirements for issuing and filling prescriptions for controlled substances. DEA regulations permit a pharmacist to dispense a controlled substance in schedule II only pursuant to a written prescription (including an EPCS), except in limited emergency situations, when dispensing pursuant to an oral prescription is permitted.[4] No prescription for a controlled substance in schedule II may be refilled.[5] DEA regulations permit a pharmacist to dispense a controlled substance in schedules III, IV, and V pursuant to a paper prescription, a facsimile of a signed paper prescription, an EPCS, or an oral prescription made by an individual practitioner and promptly reduced to writing by the pharmacist.[6] Prescriptions for schedule III and IV substances may not be filled or refilled more than six months after the date of issuance or be refilled more than five times.[7] The CSA does not address the transfer of controlled substance prescriptions between pharmacies for initial filling. DEA regulations address the transfer of controlled substances prescriptions between pharmacies for refills, but not for initial filling.[8] Hence, DEA is proposing to revise its regulations to state that the transfer of EPCS is permissible between registered retail pharmacies for initial filling on a one-time basis.

Why the Proposed Rule Is Necessary

On March 31, 2010, DEA published an interim final rule, *Electronic Prescriptions for Controlled Substances* (EPCS IFR), which provides practitioners with the option of issuing, and pharmacies with the option of receiving, dispensing, and archiving electronic prescriptions for schedule II–V controlled substances.[9] The EPCS IFR provides the regulations governing the electronic creation, signature, transmission, and processing of schedule II–V controlled substance prescriptions. The regulations, codified at 21 CFR parts 1300, 1304, 1306, and 1311, specifically define an electronic prescription as ''a prescription that is generated on an electronic application and transmitted as an electronic data file.'' [10] The regulations also provide the security and recordkeeping requirements imposed on prescription and pharmacy applications that create, process, and archive electronic controlled substance prescriptions.

Although DEA regulations permit the transfer of prescription information between pharmacies for refill dispensing of schedules III–V controlled substance prescriptions on a one-time basis, the regulations do not address the transfer of controlled substance prescriptions (paper or electronic) for initial dispensing.[11] As previously discussed, a patient can choose to take a paper prescription to another pharmacy if the first pharmacy is unable to fill it. However, because patients do not have a physical copy of an electronic prescription, the patient cannot take the prescription to another pharmacy if it cannot be filled by the first pharmacy.

DEA emphasized in the EPCS IFR that the option for EPCS is in addition to, not a replacement of, the requirements and provisions that exist for paper prescriptions for controlled substances.[12] Thus, the same rules and regulations applicable to paper prescriptions, as well as the same permissions, were also intended to apply to electronic prescriptions for controlled substances. Patients prescribed controlled substances electronically should have the same ability as patients issued paper controlled substance prescriptions to choose an alternate pharmacy if the first pharmacy is unable to fill a prescription. As more practitioners begin to issue controlled substance prescriptions electronically, as discussed below, there is an increasing need to address this issue.

[3] In contrast, as discussed below, 21 CFR 1360.25 already addresses the transfer of controlled substance prescriptions between pharmacies for refill purposes.

[4] 21 CFR 1306.11(a) and (d).

[5] 21 U.S.C. 829(a).

[6] 21 CFR 1306.21(a).

[7] 21 CFR 1306.22(a).

[8] 21 CFR 1306.25.

[9] 75 FR 16236 (Mar. 31, 2010). DEA subsequently reopened the comment period in 2020 to solicit public comment on certain issues. 85 FR 22018 (Apr. 21, 2020).

[10] 21 CFR 1300.03.

[11] 21 CFR 1306.25.

[12] 75 FR 16244.

In a recently published request for information, the Centers for Medicare and Medicaid Services (CMS) reported that it has seen a steady increase in the volume of controlled substance prescriptions submitted electronically since the EPCS IFR was published in 2010.[13] Further, the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT Act) was signed into law on October 24, 2018.[14] Section 2003 of the SUPPORT Act mandates the electronic prescribing of schedule II–V controlled substances (with some exceptions) covered under Medicare Part D, beginning on or after January 1, 2021.[15] In addition, in its 2019 National Progress Report, Surescripts, a health information network and electronic prescribing intermediary, noted that more than half of all States now require electronic prescribing of opioids, all controlled substances, or all prescriptions.[16] Thus, it is essential that procedures for transferring an EPCS are established as electronic prescribing of controlled substances becomes more prevalent. This rulemaking is being proposed to address this issue.

If finalized, this proposed rule would allow for the transfer of electronic prescriptions for schedules II–V controlled substances between DEA-registered retail pharmacies for initial filling. This proposed rule would also establish the procedures that must be followed and the information that must be documented when transferring an EPCS. For reasons discussed previously, this proposed rule focuses only on electronic prescriptions for controlled substances for initial dispensing and does not propose to amend 21 CFR 1306.25 which permits the transfer of paper, oral, or electronic prescriptions in schedules III, IV, and V for refill dispensing. A cross-reference to § 1306.25 is included in § 1306.08(i) to provide an easy reference to the regulations regarding the transfer of electronic prescriptions for refill purposes. DEA believes this proposed rule, if finalized, will reduce the potential for duplicate prescriptions, as well as the opportunity for diversion.

Summary of Proposed Changes

DEA proposes to amend its regulations to allow the transfer of EPCS between registered retail pharmacies for initial filling on a one-time basis only. The proposed amendment would explicitly state that a DEA-registered retail pharmacy may transfer schedules II–V EPCS to another DEA-registered retail pharmacy for initial dispensing. The proposed amendment would stipulate that: The transfer must be communicated directly between two licensed pharmacists; the prescription must remain in its electronic form; and the contents of the prescription required by part 1306 must be unaltered during the transmission. This proposed rule also stipulates that the transfer of EPCS for initial dispensing is permissible only if allowable under existing State or other applicable law.

In addition, the proposed amendment would also describe the documentation requirements for pharmacies transferring an EPCS for initial dispensing. Specifically, the pharmacist transferring the EPCS must update the electronic prescription record to note that the prescription was transferred. The transferring pharmacist must also update the prescription record with the following information: The name, address, and DEA registration number of the pharmacy to which the prescription was transferred; the name of the pharmacist receiving the transfer; the name of the transferring pharmacist; and the date of the transfer. Likewise, the pharmacist receiving the transferred EPCS must record the transferring pharmacy's name, address, and DEA registration number, the name of the transferring pharmacist, the date of the transfer, and the name of the pharmacist receiving the transfer. Finally, under the proposed amendment, the electronic records documenting the transfer must be maintained for a period of two years from the date of the transfer by both the pharmacy transferring the EPCS and the pharmacy receiving the EPCS. This proposed rule does not change the existing requirements for all prescriptions, as outlined in 21 CFR part 1306, Prescriptions, or the requirements for prescribing and pharmacy applications, as outlined in 21 CFR part 1311, Requirements for Electronic Orders and Prescriptions.

Regulatory Analyses

Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review)

This proposed rule was developed in accordance with the principles of Executive Orders (E.O.) 12866 and 13563. E.O. 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). E.O. 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in E.O. 12866. DEA has determined that this proposed rule is not a ''significant regulatory action'' under E.O. 12866, section 3(f).

Analysis of Benefits and Costs

DEA is proposing to amend its regulations to allow the transfer of electronic prescriptions for schedule II–V controlled substances between registered retail pharmacies for initial dispensing on a one-time basis only. This amendment will specify the procedure that must be followed and the information that must be documented when transferring an EPCS between registered retail pharmacies. As described below, DEA estimates the annual cost savings of this proposed rule is $22.0 million.

The proposed amendment would stipulate that: The transfer must be communicated directly between two licensed pharmacists; the prescription must remain in its electronic form and the required prescription information must be unaltered during the transmission. In addition to the above, the pharmacist transferring the prescription must update the electronic prescription record to note that the prescription was transferred. The transferring pharmacist must also record the name, address, and DEA registration number of the pharmacy to which the prescription is being electronically transferred, the name of the pharmacist receiving the transfer, the name of the transferring pharmacist, and the date of the transfer. Likewise, the pharmacist receiving the transferred prescription must record the transferring pharmacy's name, address, and DEA registration number, the name of the transferring pharmacist, and the name of the pharmacist receiving the transfer. Finally, under the proposed amendment, the electronic records documenting the transfer must be maintained for a period of two years from the date of the transfer by both the pharmacy transferring the electronic prescription and the pharmacy receiving the prescription.

As current DEA regulations do not address the transfer of schedule II–V controlled substance prescriptions in

any form (paper or electronic) from one retail pharmacy to another retail pharmacy for initial filling, DEA anticipates the proposed rule will affect the following parties: The first (transferring) pharmacy, patient, prescriber, and second (receiving) pharmacy. To quantify the economic impact of this proposed rule, DEA estimated the average cost and cost savings for each transfer and applied this cost or cost savings to the estimated number of transfers.[17]

Estimated Cost or Cost Savings per Transfer

To estimate the unit cost or cost savings, DEA compared the anticipated activities for each of the affected parties when a pharmacy receives an EPCS it cannot fill under current practices versus the proposed regulations. The anticipated activities for each of the affected parties under current practices are described below. DEA understands there may be many operational variations; however, DEA believes the scenarios described below are good representations for the purposes of estimating costs.

The anticipated activities for each of the affected parties under current practice are described below.

1. The first pharmacy contacts the patient to inform the patient that they are unable to fill the prescription.

2. The first pharmacy notes action taken, as needed.

3. Patient receives call from the first pharmacy that they are unable to fill the prescription.

4. Patient contacts prescriber and requests new prescription.

5. Prescriber's secretary or administrative personnel receives phone call from the patient (likely by an administrative personnel at the prescriber's office).

6. Prescriber cancels the EPCS at the first pharmacy and issues a new EPCS at an alternate (receiving) pharmacy.

7. Receiving pharmacy receives and fills EPCS.

8. Patient receives filled prescription from the alternate pharmacy.

The anticipated activities for each of the affected parties under the proposed regulations and the economic impact are described below.

1. Transferring pharmacy contacts patient to inform that they are unable to fill the prescription. Assume duration of the call to the patient is same under current and proposed scenarios. Therefore, no impact.

2. The patient receives a call from the transferring pharmacy that they are unable to fill the prescription; the patient requests the prescription be transferred to an alternate (receiving) pharmacy. Assume duration of the call from the transferring pharmacy is same under current and proposed scenarios. Therefore, no impact.

3. Transferring pharmacy transfers prescription (including contacting the receiving pharmacy, exchanging information, and recording the required information regarding transfer). Transferring will take longer than simply informing the patient that the prescription cannot be filled. Therefore, additional cost to transfer.

4. Patient does not need to contact prescriber to request a new prescription under proposed regulations. Therefore, cost savings from not needing to contact prescriber.

5. Patient receives filled prescription from receiving pharmacy. Assume same burden, no impact.

6. Prescriber does not receive a call from the patient. Therefore, cost savings.

7. Prescriber does not need to issue a new EPCS. Therefore, cost savings.

8. Receiving pharmacy receives transfer and fills transferred EPCS (including being contacted by the transferring pharmacy, exchanging information, and recording the required information regarding transfer). Anticipate additional costs related to being contacted by the transferring pharmacy and exchanging information.

Table 1 summarizes the activity scenarios under current practices and proposed regulations and the anticipated economic impact.

[17] DEA expects minor system and implementation expenses, which consist of modifying software configurations, updating business processes, and minimal personnel training. DEA estimates the cost of these changes is minimal.

Table 1: Persons and Activities, Current vs. Proposed

Persons	Change in Activity		Economic Impact
	Current	Proposed	
First or Transferring Pharmacy	First pharmacy contacts patient to inform that they are unable to fill the prescription. Note action taken (i.e., void, cancel, etc.), as needed.	Transferring pharmacy contacts patient to inform that they are unable to fill the prescription. Transfer prescription. "Transfer" includes: contacting the receiving pharmacy, exchanging information, and recording the required information regarding transfer.	Assume duration of call/contact is same ==> no impact Additional cost to transfer vs. noting action taken.
Patient	Receive call from pharmacy that they are unable to fill the prescription. Contact prescriber to request new prescription. Receive filled prescription from second (receiving) pharmacy.	Receive call from pharmacy that they are unable to fill the prescription, request transfer of the prescription to an alternate (receiving) pharmacy. N/A. Receive filled prescription from receiving pharmacy.	Assume duration of call/contact is same ==> no impact. Cost savings from not having to contact prescriber. Assume same burden ==> no impact.
Prescriber	Receive call from patient. (prescriber's secretary) Cancel prescription sent to first pharmacy and issue new prescription at second (receiving) pharmacy.	N/A. N/A.	Cost savings. Cost savings.
Second (Receiving) Pharmacy	Receive prescription and fill.	Receive transfer and fill. "Transfer" includes: being contacted by the transferring pharmacy, exchanging information, and recording the required information regarding transfer.	Additional cost to receive and record transfer.

Cost or cost savings is based on applying the loaded labor rate for each of the affected persons to the estimated time to conduct the activity. The Bureau of Labor Statistics (BLS) hourly wage data for various occupation codes was used to estimate the labor rates for each of the affected persons. Using the occupation codes 29–1051 Pharmacists, 00–0000 All Occupations, 43–6013 Medical Secretaries and Administrative Assistants, and 29–1215 Family Medicine Physicians as best representations of first (transferring) and second (receiving) pharmacists, patient, prescriber's secretary, and prescriber, respectively, DEA estimates the median hourly wages for the first (transferring) and second (receiving) pharmacy, patient, prescriber's secretary, and prescriber are $61.58, $19.14, $17.59, and $98.84, respectively.[18] Additionally, BLS reports that average benefits for private industry is 30.0 percent of total compensation. The 30.0 percent of total compensation equates to 42.9 percent (30.0 percent/70.0 percent) load on wages and salaries.[19] The load of 42.9 percent is added to each of the hourly rates to estimate the loaded hourly rates. The loaded hourly rates for the first (transferring) and second (receiving) pharmacy, patient, prescriber's secretary, and prescriber are $88.00, $27.35, $25.14, and $141.24, respectively. Table 2 summarizes the calculation for the loaded hourly wages for each of the affected persons.

[18] BLS, May 2019 National Occupational Employment and Wage Estimates United States. *http://www.bls.gov/oes/current/oes_nat.htm.*

[19] BLS, "Employer Costs for Employee Compensation—September 2020" (ECEC).

TABLE 2—LOADED HOURLY WAGES

Affected persons	Occupation code	Occupation code description	Median hourly wage	Loaded hourly median wage
Patient	00–0000	All Occupations	$19.14	$27.35
Pharmacist	29–1051	Pharmacists	61.58	88.00
Medical secretary	43–6013	Medical Secretaries and Administrative Assistants	17.59	25.14
Prescriber	29–1215	Family Medicine Physicians	98.84	141.24

The below sections describe the calculation conducted to quantify the economic impact associated with the changes in activities under the current and proposed scenarios described above.

1. Currently, the first pharmacy contacts the patient to inform the patient that the pharmacy is unable fill the prescription. DEA estimates that it takes three minutes for the first pharmacist to call the patient. From Table 2, the estimated loaded hourly rate of a pharmacist is $88.00. Multiplying the loaded hourly rate of $88.00 by 0.05 (3/60) hours results in a cost of $4.40. Under the proposed rule, the first (transferring) pharmacist would also contact the patient regarding the inability to fill the prescription. DEA estimates that it would also take three minutes for the transferring pharmacist to call the patient under the proposed rule, resulting in the same cost of $4.40. Therefore, there is no economic impact associated with this activity under the proposed rule.

2. Currently, the first pharmacist notes in the electronic prescription record that the prescription was not filled. DEA estimates that it takes one minute for the first pharmacist to make the entry in the electronic prescription record. From Table 2, the estimated loaded hourly rate of a pharmacist is $88.00. Multiplying the loaded hourly rate of $88.00 by 0.0167 (1/60) hours results in a cost of $1.47. Under the proposed rule, the transferring pharmacy may transfer the prescription, upon request from the patient, to the receiving pharmacy. Additionally, the transferring pharmacy must also contact the receiving pharmacy and exchange and document information such as the transferring pharmacy's name, address and DEA registration number, the name of the transferring pharmacist, and the name of the pharmacist receiving the transfer. DEA estimates that it takes three minutes for the transferring pharmacist to transfer the prescription. From Table 2, the estimated loaded hourly rate of a pharmacist is $88.00. Multiplying the loaded hourly rate of $88.00 multiplied by 0.05 (3/60) hours results in a cost of $4.40. Therefore, the net cost to the transferring pharmacy under the proposed rule is $2.93 ($4.40 − $1.47) per transfer.

3. Under current practices, the patient first receives a call from the pharmacist who informs them that their prescription cannot be filled. DEA estimates that the call between the pharmacist and the patient lasts three minutes. From Table 2, the estimated loaded hourly rate of a patient is $27.35. Multiplying the loaded hourly rate of $27.35 multiplied by 0.05 (3/60) hours results in a cost of $1.37 to the patient. Under the proposed rule, this activity does not change. With transfers of an EPCS, the pharmacist must still contact the patient. Thus, under the proposed rule, the patient also receives a call from the pharmacist. Estimating three minutes for the call, there is still a cost of $1.37 to the patient. Therefore, there is no economic impact associated with this activity under the proposed rule.

4. Under current practices, the patient must contact the prescriber to request a new prescription. DEA estimates that it takes five minutes for the patient to contact the prescriber. From Table 2, the estimated loaded hourly rate of the patient is $27.35. Multiplying the loaded hourly rate of $27.35 by 0.083 (5/60) hours results in a cost of $2.28. Under the proposed rule, the patient no longer needs to contact the prescriber; the patient requests an electronic transfer of the prescription from the first (transferring) pharmacy to the second (receiving) pharmacy; thus there is zero cost to the patient. Therefore, this activity under the proposed rule results in a cost savings of $2.28 per transfer.

5. Under current practices, DEA assumes that the patient is informed that the first pharmacy is unable to fill the prescription prior to travelling to pick it up; thus, the patient only makes one trip to the second pharmacy where the prescription was transferred. DEA estimates that it takes 20 minutes for the patient to pick up the filled prescription. From Table 2, the estimated loaded hourly rate of a patient is $27.35. Multiplying the loaded hourly rate of $27.35 by 0.33 (20/60) hours results in a cost of $9.12. Under the proposed rule, DEA also assumes that the patient is informed about the pending transfer of the prescription prior to travelling to pick up the prescription, thus the patient only makes one trip. Estimating 20 minutes for the patient to pick up the filled prescription, under the proposed rule, there is still a cost of $9.12 to the patient. Therefore, there is no economic impact associated with this activity under the proposed rule.

6. Under current practices, the patient has to contact the prescriber asking for a new prescription. DEA estimates that it takes five minutes for the prescriber's medical secretary to receive the call from the patient. From Table 2, the estimated loaded hourly rate of a medical secretary is $25.14. Multiplying the loaded hourly rate of $25.14 by 0.083 (5/60) hours results in a cost of $2.10. Under the proposed rule, the patient no longer needs to contact the prescriber; thus, this interaction will not occur. Therefore, this activity under the proposed rule results in a cost savings of $2.10 per transfer.

7. Under current practices, after the medical secretary receives the call from the patient and the information is relayed to the prescriber, the prescriber issues a new prescription. DEA estimates the prescriber takes two minutes to cancel the first prescription and issue a new prescription. From Table 2, the estimated loaded hourly rate of a prescriber is $141.24. Multiplying the loaded hourly rate of $141.24 by 0.03 (2/60) hours results in a cost of $4.71. Under the proposed rule, the prescriber does not need to issue a new prescription. The original prescription is simply transferred to the receiving pharmacy; thus, this activity will not occur. Therefore, this activity under the proposed rule results in a cost savings of $4.71 per transfer.

8. Under current practices, the second (receiving) pharmacy receives and fills the prescription. DEA estimates that it takes 15 minutes for the second (receiving) pharmacy to receive and fill the prescription. From Table 2, the estimated loaded hourly rate of a pharmacist is $88.00. Multiplying the loaded hourly rate of $88.00 by 0.25 (15/60) hours results in a cost of $22.00. Under the proposed rule, DEA also estimates the receiving pharmacist still conducts this activity at the same

loaded labor rate and time duration, resulting in a cost of $22.00. However, under the proposed rule, the receiving pharmacist must also receive and record transfer information from the transferring pharmacy. DEA estimates that it takes three minutes for the receiving pharmacy to receive and record transfer information. From Table 2, the estimated loaded hourly rate of a pharmacist is $88.00. Multiplying the loaded hourly rate of $88.00 by 0.05 (3/60) hours results in a cost of $4.40. Therefore, this activity under the proposed rule results in a cost of $4.40 per transfer.

As shown by Table 3, the proposed rule results in a total cost of $8.80 and a total cost savings of $10.56 per transfer. This results in an overall net cost savings of $1.76 per transfer.

Table 3: Cost/Cost Savings Calculation, Current vs. Proposed

	Current		Proposed		
Person/Activity	Estimated time (minutes)	Cost, Current ($)	Estimated time (minutes)	Cost, Proposed ($)	Costs/ (Cost Savings) ($)

Total Cost Savings					(10.56)
Net Cost Savings					(1.76)

Estimated Number of Transfers

As mentioned earlier, in order to calculate the total cost savings, DEA applied the $1.76 net cost savings per transaction, from above, to the estimated number of total transfers. DEA estimated the number of total transfers by estimating the number of EPCS from 2022 to 2026, the analysis period, and applying an estimated percentage of EPCS that will be transferred.[20]

Surescripts' reports, ''2019 National Progress Report'' and ''2020 National Progress Report'' form the basis for estimating the number of EPCS from 2022 to 2026.[21] The reports indicate that the rate of electronic prescribing for non-controlled substances (E–RX) was 76, 83, and 86, and 89 percent in 2017, 2018, 2019, and 2020, respectively.[22] Additionally, the reports indicate that the rate of electronic prescribing for controlled substances (EPCS) is rising rapidly; the rate was 17, 26, 38, and 58 percent in 2017, 2018, 2019, and 2020, respectively.[23] Furthermore, there were 65.0, 96.8, 134.2, and 203.6 million EPCS filled in 2017, 2018, 2019, and 2020 respectively.[24] Dividing the total EPCS by the rate of EPCS, DEA estimates the total controlled substances prescriptions, electronic and non-electronic, were 382.4, 372.3, 353.2, and 351.0 million in 2017, 2018, 2019, and 2020, respectively. Table 4 summarizes the data provided by the report and the

[20] Due to the rapidly evolving industry and regulatory conditions, the analysis period is from 2022 to 2026.

[21] Surescripts, ''2019 National Progress Report'' for 2017 data and ''2020 National Progress Report'' for 2018–2020 data.

[22] Ibid.

[23] Ibid.

[24] Ibid.

estimated total prescriptions for controlled substances for years 2017–2020.

controlled substances for years 2017–2020.

TABLE 4—ESTIMATED TOTAL PRESCRIPTIONS FOR CONTROLLED SUBSTANCES, 2017–2020

	2017	2018	2019	2020
Non-Controlled Substances:				
Rate of E-Rx (%)	76	83	86	89
Controlled Substances:				
Total Rx, E and non-E (millions of Rx)	382.4	372.3	353.2	351.0
Rate of EPCS (%)	17	26	38	58
Total EPCS (millions of Rx)	65.0	96.8	134.2	203.6

As shown in Table 4, the estimated total prescriptions for controlled substances decreased from 382.4 million in 2017 to 351.0 million in 2020. For the purposes of this analysis, DEA estimates the total number of controlled substances prescriptions will stay constant at 351.0 million from 2022 to 2026.

Also from Table 4, the rate of electronic prescribing for non-controlled substances is higher than that of controlled substances. However, DEA estimates the rate of electronic prescribing for controlled substances will match that of non-controlled substances in 2022 due to a recently published CMS rule, which requires electronic prescribing for all controlled substances (with some exceptions) covered under Medicare Part D.[25] The 2020 rate of electronic prescriptions for non-controlled substances was 89 percent. While it is possible that this rate could continue to increase in the future, DEA has no basis to estimate how much higher the rate would go. As the rate of increase has been slowing over the past several years, DEA conservatively estimates that the rate of electronic prescribing for non-controlled substances has peaked at 89 percent and the rate of electronic prescribing for controlled substances will be 89 percent for the analysis period of 2022–2026. Multiplying the estimated total number of controlled substance prescriptions, 351.0 million per year, by the estimated rate of EPCS of 89 percent, the estimated total EPCS is 312.4 million per year for the analysis period 2022–2026.

CMS estimates that as much as four percent of electronic prescriptions for non-controlled substances in 2019 were transfers.[26] Applying the four percent transfer rate to the total EPCS prescriptions, DEA estimates the number of transfers are 12.5 million per year from 2022–2026.

Total Cost Savings

In order to calculate the total cost savings, DEA applied the $1.76 net cost savings per transaction to the estimated 12.5 million transfers, resulting in a total annual net cost savings of $22.0 million over the analysis period, 2022–2026. The net present value (NPV) of the cost savings is $100.8 million at three percent discount rate and 90.2 million at seven percent discount rate. The annualized cost savings from 2022 to 2026 is $22.0 million at three percent and seven percent. Table 5 summarizes the NPV and annualized cost savings calculation.

TABLE 5—NPV AND ANNUALIZED COST SAVINGS

	3 percent	7 percent
NPV of Cost Savings	$100.8	$90.2
Annualized Cost Savings	22.0	22.0

Executive Order 12988, Civil Justice Reform

This proposed rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988 to eliminate drafting errors and ambiguity, minimize litigation, provide a clear legal standard for affected conduct, and promote simplification and burden reduction.

Executive Order 13132, Federalism

This proposed rule does not have federalism implications warranting the application of E.O. 13132. The proposed rule does not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have tribal implications warranting the application of E.O. 13175. It does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (RFA), DEA evaluated the impact of this proposed rule on small entities. DEA's evaluation of economic impact by size category indicates that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of these small entities.

The RFA requires an agency to analyze options for regulatory relief of small entities unless it can certify that the rule will not have a significant impact on a substantial number of small entities. DEA has analyzed the economic impact of each provision of this proposed rule and estimates that it will have minimal economic impact on affected entities, including small businesses, nonprofit organizations, and small governmental jurisdictions.

DEA is proposing to amend its regulations to allow the electronic transfer of schedule II–V controlled substance prescriptions between registered retail pharmacies for initial filling on a one-time basis only. This amendment will specify the procedure that must be followed and the information that must be documented when electronically transferring an EPCS between pharmacies. The proposed amendment would stipulate that the transfer must be communicated directly between two licensed pharmacists, the prescription must remain in its electronic form, and the required prescription information must be unaltered during the transmission.

[25] 85 FR 84472 (Dec. 28, 2020).

[26] Conference call between CMS and DEA, January 2021. CMS's estimate is a ''high'' estimate and ''4 percent'' is considered the maximum percent of electronic prescriptions that are transfers.

Nothing in this proposed rule alters the existing pharmacy application requirements as specified in 21 CFR 1311.205.

In addition to the above, the pharmacist transferring the prescription must update the electronic prescription record to include information noting that the prescription was transferred. The transferring pharmacist must also record the name, address, and DEA registration number of the pharmacy to which the prescription is being transferred, the name of the pharmacist receiving the transfer, the name of the transferring pharmacist, and the date of the transfer. Likewise, the pharmacist receiving the transferred prescription must record the transferring pharmacy's name, address and DEA registration number, the name of the transferring pharmacist, and the name of the pharmacist receiving the transfer. Finally, under the proposed amendment, the electronic records documenting the transfer must be maintained for a period of two years from the date of the transfer by both the pharmacy transferring the electronic prescription and the pharmacy receiving the transfer.

DEA anticipates the proposed rule will affect pharmacies, offices of physicians, and hospitals, as the majority of prescribers are employed by offices of physicians or hospitals. Table 6 indicates the sectors, as defined by the North American Industry Classification System (NAICS), affected by the proposed rule. There may be other small entities under Small Business Administration size standards in other NAICS code industries affected by this proposed rule. However, DEA believes the list in Table 6 is a good general representation of affected small entities and their industries as defined by NAICS.

TABLE 6—AFFECTED INDUSTRIAL SECTORS

Business activity	NAICS code	NAICS code description
Pharmacy	446110	Pharmacies and Drug Stores.
Prescriber	621111	Offices of Physicians (except Mental Health Specialists).
	622110	General Medical and Surgical Hospitals.

Although transfers of EPCS may not be common, as much as four percent of prescriptions, DEA estimates, for the purposes of this analysis, such transfers of EPCS are distributed proportionally across all prescribers and pharmacies. Therefore, DEA estimates a substantial number of small entities in the affected industries would be affected by this proposed rule.

In order to determine if the proposed rule will result in a significant impact on small entities, the following steps were taken:

1. Estimate the cost or cost savings per transfer.

2. Estimate the total cost or cost savings of transfers.

3. Allocate the total cost or cost savings across all affected entities in proportion to their revenue to estimate the cost or cost savings per entity.

4. Compare the cost or cost savings to the annual revenue for the smallest of small entities. If the impact is not significant for the smallest of small entities, then the impact is not significant for the larger small entities.

Table 3 summarizes the cost or cost savings on a per-transfer basis. The net cost to the transferring pharmacy is $2.93 (the cost of transferring the prescription, $4.40 (2.b.), minus the cost of updating the prescription record to note that the prescription was not filled, $1.47 (2.a.)). The cost to the receiving pharmacy is $4.40 (8.b.) per transfer, resulting in a combined net cost of $7.33. Each transfer affects two different pharmacies, transferring and receiving pharmacies. However, to be conservative, the estimated cost per transfer to a pharmacy is $7.33 because the transferring and receiving pharmacies may be different establishments of the same parent entity. Also from Table 3, the total cost savings to a prescriber (office of physician or hospital) is $6.81, sum of the cost savings from not receiving a call from the patient $2.10 (6.) and the cost savings from not issuing a new prescription $4.71 (7.).

To calculate the total cost to pharmacies and total cost savings to prescribers, the unit cost and cost savings are multiplied by the estimated total annual transfers. From above, the estimated number of transfers is 12.5 million per year. Multiplying the net cost of $7.33 per transfer for pharmacies by 12.5 million transfers, the estimated total cost of transfers to all pharmacies is $91,625,000 per year. Multiplying the cost saving of $6.81 per transfer for prescribers (office of physician or hospital) by 12.5 million transfers, the estimated total cost saving to all prescribers is $85,125,000 per year.

The U.S. Census Bureau's Statistics of U.S. Businesses (SUSB) is an annual series that provides national and subnational data on the distribution of economic data by enterprise size and industry. SUSB data includes the number of firms at various size ranges. For the purposes of this analysis, the term ''firm'' as defined in the SUSB is used interchangeably with ''entity'' as defined in the RFA. Based on SUSB data, there are 18,852, 174,901, and 2,904 firms in 446110—Pharmacies and Drugs Stores, 621111—Offices of Physicians (except Mental Health Specialists), and 622110—General Medical and Surgical Hospitals industry sectors, respectively.[27] Furthermore, the total receipts for all firms, including all size ranges, are $236 billion, $402 billion, and $827 billion (rounded) for 446110—Pharmacies and Drugs Stores, 621111—Offices of Physicians (except Mental Health Specialists), and 622110—General Medical and Surgical Hospitals industry sectors, respectively.[28] Table 7 summarizes the SUSB data and provides receipt values without rounding.

[27] SUSB, 2012 SUSB Annual Data Tables by Establishment Industry, Data by Enterprise Receipt Size, U.S., 6-digit NAICS, *https://www.census.gov/data/tables/2012/econ/susb/2012-susb-annual.html* (*https://www2.census.gov/programs-surveys/susb/tables/2012/us_6digitnaics_r_2012.xlsx*). (Accessed February 25, 2021.) 2012 data by enterprise receipt size is the latest available.

[28] Ibid.

TABLE 7—NUMBER OF FIRMS AND TOTAL RECEIPTS

NAICS code	NAICS code description	Receipt size ($)	Number of firms	Receipts ($000)
446110	Pharmacies and Drug Stores	All size ranges	18,852	236,277,373
621111	Offices of Physicians (except Mental Health Specialists)	All size ranges	174,901	402,159,295
622110	General Medical and Surgical Hospitals	All size ranges	2,904	826,654,913

SUSB data also includes the number of firms and receipts for various receipt-size ranges. The smallest size range is firms with annual revenue less than $100,000. The average receipt per firm was calculated based on the number of firms and for the receipts for the firms in the size range. For example, in the 446110—Pharmacies and Drug Stores industry sector, there are 751 firms with receipts under $100,000, and their combined receipts is $36,066,000. Dividing $36,066,000 by 751 results in an average receipt of $48,024 per firm. Performing the same calculation for all three industries, the average receipt per firm is $48,024, $50,493, and $272,286 for the smallest size category in 446110—Pharmacies and Drugs Stores, 621111—Offices of Physicians (except Mental Health Specialists), and 622110—General Medical and Surgical Hospitals industry sectors, respectively. Table 8 summarizes the calculation for the average receipt per firm.

TABLE 8—AVERAGE RECEIPT PER FIRM

NAICS code	NAICS code description	Receipt size ($)	Number of firms	Receipts ($000)	Average receipt per firm ($)
446110	Pharmacies and Drug Stores	<100,000	751	36,066	48,024
621111	Offices of Physicians (except Mental Health Specialists)	<100,000	15,275	771,280	50,493
622110	General Medical and Surgical Hospitals	* 100,000–499,999	14	3,812	272,286

* ''Receipts'' not available for the smallest size range of ''< 100,000''; therefore, used next size range of ''100,000–499,000'' for comparison.

To compare the average cost per firm with the average receipt per firm, DEA allocated the cost and cost savings proportionally by revenue, divided by the number of firms to calculate the average cost per firm, and compared the average cost per firm as a percent of receipt per firm. For example, the receipts for the 751 firms with receipts under $100,000 in 446110—Pharmacies and Drug Stores industry sector is $36,066,000. This is 0.015264 percent of total receipt of $236,277,373,000 for all size ranges. Allocating 0.015264 percent of total cost to pharmacies of $91,625,000 to the 751 firms, the average cost per firm is $19.[29] Dividing the average cost per firm of $19 by the average receipt per firm of $48,024, the average cost per firm is 0.03956 percent of average receipt per firm.

This calculation is repeated for 621111—Offices of Physicians (except Mental Health Specialists) and 622110—General Medical and Surgical Hospitals industry sectors. However, the economic impact for 621111—Offices of Physicians (except Mental Health Specialists) and 622110—General Medical and Surgical Hospitals industry sectors is a cost savings, rather than a cost. Although employment of prescribers are expected to be split between these two industries, to be conservative, the total cost savings (rather than estimating a split between the two industries) is compared to the average receipt per firm. In summary, the average cost or cost savings per firm as percent of receipt is 0.03956 percent, 0.02179 percent, and 0.01028 percent for 446110—Pharmacies and Drugs Stores, 621111—Offices of Physicians (except Mental Health Specialists), and 622110—General Medical and Surgical Hospitals industry sectors, respectively. Table 9 summarizes the calculation and results.

TABLE 9—COST OR COST SAVINGS PER FIRM AS PERCENTAGE OF RECEIPTS

NAICS code	NAICS code description	Receipt size ($)	Number of firms	Receipt as percent of total (percent)	Allocated cost to firms in size range ($)	Average cost per firm ($)	Average cost/ cost savings per firm as percent of receipt (percent)
446110	Pharmacies and Drug Stores	<100,000	751	0.015264	13,762	19	0. 03956
621111	Offices of Physicians (except Mental Health Specialists).	<100,000	15,275	0.191785	160,645	11	* (0.02179)
622110	General Medical and Surgical Hospitals.	100,000–499,999	14	0.000461	386	28	* (0.01028)

* Cost savings.

In conclusion, the average cost or cost savings per firm as percent of receipt of 0.03956 percent, 0.02179 percent, and 0.01028 percent are not significant economic impacts. Therefore, DEA concludes this proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

[29] ($91,625,000 × 0.015264 percent)/751 = $19.

Unfunded Mandates Reform Act of 1995

In accordance with the Unfunded Mandates Reform Act (UMRA) of 1995, 2 U.S.C. 1501 *et seq.*, DEA has determined and certifies that this proposed rule would not result in any Federal mandate that may result ''in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any 1 year.'' Therefore, neither a Small Government Agency Plan nor any other action is required under UMRA of 1995.

Paperwork Reduction Act of 1995

Pursuant to section 3507(d) of the Paperwork Reduction Act of 1995 (PRA), DEA has identified the following collection of information related to this proposed rule.[30] If adopted, this proposed rule would create additional recordkeeping requirements for pharmacies electronically transferring of schedules II–V EPCS for initial dispensing. A person is not required to respond to a collection of information unless it displays a valid OMB control number. Copies of existing information collections approved by OMB may be obtained at *http://www.reginfo.gov/public/do/PRAMain.*

A. Collections of Information Associated With the Proposed Rule

Title: Recordkeeping Requirements for the electronic transfer of electronic prescriptions for schedules II–V controlled substances between pharmacies for initial filling.

OMB Control Number: 1117–NEW.

DEA Form Number: N/A.

DEA is proposing to require pharmacies to create and maintain certain records relating to the transfer of unfilled EPCS between pharmacies for initial filling. The rulemaking proposes to require the transferring pharmacy to note in the electronic prescription record that the prescription was transferred. The transferring pharmacy would also be required to add to the prescription record the name, address, and DEA registration number of the pharmacy to which the prescription was transferred, as well as the name of the pharmacist receiving the transfer, the name of the transferring pharmacist, and the date of the transfer. Similarly, the proposed rule would require the pharmacy receiving the transfer to record the name, address, and DEA registration number of the transferring pharmacy, the name of the transferring pharmacist, the name of the pharmacist receiving the transfer, and the date of the transfer. In addition, the proposed rule would require the records to be maintained by both pharmacies for at least two years from the date of the transfer. DEA estimates the following number of respondents and burden associated with this collection of information:

- *Number of respondents:* 70,567.
- *Frequency of response:* 354.273244 (calculated average).
- *Number of responses:* 25,000,000.
- *Burden per response:* 0.05 hour.
- *Total annual hour burden:* 1,250,000.

The activities described in this information collection are usual and ordinary business activities and no additional cost is anticipated.

B. Request for Comments Regarding the Proposed Collections of Information

- Written comments and suggestions from the public and affected entities concerning the proposed collections of information are encouraged. Under the PRA, the DEA is required to provide a notice regarding the proposed collections of information in the **Federal Register** with the notice of proposed rulemaking and solicit public comment. Pursuant to section 3506(c)(2) of the PRA, the DEA solicits comment on the following issues: The need for the information collection and its usefulness in carrying out the proper functions of DEA.
- The accuracy of DEA's estimate of the burden the proposed collection of information, including the validity of the methodology and assumptions used.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

Please send written comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for DOJ, Washington, DC 20503. Please state that your comments refer to RIN 1117–AB64/Docket No. DEA–637. All comments must be submitted to OMB on or before January 18, 2022. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

List of Subjects 21 CFR Part 1306

Drug traffic control, Prescription drugs.

For the reasons stated in the preamble, DEA proposes to amend 21 CFR part 1306 as follows:

PART 1306—PRESCRIPTIONS

■ 1. The authority citation for part 1306 continues to read as follows:

Authority: 21 U.S.C. 821, 823, 829, 829(a), 831, 871(b), unless otherwise noted.

■ 2. Amend § 1306.08 by adding paragraphs (e) through (i) to read as follows:

§ 1306.08 Electronic prescriptions.

* * * * *

(e) The transfer for initial dispensing of an electronic prescription for a controlled substance in schedule II–V is permissible between retail pharmacies on a one-time basis only.

(f) The transfer of an electronic prescription for a controlled substance in schedule II–V between retail pharmacies for the purpose of initial dispensing is subject to the following requirements:

(1) The prescription must be transferred from one retail pharmacy to another retail pharmacy in its electronic form. At no time may an intermediary convert an electronic prescription to another form (*e.g.,* facsimile) for transmission.

(2) The contents of the prescription required by part 1306 of this chapter must not be altered during transfer between retail pharmacies. Any change to the content during transfer, including truncation or removal of data, will render the electronic prescription invalid.

(3) The transfer must be communicated directly between two licensed pharmacists.

(4) The transferring pharmacist must add the following to the electronic prescription record:

(i) Information that the prescription has been transferred.

(ii) The name, address, and DEA registration number of the pharmacy to which the prescription was transferred and the name of the pharmacist receiving the prescription information.

(iii) The date of the transfer and the name of the pharmacist transferring the prescription information.

(5) The receiving pharmacist must do the following:

(i) Add the word ''transfer'' to the electronic prescription record at the receiving pharmacy.

(ii) Annotate the prescription record with the name, address, and DEA registration number of the pharmacy from which the prescription was transferred and the name of the pharmacist who transferred the prescription.

(iii) Record the date of the transfer and the name of the pharmacist receiving the prescription information.

(g) The transfer of an electronic prescription for a controlled substance in schedule II–V for the purpose of initial dispensing is permissible only if

[30] 44 U.S.C. 3501 *et seq.*

allowable under existing State or other applicable law.

(h) The electronic records documenting the transfer of the electronic prescription must be maintained for a period of two years from the date of the transfer by both the pharmacy transferring the electronic prescription and the pharmacy receiving the electronic prescription.

(i) A pharmacy may transfer electronic prescription information for a controlled substance in schedule III, IV, and V to another pharmacy for the purpose of refill dispensing pursuant to § 1306.25.

Anne Milgram,

Administrator.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

[Docket No. ATBCB–2019–0002]

Advisory Guidelines for Aircraft Onboard Wheelchairs; Reopening of Comment Period; Notice of Public Meeting

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Reopening of comment period; notice of meeting.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (Access Board or Board), jointly with the U.S. Department of Transportation (DOT), is hosting a virtual public meeting to obtain further information on the Access Board's proposed advisory guidelines for aircraft onboard wheelchairs (OBW) issued on August 20, 2019, and the portion of DOT's notice of proposed rulemaking (NPRM) issued on January 2, 2020 that relates to OBW performance standards. DOT's January 2, 2020 NPRM proposed OBW performance standards as one of various measures for improving accessibility of lavatories on single-aisle aircraft for passengers with disabilities. The Board's draft advisory guidelines provided technical specifications for an OBW that would serve as one means of complying with DOT's proposed performance standards for OBW. This public meeting will serve as a forum for the Access Board and DOT to jointly gather additional information on their respective proposed OBW advisory guidelines and proposed OBW performance standards. A proposed rule from DOT relating to this public meeting and reopening of the comment period on its NPRM containing OBW performance standards is published elsewhere in this issue of the **Federal Register**.

DATES:

Public Comments: The comment period on the Board's draft advisory guidelines on OBW published at 84 FR 43100 (Aug. 20, 2019) is reopened for supplemental comments from December 16, 2021 (*i.e.,* date of public meeting) to January 17, 2022.

Public meeting: December 16, 2021, 9:30 a.m. to 11:30 a.m. and 1 p.m. to 3 p.m., Eastern Time.

Public attendance and testimony: Requests to attend the meeting must be received by December 9, 2021. Communication access real-time translation and sign language interpretation will be provided, but requests for additional accommodations because of a disability must be received by December 9, 2021. If you wish to present oral testimony during the meeting, you must submit a request by December 9, 2021. Requests to submit written materials to be reviewed during the meeting must be received no later than December 9, 2021.

ADDRESSES:

Public Meeting: Requests to attend the meeting must be submitted to *https://usdot.zoomgov.com/webinar/register/WN_8PChAZcLQsmDm1xathLEjw.* Requests for additional accommodations because of a disability must be submitted to *OBWpublicmeeting@dot.gov.* Requests to submit written materials to be reviewed during the meeting must be submitted to *OBWpublicmeeting@dot.gov.* If you wish to speak during the meeting, you must submit a request to DOT at *OBWpublicmeeting@dot.gov.* The virtual meeting will be open to the public, subject to any technical and/or capacity limitations, and held via the Zoom Webinar Platform. Virtual attendance information will be provided upon registration. An agenda will be provided to registered participants and placed in the docket in advance of the meeting.

Public Comments: You may submit comments, identified by docket number (ATBCB–2019–0002), by any of the following methods:

- *Federal rulemaking Portal: https://www.regulations.gov/.* Follow the instructions for submitting comments.
- *Email: docket@access-board.gov.* Include docket number ATBCB–2019–0002 in the subject line of the message.
- *Mail:* Office of Technical and Information Services, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004–1111.

Instructions: All submissions must include the docket number (ATBCB–2019–0002) for this regulatory action. All comments received will be posted without change to *https://www.regulations.gov/,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov/document/ATBCB-2019-0002-0001.*

FOR FURTHER INFORMATION CONTACT: To register and attend this virtual meeting, please contact DOT at: *https://usdot.zoomgov.com/webinar/register/WN_8PChAZcLQsmDm1xathLEjw.* For further information, contact Wendy Marshall of the Access Board by email at *marshall@access-board.gov* or by phone at 202–272–0043. You may also contact Robert Gorman, DOT Senior Attorney, by email at *robert.gorman@dot.gov.*

SUPPLEMENTARY INFORMATION:

Background

In April 2016, DOT established and appointed members to the Advisory Committee on Accessible Air Transportation (ACCESS Advisory Committee or Committee) to negotiate and develop proposed regulations addressing, among other things, accessible lavatories on single-aisle aircraft.[1] During the first meeting, DOT committed to the Committee that if it came to a consensus on the terms of a proposed rule and the Department does not cast a dissenting vote on the consensus product, DOT would exercise good faith efforts to issue a proposed rule reflecting that consensus to the extent possible. The Committee gathered data, conducted meetings and site visits, and engaged in negotiations from May 2016 through November 2016.

On November 22, 2016, the ACCESS Advisory Committee reached consensus on recommendations for new regulatory proposals to improve the accessibility of lavatories on single-aisle aircraft and the Department does not cast a dissenting

[1] A full list of ACCESS Advisory Committee members and other information on the Committee may be found at *https://www.transportation.gov/access-advisory-committee* ; see also *https://www.regulations.gov/docket?D=DOT-OST-2015-0246* (ACCESS Advisory Committee docket).

vote.[2] The accessible lavatory Term Sheet included agreements for both short-term and long-term accessibility improvements. The short-term improvements would be required on new single-aisle aircraft delivered three years after the effective date of the DOT final rule that implements the agreement. The short-term improvements included a proposed requirement that single-aisle aircraft with 125 or more passenger seats would have at least one lavatory with a number of accessibility features, including accessible door locks, flush handles, call buttons, faucets, and assist handles. Single-aisle aircraft with 125 or more passenger seats would also be required to include an OBW that: (1) Permits passage in the aircraft aisle; (2) fits within an available certificated OBW stowage space; and (3) accomplishes its functions without requiring modification to the interior arrangement of the aircraft or the lavatory. The Term Sheet called on the DOT to ''consult with advocates, airlines, aircraft manufacturers, manufacturers of OBW, flight attendant association(s) and other stakeholders in developing these standards,'' and to ''include the proposed new standards for an OBW and replacement of OBW on existing aircraft as described above in its notice of proposed rulemaking.'' [3]

DOT determined that the most appropriate method for developing initial OBW design standards was to seek technical assistance from the Access Board, the federal agency that specializes in producing accessible design specifications for the built environment, transportation systems, information and communication technology, and medical diagnostic equipment.[4] See 29 U.S.C. 792. In response to DOT's request, on August 20, 2019, the Access Board published in the **Federal Register** ''Proposed Advisory Guidelines for Aircraft Onboard Wheelchairs,'' and sought public comment.[5] The Access Board's guidelines provide design criteria for onboard wheelchair seats, back support, armrests, footrests, movement, stowage, stability, loads, caster wheels, assist handles, and torso and leg restraints. These guidelines provided for the OBW to be backed fully into the lavatory and positioned over the closed toilet so that the lavatory door can be completely closed. The guidelines also provided for the OBW to be maneuvered partially into lavatories in a forward direction to allow users the option to make a stand-and-pivot transfer to the toilet.

The Access Board held a public hearing on these advisory guidelines on September 12, 2019. In response to its proposed guidelines, the Access Board received over 40 comments from various interest groups and stakeholders, including people with disabilities, advocacy groups, aircraft manufacturers, trade associations, manufacturers of onboard wheelchairs, researchers, and others.[6]

On January 2, 2020, DOT published a notice of proposed rulemaking (NPRM) titled ''Accessible Lavatories on Single-Aisle Aircraft: Part 1.'' [7] This NPRM included proposals for short-term improvements to lavatory accessibility, including new proposed requirements for OBWs. In developing its own proposed rules for OBWs, DOT started with the Access Board's design-based guidelines and adapted them into more flexible performance standards. The performance standards were designed to allow manufacturers to find efficient and innovative means for meeting performance expectations. At the same time, the proposed rule states that airlines may use the Access Board's advisory guidelines for technical assistance in furnishing an OBW that meets the DOT's performance standards.

Under the proposed rule, OBWs meeting the new standards must be installed on new single-aisle aircraft with an FAA-certificated maximum capacity of 125 seats or more that enter service three years after the effective date of a final rule issued by DOT in this proceeding. The proposed rule would require the OBW to be designed in such a manner as to enable the OBW to completely enter the lavatory in a backward orientation. Specifically, the rule would require the OBW to fit over the closed toilet lid in a manner that permits the lavatory door to close completely. It is anticipated that the attendant would push the OBW backward into the lavatory by means of handles on the front of the OBW. After the OBW is situated over the closed toilet lid, the door would be closed and the passenger would be able to perform non-toileting lavatory functions in privacy.

The proposed rule would also require that the OBW be designed such that it could, at a minimum, partially enter the lavatory in a forward orientation. The purpose of this provision is to facilitate a stand-and-pivot maneuver from the OBW to the toilet seat, for passengers who are able to do so. With a stand-and-pivot maneuver, the passenger would partially enter the lavatory by means of the OBW, stand up, and pivot 180 degrees to reach the toilet seat.

The proposed OBW rule also contained safety elements. For example, the rule would require that the height of the OBW seat must align with the height of the aircraft seat to the maximum extent practicable, in order to permit a safe transfer between the OBW and the aircraft seat. The rule would require the wheels of the OBW to lock in the direction of travel, in order to avoid contact with aircraft seats and other obstructions as it moves down the aisle. Any other moving parts of the OBW would need to be capable of being secured such that they do not move while the occupied onboard wheelchair is being maneuvered. The wheels would also be required to lock in place so as to provide stability during transfers. The OBW would be required not to tip or fall in any direction under normal operating conditions when occupied for use.

The OBW would also be required to have a padded seat and backrest, in order to preserve skin integrity, and to prevent spasticity and injury.[8] The rule would also require the OBW to be free of sharp or abrasive components. The OBW would also be required to have arm supports that are sufficient to facilitate transfers; arm supports that are repositionable to permit unobstructed transfers between the OBW and the aircraft seat; torso and leg restraints to ensure stability and prevent injury; as well as a unitary foot support that would provide adequate clearance over the lavatory threshold and also allow for an unobstructed transfer between the OBW and the lavatory. Under the proposed rule, restraints would be operable by the passenger in order to permit the passenger the option to adjust the restraints unassisted. Finally, the rule would require the OBW to have instructions prominently displayed for proper use.

In keeping with the ACCESS Advisory Committee's Term Sheet, airlines would

[7] See 85 FR 27; *https://www.federalregister.gov/documents/2020/01/02/2019-27631/accessible-lavatories-on-single-aisle-aircraft-part-1.*

[8] DOT specifically sought comment on whether the proposed rule text adequately conveys the degree of back support and seat support necessary to properly accommodate passengers with disabilities, and if not, whether additional standards should be specified.

not be required to modify aircraft interiors, including lavatories and existing OBW stowage spaces, in order to comply with these OBW provisions. DOT sought comment on all aspects of this critical issue of OBW stowage space. Specifically, DOT sought further data regarding: (1) The folded dimensions of OBWs currently in use on single-aisle aircraft; (2) the locations and dimensions of current OBW stowage spaces; and (3) the feasibility of designing and constructing an OBW that meets the listed performance standards, particularly including the ability to enter the lavatory in a backward orientation, while fitting into the existing OBW stowage space for that aircraft. DOT also sought comment on an alternative proposal: Whether to require OBWs to meet the new performance standards set forth in the NPRM even if stowage space must be expanded to accommodate the OBW. DOT sought comment on the costs of expanding OBW stowage spaces to meet these performance standards.

Again, in keeping with the ACCESS Advisory Committee's Term Sheet, the proposed rule provided that an airline would not be responsible for the failure of third parties to furnish an OBW that complies with these proposed standards, so long as the airline notifies and substantiates to DOT the efforts it expended to obtain compliant OBWs. DOT recognized that, at present, no commercially available OBW exists that permits backward passage into an aircraft lavatory, and that while airlines may seek to procure an OBW that meets DOT's performance standards, airlines do not design or produce OBWs themselves.[9]

Finally, the proposed rule provided that if an airline replaces an OBW on an aircraft with an FAA-certificated maximum capacity of 125 seats or more three years after the effective date of the rule, then the replacement OBW must comply with DOT's new OBW standards. DOT sought comment on all aspects of the OBW proposal, including costs, benefits, and feasibility.

The comment period to the NPRM closed on March 2, 2020. DOT received relatively few comments about OBW design, and almost no comments that estimated the costs of developing or manufacturing an OBW that would comply with the standards set forth in the proposed rule. Certain disability advocates argued, among other things, that DOT's OBW standards should have tracked more closely the Access Board's design standards.[10] Representatives of the airline industry contended that DOT failed to take into account considerations such as aviation safety and the impact on flight attendants of unpacking, using, and stowing the OBW while in flight.[11] They also argued that DOT failed to adequately consult with stakeholders before issuing its OBW proposal.[12] DOT received no comments from OBW manufacturers.

Announcement of Public Meeting

Under these circumstances, the Access Board and DOT are jointly of the view that it is appropriate to hold a public hearing to gather additional information on the OBW design from disability advocates, airlines, aircraft manufacturers, manufacturers of OBWs, flight attendant associations, and other stakeholders. Specifically, the Access Board seeks information on OBW loads and caster wheel size that will help it finalize its advisory guidelines for OBWs. DOT seeks comment on all aspects of OBW design before issuing any final binding regulation on the topic.

Questions Relating to Access Board's Proposed Voluntary Design Standards

The Access Board is seeking additional information regarding OBW loads and OBW casters.

Onboard Wheelchair Loads

The overall weight capacity or load of current OBW varies greatly and ranges from approximately 200 to 800 pounds. In trying to determine the appropriate load, the Access Board looked to its *Guidelines for Aircraft Boarding Chairs* (1987), which recommend that seats support at least 723 pounds (weight of a 99th percentile male with a 3.0 safety factor). See *https://www.access-board.gov/research/completed-research/guidelines-for-aircraft-boarding-chairs.* Using updated anthropometrics, the weight of a 99th percentile male with a 3.0 safety factor would be 826 pounds. See Department of Health and Human Service Centers for Disease Control and Prevention's Anthropometric Reference Data for Children and Adults: United States, 2011–2014, Table 6, Line 1 (Aug. 2016). However, the boarding chair (used to transfer passengers from their personal wheelchairs to the airplane seat) differs from the proposed OBW in that a boarding chair does not need to fold for storage on the aircraft or fit over the seat of a toilet in a cantilever design.

The Board is not aware of existing industry standards for OBW that are designed to allow over-the-toilet positioning. In its proposed advisory guidelines, the Board reserved provisions for loads pending further information as to what loads are appropriate for an OBW design that accomplishes the proposed functions.

The Board received comments from the public, including aircraft manufacturers, recommending that the Board's guidelines reference load specifications in SAE International's standard entitled, ''Foldable On-Board Wheelchairs for Passengers with Disabilities,'' ARP 4120C (Stabilized 2013).'' The SAE standard specifies loads for onboard wheelchair seats, seat backs, arm and foot supports, wheels, and assist handles.

Based on its review of the comments on the proposed guidelines, the Board is considering referencing the SAE International's standard for loads for seats (3.2.9.1), arm supports (3.2.9.3), foot support (3.2.9.4), casters (3.2.9.2), and assist handles of onboard wheelchairs (3.2.9.6). The Board seeks comment on whether the loads specified in the SAE International ARP 4120C Standard are appropriate for an onboard wheelchair design that allows the chair to be positioned over the closed lavatory toilet. SAE International has made these referenced provisions publicly available without cost (read-only, not for distribution) until the close of the comment period on January 17, 2022, at: *https://www.sae.org/binaries/content/assets/cm/content/standards/arp4120c_review.pdf.*

In addition to comments on loads stated in the above-referenced SAE International standard, the Access Board seeks information on alternative appropriate standards for OBW loads.

Onboard Wheelchair Casters (Size)

The draft advisory guidelines require that caster wheels of onboard wheelchairs move independently to facilitate maneuvering within the confined space of aircraft aisles and

[9] DOT sought comment on whether there should be a deadline for an airline to notify DOT that the airline has expended its efforts to obtain compliant OBWs, and if so, how many days after an airline becomes aware of such commercial unavailability (*e.g.,* 30 days) would be appropriate for airlines to notify DOT. DOT also recognized the uncertainties surrounding the issue of whether OBWs meeting DOT's new standards can fit within existing OBW stowage spaces. The intent of the proposal was to encourage innovation in meeting the proposed standards by affirmatively requiring airlines to engage in reasonable efforts to obtain compliant OBWs from third parties. DOT sought comment on whether the ''reasonable efforts'' clause is the most appropriate means of reaching the overarching goal of ensuring that OBWs with the new accessibility features are acquired.

[10] See, *e.g.,* Comment of Paralyzed Veterans of America, *https://www.regulations.gov/comment/DOT-OST-2019-0180-0335,* at 5.

[11] See, *e.g.,* Comment of Airlines for America, *https://www.regulations.gov/comment/DOT-OST-2019-0180-0337,* at 2–3.

[12] Id.

lavatories. For safety and stability, the guidelines also require each caster to have wheel locks and swivel locks. In its proposal, the Board sought comment on whether the guidelines should specify a minimum size for caster wheels so that they are large enough to readily traverse thresholds at lavatory entrances. Commenters recommended that the guidelines specify a performance requirement instead of a minimum caster size. However, the threshold at the lavatory entrance may significantly impact an assistant's ability to back the occupied OBW into the lavatory using the front assist handles and to pull it back out.

The Access Board requests information on the minimum caster wheel diameter that would ensure stability of the occupied OBW and allow the chair to easily traverse the lavatory doorway threshold when propelled using solely the front assist handles. The Board also requests information on the standard height of lavatory thresholds on single-aisle aircraft with 125 or more passenger seats.

Questions Relating to DOT's NPRM Regarding OBW Design

In a notice published elsewhere in this issue of the **Federal Register**, DOT seeks further information on all aspects of its NPRM relating to OBW design, including but not limited to:

- Whether the proposed OBW design elements adequately address accessibility concerns;
- The cost and feasibility of designing, manufacturing, and implementing compliant OBWs;
- The cost of developing and implementing procedures for training crew in unloading, using, and stowing the OBW;
- The dimensions of current OBW stowage spaces in single-aisle aircraft;
- Whether OBWs that meet DOT's proposed accessibility standards can be stowed in existing stowage spaces; and
- Aviation safety considerations relating to unloading, using, and stowing the OBW while in flight.

Invitation for the Submission of Additional Written Comments

The Access Board encourages stakeholders, including disability advocates, airlines, aircraft manufacturers, manufacturers of OBWs, flight attendant associations, public meeting participants, and others to submit written comments to the regulatory docket on its proposed OBW advisory guidelines, oral testimony or written materials discussed at the public hearing, or related matters, during the supplemental period for comment from December 16, 2021 to January 17, 2022.

Gretchen Jacobs,

General Counsel.

BILLING CODE 8150–01–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Maryland Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of planning meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a meeting of the Maryland Advisory Committee to the Commission will convene by WebEx virtual platform and conference call on Tuesday, December 7, 2021, at 12:00 p.m. to continue its work on water accessibility and affordability in Maryland, including speakers on the topic.

DATES: Tuesday, December 7, 2021; 12:00 p.m. (ET).

PUBLIC WEBEX CONFERENCE LINK (video and audio): *https://bit.ly/3ATFxTt.*

IF PHONE ONLY: 1–800–360–9505; Access code: 199 818 3090#.

FOR FURTHER INFORMATION CONTACT: Barbara Delaviez at *ero@usccr.gov* or by phone at 202–381–8915.

SUPPLEMENTARY INFORMATION: The meeting is available to the public through the web link above. If joining only via phone, callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Individuals who are deaf, deafblind and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with conference details found through registering at the web link above. To request additional accommodations, please email *bdelaviez@usccr.gov* at least 10 days prior to the meeting.

Members of the public are invited to make statements during the open comment period of the meeting or submit written comments. The comments must be received in the regional office approximately 30 days after each scheduled meeting. Written comments may be emailed to Barbara Delaviez at *ero@usccr.gov.* Persons who desire additional information may contact Barbara Delaviez at 202–539–8246.

Records and documents discussed during the meeting will be available for public viewing as they become available at *www.facadatabase.gov.* Persons interested in the work of this advisory committee are advised to go to the Commission's website, *www.usccr.gov,* or to contact the Eastern Regional Office at the above phone number or email address.

Agenda

December 7, 2021 (Tuesday); 12:00 p.m. (ET)

- Rollcall
- Planning and Presentations on Water Affordability/Accessibility
- Open Comment
- Adjournment

Dated: November 15, 2021.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; 2020 Post-Census Group Quarters Review

AGENCY: Census Bureau, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on a proposed new information collection, the 2020 Post-Census Group Quarters Review, prior to the submission of the information collection request (ICR) to OMB for approval.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 18, 2022.

ADDRESSES: Interested persons are invited to submit written comments by email to *DCMD.PCGQR@census.gov.* Please reference 2020 Post-Census

Group Quarters Review in the subject line of your comments. You may also submit comments, identified by Docket Number USBC–2021–0025 to the Federal e-Rulemaking Portal: *http://www.regulations.gov.* All comments received are part of the public record. No comments will be posted to *http://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Sonia Collazo, Supervisory Statistician, 301–763–3350, and *sonia.g.collazo@census.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The 2020 Post-Census Group Quarters Review (2020 PCGQR) provides a mechanism for tribal, state, and local governmental units in the United States and Puerto Rico, or their designated representatives, to submit a request that the Census Bureau review their population counts for group quarter facilities by block to correct error(s) affecting the inclusion of group quarters and their population from the 2020 Census.

The Census Bureau has a comprehensive program to improve the quality of the population counts. For example, the Census Bureau provides an opportunity for tribal, federal, state, and local governments to review and improve the address lists and maps used to conduct the 2020 Census through the Local Update of Census Addresses program. In 2020, the Census Bureau used administrative records to classify some addresses as occupied, vacant, or nonresidential for enumeration. The Census Bureau also conducts the Population Estimates Program to calculate population change since the most recent decennial census and produce a time series of estimates of population, demographic components of change, and housing units. Beginning in January 2022, the Census Bureau will begin accepting and processing challenges submitted by eligible tribal, state, and local government officials through the Count Question Resolution (CQR) Program. The purpose of CQR is to provide a mechanism for governmental units to request a review of their official Census results and to help ensure that housing and population counts are correctly allocated to census tabulation blocks in the 50 states, District of Columbia and Puerto Rico. CQR provides corrected counts for housing units and population counts existing as of April 1 of the decennial year when the decennial census record shows that a housing unit or its associated population was identified during the enumeration, but erroneously excluded from or included in the census count due to a processing error. As part of the preparation for the 2020 CQR program, the Census Bureau published a **Federal Register** Notice on August 4, 2020 (85 FR 47162). The Census Bureau received several comments urging the Census Bureau to expand the CQR program in 2020 to accept and process submissions of population counts for group quarters facilities that the eligible governmental unit believed was not collected by the Census Bureau in the 2020 decennial census enumeration. Because the CQR program cannot be an extension of the decennial enumeration, the Census Bureau was unable to make changes to CQR consistent with these comments. However, the Census Bureau considered these comments in conjunction with its comprehensive program to improve the quality of the group quarters and associated population counts and the use of administrative records to support Census Bureau programs under Title 13, United States Code. The Census Bureau will conduct a 2020 PCGQR to collect information in support of its ongoing programs, such as the Population Estimates program and the American Community Survey program. The Census Bureau will issue certified population correction counts, as determined by Census Bureau research. The Census Bureau will incorporate all 2020 PCGQR revisions into the intercensal population estimates and American Community Survey estimates starting in 2022 and will post the results on the Census Bureau 2020 PCGQR website.

II. Method of Collection

The Census Bureau will accept 2020 PCGQR cases submitted by tribal, state, and local governmental units from Spring 2022 through Summer 2023. Governmental units wanting to submit a case will be provided an Excel spreadsheet template that will be submitted through the Census Bureau's Secure Web Incoming Module (SWIM). The Census Bureau will only accept cases that initiate from the highest elected or appointed official of tribal, state, and local governmental units, or their designated representative. Regardless of who makes the case submission, the Census Bureau must receive notification from the highest elected or appointed official of the governmental unit that indicates they want the Census Bureau to review their population counts for group quarter facilities data through the 2020 PCGQR process. This level of notification assures the Census Bureau that the highest level of leadership is informed and in agreement with filing a case on behalf of the governmental unit. The notification must accompany the supporting documentation submitted with the case.

While the 2020 PCGQR is not an extension of the CQR or the decennial census program, the Census Bureau will conduct 2020 PCGQR case research by examining the census records for the 2020 tabulation block(s) identified in a 2020 PCGQR case using the Master Address File. All boundaries in the published 2020 Census results are current as of January 1, 2020, and all group quarters and population counts are current as of April 1, 2020; therefore, any changes to counts that occurred past those dates are out of scope. These standards will ensure that the information submitted as part of a 2020 PCGQR case is consistent with existing Census Bureau records, which will allow the Census Bureau to use the submitted records in other Census Bureau programs, such as the Population Estimates Program and American Community Survey. No new decennial information products will be created by the 2020 PCGQR. The Census Bureau will not revise any 2020 Census information products, such as the population counts delivered to the President for apportionment or the 2020 Census Public Law 94–171 Redistricting Data Files and Geographic Products. Federal law requires decennial census data collection to end; therefore, the Census Bureau cannot continue collecting information for the decennial census through a 2020 PCGQR.

When a submission is received, the Census Bureau will conduct research and assess the records contained in that submission for quality. Once the Census Bureau completes this research and assessment, the Census Bureau will respond to the governmental unit in writing with an official determination letter. This determination letter will state how the case was resolved and information on the resolution, such as, if the Census Bureau will or will not

accept the records. If the Census Bureau's research and assessment determines that a submission identifies existing group quarters and its associated population counts, then the Census Bureau will accept the records and update populations counts for the governmental unit for use in Census Bureau programs, as appropriate. The Census Bureau will issue certified population count corrections, which governmental units can use for any purpose requiring their official Census counts. The Census Bureau will incorporate all 2020 PCGQR revisions into the intercensal population estimates and American Community Survey estimates starting in 2022 and will post the new counts on our website. The Census Bureau will attempt to respond to each inquiry within 90 days of receipt and complete all case research and resolution by no later than September 30, 2023.

III. Data

OMB Control Number: 0607–XXXX.

Form Number(s): None.

Type of Review: Regular submission, New Information Collection.

Affected Public: Tribal, State or Local governmental units in the United States and Puerto Rico.

Estimated Number of Respondents: 1,500.

Estimated Time per Response: 5.2 hours.

Estimated Total Annual Burden Hours: 7,800.

Estimated Total Annual Cost to Public: $0. (This is not the cost of respondents' time, but the indirect costs respondents may incur for such things as purchases of specialized software or hardware needed to report, or expenditures for accounting or records maintenance services required specifically by the collection.)

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. Section 6.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include, or summarize, each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–75–2021]

Foreign-Trade Zone (FTZ) 41—Milwaukee, Wisconsin Notification of Proposed Production Activity GXO Logistics (Thermal Transfer Printers, Data Transmission Devices and Accessories Kitting) Kenosha, Wisconsin

GXO Logistics submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Kenosha, Wisconsin under FTZ 41. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on November 8, 2021.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status components and specific finished products described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.*

The proposed finished products include: Thermal transfer printers; thermal transfer printer parts and components including kits and bundles; mobile computers, tablets, and handheld devices; mobile computer input/output units—barcode/image readers; vehicle mounted computers; optical readers or barcode scanners or imagers; inventory data transmission devices with phone capability (wireless wide area network); inventory data transmission devices (wireless local area network); cradle chargers with ethernet; cradle chargers and cradle chargers (standard); radio frequency identification (RFID) tag reader module, signal transmission—antennae or beacons; RFID antennae; RFID tags/labels; intelligent cabinet for data transmission devices; location system WhereTag tags; location system receivers; location system beacons; location system hubs; aftermarket kit (AMK) replacement plastic labels for printers; AMK replacement paper labels for printers; AMK replacement cutter and peeler components for printers; AMK repair/replacement components for printers; pick to order kits (PTO) paper labels; PTO power supplies/chargers; PTO repair and replacement parts for enterprise virtual machine (EVM) data transmission products; and, PTO repair and replacement parts for EVM mobile handheld devices (duty rate ranges from duty-free to 5.8%).

The proposed foreign-status components include: Printhead cleaning pens; plastic labels; paper labels; plastic screen protectors and name plates; plastic o-rings and sponge pads and spacers for vibration control; instruction sheets; instruction booklets, manuals, guides; steel screws; helical spring lock washers; steel washers (not spring or lock); wire helical springs; thermal transfer printer printed circuit board assemblies; thermal transfer printer housing parts including capacitors, inductors, resistors, electrical connectors, diodes and transistors; inductor/electromagnetic interference (EMI) ferrite chip beads; mobile computer input output unit components—keyboards and keypads; mobile computer input unit—barcode scanners; barcode scanners, scan engines and imagers; parts/components and accessories of mobile computers and handheld devices—printed circuit board assemblies, housing back, front and ends; clutch for printers; gears and transmission shafts for printers; coaxial cables; cables with fitted with connectors for telecommunications; power cables and extension cords fitted with connectors; data cable fitted with connectors; RFID tags/labels; integrated circuits, controllers or processors; integrated circuit memories, programmable; cradle charger bases and cups (standard/ethernet); power supplies; lithium battery cells; lithium-ion batteries; parts and components of

Inventory data transmission devices—housing components, electrical components antennae, printed circuit board assemblies, scanner assemblies, flexible printed circuit assemblies; single loudspeakers; antenna filter kits; radio frequency antennas housing and mounting components; and, cartridge fuses (duty rate ranges from duty-free to 6.2%). The request indicates that helical spring lock washers is subject to an antidumping/countervailing duty (AD/CVD) order if imported from certain countries. The Board's regulations (15 CFR 400.14(e)) require that merchandise subject to AD/CVD orders, or items which would be otherwise subject to suspension of liquidation under AD/CVD procedures if they entered U.S. customs territory, be admitted to the zone in privileged foreign status (19 CFR 146.41). The request also indicates that certain components are subject to duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is December 29, 2021.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Christopher Wedderburn at *Chris.Wedderburn@trade.gov.*

Dated: November 15, 2021.

Camille R. Evans,

Acting Executive Secretary.

Foreign-Trade Zones Board

[B–74–2021]

Foreign-Trade Zone (FTZ) 122—Corpus Christi, Texas, Notification of Proposed Production Activity, Gulf Coast Growth Ventures LLC (Ethylene, Polyethylene, Monoethylene Glycol and Related Co-Products), San Patricio County, Texas

Gulf Coast Growth Ventures LLC submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in San Patricio County, Texas, within Subzone 122W. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on November 12, 2021.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material/component described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.* The proposed material/component would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed foreign-status material/component is metallocene catalyst, duty-free. The request indicates that metallocene catalyst is subject to duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is December 29, 2021.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Diane Finver at *Diane.Finver@trade.gov.*

Dated: November 15, 2021.

Steel Propane Cylinders From the People's Republic of China: Notice of Initiation and Preliminary Results of Antidumping Duty Changed Circumstance Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is initiating a changed circumstances review of the antidumping duty (AD) order on steel propane cylinders from the People's Republic of China (China). Further, Commerce preliminarily determines that Yi Jun Hong Kong Limited (Yi Jun) is the successor-in-interest to Hong Kong GSBF Company Limited (GSBF) and should be assigned the same AD cash deposit rates for purposes of determining AD liability. Interested parties are invited to comment on these preliminary results.

DATES: Effective November 19, 2021.

FOR FURTHER INFORMATION CONTACT: Katherine Sliney, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2437.

SUPPLEMENTARY INFORMATION:

Background

On August 15, 2019, Commerce published in the **Federal Register** the AD order on steel propane cylinders from China.[1] On September 30, 2021, Commerce received a request on behalf of Yi Jun for an expedited changed circumstances review, pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.216(b), to establish Yi Jun as the successor-in-interest to GSBF, a Hong Kong trading company and exporter of steel propane cylinders from China produced by GSBF's affiliated producer, GSBF Tank, and thus, entitled to the AD cash deposit rate of GSBF.[2] We did not receive comments from other interested parties concerning this request.

Scope of the Order

The merchandise covered by the *Order* is steel cylinders for compressed or liquefied propane or other gases (steel propane cylinders) meeting the requirements of, or produced to meet the requirements of, U.S. Department of Transportation (USDOT) Specifications 4B, 4BA, or 4BW, or Transport Canada Specification 4BM, 4BAM, or 4BWM, or United Nations pressure receptacle standard ISO 4706 and otherwise meeting the description provided below. The scope includes steel propane cylinders regardless of whether they have been certified to these specifications before importation. Steel propane cylinders range from 2.5 pound nominal gas capacity (approximate 6 pound water capacity and approximate

[1] *See Steel Propane Cylinders from the People's Republic of China and Thailand: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Orders,* 84 FR 41703 (August 15, 2019) (*Order*).

[2] *See* Yi Jun's Letter, ''Steel Propane Cylinders from the People's Republic of China—Yi Jun/GSBF Changed Circumstances Review,'' dated September 30, 2021 (CCR Request).

4–6 pound tare weight) to 42 pound nominal gas capacity (approximate 100 pound water capacity and approximate 28–32 pound tare weight). Steel propane cylinders have two or fewer ports and may be imported assembled or unassembled (*i.e.,* welded or brazed before or after importation), with or without all components (including collars, valves, gauges, tanks, foot rings, and overfill prevention devices), and coated or uncoated. Also included within the scope are drawn cylinder halves, unfinished propane cylinders, collars, and foot rings for steel propane cylinders.

An ''unfinished'' or ''unassembled'' propane cylinder includes drawn cylinder halves that have not been welded into a cylinder, cylinders that have not had flanges welded into the port hole(s), cylinders that are otherwise complete but have not had collars or foot rings welded to them, otherwise complete cylinders without a valve assembly attached, and cylinders that are otherwise complete except for testing, certification, and/or marking.

The *Order* also covers steel propane cylinders that meet, are produced to meet, or are certified as meeting, other U.S. or Canadian government, international, or industry standards (including, for example, American Society of Mechanical Engineers (ASME), or American National Standard Institute (ANSI)), if they also meet, are produced to meet, or are certified as meeting USDOT Specification 4B, 4BA, or 4BW, or Transport Canada Specification 4BM, 4BAM, or 4BWM, or a United Nations pressure receptacle standard ISO 4706.

Subject merchandise also includes steel propane cylinders that have been further processed in a third country, including but not limited to, attachment of collars, foot rings, or handles by welding or brazing, heat treatment, painting, testing, certification, or any other processing that would not otherwise remove the merchandise from the scope of the *Order* if performed in the country of manufacture of the in-scope steel propane cylinders.

Specifically excluded are seamless steel propane cylinders and propane cylinders made from stainless steel (*i.e.,* steel containing at least 10.5 percent chromium by weight and less than 1.2 percent carbon by weight), aluminum, or composite fiber material. Composite fiber material is material consisting of the mechanical combination of two components: Fiber (typically glass, carbon, or aramid (synthetic polymer)) and a matrix material (typically polymer resin, ceramic, or metallic).

The merchandise subject to the *Order* is properly classified under statistical reporting numbers 7311.00.0060 and 7311.00.0090 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS statistical reporting numbers are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Initiation and Preliminary Results

Pursuant to section 751(b)(1) of the Act, Commerce will conduct a changed circumstances review upon receipt of information concerning, or a request from, an interested party for a review of an AD order which shows changed circumstances sufficient to warrant a review of the order. In the past, Commerce has used changed circumstances reviews to address the applicability of cash deposit rates after there have been changes in the name or structure of a respondent, such as a merger or spinoff ('successor-in-interest' or 'successorship' determinations).[3] Based on a review of the request from Yi Jun, and in accordance with section 751(b) of the Act and 19 CFR 351.216(d) and (e), we find that the information submitted in the CCR Request supporting Yi Jun's claim that it should be treated as the successor-in-interest to GSBF is sufficient to warrant such a review to determine whether Yi Jun is entitled to GSBF's AD cash deposit rate.

Section 351.221(c)(3)(ii) of Commerce's regulations permits Commerce to combine the notice of initiation of a changed circumstances review and the notice of preliminary results if Commerce concludes that expedited action is warranted.[4] In this instance, because the record contains information necessary to make a preliminary finding, we find that expedited action is warranted and have combined the notice of initiation and the notice of preliminary results.[5]

Accordingly, pursuant to section 751(b) of the Act, we have conducted a successor-in-interest analysis in response to Yi Jun's request. In making a successor-in-interest determination, Commerce examines several factors, including, but not limited to, changes in the following: (1) Management; (2) production facilities; (3) supplier relationships; and (4) customer base.[6] While no single factor or combination of factors will necessarily provide a dispositive indication of a successor-in-interest relationship, generally, Commerce will consider the new company to be the successor to the previous company if the new company's resulting operation is not materially dissimilar to that of its predecessor.[7] Thus, if the evidence demonstrates that, with respect to the production and sales of the subject merchandise, the new company operates as essentially the same business entity as the former company, Commerce will accord the new company the same antidumping treatment as its predecessor.[8]

We preliminarily determine that Yi Jun supplied sufficient evidence to determine that Yi Jun is the successor-in-interest to GSBF. Specifically, Yi Jun provided documentation demonstrating approval of GSBF's name change by GSBF's shareholders[9] (which remained unchanged from the underlying investigation, as well as the shareholders of its affiliated supplier, GSBF Tank), noting that GSBF's shareholders decided to change the company name and start building their own brand. GSBF's shareholders approved of the name change in January 2020, but Yi Jun continued to do business as GSBF until its corporate bank account was changed to reflect the new name in September 2021.[10] Yi Jun asserts that the change in company name was cosmetic only, was made with the sole purpose of developing a distinct brand, and had no impact on the internal or external operation and

[9] *See* CCR Request at Exhibit 1.

[10] *See* CCR Request at 4–5.

structure of the company.[11] As support, Yi Jun provides the name change certificate issued by the Hong Kong Registrar of Companies [12] and GSBF's business license before and after the change to Yi Jun which reflect a ''replacement'' business registration, which substantiates that there was no change in address or the material details of the registration.[13] Yi Jun also provided updated articles of association that reflect the name change, but are otherwise unchanged from the prior articles.[14] The lack of changes to the articles supports the claim that Yi Jun's operations with respect to the sales of subject merchandise have not materially changed as a result of its name change.

In addition, the record includes a list of company officials before and after the name change, supporting Yi Jun's assertion that the managing staff remained the same.[15] Further, Yi Jun notes that the subject merchandise sold to the U.S. by both GSBF and Yi Jun were all sourced from GSBF Tank, and that neither GSBF nor Yi Jun manufactures steel propane cylinders (*i.e.,* the company has been and will continue to only serve as an exporter).[16] Moreover, Yi Jun provided lists of both its suppliers and U.S. customers, before and after the name change to support its assertion that there have been no material changes to GSBF's suppliers [17] or its customer base following the name change. Yi Jun notes it has only added one U.S. customer through the normal course of business.[18]

Therefore, based on the aforementioned evidence on the record, we preliminarily determine that Yi Jun is the successor-in-interest to GSBF, as the change in the business' name was not accompanied by significant changes to its management and operations, supplier relationships, or customer base.[19] Thus, we preliminarily determine that Yi Jun operates as essentially the same business entity as GSBF, that Yi Jun is the successor-in-interest to GSBF, and that Yi Jun should receive the same AD cash deposit rate with respect to subject merchandise as its predecessor, GSBF.

Should our final results remain unchanged from these preliminary results, we will instruct U.S. Customs and Border Protection to assign entries of subject merchandise exported by Yi Jun the AD cash deposit rate applicable to GSBF. Commerce will issue its final results of the reviews in accordance with the time limits set forth in 19 CFR 351.216(e).

Public Comment

Pursuant to 19 CFR 351.310(c), any interested party may request a hearing within 14 days of publication of this notice.[20] In accordance with 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs not later than 14 days after the date of publication of this notice.[21] Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than seven days after the case briefs, in accordance with 19 CFR 351.309(d). Parties who submit case or rebuttal briefs are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[22] All comments are to be filed electronically using ACCESS, available to registered users at *https://access.trade.gov,* and must also be served on interested parties. An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the day it is due.[23] Note that Commerce has temporarily modified certain requirements for serving documents containing business proprietary information, until further notice.[24]

Consistent with 19 CFR 351.216(e), we will issue the final results of this changed circumstances review no later than 270 days after the date on which this review was initiated, or within 45 days if all parties agree to our preliminary finding.

Notification to Interested Parties

This notice is published in accordance with sections 751(b)(1) and 777(i) of the Act and 19 CFR 351.216(b), 351.221(b) and 351.221(c)(3).

Dated: November 15, 2021.

Ryan Majerus,

Deputy Assistant Secretaryfor Policy and Negotiations,Performing the Non-Exclusive Functions and Duties of theAssistant Secretary for Enforcement and Compliance.

[FR Doc. 2021–25280 Filed 11–18–21; 8:45 am]

BILLING CODE 3510–DS–P

[11] *Id.*

[12] *Id.* at Exhibit 2.

[13] *Id.* at Exhibit 3 and 4.

[14] *Id.* at Exhibit 5.

[15] *Id.* at Exhibit 6.

[16] *Id.* at 3.

[17] Yi Jun clarified that sales of subject merchandise between GSBF Tank and GSBF which were subsequently exported to the United States by GSBF during the underlying investigation were made through an unaffiliated Chinese trading company, and that though this trading company was listed as a supplier of GSBF, this was merely a paper transaction. However, GSBF Tank has since discontinued this relationship, and GSBF Tank now sells directly to GSBF/Yi Jun and no longer utilizes the unaffiliated trading company. *Id.* at 6–7.

[18] *Id.* at Exhibit 7 and 8.

[19] Yi Jun did not provide evidence concerning changes to production facilities, as neither the prior company GSBF, nor Yi Jun produces steel propane cylinders. As noted above, the company acts only as an exporter of the subject merchandise.

Certain Hot-Rolled Steel Flat Products From Japan: Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments; 2019–2020

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that Nippon Steel Corporation (NSC), producer and exporter of hot-rolled steel flat products (hot-rolled steel) from Japan, sold subject merchandise in the United States at prices below normal value during the period of review (POR) October 1, 2019, through September 30, 2020. In addition, Commerce preliminarily determines that Honda Trading Canada, Inc. (Honda) and Mitsui & CO., Ltd. (Mitsui) had no shipments during the POR. We invite interested parties to comment on these preliminary results.

DATES: Applicable November 19, 2021.

FOR FURTHER INFORMATION CONTACT: Jack Zhao, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1396.

SUPPLEMENTARY INFORMATION:

Background

Commerce is conducting an administrative review of the antidumping duty order on hot-rolled steel from Japan in accordance with section 751(a)(1)(B) of Tariff Act of 1930, as amended (the Act).[1] Commerce initiated this administrative review on

[1] *See Certain Hot-Rolled Steel Flat Products from Australia, Brazil, Japan, the Republic of Korea, the Netherlands, the Republic of Turkey, and the United Kingdom: Amended Final Affirmative Antidumping Determinations for Australia, the Republic of Korea, and the Republic of Turkey and Antidumping Duty Orders,* 81 FR 67962 (October 3, 2016) (*Order*).

December 8, 2020 covering twenty-nine producers and/or exporters.[2] We selected NSC as mandatory respondent.[3] On June 28, 2021, we extended the deadline for the preliminary results of this review by an additional 118 days, in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2), resulting in a deadline of October 29, 2021, for these preliminary results.[4] For a detailed description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[5]

Scope of the Order

The merchandise covered by the *Order* is hot-rolled steel from Japan. For a complete description of the scope of the *Order*, *see* the Preliminary Decision Memorandum.[6]

Methodology

Commerce is conducting this administrative review in accordance with section 751(a) of the Act. Constructed export price and export price were calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. A list of topics discussed in the Preliminary Decision Memorandum is attached as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). Access to ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Preliminary Determination of No Shipments

Among the companies under review, Honda and Mitsui each properly filed a statement reporting that it had made no shipments of subject merchandise to the United States during the POR.[7] Commerce issued an instruction to the U.S. Customs and Border Protection (CBP) asking for any entry activity regarding Honda and Mitsui.[8] CBP subsequently confirmed that these two companies had no shipments.[9] Based on the certifications submitted by Honda and Mitsui, and our analysis of CBP information currently on the record, we preliminarily determine that Honda and Mitsui had no shipments during the POR. Consistent with its practice, Commerce finds that it is not appropriate to preliminarily rescind the review with respect to Honda and Mitsui, but rather to complete the review and issue appropriate instructions to CBP based on the final results of this review.

Rate for Non-Examined Companies

The statute and Commerce's regulations do not address the establishment of a rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation, for guidance when calculating the rate for companies which were not selected for individual examination in an administrative review. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely {on the basis of facts available}.''

In this review, we have preliminarily calculated a weighted-average dumping margin for NSC that is not zero, *de minimis,* or determined entirely on the basis of facts available. Accordingly, Commerce preliminarily has assigned to companies not individually examined a margin of 26.81 percent, which is NSC's calculated weighted-average dumping margin.

Preliminary Results

We preliminarily determine the following weighted-average dumping margins for the period October 1, 2019, through September 30, 2020:

Exporter/producer	Weighted-average dumping margin (percent)
Nippon Steel Corporation/Nippon Steel Nisshin Co., Ltd./Nippon Steel Trading Corporation[10]	26.81
Non-Examined Companies	
Hanwa Co., Ltd	26.81
Higuchi Manufacturing America, LLC	26.81

[2] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 85 FR 78990 (December 8, 2020).

[3] *See* Memorandum ''Respondent Selection for the 2019–2020 Antidumping Duty Administrative Review of Certain Hot-Rolled Steel Flat Products from Japan,'' dated June 29, 2021.

[4] *See* Memorandum, ''Certain Hot-Rolled Steel Flat Products from Japan: Extension of Deadline for Preliminary Results of Antidumping Duty Administrative Review—2019–2020,'' dated June 28, 2021.

[5] *See* Memorandum, ''Decision Memorandum for the Preliminary Results of the Antidumping Duty Administrative Review and Preliminary Determination of No Shipments: Certain Hot-Rolled Steel Flat Products from Japan; 2019–2020,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[6] *Id.*

[7] *See* Honda's Letter, ''Administrative Review of Certain Hot-Rolled Steel Flat Products from Japan: Honda Trading Canada, Inc.'s No Shipment Certification,'' dated December 21, 2020; *see also* Mitsui's Letter, ''Antidumping Administrative Review of Certain Hot-Rolled Steel Flat Products from Japan: Mitsui No Shipment Notification,'' dated December 21, 2020.

[8] *See* No Shipment Inquiry to CBP, dated October 5, 2021.

[9] *See* Memoranda, ''Certain Hot-Rolled Steel Flat Products from Japan (A–588–874); No Shipment Inquiry for Honda Trading Canada, Inc. during the period 10/01/2019 through 09/30/2020,'' and ''Certain Hot-Rolled Steel Flat Products from Japan (A–588–874); No Shipment Inquiries for Mitsui & Co., Ltd. during the Period 10/01/2019 through 09/30/2020,'' both dated October 15, 2021.

[10] Commerce found in a changed circumstances review that NSC, Nippon Steel Nisshin Co., Ltd., and Nippon Steel Trading Corporation are affiliated companies that should be treated as a single entity and as the successor-in-interest to Nippon Steel & Sumitomo Metal Corporation, Nisshin Steel Co., Ltd., and Nippon Steel & Sumikin Bussan Corporation, respectively. *See Certain Hot-Rolled Steel Flat Products from Japan: Notice of Final Results of Antidumping Duty Changed Circumstances Review,* 84 FR 46713 (September 5, 2019). Because there is no information on the record of this administrative review that would lead us to revisit this determination, we are continuing to treat these companies as part of a single entity for the purposes of this administrative review.

[11] We collapsed JFE Shoji Trade Corporation with JFE Steel Corporation in the underlying investigation. *See Certain Hot-Rolled Steel Flat Products from Japan: Preliminary Determination of Sales at Less than Fair Value and Postponement of Final Determination,* 81 FR 15222 (March 22, 2016), and accompanying Preliminary Decision Memorandum at 8–9.

Exporter/producer	Weighted-average dumping margin (percent)
Higuchi Seisakusho Co., Ltd	26.81
Hitachi Metals, Ltd	26.81
JFE Steel Corporation/JFE Shoji Trade Corporation [11]	26.81

Shinsho Corporation	26.81
Sumitomo Corporation	26.81
Suzukaku Co., Ltd	26.81
Suzukaku Corporation	26.81
Tokyo Steel Manufacturing Co., Ltd	26.81
Toyota Tsusho Corporation Nagoya	26.81

Assessment Rates

Upon completion of the administrative review, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries. For any individually examined respondent whose weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.5 percent) in the final results of this review and the respondent reported reliable entered values, we will calculate importer-specific *ad valorem* assessment rates for the merchandise based on the ratio of the total amount of dumping calculated for the examined sales made during the POR to each importer and the total entered value of those same sales, in accordance with 19 CFR 351.212(b)(1). If the respondent has not reported reliable entered values, we will calculate a per-unit assessment rate for each importer by dividing the total amount of dumping calculated for the examined sales made to that importer by the total sales quantity associated with those transactions. Where an importer-specific *ad valorem* assessment rate is zero or *de minimis* in the final results of review, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties in accordance with 19 CFR 351.106(c)(2). If a respondent's weighted-average dumping margin is zero or *de minimis* in the final results of review, we will instruct CBP not to assess duties on any of its entries in accordance with the *Final Modification for Reviews, i.e.,* ''{w}here the weighted-average margin of dumping for the exporter is determined to be zero or *de minimis,* no antidumping duties will be assessed.'' [12]

For entries of subject merchandise during the POR produced by NSC for which the producer did not know its merchandise was destined for the United States, or for any respondent for which we have a final determination of no shipments, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company (or companies) involved in the transaction.[13]

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of the notice of final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for each specific company listed above will be that established in the final results of this review, except if the rate is less than 0.50 percent, and therefore *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) for previously investigated companies not participating in this review, the cash deposit will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, or the underlying investigation, but the manufacturer is, then the cash deposit rate will be the rate established for the most recent segment for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 5.58 percent, the all-others rate established in the less-than-fair-value investigation.[14] These deposit requirements, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

We intend to disclose the calculations performed for these preliminary results of review to interested parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs no later than 30 days after the date of publication of this notice. Rebuttal briefs, the content of which is limited to issues raised in the case briefs, may be filed no later than seven days after the date for filing case briefs.[15] Parties who submit case briefs

[12] *See Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings; Final Modification,* 77 FR 8101, 8102 (February 14, 2012) (*Final Modification for Reviews*).

[13] *See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties,* 68 FR 23954 (May 6, 2003).

[14] *See Order.*

[15] *See* 19 CFR 351.309(d).

or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[16] Case and rebuttal briefs should be filed using ACCESS [17] and must be served on interested parties.[18] Executive summaries should be limited to five pages total, including footnotes.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed via ACCESS. An electronically filed request must be received successfully in its entirety by 5:00 p.m. Eastern Time within 30 days of the date of publication of this notice.[19] Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues parties intend to discuss. If a request for a hearing is made, Commerce intends to hold the hearing at a date and time to be determined.[20] Parties should confirm the date, time, and location of the hearing two days before the scheduled date.

Commerce intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any case or rebuttal briefs, no later than 120 days after the date of publication of this notice, unless extended.[21]

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

[16] *See* 19 CFR 351.309(c)(2) and (d)(2).

[17] *See generally* 19 CFR 351.303.

[18] *See* 19 CFR 351.303(f).

[19] *See* 19 CFR 351.310(c).

[20] *See* 19 CFR 351.310(d).

[21] *See* section 751(a)(3)(A) of the Act; and 19 CFR 351.213(h).

Dated: October 29, 2021.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Intent To Conduct Scoping and To Prepare an Environmental Impact Statement for the Proposed Designation of a National Marine Sanctuary Within Papahānaumokuākea Marine National Monument

AGENCY: Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of Intent to prepare a draft environmental impact statement and hold public scoping meetings; request for comments.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA), in cooperation with the U.S. Fish and Wildlife Service (USFWS), the State of Hawai'i, and the Office of Hawaiian Affairs (OHA), is initiating the process to consider designating marine portions of Papahānaumokuākea Marine National Monument as a national marine sanctuary. Per the requirements of the National Environmental Policy Act (NEPA) and National Marine Sanctuaries Act (NMSA), NOAA will prepare a draft environmental impact statement (DEIS) for the sanctuary designation process to evaluate potential environmental effects of this action. NOAA will also coordinate its responsibility under the National Historic Preservation Act with the NEPA process. NOAA is initiating the public scoping process to invite comments on the scope and significance of issues to be addressed in the environmental impact statement that are related to designating this area as a national marine sanctuary. The results of this scoping process will assist NOAA in moving forward with the designation process, including preparation and release of draft designation documents, and formulating alternatives for the DEIS.

DATES: Comments must be received by NOAA on or before January 31, 2022. NOAA will host virtual public scoping meetings and will allow for comments in both English and Hawaiian ('Ōlelo Hawai'i) at the following dates and times:

- Wednesday, December 8, 2021, 6 p.m. HST
- Saturday, December 11, 2021, 12 p.m. HST
- Tuesday, December 14, 2021, 6 p.m. HST
- Thursday, December 16, 2021, 3 p.m. HST

ADDRESSES: You may submit comments on this notice by any of the following methods:

Federal e-Rulemaking Portal: Go to *https://www.regulations.gov* and enter ''NOAA–NOS–2021–0114'' in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Mail: Send any hard copy public comments by mail to: PMNM-Sanctuary Designation, NOAA/ONMS, 1845 Wasp Blvd., Bldg 176, Honolulu, HI 96818.

Public Scoping Meetings: Provide oral comments during virtual public scoping meetings, as described under **DATES**. Webinar registration details and additional information about how to participate in these public scoping meetings is available at *https://sanctuaries.noaa.gov/papahanaumokuakea/*.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (for example: name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter will be publicly accessible. NOAA will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Athline Clark, (808) 725–5800, *Athline.Clark@noaa.gov,* NOAA Superintendent Papahānaumokuākea Marine National Monument and

UNESCO World Heritage Site, address: 1845 Wasp Blvd., Bldg 176, Honolulu, Hawai'i 96818

SUPPLEMENTARY INFORMATION:

I. Papahānaumokuākea Marine National Monument

Papahānaumokuākea is considered a sacred area, from which Native Hawaiians believe all life springs, and to which spirits return to after death. The longest recorded traditional Hawaiian chant, the Kumulipo (source of deep darkness), is the history of how all life forms came and evolved from Papahānaumokuākea, beginning with the coral polyp—the building block for all life. This genealogy of Papahānaumokuākea tells the story of Native Hawaiians' ancestral connection with the gods who created those coral polyps, the Northwestern Hawaiian Islands or Kūpuna (respected elders) Islands, and everything else in the Hawaiian archipelago, including Native Hawaiians. Throughout the expanse of the Monument, there are many wahi pana (places of great cultural significance and practice) where Native Hawaiian cultural practitioners of today reconnect with their ancestors and gods.

Papahānaumokuākea Marine National Monument is one of the largest protected areas in the world. The original Papahānaumokuākea Marine National Monument and the Monument Expansion Area (collectively ''Papahānaumokuākea'' or ''Monument''), located around the Northwestern Hawaiian Islands, were established under the Antiquities Act through, respectively, Presidential Proclamation 8031 of June 15, 2006, as amended by Proclamation 8112 of February 28, 2007; and Proclamation 9478 of August 26, 2016. In 2006, the President established Papahānaumokuākea Marine National Monument to protect and preserve the marine area of the Northwestern Hawaiian Islands and certain lands as necessary for the care and management of the historic and scientific objects therein. The Federal land and interests in land reserved included approximately 139,793 square miles of emergent and submerged lands and waters of the Northwestern Hawaiian Islands. NOAA and USFWS promulgated implementing regulations for the original Papahānaumokuākea Marine National Monument on August 29, 2006 (71 FR 51134, 50 CFR part 404). These regulations codify the scope and purpose, boundary, definitions, prohibitions and regulated activities.

In 2016, Proclamation 9478 expanded the Monument into an adjacent area—the Monument Expansion Area—which includes the waters and submerged lands to the extent of the seaward limit of the United States Exclusive Economic Zone (U.S. EEZ) west of 163° West Longitude and covers an additional 442,781 square miles. Proclamation 9478 also directed the Secretary of Commerce to consider initiating the process to designate the Monument Expansion Area and the original Papahānaumokuākea Marine National Monument seaward of the Hawaiian Islands National Wildlife Refuge and Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial as a national marine sanctuary to supplement and complement existing authorities. The area has a long history of being considered for national marine sanctuary designation, beginning with Executive Order 13178 in 2000, followed by Proclamation 9478 in 2016. Recently, the Senate Committee on Appropriations directed NOAA to initiate the process to designate Papahānaumokuākea Marine National Monument as a National Marine Sanctuary.

The Monument is administered jointly by four Co-Trustees—the Department of Commerce, the Department of the Interior, the State of Hawai'i, and the Office of Hawaiian Affairs. The Monument Co-Trustees currently operate the Monument guided by a 2008 Monument Management Plan for Papahānaumokuākea and the Presidential Proclamations designating the Monument. The Monument Co-Trustees will update the Monument Management Plan at a later date and will provide opportunities for public input for a new plan. Any draft sanctuary management plan would augment the overarching Monument Management Plan.

II. Background on Sanctuary Designation Process

The NMSA authorizes the Secretary of Commerce to designate and protect as national marine sanctuaries areas of the marine environment that are of special national significance due to their conservation, recreational, ecological, historical, scientific, cultural, archeological, educational, or esthetic qualities. Day-to-day management of national marine sanctuaries has been delegated by the Secretary of Commerce to NOAA's Office of National Marine Sanctuaries. The primary objective of the NMSA is to protect the resources of the National Marine Sanctuary System, including biological and cultural resources, such as coral reefs, marine animals, archaeological sites, historic structures and historic shipwrecks.

III. Purpose and Need for National Marine Sanctuary Designation

The purpose of the designation is to fulfill the purposes and policies outlined in Section 301(b) of the NMSA, 16 U.S.C. 1431(b), including to identify and designate as national marine sanctuaries areas of the marine environment which are of special national significance, provide authority for comprehensive and coordinated conservation and management of these marine areas, and to protect the resources of these areas. Additionally, the purpose of the designation is to implement the provisions of Executive Order 13178 and Presidential Proclamation 9478 that direct NOAA to consider initiating the sanctuary designation process.

The need for designation is to:

- Develop objectives and actions that ensure lasting protections consistent with the existing Monument proclamations and regulations;
- safeguard natural and cultural values of the marine environment of the Monument;
- strengthen the existing interagency management regulations (50 CFR 404);
- authorize NOAA to assess civil penalties for violations of sanctuary regulations or permits and to enforce provisions of the NMSA;
- prohibit destruction or loss of sanctuary resources and provide natural resource damage assessment authorities for loss of or injury to any sanctuary resource;
- require interagency consultation for any Federal agency action that is likely to destroy, cause the loss of, or injure any sanctuary resource;
- enhance the joint permitting system for activities in the Monument Expansion Area;
- augment existing authorities under the Antiquities Act; Presidential Proclamations 8031, 8112 and 9478; Executive Order 13178; and 50 CFR 404 to provide additional regulatory and non-regulatory tools for management and protection of Monument resources.

IV. Preliminary Description of Proposed Action and Alternatives

NOAA's proposed action is to consider designating the marine portions of the Monument as a national marine sanctuary, following the designation process in section 304 of the NMSA (16 U.S.C. 1434). As part of the sanctuary designation process, NOAA will develop designation materials including a draft sanctuary management plan, proposed sanctuary regulations, and proposed terms of designation. Each national marine sanctuary has

management programs developed with public input and crafted to meet the specific issues and resources found in that sanctuary.

The NEPA process will include preparation of a DEIS to consider alternatives and to describe potential effects of the proposed sanctuary designation on the human environment. The DEIS will evaluate a reasonable range of action alternatives that could include different options for management goals or actions, sanctuary regulations, and potential boundaries. The DEIS will also consider a No Action Alternative, wherein NOAA would not designate the proposed sanctuary. Any proposed sanctuary regulations would be separate from, but supplementary and complementary to, existing Monument regulations and management provisions from the establishing executive order and proclamations.

The results of this public scoping process will assist NOAA in moving forward with the designation process, including preparation and release of draft documents, and formulating alternatives for the DEIS. Reasonable alternatives that are identified during the scoping period will be evaluated in the DEIS.

V. Summary of Expected Impacts of Sanctuary Designation

The DEIS will identify and describe the potential effects of the proposed action, and reasonable alternatives, on the human environment. Potential impacts may include, but are not limited to, impacts on the Monument's:

- Marine resources, including habitats, plants, birds, sea turtles, marine mammals, and special status species;
- cultural and historic resources, including Traditional Cultural Properties and archaeological sites; and
- human uses and socioeconomics, including research, recreation, education, cultural practices, and fishing.

Based on a preliminary evaluation of the resources listed above, NOAA expects potential impacts of continued or enhanced long-term protection of the Monument's natural, cultural and historic resources; improved planning and coordination of research, monitoring, and management actions; reducing disturbance of special status species; reducing threats and stressors to Monument resources; and minimal disturbance during research or restoration actions.

VI. Process for Sanctuary Designation and Environmental Review

NOAA will undertake a process for the designation of a national marine sanctuary, as outlined below.

1. Public Scoping Process—Information collection and characterization, including the consideration of public comments received during scoping, coordination under section 304(a)(5) with Western Pacific Regional Fishery Management Council on any necessary draft fishing regulations for the proposed sanctuary;

2. Preparation of Draft Documents—Preparation and release of draft sanctuary designation documents, including: a DEIS, prepared pursuant to NEPA, a draft sanctuary management plan, and a notice of proposed rulemaking to define proposed sanctuary boundaries and regulations. Draft documents would be used to support consultations with Federal, State, or local agencies, the Office of Hawaiian Affairs, Native Hawaiian organizations, and other interested parties, as appropriate;

3. Public Comment—Through public meetings and in writing, allow for public review and comment on the DEIS, draft sanctuary management plan, and notice of proposed rulemaking;

4. Preparation of Final Documents—Preparation and release of a final environmental impact statement (FEIS), final sanctuary management plan, and a final rule and sanctuary regulations, including a response to public comments.

5. The sanctuary designation and regulations would take effect after the end of a review period of forty-five days of a continuous session of Congress. During this same period, should the designation include State waters, the Governor of the State has the opportunity to concurrently review the terms of designation including boundaries within State waters.

NEPA Lead and Cooperating Agency Roles

NOAA will serve as the lead Federal agency for the NEPA process for the proposed action. The USFWS, State of Hawai'i and OHA shall serve as cooperating agencies in this process, through agreement with the lead agency. NOAA may invite other Federal, Tribal, or State and local government agencies to become cooperating agencies in the preparation of this EIS. NEPA regulations specify that a cooperating agency means any Federal agency (and a State, Tribal, or local agency with agreement of the lead agency) that has jurisdiction by law or special expertise with respect to any environmental impact involved in a proposal (or a reasonable alternative) (40 CFR 1508.1(e)).

Schedule for the Decision-Making Process

NOAA expects to make the DEIS and other draft sanctuary designation documents available to the public in approximately January 2023. NOAA expects to make the FEIS for sanctuary designation available to the public in Fall 2023. A Record of Decision and the final sanctuary management plan and final rule will be completed no sooner than 30 days after the FEIS is made available to the public, in accordance with 40 CFR 1506.11.

VII. Anticipated Permits, Authorizations, and Consultations

Federal, State, and local permits, authorizations or consultations may be required for the proposed action, including consultation under the Endangered Species Act, 16 U.S.C. 1531 *et seq.,* Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.,* National Historic Preservation Act, 54 U.S.C. 300101 *et seq.,* consistency review under the Coastal Zone Management Act, 16 U.S.C. 1451 *et seq.,* and possibly reviews under other laws and regulations determined to be applicable to the proposed action. To the fullest extent possible, NOAA will prepare the DEIS concurrently with and integrated with analyses required by other Federal environmental review requirements, and the DEIS will list all Federal permits, licenses, and other authorizations that must be obtained in implementing the proposed action, in accordance with 40 CFR 1502.24.

Consultation Under Section 106 of the National Historic Preservation Act

This notice confirms that NOAA will coordinate its responsibilities under section 106 of the National Historic Preservation Act (NHPA) during the sanctuary designation process and is soliciting public and stakeholder input to meet section 106 compliance requirements. The section 106 consultation process specifically applies to any Federal agency undertaking that may affect historic properties. Pursuant to 36 CFR 800.16(l)(1), historic properties include: ''any prehistoric or historic district, site, building, structure or object included in, or eligible for inclusion in, the National Register of Historic Places maintained by the Secretary of the Interior. The term includes artifacts, records, and remains that are related to and located within

such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization and that meet the National Register criteria.''

The NHPA requires that Federal decision makers consider historic properties during project planning. Section 106 of the NHPA requires agencies to take into account the effects of such undertakings they carry out, assist, fund, or permit on historic properties. NEPA mandates that Federal agencies assess a proposed Federal action's environmental impacts, including impacts on historic and cultural resources. As part of section 106 consultation, it is the agency's responsibility to provide consulting parties a reasonable opportunity to identify their concerns about historic properties, advise on the identification and evaluation of historic properties, including those of traditional religious and cultural importance, articulate their views on the undertaking's effects on such properties, and participate in the resolution of any adverse effects (if identified).

The following parties may have consultative roles in the section 106 process: State historic preservation officer, Native Hawaiian organizations, the Advisory Council on Historic Preservation, representatives of local government, and additional consulting parties. Certain individuals and organizations may also participate as consulting parties due to the nature of their legal or economic relation to the undertaking or affected properties, or their concern with the action's effects on historic properties. As part of this public scoping process, NOAA seeks public input on potential effects on historic properties in the area of potential effects (the entire Monument area). NOAA will invite consulting party participation via letters of invitation.

VIII. Public Scoping Process

With this notice, NOAA is initiating a public scoping process to gather input from individuals, organizations, Native Hawaiian Organizations, and Federal, State, and local agencies on the proposed sanctuary designation. NOAA intends to use this process to determine the scope and significant issues to be analyzed in depth in the DEIS, with consideration of the scoping factors and responsibilities provided in 40 CFR 1501.9. NOAA specifically request comments on the following topics, including the identification of potential alternatives, information, and analyses relevant to the proposed action:

- The proposed designation of marine waters of the Monument as a national marine sanctuary, including the spatial extent of the proposed sanctuary and boundary alternatives NOAA should consider;
- the location, nature, and value of resources that would be protected by a sanctuary;
- management measures for the sanctuary and any additional regulations that should be added under the NMSA authority to protect Monument resources;
- the potential socioeconomic, cultural, and biological impacts of sanctuary designation;
- information regarding historic properties in the entire Monument area and the potential effects to those historic properties to support National Historic Preservation Act compliance under section 106; and
- other information relevant to the designation and management of a national marine sanctuary.

Comments may be submitted to NOAA by *January 31, 2022* using the methods described above in **ADDRESSES**. NOAA will host public scoping meetings during the public comment period, as described above under **DATES**.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Recreational Angler Survey of Sea Turtle Interactions

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on August 19, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: Recreational Angler Survey of Sea Turtle Interactions.

OMB Control Number: 0648–0774.

Form Number(s): None.

Type of Request: Regular (extension of a current information collection).

Number of Respondents: 20,000.

Average Time per Response: 10 minutes for the Angler Intercept Survey, 5 minutes for the Sea Turtle Incidental Capture Form.

Total Annual Burden Hours: 1,153 hours.

Needs and Uses: NOAA's National Marine Fisheries Service (NOAA Fisheries) proposes to extend a current information collection designed to assess the extent of hook and line interactions between recreational anglers on piers and other shore-based fishing locations and sea turtles. The collection comprises an Angler Intercept Survey, a Fishing Site Characterization Form, a Survey Cover Sheet, and a Sea Turtle Incidental Capture Form. The Angler Intercept Survey will be verbally administered on piers and shore-based fishing locations within NOAA Fisheries Greater Atlantic Region and Southeast Region, and will be administered to approximately 20,000 individual recreational fishermen. The respondents will be verbally asked a series of questions about their fishing practices and observations of sea turtles and the interviewer will record their answers. The survey will also assess the feasibility of an intercept survey for this purpose in terms of response rates and data collection. The Fishing Site Characterization Form will be completed by the survey administrator at each fishing location and collects information on the structure and operation of the pier or shore-based fishing location. The Site Characterization Sheet will be completed by the survey administrator during each survey period and collects

information on the environmental conditions for that particular day, the number of anglers fishing, number of lines in the water, and the number of surveys completed. Sea Turtle Incidental Capture Form will be filled out by a Sea Turtle Stranding and Salvage Network participant when a turtle is incidentally captured, regardless of if the capture occurs during a specific survey period, and collects information on the specific interaction with fishing gear. This information is necessary to compare to the angler survey data, to identify if certain factors or fishing practices influence the rate of interactions. In this extension, minor revisions will be made to the Sea Turtle Incidental Capture Form to eliminate duplication with other sea turtle stranding data collection efforts.

Affected Public: Individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.

Legal Authority: Collection of these data on sea turtle interactions in the shore-based recreational fishing sector is necessary to fulfill statutory requirements of the Endangered Species Act (16 U.S.C. 1531 et. seq.).

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0774.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XB516]

Atlantic Highly Migratory Species; Atlantic Shark Management Measures; 2022 Research Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent; request for applications.

SUMMARY: NMFS announces its request for applications for the 2022 shark research fishery from commercial shark fishermen with directed or incidental shark limited access permits. The shark research fishery allows for the collection of fishery-dependent and biological data for future stock assessments and to meet the research objectives of the Agency. The only commercial vessels authorized to land sandbar sharks are those participating in the shark research fishery. Shark research fishery permittees may also land other large coastal sharks (LCS), small coastal sharks (SCS), smoothhound, and pelagic sharks. Commercial shark fishermen who are interested in participating in the shark research fishery need to submit a completed Shark Research Fishery Permit Application to be considered.

DATES: Shark Research Fishery Applications must be received no later than December 20, 2021.

ADDRESSES: Please submit completed applications via email to *NMFS.Research.Fishery@noaa.gov.*

For copies of the Shark Research Fishery Permit Application, please email a request to *NMFS.Research.Fishery@noaa.gov.* Copies of the Shark Research Fishery Application are also available at the HMS website at *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/atlantic-highly-migratory-species-exempted-fishing-permits.* Additionally, please be advised that your application may be released under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Karyl Brewster-Geisz, at (301) 427–8503 (phone) or Delisse Ortiz at (202) 930–1304 or email *NMFS.research.fishery@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Atlantic shark fisheries are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP), as amended, is implemented by regulations at 50 CFR part 635. Specifics regarding the commercial shark quotas and the shark research fishery can be found at §§ 635.27(b) and 635.32(f).

The shark research fishery was established, in part, to maintain time series data for stock assessments and to meet NMFS' research objectives. Since the shark research fishery was established in 2008, it has allowed for: The collection of fishery-dependent data for current and future stock assessments; the operation of cooperative research to meet NMFS' ongoing research objectives; the collection of updated life-history information used in the sandbar shark (and other species) stock assessment; the collection of data on habitat preferences that might help reduce fishery interactions through bycatch mitigation; evaluation of the utility of the mid-Atlantic closed area on the recovery of dusky sharks and collection of hook-timer and pop-up satellite archival tag information to determine at-vessel and post-release mortality of dusky sharks; and collection of sharks to determine the weight conversion factor from dressed weight to whole weight.

The shark research fishery allows selected commercial fishermen the opportunity to earn revenue from selling additional sharks, including sandbar sharks. Only the commercial shark fishermen selected to participate in the shark research fishery are authorized to land sandbar sharks subject to the sandbar quota available each year. The base quota for sandbar sharks is 90.7 metric tons (mt) dressed weight (dw) per year, although this number may be reduced in the event of overharvests. The selected shark research fishery permittees will also be allowed to land other LCS, SCS, smoothhound, and pelagic sharks consistent with any restrictions established on their shark research fishery permit. Generally, the shark research fishery permits are valid only for the calendar year for which they are issued.

One hundred percent observer coverage is required on shark research fishery trips. The specific 2022 trip limits and number of trips per month will depend on the availability of funding, number of selected vessels, the availability of observers, the available quota, and the objectives of the research fishery, and will be included in the permit terms at time of issuance. The number of participants in the research fishery changes each year. In 2021, four fishermen were chosen to participate. From 2008 through 2021, there has been

an average of six participants each year with the range from 4 to 11. The number of trips allowed per month can change, but in the last few years participating vessels on average have been able to take one trip per month. The number of trips taken per month are limited by the scientific and research needs of the Agency and the number of NMFS-approved observers available. Participants are also limited on the amount of gear they can deploy on a given set (*e.g.,* number of hooks and sets, soak times, length of longline). These limits may change both between years and during the year depending on research goals and bycatch limits.

In 2021, NMFS split 90 percent of the sandbar and LCS research fishery quotas equally among selected participants, with 20.4 mt dw (44,973 lb dw) of sandbar shark research fishery quota and 11.3 mt dw (24,911 lb dw) of other LCS research fishery quota available to each vessel. The remaining quota was held in reserve to ensure the overall sandbar and LCS research fishery quotas were not exceeded. It is likely NMFS will use this process again for the quota in 2022.

In 2021, NMFS continued to implement a regional dusky bycatch limit, which was first established in 2013, in the shark research fishery, applicable to four regions across the Gulf of Mexico and Atlantic. Under this limit, when four or more dusky sharks have been brought to the vessel dead in a region, shark research fishery permit holders in that region were prohibited from soaking their gear for longer than 3 hours. If, after the change in soak time, three additional dusky shark interactions (alive or dead) were observed, shark research fishery permit holders were prohibited from making a trip in that region for the remainder of the year, unless otherwise permitted by NMFS. Slightly different measures were established for shark research fishery participants in the mid-Atlantic shark closed area in order to allow NMFS observers to place satellite archival tags on dusky sharks and collect other scientific information on dusky sharks while also minimizing any dusky shark mortality.

Previously, shark research fishery permit holders were required to land any dead sharks, except for prohibited species. However, in 2021, shark research fishery permit holders were provided more flexibility and allowed to retain or discard any shark, regardless of condition. All prohibited species were required to be released, unless the observer requested that the shark be retained for research purposes. If the regional non-blacknose SCS, blacknose, and/or pelagic shark commercial management group quotas were closed, then any shark research fishery permit holder fishing in the region was required to discard all of the species from the closed management groups, regardless of condition. All other sharks, except prohibited species, caught and brought to the vessel could be released alive or landed. The vessels participating in the shark research fishery averaged 12 trips in 2021, but the timing, and number of the trips varied based on seasonal availability of certain species and quota available.

To participate in the shark research fishery, commercial shark fishermen need to submit a completed Shark Research Fishery Application by the deadline noted above (see **DATES**) showing that the vessel and owner(s) meet the specific criteria outlined below.

Research Objectives

Each year, the research objectives are developed by a shark board, which is comprised of representatives within NMFS, including representatives from the Southeast Fisheries Science Center (SEFSC) Panama City Laboratory, the Southeast Regional Office Protected Resources Division, and the HMS Management Division. The research objectives for 2022 are based on various documents, including the 2020 Biological Opinion of the Atlantic Shark Fisheries Except Pelagic Longline, as well as recent stock assessments for the U.S. South Atlantic blacknose, U.S. Gulf of Mexico blacknose, U.S. Gulf of Mexico blacktip, sandbar, and dusky sharks (all these stock assessments can be found at *http://sedarweb.org/*). The 2022 research objectives are:

- Collect reproductive, length, sex, and age data from sandbar and other sharks throughout the calendar year for species-specific stock assessments;
- Monitor the size distribution of sandbar sharks and other species captured in the fishery;
- Continue on-going tagging shark programs for identification of migration corridors and stock structure using dart and/or spaghetti tags;
- Maintain time-series of abundance from previously derived indices for the shark bottom longline observer program;
- Acquire fin-clip samples of all shark and other species for genetic analysis;
- Attach satellite archival tags to endangered smalltooth sawfish to provide information on critical habitat, preferred depth and post-release mortality, consistent with the requirements listed in the take permit issued under section 10 of the Endangered Species Act to the SEFSC Observer Program;
- Attach satellite archival tags to prohibited dusky and other sharks, as needed, to provide information on daily and seasonal movement patterns, and preferred depth;
- Evaluate hooking mortality and post-release survivorship of dusky, hammerhead, blacktip, and other sharks using hook-timers and temperature-depth recorders;
- Evaluate the effects of controlled gear experiments to determine the effects of potential hook changes to prohibited species interactions and fishery yields;
- Examine the size distribution of sandbar and other sharks captured throughout the fishery including in the Mid-Atlantic shark time/area closure off the coast of North Carolina from January 1 through July 31;
- Develop allometric and weight relationships of selected species of sharks (*e.g.,* hammerhead, sandbar, blacktip shark); and
- Collect samples such as liver and muscle plugs for stable isotope analysis as a part of a trophic level-based ecosystem study.

Selection Criteria

Shark Research Fishery Permit Applications will only be accepted from commercial shark fishermen who hold a current directed or incidental shark limited access permit. While incidental permit holders are welcome to submit an application, to ensure that an appropriate number of sharks are landed to meet the research objectives for this year, NMFS will give priority to directed permit holders as recommended by the shark board. As such, qualified incidental permit holders will be selected only if there are not enough qualified directed permit holders to meet research objectives.

The Shark Research Fishery Permit Application includes, but is not limited to, a request for the following information: Type of commercial shark permit possessed; past participation and availability in the commercial shark fishery (not including sharks caught for display); past involvement and compliance with HMS observer programs per 50 CFR 635.7; past compliance with HMS regulations at 50 CFR part 635; past and present availability to participate in the shark research fishery year-round; ability to fish in the regions and seasons requested; ability to attend necessary meetings regarding the objectives and research protocols of the shark research fishery; and ability to carry out the research objectives of the Agency.

Preference will be given to those applicants who are willing and available to fish year-round and who affirmatively state that they intend to do so, to ensure the timely and accurate data collection NMFS needs to meet this year's research objectives. An applicant who has been charged criminally or civilly (*e.g.,* issued a Notice of Violation and Assessment (NOVA) or Notice of Permit Sanction) for any HMS-related violation will not be considered for participation in the shark research fishery. In addition, applicants who were selected to carry an observer in the previous two years for any HMS fishery, but failed to contact NMFS to arrange the placement of an observer as required per § 635.7, will not be considered for participation in the 2022 shark research fishery. Applicants who were selected to carry an observer in the previous two years for any HMS fishery and failed to comply with all the observer regulations per § 635.7 will also not be considered. Exceptions will be made for vessels that were selected for HMS observer coverage but did not fish in the quarter when selected and thus did not require an observer. Applicants who do not possess a valid USCG safety inspection decal when the application is submitted will not be considered. Applicants who have been non-compliant with any of the HMS observer program regulations in the previous two years, as described above, may be eligible for future participation in shark research fishery activities by demonstrating two subsequent years of compliance with observer regulations at § 635.7.

Selection Process

The HMS Management Division will review all submitted applications and develop a list of qualified applicants from those applications that are deemed complete. A qualified applicant is an applicant that has submitted a complete application by the deadline (see **DATES**) and has met the selection criteria listed above. Qualified applicants are eligible to be selected to participate in the 2022 shark research fishery. The HMS Management Division will provide the list of qualified applicants without identifying information to the SEFSC. The SEFSC will then evaluate the list of qualified applicants and, based on the temporal and spatial needs of the research objectives, the availability of observers, the availability of qualified applicants, and the available quota for a given year, will randomly select qualified applicants to conduct the prescribed research. Where there are multiple qualified applicants that meet the criteria, permittees will be randomly selected through a lottery system. If a public meeting is deemed necessary, NMFS will announce details of a public selection meeting in a subsequent **Federal Register** notice.

Once the selection process is complete, NMFS will notify the selected applicants and issue the shark research fishery permits. The shark research fishery permits will be valid through December 31, 2022, unless otherwise specified. If needed, NMFS will communicate with the shark research fishery permit holders to arrange a captain's meeting to discuss the research objectives and protocols. NMFS usually holds mandatory captain's meetings before observers are placed on vessels and may hold one for the 2022 shark research fishery in early 2022. Once the fishery starts, the shark research fishery permit holders must contact NMFS or the NMFS-designee to arrange the placement of a NMFS-approved observer for each shark research trip. Selected applicants are required to allow observers the opportunity to perform their duties and assist observers as necessary.

A shark research fishery permit will only be valid for the vessel and owner(s) and terms and conditions listed on the permit, and, thus, cannot be transferred to another vessel or owner(s). Shark research fishery permit holders must carry a NMFS-approved observer on shark research fishery trips. Issuance of a shark research permit does not guarantee that the permit holder will be assigned a NMFS-approved observer on any particular trip. Rather, issuance indicates that a vessel may be issued a NMFS-approved observer for a particular trip, and on such trips, may be allowed to harvest Atlantic sharks, including sandbar sharks, in excess of the retention limits described in § 635.24(a). Applicable retention limits will be based on available quota, number of vessels participating in the 2022 shark research fishery, the research objectives set forth by the shark board, the extent of other restrictions placed on the vessel, and may vary by vessel and/or location. When not operating under the auspices of the shark research fishery, the vessel would still be able to land LCS, SCS, and pelagic sharks subject to existing retention limits on trips without a NMFS-approved observer.

NMFS annually invites commercial shark permit holders (directed and incidental) to submit an application to participate in the shark research fishery. Permit applications can be found on the HMS Management Division's website at *https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/atlantic-highly-migratory-species-permits-and-reporting-forms* or by calling (301) 427–8503. Final decisions on the issuance of a shark research fishery permit will depend on the submission of all required information by the deadline (see **DATES**), and NMFS' review of applicant information as outlined above. The 2022 shark research fishery will start after the opening of the shark fishery and under available quotas as published in a separate **Federal Register** final rule.

Dated: November 16, 2021.

Ngagne Jafnar Gueye,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Science Advisory Board

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for a meeting of the Science Advisory Board (SAB). The members will discuss issues outlined in the section on Matters to be considered.

DATES: The meeting is scheduled for December 7, 2021 from 1:00 p.m. to 5:00 p.m. Eastern Standard Time (EST) and December 8, 2021 from 1:00 p.m. to 5:00 p.m. Eastern Standard Time (EST). This time and the agenda topics described below are subject to change. For the latest agenda, please refer to the SAB website: *https://sab.noaa.gov/index.php/sab-meetings/.*

ADDRESSES: This is a virtual meeting. The webinar registration links for the December 7 and December 8, 2021 meeting may be found on the website at *http://sab.noaa.gov/SABMeetings.aspx.*

FOR FURTHER INFORMATION CONTACT: Dr. Cynthia Decker, Executive Director, SSMC3, Room 11230, 1315 East-West Hwy., Silver Spring, MD 20910; Phone Number: 301–734–1156; Email: *Cynthia.Decker@noaa.gov;* or visit the SAB website at *http://sab.noaa.gov/SABMeetings.aspx.*

SUPPLEMENTARY INFORMATION: The NOAA Science Advisory Board (SAB) was established by a Decision Memorandum dated September 25, 1997, and is the only Federal Advisory Committee with responsibility to advise the Under Secretary of Commerce for

Oceans and Atmosphere on strategies for research, education, and application of science to operations and information services. SAB activities and advice provide necessary input to ensure that National Oceanic and Atmospheric Administration (NOAA) science programs are of the highest quality and provide optimal support to resource management.

Status: The December 7, 2021 meeting will be open to public participation with a 15-minute public comment period at 4:45 p.m., EST. The SAB expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three minutes. Written comments for the December 7 and December 8, 2021 meeting should be received by the SAB Executive Director's Office by November 29, 2021 to provide sufficient time for SAB review. Written comments received by the SAB Executive Director after these dates will be distributed to the SAB, but may not be reviewed prior to the meeting date.

Special Accommodations: This meeting is physically accessible to people with disabilities. Requests for special accommodations may be directed to the Executive Director no later than 12 p.m. on November 29, 2021.

Matters To Be Considered: The meeting on December 7–8, 2021 will consider (1) NOAA Update; (2) NOAA Science Update; (3) NOAA Response to the SAB Environmental Information Services Working Group: Statement Concerning the Ongoing NWS Data Dissemination Challenges; (4) Priorities of Weather Research (PWR) Final Report; (5) Tsunami Science & Technology Advisory Panel Final Report; (6) NOAA Response to SAB Environmental Information Services Working Group Report: Recommendations to the NOAA Concerning the Hurricane Forecast Improvement Program; (7) Review of the Draft 2021 Report to the United States Congress from the Environmental Information Services Working Group (EISWG); (8) NOAA Response to SAB Climate Working Group Report (CWG): Precipitation Prediction Grand Challenge Strategic Plan Review. The full agenda will be published on the SAB website. Meeting materials, including work products, will be available on the SAB website: *http://sab.noaa.gov/SABMeetings.aspx.*

Eric Locklear,

Acting Chief Financial Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete product(s) that were on the Procurement List that were furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Comments must be received on or before:* December 19, 2021.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following product(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):
2520–01–398–4589—Parts Kit, Hydraulic Transmission, Utility Trucks
2590–00–299–0739—Valve, Poppet, Hull Drain
2520–01–211–6702—Parts Kit, Transmission Oil Filter
Designated Source of Supply: Goodwill Industries—Knoxville, Inc., Knoxville, TN
Contracting Activity: DLA LAND AND MARITIME, COLUMBUS, OH
NSN(s)—Product Name(s): 8465–00–656–0816—Bag, Laundry, Self-Closing, Ropeless
Designated Source of Supply: Ability Building Center, Inc., Rochester, MN
Contracting Activity: DLA TROOP SUPPORT, PHILADELPHIA, PA
NSN(s)—Product Name(s): 7520–01–484–5256—Pen, Ball Point, Retractable, Ergonomic, MD Ergo Grip, Blue Barrel, Blue Ink, Medium Point
Designated Source of Supply: Industries for the Blind and Visually Impaired, Inc., West Allis, WI
Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, NEW YORK, NY

Michael R. Jurkowski,

Acting Deputy Director, Business Operations.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds product(s) to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Date added to and deleted from the Procurement List:* December 19, 2021.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Michael R. Jurkowski, Telephone: (703) 785–6404, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Additions

On 2/12/2021, 3/12/2021, 3/19/2021, 4/30/2021, 5/7/2021, 5/21/2021, and 5/28/2021, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed additions to the Procurement List. This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the product(s) and service(s) and impact of the additions on the current or most recent contractors, the Committee has determined that the product(s) and service(s) listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the product(s) and service(s) to the Government.

2. The action will result in authorizing small entities to furnish the product(s) and service(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the product(s) and service(s) proposed for addition to the Procurement List.

End of Certification

Accordingly, the following product(s) are added to the Procurement List:

Product(s)

NSN(s)—Product Name(s):
MR 13087—Set, Cookie Sheet, 3 Piece
MR 10796—Dish Rack, Compact, Includes Shipper 20796
MR 11136—Tablecloth, 3 Pack
MR 10792—Twin Juicer, Includes Shipper 20792
MR 10794—Mini Garden Colander, Includes Shipper 20794
MR 10788—Super Sifter, Includes Shipper 20788
MR 16400—Sunglasses, Women's Fashion
MR 16401—Sunglasses, Women's Aviator
MR 16402—Sunglasses, Polarized Assorted
MR 16403—Sunglasses, Metal Assorted
MR 16404—Sunglasses, Sport Assorted
MR 10809—Onion Saver, Includes Shipper 20809
MR 10798—Headlamp, Includes Shipper 20798
Designated Source of Supply: Winston-Salem Industries for the Blind, Inc., Winston-Salem, NC
Contracting Activity: Defense Commissary Agency
Mandatory For: The requirements of military commissaries and exchanges in accordance with the 41 CFR 51–6.4
Distribution: C-List

NSN(s)—Product Name(s):
MR 1194—Cleaning Cloth, DuraFresh, 2 Pack
MR 863—Lint Roller
MR 864—Lint Roller Refill
Designated Source of Supply: Alphapointe, Kansas City, MO
Contracting Activity: Defense Commissary Agency
Mandatory For: The requirements of military commissaries and exchanges in accordance with the 41 CFR 51–6.4
Distribution: C-List

NSN(s)—Product Name(s):
MR 11480—Dust Remover, Compressed Gas, 10 oz
Designated Source of Supply: The Lighthouse for the Blind, St. Louis, MO
Contracting Activity: Defense Commissary Agency
Mandatory For: The requirements of military commissaries and exchanges in accordance with the 41 CFR 51–6.4
Distribution: C-List

Michael R. Jurkowski,

Acting Director, Business Operations.

BILLING CODE 6353–01–P

DEPARTMENT OF DEFENSE

Department of the Navy

Meeting of the U.S. Naval Academy Board of Visitors

AGENCY: Department of the Navy, U.S. Department of Defense (DoD).

ACTION: Notice of partially closed meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the U.S. Naval Academy Board of Visitors, hereafter ''Board,'' will take place.

DATES: Open to the public, December 6, 2021, from 9 a.m. to 11 a.m. Closed to the public, December 6, 2021, from 11 a.m. to noon (12 p.m.).

ADDRESSES: This meeting will be held at the United States Naval Academy in Annapolis, Maryland. Pending prevailing health directives, the meeting will be handicap accessible. Escort is required.

FOR FURTHER INFORMATION CONTACT: Major Raphael Thalakottur, USMC, Executive Secretary to the Board of Visitors, Office of the Superintendent, U.S. Naval Academy, Annapolis, MD 21402–5000, 410–293–1503, *thalakot@usna.edu,* or visit *https://www.usna.edu/PAO/Superintendent/bov.php.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), the General Services Administration's (GSA) Federal Advisory Committee Management Final Rule (41 CFR part 102–3).

Purpose of Meeting: The U.S. Naval Academy Board of Visitors will meet to make such inquiry, as the Board deems necessary, into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the Naval Academy.

Agenda: Proposed meeting agenda for December 6, 2021.

0830–0900 Members Assemble
0900 Call to Order (Open to Public)
0900–1055 Business Session (Open to Public)
1055–1100 Break (Open to Public)
1100–1200 Executive Session (Closed to Public)

Current details on the board of visitors may be found at *https://www.usna.edu/PAO/Superintendent/bov.php.*

The executive session of the meeting from 11:00 a.m. to 12:00 p.m. on December 6, 2021, will consist of discussions of new and pending administrative or minor disciplinary infractions and non-judicial punishments involving midshipmen attending the Naval Academy to include but not limited to, individual honor or conduct violations within the Brigade, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. For this reason, the executive session of this meeting will be closed to the public, as the discussion of such information cannot be adequately segregated from other topics, which precludes opening the executive session of this meeting to the public. Accordingly, the Secretary of the Navy, in consultation with the Department of the Navy General Counsel, has determined in writing that the meeting shall be partially closed to the public because the discussions during the executive session from 11 a.m. to noon (12 p.m.) will be concerned with matters protected under sections 552b(c) (5), (6), and (7) of title 5, United States Code (U.S.C.).

Authority: 5 U.S.C. 552b.

Meeting Accessibility: Pursuant to FACA and 41 CFR 102–3.140, this meeting is open to the public. Any public attendance at the meeting will be governed by prevailing health directives at the United States Naval Academy. Please contact the Executive Secretary five business days prior the meeting to coordinate access to the meeting.

Written Statements: Per Section 10(a)(3) of the FACA and 41 CFR 102–3.105(j) and 102–3.140, interested persons may submit a written statement for consideration at any time, but should be received by the Designated Federal Officer at least 15 business days prior to the meeting date so that the comments may be made available to the Board for their consideration prior to the meeting. Written statements should be submitted via mail to Board of

Visitors, 121 Blake Rd., Annapolis, MD 21402. Please note that since the Board operates under the provisions of the FACA, as amended, all submitted comments and public presentations will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the board website. If, and only if, prevailing medical directives require the employment of a virtual meeting, the virtual meeting will be broadcasted live from the United States Naval Academy. The broadcast will be close captioned for the duration of the public portion of the meeting. The link to view the meeting will be posted at *https://www.usna.edu/PAO/Superintendent/bov.php* forty-eight hours prior to the meeting. A virtual event will preclude accommodation of the public to attend the meeting in person.

Dated: November 15, 2021.

J.M. Pike,

Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Rural Postsecondary and Economic Development Grant Program; Corrections

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Notice; corrections.

SUMMARY: On November 5, 2021, the Department of Education (Department) published in the **Federal Register** a notice inviting applications (NIA) for new awards for fiscal year (FY) 2021 for the Rural Postsecondary and Economic Development (RPED) Grant Program, Assistance Listing Number 84.116W. We are amending the NIA to include as eligible applicants public and private non-profit organizations and agencies that partner with institutions of higher education (IHEs) and to make associated changes to performance measure 2. In addition, we are extending the deadline for transmittal of applications until December 13, 2021.

DATES: *Deadline for Transmittal of Applications:* December 13, 2021.

FOR FURTHER INFORMATION CONTACT: Kurrinn Abrams, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202–4260. Telephone: (202) 453–7906. Email: *kurrinn.abrams2@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: On November 5, 2021, we published in the **Federal Register** the NIA for the FY 2021 RPED Grant Program (86 FR 61193). The application deadline in the NIA was December 6, 2021. We are amending the NIA to include as eligible applicants public and private non-profit organizations and agencies that partner with IHEs and to make corresponding changes to performance measure 2. In addition, we are extending the deadline for transmittal of applications until December 13, 2021. All other requirements and conditions stated in the NIA remain the same.

Corrections

In FR Document 2021–24361 appearing on page 61193 of the **Federal Register** of November 5, 2021, we make the following amendments:

1. On page 61193, in the second column, under the **DATES** caption and following the heading ''Deadline for Transmittal of Applications'', remove ''December 6, 2021'' and add in its place ''December 13, 2021''.

2. On page 61195, in the second column, in the ''Eligiblity Information'' section, at the end of the paragraph following the heading ''Eligible Applicants'', add '', and public and private non-profit organizations and agencies that partner with such IHEs''.

3. On page 61197, in the third column, in the second line of the second paragraph, add ''and/or partner'' after ''grantee''.

Program Authority: 20 U.S.C. 1138–1138d; Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriations Act, 2021, H.R. 7614, 116th Congress (2020); the explanatory statement accompanying H.R. 133 (Pub. L. 116–260).

Accessible Format: On request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document, the NIA, and a copy of the application in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Michele Asha Cooper,

Deputy Assistant Secretary for Higher Education Programs, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Postsecondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2021–SCC–0131]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) Kindergarten and First-Grade Field Test Data Collection, National Sampling, and National Recruitment

AGENCY: Institute of Educational Science (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before December 20, 2021.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection request by selecting ''Department of Education'' under ''Currently Under Review,'' then check ''Only Show ICR for Public Comment'' checkbox. Comments may also be sent to *ICDocketmgr@ed.gov.*

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) Kindergarten and First-Grade Field Test Data Collection, National Sampling, and National Recruitment.

OMB Control Number: 1850–0750.

Type of Review: A revision of a currently approved collection.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 20,895.

Total Estimated Number of Annual Burden Hours: 15,599.

Abstract: The Early Childhood Longitudinal Study (ECLS) program, conducted by the National Center for Education Statistics (NCES) within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), draws together information from multiple sources to provide rich, descriptive data on child development, early learning, and school progress. The ECLS program studies deliver national data on children's status at birth and at various points thereafter; children's transitions to non-parental care, early care and education programs, and school; and children's experiences and growth through the elementary grades. The Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) is the fourth cohort in the series of early childhood longitudinal studies that began with the Early Childhood Longitudinal Study, Kindergarten Class of 1998–99 (ECLS–K) and continued with the Early Childhood Longitudinal Study, Birth Cohort (ECLS–B), and the Early Childhood Longitudinal Study, Kindergarten Class of 2010–11 (ECLS–K:2011).

In preparation for the ECLS–K:2024 data collections, several OMB packages have been cleared or have been planned for submission. Prior to the field test collection of data from parents of preschool-aged children, in-person focus groups with parents of preschoolers and usability testing of the preschool parent survey instruments were conducted in 2019 (OMB 1850–0803 v.246 and OMB 1850–0803 v.253, respectively). The field test with preschool parents was conducted in the spring of 2020 (OMB 1850–0750 v.19). In order to test recruitment messages and materials for the field test and national data collections, online focus groups with school administrators, teachers, and parents were conducted in fall 2019 and spring 2020 (OMB 1850–0803 v.255 & v.264). Additionally, usability testing of the kindergarten and first-grade field test instruments was conducted in early 2021 (OMB 1850–0803 v.280).

This current request is to conduct a field test of the ECLS–K:2024 kindergarten and first-grade data collection activities to evaluate the design of the national study's kindergarten and first-grade surveys and child assessments, as well as the operational procedures (that is, sampling and recruitment) for the national kindergarten and first-grade data collections in the fall 2023, spring 2024, and spring 2025. This data collection to evaluate the kindergarten and first-grade instruments and procedures is referred to throughout the remainder of this package as the K–1 field test. District and school sampling and recruitment activities for the K–1 field test will occur in spring 2022, while student sampling will occur in August and September 2022. From September through November 2022, trained study field staff will visit the participating schools to conduct in-person, one-on-one child assessments. Parents, teachers, and school administrators will also be asked to complete web surveys. As testing and development continues, it is anticipated that changes to the surveys, website language, and respondent materials will be necessary; a change request describing these changes will be submitted in spring 2022 prior to the K–1 field test data collection. Furthermore, this package also includes a request to conduct national district and school sampling and recruitment from fall 2022 to spring 2023. These recruitment activities will closely mimic what will be done in the K–1 field test but will occur over a much longer period of time.

Dated: November 16, 2021.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2021–SCC–0163]

Agency Information Collection Activities; Comment Request; Grantee Reporting Form—Rehabilitation Services Administration (RSA) Annual Payback Report

AGENCY: Office of Special Education and Rehabilitation Services (OSERS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension without change of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before January 18, 2022.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2021–SCC–0163. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be

addressed to the PRA Coordinator of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208C, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Karen Holliday, 202–245–7318.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Grantee Reporting Form—Rehabilitation Services Administration (RSA) Annual Payback Report.

OMB Control Number: 1820–0617.

Type of Review: An extension without change of a currently approved collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Individuals and Households; Private Sector.

Total Estimated Number of Annual Responses: 11,790.

Total Estimated Number of Annual Burden Hours: 4,858.

Abstract: Public Law 114–95, section 302(b) of the Rehabilitation Act of 1973, as amended by the Workforce Innovation and Opportunity Act (WIOA), the Rehabilitation Services Administration (RSA) provides Long-Term Training grants to academic institutions to support scholarship assistance to students. Students who receive scholarships under this program are required to work within the public rehabilitation program, such as with a state vocational rehabilitation agency, or an agency or organization that has a service arrangement with a state vocational rehabilitation agency. The student is expected to work two years in such settings for every year of full-time scholarship support. The program regulations at 34 CFR 386.33–386.35 and 386.40–386.43 detail the payback provisions and the RSA scholars' requirements to comply with them.

Section 302(b)(2)(C) of the Act requires tracking of scholars' employment status and location of former scholars supported under the grants in order to ensure that students are meeting the payback requirement. Scholars must provide requested information necessary to meet the exit certification requirements.

In addition to meeting the requirement that all scholars be tracked, the information collected will provide performance data relevant to the rehabilitation fields and degrees pursued by RSA scholars, as well as the funds owed and the rehabilitation work completed by them. These data are used to assess program effectiveness and efficiency, and to meet the reporting requirements of Public Law 103–62 section 4 of the Government Performance and Results Act (GPRA).

RSA is requesting an extension of the currently approved collection for grantees (Institutions of Higher Education), scholars, and employers to submit data electronically through the online RSA Payback Information Management System (PIMS). There is no substantial change in the proposed data collected, nor estimated burden required to report data using the PIMS system.

Dated: November 16, 2021.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

FOR FURTHER INFORMATION CONTACT: For specific questions related to the collection activities, please contact Rosa Olmeda at *Rosa.Olmeda@ed.gov* or (202) 245–7264.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection

necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Mandatory Civil Rights Data Collection.

OMB Control Number: 1870–0504.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, or Tribal Governments.

Total Estimated Number of Annual Responses: 17,884.

Total Estimated Number of Annual Burden Hours: 2,165,918.

Abstract: The collection, use, and reporting of education data is an integral component of the mission of the U.S. Department of Education (ED). ED has collected civil rights data about the nation's public schools via the Civil Rights Data Collection (CRDC) since 1968. For school years 2009–10 and 2011–12, the Office of Management and Budget (OMB) approved the CRDC part of the EDFacts information collection (1875–0240). EDFacts, an ED initiative to put performance data at the center of ED's policy, management, and budget decision-making processes for all preschool-grade 12 education programs, has transformed the way in which ED collects and uses data. For school years 2013–14, 2015–16, 2017–18, and 2020–21, the Office for Civil Rights (OCR) cleared the CRDC as a separate collection from EDFacts while maintaining its transformative data collection policies and practices. As with previous CRDC collections, the purpose of the 2021–22 CRDC is to obtain vital data related to the civil rights laws' requirement that public local educational agencies (LEAs) and elementary and secondary schools provide equal educational opportunity. ED has analyzed the uses of many data elements collected in the 2015–16 and 2017–18 CRDCs and sought advice from experts across ED to refine, improve, and where appropriate, add or remove data elements from the collection. ED also made the CRDC data definitions and metrics consistent with other mandatory collections across ED wherever possible. ED seeks OMB approval under the Paperwork Reduction Act to collect from LEAs the elementary and secondary education data described in the sections of Attachment A. In addition to reviewing and commenting on the proposed changes (detailed in Supporting Statement A and Attachments A–1, A–2, A–3, and A–4), ED requests that LEAs and other stakeholders respond to the directed questions found in Attachment A–5.

Dated: November 16, 2021.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of the Chief Data Officer, Office of Planning, Evaluation and Policy Development.

[FR Doc. 2021–25246 Filed 11–18–21; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[OE Docket No. EA–243–D]

Application To Export Electric Energy; Tenaska Power Services Co.

AGENCY: Office of Electricity, Department of Energy.

ACTION: Notice of application.

SUMMARY: Tenaska Power Services Co. (Applicant or TPS) has applied for authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before December 20, 2021.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov,* or by facsimile to (202) 586–8008.

FOR FURTHER INFORMATION CONTACT: Matt Aronoff, 202–586–5863, *matthew.aronoff@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) regulates exports of electricity from the United States to a foreign country, pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 42 U.S.C. 7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On November 3, 2021, TPS filed an application with DOE (Application or App.) to ''transmit electric energy from the United States to Canada for a period of five years.'' App. at 1. TPS states that it ''is a Nebraska corporation and an indirect, wholly owned subsidiary of Tenaska Energy, Inc. ('Tenaska').'' *Id.* TPS further states that its ''parent company, Tenaska, is a privately held corporation organized and existing under the laws of Delaware.'' *Id.* at 2. TPS represents that it ''does not currently own or control electric generation or transmission facilities, and does not have a power supply of its own in the United States that would cause its electricity exports to have a reliability, fuel use, or system stability impact.'' *Id.* at 3.

TPS further claims that it would ''purchase the electricity may export . . . from wholesale generators, electric utilities, federal power marketing agencies and affiliates through negotiated agreements that have been voluntarily executed by the selling parties after considering their own need for any such electricity.'' App. at 3. TPS contends that its ''proposed electricity exports will not impair or tend to impede the sufficiency of electric power supplies in the United States or the regional coordination of electric utility planning or operations.'' *Id.* at 3–4.

The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning TPS's application to export electric energy to Canada should be clearly marked with OE Docket No. EA–243–D. Additional copies are to be provided directly to Norma Rosner Iacovo, 300 East John Carpenter Freeway, Suite 100, Irving, TX 75062, *niacovo@tnsk.com;* and Neil L. Levy, 500 North Capitol Street NW, Washington, DC 20001, *nlevy@mwe.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of the Application will be made available, upon request, by accessing the program website at *https://energy.gov/node/11845,* or by emailing Matt Aronoff at *matthew.aronoff@hq.doe.gov.*

Signed in Washington, DC, on November 12, 2021.

Christopher Lawrence,

Management and Program Analyst, Electricity Delivery Division, Office of Electricity.

[FR Doc. 2021–25247 Filed 11–18–21; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[OE Docket No. EA–433–A]

Application To Export Electric Energy; SociVolta, Inc.

AGENCY: Office of Electricity, Department of Energy.

ACTION: Notice of application.

SUMMARY: SociVolta, Inc. (Applicant or SociVolta) has applied for authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before December 20, 2021.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov,* or by facsimile to (202) 586–8008.

FOR FURTHER INFORMATION CONTACT: Matt Aronoff, 202–586–5863, *matthew.aronoff@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) regulates exports of electricity from the United States to a foreign country, pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 42 U.S.C. 7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On October 29, 2021, SociVolta filed an application with DOE (Application or App.) to ''transmit electric energy from the United States to Canada for a period of five (5) years.'' App. at 1. SociVolta states that it ''is a Canadian company with its principal place of business in Montreal, Quebec,'' adding that it ''was incorporated in Quebec under a Canadian federal chart.'' *Id.* at 2. SociVolta represents that it ''does not have any affiliates or upstream owners that possess any ownership interest or involvement in any other company that is a traditional utility or that owns, operates, or controls any electric generation, transmission or distribution facilities, nor do they have any direct involvement with the energy industry other than through the ownership of SociVolta.'' *Id.*

SociVolta further claims that it would ''purchase power to be exported from a variety of sources such as power marketers, independent power producers, or U.S. electric utilities and federal power marketing entities as those terms are defined in Sections 3(22) and 3(19) of the [Federal Power Act].'' App. at 3. SociVolta contends that its proposed exports would be ''surplus to the system of the generator and, therefore, the electric power that [it would] export on either a firm or interruptible basis [would] not impair the sufficiency of the electric power supply within the U.S.'' *Id.* SociVolta adds that its proposed exports would ''not impair or tend to impede the sufficiency of electric supplies in the U.S. or the regional coordination of electric utility planning or operations.'' *Id.* at 4.

The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning SociVolta's application to export electric energy to Canada should be clearly marked with OE Docket No. EA–433–A. Additional copies are to be provided directly to Ruta Kalvaitis Skučas, 1601 K St. NW, Washington, DC 20006, *rskucas@piercewood.com*; and Daniel Doyon, 5455 De Gaspe Ave, Suite 710, Montreal, Quebec H2T 3B3, Canada, *info@socivolta.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of the Application will be made available, upon request, by accessing the program website at *https://energy.gov/node/11845,* or by emailing Matt Aronoff at *matthew.aronoff@hq.doe.gov.*

Signed in Washington, DC, on November 12, 2021.

Christopher Lawrence,

Management and Program Analyst, Electricity Delivery Division, Office of Electricity.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Department of Energy Final Decision and Reasoning Response to Defense Nuclear Facilities Safety Board Recommendation 2020–1, Nuclear Safety Requirements

AGENCY: Office of Environment, Health, Safety and Security, Department of Energy.

ACTION: Notice.

SUMMARY: On June 1, 2021, the Defense Nuclear Facilities Safety Board issued the reaffirmation and revision of Recommendation 2020–1, *Nuclear Safety Requirements,* to the Department of Energy. In accordance with the Atomic Energy Act of 1954 the following represents the Secretary of Energy's final decision and the reasoning for such decision on the recommendation.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Do, Office of the Departmental Representative to the Defense Nuclear Facilities Safety Board, Office of Environment, Health, Safety and Security, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585, or telephone number (301) 903–6460, or email *Mark.Do@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: On June 1, 2021, the Defense Nuclear Facilities Safety Board issued the reaffirmation and revision of Recommendation 2020–1, *Nuclear Safety Requirements,* to the Department of Energy. In accordance with section 315 of the Atomic Energy Act of 1954 (42 U.S.C. 2286d(e)), the Secretary of Energy's final decision and the reasoning for such decision pertaining to Recommendation 2020–1 are printed in full at the conclusion of this notice.

Signing Authority

This document of the Department of Energy was signed on November 15, 2021, by Joe Olencz, Departmental

Representative to the Defense Nuclear Facilities Safety Board, Office of Environment, Health, Safety and Security, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 16, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

Summary: This notice, together with its attachments, memorializes the Secretary of Energy's final decision and reasoning for such decision pertaining to Defense Nuclear Facilities Safety Board (DNFSB or Board) Recommendation 2020–1, *Nuclear Safety Requirements.*

Discussion: The Board issued Recommendation 2020–1 on February 21, 2020. The Recommendation was published in the **Federal Register** on March 13, 2020 (85 FR 14658). The Secretary of Energy responded to the DNFSB in the letter dated June 11, 2020, indicating that the Department of Energy (DOE) partially accepted Recommendation 2020–1. DOE's response was published in the **Federal Register** on June 19, 2020 (85 FR 37086).

In response to DOE's partial acceptance, the DNFSB revised and reaffirmed Recommendation 2020–1 on June 1, 2021. In this revision and reaffirmation, the Board acknowledged DOE's completion of the rulemaking for 10 Code of Federal Regulations (CFR) Part 830, *Nuclear Safety Management,* and made a number of revisions to specific sub-recommendations within Recommendation 2020–1.

In a letter to the DNFSB dated September 8, 2021, the Secretary of Energy accepted Recommendation 2020–1, and provided details of the reasoning for this acceptance. This response constitutes the Secretary's final decision for the Recommendation. The Secretary of Energy's final decision and reasoning are included as attachments to this notice.

This notice is in accordance with 42 United States Code (U.S.C.) Section 2286d paragraph (e), which states:

If the Secretary of Energy, in a response under subsection (c)(1), rejects (in whole or part) any recommendation made by the Board under section 2286a of this title, the Board shall either reaffirm its original recommendation or make a revised recommendation and shall notify the Secretary of its action. Within 30 days after receiving the notice of the Board's action under this subsection, the Secretary shall consider the Board's action and make a final decision on whether to implement all or part of the Board's recommendations. Subject to subsection (i), the Secretary shall publish the final decision and the reasoning for such decision in the **Federal Register** and shall transmit to the Committees on Armed Services, Appropriations, and Energy and Commerce of the House of Representatives and the Committees on Armed Services, Appropriations, and Energy and Natural Resources of the Senate a written report containing that decision and reasoning.

Attachment 1

September 8, 2021

The Honorable Joyce Connery
Chair, Defense Nuclear Facilities Safety Board
625 Indiana NW, Suite 700
Washington, DC 20004

Dear Chair Connery:

The Department of Energy (DOE) acknowledges receipt of your letter dated June 1, 2021, which both reaffirms and revises Defense Nuclear Facilities Safety Board (DNFSB) Recommendation 2020–1, *Nuclear Safety Requirements.* The initial issuance of Recommendation 2020–1, dated February 21, 2020, asserted that DOE's August 2018 proposed revisions to Title 10 Code of Federal Regulations (CFR) Part 830, *Nuclear Safety Management,* would erode DOE's nuclear safety regulatory framework. In its June 11, 2020, response which states that ''the changes to 10 CFR part 830 will improve the effectiveness and efficiency of DOE's nuclear safety framework while continuing to ensure adequate protection of public and worker health and safety across the DOE complex,'' DOE disagreed with the DNFSB's assertions. On October 19, 2020, DOE published the Final Rule amending 10 CFR part 830, addressing and incorporating comments from the DNFSB and members of the public as part of the formal rulemaking process. (85 FR 66201).

Following our recent evaluation of your updated Recommendation 2020–1, the Department continues to conclude that its current regulatory framework, as revised by the October 2020 rulemaking, provides adequate protection of public and worker health and safety across the DOE complex. However, I accept Recommendation 2020–1, as detailed in the enclosure, which constitutes my Final Decision for this Recommendation. DOE agrees with addressing the technical concerns raised by the Board, but DOE cannot commit to a specific outcome in a future rulemaking and will perform a regulatory analysis to evaluate whether any changes to 10 CFR part 830 should be proposed through a future rulemaking process.

The enclosure updates DOE's June 11, 2020, response for several sub-recommendations to reflect revisions to Recommendation 2020–1. We believe DOE's implementation plan will meet the safety improvement objectives of the DNFSB's Recommendation.

DOE appreciates the Board's advice and will continue working closely with the Board and its staff to continuously improve DOE's nuclear safety regulatory framework in a manner that meets our shared objective to ensure the continued safe, effective, and efficient execution of DOE's mission.

To ensure that our implementation plan will meet the underlying safety improvement objectives of the DNFSB's Recommendation, DOE will engage in frequent staff level interactions during the preparation of the plan. The Board cited these constructive interactions during the most recent preparation of an implementation plan as a potential best practice, and we look forward to enhancing and improving our interactions during this process as well.

If you have any questions, please contact Mr. Matthew Moury, Associate Under Secretary for Environment, Health, Safety and Security, at 202–586–1285.

Sincerely,

Jennifer Granholm

Enclosure

Attachment 2

Enclosure—Department of Energy Response to DNFSB Recommendation 2020–1, Nuclear Safety Requirements

The Department of Energy (DOE or Department) has evaluated the reaffirmed and revised Defense Nuclear Facilities Safety Board (DNFSB or Board) Recommendation 2020–1, dated June 1, 2021. The following discussion presents a detailed response for each DNFSB sub-recommendation, which reflects the Department's acceptance of Recommendation 2020–1, and constitutes the Secretary's Final Decision for this Recommendation.

As described in DOE's June 11, 2020, initial response to Recommendation 2020–1, DOE disagreed with the DNFSB's assertion that the revisions proposed in the August 8, 2018, Notice

of Proposed Rulemaking (NOPR) for 10 CFR part 830, *Nuclear Safety Management,* will erode DOE's nuclear safety regulatory framework. Rather, DOE believes that these proposed changes will improve the effectiveness and efficiency of the framework while continuing to ensure adequate protection of environment, public, and worker health and safety at DOE defense nuclear facilities. On October 19, 2020, DOE published the Final Rule amending 10 CFR part 830, addressing and incorporating comments from the DNFSB and members of the public as part of the formal rulemaking process. (85 FR 66201).

The DNFSB's June 1, 2021, letter both revises and reaffirms DNFSB Recommendation 2020–1, *Nuclear Safety Requirements,* in response to DOE's June 11, 2020, response and to DOE's completion of the rulemaking. Given the revisions made to the Recommendation, the following reflects DOE's revised response.

While accepting Recommendation 2020–1, DOE accepts sub-recommendations 3.c, 5.d, and 5.e with the understanding that DOE cannot commit to a specific outcome in a future rulemaking as doing so would be inconsistent with its requirements under the Administrative Procedure Act. DOE will perform a regulatory analysis to evaluate whether changes to 10 CFR part 830 should be pursued through a future rulemaking effort.

Sub-Recommendation 1: Aging Infrastructure

Sub-Recommendation 1.a. *Develop and implement an integrated approach—including requirements—for the management of aging infrastructure that includes formal processes to identify and perform infrastructure upgrades necessary to ensure facilities and structures, systems, and components can perform their safety functions.*

DOE accepts this sub-recommendation. DOE believes its nuclear safety regulatory framework has requirements in place to ensure facilities and safety structures, systems, and components (SSCs), both active and passive, perform their safety functions. In the Department's December 17, 2019, response to the Draft Recommendation, the Department included an extensive discussion regarding DOE's expectations for the performance of safety SSCs within DOE's policy documents. At the highest level, compliance with 10 CFR part 830, including the requirement in 10 CFR 830.204(b)(4) to ''. . . demonstrate the adequacy of these [hazard] controls to eliminate, limit, or mitigate identified hazards . . .'', is required for all Hazard Category (HC) 1, 2, and 3 nuclear facilities, and applies to new and existing facilities.

DOE will benchmark existing successful aging management processes, such as the Extended Life Program at Y–12, and infrastructure upgrade programming systems, such as Science-based Infrastructure Stewardship, to enhance its processes to identify, prioritize, and plan safety-related infrastructure upgrades at Defense Nuclear Facilities. DOE will ensure funding necessary to complete upgrades designated through these evaluation and prioritization processes is clearly identified as part of the federal budgeting process. Given the multiple government-wide priorities that are considered as part of the budgeting process, DOE recognizes that not all upgrades are likely to be able to be funded in any given budgeting cycle. DOE will continue its risk-based budgeting prioritization approach and will continue taking other mitigating steps, as appropriate, to continue to maintain adequate safety. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 2: Hazard Categories

Sub-Recommendation 2.a. *Revise DOE Standard 1027–2018 to address the deficiencies noted in the Board's letter dated January 19, 2021.*

DOE accepts this sub-recommendation. During the DNFSB staff's recent 2020 review of the content and technical basis of DOE Standard 1027–2018, Change Notice 1, *Hazard Categorization of DOE Nuclear Facilities,* DOE and the DNFSB staff had multiple meetings to discuss the DNFSB staff's questions and concerns. The DNFSB staff's outstanding issues were identified in the Board's letter dated January 19, 2021. The letter was provided to DOE for information. DOE has reviewed this letter and will work with the Board staff to further understand these concerns as part of future work on DOE Standard 1027 (as described in response to sub-Recommendation 2.b, below). Further, it should be noted that as a result of the Board's review of hazard categorization, NNSA Supplemental Directive (SD) Guide (G)-1027, Admin Change 2, was issued on May 10, 2021, that clarified the use of the calculated threshold quantities and provided additional historical perspective on use of International Commission for Radiation Protection (ICRP) guidance. DOE believes that the changes address some of the Board's concerns identified in the letter.

Sub-Recommendation 2.b. *Mandate use of the updated version of DOE Standard 1027 when performing facility hazard categorization of new defense nuclear facilities.*

DOE accepts this sub-recommendation. DOE plans future work on DOE Standard 1027, including an evaluation of DOE–STD–1027–2018, a potential revision of the Standard, and a potential revision to 10 CFR part 830 to incorporate Standard(s) used by the Department for hazard categorization. This work will inform any requirements to be considered for the future. As part of this effort DOE will perform a regulatory analysis to evaluate potential changes to the Rule.

DOE's current approach is consistent with 10 CFR part 830, which allows updates to DOE–STD–1027, such as in DOE–STD–1027–2018, that are consistent with the methodology of DOE–STD–1027–92, Change Notice 1. In DOE's June 11, 2020 response, we noted that if DOE were to propose a new methodology for categorization, DOE would need to undertake a new rulemaking effort that would include proposing the revised methodology for public comment and reference the new Standard that includes the methodology. This remains the case. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 2.c. *Review existing hazard category 3 and below hazard category 3 defense nuclear facilities to confirm they are appropriately categorized.*

DOE accepts this sub-recommendation. The DNFSB's review does not provide sufficient data, nor has DOE's oversight indicated that use of the hazard categorization standards has led to under categorization that would necessitate additional reviews. However, concurrent with DOE's resolution to sub-Recommendation 2.b, DOE will evaluate the nuclear safety management framework (*i.e.,* DOE directives and technical standards) to determine the best approach to establish requirements that would provide greater confidence that defense nuclear facilities, including below hazard category 3 facilities, are appropriately categorized. The Implementation Plan will identify the specific steps that will be taken to address this sub-recommendation.

Sub-Recommendation 3: DOE Approvals

Sub-Recommendation 3.a. *Establish requirements in DOE Standard 1104 for timely periodic DOE reviews of facility safety bases to ensure they meet the requirements of 10 CFR 830.*

DOE accepts this sub-recommendation. DOE commits to evaluating DOE Standard 1104 or other DOE directive(s) and revising directives and technical standards, as necessary, to incorporate DOE's expectations for the review of facility safety bases to ensure they meet the requirements of 10 CFR part 830. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 3.b. *Establish clear requirements in DOE Standard 1104 for DOE approval of JCOs and ESSs for PISAs that result in a positive USQ determination.*

DOE accepts this sub-recommendation. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 3.c. *Update 10 CFR 830 to incorporate the requirements established per items 3.a and 3.b.*

DOE accepts this sub-recommendation with the understanding that while the Department has accepted sub-recommendations 3.a and 3.b, any future resulting requirements can be implemented in several policy documents (*i.e.,* DOE rules, directives, or technical standards) and DOE cannot commit to a specific outcome in a future rulemaking. However, DOE will perform a regulatory analysis to evaluate whether any changes to 10 CFR part 830 should be proposed through a future rulemaking process.

Sub-Recommendation 4: Evaluation of DSA Preparation and Review Processes

Sub-Recommendation 4.a. *Conduct an independent review of contractor and federal processes to identify and evaluate the underlying issues that prevented the annual submittal and approval of high-quality safety basis documents, and use the findings to improve the relevant processes.*

DOE accepts this sub-Recommendation. This sub-Recommendation is related to the Board's concerns with the deletion of the requirement for review and approval of the annual updates to the DSA in the recent 10 CFR part 830 Rulemaking (final Rule published October 19, 2020, 85 FR 66201). DOE's acceptance of this sub-Recommendation does not constitute its agreement that there is a safety concern associated with the October 19, 2020, final Rule, nor that there were underlying safety issues with the annual submittal and approval of high-quality safety basis documents. However, DOE is committed to continuous improvement and will conduct an independent review of the current safety basis development processes to determine whether improvements may be made for future submittals.

Sub-Recommendation 5: Safety Basis Process and Requirements

Sub-Recommendation 5.a. *Establish clear requirements for USQs and JCOs in an order or invoked standard, including elevation of key concepts and guidance from DOE Guide 424.1–1. While developing these requirements, address issues discussed in the Board's letter dated July 10, 2020.*

DOE accepts this sub-recommendation. DOE will evaluate the nuclear safety management framework (*i.e.,* DOE directives and technical standards) to determine the best approach to establish requirements for USQs and JCOs. The Board's July 10, 2020, letter will be considered as part of this effort. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 5.b. *Establish clear requirements for TSRs in an order or invoked standard, including elevation of key concepts and guidance from DOE Guide 423.1–1. While developing these requirements, address issues discussed in DNFSB Technical Report 45, Violations of the Nuclear Safety Basis.*

DOE accepts this sub-recommendation. DOE will evaluate the nuclear safety management framework (*i.e.,* DOE directives and technical standards) to determine the best approach to establish requirements for Technical Safety Requirements. The Board's Technical Report 45 will be considered as part of this effort. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 5.c. *Establish requirements for SACs by invoking DOE Standard 1186 in an appropriate DOE order.*

DOE accepts this sub-recommendation. DOE will evaluate the nuclear safety management framework (*i.e.,* DOE directives and technical standards) to determine the best approach to establish requirements for Specific Administrative Controls. The Implementation Plan will further describe the steps that will be taken to address this sub-recommendation.

Sub-Recommendation 5.d. *Update 10 CFR 830 to incorporate the requirements established per items 5.a through 5.c.*

DOE accepts this sub-recommendation with the understanding that while the Department has accepted sub-recommendations 5.a through 5.c, any future resulting requirements can be implemented in several policy documents (*i.e.,* DOE rules, directives, or technical standards) and DOE cannot commit to a specific outcome in a future rulemaking effort. However, DOE will perform a regulatory analysis to evaluate whether any changes to 10 CFR part 830 should be proposed through an additional rulemaking process.

Sub-Recommendation 5.e. *Establish requirements in 10 CFR 830 regarding the concept of defense-in-depth.*

DOE accepts this sub-recommendation with the understanding that while the Department agrees to evaluate the need for additional requirements regarding the concept of defense-in-depth, DOE cannot commit to a specific outcome in a future rulemaking process. However, DOE will perform a regulatory analysis to evaluate whether any changes to 10 CFR part 830 should be proposed through an additional rulemaking process.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Privacy Act of 1974; System of Records

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of a modified system of records.

SUMMARY: The Federal Energy Regulatory Commission (FERC) is publishing notice of modifications to an existing FERC system of records, FERC–24 titled *Commission Miscellaneous Investigation File.* This notice adds 11 new routine uses, including two prescribed by the Office of Management and Budget (OMB) Memorandum M–17–12, *Preparing for and Responding to a Breach of Personally Identifiable Information,* January 3, 2017, that will permit FERC to disclose information as necessary in response to an actual or suspected breach of its own records or to assist another agency in its efforts to respond to a breach. This System of Records Notice (SORN) also describes the Commission's systems manager and location change.

DATES: In accordance with 5 U.S.C. 552a(e)(4) and (11), this system of records notice is effective upon publication, with the exception of the routine uses, which will go into effect on December 20, 2021, unless comments have been received from interested members of the public requiring modification and republication of the notice. Please submit any comments by December 20, 2021.

ADDRESSES: Any person interested in commenting on the establishment of this modified system of records may do so by submitting comments electronically to: *Privacy@ferc.gov* (Include reference to ''Commission Miscellaneous Investigation File'' in the subject line of the message.)

For United States Postal Service-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 888 First Street NE, Room 4A–05, Washington, DC 20426.

For hand-delivered or courier-delivered mail: Director, Office of External Affairs, Federal Energy

Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Director, Workforce Relations, Chief Human Capital Officer, Office of the Executive Director, 888 First Street NE, Washington, DC 20426, (202) 502–6475.

SUPPLEMENTARY INFORMATION: The Commission Miscellaneous Investigation File notice is being modified. The notice includes 11 new routine uses, including two prescribed routine uses that will permit FERC to disclose information as necessary in response to an actual or suspected breach of its own records or to assist another agency in its efforts to respond to a breach. This notice also addresses the system's manager and location change, while also providing additional specificity on the category of employees and employee matters contained in the system of records.

SYSTEM NAME AND NUMBER:

Commission Miscellaneous Investigation File: FERC–24.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Federal Energy Regulatory Commission, Office of the Executive Director, Workforce Relations Division (CHCO), 888 First Street NE, Washington, DC 20426.

SYSTEM MANAGER(S):

Director, Workforce Relations Division, Chief Human Capital Officer, Office of the Executive Director, 888 First Street NE, Washington, DC 20426, (202) 502–6475.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Rehabilitation Act, 29 U.S.C. 791 *et. seq.*

Title VII of the Civil Rights Act, 42 U.S.C. 2000e *et. seq.*

Executive Order No. 13164.

Executive Order No. 13991.

29 CFR part 1614—*Federal Sector Equal Employment Opportunity.*

5 CFR part 735—*Employee responsibilities and conduct.*

PURPOSE(S) OF THE SYSTEM:

To maintain documentation on employee matters that are not part of a formal grievance process require collection of employee information by management in order to process request and/or render decisions in accordance with applicable law, rule or regulation preserve and maintain confidentiality. This may include, among other considerations, requests for reasonable accommodation, medical or religious accommodation, religious compensatory time off, or anti-harassment allegations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

For matters that do not involve a formal grievance or appeal process, or formal Department of Energy Inspector General inquiry, which may include among other matters: (1) Employees requesting exception to agency policy, adjustment to the job or adjustment to the work environment under applicable law, rules or regulations; and (2) employees petitioning for informal inquiry into allegations of workplace harassment not that are not covered under Title VII.

CATEGORIES OF RECORDS IN THE SYSTEM:

Formal reports of inquiry and supporting documentation; records of actions taken resulting from the inquiry and supporting documentation for the inquiry and the response; medical forms, medical documents, documentation from healthcare providers, religious affiliation information, and other related supporting documents; and decision documents.

RECORD SOURCE CATEGORIES:

Information in this system of records comes from the individual to whom it applies; is derived from information supplied by that individual; or created by management officials to summarize findings and/or develop recommendations for action.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, information maintained in this system may be disclosed to authorized entities outside FERC for purposes determined to be relevant and necessary as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To appropriate agencies, entities, and persons when (1) FERC suspects or has confirmed that there has been a breach of the system of records; (2) FERC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Commission (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Commission's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

2. To another Federal agency or Federal entity, when FERC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

3. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

4. To the Equal Employment Opportunity Commission (EEOC) when requested in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or other functions of the Commission as authorized by law or regulation.

5. To the Federal Labor Relations Authority or its General Counsel when requested in connection with investigations of allegations of unfair labor practices or matters before the Federal Service Impasses Panel.

6. To disclose information to another Federal agency, to a court, or a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency, where the record is relevant and necessary to the proceeding and the Government is a party to the judicial or administrative proceeding. In those cases where the Government is not a party to the proceeding, records may be disclosed if a subpoena has been signed by a judge.

7. To the Department of Justice (DOJ) for its use in providing legal advice to FERC or in representing FERC in a proceeding before a court, adjudicative body, or other administrative body, where the use of such information by the DOJ is deemed by FERC to be relevant and necessary to the advice or proceeding, and such proceeding names as a party in interest: (a) FERC; (b) any employee of FERC in his or her official capacity; (c) any employee of FERC in his or her individual capacity where DOJ has agreed to represent the employee; or (d) the United States, where FERC determines that litigation is likely to affect FERC or any of its components.

8. To non-Federal Personnel, such as contractors, agents, or other authorized individuals performing work on a contract, service, cooperative agreement, job, or other activity on behalf of FERC or Federal Government and who have a

need to access the information in the performance of their duties or activities.

9. To the National Archives and Records Administration in records management inspections and its role as Archivist, as permitted by 44 U.S.C. 2904 and 2906.

10. To the Merit Systems Protection Board or the Board's Office of the Special Counsel, when relevant information is requested in connection with appeals, special studies of the civil service and other merit systems, review of Office of Personnel Management (OPM) rules and regulations, and investigations of alleged or possible prohibited personnel practices.

11. To appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the record indicates a violation or potential violation of civil or criminal law, rule, regulation, order.

12. To serve as a data source for OPM or Government Accountability Office (GAO) during the course of on-site inspections or audits.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper (assorted documents) or electronic media. Data center buildings are guarded and monitored by security personnel, cameras, ID checks, and other physical security measures. Physical access to the server rooms is limited to authorized personnel only. Records are maintained in lockable file cabinets in a lockable room with access limited to those employees whose official duties require access; servers are stored in secured facilities in cipher locked server rooms. Computer data is secured by password. The system is secured with the safeguards required by FedRAMP and NIST SP 800–53.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by employee's name or employee ID number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained under the National Archives and Records Administration's General Records Schedule 2.3. Destroy 3 years after being superseded, but longer retention is authorized if required for business use. Destroy 3 years after employee separation from the agency or all matters are concluded, whichever is later, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

All FERC employees and contractors with authorized access have undergone a thorough background security investigation. Data access is restricted to agency personnel or contractors whose responsibilities require access. Access to electronic records is controlled by ''User ID'' and password combination and/or other network access or security controls (*e.g.,* firewalls). The system is secured with the safeguards required by FedRAMP and NIST SP 800–53. Physical access to FERC is controlled by security guards and admission is limited to those individuals possessing a valid identification card or individuals under proper escort.

RECORD ACCESS PROCEDURES:

Submit a Privacy Act Request:

The Privacy Act permits access to records about yourself that are maintained by FERC in a Privacy Act system of records. In addition, you may request that incorrect or incomplete information be changed or amended. Privacy requests follow FERC's *Freedom of Information Act (FOIA) request process.* You may access the FOIA website at *https://www.ferc.gov/freedom-information-act-foia-and-privacy-act.*

For questions: Contact the FOIA Service Center at 202–502–6088 or by email at *foia-ceii@ferc.gov.* Written request for access to records should be directed to:

For United States Postal Service-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

For hand-delivered or courier-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

CONTESTING RECORD PROCEDURES:

The Privacy Act permits access to records about yourself that are maintained by FERC in a Privacy Act system of records. In addition, you may request that incorrect or incomplete information be changed or amended. Privacy requests follow FERC's *Freedom of Information Act (FOIA) request process.* You may access the FOIA website at *https://www.ferc.gov/freedom-information-act-foia-and-privacy-act.*

For questions: Contact the FOIA Service Center at 202–502–6088 or by email at *foia-ceii@ferc.gov.*

Written request for access to records should be directed to:

For United States Postal Service-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

For hand-delivered or courier-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

NOTIFICATION PROCEDURES:

The Privacy Act permits access to records about yourself that are maintained by FERC in a Privacy Act system of records. In addition, you may request that incorrect or incomplete information be changed or amended.

Privacy requests follow FERC's *Freedom of Information Act (FOIA) request process.* You may access the FOIA website at *https://www.ferc.gov/freedom-information-act-foia-and-privacy-act.*

For questions: Contact the FOIA Service Center at 202–502–6088 or by email at *foia-ceii@ferc.gov.*

Written request for access to records should be directed to:

For United States Postal Service-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

For hand-delivered or courier-delivered mail: Director, Office of External Affairs, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

FERC–24 Commission Miscellaneous Investigation File was last published at **Federal Register** Vol. 65, No. 79, Monday, April 24, 2000.

Dated: November 16, 2021.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2017–0466; FRL–9272–01–OCSPP]

Spirodiclofen; Product Cancellation Order for Certain Pesticide Registrations; Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA issued a notice in the **Federal Register** on December 21, 2020 to amend the effective date of cancellation for the two spirodiclofen registrations listed in Table 1B of the cancellation order published in the **Federal Register** on April 13, 2018. The affected registrations for that cancellation order, EPA Registration Nos. 264–830 and 264–831 were registered to Bayer CropScience. The December 21, 2020, notice in the **Federal Register** was issued to amend the cancellation order, as requested by Bayer, by amending the effective date of the cancellation and the existing stocks provision for the two spirodiclofen registrations until December 31, 2021. Subsequent to the issuance of this cancellation order, the two registrations were transferred to the Gowan Company and Gowan has requested that the cancellation order be rescinded. EPA is extending the effective date of cancellation to June 30, 2022 while considering Gowan's request. The cancellation of these two registrations would terminate the last spirodiclofen products registered for use in the United States. Any distribution, sale, or use of the products subject to this cancellation order is permitted only in accordance with the terms of this order, including any existing stocks provisions.

DATES: The **Federal Register** of December 21, 2020, announced the voluntary cancellation of two

spirodiclofen registrations (EPA Registration Nos. 264–830 and 264–831) as requested by the registrant, effective December 31, 2021. The Agency is now amending the effective date of cancellation to June 30, 2022.

FOR FURTHER INFORMATION CONTACT: Veronica Dutch, Pesticide Re-evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW, Washington, DC 20460–0001; telephone number: (202) 566–2352; email address: *dutch.veronica@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. How can I get copies of this document and other related information?

The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2017–0466, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001.

Due to the public health emergency, the EPA Docket Center (EPA/DC) and Reading Room is closed to visitors with limited exceptions. The staff continues to provide remote customer service via email, phone, and webform. For the latest status information on EPA/DC services and docket access, visit *https://www.epa.gov/dockets.*

II. What action is the Agency taking?

This notice is being issued to amend the effective date for cancellation the two spirodiclofen registrations (now EPA Registration Nos. 10163–382 and 10163–383) as published in the **Federal Register** on December 21, 2020 (85 FR 83078) (FRL 10017–47). The transfer of these spirodiclofen products to Gowan became effective on March 18, 2021. Gowan committed to develop required data with the intention of maintaining these spirodiclofen registrations in a letter dated October 8, 2020. With this notice, EPA is hereby amending the effective date for cancellation of EPA Registration Nos. 10163–382 and 10163–383 to June 30, 2022. Although Gowan submitted data and waiver requests to EPA as they had committed to do, EPA recently completed draft ecological and human health risk assessments as part of registration review which identified potential cancer dietary (water and food) risks of concern, along with potential ecological risks of concern for certain taxa, including mammals and honeybees. Changes to the spirodiclofen labels are necessary to adequately mitigate those risks. EPA is extending the effective date of cancellation to further consider Gowan's request to rescind the cancellation order. Consistent with the previous cancellation order, the registrant would be prohibited from producing, selling, or distributing existing stocks of products containing spirodiclofen following the cancellation effective date. Other entities would be permitted to sell, distribute, and use stocks of spirodiclofen until stocks are exhausted. The cancellation of these two registrations would terminate the last spirodiclofen products registered for use in the United States.

Authority: 7 U.S.C. 136 *et seq.*

Dated: November 15, 2021.

Mary Reaves,

Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[CERCLA–04–2021–2504; FRL–9143–01–R4]

Horton Iron and Metal Superfund Site, Wilmington, North Carolina, Proposed Settlement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement.

SUMMARY: Under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the United States Environmental Protection Agency is proposing to enter into a settlement with W.R. Grace & Co. Conn concerning the Horton Iron and Metal Superfund Site located in Wilmington, North Carolina. The proposed settlement addresses recovery of CERCLA costs for a cleanup that will be performed at the Site and costs incurred by EPA.

DATES: The Agency will consider public comments on the proposed settlement until December 20, 2021. The Agency will consider all comments received and may modify or withdraw its consent to the proposed settlement if comments received disclose facts or considerations which indicate that the proposed settlement is inappropriate, improper, or inadequate.

ADDRESSES: Copies of the proposed settlement are available from the Agency by contacting Ms. Paula V. Painter, Program Analyst, using the contact information provided in this notice. Comments may also be submitted by referencing the Site's name through one of the following methods:

Internet: https://www.epa.gov/aboutepa/about-epa-region-4-southeast#r4-public-notices

Email: Painter.Paula@epa.gov

FOR FURTHER INFORMATION CONTACT: Paula V. Painter at 404 562–8887.

Maurice Horsey,

Chief, Enforcement Branch, Superfund & Emergency Management Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OW–2021–0736; FRL–9261–01–OW]

Proposed Information Collection Request; Comment Request; Meat and Poultry Products Industry Data Collection

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), ''U.S. Environmental Protection Agency Meat and Poultry Products Industry Data Collection'' (EPA ICR No. 2701.01, OMB Control No. 2040–NEW) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a request for approval of a new collection. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before January 18, 2022.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OW–2021–0736, online using *www.regulations.gov* (our preferred method), by email to *OW-Docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Stephen Whitlock, Engineering and Analysis Division, Office of Science and Technology, (4303T), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–566–1541; email address: *Whitlock.Steve@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Pursuant to section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501 *et seq*), EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Under the Clean Water Act (CWA), EPA develops effluent limitations guidelines (ELGs) to limit pollutants discharged from industrial point source categories. EPA initially promulgated ELGs for the Meat and Poultry Products (MPP) category in 1974 and amended the regulations in 2004. The current regulation covers wastewater directly discharged by meat and poultry slaughterhouses and further processors as well as independent renderers. Small facilities and indirect dischargers are not included in the current rule.

In EPA's cross-industry review of nutrients in industrial wastewater, the MPP category ranked among the top two industrial categories based on 2018 data, and EPA announced a detailed study of the MPP category in 2020. During the detailed study, EPA collected publicly available data and met with industry trade associations. Based on the detailed study, EPA found that there are existing, affordable technologies that can reduce nutrient concentrations in MPP wastewater. As part of the detailed study, EPA also found that pretreatment standards may be needed as publicly available data shows that pollutants from MPP facilities may passthrough and cause interference for some POTWs.

Publicly available data on MPP facilities is limited. To identify the base population of approximately 7,000 MPP facilities, EPA collected data from the US Department of Agriculture (USDA) Food Safety Inspection Service (FSIS). Using this base population, EPA attempted to find data on MPP wastewater, effluent limits, and treatment technologies by collecting publicly available facility permits and consulting the Integrated Compliance Information System (ICIS) dataset. Available data was limited to only those facilities directly discharging wastewater or individual states that require pretreatment permits to be reported, leaving a large data gap. Thus, a survey of the current MPP industry will be an essential portion of the rulemaking process, necessary for EPA to determine if the current regulations remain appropriate.

The data collection activities described in this Information Collection Request (ICR) will provide a robust dataset that characterizes wastewater generation, treatment, and discharge from MPP facilities. A short questionnaire will be administered as a census of the industry to confirm general information on the type and size (both production and employees) of the facility and gather information on wastewater generation and treatment. To reduce burden on the industry, a statistically representative subset of MPP facilities will complete a detailed survey collecting additional details on processing operations, types and amount of wastewater generated by operation, wastewater treatment details, and economic data. A small number of MPP facilities will also be asked to collect and analyze wastewater samples to characterize raw waste streams,

wastewater treatment systems, and treated effluent for pollutants of interest.

The MPP industry has approximately 7,000 facilities across the country. The current rule contains 11 subparts, as the industry engages in a wide range of activities. Facilities range in size from very small (less than 10 employees) to large (over 500 employees). For EPA to complete the detailed technical and economic analysis for the entire industry necessary for the rulemaking process, the short questionnaire, detailed questionnaire, and sampling activities are essential.

Confidential Business Information (CBI) may be collected. In accordance with 40 CFR part 2, subpart B, section 2.203, the MPP Surveys inform respondents of their right to claim information as confidential. Each survey provides instructions for claiming confidentiality and informs respondents of the terms and rules governing the protection of CBI under the Clean Water Act and 40 CFR 2.203. Survey respondents are able to and are requested to mark any claimed confidential responses as CBI. EPA and its contractors will follow EAD's existing procedures to protect data labeled as CBI.

Form Numbers: None.

Respondents/affected entities: All Meat and Poultry Products facilities in the U.S., which includes facilities with the following NAICS codes: 311611, 311612, 311613, 311615, 311111, 311119, 311999. 1,633 facilities will receive the detailed questionnaire, 5,367 facilities will receive the short questionnaire, and no more than 20 facilities will be asked to conduct specific wastewater sampling events.

Respondent's obligation to respond: Mandatory (Clean Water Act section 308) (citing authority).

Estimated number of respondents: 7,000 (total).

Frequency of response: One-time data collection.

Total estimated respondent burden: 70,807 hours. Burden is defined at 5 CFR 1320.03(b).

Total estimated respondent cost: $3,219,484 one-time cost.

Changes in Estimates: This is a new data collection request and is a one-time temporary increase to the Agency's burden.

Deborah Nagle,

Director, Office of Science and Technology, Office of Water.

EXPORT-IMPORT BANK

Sunshine Act Meetings

Notice of Open Meeting of the Advisory Committee of the Export-Import Bank of the United States (EXIM).

TIME AND DATE: Thursday, November 18th, 2021 from 1:30–4:00 p.m. EDT.

PLACE: The meeting will be held virtually.

STATUS: Public Participation: The meeting will be open to public participation and time will be allotted for questions or comments submitted online. Members of the public may also file written statements before or after the meeting to *external@exim.gov.* Interested parties may register below for the meeting.

https://teams.microsoft.com/registration/PAFTuZHHMk2Zb1GDkIVFJw,5M1LfonJMEi2VFUgYRv6oQ,i145n2l9vkmDj5btNlkuGw,6pffizIY90ejfY7ZxOQxYA,rpZ5FoIsIUSTq6hUxDUGrQ,ALPUR1YOwUOm02kL5pavxw?mode=read&tenantId=b953013c-c791-4d32-996f-518390854527.

MATTERS TO BE CONSIDERED: Discussion of EXIM policies and programs to provide competitive financing to expand United States exports and comments for inclusion in EXIM's Report to the U.S. Congress on Global Export Credit Competition.

CONTACT PERSON FOR MORE INFORMATION: For further information, contact India Walker, External Enagagement Specialist, at 202–480–0062 or at *india.walker@exim.gov.*

EXPORT-IMPORT BANK

[Public Notice: 2021–6045]

Agency Information Collection Activities: Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995.

DATES: Comments must be received on or before December 20, 2021 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *WWW.REGULATIONS.GOV* (EIB 95–09) or by mail to Office of Information and Regulatory Affairs, 725 17th Street NW, Washington, DC 20038 Attn: OMB 3048–EIB 95–09. The form can be reviewed at *https://www.exim.gov/sites/default/files/pub/pending/95-09-li.pdf.*

FOR FURTHER INFORMATION CONTACT: To request additional information, please contact Donna Schneider <*donna.schneider@exim.gov*>, 202–565–3612.

SUPPLEMENTARY INFORMATION: The Letter of Interest (LI) is an indication of Export-Import (EXIM) Bank's willingness to consider financing a given export transaction. EXIM uses the requested information to determine the applicability of the proposed export transaction and determines whether or not to consider financing that transaction.

Title and Form Number: EIB 95–09 Letter of Interest Application.

OMB Number: 3048–0005.

Type of Review: Regular.

Need and Use: The Letter of Interest (LI) is an indication of Export-Import (EXIM) Bank's willingness to consider financing a given export transaction. EXIM uses the requested information to determine the applicability of the proposed export transaction system prompts and determines whether or not to consider financing that transaction.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 400.

Estimated Time per Respondent: 0.75 hours.

Annual Burden Hours: 300.

Frequency of Reporting of Use: On occasion.

Government Expenses:

Reviewing Time per Year: 400.

Average Wages per Hour: $42.50.

Average Cost per Year: $17,000 (time * wages).

Benefits and Overhead: 20%.

Total Government Cost: $20,400.

Bassam Doughman,

IT Specialist.

FEDERAL ACCOUNTING STANDARDS ADVISORY BOARD

Notice of Request for Comment on the Annual Report for Fiscal Year 2021 and Three-Year Plan

AGENCY: Federal Accounting Standards Advisory Board.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Federal Accounting Standards Advisory Board (FASAB) has issued its *Annual Report for Fiscal Year 2021 and Three-Year Plan.* Respondents are encouraged to comment on the content of the annual report and FASAB's project priorities for the next three years. Written comments are requested by January 18, 2022, and should be sent to *fasab@fasab.gov* or Ms. Monica R. Valentine, Executive Director, Federal Accounting Standards Advisory Board, 441 G Street NW, Suite 1155, Washington, DC 20548.

ADDRESSES: *The Annual Report for Fiscal Year 2021 and Three-Year Plan* is available on the FASAB website at *https://www.fasab.gov/our-annual-reports/*. Copies can be obtained by contacting FASAB at (202) 512–7350.

FOR FURTHER INFORMATION CONTACT: Ms. Monica R. Valentine, Executive Director, 441 G Street NW, Suite 1155, Washington, DC 20548, or call (202) 512–7350.

Authority: 31 U.S.C. 3511(d), the Federal Advisory Committee Act, as amended (5 U.S.C. app.), and the FASAB Rules of Procedure, as amended in October 2010.

Dated: November 15, 2021.

Monica R. Valentine,

Executive Director.

BILLING CODE P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0261 and OMB 3060–0270; FR ID 58121]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it can further reduce the information collection burden for small business concerns with fewer than 25 employees.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before December 20, 2021.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0261.

Title: Section 90.215, Transmitter Measurements.

Form No.: Not applicable.

Frequency of Response: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions and state, local or tribal Government.

Number of Respondents: 150,081 respondents; 234,439 responses.

Estimated Time per Response: .033 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in *47 U.S.C. 303(f)* of the Communications Act of 1934, as amended.

Total Annual Burden: 7,727 hours.

Total Annual Cost: No cost.

Needs and Uses: The information collection requirements contained in Section 90.215 require station licensees to measure the carrier frequency, output power, and modulation of each transmitter authorized to operate with power in excel of two watts when the transmitter is initially installed and when any changes are made which would likely affect the modulation characteristics. Such measurements, which help ensure proper operation of transmitters, are to be made by a qualified engineering measurement service, and are required to be retained in the station records, along with the name and address of the engineering measurement service, and the name of

the person making the measurements. The information is normally used by the licensee to ensure that equipment is operating within prescribed tolerances. Prior technical operation of transmitters helps limit interference to other users and provides the licensee with the maximum possible utilization of equipment.

OMB Control No.: 3060–0270.

Title: Section 90.443, Content of Station Records.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 166,658 respondents; 166,658 responses.

Estimated Time per Response: .25 hours.

Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in *47 U.S.C. Section 303(j),* as amended.

Total Annual Burden: 61,665 hours.

Annual Cost Burden: No cost.

Needs and Uses: The information collection requirements contained under Section 90.443(b) require that each licensee of a station shall maintain records for all stations by providing the dates and pertinent details of any maintenance performed on station equipment, along with the name and address of the service technician who did the work. If all maintenance is performed by the same technician or service company, the name and address need be entered only once in the station records.

The information collection requirements under Section 90.443(c) require that at least one licensee participating in the cost arrangement must maintain cost sharing records.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2021–25222 Filed 11–18–21; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1214; FR ID 58561]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before January 18, 2022. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1214.

Title: Direct Access to Numbers Order, FCC 15–70, Conditions.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 30 respondents; 30 responses.

Estimated Time per Response: 10–20 hours.

Frequency of Response: One-time; on-going and bi-annual reporting requirements.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in 47 U.S.C. 251(e)(1).

Total Annual Burden: 1,200 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: If respondents submit information which respondents believe is confidential, respondents may request confidential treatment of such information pursuant to section 0.459 of the Commission's rules, 47 CFR 0.459.

Needs and Uses: In a June 2015 Report and Order (FCC 15–70), the Commission established the Numbering Authorization Application process, which allows interconnected VoIP providers to apply for a blanket authorization from the FCC that, once granted, will allow them to demonstrate that they have the authority to provide service in specific areas, thus enabling them to request numbers directly from the Numbering Administrator. This collection covers the information and certifications that applicants must submit in order to comply with the Numbering Authorization Application process. The data, information, and documents acquired through this collection will allow interconnected VoIP providers to obtain numbers with minimal burden or delay while also preventing providers from obtaining numbers without first demonstrating that they can deploy and properly utilize such resources. This information will also help the Federal Communications Commission (FCC) protect against number exhaust while promoting competitive neutrality among traditional telecommunications carriers and interconnected VoIP providers by allowing both entities to obtain numbers directly from the Numbering Administrator. It will further help the FCC to maintain efficient utilization of numbering resources and ensure that telephone numbers are not being stranded.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than December 6, 2021.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *Maria Blanca del Valle Perochena and Maria de Guadalupe del Valle Perochena, both of Mexico City, Mexico;* to become limited partners in MBG Investors I, L.P., Ontario, Canada, and thereby indirectly acquire voting shares of Byline Bancorp, Inc. and Byline Bank, both of Chicago, Illinois.

B. Federal Reserve Bank of Minneapolis (Chris P. Wangen, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. *The Jerome Hageman Stock Trust 2020, Stephen Hageman, as trustee, both of Watertown, South Dakota;* to join the Hageman Family Control Group, a group acting in concert, to retain voting shares of Plains Commerce Financial, Inc., and thereby indirectly retain shares of Plains Commerce Bank, both of Hoven, South Dakota.

2. *Pamela J. Bjerke, Rice, Minnesota;* to acquire control of the voting shares of Stearns Financial Services, Inc. (Stearns), by becoming a co-trustee of the Stearns Financial Services, Inc. Employee Stock Ownership Plan and Trust, both of St. Cloud, Minnesota, which owns Stearns, and thereby indirectly owns Stearns Bank N.A., St. Cloud, Minnesota; Stearns Bank of Upsala, N.A., Upsala, Minnesota; and Stearns Bank of Holdingford, N.A., Holdingford, Minnesota.

Board of Governors of the Federal Reserve System, November 16, 2021.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[Notice–PCSCOTUS–2021–01; Docket No. PCSCOTUS–2021–0001; Sequence No. 6]

Office of Asset and Transportation Management; Presidential Commission on the Supreme Court of the United States; Notification of Upcoming Public Virtual Meeting and Request for Public Comment

AGENCY: Office of Government-wide Policy, General Services Administration (GSA).

ACTION: Request for public comment; meeting notice.

SUMMARY: GSA is accepting written public comments on the work of the Presidential Commission on the Supreme Court of the United States (Commission). Further, GSA is providing notice of an open public virtual meeting of the Commission in accordance with the requirements of the Federal Advisory Committee Act. The purpose of this meeting is for the Commissioners to review the draft Commission Report and vote on its submission to the President pursuant to Executive Order 14023. This meeting is open to the public and will be live-streamed at *www.whitehouse.gov/pcscotus/.* Materials relevant to the public meeting will be posted at *www.whitehouse.gov/pcscotus/* prior to the meeting.

DATES: The Commission will hold a public virtual meeting on December 7, 2021 from 3:00 p.m. to 4:30 p.m., Eastern Standard Time (EST).

ADDRESSES: This meeting will be conducted virtually on the internet. Interested individuals must register to attend as instructed below.

Procedures for Attendance and Public Comment

Attendance. This meeting is open to the public and the Commission encourages the public's attendance. To attend this public virtual meeting, please send an email with the Subject: Registration. In the body of the email, provide your full name, organization (if applicable), email address, and phone number to the Designated Federal Officer, at *info@pcscotus.gov.* Registration requests must be received by 5:00 p.m. EST, on December 3, 2021. Registrations received after this day/time may not be processed.

Public Comments. Written public comments are being accepted via *http://www.regulations.gov,* the Federal eRulemaking portal through December 15, 2021. No comments will be accepted after December 15, 2021.

To submit a written public comment, go to *http://www.regulations.gov* and search for PCSCOTUS–2021–0001. Then, click on the ''Comment'' button that shows up in the search results. Select the link ''Comment'' that corresponds with this notice. Follow the instructions provided on the screen. Please include your name, company name (if applicable), and ''PCSCOTUS–2021–0001, Notification of Upcoming Public Virtual Meeting and Request for Public Comment'' on your attached document (if applicable). Public comments meeting our public comment policy, included under **SUPPLEMENTARY INFORMATION**, will be shared on *Regulations.gov.* Comments provided by 5:00 p.m. EST, on December 3, 2021

will be provided to the Commission members in advance of the December 7 public meeting. Comments submitted after this date will still be provided to the Commission members, but please be advised that Commission members may not have adequate time to consider the comments prior to the meeting.

Special accommodations. For information on services for individuals with disabilities, or to request accommodation of a disability, please contact the Designated Federal Officer at least 10 business days prior to the meeting to give GSA as much time as possible to process the request.

FOR FURTHER INFORMATION CONTACT: For information on the public virtual meeting, contact Dana Fowler, Designated Federal Officer, Office of Government-wide Policy, General Services Administration, at *info@pcscotus.gov,* 202–501–1777.

SUPPLEMENTARY INFORMATION:

Background

The Administrator of GSA established the Commission under the Federal Advisory Committee Act on April 26, 2021 pursuant to *Executive Order 14023, Establishment of the Presidential Commission on the Supreme Court of the United States,* issued on April 9, 2021. Per the Executive Order, the Commission shall produce a report for the President that includes the following:

(i) An account of the contemporary commentary and debate about the role and operation of the Supreme Court in our constitutional system and about the functioning of the constitutional process by which the President nominates and, by and with the advice and consent of the Senate, appoints Justices to the Supreme Court;

(ii) The historical background of other periods in the Nation's history when the Supreme Court's role and the nominations and advice-and-consent process were subject to critical assessment and prompted proposals for reform; and

(iii) An analysis of the principal arguments in the contemporary public debate for and against Supreme Court reform, including an appraisal of the merits and legality of particular reform proposals.

Public Comment Policy

The Commission asks that written public comments be respectful and relevant to the work of the Commission. All comments are reviewed before they are shared with the Commission or posted online. Comments that include the following will not be shared on *Regulations.gov:*

- Vulgar, obscene, profane, threatening, or abusive language; personal attacks of any kind.
- Discriminatory language (including hate speech) based on race, national origin, age, gender, sexual orientation, religion, or disability.
- Endorsements of commercial products, services, organizations, or other entities.
- Repetitive posts (for example, if you submit the same material multiple times).
- Spam or undecipherable language (gratuitous links will be viewed as spam).
- Copyrighted material.
- Links to external sites.
- Images or videos.
- Solicitation of funds.
- Procurement-sensitive information.
- Surveys, polls, and questionnaires subject to the Office of Management and Budget Paperwork Reduction Act clearance.
- Personally Identifiable Information (PII) or Sensitive Information (SI).
- Off-topic posts.
- Media inquiries.

Thank you for your interest in the Presidential Commission on the Supreme Court of the United States. We look forward to hearing from you.

Krystal J. Brumfield,

Associate Administrator, Office of Government-wide Policy.

[FR Doc. 2021–25315 Filed 11–18–21; 8:45 am]

BILLING CODE 6820–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC–2021–0106; NIOSH–344]

Interventions To Prevent Work-Related Stress and Support Health Worker Mental Health; Request for Information; Extension of Public Comment Period.

AGENCY: Centers for Disease Control and Prevention, HHS.

ACTION: Extension of public comment period.

SUMMARY: On September 27, 2021, the National Institute for Occupational Safety and Health (NIOSH), within the Centers for Disease Control and Prevention (CDC), in the Department of Health and Human Services (HHS), published a notice announcing an opportunity for the public to provide information and comments on current evidence-based, workplace and occupational safety and health interventions to prevent work-associated stress, support stress reduction, and foster positive mental health and well-being among the nation's health workers. Written and electronic comments were to be received on or before November 26, 2021. NIOSH has decided to extend the comment period to January 25, 2022.

DATES: Comments must be received on or before January 25, 2022.

ADDRESSES: Comments may be submitted through either of the following two methods:

- *Federal eRulemaking Portal: http://www.regulations.gov* (follow the instructions for submitting comments), or
- *By Mail:* NIOSH Docket Office, Robert A. Taft Laboratories, MS C–34, 1090 Tusculum Avenue, Cincinnati, Ohio 45226–1998.

Instructions: All written submissions received in response to this notice must include the agency name (Centers for Disease Control and Prevention, HHS) and docket number (CDC–2021–0106; NIOSH–344) for this action. All relevant comments, including any personal information provided, will be posted without change to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Rachel Weiss, Program Analyst; 1090 Tusculum Ave., MS: C–48, Cincinnati, OH 45226; telephone (855) 818–1629 (this is a toll-free number); email *NIOSHregs@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the American Rescue Plan Act of 2021 (Pub. L. 117–2, sec. 2704), CDC is charged with educating health workers and first responders on primary prevention of mental health conditions and substance use disorders and encouraging these professionals to identify and seek support for their own mental health or substance use concerns. Accordingly, on September 27, 2021, CDC's National Institute for Occupational Safety and Health (NIOSH) announced an opportunity for the public to provide information and comments on evidence-based workplace and occupational safety and health interventions, policies, or other activities relevant to health care professionals and first responders, including those at the population, organizational, or individual levels (86 FR 53306). Information and comments were requested on related interventions under development and research in progress. NIOSH also sought information on related best practices, promising practices, or successful programs related to providing stress prevention and mental health services

to health workers. The September 27, 2021 request for information is available in docket CDC–2021–0106, which can be found by searching *www.regulations.gov.*

NIOSH believes it is appropriate to allow additional time for public comment. Accordingly, the public comment period for the request for information is extended to January 25, 2022.

John J. Howard,

Administrator, World Trade Center Health Program and Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC–2021–0125]

Advisory Committee on Immunization Practices (ACIP)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting and request for comment.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC) announces the following meeting of the Advisory Committee on Immunization Practices (ACIP). This meeting is open to the public. Time will be available for public comment. The meeting will be webcast live via the World Wide Web.

DATES: The meeting will be held on November 19, 2021, from 12:00 p.m. to 3:00 p.m., EST (times subject to change). The public may submit written comments from November 19, 2021 through November 22, 2021.

ADDRESSES: You may submit comments identified by Docket No. CDC–2021–0125 by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H24–8, Atlanta, Georgia 30329–4027, Attn: ACIP Meeting.

Instructions: All submissions received must include the Agency name and Docket Number. All relevant comments received in conformance with the *https://www.regulations.gov* suitability policy will be posted without change to *https://www.regulations.gov,* including any personal information provided. For access to the docket to read background documents or comments received, go to *https://www.regulations.gov.*

Written public comments submitted up to 72 hours prior to the ACIP meeting will be provided to ACIP members before the meeting.

FOR FURTHER INFORMATION CONTACT: Stephanie Thomas, ACIP Committee Management Specialist, Centers for Disease Control and Prevention, National Center for Immunization and Respiratory Diseases, 1600 Clifton Road NE, MS–H24–8, Atlanta, Georgia 30329–4027; Telephone: (404) 639–8367; Email: *ACIP@cdc.gov.*

SUPPLEMENTARY INFORMATION: In accordance with 41 CFR 102–3.150(b), less than 15 calendar days' notice is being given for this meeting due to the exceptional circumstances of the COVID–19 pandemic and rapidly evolving COVID–19 vaccine development and regulatory processes. The Secretary of Health and Human Services has determined that COVID–19 is a Public Health Emergency. A notice of this ACIP meeting has also been posted on CDC's ACIP website at: *http://www.cdc.gov/vaccines/acip/index.html.* In addition, CDC has sent notice of this ACIP meeting by email to those who subscribe to receive email updates about ACIP.

Purpose: The committee is charged with advising the Director, CDC, on the use of immunizing agents. In addition, under 42 U.S.C. 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children program, along with schedules regarding dosing interval, dosage, and contraindications to administration of vaccines. Further, under provisions of the Affordable Care Act, section 2713 of the Public Health Service Act, immunization recommendations of the ACIP that have been approved by the CDC Director and appear on CDC immunization schedules must be covered by applicable health plans.

Matters to be Considered: The agenda will include discussions on COVID–19 vaccine booster doses. A vote on COVID–19 booster doses is scheduled. Agenda items are subject to change as priorities dictate. For more information on the meeting agenda visit *https://www.cdc.gov/vaccines/acip/meetings/meetings-info.html.*

Public Participation

Interested persons or organizations are invited to participate by submitting written views, recommendations, and data. Please note that comments received, including attachments and other supporting materials, are part of the public record and are subject to public disclosure. Comments will be posted on *https://www.regulations.gov.* Therefore, do not include any information in your comment or

supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate/near duplicate examples of a mass-mail campaign. CDC will carefully consider all comments submitted into the docket.

Written Public Comment: The docket will be opened to receive written comments on November 19, 2021. Written comments must be received on or before November 22, 2021.

Oral Public Comment: This meeting will include time for members of the public to make an oral comment. Oral public comment will occur before any scheduled votes including all votes relevant to the ACIP's Affordable Care Act and Vaccines for Children Program roles. Priority will be given to individuals who submit a request to make an oral public comment before the meeting according to the procedures below.

Procedure for Oral Public Comment: All persons interested in making an oral public comment at the November 19, 2021 ACIP meeting must submit a request at *http://www.cdc.gov/vaccines/acip/meetings/* no later than 11:59 p.m., EST, November 18, 2021, according to the instructions provided.

If the number of persons requesting to speak is greater than can be reasonably accommodated during the scheduled time, CDC will conduct a lottery to determine the speakers for the scheduled public comment session. CDC staff will notify individuals regarding their request to speak by email by 9:00 a.m., EST, on November 19, 2021. To accommodate the significant interest in participation in the oral public comment session of ACIP meetings, each speaker will be limited to 3 minutes, and each speaker may only speak once per meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10157]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 18, 2022.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10157—The HIPAA Eligibility Transaction System (HETS)

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* The HIPAA Eligibility Transaction System (HETS); *Use:* CMS created the HETS application to provide Health Insurance Portability and Accountability Act of 1996 (HIPAA) compliant 270/271 health care

eligibility inquiries (270) and responses (271) on a real-time basis. In creating the HETS application, federal law requires that CMS take precautions to minimize the security risk to federal information systems. Accordingly, CMS is requiring that trading partners who wish to connect to the HETS 270/271 application via the CMS Extranet and/or internet agree to specific trading partner terms as a condition of receiving access to Medicare eligibility information. Applicants will complete the entire Trading Partner Agreement form to indicate agreement with CMS trading partner terms and provide sufficient information to establish connectivity to the service and assure that those entities that access the Medicare eligibility information are aware of applicable provisions and penalties for the misuse of information.

CMS uses the Trading Partner Agreement Form to capture certain information whereby a person certifies that they are fully aware of any and all penalties related to the use of PHI and their access to this data from the HETS application. The information is an attestation by the authorized representative of an entity that wishes to access the Medicare eligibility information to conduct real-time eligibility transactions. The authorized representative is a person responsible for business decisions on behalf of the Organization who is submitting the access request. The data captured includes the authorized representative's name, title contact number and the name of the submitting entity. Other data captured is the submitter's National Provider Identifier (NPI), business name, billing address, physical address, and telephone number. *Form Number:* CMS–10157 (OMB control number: 0938–0960); *Frequency:* Annually; *Affected Public:* Private Sector, Businesses or other for-profits; *Number of Respondents:* 1,000; *Total Annual Responses:* 1,000; *Total Annual Hours:* 250. (For policy questions regarding this collection contact Rupinder Singh at 410–786–7484.)

Dated: November 16, 2021.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10341 and CMS–10653]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by December 20, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Section 1115 Demonstration Projects Regulations at 42 CFR 431.408, 431.412, 431.420, 431.424, and 431.428; *Use:* This collection is necessary to ensure that states comply with regulatory and statutory requirements related to the development, implementation and evaluation of demonstration projects. States seeking waiver authority under Section 1115 are required to meet certain requirements for public notice, the evaluation of demonstration projects, and reports to the Secretary on the implementation of approved demonstrations. *Form Number:* CMS–10341 (OMB control number: 0938–1162); *Frequency:* Yearly and quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 48; *Total Annual Responses:* 403; *Total Annual Hours:* 41,847. (For policy questions regarding this collection contact Tonya Moore at 410–786–0019.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Coverage of Certain Preventive Services Under the Affordable Care Act; *Use:* The 2018 final regulations titled ''Religious Exemptions and Accommodations for Coverage of Certain Preventive Services Under the Affordable Care Act'' (83 FR 57536) and ''Moral Exemptions and Accommodations for Coverage of Certain Preventive Services Under the

Affordable Care Act'' (83 FR 57592) expand exemptions for religious beliefs and moral convictions for certain entities or individuals whose health plans may otherwise be subject to a mandate of contraceptive coverage through guidance issued pursuant to the Patient Protection and Affordable Care Act. The final regulations extend the exemption to health insurance issuers that hold religious or moral objections in certain circumstances, as well as to additional categories of group health plan sponsors.

The 2018 final regulations also leave the accommodation process in place as an optional process for objecting entities who wish to use it, and expand the categories of group health plan sponsors that may avail themselves of the accommodation. To avoid contracting, arranging, paying, or referring for contraceptive coverage, an organization seeking to be treated as an eligible organization may self-certify (by using EBSA Form 700), prior to the beginning of the first plan year to which an accommodation is to apply, that it meets the definition of an eligible organization. The eligible organization must provide a copy of its self-certification to each health insurance issuer that would otherwise provide such coverage in connection with the health plan (for insured group health plans or student health insurance coverage). The issuer that receives the self-certification must provide separate payments for contraceptive services for plan participants and beneficiaries (or students and dependents). For a self-insured group health plan, the self-certification must be provided to its third party administrator. An eligible organization may submit a notification to HHS as an alternative to submitting EBSA Form 700 to the eligible organization's health insurance issuer or third party administrator. A health insurance issuer or third party administrator providing or arranging payments for contraceptive services for participants and beneficiaries in plans (or student enrollees and covered dependents in student health insurance coverage) of eligible organizations must provide a written notice to such plan participants and beneficiaries (or such student enrollees and covered dependents) informing them of the availability of such payments.

Under the 2018 final regulations, eligible organizations can revoke the accommodation process if participants and beneficiaries (or student enrollees and covered dependents) receive written notice of such revocation from the issuer or third party administrator, and such revocation will be effective on the first day of the first plan year that begins on or after thirty days after the date of revocation. Final regulations were published in the **Federal Register** on July 14, 2015 (80 FR 41318) under which qualifying closely held, for-profit entities may avail themselves of the accommodation. Previously, this accommodation had been available only to non-profit eligible organizations. The 2015 final regulations also finalized the 2014 interim final regulations that permit an eligible organization to notify HHS directly that it will not contract, arrange, pay, or refer for all or a subset of contraceptive services. These information collection requirements (ICRs) are intended for use under whichever accommodation process is in effect at the time an entity avails of it (for example, the 2018 final regulations, or the 2015 final regulations). HHS will only implement the ICRs under regulations that are legally in effect at the time the ICRs are used. *Form Number:* CMS–10653 (OMB Control number 0938–1344); *Frequency:* On Occasion; *Affected Public:* Private Sector; *Number of Respondents:* 60; *Number of Responses:* 595,312; *Total Annual Hours:* 72. (For policy questions regarding this collection, contact Usree Bandyopadhyay at 410–786–6650.)

Dated: November 16, 2021.

William N. Parham, III,

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2009–D–0268]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Labeling of Certain Beers Subject to the Labeling Jurisdiction of the Food and Drug Administration

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by December 20, 2021.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0728. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Ila S. Mizrachi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–7726, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Labeling of Certain Beers Subject to the Labeling Jurisdiction of the Food and Drug Administration

OMB Control Number 0910–0728—Extension

The definition of ''food'' under the Federal Food, Drug, and Cosmetic Act (FD&C Act (21 U.S.C. 321(f))) includes ''articles used for food or drink'' and thus includes alcoholic beverages. As such, alcoholic beverages are subject to the FD&C Act's adulteration and misbranding provisions and implementing regulations related to food. For example, manufacturers of alcoholic beverages are responsible for adhering to the registration of food facilities requirements in 21 CFR part 1 and to the good manufacturing practice regulations in 21 CFR part 110. There are also certain requirements for nutrition labeling on menus, menu boards, and other written materials for alcohol beverages served in restaurants or similar retail food establishments in 21 CFR part 101. However, as reflected in a 1987 Memorandum of Understanding between FDA and the Alcohol and Tobacco Tax and Trade Bureau (TTB), TTB is responsible for the dissemination and enforcement of regulations with respect to the labeling of distilled spirits, certain wines, and malt beverages issued in the Federal Alcohol Administration Act (the FAA Act). In TTB Ruling 2008–3, dated July 7, 2008, TTB clarified that certain beers, which are not made from both malted

barley and hops but are instead made from substitutes for malted barley (such as sorghum, rice, or wheat) or are made without hops, do not meet the definition of a ''malt beverage'' under the FAA Act. Accordingly, TTB stated in its ruling that such products (other than saké, which is classified as a wine under the FAA Act), are not subject to the labeling, advertising, or other provisions of TTB regulations issued under the FAA Act.

In cases where an alcoholic beverage is not covered by the labeling provisions of the FAA Act, the product is subject to ingredient and other labeling requirements under the FD&C Act and the implementing regulations that we administer. In addition, as provided for under the Fair Packaging and Labeling Act (FPLA), alcoholic beverages that are not covered by the labeling provisions of the FAA Act are subject to the provisions of the FPLA, which we administer.

Therefore, the beers described in TTB's ruling as not being a ''malt beverage'' are subject to the labeling requirements under the FD&C Act and FPLA, and our implementing regulations. In general, we require that food products under our jurisdiction be truthfully and informatively labeled in accordance with the FD&C Act, the FPLA, and FDA's regulations. Furthermore, some TTB labeling requirements, such as the Government Health Warning Statement under the Alcoholic Beverage Labeling Act and certain marking requirements under the Internal Revenue Code, continue to apply to these products.

Persons with access to the internet may obtain the guidance entitled ''Labeling of Certain Beers Subject to the Labeling Jurisdiction of the Food and Drug Administration,'' located at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/guidance-industry-labeling-certain-beers-subject-labeling-jurisdiction-food-and-drug-administration.* This guidance is intended to assist manufacturers on how to label bottled or otherwise packaged beers that are subject to our labeling laws and regulations.

Our food labeling regulations under parts 101, 102, 104, and 105 (21 CFR parts 101, 102, 104, and 105) were issued under the authority of sections 4, 5, and 6 of the FPLA (15 U.S.C. 1453, 1454, and 1455) and under sections 201, 301, 402, 403, 409, 411, 701, and 721 of the FD&C Act (21 U.S.C. 321, 331, 342, 343, 348, 350, 371, and 379e). Most of these regulations derive from section 403 of the FD&C Act, which provides that a food product shall be deemed to be misbranded if, among other things, its label or labeling fails to bear certain required information concerning the food product, is false or misleading in any particular, or bears certain types of unauthorized claims. The disclosure requirements and other collections of information in the regulations in parts 101, 102, 104, and 105 are necessary to ensure that food products produced or sold in the United States are in compliance with the labeling provisions of the FD&C Act and the FPLA.

The primary user of the information to be disclosed on the label or labeling of food products is the consumer that purchases the food product. Consumers will use the information to assist them in making choices concerning their purchase of a food product, including choices related to substances that the consumer must avoid to prevent adverse reactions. This information also enables the consumer to determine the role of the food product in a healthful diet. Additionally, FDA intends to use the information to determine whether a manufacturer or other supplier of food products is meeting its statutory and regulatory obligations. Failure of a manufacturer or other supplier of food products to label its products in compliance with section 403 of the FD&C Act and parts 101, 102, 104, and 105 of FDA's food labeling regulations may result in a product being misbranded under the FD&C Act, subjecting the firm and product to regulatory action.

Description of Respondents: The respondents to this collection of information are manufacturers of beers that are subject to our labeling laws and regulations.

In the **Federal Register** of May 21, 2021 (86 FR 27631), FDA published a 60-day notice requesting public comment on the proposed collection of information. We received two comments pertaining to the necessity and practical utility of the information being collected and the accuracy of our burden estimate.

(Comment 1) One comment questioned the necessity and practical utility of treating beer as a ''food'' making it subject to food labeling regulations. A related comment questioned the need to label beer at all.

(Response) As stated in the guidance as well in the above-referenced 60-day notice, the definition of ''food'' under the FD&C Act (see 21 U.S.C. 321(f)), includes ''articles used for food or drink'' and thus includes alcoholic beverages. In cases where an alcoholic beverage is not covered by the labeling provisions of the FAA Act, the product is subject to ingredient and other labeling requirements under the FD&C Act and the implementing regulations that are administered by FDA. In addition, as provided for under the FPLA, alcoholic beverages that are not covered by the labeling provisions of the FAA Act are subject to the provisions of the FPLA, which is administered by FDA.

Therefore, the beers described in the TTB's Ruling as not being a ''malt beverage'' are subject to the labeling requirements under the FD&C Act and FPLA, and FDA's implementing regulations. In general, FDA requires that food products under its jurisdiction be truthfully and informatively labeled in accordance with the FD&C Act, the FPLA, and FDA's regulations.

The primary user of the information to be disclosed on the label or labeling of food products is the consumer that purchases the food product. Consumers will use the information to assist them in making choices concerning their purchase of a food product, including choices related to substances that the consumer must avoid to prevent adverse reactions. This information also enables the consumer to determine the role of the food product in a healthful diet.

(Comment 2) One comment argued that the burden estimate underestimated the number of respondents affected by this collection.

(Response) This collection of information applies to alcoholic beverages not covered by the labeling provisions of the FAA Act. Our estimate of the number of respondents is based on the number of regulatory submissions to TTB for beers that do not meet the definition of a ''malt beverage'' under the FAA Act. Based on its records of submissions received from manufacturers of such products, TTB estimates the annual number of respondents to be 12.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN [1]

21 CFR section; activity	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
101.3 and 101.22; statement of identity labeling requirements	12	2	24	0.5 (30 minutes)	12
101.4; ingredient labeling requirements	12	2	24	1	24
101.5; requirement to specify the name and place of business of the manufacturer, packer, or distributor.	12	2	24	0.25 (15 minutes)	6
101.9; labeling requirements for disclosure of nutrition information	12	2	24	4	96
101.7; declaration of net quantity of contents	12	2	24	0.5 (30 minutes)	12
Section 403(w)(1) of the FD&C Act; declaration of food allergens	12	2	24	1	24
Guidance document entitled ''Labeling of Certain Beers Subject to the Labeling Jurisdiction of the Food and Drug Administration''.	12	1	12	1	12
Total					186

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate. Our estimate of the number of respondents is based on the number of regulatory submissions to TTB for beers that do not meet the definition of a ''malt beverage'' under the FAA Act. Based on its records of submissions received from manufacturers of such products, TTB estimates the annual number of respondents to be 12 and the annual number of disclosures to be 24.

Our estimates of the average burden per disclosure for each collection provision are based on our experience with food labeling under the Agency's jurisdiction. The estimated average burden per disclosure for §§ 101.3, 101.4, 101.5, 101.9, 101.22, and 101.7 (21 CFR 101.3, 101.4, 101.5, 101.9, 101.22, and 101.7) are equal to, and based upon, the estimated average burden per disclosure approved by OMB control number 0910–0381. We further estimate that the labeling burden of section 403(w)(1) of the FD&C Act, which specifies requirements for the declaration of food allergens, will be 1 hour based upon the similarity of the requirements to that of § 101.4. Finally, we estimate that a respondent will spend 1 hour reading the guidance.

The guidance also refers to previously approved collections of information found in our regulations. The collections of information in §§ 101.3, 101.4, 101.5, 101.9, 101.22, and 101.7 have been approved under OMB control number 0910–0381. Allergen labeling of these beers under section 403(w)(1) of the FD&C Act, which was added by the Food Allergen Labeling and Consumer Protection Act of 2004, has been approved under OMB control number 0910–0792.

Dated: November 15, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2021–N–1192]

Agency Information Collection Activities; Proposed Collection; Comment Request; Substances Generally Recognized as Safe: Notification Procedure

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection associated with provisions of the notification procedure for substances generally recognized as safe (GRAS).

DATES: Submit either electronic or written comments on the collection of information by January 18, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 18, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 18, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as

well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2021–N–1192 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Substances Generally Recognized as Safe: Notification Procedure.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Ila S. Mizrachi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–7726, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Substances Generally Recognized as Safe: Notification Procedure—21 CFR 170, Subpart E and 21 CFR 570, Subpart E

OMB Control Number 0910–0342—Extension

The Federal Food, Drug, and Cosmetic Act (FD&C Act) requires that all food additives (as defined by section 201(s) (21 U.S.C. 321(s)) be approved by FDA before they are marketed. Section 409 of the FD&C Act (21 U.S.C. 348) establishes a premarket approval requirement for ''food additives.'' Section 201(s) of the FD&C Act provides an exclusion to the definition of food additive and thus from the premarket approval requirement, for uses of substances that are GRAS by qualified experts. The GRAS provision of section 201(s) of the FD&C Act is implemented in 21 CFR part 170 (part 170) and 21 CFR part 570 (part 570) for human food and animal food, respectively. Part 170, subpart E and part 570, subpart E provide a standard format for the submission of a notice. This collection utilizes a voluntary administrative procedure for notifying FDA about a conclusion that a substance is GRAS under the conditions of its intended use in human food or animal food. The information submitted to us in a GRAS notice is necessary to allow us to administer efficiently the FD&C Act's various provisions that apply to the use of substances added to food, specifically with regard to whether a substance is GRAS under the conditions of its intended use or is a food additive subject to premarket review. We use the information collected through the GRAS notification procedures to complete our evaluation within specific timelines.

To assist respondents with submissions to the Center for Food Safety and Applied Nutrition, we offer Form FDA 3667 entitled ''Generally Recognized as Safe Notice'' (*http://www.fda.gov/downloads/AboutFDA/ReportsManualsForms/Forms/UCM350015.pdf*). The form, and elements prepared as attachments to the form, may be submitted in electronic format via the Electronic Submission Gateway (*https://www.fda.gov/industry/electronic-submissions-gateway*), or may be submitted in paper format, or as electronic files on physical media with paper signature page. While we do not expect Form FDA 3667 to reduce reporting time for respondents, use of the form helps to expedite our review of the information being submitted. For submissions to the Center for Veterinary Medicine, respondents may continue to send GRAS notices in letter format to the Agency, as instructed in the **Federal Register** of June 4, 2010 (75 FR 31800).

Description of Respondents: The respondents to this collection of information are manufacturers of substances used in human food and animal food and feed.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity; 21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
GRAS notification procedure for human food; 170.210–170.280 (part 170, subpart E)	100	1	100	170	17,000
GRAS notification procedure for animal food and animal feed; 570.210–570.280 (part 570, subpart E)	25	1	25	170	4,250
Total			125		21,250

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate. This estimate is based on our experience with this information collection and the number of notifications received in the past 3 years, which has remained constant.

Dated: November 15, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

[FR Doc. 2021–25302 Filed 11–18–21; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–3404]

Agency Information Collection Activities; Proposed Collection; Comment Request; Generic Drug User Fee Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information including each proposed extension of an existing collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection associated with FDA's Generic Drug User Fee Program.

DATES: Submit either electronic or written comments on the collection of information by January 18, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 18, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 18, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–3404 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Generic Drug User Fee Program.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://*

www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information including each proposed extension of an existing collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Generic Drug User Fee Program

OMB Control Number 0910–0727—Revision

This information collection supports implementation of FDA's Generic Drug User Fee program. The Generic Drug User Fee Amendments (GDUFA) (Pub. L. 112–144, Title 111) were enacted to speed the delivery of safe and effective generic drugs to the public and reduce costs to industry. GDUFA authorizes FDA to assess user fees to fund critical and measurable enhancements to the performance of FDA's generic drugs program, bringing greater predictability and timeliness to the review of generic drug applications. GDUFA is currently authorized through September 30, 2022, with reauthorization activities currently underway. For more information regarding GDUFA and ongoing implementation, we invite you to visit our website at *https://www.fda.gov/industry/fda-user-fee-programs/generic-drug-user-fee-amendments.*

GDUFA is based on an agreement negotiated by FDA and representatives of the generic drug industry intended to address continuing regulatory challenges. GDUFA reflects input received during an open process that includes regular public meetings, posting of meeting minutes, and consideration of comments from a public docket. We are revising the information collection to include the current GDUFA agreement, or ''goals letter,'' as reflected in the document ''GDUFA Reauthorization Performance Goals and Program Enhancements Fiscal Years 2018–2022,'' available for download from our website at *https://www.fda.gov/media/101052/download.* The performance goals and program enhancements specified in the goals letter apply to aspects of the generic drug review program that are important for facilitating timely access to quality, affordable generic medicines. FDA is committed to meeting the performance goals specified in the goals letter and to continuous improvement of its performance.

Included among the performance goals is the issuance of topic-specific guidance documents. We maintain a searchable guidance database on our website at *https://www.fda.gov/regulatory-information/search-fda-guidance-document.* In publishing the respective notices of availability for each guidance document, we include an analysis under the PRA and invite public comment on the associated information collection recommendations. In addition, all Agency guidance documents are issued in accordance with our Good Guidance Practice regulations in 21 CFR 10.115, which provide for public comment at any time.

We have developed Form FDA 3794, the Generic Drug User Fee Cover Sheet, available at *https://www.ipqpubs.com/wp-content/uploads/2012/09/GDUFA-cover-sheet.pdf,* which requests the minimum necessary information from generic drug applicants to account for and track user fees and to determine the amount of the fee required. Applicants complete and submit the cover sheets to accompany payments. While applicants may submit payment through multiple means, all cover sheets are prepared using FDA's web-based electronic User Fee System. Upon submitting the completed cover sheet, the User Fee System generates a user fee identification number, which is provided to applicants at the bottom of the cover sheet. It also notes the correct fiscal year user fee assessment that is due for the submission or program. FDA requests that applicants submit a copy of this completed cover sheet along with the abbreviated new drug application, as well as other additional GDUFA fees, so FDA can verify that the applicant has paid the correct user fee and their account is current.

Respondents to the information collection are potential or actual generic drug application holders or related active pharmaceutical ingredient and finished dosage form manufacturers. Companies with multiple user fee obligations may submit a cover sheet for each user fee obligation.

We estimate the burden of the information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN[1]

Form FDA 3794	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Generic Drug User Fee Cover Sheet	500	7.616	3,808	0.5 (30 minutes)	1,904

[1] There are no capital costs or operating and maintenance costs associated with this collection of information

Based on a review of the information collection, we have retained the currently approved burden estimate.

Dated: November 12, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–E–5389]

Determination of Regulatory Review Period for Purposes of Patent Extension; SUNOSI

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for SUNOSI and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 18, 2022. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 18, 2022. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 18, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 18, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2019–E–5389 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; SUNOSI.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biologic product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, SUNOSI (solriamfetol hydrochloride) indicated to improve wakefulness in adult patients with excessive daytime sleepiness associated with narcolepsy or obstructive sleep apnea. Subsequent to this approval, the USPTO received a patent term restoration application for SUNOSI (U.S. Patent No. 8,440,715) from JAZZ Pharmaceutials, Inc. and the USPTO requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated December 26, 2019, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of SUNOSI represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for SUNOSI is 8,209 days. Of this time, 7,664 days occurred during the testing phase of the regulatory review period, while 545 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* December 27, 1996. The applicant claims that December 17, 2009, is the date the investigational new drug application (IND) 107203 became effective. However, FDA's records indicate that the effective date was December 27, 1996, which was 30 days after FDA receipt of the applicant's earlier IND 52082.

2. *The date the application was initially submitted with respect to the human drug product under section 505 of the FD&C Act:* December 20, 2017. FDA has verified the applicant's claim that the new drug application (NDA) for SUNOSI (NDA 211230) was initially submitted on December 20, 2017.

3. *The date the application was approved or the date of issuance of the interim final rule controlling the drug under section 201(j) of the Controlled Substances Act:* June 17, 2019. FDA has verified the applicant's claim that NDA 211230 was approved on March 20, 2019, and that the Drug Enforcement Administration issued an interim final rule controlling the product on June 17, 2019.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 1,386 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 15, 2021.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–3031]

Agency Information Collection Activities; Proposed Collection; Comment Request; Tobacco Products, User Fees, Requirements for the Submission of Data Needed To Calculate User Fees for Domestic Manufacturers and Importers of Tobacco Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on Tobacco Products, User Fees, Requirements for the Submission of Data Needed to Calculate User Fees for Domestic Manufacturers and Importers of Tobacco Products.

DATES: Submit either electronic or written comments on the collection of information by January 18, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 18, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 18, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the

instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–3031 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Tobacco Products, User Fees, Requirements for the Submission of Data Needed to Calculate User Fees for Domestic Manufacturers and Importers of Tobacco Products.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10 a.m.–12 p.m., 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Tobacco Products, User Fees, Requirements for the Submission of Data Needed To Calculate User Fees for Domestic Manufacturers and Importers of Tobacco Products

OMB Control Number 0910–0749—Extension

On June 22, 2009, the Family Smoking Prevention and Tobacco Control Act (the Tobacco Control Act) (Pub. L. 111–31) was signed into law. The Tobacco Control Act amended the Federal Food, Drug, and Cosmetic Act (FD&C Act) and granted FDA authority to regulate the manufacture, marketing, and distribution of tobacco products to protect public health generally and to reduce tobacco use by minors.

FDA issued a final rule on May 10, 2016 (81 FR 28707) that requires domestic manufacturers and importers of cigars and pipe tobacco to submit information needed to calculate the amount of user fees assessed under the FD&C Act (*https://www.govinfo.gov/content/pkg/FR-2016-05-10/pdf/2016-10688.pdf*). FDA expanded its authority over tobacco products by issuing another final rule entitled ''Deeming Tobacco Products To Be Subject to the Federal Food, Drug, and Cosmetic Act, as Amended by the Family Smoking Prevention and Tobacco Control Act; Restrictions on the Sale and Distribution of Tobacco Products and Required Warning Statements for Tobacco Products'' (Deeming rule; May 10, 2016, 81 FR 28974), deeming all products that meet the statutory definition of ''tobacco product,'' except accessories of the newly deemed tobacco products, to be subject to the FD&C Act (*https://www.govinfo.gov/content/pkg/FR-2016-05-10/pdf/2016-10685.pdf*). The Deeming rule, among other things,

subjected domestic manufacturers and importers of cigars and pipe tobacco to the FD&C Act's user fee requirements. Consistent with the Deeming rule and the requirements of the FD&C Act, the user fee final rule requires the submission of the information needed to calculate user fee assessments for each manufacturer and importer of cigars and pipe tobacco to FDA.

As noted, FDA issued a final rule that requires domestic tobacco product manufacturers and importers to submit information needed to calculate the amount of user fees assessed under the FD&C Act. The U.S. Department of Agriculture (USDA) had been collecting this information and provided FDA with the data the Agency needed to calculate the amount of user fees assessed to tobacco product manufacturers and importers. USDA ceased collecting this information in fiscal year 2015 (October 2014). USDA's information collection did not require OMB approval, per an exemption by Public Law 108–357, section 642(b)(3). Consistent with the requirements of the FD&C Act, FDA requires the submission of this information to FDA now instead of USDA. FDA took this action to ensure that the Agency continues to have the information needed to calculate, assess, and collect user fees from domestic manufacturers and importers of tobacco products.

Section 919(a) of the FD&C Act (21 U.S.C. 387s(a)) requires FDA to ''assess user fees on, and collect such fees from, each manufacturer and importer of tobacco products'' subject to the tobacco product provisions of the FD&C Act (chapter IX of the FD&C Act). The total amount of user fees to be collected for each fiscal year is specified in section 919(b)(1) of the FD&C Act, and under section 919(a) FDA is to assess and collect a proportionate amount each quarter of the fiscal year. The FD&C Act provides for the total assessment to be allocated among the classes of tobacco products. The class allocation is based on each tobacco product class' volume of tobacco product removed into commerce. Within each class of tobacco products, an individual domestic manufacturer or importer is assessed a user fee based on its share of the market for that tobacco product class.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
1150.5(a), (b)(1), and (b)(2), and Form FDA 3852; General identifying information provided by manufacturers and importers of FDA regulated tobacco products and identification and removal information (monthly)	711	12	8,532	3	25,596
1150.5(b)(3); Certified copies (monthly)	711	12	8,532	1	8,532
1150.13; Submission of user fee information (identifying information, fee amount, etc.) (quarterly)	355	4	1,420	1	1,420
1150.15(a); Submission of user fee dispute (annually)	5	1	5	10	50
1150.15(d); Submission of request for further review of dispute of user fee (annually)	3	1	3	10	30
Total					35,628

[1]There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA estimates that 711 entities will submit tobacco product user fees. The entity count was derived from aggregate data provided by the Alcohol and Tobacco Tax and Trade Bureau (TTB) and reflects that in 2021 there were 233 total permitted manufacturers and 478 permitted importers over all tobacco product types for which TTB assesses excise taxes (including cigarettes, cigars, snuff, chewing tobacco, pipe tobacco, and roll-your-own tobacco).

The estimate of 711 respondents to provide the information requested from § 1150.5(a), (b)(1), and (b)(2) (21 CFR 1150.5(a), (b)(1), and (b)(2)), and Form FDA 3852 reflects both reports of no removal of tobacco products into domestic commerce and reports of removal of tobacco product into domestic commerce. FDA estimates it will take 3 hours for each of these submission types for a total of 25,596 hours. Under § 1150.5(b)(3), these respondents are also expected to provide monthly certified copies of the returns and forms that relate to the removal of tobacco products into domestic commerce and the payment of Federal excise taxes imposed under chapter 52 of the Internal Revenue Code of 1986 to FDA. We estimate that each monthly report will take 1 hour for a total of 8,532 hours. The estimate of 355 respondents to submit payment of user fee information under § 1150.13 (21 CFR 1150.13) reflects an average of half the number of domestic manufacturers and importers who may be subject to fees each fiscal quarter. FDA estimates the quarterly submission will take approximately 1 hour for a total of 1,420 hours.

FDA estimates that five of those respondents assessed user fees will dispute the amounts under § 1150.15(a) (21 CFR 1150.15(a)), for a total amount of 50 hours. FDA also estimates that three respondents who dispute their user fees will ask for further review by FDA under § 1150.15(d), for a total amount of 30 hours. FDA has received nine dispute submissions since fiscal year 2015. Based on this data, the Agency does not believe we will receive more than five disputes and three requests for further reviews in the next 3 years.

FDA estimates the total annual burden for this collection of information is 35,628 hours. The estimated burden for the information collection reflects an overall increase of 2,648 hours. We attribute this adjustment to an increase in the number of entities submitting tobacco user fee information to FDA.

Dated: November 12, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA–2012–N–1021]

Notice to Public of Website Location of Center for Devices and Radiological Health Fiscal Year 2022 Proposed Guidance Development

Correction

In notice document 2021–23392, appearing on pages 59399 through 59401 in the issue of Wednesday, October 27, 2021, make the following correction:

On page 59399, in the second column, in the **DATES** section, on the second and third lines, ''November 26, 2021'' should read, ''December 27, 2021''.

BILLING CODE 0099–10–D

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Infant and Maternal Mortality (Formerly the Advisory Committee on Infant Mortality)

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces that the Advisory Committee on Infant and Maternal Mortality (ACIMM) has scheduled a public meeting. Information about ACIMM and the agenda for this meeting can be found on the ACIMM website at *https://www.hrsa.gov/advisory-committees/infant-mortality/index.html.*

DATES: December 14, 2021, 12:00 p.m.–4:00 p.m. Eastern Time and December 15, 2021, 12:00 p.m.–4:00 p.m. Eastern Time.

ADDRESSES: This meeting will be held via webinar. *The webinar link and log-in information will be available at the ACIMM website before the meeting: https://www.hrsa.gov/advisory-committees/infant-mortality/index.html.*

FOR FURTHER INFORMATION CONTACT: Vanessa Lee, MPH, Designated Federal Official, Maternal and Child Health Bureau, HRSA, 5600 Fishers Lane, Room 18N84, Rockville, Maryland 20857; 301–443–0543; or *SACIM@hrsa.gov.*

SUPPLEMENTARY INFORMATION: ACIMM is authorized by section 222 of the Public Health Service Act (42 U.S.C. 217a), as amended. The Committee is governed by provisions of Public Law 92–463, as amended, (5 U.S.C. app. 2), which sets forth standards for the formation and use of Advisory Committees.

The ACIMM advises the Secretary of Health and Human Services (Secretary) on department activities, partnerships, policies, and programs directed at reducing infant mortality, maternal mortality and severe maternal morbidity, and improving the health status of infants and women before, during, and after pregnancy. The Committee provides advice on how to coordinate federal, state, local, tribal, and territorial governmental efforts designed to improve infant mortality, related adverse birth outcomes, and maternal health, as well as influence similar efforts in the private and voluntary sectors. The Committee provides guidance and recommendations on the policies, programs, and resources required to address the disparities and inequities in infant mortality, related adverse birth outcomes and maternal health outcomes, including maternal mortality and severe maternal morbidity. With its focus on underlying causes of the disparities and inequities seen in birth outcomes for women and infants, the Committee advises the Secretary on the health, social, economic, and environmental factors contributing to the inequities and proposes structural, policy, and/or systems level changes.

The agenda for the December 14–15, 2021, meeting is being finalized and may include the following topics: Federal program updates; COVID–19 updates; health of indigenous mothers and infants; birth defects and congenital anomalies; the impact of housing and eviction on birth outcomes; and state/community projects to improve maternal and infant health. Agenda items are subject to change as priorities dictate. Refer to the ACIMM website listed above for any updated information concerning the meeting.

Members of the public will have the opportunity to provide written or oral comments. Requests to submit a written statement or make oral comments to ACIMM should be sent to Vanessa Lee, using the email address above at least 3 business days prior to the meeting. Public participants may submit written statements in advance of the scheduled meeting by emailing *SACIM@hrsa.gov.* Oral comments will be honored in the order they are requested and may be limited as time allows.

Individuals who plan to attend and need special assistance or some reasonable accommodation should notify Vanessa Lee at the contact information listed above at least 10 business days prior to the meeting.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Extension of the Deadline for Nomination of Delegates; Center for Indigenous Innovation and Health Equity Tribal Advisory Committee; Solicitation of Nominations for Delegates

AGENCY: Office of Minority Health, Office of the Secretary, U.S. Department of Health and Human Services.

ACTION: Notice of solicitation of nominations for delegates for the Center for Indigenous Innovation and Health Equity Tribal Advisory Committee.

SUMMARY: On October 1, 2021, the U.S. Department of Health and Human Services (HHS) Office of Minority Health (OMH) published a notice in the **Federal Register** inviting nominations of qualified candidates to serve as primary and alternate delegates for the Center for Indigenous Innovation and Health Equity Tribal Advisory Committee (CIIHE TAC), including a submission deadline of October 29, 2021. This notice extends the deadline date for submission of nominations to January 7, 2022 at 11:59 p.m. EST.

DATES: Nomination letters for the CIIHE TAC must be sent to the address noted below no later than 11:59 p.m. EST on January 7, 2022.

ADDRESSES: All nominations should be emailed to: Violet Woo, Designated Federal Officer for the CIIHE TAC, at *Violet.Woo@hhs.gov.* Please use the subject line ''OMH CIIHE Tribal Advisory Committee''.

FOR FURTHER INFORMATION CONTACT: For information and guidance about the nomination process for CIIHE TAC delegates, please contact Violet Woo, Designated Federal Officer at *Violet.Woo@hhs.gov.* CIIHE TAC nomination guidance and sample nomination letters also are available on the OMH website's Tribal Leader Letters section: *https://www.minorityhealth.hhs.gov/omh/browse.aspx?lvl=3&lvlid=62#tribal-leader-letters.*

SUPPLEMENTARY INFORMATION: On October 1, 2021, the notice of solicitation of nominations for delegates for the CIIHE TAC was published in the **Federal Register** (86 FR 54462: Available at *https://www.federalregister.gov/documents/2021/10/01/2021-21253/center-for-indigenous-innovation-and-health-equity-tribal-advisory-committee-solicitation-of*). The deadline for submission of nomination letters is being extended to January 7, 2022.

Note: All information in the notice of solicitation of nominations for delegates for the Center for Indigenous Innovation and Health Equity Tribal Advisory Committee remain the same, except for the deadline for the submission of nominations and the date the nominees will be notified of the status of delegate selection.

Authorized under Section 1707 of the Public Health Service Act, 42 U.S.C. 300u–6, as amended, the mission of OMH is to improve the health of racial and ethnic minority populations through the development of health policies and programs that help eliminate health disparities. OMH awards and other activities are intended to support the identification of effective policies, programs, and practices for improving health outcomes and to promote the sustainability and dissemination of these approaches.

Under the authority of Public Law 116–260 (2021 Consolidated Appropriations Act), Congress directed OMH to create a CIIHE to support research, education, service, and policy development advancing Indigenous solutions that ultimately address health disparities in American Indian/Alaska Native (AI/AN) and Native Hawaiian and Pacific Islander (NHPI) populations. OMH is establishing the CIIHE TAC to ensure that Tribal Leaders have meaningful and timely input in the development of the priorities and activities established to address the focus areas of the CIIHE. The CIIHE TAC shall support, but not supplant, government-to-government consultation activities that OMH undertakes.

TAC Membership: The CIIHE TAC will consist of 16 delegate positions: One from each of the 12 geographic areas served by the Indian Health Service and four National At-Large Member positions.

Alaska Area
Albuquerque Area
Bemidji Area
Billings Area
California Area
Great Plains Area
Nashville Area
Navajo Area
Oklahoma Area
Phoenix Area
Portland Area
Tucson Area
National At-Large Members (4)

OMH recommends a two (2) year term length for each delegate, but delegates' term length will be established by the TAC's charter.

Eligibility: The CIIHE TAC delegates must be: (1) Elected tribal officials from a federally recognized tribe acting in their official capacity as elected officials of their tribe, with authority to act on behalf of the tribe; or (2) individuals designated by an elected tribal official. Designees must have the authority to act on behalf of the tribal official and the tribe and be qualified to represent the views of the AI/AN tribes in the area from which they are nominated. No delegate of the CIIHE TAC may be an employee of the federal government.

Nomination Procedures: CIIHE TAC candidates must be nominated by an elected tribal leader. The nomination letter must be on tribal letterhead and signed by an elected tribal leader, and must include the following information:

- Name of the nominee
- Nominee's official title
- Name of the nominee's tribe
- Date of nominee's election to official tribal position and term length
- Nominee's contact information (mailing address, phone, and email)
- Nominee's expertise that is relevant to the CIIHE TAC
- Name of tribal leader submitting the nomination
- Official title of tribal leader submitting the nomination
- Contact information for tribal leader submitting the nomination and/or administrative office for tribal government

CIIHE TAC nomination guidance and sample nomination letters are available on the OMH website's Tribal Leader Letters section: *https://www.minorityhealth.hhs.gov/omh/browse.aspx?lvl=3&lvlid=62#tribal-leader-letters.*

Selection Process: OMH is responsible for selecting and finalizing CIIHE TAC members. Eligible nominees will be considered in the following priority order:

1. Tribal President/Chairperson/Governor
2. Tribal Vice-President/Vice-Chairperson/Lt. Governor
3. Elected or Appointed Tribal Official
4. Designated Tribal Official with authority to act on behalf of Tribal leader

In the event that there is more than one nomination for a given IHS area, OMH will make a determination of representation based on submitted nomination materials.

Nominees will be notified of the status of delegate selection in February 2022.

Dated: November 9, 2021.

Violet Woo,

Designated Federal Officer, Center for Indigenous Innovation and Health Equity Tribal Advisory Committee.

BILLING CODE 4140–01–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX22EE000101100]

Public Meeting of the National Geospatial Advisory Committee

AGENCY: Department of Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act of 1972, the U.S. Geological Survey (USGS) is publishing this notice to announce that a Federal Advisory Committee meeting of the National Geospatial Advisory Committee (NGAC) will take place.

DATES: The meeting will be held as a webinar on Tuesday, December 7, 2021, from 1:00 p.m. to 5:00 p.m., and on Wednesday, December 8, 2021, from 1:00 p.m. to 5:00 p.m. (Eastern Daylight Time).

ADDRESSES: The meeting will be held on-line and via teleconference. Instructions for accessing the meeting will be posted at *www.fgdc.gov/ngac.* Comments can be sent to Ms. Dionne Duncan-Hughes, Group Federal Officer by email to *gs-faca@usgs.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. John Mahoney, Federal Geographic Data Committee (FGDC), USGS, by mail at 909 First Avenue, Room 703, Seattle, WA 98104; by email at *jmahoney@usgs.gov;* or by telephone at (206) 220–4621.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., appendix 2), the Government in the

Sunshine Act of 1976 (5 U.S.C. 552B, as amended), and 41 CFR 102–3.140 and 102–3.150.

Purpose of the Meeting: The NGAC provides advice and recommendations related to management of Federal and national geospatial programs, the development of the National Spatial Data Infrastructure (NSDI), and the implementation of the Geospatial Data Act of 2018 (GDA) and the Office of Management and Budget Circular A–16. The NGAC reviews and comments on geospatial policy and management issues and provides a forum to convey views representative of non-federal stakeholders in the geospatial community. The NGAC meeting is one of the primary ways that the FGDC collaborates with its broad network of partners. Additional information about the NGAC meeting is available at: *www.fgdc.gov/ngac.*

Agenda Topics:

—FGDC Update
—Geospatial Data Act Reporting
—Executive Order 14008/Climate Mapping Initiative
—Landsat Advisory Group
—Public-Private Partnerships
—Stakeholder Engagement
—Public Comment

Meeting Accessibility/Special Accommodations: The webinar meeting is open to the public and will take place from 1:00 p.m. to 5:00 p.m. on December 7, 2021, and from 1:00 p.m. to 5:00 p.m. on December 8, 2021. Members of the public wishing to attend the meeting should visit *www.fgdc.gov/ngac* or contact Mr. John Mahoney (see **FOR FURTHER INFORMATION CONTACT**). Webinar/conference line instructions will be provided to registered attendees prior to the meeting. Individuals requiring special accommodations to access the public meeting should contact Mr. John Mahoney (see **FOR FURTHER INFORMATION CONTACT**) at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Public Disclosure of Comments: There will be an opportunity for public comment during both days of the meeting. Depending on the number of people who wish to speak and the time available, the time for individual comments may be limited. Written comments may also be sent to the Committee for consideration. To allow for full consideration of information by the Committee members, written comments must be provided to John Mahoney (see **FOR FURTHER INFORMATION CONTACT**) at least three (3) business days prior to the meeting. Any written comments received will be provided to the committee members before the meeting.

Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you may ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Authority: 5 U.S.C. appendix 2.

Dated: November 16, 2021.

Kenneth Shaffer,

Deputy Executive Director, Federal Geographic Data Committee.

National Park Service

[NPS–WASO–NRNHL–DTS#–33010; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before November 6, 2021, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by December 6, 2021.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 7228, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before November 5, 2021. Pursuant to Section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–32902; PPWOCRAD10, PUC00RP14.R50000]

Cold War Advisory Committee Notice of Public Meeting

AGENCY: National Park Service, Interior.

ACTION: Meeting notice.

SUMMARY: The National Park Service (NPS) is hereby giving notice that the Cold War Advisory Committee (Committee) will meet as indicated below.

DATES: The Committee will meet via GoToWebinar on Thursday, February 24, 2022, from 2:00 p.m. until approximately 4:00 p.m. (Eastern).

ADDRESSES: Teleconference participants may register for the meeting at the following url: *https://attendee.gotowebinar.com/register/5948428690832074256.*

After registering, participants will receive a confirmation email containing information about joining the teleconference. Participants may register at any time and will receive the login information immediately.

FOR FURTHER INFORMATION CONTACT: Lisa P. Davidson, Ph.D., Program Manager, National Historic Landmarks Program, National Park Service, telephone at (202) 354–2179, or email *lisa_davidson@nps.gov.*

SUPPLEMENTARY INFORMATION: The Committee was established by title VII, subtitle C, section 7210 of the Omnibus Public Land Management Act of 2009 (16 U.S.C. 1a–5 note).

The Committee meeting will be open to the public and will have time allocated for public comment. Depending on the number of persons wishing to speak, and the time available, the time for individual comments may be limited. Such requests should be made to the Designated Federal Officer at the beginning of the meeting.

Purpose of the Meeting: The Committee assists the Secretary of the Interior in the preparation of a national historic landmark theme study to identify sites and resources significant to the Cold War. The proposed meeting agenda includes the following:

1. Call to Order and Welcome
2. Welcome from the NPS
3. Introductions
4. Status Report—Mountain Home National Historic Landmarks Nomination and Cold War National Historic Landmarks Theme Study
5. Discussion of Cold War Interpretive Handbook
6. Public Comments
7. Adjourn Meeting

Public Disclosure of Comments: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 5 U.S.C. Appendix 2)

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–667 and 731–TA–1559 (Final)]

Organic Soybean Meal From India; Scheduling of the Final Phase of Countervailing Duty and Antidumping Duty Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–667 and 731–TA–1559 (Final) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of organic soybean meal from India, provided for in subheadings 1208.10.00 and 2304.00.00 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce (''Commerce'') to be subsidized and sold at less-than-fair-value.

DATES: November 2, 2021.

FOR FURTHER INFORMATION CONTACT: Lawrence Jones ((202) 205–3358), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Scope.—For purposes of these investigations, Commerce has defined the subject merchandise as ''certified organic soybean meal. Certified organic soybean meal results from the mechanical pressing of certified organic soybeans into ground products known as soybean cake, soybean chips, or soybean flakes, with or without oil residues. Soybean cake is the product after the extraction of part of the oil from soybeans. Soybean chips and soybean flakes are produced by cracking, heating, and flaking soybeans and reducing the oil content of the conditioned product. ''Certified organic soybean meal'' is certified by the U.S. Department of Agriculture (USDA) National Organic Program (NOP) or equivalently certified to NOP standards or NOP-equivalent standards under an existing organic equivalency or recognition agreement.

Certified organic soybean meal subject to this investigation has a protein content of 34 percent or higher.

Organic soybean meal that is otherwise subject to this investigation is included when incorporated in admixtures, including but not limited to prepared animal feeds. Only the organic soybean meal component of such admixture is covered by the scope of this investigation.''

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of affirmative preliminary determinations by Commerce that certain benefits which constitute subsidies within the meaning of § 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in India of organic soybean meal, and that such products are being sold in the United States at less than fair value within the meaning of § 733 of the Act (19 U.S.C. 1673b). The investigations were requested in petitions filed on March 31, 2021, by the Organic Soybean Processors of America, Washington, DC, American Natural Processors, LLC, Dakota Dunes, South Dakota, Lester Feed & Grain Co., Lester, Iowa, Organic Production Services, LLC, Weldon, North Carolina, Professional Proteins Ltd., Washington, Iowa, Sheppard Grain Enterprises, LLC, Phelps, New York, Simmons Grain Co., Salem, Ohio, Super Soy, LLC, Brodhead, Wisconsin, and Tri-State Crush, Syracuse, Indiana.[1]

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Participation in the investigations and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on March 2, 2022, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Wednesday, March 16, 2022. Information about the place and form of the hearing, including about how to participate in and/or view the hearing, will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.* Interested parties should check the Commission's website periodically for updates. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before Tuesday, March 8, 2022. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on Monday, March 14, 2022. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.23 of the Commission's rules; the deadline for filing is March 9, 2022. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.25 of the Commission's rules. The deadline for filing posthearing briefs is March 23, 2022. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before March 23, 2022. On April 11, 2022, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before April 13, 2022, but such final comments must not contain new factual information and must otherwise comply with § 207.30 of the Commission's rules. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to § 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

[1] On April 6, 2021, Lester Feed & Grain Co. voluntarily withdrew its status as a petitioner.

Issued: November 15, 2021.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–670 and 731–TA–1570 (Preliminary)]

Freight Rail Coupler Systems and Components From China

Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of freight rail coupler systems and components from China, provided for in subheading 8607.30.10 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (''LTFV'') and to be subsidized by the government of China.[2]

Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in § 207.21 of the Commission's rules, upon notice from the U.S. Department of Commerce (''Commerce'') of affirmative preliminary determinations in the investigations under §§ 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under §§ 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Background

On September 29, 2021, the Coalition of Freight Coupler Producers consisting of McConway & Torley LLC (''M&T''), Pittsburgh, PA, and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO, CLC (''USW'') filed petitions with the Commission and Commerce,[3] alleging that an industry in the United States is materially injured or threatened with material injury by reason of subsidized imports of freight rail coupler systems and components from China and LTFV imports of freight rail coupler systems and components from China. Accordingly, effective September 29, 2021, the Commission instituted countervailing duty investigation No. 701–TA–670 and antidumping duty investigation No. 731–TA–1570 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 5, 2021 (86 FR 54997). In light of the restrictions on access to the Commission building due to the COVID–19 pandemic, the Commission conducted its conference through written testimony and video conference on October 20, 2021. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to §§ 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on November 15, 2021. The views of the Commission are contained in USITC Publication 5243 (November 2021), entitled *Freight Rail Coupler Systems and Components from China: Investigation Nos. 701–TA–670 and 731–TA–1570 (Preliminary).*

By order of the Commission.

Issued: November 15, 2021.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2021–25233 Filed 11–18–21; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–1546–1549 (Final)]

Thermal Paper From Germany, Japan, Korea, and Spain

Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of thermal paper from Germany, Japan, Korea, and Spain, provided for in subheadings 4811.90.80 and 4811.90.90 (statistical reporting numbers 4811.90.8030 and 4811.90.9030) of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV'').[2] [3]

Background

The Commission instituted these investigations effective October 7, 2020, following receipt of petitions filed with the Commission and Commerce by Appvion Operations, Inc. (Appleton, Wisconsin) and Domtar Corporation (Fort Mill, South Carolina). The Commission scheduled the final phase of the investigations following notification of preliminary determinations by Commerce that imports of thermal paper from Germany, Japan, Korea, and Spain were being sold at LTFV within the meaning of section 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of June 9,

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 86 FR 58864 (October 25, 2021) and 86 FR 58878 (October 25, 2021).

[3] Initially, Petitioner was M&T and another domestic producer. However, the other domestic producer withdrew, and USW was added to the petitions.

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 86 FR 54152, 86 FR 54157, 86 FR 54154, and 86 FR 54162 (September 30, 2021).

[3] The Commission also finds that imports subject to Commerce's affirmative critical circumstances determinations are not likely to undermine seriously the remedial effect of the antidumping duty orders on Germany and Korea.

2021 (86 FR 30627) and June 24, 2021 (86 FR 33358). In light of the restrictions on access to the Commission building due to the COVID–19 pandemic, the Commission conducted its hearing through written testimony and video conference on September 21, 2021. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to § 735(b) of the Act (19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on November 15, 2021. The views of the Commission are contained in USITC Publication 5237 (November 2021), entitled *Thermal Paper from Germany, Japan, Korea, and Spain: Investigation Nos. 731–TA–1546–1549 (Final).*

By order of the Commission.

Issued: November 15, 2021.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2021–25216 Filed 11–18–21; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under Comprehensive Environmental Response, Compensation and Liability Act

On November 15, 2021, the Department of Justice lodged a proposed Consent Decree (''Consent Decree'') with the United States District Court for the Western District of New York in a lawsuit entitled *United States, the State of New York, and the Tuscarora Nation* v. *Honeywell International, Inc.,* Civil Action No. 21–1218. In the complaint, the plaintiffs, collectively the United States, the State of New York, and the Tuscarora Nation (also referred to as ''the Natural Resource Trustees''), seek natural resource damages under Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''), 42 U.S.C. 9607(a) from defendant Honeywell International, Inc. (''Honeywell''). The complaint alleges that Honeywell, as a successor to the Allied Chemical Corp./Buffalo Color Corp., is a liable party in connection with natural resource damages resulting from the release of hazardous substances into a portion of the Buffalo River, Buffalo, New York (''the Site''), from the early 1900s through at least the mid-1900s.

The proposed Consent Decree requires that Honeywell, as a Settling Defendant, pay $4,250,000 to the Natural Resource Trustees to compensate for natural resource damages. The payment will reimburse past assessment costs, and fund natural resource habitat restoration projects, cultural restoration projects, and oversight costs to oversee completion of the projects. Under the proposed settlement, conservation easements and restrictions will be recorded on approximately 70 undeveloped acres of land adjacent to the Buffalo River to preserve these properties in their undeveloped condition in perpetuity. These properties are currently owned by CSX Transportation or the City of Buffalo, who are settling parties under the Consent Decree. Additional settling parties include other parties that are potentially responsible for natural resource damages that have entered into separate settlements with Honeywell.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States, the State of New York, and the Tuscarora Nation* v. *Honeywell International, Inc., Civil Action No. 21–1218,* D.J. Ref. No. 90–11–3–08780. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the proposed Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to:Consent Decree Library,U.S. DOJ—ENRD,P.O. Box 7611,Washington, DC 20044–7611.

Please enclose a check or money order for $9.75 (25 cents per page reproduction cost), payable to the United States Treasury.

Henry Friedman,

Assistant Chief, Environmental Enforcement Section, Environment & Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Standard Job Corps Contractor and Grantee Information Gathering

ACTION: Notice.

SUMMARY: The Department of Labor's (DOL) Employment and Training Administration (ETA) is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, ''Standard Job Corps Contractor and Grantee Information Gathering.'' This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA).

DATES: Consideration will be given to all written comments received by January 18, 2022.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained free by contacting Lawrence Lyford by telephone at 202–693–3121 (this is not a toll-free number), TTY 1–877–889–5627 (this is not a toll-free number), or by email at *Lyford.Lawrence@dol.gov.*

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Employment and Training Administration, Office of Job Corps, 200 Constitution Avenue NW, Room N4459 Washington, DC 20210; by email: *Lyford.Lawrence@dol.gov;* or by fax 202–693–3113.

FOR FURTHER INFORMATION CONTACT: Lawrence Lyford by telephone at 202–693–3121 (this is not a toll-free number) or by email at *Lyford.Lawrence@dol.gov.*

Authority: 44 U.S.C. 3506(c)(2)(A).

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized,

collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

Job Corps is the nation's largest residential, educational, and career technical training program for the economically disadvantaged youths. The Economic Opportunity Act established Job Corps in 1964, and it currently operates under the authority of the Workforce Innovation and Opportunity Act (WIOA) of 2014. For over 56 years, Job Corps has helped prepare over three million at-risk young people between the ages of 16 and 24 for success in our nation's workforce. With 121 centers in 50 states, Puerto Rico, and the District of Columbia, Job Corps assists students across the nation in attaining academic credentials, including High School Diplomas (HSD) and/or High School Equivalency (HSE), and career technical training credentials, including industry-recognized certifications, state licensures, and pre-apprenticeship credentials.

Job Corps is a national program administered by the U.S. Department of Labor (DOL) through the Office of Job Corps and six Regional Offices. DOL awards and administers contracts for the recruiting and screening of new students, center operations, and the placement and transitional support of graduates and former enrollees. Large and small corporations and nonprofit organizations manage and operate 95 Job Corps centers under contractual agreements with DOL. These contract Center Operators are selected through a competitive procurement process that evaluates potential operators' technical expertise, proposed costs, past performance, and other factors, in accordance with the Competition in Contracting Act and the Federal Acquisition Regulations. Many of the current contractors operate more than one center. The two centers operated under demonstration grants are run by the State of Idaho and the National Guard Job Challenge program respectively. Of the 121 current centers, 24 are managed and operated by the U.S. Department of Agriculture—Forest Service (USDA) through an interagency agreement. Additionally, there are 26 public colleges and universities operating Job Corps Scholars Program demonstration grants.

The Workforce Innovation Opportunity Act (WIOA), Section 116(b)(2)(A)(i), Section 159(c)(4) and Section 156(a) authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless OMB approves the collection under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB control number 1205–0219.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (*e.g.,* permitting electronic submission of responses).

Agency: DOL.

Type of Review: Revision.

Title of Collection: Standard Job Corps Contractor and Grantee Information Gathering.

Form: Various. Center Financial Report—FMS 2110, Grantee Financial Report—FMS 2181, Center Vacancy/Separation Report—FMS 2110S, Center Operations Budget—FMS 2181, Environmental Health Inspections—OJC 6–36, Inspection of Residential & Educational Facilities—OJC 6–37, Inspection of Waste Treatment Facilities Costs—OJC 6–39, Inspection Water Supply Facilities—OJC 6–38, Disciplinary Discharge—ETA 6–131A, Review Board Hearings—ETA 6–131B, Rights to Appeal—ETA 6—131C, Student Profile—ETA 640, Student Separation—ETA 661, Grantee Data Collection Form: Application Data—ETA 9190C, Grantee Data Collection Form: Enrollee Data—ETA 9190B, Grantee Data Collection Form: Post Separation Data—ETA 9190A.

OMB Control Number: 1205–0219.

Affected Public: Individuals or Households and Private Sector businesses, grantees or other for-profits.

Estimated Number of Respondents: 2,570.

Frequency: Various.

Total Estimated Annual Responses: 277,570.

Estimated Average Time per Response: Varies.

Estimated Total Annual Burden Hours: 84,096.

Total Estimated Annual Other Cost Burden: $ 0.

Angela Hanks,

Acting Assistant Secretary.

BILLING CODE 4510–FT–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Transmittal for Unemployment Insurance Materials

ACTION: Notice.

SUMMARY: The Department of Labor's (DOL) Employment and Training Administration (ETA) is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, ''Transmittal for Unemployment Insurance Materials.'' This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA).

DATES: Consideration will be given to all written comments received by January 18, 2022.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained free by contacting John

Schuettinger by telephone at 202–693–2680 (this is not a toll-free number), TTY 1–877–889–5627 (this is not a toll-free number), or by email at *Schuettinger.john@dol.gov.*

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Office of Unemployment Insurance, Room S–4520, 200 Constitution Avenue NW, Washington, DC 20210; by email: *Schuettinger.john@dol.gov;* or by fax (202) 693–3975.

FOR FURTHER INFORMATION CONTACT: John Schuettinger by telephone at 202–693–2680 (this is not a toll-free number) or by email at *schuettinger.john@dol.gov.*

Authority: 44 U.S.C. 3506(c)(2)(A).

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

ETA's administrative procedures regulation, found at 20 CFR 601, sets out the collection of information requirements. Section 601.2 requires states to submit copies of their unemployment compensation (UC) laws for approval by the Secretary of Labor (Secretary) so that the Secretary may determine the status of state laws and plans of operation. Section 601.3 requires states to ''submit all relevant state materials such as statutes, executive and administrative orders, legal opinions, rules, regulations, interpretations, court decisions, etc.''

These materials are used by the Secretary to determine whether the state law contains provisions required by Section 3304(a) of the Internal Revenue Code of 1986. DOL provides grants to states to fund the administration of their employment security laws if their UC laws and their plans of operation for public employment offices meet required conditions of Federal laws. The information transmitted by Form MA 8–7 is used by the Secretary to make findings (as specified in the above cited Federal laws) required for certification to the Secretary of the Treasury for payment to states or for certification of the state law for purposes of providing additional tax credits to employers in states with UC laws conforming to Federal law. If this information is not available, the Secretary cannot make such certifications. To facilitate transmittal of required material, DOL prescribes the use of Form MA 8–7, Transmittal for Unemployment Insurance Materials. This simple check-off form is used by the states to identify material being transmitted to the National Office and allows the material to be routed to appropriate staff for prompt action. 20 CFR 601.2 and 601.3 authorize this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB control number 1205–0222.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (*e.g.,* permitting electronic submission of responses).

Agency: DOL–ETA.

Type of Review: Extension Without Change.

Title of Collection: Transmittal for Unemployment Insurance Materials.

Form: MA 8–7.

OMB Control Number: 1205–0222.

Affected Public: State Workforce Agencies.

Estimated Number of Respondents: 53.

Frequency: Varies.

Total Estimated Annual Responses: 318.

Estimated Average Time per Response: 0.25 hour.

Estimated Total Annual Burden Hours: 79.5 hours.

Total Estimated Annual Other Cost Burden: $0.

Angela Hanks,

Acting Assistant Secretary, Employment and Training Administration.

BILLING CODE 4510–FW–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of the Federal Unemployment Tax Act (FUTA) Credit Reduction Applicable in 2021

Sections 3302(c)(2)(A) and 3302(d)(3) of the FUTA provide that employers in a state that has outstanding advances under Title XII of the Social Security Act on January 1 of two or more consecutive years are subject to a reduction in credits otherwise available against the FUTA tax for the calendar year in which the most recent such January 1 occurs, if advances remain on November 10 of that year. Further, Section 3302(c)(2)(C) of FUTA provides for an additional credit reduction for a year if a state has outstanding advances on five or more consecutive January 1 and has a balance on November 10 for such years. Section 3302(c)(2)(C) provides for waiver of this additional credit reduction and substitution of the credit reduction provided in Section 3302(c)(2)(B) if a state meets certain conditions.

Employers in the U.S. Virgin Islands (USVI) were potentially liable for the additional credit reduction under Section 3302(c)(2)(C) of FUTA. The jurisdiction applied for the waiver of this additional credit reduction. The Employment and Training

Administration determined that USVI met all of the criteria of the section necessary to qualify for the waiver of the additional credit reduction. Therefore employers in USVI will have no additional credit reduction applied for calendar year 2021. However, as a result of USVI having outstanding advances on each January 1 from 2010 through 2021, and an outstanding balance on November 10, 2021, employers in USVI are subject to a FUTA credit reduction of 3.3 percent in 2021.

Angela Hanks,

Acting Assistant Secretary for Employment and Training.

BILLING CODE P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (21–076)]

National Space-Based Positioning, Navigation, and Timing Advisory Board; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the National Space-Based Positioning, Navigation and Timing (PNT) Advisory Board. This will be the 25th meeting of the PNT Advisory Board.

DATES: Thursday, December 9, 2021, from 8:30 a.m.–6:00 p.m., Eastern Time; and Friday, December 10, 2021, from 8:30 a.m.–12:00 p.m., Eastern Time.

ADDRESSES: Sheraton Pentagon City Hotel, Galaxy Ballroom, 900 South Orme Street, Arlington, Virginia 22204.

FOR FURTHER INFORMATION CONTACT: Mr. James Joseph Miller, Designated Federal Officer, PNT Advisory Board, Space Operations Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 262–0929 or *jj.miller@nasa.gov.*

SUPPLEMENTARY INFORMATION: This meeting will be open to the public up to the capacity of the meeting room. In-person attendees will be requested to sign a register prior to entrance to the proceedings. Webcast details to watch the meeting remotely will be available on the PNT Advisory Board website at: *www.gps.gov/governance/advisory/.*

The agenda for the meeting will include the following:

—Opening Remarks and Meeting Objectives by PNT Advisory Board Chair
—Reports and Updates from PNT Advisory Board Working Groups
—Preliminary Deliberations on any Findings and Recommendations
—Other PNT Advisory Board Business and Work Plan Schedule

For further information, visit the PNT Advisory Board website at: *https://www.gps.gov/governance/advisory/.*

It is imperative that the meeting be held on these dates to meet the scheduling availability of key participants.

Patricia Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NUCLEAR REGULATORY COMMISSION

[NRC–2020–0276]

Information Collection: Physical Protection of Plants and Materials

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Physical Protection of Plants and Materials.''

DATES: Submit comments by December 20, 2021. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this

particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2020–0276 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov/* and search for Docket ID NRC–2020–0276.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The supporting statement and the 10 CFR part 73 Annual Burden tables are available in ADAMS under Accession Nos. ML21244A281 and ML21101A001.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov/* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, part 73 of title 10 of the *Code of Federal Regulations* (10 CFR) ''Physical Protection of Plants and Materials.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on June 24, 2021, (86 FR 33382).

1. *The title of the information collection:* 10 CFR part 73 ''Physical Protection of Plants and Materials.''
2. *OMB approval number:* 3150–0002.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* N/A.
5. *How often the collection is required or requested:* Once for the initial submittal of Cyber Security Plans, Physical Security Plans, Safeguards Contingency Plans, and Security Training and Qualification Plans and then on occasion when changes are made. Required reports are submitted and evaluated as events occur.
6. *Who will be required or asked to respond:* Nuclear power reactor licensees licensed under 10 CFR parts 50 or 52 who possess, use, import, export, transport, or deliver to a carrier for transport, special nuclear material; actively decommissioning reactor licensees; Category I, Category II and Category III fuel facilities; nonpower reactors (research and test reactors); and other entities who mark and handle Safeguards Information.
7. *The estimated number of annual responses:* 130,968 (40,889 reporting responses + 89,869 third party disclosure responses + 210 record keepers).
8. *The estimated number of annual respondents:* 210 (56 power reactors + 20 decommissioning reactor facilities + 2 Category I fuel facilities + 5 Category II and III fuel facilities + 31 nonpower reactors + and 96 other entities who mark and handle Safeguards Information).
9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 495,892 hours (22,631 reporting + 451,788 recordkeeping + 21,473 third party disclosure).
10. *Abstract:* The NRC regulations in 10 CFR part 73 prescribe requirements to establish and maintain a physical protection system and security organization with capabilities for protection of: (1) Special Nuclear Material (SNM) at fixed sites, (2) SNM in transit, and (3) plants in which SNM is used. 10 CFR part 73 contains reporting and recordkeeping requirements which are necessary to help ensure that an adequate level of protection is provided for nuclear facilities and nuclear material, such as: Development and maintenance of security documents including a physical security plan, a training and qualification plan, a safeguards contingency plan, a cyber security plan, and security implementing procedures; notifications to the NRC regarding safeguards and cyber security events; notifications to State governors and Tribes regarding shipments of irradiated reactor fuel; and requirements for conducting criminal history records checks of individuals granted unescorted access to a nuclear power facility, a non-power reactor, or access to Safeguards Information. The objective is to ensure that activities involving SNM are consistent with interests of common defense and security and that these activities do not constitute an unreasonable risk to public health and safety. The information in the reports and records submitted by licensees is used by the NRC staff to ensure that the health and safety of the public and the environment are protected, and licensee

possession and use of SNM is in compliance with license and regulatory requirements.

Dated: November 15, 2021.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0207]

Information Collection: Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-Up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Renewal of existing information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on the renewal of Office of Management and Budget (OMB) approval for an existing collection of information. The information collection is entitled, ''Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material.''

DATES: Submit comments by January 18, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0207. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–

0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0207 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov/* and search for Docket ID NRC–2021–0207.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The supporting statement for Nuclear Material Events Database OMB Clearance (3150–0178) can be found in ADAMS under Accession No. ML21210A399.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2021–0207 in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov/* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material.

2. *OMB approval number:* 3150–0178.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* N/A.

5. *How often the collection is required or requested:* Agreement States are requested to provide copies of licensee nuclear material event reports electronically or by hard copy to the NRC within 30 days of receipt from their licensee. In addition, Agreement States are requested to report events that may pose a significant health and safety hazard to the NRC Headquarters Operations Officer within 24 hours of notification by an Agreement State licensee.

6. *Who will be required or asked to respond:* Current Agreement States and any State receiving Agreement State status in the future.

7. *The estimated number of annual responses:* 452.

8. *The estimated number of annual respondents:* 40.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 723 hours.

10. *Abstract:* NRC regulations require NRC licensees to report incidents and overexposures, leaking or contaminated sealed source(s), release of excessive contamination of radioactive material, lost or stolen radioactive material, equipment failures, abandoned well logging sources and medical events. Agreement State licensees are also required to report these events to their individual Agreement State regulatory authorities under compatible Agreement State regulations. The NRC is requesting that the Agreement States provide information to NRC on the initial notification, response actions, and follow-up investigations on events involving the use (including suspected theft or terrorist activities) of nuclear materials regulated pursuant to the Atomic Energy Act. The event information should be provided in a uniform electronic format, for assessment and identification of any facilities/site specific or generic safety concerns that could have the potential to impact public health and safety. The identification and review of safety concerns may result in lessons learned, and may also identify generic issues for further study which could result in proposals for changes or revisions to technical or regulatory designs, processes, standards, guidance or requirements.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the estimate of the burden of the information collection accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: November 15, 2021.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

PEACE CORPS

Privacy Act of 1974: New System of Records

AGENCY: Peace Corps.

ACTION: Notice of a new system of records.

SUMMARY: Peace Corps proposes to add a new system of records to its inventory of records systems subject to the Privacy Act of 1974. The purpose of this system is to allow the Peace Corps to collect and maintain records related to an individual's request and receipt of reasonable accommodations through the Office of Civil Rights and Diversity. Individuals include applicants, current, and former civilian personnel, interns, and Peace Corps Volunteers, and third-party individuals who either assist an individual in the application process, or professionals in a medical, health, or specialized field who provide information about the individual related to the reasonable accommodation request.

DATES: This new system of records is effective upon publication; however, comments on the Routine Uses will be accepted on or before December 20, 2021. The Routine Uses are effective at the close of the comment period.

ADDRESSES: Send written comments, identified by the docket number and title, to the Peace Corps, ATTN: Virginia Burke, FOIA/Privacy Act Officer, 1275 First Street NE, Washington, DC 20526, or by email at *pcfr@peacecorps.gov.* Email comments must be made in text and not in attachments.

FOR FURTHER INFORMATION CONTACT: Virginia Burke, FOIA/Privacy Act Officer, 1275 First Street NE, Washington, DC 20526; *pcfr@peacecorps.gov;* or 202–692–1887.

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, the Peace Corps proposes to establish a new system of records titled, ''PC–27, Reasonable Accommodations Request Records.'' This system of records covers Peace Corps' collection and maintenance of records from applicants for employment, internships, Peace Corps Volunteer positions, current and former employees, interns, and Peace Corps Volunteers, third-party professionals, and any third-party participants engaged in Peace Corps activities who request and receive reasonable accommodations for a disability, or for medical or religious reasons. Records may include information on individuals' vaccination status and information to support a request for reasonable accommodation based on a disability, medical, or sincerely held religious belief.

Dated: November 15, 2021.

Virginia Burke,

FOIA/Privacy Act Officer.

PC–37—Peace Corps

SYSTEM NAME AND NUMBER:

Reasonable Accommodation Requests, PC–37.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Office of Civil Rights and Diversity, Peace Corps, 1275 First Street NE, Washington, DC 20526. Some documents related to requests for reasonable accommodations may also be located in an electronic file in the Office of Human Resources at the same address.

SYSTEM MANAGER(S):

Director, Office of Civil Rights and Diversity, Peace Corps, 1275 First Street NE, Washington, DC 20526.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Peace Corps Act, as amended (22 U.S.C. 2503); the Rehabilitation Act of 1973, as amended (29 U.S.C. 791); Title VII of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e); Civil Rights Act of 1991 42 U.S.C. 1981; Executive Order (E.O.) 13163, Increasing the Opportunities for Individuals with Disabilities to be Employed in the Federal Government; E.O. 13164, Requiring Federal Agencies To Establish Procedures To Facilitate the Provision of Reasonable Accommodation; E.O. 13548, Increasing Federal Employment of Individuals with Disabilities, and Executive Order 14043: Requiring Coronavirus Disease 2019 Vaccination for Federal Employees.

PURPOSE OF THE SYSTEM:

The purpose of this system is to document and manage the agency's receipt, review, approval or denial decision, and implementation of an individual's reasonable accommodation request under the Rehabilitation Act of 1973, as amended, Title VII of the Civil Rights Act, as amended, and the 1991 Civil Rights Act. The purpose is also to allow the agency to collect and maintain records on applicants for employment as well as employees with disability, medical condition or because of their religious beliefs, practice or observance who request or receive reasonable accommodations as required by the Rehabilitation Act of 1973, as amended, and Title VII of the Civil Rights Act, as amended, and the 1991 Civil Rights Act. This system will also track and report the processing of requests for reasonable accommodation to comply with applicable law and regulations and to preserve and maintain confidentiality of the records.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The categories of individuals covered by the system are Peace Corps applicants, personnel, or public participants in a Peace Corps activity who request a reasonable accommodations on the bases of a disability, medical condition or for religious reasons. This includes federal job and internship applicants, current and former federal employees, political appointees, experts, and interns; Peace Corps Volunteer applicants, Peace Corps Volunteers, and Returned Peace Corps Volunteers; covered federal employees as defined in 5 U.S.C. 2105 to be fully vaccinated against COVID–19, and third parties who represent or advocate for or on the behalf of the requesting individual, or who participate in a Peace Corps activity or program.

CATEGORIES OF RECORDS IN THE SYSTEM:

The categories of records in this system include the requesting individual's reasonable accommodation request form, the individual's supporting documentation for disability, or medical condition, medical records, medical notes or letters, the requested accommodation, information involving medical devices, impairments, disability type, and disability condition. Requests for accommodation for religious reasons may include documents related to support the request for religious accommodation including documents from third parties.

The categories of records also may include documents that describe the type of accommodation, documents that approve or deny the reasonable accommodation request; documents or information about the implementation of the accommodation request, emails, notes, letter and memoranda regarding the request for accommodation.

Identifying information includes the requesting individual's first and last name, office name and location; work email address and telephone numbers, employee position and grade; supervisor's full name, email address,

phone number, office name; a third-party advocate's first and last name and contact information; a health care provider's full name, work address, work phone number, fax number, work email address and signature; full name and office of personnel processing requests; the information related to the accommodation request such as medical or disability information, and religious affiliation, belief, practice, or observance for a religious accommodation request.

RECORD SOURCE CATEGORIES:

The information sources include individuals requesting reasonable accommodations, healthcare providers or supporting professionals, advocates for the individual; and Peace Corps personnel who participate in evaluation, review, determination, and implementation of a reasonable accommodation request.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, the Peace Corps may disclose all or a portion of the records or information contained in this system without the consent of the subject individual may be disclosed if the disclosure is compatible with the purpose for which the record was collected outside the Peace Corps as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. Disclosure for Law Enforcement Purposes. Information may be disclosed to the appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, if the information indicates a violation or potential violation of civil or criminal law or regulation within the jurisdiction of the receiving entity.

B. Disclosure Incident to Requesting Information. Information may be disclosed to any source from which additional information is requested (to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, or to identify the type of information requested); when necessary to obtain information relevant to a Peace Corps decision concerning retention of an employee or other personnel action (other than hiring), retention of a security clearance, the letting of a contract, or the issuance or retention of a grant or other benefit.

C. Disclosure to Requesting Agency. Information may be disclosed to a Federal, State, local, or other public authority of the fact that this system of records contains information relevant to the requesting agency's retention of an employee, the retention of a security clearance, the letting of a contract, or the issuance or retention of a license, grant, or other benefit. The other agency or licensing organization may then make a request supported by the written consent of the individual for part or all of the record if it so chooses. No disclosure will be made unless the information has been determined to be sufficiently reliable to support a referral to another office within the agency or to another Federal agency for criminal, civil, administrative, personnel, or regulatory action.

D. Disclosure to Office of Management and Budget. Information may be disclosed to the Office of Management and Budget at any stage in the legislative coordination and clearance process in connection with private relief legislation as set forth in OMB Circular No. A–19.

E. Disclosure to Congressional Offices. Information may be disclosed to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

F. Disclosure to Department of Justice. Information may be disclosed for purposes of litigation, provided that in each case the disclosure is compatible with the purpose for which the records were collected. Disclosure for these purposes may be made to the Department of Justice, or in a proceeding before a court, adjudicative body, or other administrative body before which the Peace Corps is authorized to appear. This disclosure may be made when: 1. The Peace Corps, or any component thereof; 2. Any employee of the Peace Corps in his or her official capacity; 3. Any employee of the Peace Corps in his or her individual capacity where the Department of Justice or the Peace Corps has agreed to represent the employee; or 4. The United States (when the Peace Corps determines that litigation is likely to affect the Peace Corps or any of its components) is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice or the Peace Corps is deemed by the Peace Corps to be relevant and necessary to the litigation.

G. Disclosure to the National Archives. Information may be disclosed to the National Archives and Records Administration in records management inspections.

H. Disclosure to Contractors, Grantees, and Others. Information may be disclosed to contractors, grantees, consultants, or Volunteers performing or working on a contract, service, grant, cooperative agreement, job, or other activity for the Peace Corps and who have a need to have access to the information in the performance of their duties or activities for the Peace Corps. When appropriate, recipients will be required to comply with the requirements of the Privacy Act of 1974 as provided in 5 U.S.C. 552a(m).

I. Disclosures for Administrative Claims, Complaints, and Appeals. Information may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator, or other person properly engaged in investigation or settlement of an administrative grievance, complaint, claim, or appeal filed by an employee, but only to the extent that the information is relevant and necessary to the proceeding, Agencies that may obtain information under this routine use include, but are not limited to: The Office of Personnel Management, Office of Special Counsel, Federal Labor Relations Authority, U.S. Equal Employment Commission, and Office of Government Ethics.

J. Disclosure to the Office of Personnel Management. Information may be disclosed to the Office of Personnel Management pursuant to that agency's responsibility for evaluation and oversight of Federal personnel management.

K. Disclosure in Connection with Litigation. Information may be disclosed in connection with litigation or settlement discussions regarding claims by or against the Peace Corps, including public filings with a court, to the extent that disclosure of the information is relevant and necessary to the litigation or discussions and except where court orders are otherwise required under Section (b)(11) of the Privacy Act of 1974, 5 U.S.C. 552a(b)(11).

L. Disclosure to U.S. Ambassadors. Information from this system of records may be disclosed to a U.S. Ambassador or his or her designee in a country where the Peace Corps serves when the information is needed to perform an official responsibility, to allow the Ambassador to knowledgeably respond to official inquiries and deal with in-country situations that are within the scope of the Ambassador's responsibility.

M. Disclosure to appropriate agencies, entities, and persons when (1) the Peace Corps suspects or has confirmed that there has been a breach of the system of records; (2) the Peace Corps has determined that as a result of the suspected or confirmed breach, there is a risk of harm to individuals, the Peace

Corps (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Peace Corps' efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

N. Disclosure another Federal agency or Federal entity, when the Peace Corps determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

O. Disclosures to Public Health Agencies and Authorities, individuals records' may be disclosed to federal, state, local, and Tribal health departments, other cooperating medical authorities, or other appropriate entities or organizations, in order for them to take measures to control, prevent, or treat communicable disease; and to deal more effectively with contagious diseases and conditions of public health.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The records in this system of records are stored electronically on Peace Corps' database servers, hosted at the Peace Corps data center in Ashburn, VA. Access to these servers are restricted to authorized government personnel. Paper records are stored in a locked metal file cabinet.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Reasonable Accommodation Requests records and information may be retrieved by an individual's name, Employee ID number, assigned office, and date of request.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retired and destroyed in accordance with the Peace Corps' published record disposition schedules that are approved by the National Archives and Records Administration. Records in this system are subject to General Records Schedule (GRS) for ''Reasonable Accommodation Program Files,'' disposition authority: DAA–GRS–2018–0002–0001, GRS 2.3, item 010, and will be retained for three years unless a business use is identified that requires a longer retention.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The Peace Corps safeguards records in this system in accordance with applicable laws, rules and policies to protect personally identifiable information against unauthorized access or disclosure. The Peace Corps has imposed strict controls to minimize such risks. Administrative safeguards include but not limited to: Access to the records in this system is limited to authorized personnel who need to know the information to perform official duties, and whose roles have been authorized with such access permissions. All such individuals receive the appropriate privacy and cybersecurity training on an annual basis.

The physical controls in place include the servers storing electronic data are located offsite in a locked facility with access limited to authorized personnel. The servers are maintained in accordance with a government contract that requires adherence to applicable laws, rules, and policies on protecting individual privacy.

The technical controls in place include multiple firewalls, system access, encrypted data at rest, encrypted data in motion, periodic vulnerability scans to ensure security compliance, and security access logs. Security complies with applicable Federal Information Processing Standards (FIPS) issued by the National Institute of Standards and Technology (NIST). Access is restricted to specific authorized Peace Corps individuals who have internet access through work computers using a Personally Identity Verification (PIV) or an assigned RSA token for general login access. Individual users can only access records with the proper pre-approved accreditation.

RECORD ACCESS PROCEDURES:

Individuals seeking access to their records should follow the procedures in 22 CFR part 308. Individuals should address written inquiries to the Privacy Officer at *FOIA@peacecorps.gov*. Provide a signed written request containing the name and number of this system of records notice along with the individual's full name, current address, and email address. The requester must provide either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the appropriate format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).''

CONTESTING RECORD PROCEDURES:

Individuals may request that records about them be amended or appeal an adverse decision by writing to the Peace Corps, Privacy Act Officer, Privacy Act Office at 1275 First Street NE, Washington, DC 20526 or submitting an electronic request to *FOIA@peacecorps.gov* and furnish the same information as required in the ''Record Access Procedures'' (full name, identify the system of records, provide the relevant signed declaration). In addition, clearly and concisely state what information is being contested, the reasons for contesting it, and the proposed amendment to the information sought.

NOTIFICATION PROCEDURES:

See ''Record Access Procedures.''

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

BILLING CODE 6051–01–P

RAILROAD RETIREMENT BOARD

Privacy Act of 1974; New System of Records

AGENCY: U.S. Railroad Retirement Board (RRB).

ACTION: Notice of a new system of records.

SUMMARY: The Railroad Retirement Board (RRB) proposes to add a new system of records to its existing inventory of systems of records subject to the Privacy Act of 1974. This new system of records is titled: RRB–60, Religious and Reasonable Accommodation Records. We hereby publish this notice for public comments.

DATES: These changes become effective as proposed without further notice on December 20, 2021. We will file a report of these Systems of Records Notices with the Committee on Homeland Security and Governmental Affairs of the Senate; the Committee on Oversight and Government Reform of the House of

Representatives; and the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB).

ADDRESSES: Send comments to Stephanie Hillyard, Secretary to the Board, U.S. Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092.

FOR FURTHER INFORMATION CONTACT: Chad Peek, Chief Privacy Officer, U.S. Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092; telephone: 312–751–3389, email: *chad.peek@rrb.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, as amended, the RRB has determined that it needs to introduce a new system of records. The RRB proposes a new system of records, RRB–60, Religious and Reasonable Accommodation Records. The purpose of this system of records is to cover all records pertaining to requests for an accomodation for a disability or a sincerely held religious belief, practice, or observance under federal law. The records are maintained depending on the how the request is initiated. Records may be with the immediate supervisor or within the Bureau of Human Resources.

By Authority of the Board.

Stephanie Hillyard,

Secretary to the Board.

RRB–60

SYSTEM NAME AND NUMBER:

RRB–60, Religious and Reasonable Accommodation Records.

SECURITY CLASSIFICATION:

Controlled Unclassified Information (CUI).

SYSTEM LOCATION:

U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

SYSTEM MANAGER(S):

Director of Human Resources, Office of Administration, U.S. Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

a. 45 U.S.C. 231f(b)(9), Railroad Retirement Board Powers and Duties,

b. 29 U.S.C. 791, The Rehabilitation Act of 1973,

c. 42 U.S.C. 2000e *et seq.,* Title VII of the Civil Rights Act of 1964,

d. 29 CFR 1605, Guidelines on Discrimination Because of Religion,

e. 29 CFR 1614, Federal Sector Equal Employment Opportunity,

f. Executive Order 13164, Requiring Federal Agencies to Establish Procedures to Facilitate the Provision of Reasonable Accommodation,

g. Executive Order 13548, Increasing Federal Employment of Individuals with Disabilities.

PURPOSE(S) OF THE SYSTEM:

The purpose of this system is to: (1) Allow RRB to collect and maintain records on prospective and active (as of the date of the request) employees who request or receive a reasonable accommodation by RRB based on a disabling medical condition; (2) allow RRB to collect and maintain records on prospective, and active (as of the date of the request) employees who request or receive an accommodation by RRB based on sincerely held religious beliefs, practices, or observances; (3) track and report the processing of requests for RRB in accordance with and to comply with applicable laws and regulations; and (4) preserve and maintain the confidentiality of medical and religious information submitted by or on behalf of applicants or employees requesting a reasonable accommodation.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Prospective, and active (at time of request), Railroad Retirement Board (RRB) employees who request, receive and/or are denied a reasonable accommodation for a disabling medical condition or a sincerely held religious belief, practice, or observance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name and relevant employment information of prospective or active (at time of request) employees needing an accommodation; requestor's name and contact information (if different than the employee who requested the accommodation); date request was initiated; information concerning the nature of the disability and the need for accommodation, including administratively acceptable documentation; information concerning the nature of the sincerely held religious belief, practice, or observance; why the accommodation is needed/justification for the requested accommodation, including any appropriate documentation; details of the accommodation request, such as: Type of accommodation requested; requested accommodation; how the requested accommodation would ensure the essential functions of the position would be performed; any additional information provided by the requestor related to the processing of the request; any documentation created as a result of the interactive process; any alternative accommodations; whether the request was approved (in whole or in part), modified or denied; whether the accommodation was approved for a set period of time; notification(s) to the employee and his/her supervisor(s) regarding the status and result of the requested accommodation; and, any other information collected or developed in connection with the request for a reasonable accomodation.

RECORD SOURCE CATEGORIES:

RRB employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or, information contained in this system may be disclosed to authorized entities, as is determined to be relevant and necessary, outside the RRB as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

Standard Disclosure 1.—Congressional. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual if that individual would not be denied access to the information.

Standard Disclosure 2.—Presidential. Disclosure of relevant information from the record of an individual may be made to the Office of the President in response to an inquiry from that office made at the request of that individual or a third party on the individual's behalf if that individual would not be denied access to the information.

Standard Disclosure 3.—Contractors working for Federal Government. Disclosure may be made to contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal government, to the extent necessary to accomplish an RRB function related to this system of records.

Standard Disclosure 4.—Law Enforcement. Disclosure may be made to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigating, enforcing, or prosecuting a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant

thereto, if the disclosure would be to an agency engaged in functions related to the Railroad Retirement Act or the Railroad Unemployment Insurance Act, or if disclosure would be clearly in the furtherance of the interest of the subject individual.

Standard Disclosure 5.—Breach Notification. Disclosure may be made, to appropriate agencies, entities, and persons when (1) the Railroad Retirement Board suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (2) the Railroad Retirement Board has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Railroad Retirement Board or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Railroad Retirement Board's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

To another Federal agency or Federal entity, when the RRB determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency, or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

Standard Disclosure 6.—National Archives. Disclosure may be made to the National Archives and Records Administration or other Federal government agencies for records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

Standard Disclosure 7.—Attorney Representative. Disclosure of non-medical information in this system of records may be made to the attorney representing such individual upon receipt of a written letter or declaration stating the fact of representation, if that individual would not be denied access to the information. Medical information may be released to an attorney when such records are requested for the purpose of contesting a determination either administratively or judicially.

In addition to the conditions of disclosure listed in 5 U.S.C. 552a(b) of the Privacy Act and the RRB's Standard Disclosures (above), the RRB may release these records:

a. Records may be disclosed to the Department of Justice, including Offices of the U.S. Attorneys; another Federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body; another party in litigation before a court, adjudicative, or administrative body; or to a court, adjudicative, or administrative body. Such disclosure is permitted only when it is relevant or necessary to the litigation or proceeding, and one of the following is a party to the litigation or has an interest in such litigation:

(1) RRB, or any component thereof;

(2) Any employee or former employee of RRB in his or her official capacity;

(3) Any employee or former employee of RRB in his or her capacity where the Department of Justice or RRB has agreed to represent the employee.

b. Records may be disclosed in response to a request for discovery or for the appearance or a witness, to the extent that what is disclosed is relevant to the subject matter involved in a pending judicial or administrative proceeding.

c. Relevant records from this system of records may be disclosed to an agency, organization, or individual for the purpose of performing an audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to RRB officers and employees.

d. Relevant records from this system of records may be disclosed to physicians or other medical professionals to provide them with or obtain from them the necessary medical documentation and/or certification for reasonable accommodations.

e. Relevant records from this system of records may be disclosed to another federal agency or commission with responsibility for labor or employment relations or other issues, including equal employment opportunity and reasonable accommodation issues, when that agency or commission has jurisdiction over reasonable accommodation issues.

f. Relevant records from this system of records may be disclosed to the Department of Labor (DOL), Office of Personnel Management (OPM), Equal Employment Opportunity Commission (EEOC), or Office of Special Counsel (OSC) to obtain advice regarding statutory, regulatory, policy, and other requirements related to reasonable accommodation.

g. Relevant records from this system of records may be disclosed to appropriate third-parties contracted by the Agency to facilitate mediation or other alternative dispute resolution procedures or programs.

h. Relevant records from this system of records may be disclosed to a Federal agency or entity authorized to procure assistive technologies and services in response to a request for reasonable accommodation.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and electronic media.

RETRIEVAL:

Records can typically be retrieved by any of the data elements below:

a. Name or other unique personal identifiers

SAFEGUARDS:

Paper: Maintained in areas not accessible to the public in locking filing cabinets. Access is limited to authorized RRB employees. The Bureau of Human Resources is controlled by key card locked doors. Building has 24 hour on-site security officers, closed circuit television monitoring and intrusion detection systems.

Electronic media: Computer, computer storage rooms and Cloud storage are restricted to authorized personnel; on-line query safeguards include a lock/unlock password system, a terminal oriented transaction matrix, role based access controls and audit trail. For computerized records electronically transmitted between headquarters and field office locations, system securities are established in accordance with National Institute of Standards and Technology (NIST) guidelines, including network monitoring, defenses in-depth, incident response and forensics. In addition to the on-line query safeguards, they include encryption of all data at rest and when transmitted and exclusive use of leased telephone lines.

RETENTION AND DISPOSAL:

Retained and disposal in accordance with National Archives and Records Administration (NARA), General Record Schedules, or RRB Records Disposition Schedules:

a. *Paper:* These records will be maintained permanently at RRB until their official retention period is established by the National Archives and Records Administration (NARA).

b. *Electronic media:* Storage drives and Cloud storage: Continually updated and permanently retained. When storage drives and Cloud storage or other electronic media are no longer serviceable, they are sanitized in accordance with NIST guidelines.

RECORD ACCESS PROCEDURES:

See Notification section below.

CONTESTING RECORD PROCEDURES:

See Notification section below.

NOTIFICATION PROCEDURES:

Requests for information regarding an individual's record should be in writing addressed to the Systems Manager identified above, including the full name and social security number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93576; File No. SR–NYSENAT–2021–21]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Schedule of Fees and Rebates

November 15, 2021.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 1, 2021, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Schedule of Fees and Rebates (''Fee Schedule'') to (1) modify the fee for non-tiered orders adding liquidity in securities priced at or above $1.00; (2) modify the requirements to qualify for Removing Tier 4; and (3) add new Removing Tier 5. The Exchange proposes to implement the rule change on November 1, 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule to (1) modify the fee for non-tiered orders adding liquidity in securities priced at or above $1.00; (2) modify the requirements to qualify for Removing Tier 4; and (3) add new Removing Tier 5.

The proposed changes respond to the current competitive environment where order flow providers have a choice of where to direct liquidity-providing and liquidity-removing orders by offering further incentives for ETP Holders to send additional adding and removing liquidity to the Exchange.

The Exchange proposes to implement the rule change on November 1, 2021.

Current Market and Competitive Environment

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [4]

As the Commission itself has recognized, the market for trading services in NMS stocks has become ''more fragmented and competitive.'' [5] Indeed, equity trading is currently dispersed across 16 exchanges,[6] 31 alternative trading systems,[7] and numerous broker-dealer internalizers and wholesalers. Based on publicly-available information, no single exchange has more than 18% of the market.[8] Therefore, no exchange possesses significant pricing power in the execution of equity order flow. More specifically, the Exchange's share of executed volume of equity trades in Tapes A, B and C securities is less than 2%.[9]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain products, in response to fee changes. While it is not possible to know a firm's reason for moving order flow, the Exchange believes that one such reason is because of fee changes at any of the registered exchanges or non-exchange trading venues to which a firm routes order flow. These fees can vary from month to month, and not all are publicly available. With respect to non-marketable order flow that would provide liquidity on an exchange, ETP Holders can choose from any one of the

[9] *See id.*

16 currently operating registered exchanges to route such order flow. Accordingly, competitive forces constrain the Exchange's transaction fees, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable.

The Exchange utilizes a ''taker-maker'' or inverted fee model to attract orders that provide liquidity at the most competitive prices. Under the taker-maker model, offering rebates for taking (or removing) liquidity increases the likelihood that market participants will send orders to the Exchange to trade with liquidity providers' orders. This increased taker order flow provides an incentive for market participants to send orders that provide liquidity. The Exchange generally charges fees for order flow that provides liquidity. These fees are reasonable due to the additional marketable interest (in part attracted by the Exchange's rebate to remove liquidity) with which those order flow providers can trade.

Proposed Rule Change

To respond to this competitive environment, the Exchange proposes the following changes to its Fee Schedule designed to provide order flow providers with additional incentives to route order flow to the Exchange. As described above, ETP Holders have a choice of where to send their order flow.

Change of Fee for Non-Tiered Orders Adding Liquidity

The Exchange proposes to increase the fee for non-tiered orders adding liquidity in securities priced at or above $1.00, currently set at $0.0028 per share, to $0.0029 per share. The proposed fee is competitive and would still be less than the fees charged by other markets for non-tiered orders adding liquidity.[10]

Proposed Change To Removing Tier 4 and Addition of New Removing Tier 5

Under current Removing Tier 4, the Exchange provides a rebate of $0.0015 per share to ETP Holders that remove liquidity from the Exchange in securities with a per share price of $1.00 or more and that have at least 50,000 Adding ADV.

The Exchange proposes to revise Removing Tier 4 by adding an additional requirement. As proposed, ETP Holders would qualify for the current rebate by if they have at least 50,000 Adding ADV *and* Adding ADV and Removing ADV combined of at least 0.04% of US CADV. The Exchange does not propose any changes to the removing rate for orders that remove liquidity that qualify for Removing Tier 4.

In addition, the Exchange proposes to add new Removing Tier 5, which would provide a rebate of $0.0007 per share to ETP Holders that remove liquidity from the Exchange in securities with a per share price of $1.00 or more and that have at least 50,000 Adding ADV.

The Exchange believes that together, these proposed changes will incentivize more ETP Holders to route liquidity-removing and liquidity-adding order flow to the Exchange to meet the tier requirements for Removing Tier 4 by adding the proposed requirement to Removing Tier 4 of a combination of Adding and Removing ADV.[11] For ETP Holders who cannot meet the proposed additional requirement to qualify for proposed Removing Tier 4, the Exchange believes that the addition of proposed new Removing Tier 5 would encourage additional removing order flow to the Exchange by providing a $0.0007 per share rebate for ETP Holders that meet the 50,000 Adding ADV requirement, which would still be less than the fees charged by other markets for non-tiered orders adding liquidity.[12]

The Exchange believes that the increased order flow that may result from these proposed changes would in turn support the quality of price discovery on the Exchange and provide additional price improvement opportunities for incoming orders.

As noted, the Exchange operates in a competitive environment. The Exchange does not know how much order flow ETP Holders choose to route to other exchanges or to off-exchange venues. Based on the profile of firms generally, the Exchange believes that additional ETP Holders could qualify for Removing Tier 4 with the additional qualification criteria if they choose to direct order flow to the Exchange. Without having a view of ETP Holders' activity on other exchanges and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would result in any additional ETP Holders directing orders to the Exchange in order to qualify for the Removing Tier 4 or Removing Tier 5 rate.

The proposed changes are not otherwise intended to address any other issues, and the Exchange is not aware of any problems that ETP Holders would have in complying with the proposed changes.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[13] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[14] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

As discussed above, the Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [15] While Regulation NMS has enhanced competition, it has also fostered a ''fragmented'' market structure where trading in a single stock can occur across multiple trading centers. When multiple trading centers compete for order flow in the same stock, the Commission has recognized that ''such competition can lead to the fragmentation of order flow in that stock.'' [16]

Given the current competitive environment, the Exchange believes that the proposal represents a reasonable attempt to attract additional order flow to the Exchange while aligning the Exchange's fees with those charged by other markets. Specifically, the

[10] *See, e.g.,* Nasdaq BX Pricing Schedule, available at *https://www.nasdaqtrader.com/Trader.aspx?id=bx_pricing* (providing $0.0030 standard rate for adding displayed liquidity); Cboe EDGA Exchange Fee Schedule, available at *https://www.cboe.com/us/equities/membership/fee_schedule/edga/* (providing $0.0030 standard rate for adding displayed liquidity).

[11] The Exchange currently uses a similarly-structured requirement for Removing Tier 1. *See* Securities Exchange Act Release No. 89640 (August 12, 2020), 85 FR 53041 (August 27, 2020) (SR–NYSENAT–2020–27).

[12] *See* Nasdaq BX Pricing Schedule, available at *https://www.nasdaqtrader.com/Trader.aspx?id=bx_pricing* (providing rebates of $0.0005 for Tapes A and B and $0.0004 for Tape C for firms adding at least 50,000 ADV).

[14] 15 U.S.C. 78f(b)(4) & (5).

[15] *See* Regulation NMS, *supra* note 4, at 37499.

[16] *See* Securities Exchange Act Release No. 61358, 75 FR 3594, 3597 (January 21, 2010) (File No. S7–02–10) (Concept Release on Equity Market Structure).

proposed fee increase for non-tiered orders adding liquidity in securities priced at or above $1.00 is reasonable because it is competitive and the proposed fee would remain advantageous when compared to the fees charged by other markets for non-tiered orders adding liquidity.[17] In addition, the Exchange believes that the proposed changes to the Removing Tiers are reasonable because they would encourage greater liquidity for ETP Holders routing order flow to the Exchange.

The Exchange believes that the proposal as a whole represents a reasonable effort to promote price discovery and enhanced order execution opportunities for ETP Holders. All ETP Holders would benefit from the greater amounts of liquidity on the Exchange, which would represent a wider range of execution opportunities.

The Proposal Is an Equitable Allocation of Fees and Rebates

The Exchange believes the proposed rule change equitably allocates its fees among its market participants. The proposed change would continue to encourage ETP Holders to both submit additional liquidity to the Exchange and execute orders on the Exchange, thereby contributing to robust levels of liquidity, to the benefit of all market participants.

The Exchange believes that increasing the fee currently charged for non-tiered orders adding liquidity in securities priced at or above $1.00 is an equitable allocation of fees. Even though the proposed change would increase the fee for non-tiered orders, the Exchange does not believe that it will discourage executions on the Exchange because the proposed fee would remain advantageous when compared with comparable fees charged by other markets.[18] To the extent that the proposed change continues to attract order flow to the Exchange, this order flow would make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule change would continue to improve market quality for all market participants on the Exchange and, as a consequence, continue to attract more order flow to the Exchange, thereby improving market-wide quality and price discovery.

Similarly, the Exchange believes that the proposed changes to the Removing Tiers would encourage the submission of additional liquidity to the Exchange, thus enhancing order execution opportunities for ETP Holders from the additional amounts of liquidity present on the Exchange. All ETP Holders would benefit from the greater amounts of liquidity that would be present on the Exchange, which would provide greater execution opportunities and improve market quality.

The Exchange further believes that the proposal constitutes an equitable allocation of fees and credits because all similarly situated ETP Holders and other market participants would be eligible for the same general and tiered rates and would be eligible for the same fees and credits. Moreover, the proposed change is equitable because the revised fees would apply equally to all similarly situated ETP Holders. The proposal neither targets nor will it have a disparate impact on any particular category of market participant.

The Proposal Is Not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. In the prevailing competitive environment, ETP Holders are free to disfavor the Exchange's pricing if they believe that alternatives offer them better value.

Moreover, the proposal neither targets nor will it have a disparate impact on any particular category of market participant. The Exchange believes that the proposal does not permit unfair discrimination because the proposal would be applied to all similarly situated ETP Holders and all ETP Holders would be subject to the same modified fee for non-tiered orders adding liquidity in securities priced at or above $1.00, and to the same qualification requirements for modified Removing Tier 4 and new Removing Tier 5. Accordingly, no ETP Holder already operating on the Exchange would be disadvantaged by the proposed allocation of fees and credits.

The Exchange further believes that the proposed changes would not permit unfair discrimination among ETP Holders because the non-tiered and tiered rates are available equally to all ETP Holders. As described above, in today's competitive marketplace, order flow providers have a choice of where to direct order flow, and the Exchange believes there are additional ETP Holders that could qualify if they chose to direct their order flow to the Exchange.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[19] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional liquidity and order flow to a public exchange, thereby enhancing order execution opportunities for ETP Holders. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [20]

Intramarket Competition. The proposed change is designed to attract additional order flow to the Exchange. As described above, the Exchange believes that the proposed change would provide additional incentives for market participants to route liquidity-providing and liquidity-removing orders to the Exchange. Greater liquidity benefits all market participants on the Exchange by providing more trading opportunities and encourages ETP Holders to send orders, thereby contributing to robust levels of liquidity. The proposed revised requirements for the tiered rebates and fees would be available to all similarly-situated market participants, and thus, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily choose to send their orders to other exchanges and off-exchange venues if they deem fee levels at those other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and off-exchange venues. Because competitors are free to modify their own fees and rebates in response, and because market participants may readily adjust their order routing practices, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition.

[17] *See supra* note 10.

[18] *See id.*

[19] 15 U.S.C. 78f(b)(8).

[20] Regulation NMS, 70 FR at 37498–99.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar order types and comparable transaction pricing, by encouraging additional orders to be sent to the Exchange for execution.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [21] of the Act and subparagraph (f)(2) of Rule 19b–4 [22] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2021–21 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2021–21. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2021–21 and should be submitted on or before December 10, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34418; 812–15268]

SEI Asset Allocation Trust, et al.

November 15, 2021.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application under Section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from Section 15(c) of the Act.

SUMMARY: The requested exemption would permit a Trust's board of trustees (the ''Board'') to approve new sub-advisory agreements and material amendments to existing sub-advisory agreements without complying with the in-person meeting requirement of Section 15(c) of the Act.

APPLICANTS: SEI Asset Allocation Trust, SEI Daily Income Trust, SEI Institutional International Trust, SEI Institutional Investments Trust, SEI Institutional Managed Trust, SEI Tax Exempt Trust, Adviser Managed Trust, New Covenant Funds, SEI Catholic Values Trust (each a ''Trust'') and SEI Investments Management Corporation.

FILING DATES: The application was filed on September 27, 2021.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the relevant applicant with a copy of the request by email, if an email address is listed for the relevant applicant below, or personally or by mail, if a physical address is listed for the relevant applicant below.

Hearing requests should be received by the Commission by 5:30 p.m. on December 10, 2021, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: John J. O'Brien, Esq., *johnobrien@morganlewis.com.*

FOR FURTHER INFORMATION CONTACT: Lisa Reid Ragen, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and condition, please refer to Applicants' application, dated September 27, 2021, which may be obtained via the Commission's website by searching for the file number, using the Company name box, at *http://www.sec.gov/search/search.htm,* or by calling (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93570; File No. SR–NYSEArca-2021–37]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the First Trust SkyBridge Bitcoin ETF Trust Under NYSE Arca Rule 8.201–E

November 15, 2021.

On May 6, 2021, NYSE Arca, Inc. (''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the First Trust SkyBridge Bitcoin ETF Trust under NYSE Arca Rule 8.201–E (Commodity-Based Trust Shares). The proposed rule change was published for comment in the **Federal Register** on May 27, 2021.[3]

On July 7, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On August 20, 2021, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act [8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on May 27, 2021.[9] The 180th day after publication of the proposed rule change is November 23, 2021. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised in the comment letters that have been submitted in connection therewith. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates January 22, 2022, as the date by which the Commission shall either approve or disapprove the proposed rule change (File Number SR–NYSEArca-2021–37).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2021–25224 Filed 11–18–21; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93574; File No. SR–NYSEArca–2021–29]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of ConvexityShares 1x SPIKES Futures ETF Under NYSE Arca Rule 8.200–E (Trust Issued Receipts)

November 15, 2021.

On May 13, 2021, NYSE Arca, Inc. (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the ConvexityShares 1x SPIKES Futures ETF, a series of the ConvexityShares Trust, under NYSE Arca Rule 8.200–E, Commentary .02 (''Trust Issued Receipts''). The proposed rule change was published for comment in the **Federal Register** on May 26, 2021.[3] On July 2, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.[5] On July 26, 2021, the Exchange filed Amendment No. 1 to the proposed rule change, which replaced and superseded the proposed rule change as originally filed.[6] On August 12, 2021, the Commission noticed filing of Amendment No. 1 and instituted proceedings pursuant to Section 19(b)(2)(B) of the Act [7] to determine whether to approve or disapprove the proposed rule change.[8]

Section 19(b)(2) of the Act [9] provides that, after initiating disapproval proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for notice and comment in the **Federal Register** on May 26, 2021. November 22, 2021 is 180 days from that date, and January 21, 2022 is 240 days from that date.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and comment

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93577; File No. SR–Phlx–2021–68]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend FINRA Fees

November 15, 2021.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 5, 2021, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Phlx's Pricing Schedule at Equity 7, Section 4, Membership Fees, and Options 7, Section 9, Other Member Fees, to reflect adjustments to FINRA Registration Fees and Fingerprinting Fees.

While the changes proposed herein are effective upon filing, the Exchange has designated the amendments become operative on January 2, 2022.[4]

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

This proposal amends Phlx's Schedule at Equity 7, Section 4, Membership Fees, and Options 7, Section 9, Other Member Fees, to reflect adjustments to FINRA Registration Fees and Fingerprinting Fees.[5] The FINRA fees are collected and retained by FINRA via Web CRD for the registration of employees of Phlx members that are not FINRA members (''Non-FINRA members''). The Exchange is merely listing these fees on its Pricing Schedule. The Exchange does not collect or retain these fees.

Options 7

Today, Phlx Options 7, Section 9C, provides a list of FINRA Fees. The Exchange proposes to amend Options 7, Section 9C to: (1) Add the title ''General Registration Fees:''; (2) indicate ''CRD'' is the ''Central Registration Depository'' or ''CRD''; and (3) remove the numbering from (1) to (3).

With respect to the General Registration Fees, the Exchange proposes to increase the $100 fee to $125 for each initial Form U4 filed for the registration of a representative or principal. This amendment is made in accordance with a recent FINRA rule change to adjust to its fees.[6] The Exchange also proposes to amend the description of the $45 registration fee from ''annually for each of the member's registered representatives and principals for system processing'' to ''FINRA Annual System Processing Fee Assessed only during Renewals.'' The proposed new title is more precise.

With respect to the fingerprint processing fees, the Exchange notes that the current fees do not reflect the fees assessed by FINRA today. The Exchange proposes to amend the current fees to reflect the current fees that are assessed by FINRA. The proposed new rule text, with the title, ''Fingerprint Processing Fees:'' added, would provide,

Fingerprint Processing Fees:
$29.50—Initial Submission (Electronic)
$44.50—Initial Submission (Paper)
$15.00—Second Submission (Electronic)
$30.00—Second Submission (Paper)
$29.50—Third Submission (Electronic)
$44.50—Third Submission (Paper)
$30.00—FINRA Processing Fee for Fingerprint Results Submitted by Self-Regulatory Organizations other than FINRA.

In 2012, FINRA only offered one set of fees ($27.50 for the initial submission, $13.00 for the second submission, and $27.50 for the third submission). In 2013, FINRA amended its fingerprint fees and offered two sets of fees. For fingerprints submitted on paper card, the fees are $44.50 per initial submission, $30.00 per second submission, and $44.50 per third submission. For fingerprints submitted electronically, the fees are $29.50 per initial submission, $15.00 per second submission, and $29.50 per third submission.[7] By updating the

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 90176 (October 14, 2020), 85 FR 66592 (October 20, 2020) (SR–FINRA–2020–032) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adjust FINRA Fees To Provide Sustainable Funding for FINRA's Regulatory Mission).

[5] FINRA operates Web CRD, the central licensing and registration system for the U.S. securities industry. FINRA uses Web CRD to maintain the qualification, employment and disciplinary histories of registered associated persons of broker-dealers.

[6] *Id.* FINRA noted in its rule change that it was adjusting its fees to provide sustainable funding for FINRA's regulatory mission.

[7] *See* Securities Exchange Act Release No. 67247 (June 25, 2012) 77 FR 38866 (June 29, 2012) (SR–FINRA–2012–030) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Sections 4 and 6 of Schedule A to the FINRA By-Laws Regarding Fees Relating to the Central Registration Depository). FINRA notes in this rule change that it is proposing a two-tiered fingerprint processing fee structure in part to reflect that the costs associated with processing fingerprints submitted via a hard copy fingerprint card are much higher than those that are submitted electronically. Specifically, fingerprints submitted by a hard copy card require additional processing by FINRA, including adding a barcode, if necessary, to the card for tracking purposes; scanning the fingerprints and converting them to a digital image for submission to the FBI; and, for first-time registrants, entering the individual's personal and demographic information into the CRD system. FINRA noted that members will be able to choose how they submit their associated persons' fingerprints and therefore will have some control over the fees they incur for fingerprint processing. FINRA also noted an FBI Fee of $11.25 is assessed as well.

fingerprinting fees, the Exchange would properly reflect the fees assessed today by FINRA.[8]

The Exchange is deleting the fees noted within current Options 7, Section 9C at (4)–(7).[9] These fingerprint fees, which are proposed to be deleted, were superseded by the FINRA fingerprinting fees which were adopted in 2013.

The FINRA Web CRD Fees are user-based and there is no distinction in the cost incurred by FINRA if the user is a FINRA member or a Non-FINRA member. Accordingly, the proposed fees mirror those currently assessed by FINRA.

The Exchange also proposes to update a rule citation within the Continuing Education Fees from ''General 4, Section 1.1240'' to ''General 4, Section 1240.''

Equity 7

The Exchange also proposes to amend Equity 7, Section 4, Membership Fees, to add a new section ''B'' titled ''Regulatory, Registration, and Processing Fees.'' This new section ''B'' would inform PSX members that applicable FINRA fees are located within Options 7, Section 9C. Members of Phlx may elect to become PSX only members, therefore this new rule text would provide information to those members regarding FINRA Fees. The Exchange proposes to state, ''A list of fees that will be collected and retained by FINRA via the Web CRD registration system for the registration of associated persons of Exchange members that are not also FINRA members is available within Options 7, Section 9C.''

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[11] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Options 7

The Exchange believes it is reasonable to increase the $100 fee for each initial Form U4 filed for the registration of a representative or principal to $125 in accordance with an adjustment to FINRA's fees.[12] The Exchange's rule text will reflect the current registration rate that will be assessed by FINRA as of January 2, 2022. Amending the title of the $45 fee to be more precise will provide greater transparency to this fee. Updating FINRA's fingerprint processing fees to reflect the current charges will bring greater transparency to these charges that are currently assessed and collected by FINRA. The proposed fees are identical to those adopted by FINRA for use of Web CRD for disclosure and the registration of FINRA members and their associated persons. These costs are borne by FINRA when a Non-FINRA member uses Web CRD.

The Exchange believes that its proposal to increase the $100 fee for each initial Form U4 filed for the registration of a representative or principal to $125 is equitable and not unfairly discriminatory as the amendment will reflect the current fee that will be assessed by FINRA to all members who require Form U4 filings as of January 2, 2022. Amending the title of the $45 fee to be more precise will provide greater transparency to this fee. Updating the fingerprint processing fees to reflect the current fees is equitable and not unfairly discriminatory as FINRA currently assesses these rates to all members. Further, the proposal is also equitable and not unfairly discriminatory because the Exchange will not be collecting or retaining these fees, therefore, the Exchange will not be in a position to apply them in an inequitable or unfairly discriminatory manner.

Equity 7

The Exchange's proposal to amend Equity 7, Section 4, Membership Fees, to add a new section ''B'' titled ''Regulatory, Registration, and Processing Fees'' that informs members of applicable FINRA Fees is reasonable. This new section ''B'' would inform PSX members that applicable FINRA fees are located within Options 7, Section 9C. Members of Phlx may elect to become PSX only members. The proposed rule text would provide information to those members regarding FINRA Fees.

The Exchange's proposal to amend Equity 7, Section 4, Membership Fees, to add a new section ''B'' titled ''Regulatory, Registration, and Processing Fees'' that informs members of applicable FINRA Fees is equitable and not unfairly discriminatory because the Exchange will not be collecting or retaining these fees, therefore will not be in a position to apply them in an inequitable or unfairly discriminatory manner.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Options 7

The Exchange believes that its proposal to increase the $100 fee for each initial Form U4 filed for the registration of a representative or principal to $125 does not impose an undue burden on competition as the amendment will reflect the current fee that will be assessed by FINRA to all members who require Form U4 filings as of January 2, 2022. Amending the title of the $45 fee to be more precise will provide greater transparency to this fee. Updating the fingerprint processing fees to reflect the current fees does not impose an undue burden on competition as FINRA currently assesses these rates to all members. Further, the proposal does not impose an undue burden on competition because the Exchange will not be collecting or retaining these fees, therefore, the Exchange will not be in a position to apply them in an inequitable or unfairly discriminatory manner.

Equity 7

The Exchange's proposal to amend Equity 7, Section 4, Membership Fees, to add a new section ''B'' titled ''Regulatory, Registration, and Processing Fees'' that informs members of applicable FINRA Fees does not impose an undue burden on competition because the Exchange will not be collecting or retaining these fees, therefore will not be in a position to apply them in an inequitable or unfairly discriminatory manner.

[8] *See https://www.finra.org/registration-exams-ce/classic-crd/fingerprints/fingerprint-fees.*

[9] The Exchange proposes to delete the following rule text:

(4) $15 for processing and posting to the CRD system each set of fingerprints submitted electronically by the member, plus a pass-through of any other charge imposed by the United States Department of Justice for processing each set of fingerprints;

(5) $30 for processing and posting to the CRD system each set of fingerprint cards submitted in non-electronic format by the member to FINRA, plus any other charge that may be imposed by the United States Department of Justice for processing each set of fingerprints;

(6) $30 for processing and posting to the CRD system each set of fingerprint results and identifying information that has been processed through a self-regulatory organization other than FINRA; and

(7) $110 for the additional processing of each initial or amended Form BD that includes the initial reporting, amendment, or certification of one or more disclosure events or proceedings.

[11] 15 U.S.C. 78f(b)(4) and (5).

[12] *See* note 3 above.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2021–68 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2021–68. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2021–68, and should be submitted on or before December 10, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93575; File No. SR–NYSEArca–2021–28]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of ConvexityShares Daily 1.5x SPIKES Futures ETF Under NYSE Arca Rule 8.200–E (Trust Issued Receipts)

November 15, 2021.

On May 13, 2021, NYSE Arca, Inc. (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the ConvexityShares Daily 1.5x SPIKES Futures ETF, a series of the ConvexityShares Trust, under NYSE Arca Rule 8.200–E, Commentary .02 (''Trust Issued Receipts''). The proposed rule change was published for comment in the **Federal Register** on May 26, 2021.[3] On July 2, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.[5] On July 26, 2021, the Exchange filed Amendment No. 1 to the proposed rule change, which replaced and superseded the proposed rule change as originally filed.[6] On August 12, 2021, the Commission noticed filing of Amendment No. 1 and instituted proceedings pursuant to Section 19(b)(2)(B) of the Act[7] to determine whether to approve or disapprove the proposed rule change.[8] The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act[9] provides that, after initiating disapproval proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for notice and comment in the **Federal Register** on May 26, 2021. November 22, 2021 is 180 days from that date, and January 21, 2022 is 240 days from that date.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates January 21, 2022 as the date by which the Commission shall either approve or disapprove the proposed rule change, as modified by Amendment No. 1 (File No. SR–NYSEArca–2021–28).

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93571; File No. SR–CboeBZX–2021–039]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the Wise Origin Bitcoin Trust Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares

November 15, 2021.

On May 10, 2021, Cboe BZX Exchange, Inc. (''BZX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Wise Origin Bitcoin Trust under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares. The proposed rule change was published for comment in the **Federal Register** on June 1, 2021.[3]

On July 13, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On August 23, 2021, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act[6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act[8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on June 1, 2021.[9] The 180th day after publication of the proposed rule change is November 28, 2021. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised in the comment letters that have been submitted in connection therewith. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates January 27, 2022, as the date by which the Commission shall either approve or disapprove the proposed rule change (File Number SR–CboeBZX–2021–039).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

For Privacy related matters, please contact Keith A. Bluestein, Chief Information Officer/ Senior Agency Official for Privacy, Office of the Chief Information Officer, U.S. Small Business Administration, 409 3rd Street SW, Suite 4000, Washington, DC 20416 or via email to *Privacyofficer@sba.gov.*

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552a), as amended, embodies fair information practice principles in a statutory framework governing how Federal agencies collect, maintain, use, and disseminate individuals' personal information. The Privacy Act applies to records about individuals that are maintained in a ''system of records.'' A system of records is a group of any records under the control of a federal agency from which information is retrieved by the name of an individual or by a number, symbol or another identifier assigned to the individual. The Privacy Act requires each Federal agency to publish in the **Federal Register** a System of Records Notice (SORN) identifying and describing each system of records the agency maintains, the purposes for which the Agency uses the Personally Identifiable Information (PII) in the system, the routine uses for which the Agency discloses such information outside the Agency, and how individuals can exercise their rights related to their PII information.

The modified Privacy Act system of records titled Disaster Loan Case File, (SBA 20) will be used to provide notice to applicants and recipients of disaster assistance through its Office of Disaster Assistance (ODA), which coordinates low-interest, long-term loans for damages caused by a declared disaster for individuals, businesses of all sizes, private non-profit organizations, homeowners, and renters. SBA 20 also includes loan advances and grants administered by ODA, which are available to small businesses, including sole proprietors, and private non-profit organizations.

SBA 20 collects information relating to pre-application registrants, disaster home andbusiness loan applicants, recipients of a disaster home and business loans from the time of pre-application registration, loan advance applicants and recipients, and grant applicants and recipients. Non-exhaustive list includes loan applications, loan advance applications, grant applications, supporting documentation, personal history, financial statements, tax information, credit information, investigative reports, appraisal reports, waivers, loan record transfers, correspondence, recommendations, authorizations, award amount, disbursement amount, loan term and rate, payment history, collateral, UCC filings and re-filings, collection and liquidation activities, settlements and compromises, bank information, field visit reports, borrower's insurance information and loan accounting information.

Major application/system components to this system of records comprise of Disaster CreditManagement System(s), Shuttered Venue Operators Grant System (SVOG), Rapid Finance (RF) Portal, Ayaya Automated Interactive Voice Response (IVR), cloud services, legacyand multiple portals. The modification of SBA 20 will not have any undue impact on the privacy ofindividuals and its use is compatible with collection.

SYSTEM NAME AND NUMBER:

Disaster Loans Case Files, (SBA 20).

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

SBA DCMS Operations Center, Herndon, VA, Washington, DC, Chicago, IL, other Salesforce, and Microsoft Offsite locations within the United States; Rapid Financein Bethesda, MD;

SYSTEM MANAGER(S):

Michael Yeager, IT Director, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6032, Washington, DC 20416 or via email *Michael.Yeager@sba.gov,* telephone 202–205–6536.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

15 U.S.C. 634(b)(6), 44 U.S.C. 3101The Economic Aid to Hard-Hit Small Businesses, Nonprofits and Venues Act, Public Law 116–260

PURPOSE(S) OF THE SYSTEM:

SBA 20 collects information relating to pre-applicationregistrants, disaster home and business loan applicants, recipients of a disaster home andbusiness loans from the time of pre-application registration, loan advance applicants and recipients, and grant applicants and recipients.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals, businesses, principals, including sole proprietors, homeowners, renters, and non-profits.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information relating to pre-application registrants, disaster home and business loan applicants, loan advance, grant applicants and recipients of loan advances, grants, disaster home and business loans. Included are name, business name, address, tax identification number, date of birth, telephone number, identification, loan information, loan advance, grant applications, supporting documents, personal history, financial statements, credit information, investigative reports, appraisers' reports, waivers, loan record transfers, correspondence, recommendations,authorizations, disbursement amount, term and rate, payment history, collateral, Uniform Commercial Code (UCC) filings and re-filings, collection and liquidation activities, financial statements, settlements and compromises, bank information, field visit reports, borrower's insurance information and loan accounting information.

RECORD SOURCE CATEGORIES:

Subject, individuals, SBA employees, SBA contractors, financial institutions, credit reporting agencies, law enforcement agencies, Treasury Department and Federal Emergency Management Agency (FEMA).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDINGCATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act,all or a portion of the information contained in this system may be disclosed to authorizedentities, as is determined to be relevant and necessary, outside SBA as a routine use pursuant to 5U.S.C. 552a(b)(3) as follows:

A. To the public on approved loans. This information includes recipient name and address, term and rate of the loan and the amount paid in full or charged off.

B. To the public on approved loan advances and grants. This information includes recipient name, address, period of performance and amount of the loan advance or grant.

C. To provide information to potential investors who are interested in bidding on loans made available by the Agency in a sale of assets. Investors will be required to execute a confidentiality agreement prior to reviewing any record or information.

D. To the Federal, State, local or foreign agency or professional organization which has responsibility for investigating, prosecuting, or enforcing violations, statutes, rules, regulations or orders issued when the Agency identifies a record, either alone or in conjunction with other information, which indicates a violation or potential violation of law.

E. To request information from a Federal, State, or local agency or a private credit agency maintaining civil, criminal, or other information relevant to determining an applicant's suitability for a loan, loan advance, or grant; this may be requested individually or part of a computer match.

F. In response to a request from a State or Federal agency in connection with the issuance of a grant, loan or other benefit by that agency which is relevant to their decision on the matter; this may be requested individually or part of a computer match.

G. To other Federal agencies to conduct computer matching programs to locate and identify delinquent SBA borrowers who are receiving Federal salaries or benefit payments. Disclosure will be made if the records indicate the loan is in default, at least 30 days past due or to update a previous disclosure. SBA will make disclosures to obtain repayments of debts under the provisions of the Debt Collection Act of 1982 by voluntary repayment, or administrative or salary offset procedures.

H. To a consumer reporting agency to also include information from the new ID Theft Form 3515.

I. To provide the Internal Revenue Service (IRS) with access to an individual's records for an official audit to the extent the information is relevant to the IRS's function.

J. To a court, magistrate, grand jury, or administrative tribunal, opposing counsel during such proceedings or in settlement negotiations when presenting evidence.

K. To a Congressional office from an individual's record when that office is inquiring onthe individual's behalf; the Member's access rights are no greater than the individuals.

L. In a proceeding before a court, or adjudicative body, or a dispute resolution body before which SBA is authorized to appear or before which any of the following is a party to litigation or has an interest in litigation, provided, however, that SBA determines that the use of such records is relevant and necessary to the litigation, and that, in each case, SBA determines that disclosure of the records to a court or other adjudicative body is a use of the information contained in the records that is a compatible purpose for which the records were collected: SBA, or any SBA component; any SBA employee in their official capacity; any SBA employee in their individual capacity where DOJ has agreed to represent the employee; or The United States Government, where SBA determines that litigation is likely to affect SBA or any of its components.

M. To transmit data to U.S. Department of the Treasury to effect issuance of loan, loan advance, or grant funds to borrowers or recipients.

N. To the Federal Emergency Management Agency (FEMA) to coordinate the issuance offederal disaster assistance to disaster victims and monitor for duplication.

O. To the Department of Justice (DOJ), including offices of the U.S Attorneys, or other Federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is deemed by the SBA to be relevant or necessary to the litigation or the SBA has an interest in such litigation when any of the following are a party to the litigation or have an interest in the litigation: (1) Any employee or former employee of the SBA in his or her official capacity; (2) Any employee or former employee of the SBA in his or her individual capacity when DOJ or SBA has agreed to represent the employee or a party to the litigation or have an interest in the litigation; or (3)The United States or any agency thereof.

P. To the National Archives and Records Administration (NARA) or General Services Administration (GSA) pursuant to records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

Q. To an agency or organization, including the SBA's Office of Inspector General, for the purpose of performing audit or oversight operations as authorized by law. but only such information as is necessary and relevant to such audit or oversight function.

R. To appropriate agencies, entities, and persons when (1) SBA suspects or has confirmed that there has been a breach of the system of records, (2) SBA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, SBA (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with SBA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

S. To another Federal agency or Federal entity, when SBA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

T. To another agency or agent of a Government jurisdiction within or under the control of the U.S., lawfully engaged in national security or homeland defense when disclosure is undertaken for intelligence, counterintelligence activities (as defined by 50 U.S.C. 3003(3)), counterterrorism, homeland security, or related law enforcement purposes, as authorized by U.S. law or Executive Order.

U. To SBA contractors, grantees, volunteers, interns, regulators, and experts who have been engaged by SBA to assist in the performance and performance improvement of a service related to this system of records and who need access to the records to perform this activity which may also include for regulatory purposes. Recipients of these records shall be required to comply with the requirements of the Privacy Act of 1974, as amended, 5 U.S.C. 552a.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper and electronic files.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by name of individual, business name, application number, grant number, Data Universal Numbering System, cross-referenced loan number or borrower's Social

Security Number or Employer Identification Number or FEMA registration number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained in accordance with latest edition SBA Standard Operating Procedure (SOP) series 00 41, schedules Records Management Records and Agency Accountability Records. Records maintained as part of the General Records Schedules (GRS) are disposed of in accordance with applicable SBA policies.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access and use are limited to persons with official need to know. Users are evaluated on a recurring basis to ensure need-to-know still exists. Safeguards are implemented in accordance with the Federal Information Security Modernization Act of 2014 (FISMA) and are evaluated on a recurring basis to ensure desired operation.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them should submit a Privacy Act request to the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.* Individuals must provide their full name, mailing address, personal email address, telephone number, and a detailed description of the records requested. Individuals requesting access must also follow SBA's Privacy Act regulations regarding verification of identity and access to records (13 CFR part 102 subpart B).

CONTESTING RECORD PROCEDURES:

Individuals wishing to contest information contained in records about them should submit a Privacy Act request to the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.* Individuals must provide their full name, mailing address, personal email address, telephone number, and a detailed description of the records requested. Requesting individuals must follow SBA's Privacy Act regulations regarding verification of identity and access to records (13 CFR part 102 subpart B).

NOTIFICATION PROCEDURES:

Individuals may make record inquiries in person at the address listed below or in writing to the Systems Manager through the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.*

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

74 FR 14889 (April 1, 2009); 72 FR 48312 (August 23, 2007); 69 FR 76964 (December 23, 2004); and 69 FR 58597 (September 30, 2004).

SMALL BUSINESS ADMINISTRATION

Privacy Act of 1974; System of Records Notice

AGENCY: Small Business Administration.

ACTION: Notice of a new system of records.

SUMMARY: The U.S. Small Business Administration (SBA) proposes a new system of records titled Reasonable Accommodations, Personal Assistance Services, and Medical/Religious Exceptions (SBA 42), to its inventory of records systems subject to the Privacy Act of 1974, as amended. Publication of this notice complies with the Privacy Act and the Office of Management and Budget (OMB) Circular A–108 and Circular A–130. System of Records Notice (SORN) titled Reasonable Accommodations, Personal Assistance Services, and Medical/Religious Exceptions (SBA 42), includes current and former SBA employees, applicants for employment, and members of the public that request reasonable accommodations, personal assistance services or medical/religious exceptions. Reasonable accommodations and personal services for former and current federal employees may be requested to perform work-related duties. SBA is fully committed to providing reasonable accommodation and personal assistance services to employees and SBA applicants for employment as part of the larger effort to foster an inclusive organizational culture that empowers all employees to realize their full potential. Members of the public may request reasonable accommodations to attend SBA sponsored events or meetings and to seek information or services from SBA's programs or products. Medical/religious exceptions may be requested by employees and SBA applicants based on a medical condition or circumstance or a sincerely held religious belief, practice, or observance. All requests are processed through the Office of Diversity, Inclusion and Civil Rights (ODI&CR).

DATES: Submit comments on or before December 20, 2021. This new system will be effective upon publication.

ADDRESSES: You may submit comments on this notice by any of the following methods: Federal e-Rulemaking Portal: *http://www.regulations.gov:* Follow the instructions for submitting comments. Mail/Hand Delivery/Courier: Submit written comments to: Gaye Walker, Deputy Assistant Administrator, Office of Diversity, Inclusion and Civil Rights, U.S. Small Business Administration, 409 3rd Street SW, Suite 6400, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: General questions, please contact Dr. Zina Sutch, Assistant Administrator Office of Diversity, Inclusion, and Civil Rights, U.S. Small Business Administration, 409 3rd Street SW, Suite 6400, Washington, DC, 20416 or

via email, *Zina.Sutch@sba.gov,* telephone 202–836–0036. For Privacy related matters, please contact Keith A. Bluestein, Chief Information Officer/ Senior Agency Official for Privacy, Office of the Chief Information Officer, U.S. Small Business Administration, 409 3rd Street SW, Suite 4000, Washington, DC, 20416 or via email to *Privacyofficer@sba.gov.*

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552a), as amended, embodies fair information practice principles in a statutory framework governing how Federal agencies collect, maintain, use, and disseminate individuals' personal information. The Privacy Act applies to records about individuals that are maintained in a ''system of records.'' A system of records is any group of records under the control of a federal agency from which information is retrieved by the name of an individual or by a number, symbol or any other identifier assigned to the individual. The Privacy Act requires each federal agency to publish in the **Federal Register** a System of Records Notice (SORN) identifying and describing each system of records the agency maintains, the purpose for which the agency uses the Personally Identifiable Information (PII) in the system, the routine uses for which the agency discloses such information outside the agency, and how individuals can exercise their rights related to their PII information.

The new Privacy Act system of records titled Reasonable Accommodations, Personal Assistance Services, and Medical/Religious Exceptions (SBA 42) will be used to provide notice to requesters for, and recipients of, reasonable accommodations, personal assistance services, and medical/religious exceptions through the ODI&CR. The mission of the ODI&CR is to champion a diverse workforce and inclusive culture by ensuring equal access and equitable treatment regarding employment and entrepreneurial endeavors.

Requests for reasonable accommodations and personal assistance services may be made orally; however, such request must eventually be transferred to the applicable template.

This system of records is comprised of electronic and hardcopy records managed by ODI&CR. SBA 42 will not have any undue impact on the privacy of individuals and its use is compatible with collection.

SYSTEM NAME AND NUMBER:

Reasonable Accommodations, Personal Assistance Services, and Medical/Religious Exceptions (SBA 42).

SECURITY CLASSIFICATION:

Controlled Unclassified Information.

SYSTEM LOCATION:

Office of Diversity, Inclusion and Civil Rights, 409 Third Street SW, Suite 6400 Washington, DC 20416.

SYSTEM MANAGER(S):

Gaye Walker, Deputy Assistant Administrator, Office of Diversity, Inclusion and Civil Rights, U.S. Small Business Administration, 409 3rd Street SW, Suite 6400, Washington, DC 20416 or via email *Gaye.Walker@sba.gov,* telephone: 202–205–6753.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Rehabilitation Act of 1973, as amended (29 U.S.C. 791 *et seq.*); the Americans with Disabilities Act of 1990, as amended (42 U.S.C. 12102, 12114); the Americans with Disabilities Act (ADA) Amendments Act of 2008); Federal regulations (29 U.S.C. 791 *et seq.*); and 29 CFR 1614 and 1630. 29 CFR part 1630 implements the Americans with Disabilities Act; Title VII of the Civil Rights Act of 1964 (Title VII), as amended—codified at 42 U.S.C. 2000e *et seq.,* Religious Freedom Restoration Act of 1993, Executive Order (E.O.)14043, ''Requiring Coronavirus Disease 2019 Vaccination for Federal Employees''.

PURPOSE(S) OF THE SYSTEM:

The purpose of the System is to allow SBA to collect and maintain records on applicants for employment, employees (including former employees) and members of the public who request a reasonable accommodation under sections 501, 504, and 701 of the Rehabilitation Act of 1973 and under the ADA Amendments of 2008; employees who request or receive personal assistance services under Section 501, as amended, under the Rehabilitation Act; and employees requesting medical/religious exceptions in compliance with E.O. 14043, ''Requiring Coronavirus Disease 2019 Vaccination for Federal Employees'', and any other applicable laws or regulations. In addition, the purpose of the system is to track and report to appropriate entities the processing of requests for reasonable accommodations, personal assistance services and medical/religious exception requests to ensure compliance with applicable laws and regulations, and to preserve and maintain the confidentiality of medical and religious affiliation information. Information in this system will be used to evaluate, approve, deny, and/or implement a request for reasonable accommodations personal assistance services, or medical/ religious exceptions.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for employment, employees (current and former), and any other individuals who request(ed) or receive(d) a reasonable accommodation under Sections 501, 504, and 701 of the Rehabilitation Act of 1973 and under the ADA Amendments of 2008; employees who request(ed) or receive(d) personal assistance services under Section 501, as amended, of the Rehabilitation Act; and employees requesting medical/ religious exceptions per E.O. 14043. This also includes authorized individuals or representatives who file requests for reasonable accommodation on behalf of an application for employment, or who file requests for reasonable accommodations, personal assistance services or medical/religious exceptions on behalf of an employee, or other individual, as well as former employees who requested or received reasonable accommodations, personal assistance services or medical/religious exceptions during their employment with SBA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records may include, but are not limited to:

- Requester's name, contact information (*i.e.,* address, telephone number, email address and any other information provided), or other unique identifier.
- Requester's authorized representative's name and contact information (*i.e.,* address, telephone number, email address and any other information provided).
- Requester's status (*i.e.,* applicant, employee, or other).
- Request date.
- Meeting or other event for which the request was made (date and time of meeting/event, location).
- Job(s) (occupational series, grade level, and agency component) for which a reasonable accommodation or personal assistance service was requested.
- Information concerning the nature of any disability and the need for accommodation or assistance.
- Appropriate medical or other documentation provided in support of the request.
- Appropriate religious affiliation documents provided in support of the request.

• Details of a reasonable accommodation or personal assistance service request to include: Type(s) of accommodation or assistance requested; whether the accommodation requested was pre-employment or during employment, or for some other reason; whether the assistance requested was during employment; how the requested accommodation would assist the individual in applying for a job, how the requested accommodation or assistance would assist the individual in performing current job functions, or meeting some other need/requirement; the amount of time taken to process the request; whether the request was granted or denied and, if denied, the reason for the denial; and the sources of any assistance consulted in trying to identify possible reasonable accommodations or providing personal assistance services.

RECORD SOURCE CATEGORIES:

Current and former SBA employees, applicants for employment, and members of the public.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the information contained in this system may be disclosed to authorized entities, as is determined to be relevant and necessary, outside SBA as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To disclose information to medical personnel to meet a bona fide medical emergency.

B. To the federal, state, local or foreign agency or professional organization which has responsibility for investigating, prosecuting, or enforcing violations, statutes, rules, regulations or orders issued when the Agency identifies a record, either alone or in conjunction with other information, which indicates a violation or potential violation of law.

C. To disclose to an authorized appeal grievance examiner formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement, or a grievance, complaint, or appeal filed by an employee or applicant.

D. To a court, magistrate, grand jury, or administrative tribunal, opposing counsel during such proceedings or in settlement negotiations when presenting evidence.

E. To a Congressional office from an individual's record when that office is inquiring on the individual's behalf; the Member's access rights are no greater than the individuals.

F. In a proceeding before a court, or adjudicative body, or a dispute resolution body before which SBA is authorized to appear or before which any of the following is a party to litigation or has an interest in litigation, provided, however, that SBA determines that the use of such records is relevant and necessary to the litigation, and that, in each case, SBA determines that disclosure of the records to a court or other adjudicative body is a use of the information contained in the records that is a compatible purpose for which the records were collected: SBA, or any SBA component; any SBA employee in their official capacity; any SBA employee in their individual capacity where DOJ has agreed to represent the employee; or The United States Government, where SBA determines that litigation is likely to affect SBA or any of its components.

G. To another federal agency or commission with responsibility for labor or employment relations or other issues, including equal employment opportunity and reasonable accommodation or personal assistance service issues, when that agency or commission has jurisdiction over reasonable accommodation or personal assistance service.

H. To the Office of Management and Budget, Department of Justice (DOJ), Department of Labor, Office of Personnel Management, Equal Employment Opportunity Commission, or Office of Special Counsel to obtain advice regarding statutory, regulatory, policy, and other requirements related to reasonable accommodation or personal assistance service.

I. To the Department of Justice (DOJ), including offices of the U.S Attorneys, or other federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is deemed by the SBA to be relevant or necessary to the litigation or the SBA has an interest in such litigation when any of the following are a party to the litigation or have an interest in the litigation: (1) Any employee or former employee of SBA in their official capacity; (2) Any employee or former employee of SBA in their individual capacity when DOJ or SBA has agreed to represent the employee or a party to the litigation or have an interest in the litigation; or (3) The United States or any agency thereof.

J. To the National Archives and Records Administration (NARA) or General Services Administration (GSA) pursuant to records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

K. To an agency or organization, including the SBA's Office of Inspector General, for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

L. To appropriate agencies, entities, and persons when (1) SBA suspects or has confirmed that there has been a breach of the system of records, (2) SBA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, SBA (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with SBA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

M. To another federal agency or federal entity, when SBA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

N. To SBA contractors, grantees, volunteers, interns, regulators, and experts who have been engaged by SBA to assist in the performance and performance improvement of a service related to this system of records and who need access to the records to perform this activity which may also include for regulatory purpose. Recipients of these records shall be required to comply with the requirements of the Privacy Act of 1974, as amended, 5 U.S.C. 552a.

O. To consultants, contractor personnel, entities, vendors or suppliers, employees of other government agencies, whether federal, state or local, as necessary to consider a request for accommodation or to implement the decision.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper and electronic files. Maintained in locked file cabinets and cloud platform.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by name of individual, program/staff office, or request date.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained in accordance with latest edition SBA Standard Operating Procedure (SOP) series 00 41, schedules Records Management Records and Agency Accountability Records. Records maintained as part of the General Records Schedules (GRS) are disposed of in accordance with applicable SBA policies.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access and use are limited to persons with official need to know. Users are evaluated on a recurring basis to ensure need-to-know still exists. Safeguards are implemented in accordance with the Federal Information Security Modernization Act of 2014 (FISMA) and are evaluated on a recurring basis to ensure desired operation.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them should submit a Privacy Act request to the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.* Individuals must provide their full name, mailing address, personal email address, telephone number, and a detailed description of the records requested. Individuals requesting access must also follow SBA's Privacy Act regulations regarding verification of identity and access to records (13 CFR part 102 subpart B).

CONTESTING RECORD PROCEDURES:

Individuals wishing to contest information contained in records about them should submit a Privacy Act request to the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.* Individuals must provide their full name, mailing address, personal email address, telephone number, and a detailed description of the records contested. Requesting individuals must follow SBA's Privacy Act regulations regarding verification of identity and access to records (13 CFR part 102 subpart B).

NOTIFICATION PROCEDURES:

Individuals may make record inquiries in person at the address listed below or in writing to the Systems Manager through the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.*

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Zina Sutch,

Assistant Administrator, Office of Diversity, Inclusion and Civil Rights.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #17179 and #17180; Texas Disaster Number TX–00610]

Presidential Declaration Amendment of a Major Disaster for Public Assistance Only for the State of Texas

AGENCY: Small Business Administration.

ACTION: Amendment 1.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for Public Assistance Only for the State of Texas (FEMA–4586–DR), dated 09/13/2021.

Incident: Severe Winter Storms.

Incident Period: 02/11/2021 through 02/21/2021.

DATES: Issued on 11/12/2021.

Physical Loan Application Deadline Date: 11/12/2021.

Economic Injury (EIDL) Loan Application Deadline Date: 06/13/2022.

ADDRESSES: Submit completed loan applications to:U.S. Small Business Administration,Processing and Disbursement Center,14925 Kingsport Road,Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for Private Non-Profit organizations in the State of Texas, dated 09/13/2021, is hereby amended to include the following areas as adversely affected by the disaster.

Primary Counties:

Archer, Bexar, Brazos, Caldwell, Coleman, Comal, Fayette, Galveston, Jones, Kendall.

All other information in the original declaration remains unchanged.

(Catalog of Federal Domestic Assistance Number 59008)

James Rivera,

Associate Administratorfor Disaster Assistance.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments

ACTION: 60-Day notice and request for comments.

SUMMARY: The Small Business Administration (SBA) intends to request approval, from the Office of Management and Budget (OMB) for the collection of information described below. The Paperwork Reduction Act (PRA) requires federal agencies to publish a notice in the **Federal Register** concerning each proposed collection of information before submission to OMB, and to allow 60 days for public comment in response to the notice. This notice complies with that requirement.

DATES: Submit comments on or before January 18, 2022.

ADDRESSES: Send all comments to Mark Williams, *mark.williams@sba.gov* Program Manager, Office of Veteran Business Development, Small Business Administration.

FOR FURTHER INFORMATION CONTACT: Mark Williams, Program Manager, Office of Veterans Business Development, *mark.williams@sba.gov,* 202–205–6157, or Curtis B. Rich, Management Analyst, 202–205–7030, *curtis.rich@sba.gov.*

SUPPLEMENTARY INFORMATION: Boots to Business is an entrepreneurial education initiative offered by the U.S. Small Business Administration (SBA) as a career track within the Department of Defense's revised Training Assistance Program. The curriculum provides valuable assistance to transitioning service members exploring self-employment opportunities by leading them an overview of the key steps for evaluating business concepts and the foundational knowledge required for developing a business plan. Participants are also introduced to SBA resources available to help access startup capital and additional technical assistance.

The Boots to Business Post Course surveys will be online, voluntary surveys that enable the Boots to Business program office to capture data related but not limited to the effectiveness of all Boots to Business courses and the quality of the

instructors and materials, and number of small businesses created as a result of participating in Boots to Business. In an effort to improve response rates and better capture participant feedback, the Boots to Business survey will be administered to participants, using an online form, immediately prior to the final course module.

Every 12 months following course completion, a follow up survey will be emailed to all participants, to measure participant outcomes as the SBA seeks to gauge the impact of course completion on the creation of veteran owned small businesses or the motivation and confidence of veterans to pursue business ownership. Participants will be surveyed once a year for 5 years following course completion to allow for business incubation.

Solicitation of Public Comments

SBA is requesting comments on (a) Whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information.

Summary of Information Collection

OMB Control Number: 3245–0390.

Title: Boots to Business Post Course Surveys.

Description of Respondents: Service members, veterans and spouses.

Form Number: N/A.

Total Estimated Annual Responses: 18,000.

Total Estimated Annual Hour Burden: 4,000.

Curtis B. Rich,

Management Analyst.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #17270 and #17271; Florida Disaster Number FL–00170]

Administrative Declaration of a Disaster for the State of Florida

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Florida dated 11/15/2021.

Incident: Severe Storms and Flooding.

Incident Period: 09/15/2021 through 09/19/2021.

DATES: Issued on 11/15/2021.

Physical Loan Application Deadline Date: 01/14/2022.

Economic Injury (EIDL) Loan Application Deadline Date: 08/15/2022.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Citrus.

Contiguous Counties:

Florida Hernando, Levy, Marion, Sumter.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	3.125
Homeowners without Credit Available Elsewhere	1.563
Businesses with Credit Available Elsewhere	5.710
Businesses without Credit Available Elsewhere	2.855
Non-Profit Organizations with Credit Available Elsewhere	2.000
Non-Profit Organizations without Credit Available Elsewhere	2.000
For Economic Injury:	
Businesses & Small Agricultural Cooperatives without Credit Available Elsewhere	2.855
Non-Profit Organizations without Credit Available Elsewhere	2.000

The number assigned to this disaster for physical damage is 17270 6 and for economic injury is 17271 0.

The State which received an EIDL Declaration # is Florida.

BILLING CODE 8026–03–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36545]

Dallas, Garland & Northeastern Railroad, Inc.—Lease and Operation Exemption Including Interchange Commitment—Union Pacific Railroad Company

Dallas, Garland & Northeastern Railroad, Inc. (DGNO), a Class III railroad, has filed a verified notice of exemption under 49 CFR 1150.41 to amend its lease and continue to operate approximately 30.7 miles of rail line in Texas owned by Union Pacific Railroad Company (UP) (the Lines). The Lines consist of: (1) A portion of the Garland Subdivision (also known as the Greenville Subdivision) from milepost 741.3 near Lake Ray Hubbard to milepost 713.6 at Greenville, Tex.; and (2) the Sprecher Lead (also known as the Safeway Lead) at Garland, Tex. DGNO states that the Sprecher Lead has no official mileposts, but DGNO informally designates the mileposts as extending from milepost 0 to milepost 3 beginning at the switch at milepost 753.4.

According to the verified notice, DGNO has leased and operated the Lines since at least 2001. DGNO states that, pursuant to an amended lease agreement (Amended Lease) with UP, DGNO's operations over the Lines will be extended for an additional 10 years.[1]

Further, DGNO certifies that its projected revenues as a result of the transaction will not exceed those that would qualify it as a Class III carrier, but that its current annual revenues exceed $5 million. Pursuant to 49 CFR 150.42(e), if a carrier's projected annual revenues will exceed $5 million, it must, at least 60 days before this exemption is to become effective, post a notice of its intent to undertake the proposed transaction at the workplace of the employees on the affected lines, serve a copy of the notice on the national offices of the labor unions with employees on the affected lines, and certify to the Board that it has done so. However, DGNO has petitioned for

[1] According to DGNO, in preparing the verified notice, it determined that DGNO's acquisition of Board authority for lease and operation of the Lines under the current lease appears to be incomplete because the authority only applies to a portion of the Garland Subdivision and none of the Sprecher Lead. *See Dall., Garland & Ne. R.R.—Lease Exemption—Union Pac. R.R.,* FD 33686 (STB served Feb. 5, 1999) (granting authority to operate on milepost 741.3 to milepost 729.5 of the Garland Subdivision, among others). DGNO states that, in addition to seeking authority to operate under the Amended Lease, it also is seeking to correct the Board's records of the lines operated by DGNO and to confirm its authority to operate on the Lines. This request will be addressed in a subsequent decision.

waiver of the 60-day advance labor notice requirements. DGNO's waiver request will be addressed in a subsequent decision, and the effectiveness of the exemption will be postponed pending that decision.

As required under 49 CFR 1150.43(h)(1), DGNO has disclosed in its verified notice that its lease agreement with UP contains an interchange commitment pertaining to interchange with carriers other than UP. DGNO has provided additional information regarding the interchange commitment as required by 49 CFR 1150.43(h).[2]

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions to stay must be filed no later than November 26, 2021.

All pleadings, referring to Docket No. FD 36545, should be filed with the Surface Transportation Board via e-filing on the Board's website. In addition, a copy of each pleading must be served on DGNO's representative, Eric M. Hocky, Clark Hill PLC, Two Commerce Square, 2001 Market Street, Suite 2620, Philadelphia, PA 19103.

According to DGNO, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic reporting under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: November 16, 2021.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Aretha Laws-Byrum,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2021–0155]

Parts and Accessories Necessary for Safe Operation; Application for an Exemption From Verizon Connect, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) requests public comment on an application for exemption from Verizon Connect, Inc. (Verizon) to allow its Integrated Video Dashcam to be mounted lower in the windshield on commercial motor vehicles than is currently permitted.

DATES: Comments must be received on or before December 20, 2021.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA–2021–0155 using any of the following methods:

- *Website: http://www.regulations.gov.* Follow the instructions for submitting comments on the Federal electronic docket site.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.
- *Hand Delivery:* Dockets Operations, Ground Floor, Room W12–140, DOT Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. E.T., Monday–Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Docket Operations.

Instructions: All submissions must include the Agency name and docket number for this notice. For detailed instructions on submitting comments and additional information on the exemption process, see the ''Public Participation'' heading below. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the ''Privacy Act'' heading for further information.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* or to Room W12–140, DOT Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Docket Operations.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Public participation: The *http://www.regulations.gov* website is generally available 24 hours each day, 365 days each year. You may find electronic submission and retrieval help and guidelines under the ''help'' section of the *http://www.regulations.gov* website as well as the DOT's *http://docketsinfo.dot.gov* website. If you would like notification that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgment page that appears after submitting comments online.

FOR FURTHER INFORMATION CONTACT: Mr. José R. Cestero, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, MC–PSV, (202) 366–5541, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2021–0155), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comments online, go to *www.regulations.gov* and put the docket number, ''FMCSA–2021–0155'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all

[2] A copy of the lease with the interchange commitment was submitted under seal. *See* 49 CFR 1150.43(h)(1).

comments and material received during the comment period and may grant or not grant this application based on your comments.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31315(b) to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Verizon's Application for Exemption

The Federal Motor Carrier Safety Regulations require devices meeting the definition of ''vehicle safety technology,'' including Verizon's Integrated Video Dashcam, such as Collision Mitigation Systems, Adaptive Cruise Control, Lane Departure Warning, Lane Keeping Assist, Collision Mitigation, High Beam Assist, and Traffic Sign Recognition, to be mounted (1) not more than 4 inches below the upper edge of the area swept by the windshield wipers, or (2) not more than 7 inches above the lower edge of the area swept by the windshield wipers, and outside the driver's sight lines to the road and highway signs and signals. Verizon has applied for an exemption from 49 CFR 393.60(e)(1) to allow its Integrated Video Dashcam to be mounted lower in the windshield than is currently permitted. A copy of the application is included in the docket referenced at the beginning of this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b)(6), FMCSA requests public comment from all interested persons on Verizon's application for an exemption from 49 CFR 393.60(e)(1). All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2021–25249 Filed 11–18–21; 8:45 am]

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2021–0033]

Agency Information Collection Activities; Notice and Request for Comment; Government 5-Star Safety Ratings Label Consumer Research

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for public comments on approval of a new collection of information.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a new collection of information. Before a federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. This document describes one collection of information for consumer research purposes regarding the Government 5-Star Safety Ratings section of the Monroney label for which NHTSA intends to seek OMB approval. On April 28, 2020, NHTSA published a notice in the **Federal Register** soliciting public comments with a 60-day comment period. NHTSA received 4 public comments submitted to the docket during this period. Given the extended time period since the initial publication of that notice, NHTSA is publishing this new 60-day notice. This notice also responds to the comments received on the original notice.

DATES: Written comments should be submitted on or before January 18, 2022.

ADDRESSES: You may submit comments, identified by the docket number NHTSA–2021–0033 by any of the following methods:

- *Electronic submissions:* Go to the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- M*ail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except on Federal holidays. To be sure someone is there to help you, please call (202) 366–9322 before coming.
- *Fax:* 202–493–2251.

Instructions: All submissions must include the agency name and docket number for this notice. For detailed instructions on submitting comments and additional information on the information-collection process, see the Public Participation heading of the Supplementary Information section of this document. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit *https://www.transportation.gov/privacy.*

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov,* or the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to

background documents, contact Mike Joyce, Marketing Specialist, Office of Communications and Consumer Information (NCO–0200), National Highway Traffic Safety Administration, 1200 New Jersey Ave, SE, W52–238, Washington, DC, 20590. Mike Joyce's phone number is 202–366–5600 and his email address is *Mike.Joyce@dot.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) how to enhance the quality, utility and clarity of the information to be collected; and (iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB:

Title: Government 5-Star Safety Ratings Label Consumer Research.

OMB Control Number: 2127–New.

Form Number(s):

Type of Request: Request for approval of a new information collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: Three years from approval date.

Abstract: The National Highway Traffic Safety Administration (NHTSA) was established by the Highway Safety Act of 1970 (Pub. L. 91–605, 202(a), 84 Stat. 1713, 1739–40). NHTSA'S mission is to save lives, prevent injuries and reduce economic costs due to crashes on the nation's highways. Part C of the Motor Vehicle and Driver Programs, at 49 U.S.C. 32302, requires the Secretary of Transportation (NHTSA by delegation) to provide to the public information about the safety of new passenger motor vehicles. Under its New Car Assessment Program (NCAP) and 5-Star Safety Ratings Program, NHTSA conducts frontal crash, side crash and rollover resistance tests of new vehicles and, based on the results, assigns safety ratings to the tested vehicles. The ratings enable consumers to consider and assess the relative safety of vehicles before deciding which new vehicle they want to purchase.

In 2005, Congress enacted the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU) (Pub. L. 109–59), which required the safety ratings assigned by NHTSA under NCAP or a statement that the vehicle was not assigned safety ratings under NCAP to be included on the window label for new vehicles, known as the Monroney label.[1] Per 15 U.S.C. 1232(g), the window label must contain the safety ratings published or released by NHTSA's New Car Assessment Program, including the graphical depiction of those ratings, reference to the safety rating categories (*e.g.,* frontal impact crashes tests, side impact crash tests, and rollover restistance tests), and information describing the nature and meaning of the crash test data presented and a reference to *http://www.safercar.gov.* This information must be presented in a legible, visible, and prominent fashion that covers at least 8 percent of the total area of the label, or an area with a minimum length of four and a half inches and a minimum height of three and a half inches. If a vehicle has not been rated by NHTSA's New Car Assessment Program, then the label much state that.[2] On December 4, 2015, Congress enacted the Fixing America's Surface Transportation (FAST) Act, which requires the Secretary of Transportation (NHTSA by delegation) to issue a rule to ensure crash-avoidance information is provided next to crashworthiness information on vehicle window stickers.[3]

In continuing support of its mission and to assist the agency in meeting its FAST Act requirement, NHTSA proposes to conduct qualitative research using focus groups in four geographic markets located across the country to evaluate design and consumer information improvements to the Government 5-Star Safety Ratings section of the Monroney label.[4] This information collection will involve a one-time, voluntary phone screening survey involving members of the public to identify research participants and a one-time, in-person focus group. Participants in the research program will be asked to evaluate design and consumer information improvements to the Government 5-Star Safety Ratings section of the vehicle window sticker. NHTSA will use the findings from this research to support planned changes to the current label requirements and future designs for communicating vehicle safety ratings and advanced driver assistance systems performance assessments to consumers.

Summary of the Collection of Information: In this collection of information, NHTSA is seeking approval to conduct qualitative focus groups with 66 consumer participants. The focus groups aim to achieve the following objectives:

(1) Evaluate the overall appeal of each label concept and identify specific likes and dislikes associated with specific components of the label;

(2) Measure the ease of comprehension for each label concept and understand which visual and text features are most effective at conveying vehicle safety information;

(3) Assess the distinctiveness of how the information is displayed and understand how best to make the vehicle safety information stand out on the Monroney label; and,

(4) Identify additional areas of improvement related to the three main label sections relating to safety protection, safety technology, and overall vehicle safety performance.

Description of the Need for the Information and the Proposed Use of the Information: This collection of information will allow NHTSA to obtain critical information to assist the agency in fulfilling the 2015 FAST Act's requirement that NHTSA issue a rule to ensure that crash-avoidance information is provided next to crashworthiness information on vehicle windows stickers.[5] Specifically, the data from this

[1] The Automobile Information Disclosure Act of 1958, 15 U.S.C. 1231–1233, requires that new vehicles carry a sticker on a window containing specified information about the vehicle.

[2] 12 U.S.C. 1232(h).

[3] Section 24322 of Part II—Safety Through Informed Consumers Act of 2015. Public Law 114–94.

[4] 15 U.S.C. 1232.

[5] Section 24322 of Part II—Safety Through Informed Consumers Act of 2015 requires the Secretary of Transportation (NHTSA by delegation) to issue a rule to ensure that crash-avoidance information is indicated next to crashworthiness information on stickers placed on motor vehicles by their manufacturers. Public Law 114–94, December 4, 2015.

collection will be used to not only enhance consumer understanding of NHTSA's vehicle safety ratings and advanced driver assistance systems performance assessments, but also guide the development of communications that will help consumers as they consider this information in their vehicle purchase decisions.

Affected Public: Members of the public 18 years of age or older with a driver's license, who are a decision-maker for vehicle purchases for their household, has either purchased or leased a vehicle in the last six months or is planning to do so in the next 12 months and lives in one of the four recommended markets to conduct the research (Arlington, VA; Dallas, TX; Columbus, OH; or San Jose, CA).

Frequency: One time.

Number of Respondents: 500.

For this information collection, NHTSA plans to conduct a total of eight focus group sessions (two groups in each of the following recommended markets: Arlington, VA; Dallas, TX; Columbus, OH; and San Jose, CA), each lasting approximately 90 minutes. NHTSA intends for each focus group to consist of approximately nine participants (six participants in Arlington, due to social distancing restrictions) for a total of 66 participants in the focus group sessions. Based on experience, NHTSA will need to recruit up to 14 people per focus group in order to ensure that the desired number will appear at the focus group facility at the appointed time. If more than the desired number of participants show up at the facility for a given session, the research team will select nine participants (six in Arlington) based on their profile information provided in the recruitment grid to seat. The remaining participants will be paid their honorarium, thanked for their willingness to participate, and informed that they are free to go. Therefore, in order to ensure that there are approximately nine participants (six in Arlington) per focus group session, a total of 100 potential participants (eight per focus group in Arlington and 14 per focus group in other markets) will be recruited via telephone screening calls, which are estimated to take five minutes per call. In order to recruit 100 potential participants, NHTSA estimates that it will be necessary to initially reach out to and screen 500 people. This is based on experience that demonstrates that, of the people who are contacted, 20% will qualify for the study, be available and be interested in participating in the focus group.

Estimated Total Annual Burden Hours: 141 hours.

NHTSA estimates the total burden per person actually participating in this focus group research is estimated to be 95 minutes (five minutes for the screening/recruiting telephone call plus 90 minutes in the focus group discussion session). Additionally, the total burden per person recruited (but not participating in the discussions) is five minutes. Therefore, the total annual estimated burden imposed by this collection is approximately 141 hours.

Category of respondent	Number of respondents	Participation time (minutes)	Burden (hours)
Recruit/screening call (assumes 20% qualify, are available and interested in participating in the focus group)	500	5	*41.7
Participation in 90-minute group	66	90	99.0
Total Burden	.....	.....	141

*Hours or 42 hours (rounded).

Estimated Burden Costs to All Respondents: $3,360.00.

The only cost burdens respondents will incur are costs related to travel to and from the research location. The costs are minimal and are expected to be offset by the honorarium that will be provided to all research participants. NHTSA estimates that each of the focus group participants will travel less than 30 miles one-way to the focus group location (60 miles round trip). Using the IRS standard mileage rate of $0.56 per mile,[6] each respondent is expected to incur no more than $33.60 in transportation costs. Therefore, NHTSA estimates that the total costs to all respondents will be $3,360.00.

Public Comments Received During the First 60-Day Notice Period:

On April 28, 2020, NHTSA published a notice in the **Federal Register** soliciting public comments with a 60-day comment period. The comment period closed on June 29, 2020. NHTSA received 4 public comments submitted to the docket during this period including those from a disabled veteran, DEVCO Design & Development, The Center for Automotive Safety, and the National Transportation Safety Board. Comments from the public were invited on any aspects of the information collection, including (1) whether the proposed collection of information was necessary for the proper performance of the functions of the Department, including whether the information would have practical utility; (2) the accuracy of the Department's estimate of the burden of the proposed information collection; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

NHTSA received comments on the following topics:

(1) Manufacturing vehicles with appropriate standards of safety to relieve the burden for people with disabilities;

(2) Including a title and summary for the consumer research that is not restricted to the number of stars and is inclusive of the test results of conditions at speed;

(3) Concerns about the proposed collection of information lacking specificity about crash avoidance and other technology to be included in the evaluated labels and consideration for performance ratings for vulnerable road user protection systems; and

(4) Defining NCAP testing regimen before designing new safety labels.

The public comments and NHTSA's responses are summarized below:

(1) *Disabled Veteran:* ''*It would help relieve the burden for people with disabilities to have a vehicle that is appropriate for standards of safety.*''

Response: The National Highway Traffic Safety Administration's mission is to save lives, prevent injuries, and reduce economic costs due to road traffic crashes, through education, research, safety standards, and enforcement. NHTSA's 5-Star Safety Program provides comparative

[6] From Internal Revenue Services' 2021 Standard Mileage Rate for business miles driven. *https://www.irs.gov/tax-professionals/standard-mileage-rates,* last accessed May 7, 2021.

information on the safety performance of new vehicles to assist consumers with vehicle purchasing decisions and to encourage safety improvements. This proposed collection of information specifically seeks to evaluate design and consumer information improvements to the Government 5-Star Safety Ratings section of the Monroney label. NHTSA's website is accessible and 508-compliant so that vehicle safety information is available and may benefit the purchasing decisions of everyone, including those with disabilities.

(2) David DeVeau, DEVCO Design & Development: Consideration for a title and summary for the consumer research that is not restricted to the number of stars and is inclusive of the test results of conditions at speed.

Response: The title of the proposed consumer research is based on the New Car Assessment Program's (NCAP) current consumer program, the Government 5-Star Safety Ratings. NHTSA began using the 5-Star Safety Ratings system in 1993 to help consumers make informed safety choices when buying new or used vehicles. The proposed research seeks to evaluate a variety of label concepts to explore both graphical and text-based communications as potential modifications to the Government 5-Star Safety Ratings section of the Monroney label with the intent of finding the most effective way to display information related to vehicle safety. The research will also explore whether consumers prefer ratings using a 5-Star system (1–5 stars), a numerical value or numerical scale. If research findings determine that consumers prefer the presentation of ratings in an alternative way, NHTSA will explore further research which may have implications for changes to the title of the consumer program.

(3) NTSB: Concerns about the proposed collection of information lacking specificity about crash avoidance and other technology to be included in the evaluated labels and consideration for performance ratings for vulnerable road user protection systems.

Response: As NHTSA has done in the past, there are two separate tracks for NHTSA efforts to upgrade NCAP. One track is the development of NHTSA's planned changes to NCAP—which is still ongoing, and the Agency intends to seek public comment on its proposal later in 2021. This track includes specific information about the crash avoidance and other technologies that NHTSA is considering including in NCAP such as performance thresholds, testing crash avoidance features, and developing a rating system that would compare all of those features. The other track is the rulemaking proceeding to update the safety ratings section on the Monroney label, which is the visualization of the safety performance information that would be available to consumers. NHTSA conducts comprehensive consumer research to inform its rulemakings to update the visualization of NCAP's rating information that would be included on the Monroney label. This consumer research does not focus on the details of the underlying rating system or any substantive changes to NCAP. Instead, NHTSA plans to use this consumer research to determine how to best convey vehicle safety rating information, including crash avoidance technologies, to the public. This 60-day notice initiates the multi-phase consumer research that NHTSA intends to use to inform its future update to the Monroney label. NHTSA is mindful in its development of a new rating system and accompanying visualization of the rating system through the Monroney label of the flexibility necessary to allow the agency to regularly update NCAP while also minimizing the number of rulemaking actions needed each time the agency incorporates a new technology or program in NCAP.

(4) Center for Auto Safety: Defining NCAP testing regimen before designing new safety labels.

Response: Similar to the explanation provided to NTSB's comment, there are two separate tracks for upgrading NCAP and upgrading the visualization of NCAP rating information on the Monroney label. Defining the NCAP testing regimen will be part of the first track, which will be detailed in upcoming requests for comments to upgrade NCAP. The consumer research efforts focus more on the consumer understanding of the safety information on the Monroney label and what NHTSA disseminates to the public. Also, due to the limited area on the Monroney label, the consumer research will help guide NHTSA on which visualization would best convey complex safety information to the public in a more consumer-friendly and flexible approach that is intended to minimize the number of rulemaking actions to update the Monroney label after future NCAP upgrades.

Public Comments Invited: The results of this research will be used to inform labeling requirement proposals and communications for the New Car Assessment Program, also known as the Government 5-Star Safety Ratings Program. You are asked to comment on any aspects of this information collection, including (1) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the Department's estimate of the burden of the proposed information collection; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29.

Issued on: November 16, 2021.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0353]

Agency Information Collection Activity: Certification of Lessons Completed

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before January 18, 2022.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0353'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 1717 H Street NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0353'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 3032(d), 3034, 3241, 3323, 3474, 3481, 3484, 3534(b), 3680(b), 3684, 3686(a), and 10 U.S.C 16131(e), and chapter 31 section 510., and 38 CFR 21.4203(e), 21.4206, 21.5200(d) & (g), 21.7140(c)(3), 21.7159, 21.7640(a)(4), 21.7659, and 21.9720.

Title: Certification of Lessons Completed.

OMB Control Number: 2900–0353.

Type of Review: Revision of a currently approved collection.

Abstract: VA uses information from the current collection to determine the number of lessons completed by the student and serviced by the correspondence school, and to determine the date of completion or termination of correspondence training. VA pays education benefits based on the information furnished on the form. Without this information, VA would be unable to determine the proper payment or the student's training status.

Affected Public: Individuals and Households.

Estimated Annual Burden: 103 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: Quarterly.

Estimated Number of Respondents: 616.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This major final rule addresses: Changes to the physician fee schedule (PFS); other changes to Medicare Part B payment policies to ensure that payment systems are updated to reflect changes in medical practice, relative value of services, and changes in the statute; Medicare Shared Savings Program requirements; updates to the Quality Payment Program; Medicare coverage of opioid use disorder services furnished by opioid treatment programs; updates to certain Medicare provider enrollment policies; requirements for prepayment and post-payment medical review activities; requirement for electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan, or a Medicare Advantage Prescription Drug (MA–PD) plan; updates to the Medicare Ground Ambulance Data Collection System; changes to the Medicare Diabetes Prevention Program (MDPP) expanded model; and amendments to the physician self-referral law regulations.

DATES: These regulations are effective on January 1, 2022.

FOR FURTHER INFORMATION CONTACT: *DivisionofPractitionerServices@cms.hhs.gov,* for any issues not identified below.

Michael Soracoe, (410) 786–6312, or *DivisionofPractitionerServices@cms.hhs.gov,* for issues related to practice expense, work RVUs, conversion factor, and PFS specialty-specific impacts.

Larry Chan, (410) 786–6864, for issues related to potentially misvalued services under the PFS.

Patrick Sartini, (410) 786–9252, and Larry Chan, (410) 786–6864, for issues related to telehealth services and other services involving communications technology.

Julie Adams, (410) 786–8932, for issues related to payment for anesthesia services.

Sarah Leipnik, (410) 786–3933, or *DivisionofPractitionerServices@cms.hhs.gov,* for issues related to split (or shared) services.

Michelle Cruse, (410) 786–7540, and Michael Konieczny, (410) 786–0825, for issues related to payment for vaccine administration services.

Regina Walker-Wren, (410) 786–9160, for issues related to billing for services of physician assistants and PFS payment for teaching physician services.

Pamela West, (410) 786–2302, for issues related to PFS payment for therapy services, medical nutrition therapy services, and services of registered dietitians and nutrition professionals.

Liane Grayson, (410) 786–6583, for issues related to coinsurance for certain colorectal cancer screening services and PFS payment for critical care services.

Lisa Parker, (410) 786–4949, and Michele Franklin, (410) 786–9226, for issues related to RHCs and FQHCs.

Laura Kennedy, (410) 786–3377, for issues related to drugs payable under Part B.

Heather Hostetler, (410) 786–4515, and Elizabeth Truong, 410–786–6005, for issues related to removal of selected national coverage determinations.

Sarah Fulton, (410) 786–2749, for issues related to Appropriate Use Criteria for Advanced Diagnostic Imaging (AUC); and Pulmonary Rehabilitation, Cardiac Rehabilitation and Intensive Cardiac Rehabilitation.

Rachel Katonak, (410) 786–8564, for issues related to Medical Nutrition Therapy.

Sabrina Ahmed, (410) 786–7499, for issues related to the Medicare Shared Savings Program (Shared Savings Program) quality reporting requirements and quality performance standard.

Janae James, (410) 786–0801, Elizabeth November, (410) 786–4518, or *SharedSavingsProgram@cms.hhs.gov,* for issues related to Shared Savings Program beneficiary assignment, repayment mechanism requirements, and benchmarking methodology.

Naseem Tarmohamed, (410) 786–0814, or *SharedSavingsProgram@cms.hhs.gov,* for inquiries related to Shared Savings Program application, compliance and beneficiary notification requirements.

Amy Gruber, *AmbulanceDataCollection@cms.hhs.gov,* for issues related to the Medicare Ground Ambulance Data Collection System.

Juliana Tiongson, (410) 786–0342, for issues related to the Medicare Diabetes Prevention Program (MDPP).

Laura Ashbaugh, (410) 786–1113, for issues related to Clinical Laboratory Fee Schedule: Laboratory Specimen Collection and Travel Allowance and Use of Electronic Travel Logs.

Frank Whelan, (410) 786–1302, for issues related to Medicare provider enrollment regulation updates.

Katie Mucklow, (410) 786–0537, for issues related to provider and supplier prepayment and post-payment medical review requirements.

Lindsey Baldwin, (410) 786–1694, and Michele Franklin, (410) 786–9226, for issues related to Medicare coverage of opioid use disorder treatment services furnished by opioid treatment programs.

Lisa O. Wilson, (410) 786–8852, or Meredith Larson, (410) 786–7923, for inquiries related to the physician self-referral law.

Joella Roland, (410) 786–7638, for issues related to requirement for electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan or an MA–PD plan.

Kathleen Ott, (410) 786–4246, for issues related to open payments.

Molly MacHarris, (410) 786–4461, for inquiries related to Merit-based Incentive Payment System (MIPS).

Brittany LaCouture, (410) 786–0481, for inquiries related to Alternative Payment Models (APMs).

Applicable Federal Acquisition Regulations (FAR) and Defense Federal Acquisition Regulations (DFAR) apply.

I. Executive Summary

This major final rule revises payment polices under the Medicare PFS and makes other policy changes, including to the implementation of certain provisions of the Consolidated Appropriations Act, 2021 (CAA, 2021) (Pub. L. 116–260, December 27, 2020), Bipartisan Budget Act of 2018 (BBA of 2018) (Pub. L. 115–123, February 9, 2018) and the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT Act) (Pub. L. 115–271, October 24, 2018), related to Medicare Part B payment. In addition, this major final rule includes revisions to other Medicare payment policies described in sections III. and IV.

B. Summary of the Major Provisions

The statute requires us to establish payments under the PFS based on national uniform relative value units (RVUs) that account for the relative resources used in furnishing a service. The statute requires that RVUs be established for three categories of resources: Work, practice expense (PE), and malpractice (MP) expense. In addition, the statute requires that we establish each year by regulation the payment amounts for physicians' services paid under the PFS, including geographic adjustments to reflect the variations in the costs of furnishing services in different geographic areas.

In this major final rule, we are establishing RVUs for CY 2022 for the PFS to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services, as well as changes in the statute. This final rule also includes discussions and provisions regarding several other Medicare Part B payment policies.

Specifically, this final rule addresses:

- Practice Expense RVUs (section II.B.)
- Potentially Misvalued Services Under the PFS (section II.C.)
- Telehealth and Other Services Involving Communications Technology (section II.D.)
- Valuation of Specific Codes (section II.E.)

3. Summary of Costs and Benefits

We have determined that this final rule is economically significant. For a detailed discussion of the economic impacts, see section VI., Regulatory Impact Analysis, of this final rule.

II. Summary of the Proposed Provisions, Analysis of and Response to Public Comments, and the Provisions of the Final Rule for the PFS

A. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), ''Payment for Physicians' Services.'' The PFS relies on national relative values that are established for work, practice expense (PE), and malpractice (MP), which are adjusted for geographic cost variations. These values are multiplied by a conversion factor (CF) to convert the RVUs into payment rates. The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act of 1989 (OBRA '89) (Pub. L. 101–239, December 19, 1989), and the Omnibus Budget Reconciliation Act of 1990 (OBRA '90) (Pub. L. 101–508, November 5, 1990). The final rule published in the November 25, 1991 **Federal Register** (56 FR 59502) set forth the first fee schedule used for payment for physicians' services.

We note that throughout this final rule, unless otherwise noted, the term ''practitioner'' is used to describe both physicians and nonphysician practitioners (NPPs) who are permitted to bill Medicare under the PFS for the services they furnish to Medicare beneficiaries.

1. Development of the RVUs

a. Work RVUs

The work RVUs established for the initial fee schedule, which was implemented on January 1, 1992, were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original work RVUs for most codes under a cooperative agreement with the Department of Health and Human Services (HHS). In constructing the code-specific vignettes used in

determining the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the Federal Government, and obtained input from numerous physician specialty groups.

As specified in section 1848(c)(1)(A) of the Act, the work component of physicians' services means the portion of the resources used in furnishing the service that reflects physician time and intensity. We establish work RVUs for new, revised and potentially misvalued codes based on our review of information that generally includes, but is not limited to, recommendations received from the American Medical Association/Specialty Society Relative Value Scale Update Committee (RUC), the Health Care Professionals Advisory Committee (HCPAC), the Medicare Payment Advisory Commission (MedPAC), and other public commenters; medical literature and comparative databases; as well as a comparison of the work for other codes within the Medicare PFS, and consultation with other physicians and health care professionals within CMS and the Federal Government. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters, and the rationale for their recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalk to key reference or similar codes, and magnitude estimation. More information on these issues is available in that rule.

b. Practice Expense RVUs

Initially, only the work RVUs were resource-based, and the PE and MP RVUs were based on average allowable charges. Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432, October 31, 1994), amended by section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physicians' service beginning in 1998. We were required to consider general categories of expenses (such as office rent and wages of personnel, but excluding MP expenses) comprising PEs. The PE RVUs continue to represent the portion of these resources involved in furnishing PFS services.

Originally, the resource-based method was to be used beginning in 1998, but section 4505(a) of the Balanced Budget Act of 1997 (BBA '97) (Pub. L. 105–33, August 5, 1997) delayed implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA '97 provided for a 4-year transition period from the charge-based PE RVUs to the resource-based PE RVUs.

We established the resource-based PE RVUs for each physicians' service in the November 2, 1998 final rule (63 FR 58814), effective for services furnished in CY 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, payment rates were not fully based upon resource-based PE RVUs until CY 2002. This resource-based system was based on two significant sources of actual PE data: The Clinical Practice Expert Panel (CPEP) data; and the AMA's Socioeconomic Monitoring System (SMS) data. These data sources are described in greater detail in the CY 2012 PFS final rule with comment period (76 FR 73033).

Separate PE RVUs are established for services furnished in facility settings, such as a hospital outpatient department (HOPD) or an ambulatory surgical center (ASC), and in nonfacility settings, such as a physician's office. The nonfacility RVUs reflect all of the direct and indirect PEs involved in furnishing a service described by a particular HCPCS code. The difference, if any, in these PE RVUs generally results in a higher payment in the nonfacility setting because in the facility settings some resource costs are borne by the facility. Medicare's payment to the facility (such as the outpatient prospective payment system (OPPS) payment to the HOPD) would reflect costs typically incurred by the facility. Thus, payment associated with those specific facility resource costs is not made under the PFS.

Section 212 of the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113, November 29, 1999) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the **Federal Register** (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the CY 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating direct PE RVUs from the top-down to the bottom-up methodology beginning in CY 2007. We adopted a 4-year transition to the new PE RVUs. This transition was completed for CY 2010. In the CY 2010 PFS final rule with comment period, we updated the practice expense per hour (PE/HR) data that are used in the calculation of PE RVUs for most specialties (74 FR 61749). In CY 2010, we began a 4-year transition to the new PE RVUs using the updated PE/HR data, which was completed for CY 2013.

c. Malpractice RVUs

Section 4505(f) of the BBA '97 amended section 1848(c) of the Act to require that we implement resource-based MP RVUs for services furnished on or after CY 2000. The resource-based MP RVUs were implemented in the PFS final rule with comment period published November 2, 1999 (64 FR 59380). The MP RVUs are based on commercial and physician-owned insurers' MP insurance premium data from all the States, the District of Columbia, and Puerto Rico.

d. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review RVUs no less often than every 5 years. Prior to CY 2013, we conducted periodic reviews of work RVUs and PE RVUs independently from one another. We completed 5-year reviews of work RVUs that were effective for calendar years 1997, 2002, 2007, and 2012.

Although refinements to the direct PE inputs initially relied heavily on input from the RUC Practice Expense Advisory Committee (PEAC), the shifts to the bottom-up PE methodology in CY 2007 and to the use of the updated PE/HR data in CY 2010 have resulted in significant refinements to the PE RVUs in recent years.

In the CY 2012 PFS final rule with comment period (76 FR 73057), we finalized a proposal to consolidate reviews of work and PE RVUs under section 1848(c)(2)(B) of the Act and reviews of potentially misvalued codes under section 1848(c)(2)(K) of the Act into one annual process.

In addition to the 5-year reviews, beginning for CY 2009, CMS and the RUC identified and reviewed a number of potentially misvalued codes on an annual basis based on various identification screens. This annual review of work and PE RVUs for

potentially misvalued codes was supplemented by the amendments to section 1848 of the Act, as enacted by section 3134 of the Affordable Care Act, that require the agency to periodically identify, review and adjust values for potentially misvalued codes.

e. Application of BN to Adjustments of RVUs

As described in section VI. of this final rule, the Regulatory Impact Analysis, in accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if revisions to the RVUs cause expenditures for the year to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million.

2. Calculation of Payments Based on RVUs

To calculate the payment for each service, the components of the fee schedule (work, PE, and MP RVUs) are adjusted by geographic practice cost indices (GPCIs) to reflect the variations in the costs of furnishing the services. The GPCIs reflect the relative costs of work, PE, and MP in an area compared to the national average costs for each component. Please refer to the CY 2020 PFS final rule for a discussion of the last GPCI update (84 FR 62615 through 62623).

RVUs are converted to dollar amounts through the application of a CF, which is calculated based on a statutory formula by CMS' Office of the Actuary (OACT). The formula for calculating the Medicare PFS payment amount for a given service and fee schedule area can be expressed as:

$$\text{Payment} = [(\text{RVU work} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU MP} \times \text{GPCI MP})] \times \text{CF}$$

3. Separate Fee Schedule Methodology for Anesthesia Services

Section 1848(b)(2)(B) of the Act specifies that the fee schedule amounts for anesthesia services are to be based on a uniform relative value guide, with appropriate adjustment of an anesthesia CF, in a manner to ensure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. Therefore, there is a separate fee schedule methodology for anesthesia services. Specifically, we establish a separate CF for anesthesia services and we utilize the uniform relative value guide, or base units, as well as time units, to calculate the fee schedule amounts for anesthesia services. Since anesthesia services are not valued using RVUs, a separate methodology for locality adjustments is also necessary. This involves an adjustment to the national anesthesia CF for each payment locality.

B. Determination of PE RVUs

1. Overview

Practice expense (PE) is the portion of the resources used in furnishing a service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages, but excluding MP expenses, as specified in section 1848(c)(1)(B) of the Act. As required by section 1848(c)(2)(C)(ii) of the Act, we use a resource-based system for determining PE RVUs for each physicians' service. We develop PE RVUs by considering the direct and indirect practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies, and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more detailed information about the methodology for translating the resources involved in furnishing each service into service-specific PE RVUs. We refer readers to the CY 2010 PFS final rule with comment period (74 FR 61743 through 61748) for a more detailed explanation of the PE methodology.

2. Practice Expense Methodology

a. Direct Practice Expense

We determine the direct PE for a specific service by adding the costs of the direct resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing that service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are generally based on our review of recommendations received from the RUC and those provided in response to public comment periods. For a detailed explanation of the direct PE methodology, including examples, we refer readers to the 5-year review of work RVUs under the PFS and proposed changes to the PE methodology CY 2007 PFS proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

b. Indirect Practice Expense per Hour Data

We use survey data on indirect PEs incurred per hour worked, in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the PE/HR by specialty that was obtained from the AMA's SMS. The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Expense Information Survey (PPIS). The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs paid under the PFS using a survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available. We used the PPIS data to update the PE/HR data for the CY 2010 PFS for almost all of the Medicare-recognized specialties that participated in the survey.

When we began using the PPIS data in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we transitioned its use over a 4-year period from the previous PE RVUs to the PE RVUs developed using the new PPIS data. As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), the transition to the PPIS data was complete for CY 2013. Therefore, PE RVUs from CY 2013 forward are developed based entirely on the PPIS data, except as noted in this section.

Section 1848(c)(2)(H)(i) of the Act requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

Supplemental survey data on independent labs from the College of American Pathologists were implemented for payments beginning in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing independent diagnostic testing facilities (IDTFs), were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments beginning in CY 2007. Neither IDTFs, nor independent labs, participated in the PPIS. Therefore, we continue to use the PE/HR that was developed from their supplemental survey data.

Consistent with our past practice, the previous indirect PE/HR values from the supplemental surveys for these specialties were updated to CY 2006 using the Medicare Economic Index (MEI) to put them on a comparable basis with the PPIS data.

We also do not use the PPIS data for reproductive endocrinology and spine surgery since these specialties currently are not separately recognized by Medicare, nor do we have a method to blend the PPIS data with Medicare-recognized specialty data.

Previously, we established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead used the PPIS-based PE/HR. We use crosswalks for specialties that did not participate in the PPIS. These crosswalks have been generally established through notice and comment rulemaking and are available in the file titled ''CY 2022 PFS final rule PE/HR'' on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

For CY 2022, we have incorporated the available utilization data for two new specialties, each of which became a recognized Medicare specialty during 2020. These specialties are Micrographic Dermatologic Surgery (MDS) and Adult Congenital Heart Disease (ACHD). We proposed to use proxy PE/HR values for these new specialties, as there are no PPIS data for these specialties, by crosswalking the PE/HR as follows from specialties that furnish similar services in the Medicare claims data:

- Micrographic Dermatologic Surgery (MDS) from Dermatology; and
- Adult Congenital Heart Disease (ACHD) from Cardiology

These updates are reflected in the ''CY 2022 PFS final rule PE/HR'' file available on the CMS website under the supporting data files for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

We received public comments on our proposal to use proxy PE/HR values for MDS and ACHD. The following is a summary of the comments we received and our responses.

Comment: One commenter stated that they appreciated and supported the proposal incorporating the available utilization data for MDS to establish an indirect PE/HR for their newly designated specialty. The commenter stated that they also agreed with the proposal to use a proxy PE/HR value by crosswalking to the PE/HR for Dermatology and urged CMS to finalize this policy.

Response: We appreciate the support from the commenter for our proposed PE/HR crosswalk.

Comment: Several commenters questioned the assigned specialty crosswalk to use for indirect PE when it comes to home PT/INR monitoring services. Commenters stated that they appreciated that CMS acknowledged their concerns last year and agreed to update the indirect factors for home PT/INR monitoring by crosswalking to the General Practice specialty which helped address the on-going substantial reductions in payment for home PT/INR monitoring. However, the commenters stated that the predominant code for PT/INR monitoring (HCPCS code G0249) will again be significantly and negatively impacted by the proposed changes in the clinical labor rates which will completely negate any benefit from the crosswalk to General Practice. The commenters requested CMS change the crosswalk for home PT/INR monitoring services to All Physicians which would partially offset the proposed reduction that HCPCS code G0249 is facing due to changes in the clinical labor rates.

Response: We finalized a crosswalk to the General Practice specialty for home PT/INR monitoring services (HCPCS codes G0248, G0249, and G0250) in the CY 2021 PFS final rule (85 FR 84477–84478). The data submitted by the commenters indicated that the direct-to-indirect cost percentages to furnish home PT/INR monitoring are in the range of 31:69, similar to the ratio associated with the General Practice specialty. We disagree that these home PT/INR monitoring services should now be reassigned to a different specialty that is less reflective of the cost structure for these services to offset reductions in payment for the services that result from an unrelated policy proposal (the clinical labor pricing update). Additionally, we did not propose to change the assigned specialty for PT/INR services. As such, this comment is outside the scope of the proposed rule. Therefore, we are not finalizing any changes to the assigned specialty for PT/INR services. We note however that, recognizing the changing practice of medicine and increasing use of innovative technologies and supplies to furnish certain services, we are reviewing our underlying data as part of a comprehensive review of our PE inputs and overall methodology. We continue to engage with stakeholders on this crucial topic of updating the PE data, for example, at our recent PE town hall this year.

After consideration of the comments, we are finalizing our proposed PE/HR crosswalks for the new MDS and ACHD specialties.

c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(1) Direct Costs

The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing each of the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of $400 from our PE database and another service has a direct cost sum of $200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

(2) Indirect Costs

We allocate the indirect costs at the code level based on the direct costs specifically associated with a code and the greater of either the clinical labor costs or the work RVUs. We also incorporate the survey data described earlier in the PE/HR discussion. The general approach to developing the indirect portion of the PE RVUs is as follows:

- For a given service, we use the direct portion of the PE RVUs calculated as previously described and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator. That is, the initial indirect allocator is calculated so that the direct costs equal the average percentage of direct costs of those specialties furnishing the service. For example, if the direct portion of the PE RVUs for a given service is 2.00 and direct costs, on average, represent 25 percent of total costs for the specialties that furnish the service, the initial indirect allocator would be calculated so that it equals 75 percent of the total PE RVUs. Thus, in this example, the initial indirect allocator would equal 6.00, resulting in a total PE RVU of 8.00

(2.00 is 25 percent of 8.00 and 6.00 is 75 percent of 8.00).

• Next, we add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had a work RVU of 4.00 and the clinical labor portion of the direct PE RVU was 1.50, we would add 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to the initial indirect allocator of 6.00 to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.

• Then, we incorporate the specialty-specific indirect PE/HR data into the calculation. In our example, if, based on the survey data, the average indirect cost of the specialties furnishing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties furnishing the second service with an indirect allocator of 5.00, the indirect portion of the PE RVUs of the first service would be equal to that of the second service.

(3) Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a facility setting, where Medicare makes a separate payment to the facility for its costs in furnishing a service, we establish two PE RVUs: Facility and nonfacility. The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. In calculating the PE RVUs for services furnished in a facility, we do not include resources that would generally not be provided by physicians when furnishing the service. For this reason, the facility PE RVUs are generally lower than the nonfacility PE RVUs.

(4) Services With Technical Components and Professional Components

Diagnostic services are generally comprised of two components: A professional component (PC); and a technical component (TC). The PC and TC may be furnished independently or by different providers, or they may be furnished together as a global service. When services have separately billable PC and TC components, the payment for the global service equals the sum of the payment for the TC and PC. To achieve this, we use a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global service, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global service, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global.)

(5) PE RVU Methodology

For a more detailed description of the PE RVU methodology, we refer readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746). We also direct readers to the file titled ''Calculation of PE RVUs under Methodology for Selected Codes'' which is available on our website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.* This file contains a table that illustrates the calculation of PE RVUs as described in this final rule for individual codes.

(a) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty-specific PE/HR data calculated from the surveys.

(b) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service.

Step 2: Calculate the aggregate pool of direct PE costs for the current year. We set the aggregate pool of PE costs equal to the product of the ratio of the current aggregate PE RVUs to current aggregate work RVUs and the projected aggregate work RVUs.

Step 3: Calculate the aggregate pool of direct PE costs for use in ratesetting. This is the product of the aggregate direct costs for all services from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3, use the CF to calculate a direct PE scaling adjustment to ensure that the aggregate pool of direct PE costs calculated in Step 3 does not vary from the aggregate pool of direct PE costs for the current year. Apply the scaling adjustment to the direct costs for each service (as calculated in Step 1).

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs as long as the same CF is used in Step 4 and Step 5. Different CFs would result in different direct PE scaling adjustments, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling adjustments offset one another.

(c) Create the Indirect Cost PE RVUs

Create indirect allocators.

Step 6: Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global service.

We generally use an average of the 3 most recent years of available Medicare claims data to determine the specialty mix assigned to each code. Codes with low Medicare service volume require special attention since billing or enrollment irregularities for a given year can result in significant changes in specialty mix assignment. We finalized a policy in the CY 2018 PFS final rule (82 FR 52982 through 59283) to use the most recent year of claims data to determine which codes are low volume for the coming year (those that have fewer than 100 allowed services in the Medicare claims data). For codes that fall into this category, instead of assigning specialty mix based on the specialties of the practitioners reporting the services in the claims data, we use the expected specialty that we identify on a list developed based on medical review and input from expert stakeholders. We display this list of expected specialty assignments as part of the annual set of data files we make available as part of notice and comment rulemaking and consider recommendations from the RUC and other stakeholders on changes to this list on an annual basis. Services for which the specialty is automatically assigned based on previously finalized policies under our established methodology (for example, ''always therapy'' services) are unaffected by the list of expected specialty assignments. We also finalized in the CY 2018 PFS final rule (82 FR 52982 through 52983) a policy to apply these service-level overrides for both PE and MP, rather than one or the other category.

We did not make any proposals associated with the list of expected specialty assignments for low volume services, however we received public comments on this topic from stakeholders. The following is a summary of the comments we received and our responses.

Comment: Several commenters stated that they had performed an analysis to identify all codes that meet the criteria to receive a specialty override under this CMS policy and drafted updated recommendations for CY 2022. Commenters stated that the purpose of assigning a specialty to these codes was to avoid the major adverse impact on MP RVUs that result from errors in specialty utilization data magnified in representation (percentage) by small sample size. These commenters submitted a lengthy list of low volume HCPCS codes with recommended expected specialty assignments. One commenter requested changing the override specialty for a series of codes from thoracic surgery to cardiac surgery based on whether the procedures in question are performed on the heart and surrounding structures versus performed on the lungs, esophagus, chest wall and mediastinum.

Response: We appreciate the submission of expected specialty assignments for additional low volume HCPCS codes. After reviewing the information provided by the commenters to determine that the submitted specialty assignments were appropriate for the service in question, we are finalizing the additions in Table 1 to the list of expected specialty assignments for low volume services.

BILLING CODE 4120–01–P

TABLE 1: New Additions to Expected Specialty Assignment List

HCPCS	Short Descriptor	Expected Specialty Assignment
10008	Fna bx w/fluor gdn ea addl	Interventional Radiology
10010	Fna bx w/ct gdn ea addl	Interventional Radiology
15774	Gfrg autol fat lipo ea addl	Plastic and Reconstructive Surgery
15824	Removal of forehead wrinkles	Plastic and Reconstructive Surgery
15825	Removal of neck wrinkles	Plastic and Reconstructive Surgery
15826	Removal of brow wrinkles	Plastic and Reconstructive Surgery
15828	Removal of face wrinkles	Plastic and Reconstructive Surgery
15829	Removal of skin wrinkles	Plastic and Reconstructive Surgery
15845	Skin and muscle repair face	Plastic and Reconstructive Surgery
15876	Suction lipectomy head&neck	Plastic and Reconstructive Surgery
15877	Suction lipectomy trunk	Plastic and Reconstructive Surgery
15878	Suction lipectomy upr extrem	Plastic and Reconstructive Surgery
15879	Suction lipectomy lwr extrem	Plastic and Reconstructive Surgery
15944	Remove hip pressure sore	Plastic and Reconstructive Surgery
15950	Remove thigh pressure sore	Plastic and Reconstructive Surgery
17380	Hair removal by electrolysis	Dermatology
19272	Extensive chest wall surgery	Thoracic Surgery
19298	Place breast rad tube/caths	Radiation Oncology
19367	Brst rcnstj 1 pdcl tram flap	Plastic and Reconstructive Surgery
20555	Place ndl musc/tis for rt	Radiation Oncology
20703	Rmvl imed rx delivery device	Orthopedic Surgery
20932	Osteoart algrft w/surf & bl	Orthopedic Surgery
20933	Hemicrt intrclry algrft prtl	Orthopedic Surgery
20934	Intercalary algrft compl	Orthopedic Surgery
20955	Fibula bone graft microvasc	Plastic and Reconstructive Surgery
21196	Reconst lwr jaw w/fixation	Maxillofacial Surgery
21356	Opn tx dprsd zygomatic arch	Plastic and Reconstructive Surgery
21603	Exc ch wal tum w/lymphadec	Thoracic Surgery
24164	Remove radius head implant	Orthopedic Surgery
26665	Treat thumb fracture	Hand Surgery
27161	Incision of neck of femur	Orthopedic Surgery
27330	Biopsy knee joint lining	Orthopedic Surgery
28052	Biopsy of foot joint lining	Podiatry
30920	Ligation upper jaw artery	Otolaryngology
31577	Largsc w/rmvl foreign bdy(s)	Otolaryngology
31578	Largsc w/removal lesion	Otolaryngology
31725	Clearance of airways	Pulmonary Disease
32501	Repair bronchus add-on	Thoracic Surgery
32540	Removal of lung lesion	Thoracic Surgery
33018	Prcrd drg 0-5yr or w/anomly	Cardiology*
33275	Tcat rmvl perm ldls pm w/img	Cardiology*
33417	Repair of aortic valve	Cardiac Surgery
33440	Rplcmt a-valve tlcj autol pv	Cardiac Surgery
33741	Tas congenital car anomal	Cardiology*
33745	Tis cgen car anomal 1st shnt	Cardiology*
33746	Tis cgen car anomal ea addl	Cardiology*
33910	Remove lung artery emboli	Cardiac Surgery
33983	Replace vad intra w/bp	Cardiac Surgery
34421	Removal of vein clot	Vascular Surgery
34820	Opn iliac art expos	Vascular Surgery
35092	Repair artery rupture aorta	Vascular Surgery
36468	Njx sclrsnt spider veins	Vascular Surgery
36572	Insj picc rs&i <5 yr	Interventional Radiology
37718	Ligate/strip short leg vein	Vascular Surgery

HCPCS	Short Descriptor	Expected Specialty Assignment
37760	Ligate leg veins radical	Vascular Surgery
41820	Excision gum each quadrant	Oral Surgery
41821	Excision of gum flap	Oral Surgery
41850	Treatment of gum lesion	Maxillofacial Surgery
41870	Gum graft	Oral Surgery
42550	Injection for salivary x-ray	Diagnostic Radiology
43263	Ercp sphincter pressure meas	Gastroenterology
43640	Vagotomy & pylorus repair	General Surgery
44132	Enterectomy cadaver donor	General Surgery
44133	Enterectomy live donor	General Surgery
44135	Intestine transplnt cadaver	General Surgery
44136	Intestine transplant live	General Surgery
45005	Drainage of rectal abscess	General Surgery
45112	Removal of rectum	Colorectal Surgery
45307	Proctosigmoidoscopy fb	General Surgery
46257	Remove in/ex hem grp & fiss	Colorectal Surgery
46262	Remove in/ex hem grps w/fist	General Surgery
47800	Reconstruction of bile ducts	General Surgery
48120	Removal of pancreas lesion	General Surgery
49013	Prpertl pel pack hemrrg trma	General Surgery
49014	Reexploration pelvic wound	General Surgery
49425	Insert abdomen-venous drain	General Surgery
49555	Rerepair fem hernia reduce	General Surgery
50040	Drainage of kidney	Urology
50280	Removal of kidney lesion	Urology
50606	Endoluminal bx urtr rnl plvs	Interventional Radiology
51065	Remove ureter calculus	Urology
51100	Drain bladder by needle	Urology
51101	Drain bladder by trocar/cath	Urology
52305	Cystoscopy and treatment	Urology
54164	Frenulotomy of penis	Urology
54401	Insert self-contd prosthesis	Urology
54416	Remv/repl penis contain pros	Urology
55810	Extensive prostate surgery	Urology
57320	Repair bladder-vagina lesion	Obstetrics/Gynecology
57465	Cam cervix uteri drg colp	Obstetrics/Gynecology
58572	Tlh uterus over 250 g	Obstetrics/Gynecology
58943	Removal of ovary(s)	Gynecologist/Oncologist
58960	Exploration of abdomen	Gynecologist/Oncologist
59000	Amniocentesis diagnostic	Obstetrics/Gynecology
60545	Explore adrenal gland	General Surgery
61050	Remove brain canal fluid	Diagnostic Radiology
62192	Establish brain cavity shunt	Neurosurgery
62280	Treat spinal cord lesion	Interventional Pain Management
63077	Spine disk surgery thorax	Orthopedic Surgery
63086	Remove vertebral body add-on	Orthopedic Surgery
66225	Repair/graft eye lesion	Ophthalmology
66740	Destruction ciliary body	Ophthalmology
67227	Dstrj extensive retinopathy	Ophthalmology
67922	Repair eyelid defect	Ophthalmology
68850	Injection for tear sac x-ray	Diagnostic Radiology
70240	X-ray exam pituitary saddle	Diagnostic Radiology
70390	X-ray exam of salivary duct	Diagnostic Radiology
76946	Echo guide for amniocentesis	Obstetrics/Gynecology
76979	Us trgt dyn mbubb ea addl	Diagnostic Radiology
78015	Thyroid met imaging	Diagnostic Radiology

HCPCS	Short Descriptor	Expected Specialty Assignment
78103	Bone marrow imaging mult	Nuclear Medicine
78262	Gastroesophageal reflux exam	Diagnostic Radiology
78291	Leveen/shunt patency exam	Diagnostic Radiology
79403	Hematopoietic nuclear tx	Nuclear Medicine
92517	Vemp test i&r cervical	Otolaryngology
92518	Vemp test i&r ocular	Otolaryngology
92519	Vemp tst i&r cervical&ocular	Otolaryngology
92975	Dissolve clot heart vessel	Cardiology*
93316	Echo transesophageal	Anesthesiology
93565	Inject l ventr/atrial angio	Cardiology*
94014	Patient recorded spirometry	Pulmonary Disease
94015	Patient recorded spirometry	Pulmonary Disease
95857	Cholinesterase challenge	Neurology
96935	Rcm celulr subcelulr img skn	Dermatology
97545	Work hardening	Physical Therapist
97546	Work hardening add-on	Physical Therapist

Q0035	Cardiokymography	Cardiology

* Recommended specialty assignment crosswalked; see below.

Commenters recommended an expected specialty assignment of interventional cardiology for CPT codes 33018, 33741, 33745, 33746, 92975, and 93565 and an expected specialty assignment of cardiac electrophysiology for CPT code 33275. However, we do not have PE/HR data for the interventional cardiology and cardiac electrophysiology specialties as they were not part of the PPIS when it was conducted in 2007. These specialties both use the cardiology specialty for their PE/HR data, and therefore, we have also crosswalked the CPT codes in question to the cardiology specialty on the list of expected specialty assignments for low volume services.

Based on the information provided by the commenters, we are finalizing the changes in expected specialty assignment for the five CPT codes in Table 2 which were already included on the list.

TABLE 2: Revisions to Expected Specialty Assignment List

HCPCS	Short Descriptor	Previous Specialty	Updated Specialty
31781	Reconstruct windpipe	Thoracic Surgery	Otolaryngology
35180	Repair blood vessel lesion	Thoracic Surgery	Vascular Surgery
43313	Esophagoplasty congenital	Thoracic Surgery	General Surgery
43314	Tracheo-esophagoplasty cong	Thoracic Surgery	General Surgery
96440	Chemotherapy intracavitary	Thoracic Surgery	Hematology/Oncology

We are not finalizing the recommended changes in expected specialty assignment for the CPT codes in Table 3 associated with the thoracic surgery specialty.

TABLE 3: Rejected Revisions to Expected Specialty Assignment List

HCPCS	Short Descriptor	Previous Specialty	Recommended Specialty
33203	Insert epicard eltrd endo	Thoracic Surgery	Cardiac Surgery
33251	Ablate heart dysrhythm focus	Thoracic Surgery	Cardiac Surgery
33320	Repair major blood vessel(s)	Thoracic Surgery	Cardiac Surgery
33414	Repair of aortic valve	Thoracic Surgery	Cardiac Surgery
33468	Revision of tricuspid valve	Thoracic Surgery	Cardiac Surgery

33786	Repair arterial trunk	Thoracic Surgery	Cardiac Surgery
33788	Revision of pulmonary artery	Thoracic Surgery	Cardiac Surgery
33800	Aortic suspension	Thoracic Surgery	Cardiac Surgery
33802	Repair vessel defect	Thoracic Surgery	Cardiac Surgery
33803	Repair vessel defect	Thoracic Surgery	Cardiac Surgery
33813	Repair septal defect	Thoracic Surgery	Cardiac Surgery
33814	Repair septal defect	Thoracic Surgery	Cardiac Surgery
33820	Revise major vessel	Thoracic Surgery	Cardiac Surgery
33822	Revise major vessel	Thoracic Surgery	Cardiac Surgery
33824	Revise major vessel	Thoracic Surgery	Cardiac Surgery
33840	Remove aorta constriction	Thoracic Surgery	Cardiac Surgery
33845	Remove aorta constriction	Thoracic Surgery	Cardiac Surgery
33851	Remove aorta constriction	Thoracic Surgery	Cardiac Surgery
33852	Repair septal defect	Thoracic Surgery	Cardiac Surgery
33853	Repair septal defect	Thoracic Surgery	Cardiac Surgery
33917	Repair pulmonary artery	Thoracic Surgery	Cardiac Surgery
33920	Repair pulmonary atresia	Thoracic Surgery	Cardiac Surgery
33922	Transect pulmonary artery	Thoracic Surgery	Cardiac Surgery
33924	Remove pulmonary shunt	Thoracic Surgery	Cardiac Surgery
33925	Rpr pul art unifocal w/o cpb	Thoracic Surgery	Cardiac Surgery
33926	Repr pul art unifocal w/cpb	Thoracic Surgery	Cardiac Surgery
33927	Impltj tot rplcmt hrt sys	Thoracic Surgery	Cardiac Surgery
35182	Repair blood vessel lesion	Thoracic Surgery	Cardiac Surgery
36835	Artery to vein shunt	Thoracic Surgery	Cardiac Surgery
38382	Thoracic duct procedure	Thoracic Surgery	Cardiac Surgery

BILLING CODE 4120–01–C

Commenters requested that the expected specialty assignment for the CPT codes in this group be changed from the thoracic surgery specialty to the cardiac surgery specialty. We did not finalize this same request in previous rulemaking cycles in both CY 2020 (84 FR 62576) and CY 2021 (85 FR 84479) for the same group of CPT codes. We finalized a proposal in CY 2020 to update the expected specialty list to accurately reflect a previously finalized crosswalk to thoracic surgery for the services in question. As we stated at the time, we did not finalize a proposal to assign the codes in question to the cardiac surgery specialty. Instead, we finalized a proposal to update the incorrect documentation in our expected specialty list to accurately reflect a previously finalized crosswalk to thoracic surgery for these services. The previously finalized assignment of the cardiac surgery specialty to these services has been in place since the CY 2012 rule cycle, and we believe that the expected specialty list should be updated to reflect the correct specialty assignment. We have previously considered and declined to make the changes suggested by commenters, and we are not finalizing such changes in this CY 2022 PFS final rule. We direct readers to the discussion of this topic in the CY 2020 PFS final rule (84 FR 62574 through 62578) and we reiterate that we do not anticipate this finalized proposal from CY 2020 having a discernible effect on the valuation of the affected codes due to the similarity between the cardiac surgery and thoracic surgery specialties.

We also note for commenters that each HCPCS code that appears on the list of expected specialty assignments for low volume services remains on the list from year to year, even if the volume

for the code in question rises to over 100 services for an individual calendar year. The HCPCS codes and expected specialty assignment remain on the list, and will be applied should the volume fall below 100 services in any calendar year; there is no need to ''reactivate'' individual codes as some commenters indicated in their submissions.

Comment: Several commenters stated that in previous years, CMS has applied the expected specialty override to services with fewer than 100 allowed services in a 3-year average of Medicare claims data without adjusting the utilization to interpret any CPT modifiers. Although commenters agreed with the use of a 3-year average to identify low volume services for expected specialty assignment, commenters stated that not adjusting for certain modifiers will result in undercounting or overcounting of certain services. For example, commenters stated that if a single procedure is performed by both a primary surgeon and an assistant at surgery, this service should only be counted once even though each of the practitioners would report the service on a separate claim. Commenters recommended that CMS should set the frequency to zero for post-operative only (modifier '55') and assistant at surgery (modifier '80') records, multiply the frequency by 2 for bilateral surgery records (modifier '50'), and divide the frequency by 2 for co-surgery records (modifier '62').

Response: We do not agree that it would be more appropriate to make the adjustments to utilization as described by the commenters to determine low volume status. As we stated in the CY 2020 PFS final rule (84 FR 62576), we finalized a policy in the CY 2018 PFS final rule (82 FR 52982 through 59283) to use claims data to determine which codes are low volume for the coming year, defining ''low volume'' as those that had fewer than 100 allowed services in the Medicare claims data. We did not finalize a policy to discount this utilization based on modifiers that identify certain circumstances, and we do not believe that it would be more appropriate to do so, as a service is still furnished and billed in each case, even if payment is discounted. Additionally, we did not make any proposals concerning the methodology used to identify low volume services in the proposed rule, and therefore, we are not finalizing any changes to this methodology.

After consideration of the public comments, we are finalizing the updates to the list of expected specialty assignments for low volume services as detailed above.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: The direct PE RVUs; the clinical labor PE RVUs; and the work RVUs.

For most services the indirect allocator is: Indirect PE percentage * (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the indirect PE allocator is: indirect percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs + work RVUs.
- If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: indirect PE percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs.

(*Note:* For global services, the indirect PE allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs would be allocated using the work RVUs, and for the TC service, indirect PEs would be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes, in the examples in the download file titled ''Calculation of PE RVUs under Methodology for Selected Codes'', the formulas were divided into two parts for each service.

- The first part does not vary by service and is the indirect percentage (direct PE RVUs/direct percentage).
- The second part is either the work RVU, clinical labor PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the result of step 8 by the average indirect PE percentage from the survey data.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the work time for the service, and the specialty's utilization for the service across all services furnished by the specialty.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (Note: For services with TCs and PCs, we calculate the indirect practice cost index across the global service, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global service.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(d) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 5 to the indirect PE RVUs from Step 17 and apply the final PE budget neutrality (BN) adjustment. The final PE BN adjustment is calculated by comparing the sum of steps 5 and 17 to the aggregate work RVUs scaled by the ratio of current aggregate PE and work RVUs. This adjustment ensures that all PE RVUs in the PFS account for the fact that certain specialties are excluded from the calculation of PE RVUs but included in maintaining overall PFS BN. (See ''Specialties excluded from ratesetting calculation'' later in this final rule.)

Step 19: Apply the phase-in of significant RVU reductions and its

associated adjustment. Section 1848(c)(7) of the Act specifies that for services that are not new or revised codes, if the total RVUs for a service for a year would otherwise be decreased by an estimated 20 percent or more as compared to the total RVUs for the previous year, the applicable adjustments in work, PE, and MP RVUs shall be phased in over a 2-year period. In implementing the phase-in, we consider a 19 percent reduction as the maximum 1-year reduction for any service not described by a new or revised code. This approach limits the year one reduction for the service to the maximum allowed amount (that is, 19 percent), and then phases in the remainder of the reduction. To comply with section 1848(c)(7) of the Act, we adjust the PE RVUs to ensure that the total RVUs for all services that are not new or revised codes decrease by no more than 19 percent, and then apply a relativity adjustment to ensure that the total pool of aggregate PE RVUs remains relative to the pool of work and MP RVUs. For a more detailed description of the methodology for the phase-in of significant RVU changes, we refer readers to the CY 2016 PFS final rule with comment period (80 FR 70927 through 70931).

(e) Setup File Information

- *Specialties excluded from ratesetting calculation:* For the purposes of calculating the PE and MP RVUs, we exclude certain specialties, such as certain NPPs paid at a percentage of the PFS and low-volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 4.

BILLING CODE 4120–01–P

TABLE 4: Specialties Excluded from Ratesetting Calculation

Specialty Code	Specialty Description
49	Ambulatory surgical center
50	Nurse practitioner
51	Medical supply company with certified orthotist
52	Medical supply company with certified prosthetist
53	Medical supply company with certified prosthetist-orthotist
54	Medical supply company not included in 51, 52, or 53.
55	Individual certified orthotist
56	Individual certified prosthetist
57	Individual certified prosthetist-orthotist
58	Medical supply company with registered pharmacist
59	Ambulance service supplier, e.g., private ambulance companies, funeral homes, etc.
60	Public health or welfare agencies
61	Voluntary health or charitable agencies
73	Mass immunization roster biller
74	Radiation therapy centers
87	All other suppliers (e.g., drug and department stores)
88	Unknown supplier/provider specialty
89	Certified clinical nurse specialist
96	Optician
97	Physician assistant
A0	Hospital
A1	SNF
A2	Intermediate care nursing facility
A3	Nursing facility, other
A4	HHA
A5	Pharmacy
A6	Medical supply company with respiratory therapist
A7	Department store
A8	Grocery store
B1	Supplier of oxygen and/or oxygen related equipment (eff. 10/2/2007)
B2	Pedorthic personnel
B3	Medical supply company with pedorthic personnel
B4	Rehabilitation Agency
B5	Ocularist
C1	Centralized Flu
C2	Indirect Payment Procedure
C5	Dentistry

BILLING CODE 4120–01–C

- *Crosswalk certain low volume physician specialties:* Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.
- *Physical therapy utilization:* Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.
- *Identify professional and technical services not identified under the usual TC and 26 modifiers:* Flag the services that are PC and TC services but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (*Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only*), is associated with the global service, CPT code 93000 (*Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report*).
- *Payment modifiers:* Payment modifiers are accounted for in the creation of the file consistent with current payment policy as implemented in claims processing. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier. Similarly, for those services to which volume adjustments are made to account for the payment modifiers, time adjustments are applied as well. For time adjustments to surgical services, the intraoperative portion in the work time file is used; where it is not present, the intraoperative percentage from the payment files used by contractors to process Medicare claims is used instead. Where neither is available, we use the payment adjustment ratio to adjust the time accordingly. Table 5 details the manner in which the modifiers are applied.

TABLE 5: Application of Payment Modifiers to Utilization Files

Modifier	Description	Volume Adjustment	Time Adjustment
80,81,82	Assistant at Surgery	16%	Intraoperative portion
AS	Assistant at Surgery – Physician Assistant	14% (85% * 16%)	Intraoperative portion
50 or LT and RT	Bilateral Surgery	150%	150% of work time
51	Multiple Procedure	50%	Intraoperative portion
52	Reduced Services	50%	50%
53	Discontinued Procedure	50%	50%
54	Intraoperative Care only	Preoperative + Intraoperative Percentages on the payment files used by Medicare contractors to process Medicare claims	Preoperative + Intraoperative portion
55	Postoperative Care only	Postoperative Percentage on the payment files used by Medicare contractors to process Medicare claims	Postoperative portion
62	Co-surgeons	62.5%	50%
66	Team Surgeons	33%	33%
CO, CQ	Physical and Occupational Therapy Assistant Services	88%	88%

We also make adjustments to volume and time that correspond to other payment rules, including special multiple procedure endoscopy rules and multiple procedure payment reductions (MPPRs). We note that section 1848(c)(2)(B)(v) of the Act exempts certain reduced payments for multiple imaging procedures and multiple therapy services from the BN calculation under section 1848(c)(2)(B)(ii)(II) of the Act. These MPPRs are not included in the development of the RVUs.

Beginning in CY 2022, section 1834(v)(1) of the Act requires that we apply a 15 percent payment reduction for outpatient occupational therapy services and outpatient physical therapy services that are provided, in whole or in part, by a physical therapist assistant (PTA) or occupational therapy assistant (OTA). Section 1834(v)(2)(A) of the Act required CMS to establish modifiers to identify these services, which we did in the CY 2019 PFS final rule (83 FR 59654 through 59661), creating the CQ and CO payment modifiers for services provided in whole or in part by PTAs and OTAs, respectively. These payment modifiers are required to be used on claims for services with dates of service beginning January 1, 2020, as specified in the CY 2020 PFS final rule (84 FR 62702 through 62708). We will apply the 15 percent payment reduction to therapy services provided by PTAs (using the CQ modifier) or OTAs (using the CO modifier), as required by statute. Under sections 1834(k) and 1848 of the Act, payment is made for outpatient therapy services at 80 percent of the lesser of the actual charge or applicable fee schedule amount (the allowed charge). The remaining 20 percent is the beneficiary copayment. For therapy services to which the new discount applies, payment will be made at 85 percent of the 80 percent of allowed charges. Therefore, the volume discount factor for therapy services to which the CQ and CO modifiers apply is: (0.20 + (0.80* 0.85), which equals 88 percent.

For anesthesia services, we do not apply adjustments to volume since we use the average allowed charge when simulating RVUs; therefore, the RVUs as calculated already reflect the payments as adjusted by modifiers, and no volume adjustments are necessary. However, a

time adjustment of 33 percent is made only for medical direction of two to four cases since that is the only situation where a single practitioner is involved with multiple beneficiaries concurrently, so that counting each service without regard to the overlap with other services would overstate the amount of time spent by the practitioner furnishing these services.

- *Work RVUs:* The setup file contains the work RVUs from this final rule.

(6) Equipment Cost per Minute

The equipment cost per minute is calculated as:

(1/(minutes per year * usage)) * price * ((interest rate/(1 − (1/((1 + interest rate) ∧ life of equipment)))) + maintenance)

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); generally, 150,000 minutes
usage = variable, *see* discussion below in this final rule
price = price of the particular piece of equipment
life of equipment = useful life of the particular piece of equipment
maintenance = factor for maintenance; 0.05.
interest rate = variable, *see* discussion below in this final rule

Usage: We currently use an equipment utilization rate assumption of 50 percent for most equipment, with the exception of expensive diagnostic imaging equipment, for which we use a 90 percent assumption as required by section 1848(b)(4)(C) of the Act.

Useful Life: In the CY 2005 PFS final rule we stated that we updated the useful life for equipment items primarily based on the AHA's ''Estimated Useful Lives of Depreciable Hospital Assets'' guidelines (69 FR 66246). The most recent edition of these guidelines was published in 2018. This reference material provides an estimated useful life for hundreds of different types of equipment, the vast majority of which fall in the range of 5 to 10 years, and none of which are lower than 2 years in duration. We believe that the updated editions of this reference material remain the most accurate source for estimating the useful life of depreciable medical equipment.

In the CY 2021 PFS final rule, we finalized a proposal to treat equipment life durations of less than 1 year as having a duration of 1 year for the purpose of our equipment price per minute formula. In the rare cases where items are replaced every few months, we noted that we believe it is more accurate to treat these items as disposable supplies with a fractional supply quantity as opposed to equipment items with very short equipment life durations. For a more detailed discussion of the methodology associated with very short equipment life durations, we refer readers to the CY 2021 PFS final rule (85 FR 84482 through 84483).

- *Maintenance:* We finalized the 5 percent factor for annual maintenance in the CY 1998 PFS final rule with comment period (62 FR 33164). As we previously stated in the CY 2016 PFS final rule with comment period (80 FR 70897), we do not believe the annual maintenance factor for all equipment is precisely 5 percent, and we concur that the current rate likely understates the true cost of maintaining some equipment. We also noted that we believe it likely overstates the maintenance costs for other equipment. When we solicited comments regarding sources of data containing equipment maintenance rates, commenters were unable to identify an auditable, robust data source that could be used by CMS on a wide scale. We noted that we did not believe voluntary submissions regarding the maintenance costs of individual equipment items would be an appropriate methodology for determining costs. As a result, in the absence of publicly available datasets regarding equipment maintenance costs or another systematic data collection methodology for determining a different maintenance factor, we did not propose a variable maintenance factor for equipment cost per minute pricing as we did not believe that we have sufficient information at present. We noted that we would continue to investigate potential avenues for determining equipment maintenance costs across a broad range of equipment items.

- *Interest Rate:* In the CY 2013 PFS final rule with comment period (77 FR 68902), we updated the interest rates used in developing an equipment cost per minute calculation (see 77 FR 68902 for a thorough discussion of this issue). The interest rate was based on the Small Business Administration (SBA) maximum interest rates for different categories of loan size (equipment cost) and maturity (useful life). The Interest rates are listed in Table 6.

TABLE 6: SBA Maximum Interest Rates

Price	Useful Life	Interest Rate
<$25K	<7 Years	7.50%
$25K to $50K	<7 Years	6.50%
>$50K	<7 Years	5.50%
<$25K	7+ Years	8.00%
$25K to $50K	7+ Years	7.00%
>$50K	7+ Years	6.00%

We did not propose any changes to the equipment interest rates for CY 2022.

3. Changes to Direct PE Inputs for Specific Services

This section focuses on specific PE inputs. The direct PE inputs are included in the CY 2022 direct PE input public use files, which are available on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

a. Standardization of Clinical Labor Tasks

As we noted in the CY 2015 PFS final rule with comment period (79 FR 67640 through 67641), we continue to make improvements to the direct PE input database to provide the number of clinical labor minutes assigned for each task for every code in the database instead of only including the number of

clinical labor minutes for the preservice, service, and post service periods for each code. In addition to increasing the transparency of the information used to set PE RVUs, this level of detail would allow us to compare clinical labor times for activities associated with services across the PFS, which we believe is important to maintaining the relativity of the direct PE inputs. This information would facilitate the identification of the usual numbers of minutes for clinical labor tasks and the identification of exceptions to the usual values. It would also allow for greater transparency and consistency in the assignment of equipment minutes based on clinical labor times. Finally, we believe that the detailed information can be useful in maintaining standard times for particular clinical labor tasks that can be applied consistently to many codes as they are valued over several years, similar in principle to the use of physician preservice time packages. We believe that setting and maintaining such standards would provide greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes. For example, as medical practice and technologies change over time, changes in the standards could be updated simultaneously for all codes with the applicable clinical labor tasks, instead of waiting for individual codes to be reviewed.

In the CY 2016 PFS final rule with comment period (80 FR 70901), we solicited comments on the appropriate standard minutes for the clinical labor tasks associated with services that use digital technology. After consideration of comments received, we finalized standard times for clinical labor tasks associated with digital imaging at 2 minutes for ''Availability of prior images confirmed'', 2 minutes for ''Patient clinical information and questionnaire reviewed by technologist, order from physician confirmed and exam protocoled by radiologist'', 2 minutes for ''Review examination with interpreting MD'', and 1 minute for ''Exam documents scanned into PACS'' and ''Exam completed in RIS system to generate billing process and to populate images into Radiologist work queue.'' In the CY 2017 PFS final rule (81 FR 80184 through 80186), we finalized a policy to establish a range of appropriate standard minutes for the clinical labor activity, ''Technologist QCs images in PACS, checking for all images, reformats, and dose page.'' These standard minutes will be applied to new and revised codes that make use of this clinical labor activity when they are reviewed by us for valuation. We finalized a policy to establish 2 minutes as the standard for the simple case, 3 minutes as the standard for the intermediate case, 4 minutes as the standard for the complex case, and 5 minutes as the standard for the highly complex case. These values were based upon a review of the existing minutes assigned for this clinical labor activity; we determined that 2 minutes is the duration for most services and a small number of codes with more complex forms of digital imaging have higher values. We also finalized standard times for a series of clinical labor tasks associated with pathology services in the CY 2016 PFS final rule with comment period (80 FR 70902). We do not believe these activities would be dependent on number of blocks or batch size, and we believe that the finalized standard values accurately reflect the typical time it takes to perform these clinical labor tasks.

In reviewing the RUC-recommended direct PE inputs for CY 2019, we noticed that the 3 minutes of clinical labor time traditionally assigned to the ''Prepare room, equipment and supplies'' (CA013) clinical labor activity were split into 2 minutes for the ''Prepare room, equipment and supplies'' activity and 1 minute for the ''Confirm order, protocol exam'' (CA014) activity. We proposed to maintain the 3 minutes of clinical labor time for the ''Prepare room, equipment and supplies'' activity and remove the clinical labor time for the ''Confirm order, protocol exam'' activity wherever we observed this pattern in the RUC-recommended direct PE inputs. Commenters explained in response that when the new version of the PE worksheet introduced the activity codes for clinical labor, there was a need to translate old clinical labor tasks into the new activity codes, and that a prior clinical labor task was split into two of the new clinical labor activity codes: CA007 (*Review patient clinical extant information and questionnaire*) in the preservice period, and CA014 (*Confirm order, protocol exam*) in the service period. Commenters stated that the same clinical labor from the old PE worksheet was now divided into the CA007 and CA014 activity codes, with a standard of 1 minute for each activity. We agreed with commenters that we would finalize the RUC-recommended 2 minutes of clinical labor time for the CA007 activity code and 1 minute for the CA014 activity code in situations where this was the case. However, when reviewing the clinical labor for the reviewed codes affected by this issue, we found that several of the codes did not include this old clinical labor task, and we also noted that several of the reviewed codes that contained the CA014 clinical labor activity code did not contain any clinical labor for the CA007 activity. In these situations, we continue to believe that in these cases, the 3 total minutes of clinical staff time would be more accurately described by the CA013 ''Prepare room, equipment and supplies'' activity code, and we finalized these clinical labor refinements. For additional details, we direct readers to the discussion in the CY 2019 PFS final rule (83 FR 59463 and 59464).

Following the publication of the CY 2020 PFS proposed rule, one commenter expressed concern with the published list of common refinements to equipment time. The commenter stated that these refinements were the formulaic result of the applying refinements to the clinical labor time and did not constitute separate refinements; the commenter requested that CMS no longer include these refinements in the table published each year. In the CY 2020 PFS final rule, we agreed with the commenter that these equipment time refinements did not reflect errors in the equipment recommendations or policy discrepancies with the RUC's equipment time recommendations. However, we believed that it was important to publish the specific equipment times that we were proposing (or finalizing in the case of the final rule) when they differed from the recommended values due to the effect that these changes can have on the direct costs associated with equipment time. Therefore, we finalized the separation of the equipment time refinements associated with changes in clinical labor into a separate table of refinements. For additional details, we direct readers to the discussion in the CY 2020 PFS final rule (84 FR 62584).

Historically, the RUC has submitted a ''PE worksheet'' that details the recommended direct PE inputs for our use in developing PE RVUs. The format of the PE worksheet has varied over time and among the medical specialties developing the recommendations. These variations have made it difficult for both the RUC's development and our review of code values for individual codes. Beginning with its recommendations for CY 2019, the RUC has mandated the use of a new PE worksheet for purposes of their recommendation development process that standardizes the clinical labor tasks and assigns them a clinical labor activity code. We believe the RUC's use of the new PE worksheet in

developing and submitting recommendations will help us to simplify and standardize the hundreds of different clinical labor tasks currently listed in our direct PE database. As we did in previous calendar years, to facilitate rulemaking for CY 2022, we are continuing to display two versions of the Labor Task Detail public use file: One version with the old listing of clinical labor tasks, and one with the same tasks crosswalked to the new listing of clinical labor activity codes. These lists are available on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

b. Technical Corrections to Direct PE Input Database and Supporting Files

For CY 2022, we proposed to address the following:

• Following the publication of the CY 2021 PFS proposed rule, several commenters questioned the proposed RVUs associated with several occupational therapy evaluation procedures (CPT codes 97165 through 97167). Commenters stated that the PE valuation for these codes appeared to be illogical as it was counterintuitive for the PE RVU to go down as the level of complexity increased. Commenters stated that the distribution of code usage has not changed in any manner to justify a reduction in the code values and that all three evaluation codes should reimburse at the same rate. In response to the commenters, we noted that although the three codes in question shared the same work RVU and the same direct PE inputs, they did not share the same specialty distribution in the claims data, and therefore, would not necessarily receive the same allocation of indirect PE. In the CY 2021 PFS final rule (85 FR 84490), we finalized the implementation of a technical change intended to ensure that these three services received the same allocation of indirect PE. We agreed with commenters that it was important to avoid a potential rank order anomaly in which the simple case for a service was valued higher than the complex case.

After the publication of the CY 2021 PFS final rule, stakeholders stated their appreciation for the technical change made in the final rule to ensure that the indirect PE allocation was the same for all three levels of occupational therapy evaluation codes. However, stakeholders expressed concern that the PE RVUs we finalized for CPT codes 97165–97167 decreased as compared to the PE RVUs we proposed for CY 2021. Stakeholders stated that nothing had occurred in the past year that would account for a reduction to the proposed PE for these codes, especially in a year where the proposed PE increased for the corresponding physical therapy evaluation procedures (CPT codes 97161–97163), and stakeholders questioned whether there had been an error in applying the indirect PE methodology.

We reviewed the indirect PE allocation for CPT codes 97165–97167 in response to the stakeholder inquiry and we do not agree that there was an error in applying the indirect PE methodology. We finalized a technical change in the CY 2021 PFS final rule intended to ensure that these three services received the same allocation of indirect PE, which achieved its desired goal of assigning equivalent indirect PE to these three services. However, by forcing CPT codes 97165–97167 to have the same indirect PE allocation, the indirect PE values for these codes no longer relied on the claims data, which ended up affecting the indirect practice cost index for the wider occupational therapy specialty. Because CPT codes 97165–97167 are high volume services, this resulted in a lower indirect practice cost index for the occupational therapy specialty and a smaller allocation of indirect PE for CY 2021 than initially proposed.

We proposed to address this issue for CY 2022 by assigning all claims data associated with CPT codes 97165–97167 to the occupational therapy specialty. This should ensure that CPT codes 97165–97167 will always receive the same indirect PE allocation, as well as prevent any fluctuations to the indirect practice cost index for the wider occupational therapy specialty. This is intended to avoid a potential rank order anomaly in which the simple case for a service is valued higher than the complex case. As the utilization for CPT codes 97165–97167 is overwhelmingly identified as performed by occupational therapists, we do not anticipate that assigning all of the claims data for these codes to the occupational therapy specialty will have a noticeable effect on their valuation. We solicited public comments regarding this proposal, and specifically on what commenters suggest as the most appropriate method of assigning indirect PE allocation for these services.

The following is a summary of the comments we received on our proposal and our responses.

Comment: Several commenters stated that they appreciated CMS taking steps to review the PE calculations and make the correction to maintain the PE values equally for CPT codes 97165, 97166 and 97167. The commenters stated that they appreciated and agreed with the correction in calculation. The commenters also urged CMS to review this policy again if and when the evaluation codes are stratified because the current rank order anomaly caused by indirect PE when the codes are paid the same will not exist in the future when the code values are stratified based on complexity level.

Response: We appreciate the support for our proposal from the commenters.

After consideration of the public comments, we are finalizing our proposal to assign all claims data associated with CPT codes 97165–97167 to the occupational therapy specialty.

In the CY 2020 PFS final rule (84 FR 63102 through 63104), we created two new HCPCS G codes, G2082 and G2083, effective January 1, 2020 on an interim final basis for the provision of self-administered esketamine. In the CY 2021 PFS final rule, we finalized a proposal to refine the values for HCPCS codes G2082 and G2083 using a building block methodology that summed the values associated with several codes (85 FR 84641 through 84642). Following the publication of the CY 2021 PFS final rule, stakeholders expressed concerns that the finalized PE RVU had decreased for HCPCS codes G2082 and G2083 as compared to the proposed valuation and as compared to the previous CY 2020 interim final valuation. Stakeholders questioned whether there had been an error in the PE allocation since CMS had finalized increases in the direct PE inputs for the services.

We reviewed the indirect PE allocation for HCPCS codes G2082 and G2083 in response to the stakeholder inquiry and discovered a technical change that was applied in error. Specifically, we inadvertently assigned a different physician specialty than we intended (''All Physicians'') to HCPCS codes G2082 and G2083 for indirect PE allocation in our ratesetting process during valuation of these codes in the CY 2020 PFS final rule, and continued that assignment into the CY 2021 PFS proposed rule. This specialty assignment caused the PE value for these services to be higher than anticipated for CY 2020. We intended to revise the assigned physician specialty for these codes to ''General Practice'' in the CY 2021 PFS final rule; however, we neglected to discuss this change in the course of PFS rulemaking for CY 2021. Since we initially applied this technical change in the CY 2021 PFS final rule without providing an explanation, we

issued a correction notice (86 FR 14690) to remove this change from the CY 2021 PFS final rule, and to instead maintain the All Physicians specialty assignment through CY 2021. We apologize for any confusion this may have caused.

For CY 2022, we proposed to maintain the currently assigned physician specialty for indirect PE allocation for HCPCS codes G2082 and G2083. We proposed to assign these two services to the All Physicians specialty for indirect PE allocation which will maintain payment consistency with the rates published in the CY 2020 PFS final rule and the CY 2021 PFS proposed rule. Although we had previously intended to assign the General Practice specialty to these codes, stakeholders have provided additional information about these services suggesting that maintaining the All Physicians specialty assignment for these codes will help maintain payment stability and preserve access to this care for beneficiaries. We solicited public comments to help us discern which specialty would be the most appropriate to use for indirect PE allocation for HCPCS codes G2082 and G2083. We note that the PE methodology, which relies on the allocation of indirect costs based on the magnitude of direct costs, should appropriately reflect the typical costs for the specialty the commenters suggest. For example, we do not believe it would be appropriate to assign the Psychiatry specialty for these services given that HCPCS codes G2082 and G2083 include the high direct costs associated with esketamine supplies. The Psychiatry specialty is an outlier compared to most other specialties, allocating indirect costs at a 15:1 ratio based on direct costs because psychiatry services typically have very low direct costs. Assignment of most other specialties would result in allocation of direct costs at roughly a 3:1 ratio. We requested that commenters explain in their comments how the indirect PE allocation would affect the payment for these services. Specifically, to ensure appropriate payment for HCPCS codes G2082 and G2083, we would like to get a better understanding of the indirect costs associated with these services, relative to other services furnished by the suggested specialty.

The following is a summary of the comments we received on our proposal and our responses.

Comment: Several commenters supported the proposal to maintain the currently assigned physician specialty (All Physicians) for indirect PE allocation for HCPCS codes G2082 and G2083. Commenters thanked CMS for making technical corrections to restore the payment levels for services related to self-administered esketamine to their CY 2020 amounts. One commenter encouraged CMS to maintain the current rates to ensure payment stability and beneficiary access to this evidence-based treatment option. Another commenter urged CMS either to maintain its current approach by allowing continued use of the all-physician specialty designation or to provide a blend of the Psychiatry (⅔) and All Physicians (⅓) designations.

Response: We appreciate the support for our proposed policies from the commenters.

Comment: Several commenters stated that esketamine services were best identified as procedures assigned to the specialty of Psychiatry. Commenters stated that approximately 95 percent of the providers administering esketamine are psychiatric professionals and that utilization data from CMS demonstrated that nearly 75 percent of providers in the non-facility setting fall within the Psychiatry specialty for both codes. Commenters stressed the high costs to the provider of administering esketamine which result in more risk due to up-front supply costs, and several commenters requested assigning HCPCS codes G2082 and G2083 to the Psychiatry specialty to offset potential decreases in valuation resulting from the proposed clinical labor pricing update. One commenter requested a specialty blend of three-fourths Psychiatry and one-fourth ''All Physicians'' which the commenter stated was clinically coherent, consistent with the data available, and would result in the total non-facility national average reimbursement amount that most closely approximates CY 2021 levels.

Response: We appreciate the feedback from the commenters regarding the costs associated with administering esketamine. However, we continue to believe that the All Physicians specialty most accurately captures the indirect PE allocation associated with these services. We do not assign a blended combination of specialties for any other services and the commenters did not provide new data to support a change in specialty assignment aside from noting that many providers in the non-facility setting fall within the Psychiatry specialty for both codes. We continue to believe that it would not be accurate to assign the Psychiatry specialty for HCPCS codes G2082 and G2083 due to its outlier status amongst specialties, whereby Psychiatry allocates indirect costs at a 15:1 ratio based on direct costs as compared to most other specialties having approximately a 3:1 ratio. We do not believe that this would be an accurate specialty designation for HCPCS codes G2082 and G2083 given the high direct costs associated with esketamine (which would translate into disproportionately high indirect PE allocation at said 15:1 ratio).

As we noted in the CY 2021 PFS final rule (85 FR 84498 through 84499) and again in this rule, the RAND Corporation is currently studying potential improvements to our PE allocation methodology and the data that underlie it. We are interested in exploring ways that the PE methodology can be updated, which could include improvements to the indirect PE methodology to address unusual codes like G2082 and G2083 which have a direct to indirect ratio that does not match their most commonly billed specialties. Under the current PE methodology, however, we agree with the commenters who supported the proposal to maintain the currently assigned physician specialty (All Physicians) for indirect PE allocation.

After consideration of the public comments, we are finalizing our proposal to maintain the All Physicians specialty for indirect PE allocation for HCPCS codes G2082 and G2083.

A stakeholder contacted us regarding a potential error involving the intraservice work time for CPT code 35860 (Exploration for postoperative hemorrhage, thrombosis or infection; extremity). The stakeholder stated that the RUC recommended an intraservice work time of 90 minutes for this code when it was last reviewed in the CY 2012 PFS final rule and we finalized the work time without refinement at 60 minutes (76 FR 73131). The stakeholder requested that the intraservice work time for CPT code 35860 should be updated to 90 minutes.

We reviewed the intraservice work time for CPT code 35860 and found that the RUC inadvertently recommended a time of 60 minutes for the code, which we proposed and finalized without comment in rulemaking for the CY 2012 PFS. As a result, we do not believe that this is a technical error on our part. However, since the stakeholder has clarified that the RUC intended to recommend 90 minutes of intraservice work time for CPT code 35860 based on the surveyed median time, we proposed to update the intraservice work time to 90 minutes to match the survey results.

We did not receive public comments on our proposal to update the intraservice work time for CPT code 35860, and we are finalizing as proposed.

We did not make any proposals specifically associated with the utilization crosswalk file or public use

file as described below, however we received a public comment on these topics from one stakeholder. The following is a summary of the comments we received and our responses.

Comment: One stakeholder contacted CMS identifying what appeared to be duplicate data in the utilization crosswalk file. The stakeholder stated that the first 15,875 rows of the file appeared to almost exclusively contain duplicate lines in sets of two, and requested clarification on whether the utilization file was in error.

Response: Due to a technical error, the utilization for anesthesia services was unintentionally duplicated in the files associated with the proposed rule. We have corrected this error for the final rule and we apologize for any confusion which may have resulted from this inadvertent mistake in the utilization crosswalk file.

Comment: One commenter stated that they believed the public use files contain an error in the clinical labor portion of the PE RVU calculation. The commenter stated that the CY 2022 PE RVU summary file provided the pre-, intra-, and post-service costs for CPT codes 65778 and 65779. The commenter stated that this file showed no cost for pre-service activities or post-service activities, however the accompanying Clinical Labor New Activity Detail public use file showed a series of staff activities associated with CPT codes 65778 and 65779. The commenter requested that CMS review the pre-service and post-service costs and correct or update the clinical labor values for these codes accordingly. The commenter also stated that the patient contact time reflected in the public use file is understated by approximately 50 percent for CPT codes 65778 and 65779 and encouraged CMS to evaluate whether the public use file values should be updated prior to implementation of the PFS for CY 2022.

Response: We reviewed the public use files described by the commenter and we can confirm that there was no error in the calculation of the rates for these services. The clinical labor tasks described by the commenter for CPT codes 65778 and 65779 all take place during the intra-service period, not the pre-service or post-service period, and the Clinical Labor New Activity Detail public use file correctly lists the clinical labor for these services. If the commenter has reason to believe that the clinical labor is undervalued for these services, we encourage them to nominate CPT codes 65778 and 65779 as potentially misvalued for additional review.

c. Updates to Prices for Existing Direct PE Inputs

In the CY 2011 PFS final rule with comment period (75 FR 73205), we finalized a process to act on public requests to update equipment and supply price and equipment useful life inputs through annual rulemaking, beginning with the CY 2012 PFS proposed rule. For CY 2022, we proposed to update the price of six supplies and two equipment items in response to the public submission of invoices. Since this is the final year of the supply and equipment pricing update, the new pricing for each of these supply and equipment items will take effect for CY 2022 as there are no remaining years of the transition. The six supply and equipment items with proposed updated prices are listed in the valuation of specific codes section of the preamble under Table 23, CY 2022 Invoices Received for Existing Direct PE Inputs.

(1) Market-Based Supply and Equipment Pricing Update

Section 220(a) of the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93, April 1, 2014) provides that the Secretary may collect or obtain information from any eligible professional or any other source on the resources directly or indirectly related to furnishing services for which payment is made under the PFS, and that such information may be used in the determination of relative values for services under the PFS. Such information may include the time involved in furnishing services; the amounts, types and prices of PE inputs; overhead and accounting information for practices of physicians and other suppliers, and any other elements that would improve the valuation of services under the PFS.

As part of our authority under section 1848(c)(2)(M) of the Act, we initiated a market research contract with StrategyGen to conduct an in-depth and robust market research study to update the PFS direct PE inputs (DPEI) for supply and equipment pricing for CY 2019. These supply and equipment prices were last systematically developed in 2004–2005. StrategyGen submitted a report with updated pricing recommendations for approximately 1300 supplies and 750 equipment items currently used as direct PE inputs. This report is available as a public use file displayed on the CMS website under downloads for the CY 2019 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

The StrategyGen team of researchers, attorneys, physicians, and health policy experts conducted a market research study of the supply and equipment items currently used in the PFS direct PE input database. Resources and methodologies included field surveys, aggregate databases, vendor resources, market scans, market analysis, physician substantiation, and statistical analysis to estimate and validate current prices for medical equipment and medical supplies. StrategyGen conducted secondary market research on each of the 2,072 DPEI medical equipment and supply items that CMS identified from the current DPEI. The primary and secondary resources StrategyGen used to gather price data and other information were:

- Telephone surveys with vendors for top priority items (Vendor Survey).
- Physician panel validation of market research results, prioritized by total spending (Physician Panel).
- The General Services Administration system (GSA).
- An aggregate health system buyers database with discounted prices (Buyers).
- Publicly available vendor resources, that is, Amazon Business, Cardinal Health (Vendors).
- The **Federal Register**, current DPEI data, historical proposed and final rules prior to CY 2018, and other resources; that is, AMA RUC reports (References).

StrategyGen prioritized the equipment and supply research based on current share of PE RVUs attributable by item provided by CMS. StrategyGen developed the preliminary Recommended Price (RP) methodology based on the following rules in hierarchical order considering both data representativeness and reliability.

(1) If the market share, as well as the sample size, for the top three commercial products were available, the weighted average price (weighted by percent market share) was the reported RP. Commercial price, as a weighted average of market share, represents a more robust estimate for each piece of equipment and a more precise reference for the RP.

(2) If no data were available for commercial products, the current CMS prices were used as the RP.

GSA prices were not used to calculate the StrategyGen recommended prices, due to our concern that the GSA system curtails the number and type of suppliers whose products may be accessed on the GSA Advantage website, and that the GSA prices may often be lower than prices that are

available to non-governmental purchasers. After reviewing the StrategyGen report, we proposed to adopt the updated direct PE input prices for supplies and equipment as recommended by StrategyGen.

StrategyGen found that despite technological advancements, the average commercial price for medical equipment and supplies has remained relatively consistent with the current CMS price. Specifically, preliminary data indicated that there was no statistically significant difference between the estimated commercial prices and the current CMS prices for both equipment and supplies. This cumulative stable pricing for medical equipment and supplies appears similar to the pricing impacts of non-medical technology advancements where some historically high-priced equipment (that is, desktop PCs) has been increasingly substituted with current technology (that is, laptops and tablets) at similar or lower price points. However, while there were no statistically significant differences in pricing at the aggregate level, medical specialties would experience increases or decreases in their Medicare payments if we were to adopt the pricing updates recommended by StrategyGen. At the service level, there may be large shifts in PE RVUs for individual codes that happened to contain supplies and/or equipment with major changes in pricing, although we note that codes with a sizable PE RVU decrease would be limited by the requirement to phase in significant reductions in RVUs, as required by section 1848(c)(7) of the Act. The phase-in requirement limits the maximum RVU reduction for codes that are not new or revised to 19 percent in any individual calendar year.

We believe that it is important to make use of the most current information available for supply and equipment pricing instead of continuing to rely on pricing information that is more than a decade old. Given the potentially significant changes in payment that would occur, both for specific services and more broadly at the specialty level, in the CY 2019 PFS proposed rule we proposed to phase in our use of the new direct PE input pricing over a 4-year period using a 25/75 percent (CY 2019), 50/50 percent (CY 2020), 75/25 percent (CY 2021), and 100/0 percent (CY 2022) split between new and old pricing. This approach is consistent with how we have previously incorporated significant new data into the calculation of PE RVUs, such as the 4-year transition period finalized in CY 2007 PFS final rule with comment period when changing to the ''bottom-up'' PE methodology (71 FR 69641). This transition period will not only ease the shift to the updated supply and equipment pricing, but will also allow interested parties an opportunity to review and respond to the new pricing information associated with their services.

We proposed to implement this phase-in over 4 years so that supply and equipment values transition smoothly from the prices we currently include to the final updated prices in CY 2022. We proposed to implement this pricing transition such that one quarter of the difference between the current price and the fully phased-in price is implemented for CY 2019, one third of the difference between the CY 2019 price and the final price is implemented for CY 2020, and one half of the difference between the CY 2020 price and the final price is implemented for CY 2021, with the new direct PE prices fully implemented for CY 2022. An example of the transition from the current to the fully-implemented new pricing is provided in Table 7.

TABLE 7: Example of Direct PE Pricing Transition

Current Price	$100	
Final Price	$200	
Year 1 (CY 2019) Price	$125	1/4 difference between $100 and $200
Year 2 (CY 2020) Price	$150	1/3 difference between $125 and $200
Year 3 (CY 2021) Price	$175	1/2 difference between $150 and $200
Final (CY 2022) Price	$200	

For new supply and equipment codes for which we establish prices during the transition years (CYs 2019, 2020 and 2021) based on the public submission of invoices, we proposed to fully implement those prices with no transition since there are no current prices for these supply and equipment items. These new supply and equipment codes would immediately be priced at their newly established values. We also proposed that, for existing supply and equipment codes, when we establish prices based on invoices that are submitted as part of a revaluation or comprehensive review of a code or code family, they will be fully implemented for the year they are adopted without being phased in over the 4-year pricing transition. The formal review process for a HCPCS code includes a review of pricing of the supplies and equipment included in the code. When we find that the price on the submitted invoice is typical for the item in question, we believe it would be appropriate to finalize the new pricing immediately along with any other revisions we adopt for the code valuation.

For existing supply and equipment codes that are not part of a comprehensive review and valuation of a code family and for which we establish prices based on invoices submitted by the public, we proposed to implement the established invoice price as the updated price and to phase in the new price over the remaining years of the proposed 4-year pricing transition. During the proposed transition period, where price changes for supplies and equipment are adopted without a formal review of the HCPCS codes that include them (as is the case for the many updated prices we proposed to phase in over the 4-year transition period), we believe it is important to include them in the remaining transition toward the updated price. We also proposed to phase in any updated pricing we establish during the 4-year transition period for very commonly used supplies and equipment that are included in 100 or more codes, such as sterile gloves (SB024) or exam tables (EF023), even if invoices are provided as part of the formal review of a code family. We would implement the new prices for any such supplies and equipment over the remaining years of the proposed 4-year transition period. Our proposal was intended to minimize any potential disruptive effects during the proposed transition period that could be caused by other sudden shifts in RVUs due to the high number of services that make

use of these very common supply and equipment items (meaning that these items are included in 100 or more codes).

We believed that implementing the proposed updated prices with a 4-year phase-in would improve payment accuracy, while maintaining stability and allowing stakeholders the opportunity to address potential concerns about changes in payment for particular items. Updating the pricing of direct PE inputs for supplies and equipment over a longer timeframe will allow more opportunities for public comment and submission of additional, applicable data. We welcomed feedback from stakeholders on the proposed updated supply and equipment pricing, including the submission of additional invoices for consideration.

We received many comments regarding the market-based supply and equipment pricing proposal following the publication of the CY 2019 PFS proposed rule. For a full discussion of these comments, we direct readers to the CY 2019 PFS final rule (83 FR 59475 through 59480). In each instance in which one commenter raised questions about the accuracy of a supply or equipment code's recommended price, the StrategyGen contractor conducted further research on the item and its price with special attention to ensuring that the recommended price was based on the correct item in question and the clarified unit of measure. Based on the commenters' requests, the StrategyGen contractor conducted an extensive examination of the pricing of any supply or equipment items that any commenter identified as requiring additional review. Invoices submitted by multiple commenters were greatly appreciated and ensured that medical equipment and supplies were re-examined and clarified. Multiple researchers reviewed these specified supply and equipment codes for accuracy and proper pricing. In most cases, the contractor also reached out to a team of nurses and their physician panel to further validate the accuracy of the data and pricing information. In some cases, the pricing for individual items needed further clarification due to a lack of information or due to significant variation in packaged items. After consideration of the comments and this additional price research, we updated the recommended prices for approximately 70 supply and equipment codes identified by the commenters. Table 9 in the CY 2019 PFS final rule lists the supply and equipment codes with price changes based on feedback from the commenters and the resulting additional research into pricing (83 FR 59479 through 59480).

After consideration of the public comments, we finalized our proposals associated with the market research study to update the PFS direct PE inputs for supply and equipment pricing. We continue to believe that implementing the updated prices with a 4-year phase-in will improve payment accuracy, while maintaining stability and allowing stakeholders the opportunity to address potential concerns about changes in payment for particular items. We continue to welcome feedback from stakeholders on the updated supply and equipment pricing, including the submission of additional invoices for consideration.

For CY 2022, we received invoice submissions from stakeholders for approximately half a dozen supply and equipment codes as part of the fourth year of the market-based supply and equipment pricing update. We used these submitted invoices in many cases to supplement the pricing originally proposed for the CY 2019 PFS rule cycle. We reviewed the invoices, as well as our own data for the relevant supply/equipment codes to make sure the item in the invoice was representative of the supply/equipment item in question and aligned with past research. Based on this review, we proposed to update the prices of six supply items listed in the valuation of specific codes section of the preamble under Table 23: CY 2022 Invoices Received for Existing Direct PE Inputs. Since this is the final year of the supply and equipment pricing update, the new pricing for each of these supply and equipment items would take effect immediately for CY 2022.

The proposed prices for the supply and equipment items listed in Table 23 of CY 2022 were generally calculated following our standard methodology of averaging together the prices on the submitted invoices. In the case of the Liquid coverslip (Ventana 650–010) (SL479) supply, we proposed a price of $0.051 based on the median invoice due to the presence of an outlier invoice that substantially increased the pricing when using an average. We believe that the price of $0.051 will be more typical for the SL479 supply based on the pricing information contained on the other submitted invoices. We also received several invoices for the 3C patch system (SD343) supply; however, since we established a price of $625.00 for this supply in last year's CY 2021 PFS final rule and the submitted invoices had an average price of $612.50, we did not propose to update the price. We believe that the submitted invoices confirm that the current pricing of $625.00 is typical for the SD343 supply.

We received public comments on the fourth and final year of the market-based supply and equipment pricing update. The following is a summary of the comments we received and our responses.

Comment: One commenter urged CMS to update prices for negative pressure wound therapy (NPWT) devices given the context of the clinical labor pricing update. The commenter stated that while one database reported typical costs of $400–$600 for single-use disposable NPWT devices, further prices provided by a medical equipment distributor show lower costs incurred by providers paying for PICO, Smith+Nephew's single-use disposable NPWT device. The commenter submitted five invoices for the negative pressure wound therapy, disposable kit (SA131) supply and stated that these updated prices for single-use NPWT devices could be used in future updates of direct cost inputs, which would strengthen the accuracy of Medicare pricing.

Response: We appreciate the submission of invoices from the commenter to update the pricing of the SA131 supply. This kit is currently priced at $208 and we are finalizing an update to a price of $263.25 based on the median of the five submitted invoices from one commenter. We believe that the median value is more reflective of the typical price than the average value as there was a clear outlier amongst the five invoice prices ($248.33, $252.00, $263.25, $284.50, and $340.20).

Comment: Several commenters stated their concerns regarding significant price reductions for several types of radiation therapy equipment: The IMRT treatment planning system (ED033), the HDR Afterload System Nucletron—Oldelft (ER003), and the SRS system SBRT (ER083). Commenters stated that they appreciated CMS' efforts to acquire current pricing information but believed that the recommended prices for these equipment items are below industry standards. Commenters stated that undervaluing equipment inputs has the potential to create access to care issues and potentially reduce the utilization of services that provide high quality patient outcomes.

Response: Although we share the concerns of the commenters about the importance of ensuring accuracy in pricing and beneficiary access to care, the commenters did not submit invoices or provide any other pricing information for the three equipment items in question. In the absence of other pricing

data, we continue to believe that the equipment pricing we established for these items based on our past market-based research reflects the most accurate information for the equipment items in question.

Comment: An anonymous commenter submitted an invoice that they stated could be used to update the pricing of the endovascular laser treatment kit (SA074) supply. The commenter stated that the PE may be overvalued for CPT code 36478, and the cost of $205.00 per kit detailed in this invoice may be more accurately reflective of SA074 kit costs.

Response: We appreciate the invoice submission from the anonymous commenter. The SA074 supply has a current CY 2022 price of $438.60 based on invoices submitted in last year's CY 2021 rulemaking cycle. The new invoice submission is less than half of this price, and when we compared the specific kit in question on the invoices, they described two different products. The CY 2021 invoices described a 65 cm kit while the CY 2022 invoice described a 45 cm version of the same kit. We believe that this explains the disparity in pricing between the different invoices. Since it is unclear to us which of these two products is more typical for use in CPT code 36478, we are maintaining the current CY 2022 price of $438.60 pending availability of additional information. We encourage stakeholders to submit additional invoices to assist in the pricing of the SA074 supply. These invoices can be submitted with public comments in next year's CY 2023 rulemaking cycle or, if outside the notice and comment rulemaking process, via email at *PE_Price_Input_Update@cms.hhs.gov.*

Comment: One commenter requested that CMS establish a national physician payment rate for Category III CPT code 0583T, also known as tympanostomy under local anesthesia (Tula). The commenter stated that this device-intensive procedure has inappropriately low physician MAC-posted rates resulting from crosswalks to ENT codes that do not involve use of single-use implantable medical devices provided in the physician office setting. The commenter suggested work RVUs and direct PE inputs for Category III code 0583T to be used in national pricing of the service, and separately submitted six invoices showing prices paid by physicians for the tympanostomy under local anesthesia (Tula) implantable device and related supplies. The commenter requested a price of $995 for the Tula implantable device.

Response: We appreciate the submission of invoices and other pricing information from the commenter regarding Category III CPT code 0583T, but we did not propose to establish national pricing for this service. Category III CPT codes are typically contractor priced since they describe new and emerging technologies. We will review the materials provided by the commenter for potential use in future rulemaking; however, we are not finalizing national pricing for Category III CPT code 0583T or establishing a price for the Tula implantable device at this time.

After consideration of the public comments, we are finalizing the supply and equipment prices as detailed individually above. We note that the supply and equipment prices finalized for CY 2022 represent the fourth and final year of the market-based supply and equipment pricing update.

(2) Invoice Submission

The full list of updated supply and equipment pricing as implemented over the 4-year transition period will be made available as a public use file displayed on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

We routinely accept public submission of invoices as part of our process for developing payment rates for new, revised, and potentially misvalued codes. Often these invoices are submitted in conjunction with the RUC-recommended values for the codes. To be included in a given year's proposed rule, we generally need to receive invoices by the same February 10th deadline we noted for consideration of RUC recommendations. However, we will consider invoices submitted as public comments during the comment period following the publication of the PFS proposed rule, and would consider any invoices received after February 10th or outside of the public comment process as part of our established annual process for requests to update supply and equipment prices. Stakeholders are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at *PE_Price_Input_Update@cms.hhs.gov.*

(3) Autologous Platelet-Rich Plasma (HCPCS Code G0460) Supply Inputs

We did not make any proposals associated with HCPCS code G0460 (*Autologous platelet rich plasma for chronic wounds/ulcers, including phlebotomy, centrifugation, and all other preparatory procedures, administration and dressings, per treatment*) in the CY 2021 PFS proposed rule. Following publication of the rule, stakeholders contacted CMS regarding the creation of a new 3C patch system supply, which is topically applied for the management of exuding cutaneous wounds, such as leg ulcers, pressure ulcers, and diabetic ulcers and mechanically or surgically-debrided wounds. Stakeholders first sought clarification on how CMS calculated the underlying nonfacility PE RVUs for HCPCS code G0460. Stakeholders also stated that autologous platelet rich plasma administration procedures furnished in clinical trials (including the new 3C patch system) are reported using HCPCS code G0460 and requested that CMS revalue the service to reflect the PEs associated with the new patch system supply. The stakeholders stated that the use of the new 3C patch system will represent the typical case for HCPCS code G0460, and suggested that, therefore, the cost inputs for this supply should be used to establish the RVUs for this code, as the current PFS payment rate is substantially less than the amount it costs to furnish the 3C patch.

We want to clarify that the direct PE inputs for HCPCS code G0460 increased for CY 2021 as a result of the ongoing market-based supply and equipment pricing update. However, there was also a minor decrease in the indirect PE allocation associated with this service for CY 2021, with the net result that the proposed PE RVU coincidentally ended up remaining the same as in the previous year. We also clarify that HCPCS code G0460 is not included in the Anticipated Specialty Assignment for Low Volume Services list, and therefore, was unaffected by low utilization in the claims data. In addition, as a contractor priced service, HCPCS code G0460 is unaffected by inclusion or exclusion from this list.

We share the concerns of the stakeholders that patient access to the 3C patch could be materially impacted if CMS maintains the current PE RVUs for HCPCS G0460. In the CY 2021 PFS final rule, we established contractor pricing for HCPCS code G0460 for CY 2021. We believe that the use of contractor pricing again for CY 2022 will allow us additional time to consider the most appropriate resource inputs and PE RVUs for HCPCS code G0460. We also added the 3C patch system to our supply database under supply code SD343 at a price of $625.00 based on an average of the submitted invoices. We proposed to maintain contractor pricing for CY 2022 for HCPCS code G0460 as we do not currently have sufficient information to establish national pricing. It remains

unclear to us what the typical supply inputs would be for HCPCS code G0460 and whether they would include the use of the new 3C patch system. We believe that it would be more appropriate to maintain contractor pricing for the service, which will allow for more flexibility in pricing. We solicited any additional information that commenters can supply that CMS should consider to establish national payment for HCPCS code G0460.

We did not receive public comments on this proposal and are finalizing contractor pricing for HCPCS code G0460 for CY 2022 as proposed.

d. Clinical Labor Pricing Update

Section 220(a) of the PAMA provides that the Secretary may collect or obtain information from any eligible professional or any other source on the resources directly or indirectly related to furnishing services for which payment is made under the PFS, and that such information may be used in the determination of relative values for services under the PFS. Such information may include the time involved in furnishing services; the amounts, types and prices of PE inputs; overhead and accounting information for practices of physicians and other suppliers, and any other elements that would improve the valuation of services under the PFS.

Since 2019, we have been updating the supply and equipment prices used for PE as part of a market-based pricing transition; CY 2022 will be the final year of this 4-year transition. We initiated a market research contract with StrategyGen to conduct an in-depth and robust market research study to update the supply and equipment pricing for CY 2019, and we finalized a policy in CY 2019 to phase in the new pricing over a period of 4 years. However, we did not propose to update the clinical labor pricing, and the pricing for clinical labor has remained unchanged during this pricing transition. Clinical labor rates were last updated for CY 2002 using Bureau of Labor Statistics (BLS) data and other supplementary sources where BLS data were not available; we refer readers to the full discussion in the CY 2002 PFS final rule for additional details (66 FR 55257 through 55262).

Stakeholders have raised concerns that the long delay since clinical labor pricing was last updated has created a significant disparity between CMS' clinical wage data and the market average for clinical labor. In recent years, a number of stakeholders have suggested that certain wage rates are inadequate because they do not reflect current labor rate information. Some stakeholders have also stated that updating the supply and equipment pricing without updating the clinical labor pricing could create distortions in the allocation of direct PE. Since the pool of aggregated direct PE inputs is budget neutral, if these rates are not routinely updated, clinical labor may become undervalued over time relative to equipment and supplies, especially since the supply and equipment prices are in the process of being updated. There has been considerable stakeholder interest in updating the clinical labor rates, and when we solicited comment on this topic in past rules, such as in the CY 2019 PFS final rule (83 FR 59480), stakeholders supported the idea.

Therefore, we proposed to update the clinical labor pricing for CY 2022, in conjunction with the final year of the supply and equipment pricing update. We believe it is important to update the clinical labor pricing to maintain relativity with the recent supply and equipment pricing updates. We proposed to use the methodology outlined in the CY 2002 PFS final rule (66 FR 55257), which draws primarily from BLS wage data, to calculate updated clinical labor pricing. As we stated in the CY 2002 PFS final rule, the BLS' reputation for publishing valid estimates that are nationally representative led to the choice to use the BLS data as the main source. We believe that the BLS wage data continues to be the most accurate source to use as a basis for clinical labor pricing and this data will appropriately reflect changes in clinical labor resource inputs for purposes of setting PE RVUs under the PFS. We used the most current BLS survey data (2019) as the main source of wage data for this proposal.

We recognize that the BLS survey of wage data does not cover all the staff types contained in our direct PE database. Therefore, we crosswalked or extrapolated the wages for several staff types using supplementary data sources for verification whenever possible. In situations where the price wages of clinical labor types were not referenced in the BLS data, we have used the national salary data from the Salary Expert, an online project of the Economic Research Institute that surveys national and local salary ranges and averages for thousands of job titles using mainly government sources. (A detailed explanation of the methodology used by Salary Expert to estimate specific job salaries can be found at *www.salaryexpert.com*). We previously used Salary Expert information as the primary backup source of wage data during the last update of clinical labor pricing in CY 2002. If we did not have direct BLS wage data available for a clinical labor type, we used the wage data from Salary Expert as a reference for pricing, then crosswalked these clinical labor types to a proxy BLS labor category rate that most closely matched the reference wage data, similar to the crosswalks used in our PE/HR allocation. For example, there is no direct BLS wage data for the Mammography Technologist (L043) clinical labor type; we used the wage data from Salary Expert as a reference and identified the BLS wage data for Respiratory Therapists as the best proxy category. We calculated rates for the ''blend'' clinical labor categories by combining the rates for each labor type in the blend and then dividing by the total number of labor types in the blend.

As in the CY 2002 clinical labor pricing update, the proposed cost per minute for each clinical staff type was derived by dividing the average hourly wage rate by 60 to arrive at the per minute cost. In cases where an hourly wage rate was not available for a clinical staff type, the proposed cost per minute for the clinical staff type was derived by dividing the annual salary (converted to 2021 dollars using the Medicare Economic Index) by 2080 (the number of hours in a typical work year) to arrive at the hourly wage rate and then again by 60 to arrive at the per minute cost. To account for the employers' cost of providing fringe benefits, such as sick leave, we used the same benefits multiplier of 1.366 as employed in CY 2002. As an example of this process, for the Physical Therapy Aide (L023A) clinical labor type, the BLS data reflected an average hourly wage rate of $14.03, which we multiplied by the 1.366 benefits modifier and then divided by 60 minutes to arrive at the proposed per-minute rate of $0.32.

Table 8 lists our updates to the clinical labor prices. The BLS occupational code used as a source of wage data is listed for each clinical labor type; for the ''blend'' clinical labor types, this may include multiple BLS occupational codes and other clinical labor types which were calculated separately and then averaged together. Clinical labor types without a direct BLS labor category where we are employing a proxy BLS wage rate are indicated with an asterisk in Table 8.

BILLING CODE 4120–01–P

TABLE 8: Proposed Clinical Labor Pricing Update

Labor Code	Labor Description	Source	Current Rate Per Minute	Updated Rate Per Minute	% Change
L023A	Physical Therapy Aide	BLS 31-2022	0.23	0.32	39%
L026A	Medical/Technical Assistant	BLS 31-9092	0.26	0.39	50%
L030A	Lab Tech/MTA	L033A, L026A	0.30	0.50	67%
L032B	EEG Technician	BLS 29-2098	0.32	0.51	59%

L152A	Medical Physicist	BLS 19-2012 (75th percentile)	1.52	1.80	18%

BILLING CODE 4120–01–C

We proposed to use the 75th percentile of the average wage data for the Medical Physicist (L152A) clinical labor type because we believe this level

will most closely fit with the historic wage data for this clinical labor type. A Medical Physicist is a specific type of physicist, and the available BLS wage data describes the more general category of physicist which is paid at a lower rate. In this specific case, the 75th percentile more accurately describes the clinical labor type in question based on how it has historically been paid. We also proposed to maintain the current clinical labor pricing for the Behavioral Health Care Manager (L057B) clinical labor type rather than update it. Although the BLS data reflected a decreased clinical labor rate for the Behavioral Health Care Manager labor type, we do not believe that the typical wages have decreased for this clinical labor type given that every other clinical labor type has increased over the past 5 years since the Behavioral Health Care Manager clinical labor type was created. The Behavioral Health Care Manager labor type was initially established in the CY 2017 PFS final rule (81 FR 80350). It seems more likely that we misidentified the proper BLS category for this clinical labor type than that wages have decreased since 2017. We believe that the clinical labor rate for the Behavioral Health Care Manager should be held constant for CY 2022 pending additional public feedback.

We solicited comments on the updated clinical labor pricing. We were particularly interested in additional wage data for the clinical labor types for which we lacked direct BLS wage data and made use of proxy labor categories for pricing. We understand that the clinical labor undertaken by, for example, a Histotechnologist (L037B) is not the same as the clinical labor provided by the Health Information Technologist category of BLS wage data that we employed as a proxy for pricing. Although these occupations are not directly analogous to each other in terms of the work they do, we nonetheless believe that the proposed crosswalks are appropriate in terms of the resulting hourly wage data. We indicated that we would appreciate any additional information that commenters could supply both in terms of direct wage data, as well as identifying the most accurate types of BLS categories that could be used as proxies to update pricing for clinical labor types that lack direct BLS wage data. We isolated the anticipated effects of the clinical labor pricing update on specialty payment impacts by comparing the proposed CY 2022 PFS rates with and without the clinical labor pricing updates in place as shown in Table 9.

BILLING CODE 4120–01–P

TABLE 9: Anticipated Clinical Labor Pricing Effect on Specialty Impacts

Specialty	Allowed Charges (mil)	New CL Pricing Change
Portable X-Ray Supplier	$95	10%
Family Practice	$6,020	2%
Endocrinology	$508	2%
General Practice	$412	1%
Hand Surgery	$246	1%
Nurse Practitioner	$5,100	1%
Pediatrics	$67	1%
Geriatrics	$192	1%

Specialty	Allowed Charges (mil)	New CL Pricing Change
Radiation Oncology and Radiation Therapy Centers	$1,809	-4%
Interventional Radiology	$499	-5%
Diagnostic Testing Facility	$748	-6%

BILLING CODE 4120–01–C

The potential effects of the clinical labor pricing update on specialty payment impacts were largely driven by the share that labor costs represent of the direct PE inputs for each specialty. Specialties with a substantially lower or higher than average share of direct costs attributable to labor would experience significant declines or increases, respectively, if this proposal is finalized. For example, the Family Practice specialty had a higher share of direct costs associated with clinical labor, and payments to services comprising the specialty would be expected to increase as a result of this clinical labor pricing update. In contrast, Diagnostic Testing Facilities had a lower share of direct costs that are associated with clinical labor, and payments to services comprising the specialty would be expected to decrease. Other specialty-level payment impacts for the proposed clinical labor pricing changes were driven by changes in wage rates for a clinical labor category that affects a given specialty more than average. One such example would be the proposed increase of 11 percent for Oncology nurses as opposed to the average increase for nurses of 63 percent. We emphasized that these are not the projected impacts by specialty of all the policies we proposed in the proposed rule for CY 2022, only the anticipated effect of the isolated clinical labor pricing update, should this clinical labor pricing update be finalized as proposed.

When updates to our payment methodology based on new data produce significant shifts in payment, we often consider whether it would be appropriate to implement the updates through a phased transition across several calendar years. For example, we utilized a 4-year transition for the market-based supply and equipment pricing update concluding in CY 2022. We are considering the use of a similar 4-year transition to implement the clinical labor pricing update. A multi-year transition could smooth out the increases and decreases in payment caused by the pricing update for affected stakeholders, promoting payment stability. However, a phased transition would delay the full implementation of updated pricing and continue to rely in part on outdated data for clinical labor pricing. We discuss a potential 4-year transition for the clinical labor pricing update as an alternative considered in the Regulatory Impact Analysis (section VI.I of this final rule).

We received public comments on our proposal to update the clinical labor pricing. The following is a summary of the comments we received and our responses.

Comment: Many commenters supported the proposal to update the clinical labor pricing. Commenters overwhelmingly agreed that the BLS was the most accurate source of wage data and the best source to use for updating the clinical labor pricing. Commenters stated that CMS needs recurring and accurate sources of data to keep PE RVUs up to date and that such data sources should capture the prices of equipment and supplies, wage rates for clinical staff, the types and quantities of direct PE inputs, and specialties' practice costs. Commenters stated that inaccurate prices for PE inputs could lead to distortions in the PE RVUs; for example, updating prices for equipment and supplies but not clinical labor could lead to undervaluing of services that use a high share of clinical labor. Several commenters stated that, after almost 20 years, an update to clinical labor pricing was long overdue. Several commenters urged CMS to update the prices for clinical labor immediately because inaccurate payment rates distort the market for clinician services and further prolonging the necessary improvement in CMS' PE RVU methodology will result in additional, unnecessary delays for an already overdue pricing update. These commenters recognized that this update may negatively impact certain specialties and procedures, but stated that the lack of pricing updates has likely disadvantaged services that rely heavily on clinical labor, such as family medicine, for several years.

Response: We appreciate the support for our proposed policies from the commenters.

Comment: Many commenters supported the proposal to update the clinical labor pricing, but stated that the update should be phased in using a 4-year transition. Commenters stated that the use of a 4-year transition would be consistent with previous PE updates such as the market-based supply and equipment pricing update and the implementation of the bottom-up PE methodology. Commenters stated that the phased in approach would help minimize the reimbursement reductions to specific services which rely heavily on supply and equipment costs that otherwise could prove detrimental to Medicare beneficiary access to services. Commenters stated that these PE decreases coupled with the 3.75 percent reduction in the conversion factor resulting from the expiration of the temporary increase provided under the CY 2021 Consolidated Appropriations Act are difficult for practices to absorb as the country struggles to contain the COVID–19 pandemic, and that mitigating the effects of the clinical labor pricing update through the use of a 4-year transition would help maintain payment stability.

Response: We appreciate the support for the proposed clinical labor update from the commenters, with the additional request that we implement it using a 4-year transition. After consideration of the comments, we agree that the use of a multi-year transition will help smooth out the changes in payment resulting from the clinical labor pricing update, avoiding potentially disruptive changes in payment for affected stakeholders, and promoting payment stability from year-to-year. We believe it would be appropriate to use a 4-year transition, as we have for several other broad-based updates or methodological changes. While we recognize that using a 4-year transition to implement the update means that we will continue to rely in part on outdated data for clinical labor pricing until the change is fully completed in CY 2025, we agree with the commenters that these significant updates to PE valuation should be implemented in the same way, and for the same reasons, as for other major updates to pricing such as the recent supply and equipment update. We believe that the use of a 4-year transition in implementing the clinical labor pricing update will help to maintain payment stability, particularly given the ongoing public health emergency (PHE) for COVID–19.

We are finalizing the implementation of the clinical labor pricing update over 4 years to transition from current prices

to the final updated prices in CY 2025. We considered, as an alternative to our proposal, implementing this pricing transition over 4 years, such that one quarter of the difference between the current price and the fully phased-in price is implemented for CY 2022, one third of the difference between the CY 2022 price and the final price is implemented for CY 2023, and one half of the difference between the CY 2023 price and the final price is implemented for CY 2024, with the new direct PE prices fully implemented for CY 2025. An example of the transition from the current to the fully-implemented new pricing that we are finalizing is provided in Table 10.

TABLE 10: Example of Clinical Labor Pricing Transition

Current Price	$1.00	
Final Price	$2.00	
Year 1 (CY 2022) Price	$1.25	1/4 difference between $1.00 and $2.00
Year 2 (CY 2023) Price	$1.50	1/3 difference between $1.25 and $2.00
Year 3 (CY 2024) Price	$1.75	1/2 difference between $1.50 and $2.00
Final (CY 2025) Price	$2.00	

Comment: A few commenters requested the use of a 2-year transition as a timetable that they stated would be more equitable to all impacted providers. These commenters stated that if a 2-year timetable was not feasible, they would support a 4-year transition over a 1-year transition.

Response: While we appreciate the support from the commenters for the proposed clinical labor pricing update and the suggestion from some that we use a 2-year transition, we believe that a 4-year transition, which is consistent with the way we have implemented prior significant updates to resource input pricing and the PE methodology, would meet the need to update clinical labor pricing while providing the health care provider community time to adjust to the resulting shifts in payments, especially during the ongoing PHE.

Comment: Many commenters disagreed with the proposal to update clinical labor pricing and urged that the policy should not be finalized, with or without a 4-year transition. These commenters objected to proposed reductions in payment for many types of services, such as but not limited to services in the fields of radiation oncology, peripheral arterial disease, PT/INR home monitoring, flow cytometry, cardiovascular disease, and many others. Commenters stated that the clinical labor pricing update will limit access to care for Medicare patients and will force many Medicare beneficiaries into the facility-based system at a significantly higher cost to the Medicare program and its patients. Commenters stated that this shift in care to the facility-based hospital settings will cause great burdens on an already overwhelmed hospital system, exacerbate market consolidation, and will adversely affect physicians' ability to provide the right care to the right patient at the right time. Commenters stated that patients may have to travel farther and wait longer for care, as well as pay more out-of-pocket since every single case shifted to the facility setting means higher cost-sharing for the affected beneficiary. Commenters emphasized the benefits of office-based care for a variety of services and argued that clinical labor pricing should not be updated as we proposed to help maintain access to office-based care. Several commenters stated that the proposed decrease in payment for certain services will disproportionately affect women's health and racial minorities, with a negative impact on some of the most vulnerable of Medicare's beneficiaries.

Response: We share the concerns expressed by the commenters about the need to ensure continued access to quality and affordable care for all beneficiaries, in both the office and hospital settings. Under section 1848 of the Act, we are required to base payment for services under the PFS on relative resource costs. To accomplish that, it is necessary periodically to update the information on which we base relative values. We believe, and commenters overwhelmingly agreed, that the BLS wage data is the best source to use for clinical labor pricing, and commenters did not identify alternative sources of data that could be used to update pricing. Although we recognize that payment for some services will be reduced as a result of the pricing update due to the BN requirements of the PFS, we do not believe that this is a reason to refrain from updating clinical labor pricing to reflect changes in resource costs over time as suggested by some commenters. There are also other services, such as those primarily furnished by family practice and internal medicine specialties, that will be positively affected by the pricing update, which we anticipate will increase access to care for disadvantaged groups such as women and racial minorities. We also note that for many services that involve proportionally more clinical labor, payment rates were reduced as a result of the prior market-based supply and equipment pricing update, and payment rates will increase with the clinical labor pricing update, due to the same PFS BN requirements. We believe that the ongoing trend of market consolidation and site of service differentials highlight the need to update the overall PE data comprehensively, including a full accounting of indirect/overhead costs, to account for current trends in the delivery of health care, especially with regard to independent versus facility-based practices. We believe that CMS efforts to improve pricing accuracy would improve the sustainability of the Medicare PFS and the broader health system, improve access to care, and reduce inequitable disparities. We believe that the use of a 4-year transition in implementing the clinical labor pricing update will help to maintain payment stability and mitigate potential negative effects on healthcare providers by gradually phasing in the changes over a period of time. We believe that this transition period is also important given that the PHE for COVID–19 is ongoing and industry recovery is likely to take time.

Comment: Many commenters discussed the direct scaling factor used in the calculation of PE RVUs. Commenters stated that updating the clinical labor rates is estimated to increase direct PE costs by 30 percent which would equate to approximately $3.5 billion in total additional direct costs. Commenters noted that the direct scaling factor was proposed to decrease by 24 percent as a result, from 0.5916 in 2021 to 0.4468 in 2022, with the net

effect that Medicare will now reimburse 44 cents on the dollar instead of 59 cents on the dollar for direct costs. Commenters stated that many services require the use of expensive supplies with considerable capital costs that need to be stocked and readily available. Commenters stated that they did not believe the cost of this labor rate update should be borne disproportionately by equipment and supply-heavy services, which are the services least able to accommodate sharp and sudden payment reductions since equipment costs are fixed. Many commenters stated that the proposed policy would place a huge and unfair burden on specialties that require expensive supplies and equipment; commenters stated that the high costs of maintaining this equipment remain the same whether or not the equipment is used. Commenters stated that the proposed policy would result in wildly fluctuating shifts in reimbursement, violating a core principle of the resource-based relative value system which is to stabilize RVUs and reduce fluctuations in year-to-year payments. Commenters stated that if payments change drastically, there is no way to accommodate those shifts through operating expenses without cuts elsewhere, including to staff and services offered. Commenters stated that CMS should explore options to adjust the scaling factor(s) in order to more appropriately reimburse for expenses incurred to treat their beneficiaries.

Response: We appreciate the estimate provided by commenters of the additional spending on direct costs as a result of the proposed clinical labor pricing update. However, we disagree with the commenters that updating the clinical labor pricing to make use of current wage data constitutes an unfair burden or has an inappropriate disproportionate impact on certain services. The PFS is a resource-based relative value payment system that necessarily relies on accuracy in the pricing of resource inputs. Continuing to use clinical labor cost data that are nearly 2 decades old would create distortions in relativity that undervalue many services which involve a higher proportion of clinical labor. As noted previously, payment for services that involve a higher proportion of clinical labor resources was negatively affected by the prior market-based supply and equipment pricing update as a result of the same BN requirements and will now be positively affected by the clinical labor pricing update. We do not agree that updates to pricing for the three categories of direct PE (clinical labor, supplies and equipment), create an unfair burden for individual services. We do agree with commenters that the impact of the proposed clinical labor pricing update is substantial, which is why we believe it is appropriate to use a 4-year transition to implement the pricing update. We believe the use of this transition will help address the concerns of the commenters about stabilizing RVUs and reducing large fluctuations in year-to-year payments.

Comment: Several commenters requested that CMS maintain the CY 2021 direct scaling factor of 0.5916 if the agency chooses to finalize the clinical labor pricing update.

Response: Under our current PE methodology, we calculate a direct PE scaling adjustment to ensure that the aggregate pool of direct PE costs does not vary from the aggregate pool of direct PE costs for the current year. (This calculation is described in more detail in the ''PE RVU Methodology'' section earlier in this rule.) In other words, the direct scaling adjustment ensures that the share of direct PE remains constant from year to year. If we continued to maintain the direct scaling factor from a previous calendar year, without making any adjustment to account for the total direct costs increasing as a result of the clinical labor pricing update, the amount of PFS spending allocated to direct PE would increase at the expense of all other spending. This would negatively affect the valuation of many services that have few or no direct PE inputs. It would also result in a substantial negative adjustment to the conversion factor under the statute's BN requirements as the total number of PE RVUs would increase and would need to be offset through the conversion factor. We do not agree that it would be appropriate to maintain the direct scaling factor from a previous calendar year; we did not propose to update our PE methodology and we are not finalizing any changes in the methodology.

Comment: Several commenters suggested that CMS spread the cost of the clinical labor update across both the direct and indirect PE pools. Commenters stated that this suggestion would allocate approximately 27 percent of the additional costs to the direct cost pool and 73 percent to the indirect cost pool. Commenters stated that this change would result in minimal changes in allowed charges for specialties such as general practice and family medicine, as compared with the changes that would result from the proposed approach.

Response: We disagree with the commenters that it would be appropriate to spread the increased spending from the clinical labor pricing update across both the direct and indirect PE pools, as opposed to solely the direct pool as proposed. This suggested change to the PE methodology would have an effect similar to continuing to maintain the direct scaling factor from previous calendar years, that is, the amount of PFS spending allocated to direct PE would increase at the expense of all other spending. In particular, services that have a higher proportion of indirect PE would be negatively affected as increases in the direct PE pool would be subsidized by the indirect PE pool. We do not believe that this would appropriately carry out the statute's directive to value services based on relative resource costs. We did not propose to update our PE methodology and we are not finalizing any changes in the methodology.

Comment: Several commenters suggested that CMS consider scaling the clinical labor and equipment/supply components of the direct PE pool separately. Commenters stated that based on the CY 2014 PFS final rule, it appeared that the clinical labor component of the pool should be weighted at 4.636 percent of PFS expenditures, and should not exceed about 66 percent of the direct cost pool.

Response: We disagree with the commenter that the three components of direct PE (clinical labor, supplies, and equipment) should be should be scaled separately instead of together. This would have the effect of freezing the portion of direct PE allocated to each of the three components; if we were to make this change to the PE methodology, updating the clinical labor pricing would not allocate any additional valuation to clinical labor at all. It would merely shift the relationship between the individual clinical labor types as they were re-priced. The clinical labor component of direct PE has not been updated since 2002, while supply and equipment pricing has been updated more recently. The commenters' suggested change to the PE methodology would lock in place the relativity between direct PE components at a particular time. We believe that this would be inconsistent with the statute's directive to value services based on relative resource costs. As noted above, we did not propose to modify our PE methodology, and we are not finalizing any changes in the methodology.

Comment: Several commenters stated that they had performed an analysis suggesting that the proportion of PFS expenditures allocated to direct PE may have shrunk from the proportion

adopted in 2014. Commenters requested that CMS examine whether, and to what extent, the total PE pool has been reduced over time, and, if so, requested that it be restored.

Response: As explained above, the direct scaling adjustment ensures that the share of direct PE (and therefore, also indirect PE) remains constant from year to year. We can confirm for the commenters that our application of BN adjustments, which is required by statute, has maintained the total PE pool over time.

Comment: Several commenters referred to the decrease in the direct scaling factor and stated that this would cause huge second order effects that are not being considered by CMS. Commenters stated that the result would be a PFS that is ever more out of touch with reality as conversion factors, direct adjustment factors, and other factors make the PFS less and less reflective of what it actually takes to provide services in the office.

Response: We disagree with the commenters that our proposed clinical labor update makes the PFS less reflective of the real-world cost of providing services. We believe that updating clinical labor rates to reflect current pricing has the opposite effect, appropriately improving recognition of current clinical labor costs in the PFS methodology.

Comment: Several commenters stated that the PPIS data which underlie the share of PE allocated to direct PE and indirect PE are outdated, and that it was unreasonable to cap updated direct costs based on direct/indirect cost splits from 2006. Commenters stated that if the updated clinical labor pricing had been in effect in 2006, then direct costs undoubtedly would have constituted a larger proportion of the overall PE pool.

Response: We have no doubt that if the clinical labor pricing in 2006 had been based on BLS wage data from 2019, direct costs would have constituted a larger proportion of the overall PE pool. However, it is inappropriate to make use of wage data from 2019 and compare it to the direct/indirect cost splits from 2006 without also acknowledging that indirect costs such as administrative expenses and office rent have also greatly increased over the intervening span of time. While we share the concerns of the commenters that the PPIS data used in the PE methodology date back more than a decade, we have no evidence at present to indicate that direct costs have increased faster than indirect costs since 2006, or vice versa. As we noted in the CY 2021 PFS final rule (85 FR 84498 through 84499) and again in this rule, the RAND corporation is currently studying potential improvements to our PE allocation methodology and the data that underlie it. We are interested in exploring ways that the PPIS data can be updated; however, we do not believe that this constitutes a reason to refrain from updating the clinical labor pricing.

Comment: Several commenters referenced the BN requirements for the PFS that are included in the statute. Commenters stated that no adjustments to the $20 million threshold for BN have been made to account for new technology in over 30 years. Commenters stated that CMS should publish how the annual $20 million restriction on changes to expenditures could have played a role in the clinical labor updates.

Response: Section 1848(c)(2)(B)(ii)(II) of the Act requires that increases or decreases in RVUs may not cause the amount of expenditures for the year to differ by more than $20 million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we make adjustments to preserve BN. As this is a statutory requirement of the PFS, we are required by law to apply BN adjustments to offset the spending impact of any changes exceeding $20 million; given the roughly $100 billion in spending associated with the PFS, this threshold is exceeded each calendar year by a wide margin. A BN adjustment would be avoided only if updating the clinical labor pricing failed to reach this $20 million threshold. We found that the estimated effect of the proposed clinical labor pricing update was approximately $3.5 billion, with our analysis matching the figure supplied by commenters, which far exceeds the $20 million threshold. Therefore, we were required by statute to make BN adjustments to reflect the expected effects of the clinical labor pricing update. We also note that as the BN requirement is statutory in nature, we do not have discretion to adjust it for new technology or other changes that may have taken place.

Comment: Several commenters urged CMS to use its discretion to waive BN in implementing the proposed update to clinical labor pricing. Other commenters urged CMS to hold harmless the specialties that are bearing the brunt of this proposal and consider alternative ways to update clinical labor pricing. Several commenters stated that updated clinical labor pricing should not be done within the confines of a budget neutral system, unless there were concomitant inflationary updates to the entire fee schedule.

Response: As mentioned above, BN adjustments are a statutory requirement of the PFS. We do not have discretion within the terms of the statute to waive BN or hold individual specialties harmless in implementing the clinical labor pricing update.

Comment: One commenter stated that while CMS has broad discretion to determine and adjust RVUs for physician services, CMS cannot make arbitrary changes to RVUs. The commenter stated that CMS must give a reasoned explanation for adjustments it makes for certain codes, and those explanations must relate to the relative resource use for a particular service. The commenter stated that the requirement to maintain BN does not authorize the agency to ignore the general rule that RVUs, and their individual components, must be based on relative resource use. The commenter stated that unless CMS can articulate how the relative cost of the other PE inputs—like supplies and medical equipment—has gone down, the agency is not authorized to decrease the value of those inputs. The commenter stated that CMS is only authorized to apply a BN adjustment across all RVUs and the BN provisions do not authorize CMS to manipulate the inputs to the two RVU components.

Response: We disagree with the commenter that we have proposed arbitrary changes to the valuation of individual services; we detailed the methodology behind our proposed clinical labor pricing update and provided an opportunity for commenters to submit feedback through notice and comment rulemaking. We believe that updating the clinical labor pricing makes the relative resource use basis dictated by the statute more accurate, not less accurate, for the valuation of services. While the relative resource cost of the other non-clinical labor direct PE inputs, such as supplies and equipment, would in fact decrease for CY 2022 based on our proposed update to clinical labor pricing, they have only decreased in relative terms because the PFS is based on the use of RVUs as part of a budget neutral methodology. We note again that the use of a 4-year transition in implementing the clinical labor pricing update should help to mitigate potential negative effects of these shifts in relative resource costs by spreading them out over a longer period of time.

Comment: Several commenters stated that the specialty impacts tables isolating the effects of the clinical labor pricing update in the CY 2022 PFS proposed rule were misleading. Commenters stated that in reality the negative impact for many services was

much greater than displayed on these tables. Commenters stated that it would be more transparent to share impacts for individual services when they had a potentially large negative effect on providers of office-based procedures with high supply and equipment costs.

Response: Although we share the concerns of commenters regarding the importance of providing transparency in the published data, we disagree that the specialty impacts tables included in the CY 2022 PFS proposed rule were misleading, or that commenters lacked sufficient information about the pricing of individual services. We noted in the CY 2022 PFS proposed rule (86 FR 39532) that the impact tables are for illustrative purposes for aggregate impacts on specialties, and are not meant to be code specific; therefore, they are averages, and may not necessarily be representative of what is happening to the particular services furnished by a single practitioner within any given specialty. This has been a feature of the specialty impact tables published in the PFS for many years, and we believe it is generally well understood by stakeholders. We also note that the proposed RVUs for every HCPCS code were published in Addendum B as part of the CY 2022 PFS proposed rule to allow stakeholders the opportunity to provide comment on the proposed valuations for each code. Due to the thousands of HCPCS codes affected by the clinical labor pricing update, we did not publish a service-level analysis of the pricing update in the preamble, but did include this information in Addendum B for consideration by stakeholders. We will consider suggestions to improve the information available to stakeholders for future rulemaking.

Comment: Many commenters noted that 14 of the 32 clinical labor staff types had proposed valuations using a BLS crosswalk because an exact match was not available. Commenters stated that to maintain transparency CMS should publish the ''other sources'' wage data details for these clinical labor types. Commenters stated that CMS should update specific clinical labor wage rates based on stakeholder comments and data.

Response: We agree with the commenters that stakeholder comments and data will be valuable in updating the clinical labor pricing, and we share the concerns of the commenters regarding transparency in the data used for pricing. As we stated in the proposed rule, we used the national salary data from the Salary Expert as a reference for pricing, then crosswalked these clinical labor types to a proxy BLS labor category rate that most closely matched the reference wage data. For example, there is no direct BLS wage data for the Mammography Technologist (L043) clinical labor type; we used the wage data from Salary Expert for Mammography Technologists as a reference and identified the BLS wage data for Respiratory Therapists as the best proxy category. In the interest of transparency, Table 11 lists the Salary Expert wage data used for the clinical labor types which did not have direct BLS matches.

TABLE 11: Clinical Labor Types with Other Sources Wage Data

Labor Code	Description	Salary Expert Per-Hour Wage Data
L037B	Histotechnologist	28.06
L037C	Orthoptist	37.41
L037E	Child Life Specialist	25.10
L038B	Cardiovascular Technician	29.69
L038C	Medical Photographer	18.45
L039A	Certified Retinal Angiographer	26.28
L039C	Psychometrist	29.29
L041A	Angio Technician	26.81
L043A	Mammography Technologist	31.07
L045A	Cytotechnologist	36.19
L045B	Electron Microscopy Technologist	44.90
L046A	CT Technologist	33.09
L047B	REEGT (Electroencephalographic Tech)	30.82
L054A	Vascular Technologist	46.36
L056A	RN/OCN	38.81
L063A	Medical Dosimetrist	48.31

Comment: Many commenters stated that CMS proposed to utilize the mean wage data to establish updated clinical labor rates, while the majority of the data inputs for the PFS are based on the median value. Commenters used as an example how RUC recommendations for work RVUs, work times, and direct PE inputs were based on the median or typical case. Commenters requested that CMS use the median wage data, instead of mean wage data, to more accurately capture typical wage rates and to be consistent with the median statistic used for clinical staff time.

Response: We appreciate the feedback from the commenters regarding the use of mean versus median wage data in updating the clinical labor pricing. Based on the feedback from the commenters, we agree that the use of median BLS wage data would be more appropriate than average or mean wage data. We agree that the median value is less susceptible to outlier values, and therefore, better captures the ''typical'' case. We will use the median wage data when finalizing the pricing for the clinical labor update.

Comment: Many commenters disagreed with the proposal to use the same fringe benefits multiplier of 1.366 that was utilized during the previous clinical labor pricing in CY 2002. Commenters stated that using the fringe benefits multiplier rate from 20 years ago was not consistent with CMS' premise for updating the clinical labor pricing which was to maintain relativity

with the recent supply and equipment pricing updates. Commenters stated that the BLS publishes benefits data routinely and that CMS should use a current fringe benefits multiplier; many commenters suggested using a multiplier of 1.296 from the most recent available BLS data.

Response: We agree with the commenters that it would be appropriate to use a more current fringe benefits multiplier as opposed to our proposal to use the same multiplier from 2002. According to a BLS release from June 17, 2021 (USDL–21–1094), the current fringe benefits multiplier for employees in private industry is 1.296, as noted and requested by the commenters. We believe that this will be more appropriate than the proposed fringe benefits multiplier of 1.366 from 2002.

Comment: Many commenters requested that CMS should delay the implementation of the clinical labor pricing update for one year, or finalize a 5-year transition with no update in the first year which was functionally the same request. Commenters stated that the current clinical labor proposal requires additional analysis and modifications prior to implementation and there was further work to be done by both CMS and stakeholders to ensure accurate data are used and appropriate methodological steps are taken for implementation. Some commenters stated that CMS should wait until after the market-based supply and equipment pricing update was concluded before beginning the process of updating clinical labor pricing. Many commenters mentioned the negative impacts of the ongoing COVID–19 PHE and the finalization of updated values for E/M visits in last year's CY 2021 PFS final rule as reasons to delay the clinical labor pricing update for a year.

Response: We disagree that the clinical labor pricing update should be delayed for another year before beginning the 4-year implementation timeline. We do not agree that delaying the pricing update will provide meaningful improvements in our data; commenters overwhelmingly agreed that BLS data was the best choice and did not suggest alternative sources of wage data which would have required additional research. In places where we made use of crosswalks to value individual clinical labor types, commenters provided helpful feedback (see discussion below) and will continue to have the opportunity to provide further engagement over the course of the 4-year implementation timeline. It is not clear to us what further work the commenters believe must be done to ensure appropriate clinical labor pricing given the near-universal support for the use of BLS wage data for the update. While we share the concerns of commenters regarding the effects of the ongoing COVID–19 pandemic, we believe that the use of a 4-year transition in implementing the clinical labor pricing update will help to maintain payment stability and mitigate potential negative effects on healthcare providers. Given that the statute requires PFS payment to be based on relative resource costs, and that the proposed update to clinical labor wages using the latest available BLS data was overwhelmingly supported by commenters, we do not believe that we should delay the transition from outdated pricing from 2002. All of the same issues concerning redistribution of payments through BN will still remain in place whether the clinical labor pricing update begins in CY 2022 or CY 2023.

Comment: One commenter stated that CMS should delay any repricing of clinical labor until it can also collect the latest prices paid for medical equipment and supplies. The commenter stated that this would ensure all updated prices for direct cost inputs used in setting PE payment are factored into Medicare physician rates concurrently.

Response: CY 2022 is the final year of the market-based supply and equipment pricing transition; we proposed to begin implementing the update to clinical labor pricing in this calendar year so that it could take place in conjunction with a portion of the supply and equipment pricing update. We agree with the commenter that it is important to update the clinical labor pricing to maintain relativity with the recent supply and equipment pricing updates.

Comment: Several commenters stated that CMS is currently considering more significant future changes to the PE methodology as explained at a June 16, 2021 Town Hall meeting (further details available on the CMS website at *https://www.cms.gov/medicare/physician-fee-schedule/practice-expense-data-methods*). Commenters stated that given the potential for significant future updates to the data or PE methodology that could also have major impacts, CMS should postpone the update to clinical labor pricing until those changes can be analyzed in combination with other major changes to the PE methodology.

Response: As we noted in the CY 2021 PFS final rule (85 FR 84498 through 84499) and again in this rule, the RAND corporation is currently studying potential improvements to CMS' PE allocation methodology and the data that underlie it. We are interested in exploring ways that the PE methodology can be updated; however, we do not believe that this constitutes a reason to refrain from updating the clinical labor pricing or delay the implementation of the pricing update. We will employ a 4-year transition period for the clinical labor pricing update in order to provide payment stability and soften the effects of the pricing update in each calendar year.

Comment: Several commenters stated that the BLS is planning an update to the estimation methodology for the Occupational Employment and Wage Statistics (OEWS) survey next year that may impact their wage data. Commenters stated that although they could not predict the impact of these modifications, it is possible the revised BLS methodology will result in important changes to the hourly wage estimates that CMS proposed to use to update clinical labor pricing. Several commenters requested delaying the implementation of the clinical labor pricing update for one year to make use of updated BLS wage data.

Response: We appreciate the feedback from the commenters regarding ongoing improvements to the BLS methodology for the OEWS. However, we do not agree that this is a sufficient justification for continuing to maintain current clinical labor prices for another year. The BLS routinely updates its wage data and searches for ways to improve the survey methodology. We also note that the commenters who brought this issue to our attention stated that they could not predict the impact of these BLS methodological changes which we believe argues against delaying the pricing update for another year. We believe that the 2019 wage data from the BLS will certainly be an improvement over the current 2002 data, and we will continue to review and evaluate future BLS wage data to consider whether it would be appropriate to propose to incorporate them into the clinical labor pricing update during the course of the 4-year transition period or otherwise through future rulemaking.

Comment: One commenter stated that CMS appeared to have used only the BLS OEWS survey; however, when CMS last updated these data in 2002, CMS also leveraged the BLS National Compensation Survey (NCS). The commenter stated that while the OEWS survey can produce estimates at metropolitan statistical areas (MSAs), the NCS can produce estimates at the national and census region level. The commenter stated that OEWS wage estimates represent only wages and salaries and do not include nonwage

benefits, such as health insurance, retirement contributions, and bonuses; whereas NCS data also includes nonwage benefits. The commenter stated that CMS used the national median wage across all employer types rather than the wage for physician office employers, and the commenter believed that CMS should use the physician office setting of care where possible rather than a median (or average) across all employer types.

Response: We appreciate the feedback from the commenters regarding additional aspects of the wage data provided by the BLS. We are aware that OEWS wage estimates represent only wages and salaries and do not include nonwage benefits, which is why we included a fringe benefits multiplier in our clinical labor pricing update as discussed above. We disagree with the commenter that using the physician office setting of care rather than a median across all employer types would be more accurate for clinical labor pricing; clinical labor is employed in many different sites of service, not solely in the physician office setting. We encourage commenters to submit additional information regarding clinical labor pricing, especially wage data for individual clinical labor types, during future rulemaking, especially over the course of the 4-year transition period for the update to clinical labor pricing.

Comment: Many commenters requested that CMS update pricing data on a more frequent basis for all inputs so that adjustments will not be as dramatic. Commenters stated that more frequent updates would prevent significant redistributive effects to specialties in the future and help ensure stability in payments. Commenters stated that CMS should make year-to-year payment stability a goal of the PFS, and large redistributive impacts on payment should occur infrequently.

Response: We agree with the commenters that the pricing data that underlie the PE methodology should be updated frequently to ensure its accuracy. For this reason, we believe that it is important to begin the transition process of updating the clinical labor pricing for CY 2022. We agree that more frequent updates to all direct PE inputs, clinical labor and supplies and equipment, would help to maintain payment stability across the PFS.

Comment: Several commenters recommended that CMS address the problems related to high-cost supplies by establishing Healthcare Common Procedure Coding System (HCPCS) Level II codes for supplies that exceed $500. Commenters stated that the establishment of individual coding for high cost supplies would help maintain patient access to care in the office setting by offsetting the projected decreases in payment from the clinical labor pricing update.

Response: We did not make any proposals to establish HCPCS Level II codes for high cost supplies. We have received in previous rulemaking cycles a number of prior requests from stakeholders, including the RUC, to implement separately billable alpha-numeric Level II HCPCS codes to allow practitioners to be paid for high cost disposable supplies per patient encounter instead of in connection with payment for the CPT code with which the supplies are furnished. We stated at the time, and we continue to believe, that this option presents a series of potential problems that we have addressed previously in the context of the broader challenges regarding our ability to price high cost disposable supply items. (For a discussion of this issue, we direct the reader to our discussion in the CY 2011 PFS final rule with comment period (75 FR 73251)).

Comment: One commenter stated that, as participating practitioners in the Medicare program, audiologists should not be included in the proposed clinical labor pricing update. The commenter stated that they are performing professional services for which they are billing Medicare independently, and should not be assigned any additional clinical labor time for their efforts. The commenter stated that this oversight has created significant rank order anomalies within the audiology code family as included in the proposed rule. The commenter identified several CPT codes which they stated contained significant rank order anomalies and requested again that audiologists be removed from the labor update pool.

Response: We would like to clarify for the commenter that we are proposing to update the rates for individual clinical labor types, not updating the pricing for individual specialties. The statute requires that valuation under the PFS is to be based on relative resource costs; as such, we do not believe that an individual clinical labor type could be priced at one rate when billed by some specialties and at a different rate when billed by other specialties. If the commenter believes that certain CPT codes have rank order anomalies in their valuation, we encourage them to nominate those codes as potentially misvalued for our additional review; see section II.C of this final rule (Potentially Misvalued Services under the PFS) for additional information.

After consideration of the comments detailed above, we are finalizing our proposal to implement the clinical labor pricing update through the use of a 4-year transition, with modifications. Rather than using the proposed BLS fringe benefits multiplier and the BLS mean wage data, in response to public comments, we will apply the BLS private industry fringe benefits multiplier for 2019 and use the BLS median wage data.

We also received a number of comments regarding the pricing of individual clinical labor types which are summarized along with our responses below. We note that, given our final policy to use the BLS median wage data instead of mean as we had proposed, we refer in our responses below to the median wage data.

Comment: Several commenters stated that they supported the proposal to use BLS category 19–1040 (Medical Scientist) for the Vascular Technologist (L054A) clinical labor type. Commenters stated that both vascular technologists and medical dosimetrists play critical roles in independently providing clinically accurate, reproducible and high-quality data for physician decision making. Commenters stated that although they did not have additional wage data to offer, they believed that the proposed crosswalk for the L054A clinical labor type is appropriate in terms of the resulting hourly wage rate and level of technical skill, physical and mental effort, judgment and stress relative to other professions utilizing ultrasound.

Response: We appreciate the support from the commenters for our proposed pricing of the Vascular Technologist (L054A) clinical labor type.

Comment: One commenter stated that they supported the proposed pricing of the Mammography Technologist (L043A), CT Technologist (L046A), and Vascular Technologist (L054A) clinical labor types based on their individual BLS categories.

Response: We appreciate the support from the commenter for our proposed clinical labor pricing.

Comment: Several commenters noted that the Angio Technician (L035A) clinical labor type does not have a direct BLS labor category and CMS proposed using BLS category 29–9000 (Other Healthcare Practitioners and Technical Occupations) at $27.20 as the proxy BLS wage rate. Commenters stated that they believed the Angio Technician was best represented by an advanced level VI certified Radiologic Technologist or an MR technologist. Commenters stated that according to the BLS, the median annual wage for magnetic resonance

imaging technologists was $74,690 in May 2020, and the median annual wage for radiologic technologists and technicians was $61,900 in May 2020. Commenters recommended using BLS category 29–2035 Magnetic Resonance Imaging (MRI) Technologist as the proxy BLS wage rate for the Angio Technician clinical labor type.

Response: We appreciate the additional information provided by the commenters concerning the pricing of the Angio Technician (L035A) clinical labor type. However, we disagree that a Magnetic Resonance Imaging (MRI) Technologist described under BLS category 29–2035 would be the most appropriate choice to use in pricing the L035A clinical labor type. The median hourly wage for a Magnetic Resonance Imaging (MRI) Technologist under this BLS category is $35.30 while the hourly wage data for an Angio Technician that we have from Salary Expert is only $26.81. As such, we disagree that MRI Technologist would be an appropriate crosswalk for valuation. However, in response to the additional certification information provided by the commenters for this occupation, we are modifying our proposed crosswalk. We will instead crosswalk the Angio Technician to the Lab Tech/Histotechnologist (L035A) clinical labor type with a median hourly rate of $26.63 (or an annual rate of $55,390). We believe that this crosswalk better matches the wage data that we have available from Salary Expert for Angio Technicians.

Comment: Several commenters stated that CMS updated the RN/OCN (L056A) clinical labor type in CY 2004, which had been previously updated in 2002, with survey data provided by the American Society of Clinical Oncology (ASCO). Commenters noted that the proposed pricing for the L056A clinical labor type increased by only 11 percent, the third lowest increase among the 50 clinical labor types proposed in the update; and the commenters were concerned that the ASCO wage data were not appropriately captured in the proposed update. Commenters stated that the RN/OCN clinical labor type, which was proposed at a rate only 3.5 percent higher than the regular RN (L051A) clinical labor type, is clearly undervalued and should receive an upward adjustment prior to finalizing the clinical labor pricing update. Commenters urged CMS to delay implementation of the labor price update until they could work with the agency to establish an accurate methodology and labor price inputs for current RN/OCN labor.

Response: We appreciate the additional information provided by the commenter regarding the historical pricing of the RN/OCN (L056A) clinical labor type, and we will be happy to consider any wage data that they can provide. However, we did not receive any additional data from the commenter to be used in pricing the L056A clinical labor type, and in the absence of other information on current wage rates, we believe that our proposed use of BLS category 29–2033 (Nuclear Medicine Technologists) at $37.48 remains the most appropriate accurate pricing for L056A. We welcome the submission of additional pricing data for the RN/OCN clinical labor type in future rulemaking cycles, particularly over the course of the 4-year transition period.

Comment: One commenter provided recommendations on the pricing of several clinical labor types, as indicated in the next 13 comment summaries and responses. The commenter disagreed that BLS category 29–9098 (Health Information Technologists, Medical Registrars, Surgical Assistants, and Healthcare Practitioners and Technical Workers, All Other) at an hourly rate of $28.17 was the correct crosswalk for the Histotechnologist (L037B) clinical labor type. The commenter stated that BLS category 29–2010 (Clinical Laboratory Technologists and Technicians) more accurately describes the clinical staff type associated with Histotechnologists.

Response: We appreciate the additional information provided by this commenter concerning the pricing of the Histotechnologist (L037B) clinical labor type and the others that follow. We reviewed the request from the commenter and we agree that BLS category 29–2010 is a more appropriate crosswalk for the L037B clinical labor type, which has an updated median hourly wage of $25.54. This BLS category is a close match for the wage data that we have from the Salary Expert reference information that we discussed above.

Comment: The same commenter disagreed that BLS category 21–1023 (Mental Health and Substance Abuse Social Workers) at an hourly rate of $24.84 was the correct crosswalk for the Child Life Specialist (L037E) clinical labor type. The commenter stated that a child life specialist was described as a professional armed with a strong background in child development and family systems who promotes effective coping through play, preparation, education, and self-expression activities—not child mental health or substance abuse treatment. The commenter stated that that BLS category 21–1021 (Child, Family, and School Social Workers) more accurately describes the clinical staff type associated with Orthoptists.

Response: We reviewed the request from the commenter and we agree that BLS category 21–1021 is a more appropriate crosswalk for the L037E clinical labor type, which has an updated median hourly wage of $22.78. This BLS category is a close match for the wage data that we have from the Salary Expert reference information that we discussed above.

Comment: The commenter disagreed that BLS category 31–2011 (Occupational Therapy Assistants) at an hourly rate of $29.75 was the correct crosswalk for the Cardiovascular Technician (L038B) clinical labor type. The commenter stated that BLS category 29–2031 (Cardiovascular Technologists and Technicians) was a direct crosswalk for the L038B clinical labor type.

Response: We reviewed the request from the commenter and we agree that BLS category 29–2031 is a more appropriate crosswalk for the L038B clinical labor type, which has an updated median hourly wage of $27.75. This BLS category is a close match for the wage data that we have from the Salary Expert reference information that we discussed above.

Comment: The commenter disagreed that BLS category 29–1126 (Respiratory Therapists) at an hourly rate of $30.75 was the correct crosswalk for the Mammography Technologist (L043A) clinical labor type. The commenter stated that BLS category 29–2034 (Radiologic Technologists and Technicians) more accurately describes the clinical staff type associated with Mammography Technologists.

Response: We reviewed the request from the commenter and we agree that BLS category 29–2034 is a more appropriate crosswalk for the L043A clinical labor type, which has an updated median hourly wage of $29.09. This BLS category is a close match for the wage data that we have from the Salary Expert reference information that we discussed above.

Comment: The commenter disagreed with crosswalking the Certified Surgical Technician (CST) to BLS category 19–4010 (Agricultural and Food Science Technicians) at an hourly rate of $21.37 as part of the blended COMT/COT/RN/CST (L038A) clinical labor type. The commenter stated that BLS category 29–2055 (Surgical Technologist) was a direct crosswalk for the L038A clinical labor type.

Response: We believe that there may have been a misunderstanding on the part of the commenter; we proposed to crosswalk Certified Surgical

Technicians to BLS category 29–2061, not BLS category 19–4010, at a median hourly rate of $22.83. There may have been some confusion regarding the COT and CST clinical labor types in this blend. Nevertheless, we reviewed the request from the commenter and we agree that BLS category 29–2055 is a more appropriate crosswalk for the CST portion of the L038A clinical labor type. This BLS category has a median hourly rate of $23.22 which was very similar to our previous pricing of $22.83. After we ran this updated rate for the CST through the blended methodology for the L038A clinical labor type, the per-minute pricing (including the fringe benefits multiplier) remained unchanged at $0.52.

Comment: The commenter disagreed that BLS category 29–2010 (Clinical Laboratory Technologists and Technicians) at an hourly rate of $26.34 was the correct crosswalk for the Certified Retinal Angiographer (L039A) clinical labor type. The commenter stated that BLS category 29–9000 (Other Healthcare Practitioners and Technical Occupations) or BLS category 29–2057 (Ophthalmic Medical Technician) more accurately described the clinical staff type associated with Certified Retinal Angiographers.

Response: We reviewed the request from the commenter and we agree that BLS category 29–9000 is a more appropriate crosswalk for the L039A clinical labor type, which has an updated median hourly wage of $23.93. The other suggested crosswalk to BLS category 29–2057 had a median hourly wage of $17.76, which did not fit with the data that we had from Salary Expert for Certified Retinal Angiographers; we believe the crosswalk to BLS category 29–9000 is a more appropriate choice.

Comment: The commenter disagreed that BLS category 29–1141 (Registered Nurses) at an hourly rate of $37.24 was the correct crosswalk for the Orthoptist (L037C) clinical labor type. The commenter stated that that BLS category 29–2057 (Ophthalmic Medical Technician) more accurately describes the clinical staff type associated with Orthoptists. The commenter also stated that the L037C clinical labor type is incorrectly assigned to the CPT code 62304. The commenter stated that the correct clinical labor type for CPT code 62304 should be L037D (RN/LPN/MTA), not L037C.

Response: We disagree with the commenter that an Ophthalmic Medical Technician described under BLS category 29–2057 would be the most appropriate choice to use in pricing the L037C clinical labor type. The median hourly wage for an Ophthalmic Medical Technician under this BLS category is $17.76 while the hourly wage data for an Orthoptist that we have from Salary Expert is substantially higher at $37.41. We continue to believe that our crosswalk to BLS category 29–1141 is a more appropriate choice for valuation. While we appreciate the feedback from the commenter, we reviewed CPT code 62304 and we did not find any errors in its clinical labor inputs. We did not propose to change the clinical labor type for CPT code 62304 and we are not finalizing any changes to the clinical labor types of this CPT code at this time.

Comment: The commenter disagreed that BLS category 21–1029 (Social Workers, All Other) at an hourly rate of $29.69 was the correct crosswalk for the Psychometrist (L039C) clinical labor type. The commenter stated that BLS category 31–1133 (Psychiatric Aide) more accurately describes the clinical staff type associated with Psychometrists.

Response: We disagree with the commenter that a Psychiatric Aide described under BLS category 31–1133 would be the most appropriate choice to use in pricing the L039C clinical labor type. The median hourly wage for a Psychiatric Aide under this BLS category is $14.96 while the hourly wage data for a Psychometrist that we have from Salary Expert is substantially higher at $29.29. We continue to believe that our crosswalk to BLS category 21–1029 is a more accurate choice for valuation.

Comment: The commenter disagreed that BLS category 29–9000 (Other Healthcare Practitioners and Technical Occupations) at an hourly rate of $27.22 was the correct crosswalk for the Angio Technician (L041A) clinical labor type. The commenter stated that BLS category 29–2034 (Radiologic Technologists and Technicians) was the previous BLS crosswalk used during the 2002 pricing of clinical labor and remains the correct crosswalk for an angiography technician.

Response: We disagree with the commenter that a Radiologic Technologist described under BLS category 29–2034 would be the most appropriate choice to use in pricing the L041A clinical labor type. The median hourly wage for a Radiologic Technologist under this BLS category is $29.09 and, as we discussed above, the hourly wage data for an Angio Technician that we have from Salary Expert is only $26.81. We are instead crosswalking the Angio Technician to the Lab Tech/Histotechnologist (L035A) clinical labor type with a median hourly rate of $26.63 as described above. We believe that this crosswalk better matches the wage data that we have available from Salary Expert for Angio Technicians. The previous BLS crosswalk may have been the most appropriate choice in 2002 but we have data from Salary Expert suggesting that it is no longer the best option.

Comment: The commenter disagreed that BLS category 29–2035 (Magnetic Resonance Imaging Technologists) at an hourly rate of $35.70 was the correct crosswalk for the Cytotechnologist (L045A) clinical labor type. The commenter stated that BLS category 29–2010 (Clinical Laboratory Technologists and Technicians) was the previous BLS crosswalk used during the 2002 pricing of clinical labor and remains the correct crosswalk for a cytotechnologist.

Response: We disagree with the commenter that the Clinical Laboratory Technologists described under BLS category 29–2010 would be the most accurate choice to use in pricing the L045A clinical labor type. The median hourly wage for a Clinical Laboratory Technologist under this BLS category is $25.54 while the hourly wage data for a Cytotechnologist that we have from Salary Expert is substantially higher at $36.19. We continue to believe that our proposed crosswalk to BLS category 29–2035 is a more appropriate choice for valuation. The previous BLS crosswalk we used in 2002 was based on available information at that time, but we have data suggesting that it is no longer the best option.

Comment: The commenter disagreed that BLS category 29–1124 (Radiation Therapists) at an hourly rate of $44.05 was the correct crosswalk for the Electron Microscopy Technologist (L045B) clinical labor type. The commenter stated that BLS category 29–2010 (Clinical Laboratory Technologists and Technicians) more accurately describes the clinical staff type associated with Electron Microscopy Technologists.

Response: We disagree with the commenter that the Clinical Laboratory Technologists described under BLS category 29–2010 would be the most appropriate choice to use in pricing the L045B clinical labor type. The median hourly wage for a Clinical Laboratory Technologist under this BLS category is $25.54 while the hourly wage data for an Electron Microscopy Technologist that we have from Salary Expert is substantially higher at $44.90. We continue to believe that our crosswalk to BLS category 29–1124 is a more appropriate choice for valuation.

Comment: The commenter disagreed that BLS category 19–1040 (Medical Scientists) at an hourly rate of $46.95 was the correct crosswalk for the

Medical Dosimetrist (L063A) clinical labor type. The commenter stated that BLS category 29–2098 (Medical Dosimetrists, Medical Records Specialists, and Health Technologists and Technicians, All Other) more accurately describes the clinical staff type associated with Medical Dosimetrists.

Response: We disagree with the commenter that the clinical labor described under BLS category 29–2098 would be the most appropriate choice to use in pricing the L045B clinical labor type. The median hourly wage under this BLS category is $20.50 while the hourly wage data for a Medical Dosimetrist that we have from Salary Expert is substantially higher at $48.31. We recognize that BLS category 29–2098 includes Medical Dosimetrists in its heading, however this is an aggregated category that also includes many other miscellaneous types of technicians. If we were to use this category for pricing Medical Dosimetrists, the clinical labor type would be priced significantly lower than its 2002 valuation ($27.67) which we do not believe would be accurate for this profession, especially in the context of the wage data that we have from Salary Expert for the profession. We continue to believe that our crosswalk to BLS category 19–1040 is a more appropriate choice for valuation.

Comment: The commenter disagreed that the 75th percentile of BLS category 19–2012 (Physicists) at an hourly rate of $78.95 was the correct crosswalk for the Medical Physicist (L152A) clinical labor type. The commenter stated that the rationale to use the 75th percentile was based on maintaining the historical wage level for clinical labor type L152A which defeats the purpose of updating clinical labor rates. The commenter stated that BLS category 19–2012 (Physicist) was the highest of several options and would suffice as a crosswalk without using the 75th percentile rate.

Response: We disagree with the commenter that the Physicists described under BLS category 19–2012 would be the most accurate choice to use in pricing the L152A clinical labor type. The median hourly wage for a Physicist under this BLS category is $59.06 while the hourly wage data for a Medical Physicist that we have from Salary Expert is substantially higher at $66.90. While we also have our reservations about the use of 75th percentile wage data from the BLS, we continue to believe that it is a more accurate choice for valuation than BLS category 19–2012.

Comment: Several commenters stated that the BLS wage data for a Physicist are not equivalent or representative of a Medical Physicist, even at the CMS proposed 75th percentile labor rate. Commenters stated that the sophistication and complexity of radiation therapy technology has increased exponentially in the past few decades and as radiation treatments have become more targeted and precise, they have also required increasingly complex equipment and processes. Commenters stated that as the complexity of radiation therapy treatments has grown, the work of ensuring treatment accuracy and patient safety throughout a prescribed course of treatment has also become more demanding in expertise and attention. These commenters recommended that CMS utilize the CY 2020 Professional Survey Report on salary data from the American Association of Physicists in Medicine (AAPM) to determine the updated clinical labor rate per minute for the Medical Physicist clinical labor type. Commenters also noted that CMS utilized the AAPM 2005 salary data, inflated to 2006, when CMS updated the clinical labor wage rates for CY 2002. This report on Medical Physicist salary data was submitted as a public comment and commenters recommended that the Medical Physicist clinical labor rate be updated to $2.25 per minute based on the weighted median salary of certified qualified Medical Physicists multiplied by the CMS proposed benefits factor of 1.366.

Response: We appreciate the submission of this additional wage data specifically for Medical Physicists to supplement the BLS wage data. We agree with the commenters that the BLS wage data for a Physicist is not representative of a Medical Physicist, which was why we proposed to use the 75th percentile of the BLS wage data due to a lack of other sources of information. We agree with the commenters that the submitted AAPM wage data more accurately captures the salary of Medical Physicists and better matches the data that we have from Salary Expert. The submitted AAPM data had an average salary of $205,838 for certified qualified Medical Physicists with a Masters or Ph.D. degree; according to our proposed methodology we divide this by 2080 hours annually for a per-hour rate of $98.96 and a per-minute rate of $1.65. However, since we are finalizing a different fringe benefits multiplier in response to comments (1.296 instead of the proposed 1.366), we arrive at a final adjusted clinical labor rate of $2.14 per minute instead of the $2.25 detailed by the commenters. As noted by the commenters, the L152A clinical labor type is included as part of the blended Medical Dosimetrist/Medical Physicist (L107A) clinical labor type, which we have also updated in response to the new $2.14 pricing.

After consideration of the comments, we are finalizing the clinical labor prices as shown in Table 12.

BILLING CODE 4120–01–P

TABLE 12: Finalized Clinical Labor Pricing Update

Labor Code	Labor Description	Source	Current Rate Per Minute	Updated Rate Per Minute	Y1 Phase-In Rate Per Minute	Total % Change

BILLING CODE 4120–01–C

We once again isolated the anticipated effects of the clinical labor pricing update on specialty payment impacts by comparing the CY 2022 PFS rates with and without the clinical labor pricing updates in place, including with both the fully implemented pricing update and the first year of a 4-year transition as shown in Table 13.

TABLE 13: Anticipated Final Clinical Labor Pricing Effect on Specialty Impacts

Specialty	Allowed Charges (mil)	Fully Updated	Y1 Phase-In Trans
Portable X-Ray Supplier	$86	9%	2%
Endocrinology	$508	2%	0%
Family Practice	$5,765	2%	0%
General Practice	$375	1%	0%
Hand Surgery	$222	1%	0%
Nurse Practitioner	$5,323	1%	0%
Geriatrics	$177	1%	0%
Internal Medicine	$9,979	1%	0%
Orthopedic Surgery	$3,286	1%	0%
Pediatrics	$56	1%	0%
Physician Assistant	$2,825	1%	0%
Pulmonary Disease	$1,478	1%	0%
Psychiatry	$1,053	1%	0%
Optometry	$1,116	1%	0%
Neurology	$1,362	1%	0%
Obstetrics/Gynecology	$561	0%	0%
Gastroenterology	$1,482	0%	0%
Plastic Surgery	$322	0%	0%
Podiatry	$1,865	0%	0%
Physical/Occupational Therapy	$3,994	0%	0%
Ophthalmology	$4,376	0%	0%
Clinical Social Worker	$881	0%	0%
Nephrology	$2,315	0%	0%
Neurosurgery	$712	0%	0%
Nurse Anes / Anes Asst	$1,075	0%	0%
Clinical Psychologist	$821	0%	0%
Multispecialty Clinic/Other Phys	$138	0%	0%
Total	$87,449	0%	0%
General Surgery	$1,751	0%	0%

Dermatology	$3,462	-1%	0%
Allergy/Immunology	$221	-1%	0%
Other	$54	-2%	0%
Audiologist	$58	-2%	-1%
Hematology/Oncology	$1,742	-2%	-1%
Independent Laboratory	$557	-2%	-1%
Radiation Oncology and Radiation Therapy Centers	$1,666	-3%	-1%
Oral/Maxillofacial Surgery	$73	-3%	-1%

Specialty	Allowed Charges (mil)	Fully Updated	Y1 Phase-In Trans
Vascular Surgery	$1,149	-5%	-1%
Interventional Radiology	$482	-6%	-2%
Diagnostic Testing Facility	$689	-7%	-2%

BILLING CODE 4120–01–C

We emphasize again that these are not the projected impacts by specialty of all the policies we are finalizing for CY 2022, only the anticipated effect of the isolated clinical labor pricing update (the allowed changes for each specialty therefore may not match the allowed charges listed in the Regulatory Impacts Analysis section of this rule). Several commenters asked CMS to clarify that the 4-year transition would only be implementing the first year of the projected adjustment amount for CY 2022, and not impose some other compounded effect that would deepen the payment reduction. These commenters pointed to Table 135 in the CY 2022 PFS proposed rule (86 FR 39563–39564) and sought assurances that the −1 percent in a 4-year transition would not grow to be a −4 percent by the end of the 4-year transition, rather than the −2 percent listed on the table for the full transition. We are happy to clarify for commenters that these cases, such as applying to the Audiologist specialty in the above table, are caused by rounding and the ''Fully Updated'' column contains the full effects of the entire clinical labor pricing update.

As was the case for the market-based supply and equipment pricing update, the clinical labor rates will remain open for public comment over the course of the 4-year transition period. We welcome additional feedback on clinical labor pricing from commenters in next year's rulemaking cycle, especially any data that will continue to improve the accuracy of our finalized pricing.

e. Establishment of Values for Remote Retinal Imaging (CPT Code 92229), Comment Solicitation for Fractional Flow Reserve Derived From Computed Tomography (CPT Code 0503T), and Comment Solicitation for Codes Involving Innovative Technology

Rapid advances in innovative technology are having a profound effect on every facet of the economy, including in the delivery of health care. Emerging and evolving technologies are introducing advances in treatment options that have the potential to increase access to care for Medicare beneficiaries, improve outcomes, and reduce overall costs to the program. While new services have emerged over the last several years, it is possible that the COVID–19 PHE could be accelerating the supply and demand for these innovations. Emerging and evolving technologies could be useful tools for improving disparities in care that have been exacerbated by the PHE. Some of these new applications have codes for which innovative technology is substituting for and/or augmenting physician work. For example, the CPT Editorial Panel created CPT code 92229 (*Imaging of retina for detection or monitoring of disease; point-of-care automated analysis and report, unilateral or bilateral*), a diagnostic test for diabetic retinopathy that uses a software algorithm, and the RUC provided valuation recommendations which included a retinal camera and an analysis fee for remote imaging. In the CY 2021 PFS final rule (85 FR 84629 through 84630), we considered CPT code 92229 to be a diagnostic service under the PFS, contractor-priced it, and stated that we would have ongoing conversations with stakeholders. In the proposed rule, we discussed a proposal to establish RVUs for CPT code 92229, solicited feedback to establish RVUs for CPT code 0503T (*Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; analysis of fluid dynamics and simulated maximal coronary hyperemia, and generation of estimated FFR model*), and solicited feedback to help us better understand the resource costs for services involving the use of innovative technologies such as software algorithms and artificial intelligence (AI).

In our discussion of CPT code 92229 in the CY 2021 PFS final rule (85 FR 84629 through 84630), we wrote that as the data used in our PE methodology have aged, and more services have begun to include innovative technology such as software algorithms and AI, these innovative applications are not well accounted for in our PE methodology. As described earlier in this section, PE resources involved in furnishing services are characterized as either direct or indirect costs. Direct costs of the PE resources involved in furnish a service are estimated for each code and include clinical labor, medical supplies, and medical equipment. Indirect costs include administrative labor, office expenses, and all other expenses. Indirect PE is allocated to each service based on physician work, direct costs, and a specialty-specific indirect percentage. The source of the specialty specific indirect percentage was the Physician Practice Information Survey (PPIS), last administered in 2007 and 2008, when emerging technologies that rely primarily on software, licensing, and analysis fees, with minimal costs in equipment and hardware may not have been typical. Thus, these costs are not well accounted for in the PE methodology.

Consistent with our PE methodology and as we have stated in past PFS rulemaking (83 FR 59557), we have considered most computer software and associated analysis and licensing fees to be indirect costs tied to costs for associated hardware that is considered to be medical equipment. In the case of CPT code 92229, the hardware is a retinal camera used for remote imaging. Given that indirect costs are based on physician work, direct costs, and specialty-specific indirect percentages that can include high-cost equipment, our concern is that if we were to consider an analysis fee to be a supply cost, as was recommended by the RUC, it is possible that we would inadvertently allocate too many indirect costs for a supply item that may not require additional indirect expenses. Unlike a piece of equipment, such as the retinal camera, an analysis fee for software does not require physical space in an office or administrative staff hours to maintain it.

However, increasingly, stakeholders have routinely expressed concerns with our policy to consider analysis fees as indirect costs, especially for evolving technologies that rely primarily on these fees with minimal costs in equipment or hardware. In comments in the CY 2021 PFS final rule (85 FR 84629 through 84630) responding to our proposal to price the analysis fee for remote imaging as an indirect cost, stakeholders stated

that there would be no service if the software was not used. There are two aspects that distinguish CPT code 92229 from other services. First, most of the RUC's recommended resource costs for CPT code 92229 were for the analysis fee, rather than high-cost equipment or other supplies that require commensurate indirect costs to accommodate for space or administrative labor. Second, the innovative technology incorporated into the service is a software algorithm, which interprets data collected during the test, either augmenting the work of the physician or NPP performing the test, or in some cases replacing at least some work that a physician would typically furnish. In general, it is possible that physician work time and intensity of furnishing care to patients could be affected as more services that involve innovative technologies such as software algorithms or AI become available.

We finalized a policy to establish contractor pricing for CPT code 92229 (85 FR 84629 through 84630) because analysis fees for software algorithms and AI applications are not well accounted for our PE methodology, and to recognize that practitioners do incur resource costs for purchase and ongoing use of the software. We stated that we would continue to seek out new data sources and have ongoing conversations with stakeholders while also considering other approaches to reflect overall resource costs for these technologies in our PE methodology.

As we described in the CY 2021 PFS final rule (85 FR 84498 through 84499), the RAND Corporation is currently studying potential improvements to CMS' PE allocation methodology and the data that underlie it. RAND has found that the PPIS data last collected in 2007–2008 may no longer reflect the resource allocation, staffing arrangements, and cost structures that describe practitioners' resource requirements in furnishing services to Medicare beneficiaries, and consequently may not accurately capture the indirect PE resources required to furnish services to Medicare fee-for-service (FFS) beneficiaries. Our experience with the challenge of accurately accounting for resource costs for innovative and emerging technologies such as ongoing service-specific software costs that are included in CPT code 92229 is another reason we continue to be interested in potentially refining the PE methodology and updating the data used to establish RVUs and payment rates under the PFS. We commonly employ a crosswalk to recognize resource costs when we lack the inputs that we would need to calculate work, PE, and/or malpractice RVUs for a service otherwise. When we use a crosswalk to value a service, we substitute the established RVUs for other services with similar resource costs in the physician office setting to set RVUs and the national payment rates for that particular service.

For CY 2022, we proposed to establish values for CPT code 92229 using our crosswalk approach, and thus this service would no longer be contractor-priced. We continue to believe that the software algorithm present in the analysis fee for CPT code 92229 is not well accounted for in our PE methodology; however, we recognize that practitioners are incurring resource costs for purchase of the software and its ongoing use. We proposed to use a crosswalk that reflects the overall relative resource costs for this service while we continue to consider potentially refining the PE methodology and updating the data we use to establish PE RVUs under the PFS. Specifically, we proposed a crosswalk to CPT code 92325 (*Modification of contact lens (separate procedure), with medical supervision of adaptation*), a PE-only code used for the eye, as we believe it reflects overall resource costs for CPT code 92229 in the physician office setting. We recognize that the services described by CPT code 92325 are not the same as the services in CPT code 92229; however, we believe that the total resource costs would be similar across these two codes. We believe that crosswalking the RVUs for CPT code 92229 to a code with similar resource costs allows CMS to recognize that practitioners are incurring resource costs for the purchase and ongoing use of the software employed in CPT code 92229, which would not typically be considered direct PE under our current methodology. We also solicited comments on our proposal to crosswalk CPT code 92229 to CPT code 92325, and whether other codes would provide a more appropriate crosswalk in terms of resource costs. In addition, as discussed in section II.E of this final rule, we proposed to use our crosswalk approach for CPT code 77089 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk*) and CPT code 77091 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk, technical calculation only*).

We received public comments on our proposal to crosswalk CPT code 92229 to CPT code 92325. The following is a summary of the comments we received and our responses.

Comment: Many commenters supported the proposal to crosswalk CPT code 92229 to CPT code 92325 to better reflect the overall relative resource costs for this service. Commenters stated that that these services were not clinically similar but the total direct practice cost of CPT code 92325 was similar to the RUC-recommended total direct PE cost for CPT code 92229 and commenters agreed with the CMS proposal to implement relative values for this service. Commenters stated that although many of the MACs have worked with providers to establish pricing, there remains significant variability in payment across MAC jurisdictions and a lack of transparency in the valuation methodology. Commenters stated that this variability in the current MAC pricing can impact provider and beneficiary access to novel and vision-saving technologies. These commenters supported national pricing for CPT code 92229 through the use of the proposed crosswalk code to help provide transparency and facilitate beneficiary access to care. We did not receive comments requesting that CMS return to the contractor pricing finalized for CY 2021 for CPT code 92229.

Response: We appreciate the support for our proposed crosswalk from the commenters.

Comment: Several commenters expressed concern that CMS repeatedly stated that software and analysis fees are not direct expenses. Commenters disagreed and stated that software that is directly attributed to a specific physician service is a direct expense, and furthermore that there are multiple examples of the implementation of such costs. Several comments provided a list of current CPT codes that they stated included software as a direct PE input, such as CPT code 95905 (*Motor and/or sensory nerve conduction, using preconfigured electrode array(s), amplitude and latency/velocity study, each limb, includes F-wave study when performed, with interpretation and report*). Several commenters raised the issue of software as a medical device (SaMD) and stated that it should be considered a direct PE expense similar to other medical equipment. Commenters stated that even though SaMD does not require physical space in an office or administrative staff hours

to maintain it, SaMD does require ongoing upgrades, improvements, and security mitigation, as well as the same regulatory oversight by the Food and Drug Administration (FDA) as hardware medical devices. Commenters stated that the legal, regulatory, and financial burdens incumbent of a SaMD manufacturer are no different than those of hardware medical device manufacturers.

Response: We appreciate the detailed feedback from the commenters regarding the issues surrounding software and analysis fees. We agree with the commenters that there have been occasions in the past where we have finalized the inclusion of software as a direct PE expense if it met our criteria as typical and medically necessary for the service in question and could be individually allocable to a particular patient for a particular service. For example, we included the sheer wave elastography software (ED060) as a direct PE input for CPT codes 76981–76983 in CY 2019. In this case, the sheer wave elastography software was an additional resource cost added to the general ultrasound room (EL015) equipment without which the service cannot be performed. We have been more hesitant to classify software, licensing, and analysis fees that are not associated with physical equipment used in the performance of a service as they pose more significant challenges for our traditional PE methodology. Therefore, we wish to clarify that although we have typically considered software costs to be indirect PE under our methodology, as these costs were not individually allocable to a particular patient for a particular service, there have been exceptions to this general principle where software costs have been included directly in the service under review.

As we stated in the proposed rule, we believe that costs associated with software, licensing, and analysis fees are not well accounted for in the PE methodology. Unlike a piece of equipment, such as the retinal camera, an analysis fee for software does not require physical space in an office or administrative staff hours to maintain it. These types of costs were much less prevalent when the Physician Practice Information Survey (PPIS) was last administered in 2007 and 2008 and of course did not exist at all in the case of AI-based services. We remain concerned that if we were to consider software analysis fees and software as a medical device expenses to be direct costs in all cases, we may inadvertently allocate too many indirect costs for supplies that may not require additional indirect expenses. The data underlying the PPIS assumes that direct expenses will require costs associated with physical space and physical maintenance that may not appropriate for these new types of software. However, we do recognize that practitioners are incurring resource costs for purchase of the software and its ongoing use, which is why we proposed the crosswalk to CPT code 92325 to capture these resource costs for CPT code 92229. We believe that the use of this crosswalk and other similar crosswalks are the best way to value services that make use of software, licensing, and analysis fees at the moment while we explore ongoing potential updates to the PE methodology.

Comment: One commenter stated that CMS should consider crosswalks to CPT codes 95249 (*Ambulatory CGM of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; patient provided equipment, sensor placement, hook-up, calibration of monitor, patient training, and printout of recording*) and 92977 (*Thrombolysis, coronary; by intravenous infusion*). The commenter stated that these codes are expected to be utilized in primary care and diabetes care settings and reflect similar resource costs.

Response: We appreciate the additional suggested crosswalk codes from the commenter. However, we continue to believe that our proposed crosswalk to CPT code 92325 is a more appropriate choice to use for valuing CPT code 92229 because it more closely matches the RUC-recommended total direct PE costs for CPT code 92229. Although CPT codes 95249 and 92977 share some clinical similarities with CPT code 92229, they both include additional resource costs which would result in an inappropriately higher valuation if we were to employ them as our crosswalk code.

After consideration of the public comments, we are finalizing our proposal to establish values for CPT code 92229 based on a direct crosswalk to CPT code 92325.

We are aware of other services that use similar innovative technologies to those used for the diagnostic test for diabetic retinopathy and trabecular bone score, and that those technologies also are not well-accounted for in our PE methodology. For CY 2018, the AMA CPT Editorial Panel established four new Category III CPT codes for fractional flow reserve derived from computed tomography (FFRCT): CPT code 0501T (*Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; data preparation and transmission, analysis of fluid dynamics and simulated maximal coronary hyperemia, generation of estimated FFR model, with anatomical data review in comparison with estimated FFR model to reconcile discordant data, interpretation and report*); CPT code 0502T (*Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; data preparation and transmission*); CPT code 0503T (*Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; analysis of fluid dynamics and simulated maximal coronary hyperemia, and generation of estimated FFR model*); and CPT code 0504T (*Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; anatomical data review in comparison with estimated FFR model to reconcile discordant data, interpretation and report*). FFRCT is a noninvasive diagnostic service that allows physicians to measure coronary artery disease in a patient through coronary CT scans. It uses a proprietary data analysis process performed at a central facility to develop a three-dimensional image of a patient's coronary arteries, which allows physicians to identify the fractional flow reserve to assess whether or not patients should undergo further invasive testing or treatment (typically, a coronary angiogram). We understand that FFRCT can show through non-invasive imaging whether a beneficiary has coronary artery disease thereby potentially avoiding an invasive coronary procedure. Medicare began payment for CPT code 0503T in the HOPD setting under the Outpatient Prospective Payment System (OPPS) in CY 2018 (82 FR 59284). For the PFS, we typically assign contractor pricing for Category III codes since they are temporary codes assigned to emerging

technology and services. We followed this established process for Category III codes by assigning and listing them as contractor pricing in Appendix B in the CY 2018 PFS final rule (available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices-Items/CMS-1676-F*).

We have since been trying to understand the costs of the PE resource inputs for CPT code 0503T in the physician office setting. In the CY 2021 PFS final rule, we stated that we found FFRCT to be similar to other technologies that use algorithms, artificial intelligence, or other innovative forms of analysis to determine a course of treatment, where the analysis portion of the service cannot adequately be reflected under the PE methodology; and that our recent reviews for the overall cost of CPT code 0503T have shown the costs in the physician office setting to be similar to costs reflected in payment under the OPPS (85 FR 84630). For the CY 2021 OPPS/ASC final rule, we found that the geometric mean cost reported by HOPDs for the service was $804.35 (85 FR 85943). We believe the costs reported under the OPPS are instructive as they reflect actual costs that hospitals incurred in furnishing the service described by CPT code 0503T to Medicare beneficiaries, and, as we stated in the CY 2021 PFS final rule, we believe that these costs would be similar in the physician office setting. Using the geometric mean costs under the OPPS as a proxy, we then searched for services paid under the PFS that could potentially serve as a crosswalk. Specifically, we looked for services paid under the PFS that include only a TC because CPT code 0503T is a TC-only service, and that have similar total costs to CPT code 0503T. We identified the following potential crosswalks, and solicited public comment on which, if any of them, would be appropriate: CPT code 93455 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with catheter placement(s) in bypass graft(s) (internal mammary, free arterial, venous grafts) including intraprocedural injection(s) for bypass graft angiography*) and CPT code 93458 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with left heart catheterization including intraprocedural injection(s) for left ventriculography, when performed*). We also solicited comment on whether other codes would provide a more appropriate crosswalk in terms of resource costs.

We received public comments on our comment solicitation for potential crosswalks to use to establish national payment for CPT code 0503T. The following is a summary of the comments we received and our responses.

Comment: Many commenters supported the proposal to use a crosswalk to recognize resource costs and appropriately pay for CPT code 0503T. These commenters disagreed, however, with the proposal to use costs reported under the OPPS as a proxy to inform our selection of a crosswalk to similarly resourced services under the PFS. Some of these commenters, including the AMA RUC, expressed concern about our reliance on data from the OPPS in establishing relative values for the PFS. These commenters cited Section 4505 of the Balanced Budget Act of 1997 and highlighted what they believed to be requirements for what data CMS should consider in establishing payments under the PFS. Specifically, they stated that CMS must utilize generally accepted cost accounting principles to recognize all staff, equipment, supplies and expenses, not just those which can be tied to specific procedures, and to use actual data on equipment utilization and other key assumptions, as well as to consult with organizations representing physicians regarding methodology. They asserted that any proposal to use the relativity of hospital charge data to determine the relativity of practice costs within a physician office is not consistent with the statutory provisions established by the BBA of 1997. The AMA RUC stated that it would solicit the national specialty societies to determine if RUC recommendations may be developed for this service.

Response: In response to commenters' concerns about our potential use of OPPS cost data, we note that section 1848(c)(2)(N) of the Act authorizes our use of alternative approaches to establishing PE relative values using cost, charge, or other data from suppliers or providers of services in order to ensure accurate valuation of services under the PFS. As previously stated, we believe this is an appropriate approach as our recent reviews for the overall cost of CPT code 0503T have shown the costs in the physician office setting to be similar to costs reflected in payment under the OPPS.

Comment: Some commenters requested that CMS use submitted invoice information, which included a price of $1,100 for furnishing the whole service described under CPT code 0503T, as a direct expense input to establish national payment for CPT code 0503T.

Response: We thank the commenters for the invoice information they provided. We note that, in recent years, these services have been contractor priced, both out of consideration for the relative newness of the technology involved in the services and to allow time for CMS to consider how best to appropriately reflect costs for the service in payments established under the PFS. Stakeholders have worked with MACs to establish payment for the service but have expressed concern with the variability in payments across the different MAC jurisdictions during this time and have continued to urge CMS to establish national payment rates. In response, CMS in recent years has reviewed cost information for this service. Our recent reviews for the overall cost of CPT code 0503T have shown that the costs in the physician office setting are similar to costs reflected in payment under the OPPS (85 FR 84630). We continue to believe the costs and resulting payment reported under the OPPS are instructive as they reflect actual costs that hospitals incurred in furnishing the service described by CPT code 0503T to Medicare beneficiaries. Further, as we stated in the CY 2021 PFS final rule, we believe that these costs would be similar in the physician office setting, given stakeholders' description of the way that this TC-only service is furnished (that is, a technician conducts a proprietary data analysis process at a central facility). In soliciting comments on the appropriate crosswalk for use to establish a PFS payment for this service, we had referenced the CY 2021 OPPS/ASC geometric mean cost of $804.35 for 0503T. We note, however that we finalized an OPPS payment rate of $950.50 for the service based on an assignment to a new technology Ambulatory Payment Classification (APC) in order to provide payment stability and equitable payment for providers as they continue to become more familiar with the proper cost reporting for CPT 0503T and other services that similarly use artificial intelligence technologies. Based on our reference to the underlying OPPS/ASC geometric mean cost data for the service, we had identified CPT code 93455 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with*

catheter placement(s) in bypass graft(s) (internal mammary, free arterial, venous grafts) including intraprocedural injection(s) for bypass graft angiography) and CPT code 93458 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with left heart catheterization including intraprocedural injection(s) for left ventriculography, when performed*) as potential crosswalks. We had intended in the CY 2022 PFS proposed rule to reference and use the OPPS payment rate to identify an appropriate crosswalk for CPT code 0503T, but due to a technical error, we inadvertently referenced the cost information to identify potential resource-based crosswalks under the PFS. As discussed briefly above, the geometric mean cost information is used under the OPPS to identify an APC assignment based on similarity of cost and clinical characteristics to other services. We believe that using the CY 2021 OPPS payment rate for 0503T ($950.50), as the reference for cost to identify an appropriate crosswalk code under the PFS, which is higher than the underlying geometric mean cost-based information we had proposed ($804.35) to use, strikes the right balance between acknowledging the invoice information we received from commenters and the OPPS payment information informed by hundreds of claims with cost data for the FFRCT service. We reiterate that given stakeholders' description of the way that this TC-only service is furnished (that is, a technician conducts a proprietary data analysis process at a central facility), we believe that the costs for the FFRCT service as reflected in the OPPS payment that we used to identify a suitable resource-based crosswalk, would be similar in the physician office setting. Using the CY 2021 OPPS payment rate (which is based on the geometric mean costs data) as a proxy, we identified the TC for CPT code 93457 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with catheter placement(s) in bypass graft(s) (internal mammary, free arterial, venous graft(s) including intraprocedural injection(s) for bypass grafts angiography and right heart catherization*) as a more appropriate crosswalk. After consideration of the public comments, we are finalizing national pricing for CPT code 0503T, based on a valuation crosswalk to the TC of CPT code 93457 (*Catheter placement in coronary artery(s) for coronary angiography, including intraprocedural injection(s) for coronary angiography, imaging supervision and interpretation; with catheter placement(s) in bypass graft(s) (internal mammary, free arterial, venous graft(s) including intraprocedural injection(s) for bypass grafts angiography and right heart catherization*). We intend to continue working with stakeholders to help us better understand the resource costs that should be reflected in payment for services involving the use of innovative technologies, address payment for innovative services (such as CPT code 0503T), and consider how the cost for such services should be accounted for in our PE methodology.

We also more broadly solicited public comment to help us better understand the resource costs for services involving the use of innovative technologies, including but not limited to software algorithms and AI. We refer readers to the CY 2022 PFS proposed rule (86 FR 39125) for more detail on the questions we asked the public to consider.

We received public comments on the resource costs for services involving the use of innovative technologies, including but not limited to software algorithms and AI. The following is a summary of the comments we received and our response.

Comment: Commenters were unanimously appreciative of the effort to understand and proactively engage on AI topics, and the acknowledgment that AI and innovative technologies are not well accounted for in the current PE methodology. Many commenters noted that the approach to understanding costs and impact on providers, systems, and patients is highly dependent upon the service and circumstances of the clinical encounter, and that it is difficult to broadly assess the impact of innovations on individual components of the RVU for a service. Some commenters encouraged CMS to issue a separate, stand-alone, request for information (RFI) that looks holistically at this issue rather than in the context of a specific payment rule or structure, noting this would help to ensure a broader range of stakeholder views are represented.

Many commenters noted that while there may be one-time or start-up costs associated with implementing an AI-enabled technology or software algorithm, the costs are more likely recurring, and consider these technologies a direct PE instead of an indirect PE. One commenter suggested that the specific AI work and related AI cost should be paid separately under a new code, or added on to the existing code. Another commenter encouraged CMS to exercise flexibility in how it considers costs to allow for a range of cost structures, such as subscription models, per-use costs, device/supply purchases, and AI service purchases, when determining its approach. One commenter noted that the costs associated with innovative technologies should align with the rest of the RBRVS, with staff, supplies and equipment costs resource-based, and with appropriate updates to the PPI Survey to accurately capture these indirect costs. Another commenter encouraged an assessment and analysis of how these and other methodologies for calculating a per-patient cost can accommodate emerging business models for these innovative technologies.

Many commenters disagreed with any characterization of innovative technologies as a replacement for physician work. One commenter stated that the new technologies do not categorically increase or decrease physician work time and intensity, but rather, they change what physicians do. Many commenters referred to the following three broad categories when describing the different roles these technologies play in physician work: (1) Assistive, which enhances clinical management, but does not generate additional physician work; (2) automated, which provides additional insight that informs the physician's actions); and (3) autonomous, which provides diagnosis or clinical management decisions, but does not require physician intervention. Commenters further note that applications in each of these categories can either increase or decrease physician work and intensity. Some commenters noted that technologies such as AI are so nascent or absent in their respective specialties that there are insufficient examples to even illustrate the impact on physician work.

Many commenters noted the potential for these technologies to facilitate more efficient and timely care. A few commenters noted that while these technologies have the potential to increase access to care, beneficiaries in rural areas with limited broadband access could face barriers. One commenter noted that these technologies often require specific hardware, software, broadband and other capabilities that may exceed the resources of a physician, and in turn have an impact on quality and equity. The commenter encouraged CMS to consider policies outside the PFS to mitigate disparities in equitable diffusion and uptake of these

technologies. Some commenters acknowledged that these technologies may foster or perpetuate bias, citing the established literature base on bias in machine-learning algorithms. One commenter noted that the FDA approval process includes an assessment of bias in these technologies. One commenter asserts that while software algorithms and AI improve health care disparities, demonstrated by the diabetic retinopathy example, the potential to worsen or widen health disparities also exists.

Commenters also noted the importance of establishing monitoring and other guardrails to mitigate fraud, waste, and abuse, and to ensure that bias does not lead to compromised patient care.

Response: We thank the commenters for all the information submitted. We will review the many public comments we received on this topic and will also consider how best to continue to engage with all stakeholders as we consider this issue further for potential future rulemaking.

As we described in the CY 2021 PFS final rule (85 FR 84498 through 84499), the RAND Corporation has been studying potential improvements to CMS' PE allocation methodology and the data that underlie it. CMS and RAND hosted a virtual Town Hall meeting on June 16, 2021 and materials are available at *https://www.cms.gov/medicare/physician-fee-schedule/practice-expense-data-methods.* Prior RAND research reports are also available at *https://www.rand.org/pubs/research_reports/RR2166.html* and *https://www.rand.org/t/RR3248.* RAND has issued the results of its final phase of research, available at *www.rand.org/t/RRA1181-1.* This report is also available as a public use file displayed on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.*

C. Potentially Misvalued Services Under the PFS

1. Background

Section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the relative value units (RVUs) established under the PFS. Section 1848(c)(2)(K) of the Act requires the Secretary to periodically identify potentially misvalued services using certain criteria and to review and make appropriate adjustments to the relative values for those services. Section 1848(c)(2)(L) of the Act also requires the Secretary to develop a process to validate the RVUs of certain potentially misvalued codes under the PFS, using the same criteria used to identify potentially misvalued codes, and to make appropriate adjustments.

As discussed in section II.E. of this final rule, Valuation of Specific Codes, each year we develop appropriate adjustments to the RVUs taking into account recommendations provided by the American Medical Association (AMA) Resource-Based Relative Value Scale (RVS) Update Committee (RUC), MedPAC, and other stakeholders. For many years, the RUC has provided us with recommendations on the appropriate relative values for new, revised, and potentially misvalued PFS services. We review these recommendations on a code-by-code basis and consider these recommendations in conjunction with analyses of other data, such as claims data, to inform the decision-making process as authorized by statute. We may also consider analyses of work time, work RVUs, or direct PE inputs using other data sources, such as Department of Veteran Affairs (VA), National Surgical Quality Improvement Program (NSQIP), the Society for Thoracic Surgeons (STS), and the Merit-based Incentive Payment System (MIPS) data. In addition to considering the most recently available data, we assess the results of physician surveys and specialty recommendations submitted to us by the RUC for our review. We also consider information provided by other stakeholders. We conduct a review to assess the appropriate RVUs in the context of contemporary medical practice. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available and requires us to take into account the results of consultations with organizations representing physicians who provide the services. In accordance with section 1848(c) of the Act, we determine and make appropriate adjustments to the RVUs.

In its March 2006 Report to the Congress (*http://www.medpac.gov/docs/default-source/reports/Mar06_Ch03.pdf?sfvrsn=0*), MedPAC discussed the importance of appropriately valuing physicians' services, noting that misvalued services can distort the market for physicians' services, as well as for other health care services that physicians order, such as hospital services. In that same report, MedPAC postulated that physicians' services under the PFS can become misvalued over time. MedPAC stated, ''When a new service is added to the physician fee schedule, it may be assigned a relatively high value because of the time, technical skill, and psychological stress that are often required to furnish that service. Over time, the work required for certain services would be expected to decline as physicians become more familiar with the service and more efficient in furnishing it.'' We believe services can also become overvalued when PE costs decline. This can happen when the costs of equipment and supplies fall, or when equipment is used more frequently than is estimated in the PE methodology, reducing its cost per use. Likewise, services can become undervalued when physician work increases or PE costs rises.

As MedPAC noted in its March 2009 Report to Congress (*http://www.medpac.gov/docs/default-source/reports/march-2009-report-to-congress-medicare-payment-policy.pdf*), in the intervening years since MedPAC made the initial recommendations, CMS and the RUC have taken several steps to improve the review process. Also, section 1848(c)(2)(K)(ii) of the Act augments our efforts by directing the Secretary to specifically examine, as determined appropriate, potentially misvalued services in the following categories:

- Codes that have experienced the fastest growth.
- Codes that have experienced substantial changes in PE.
- Codes that describe new technologies or services within an appropriate time-period (such as 3 years) after the relative values are initially established for such codes.
- Codes which are multiple codes that are frequently billed in conjunction with furnishing a single service.
- Codes with low relative values, particularly those that are often billed multiple times for a single treatment.
- Codes that have not been subject to review since implementation of the fee schedule.
- Codes that account for the majority of spending under the PFS.
- Codes for services that have experienced a substantial change in the hospital length of stay or procedure time.
- Codes for which there may be a change in the typical site of service since the code was last valued.
- Codes for which there is a significant difference in payment for the same service between different sites of service.

- Codes for which there may be anomalies in relative values within a family of codes.
- Codes for services where there may be efficiencies when a service is furnished at the same time as other services.
- Codes with high intraservice work per unit of time.
- Codes with high PE RVUs.
- Codes with high cost supplies.
- Codes as determined appropriate by the Secretary.

Section 1848(c)(2)(K)(iii) of the Act also specifies that the Secretary may use existing processes to receive recommendations on the review and appropriate adjustment of potentially misvalued services. In addition, the Secretary may conduct surveys, other data collection activities, studies, or other analyses, as the Secretary determines to be appropriate, to facilitate the review and appropriate adjustment of potentially misvalued services. This section also authorizes the use of analytic contractors to identify and analyze potentially misvalued codes, conduct surveys or collect data, and make recommendations on the review and appropriate adjustment of potentially misvalued services. Additionally, this section provides that the Secretary may coordinate the review and adjustment of any RVU with the periodic review described in section 1848(c)(2)(B) of the Act. Section 1848(c)(2)(K)(iii)(V) of the Act specifies that the Secretary may make appropriate coding revisions (including using existing processes for consideration of coding changes) that may include consolidation of individual services into bundled codes for payment under the PFS.

2. Progress in Identifying and Reviewing Potentially Misvalued Codes

To fulfill our statutory mandate, we have identified and reviewed numerous potentially misvalued codes as specified in section 1848(c)(2)(K)(ii) of the Act, and we intend to continue our work examining potentially misvalued codes in these areas over the upcoming years. As part of our current process, we identify potentially misvalued codes for review, and request recommendations from the RUC and other public commenters on revised work RVUs and direct PE inputs for those codes. The RUC, through its own processes, also identifies potentially misvalued codes for review. Through our public nomination process for potentially misvalued codes established in the CY 2012 PFS final rule with comment period, other individuals and stakeholder groups submit nominations for review of potentially misvalued codes as well. Individuals and stakeholder groups may submit codes for review under the potentially misvalued codes initiative to CMS in one of two ways. Nominations may be submitted to CMS via email or through postal mail. Email submissions should be sent to the CMS emailbox *MedicarePhysisianFeeSchedule@cms.hhs.gov,* with the phrase ''Potentially Misvalued Codes'' and the referencing CPT code number(s) and/or the CPT descriptor(s) in the subject line. Physical letters for nominations should be sent via the U.S. Postal Service to the Centers for Medicare & Medicaid Services, Mail Stop: C4–01–26, 7500 Security Blvd., Baltimore, Maryland 21244. Envelopes containing the nomination letters must be labeled ''Attention: Division of Practitioner Services, Potentially Misvalued Codes''. Nominations for consideration in our next annual rule cycle should be received by our February 10th deadline. Since CY 2009, as a part of the annual potentially misvalued code review and Five-Year Review process, we have reviewed over 1,700 potentially misvalued codes to refine work RVUs and direct PE inputs. We have assigned appropriate work RVUs and direct PE inputs for these services as a result of these reviews. A more detailed discussion of the extensive prior reviews of potentially misvalued codes is included in the Medicare Program; Payment Policies Under the Physician Fee Schedule, Five-Year Review of Work Relative Value Units, Clinical Laboratory Fee Schedule: Signature on Requisition, and Other Revisions to Part B for CY 2012; final rule (76 FR 73052 through 73055) (hereinafter referred to as the ''CY 2012 PFS final rule with comment period''). In the CY 2012 PFS final rule with comment period (76 FR 73055 through 73958), we finalized our policy to consolidate the review of physician work and PE at the same time, and established a process for the annual public nomination of potentially misvalued services.

In the Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule, DME Face-to-Face Encounters, Elimination of the Requirement for Termination of Non-Random Prepayment Complex Medical Review and Other Revisions to Part B for CY 2013 (77 FR 68892) (hereinafter referred to as the ''CY 2013 PFS final rule with comment period''), we built upon the work we began in CY 2009 to review potentially misvalued codes that have not been reviewed since the implementation of the PFS (so-called ''Harvard-valued codes''). In the Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2009; and Revisions to the Amendment of the E-Prescribing Exemption for Computer Generated Facsimile Transmissions; Proposed Rule (73 FR 38589) (hereinafter referred to as the ''CY 2009 PFS proposed rule''), we requested recommendations from the RUC to aid in our review of Harvard-valued codes that had not yet been reviewed, focusing first on high-volume, low intensity codes. In the fourth Five-Year Review (76 FR 32410), we requested recommendations from the RUC to aid in our review of Harvard-valued codes with annual utilization of greater than 30,000 services. In the CY 2013 PFS final rule with comment period, we identified specific Harvard-valued services with annual allowed charges that total at least $10,000,000 as potentially misvalued. In addition to the Harvard-valued codes, in the CY 2013 PFS final rule with comment period we finalized for review a list of potentially misvalued codes that have stand-alone PE (codes with physician work and no listed work time and codes with no physician work that have listed work time). We continue each year to consider and finalize a list of potentially misvalued codes that have or will be reviewed and revised as appropriate in future rulemaking.

3. CY 2022 Identification and Review of Potentially Misvalued Services

In the CY 2012 PFS final rule with comment period (76 FR 73058), we finalized a process for the public to nominate potentially misvalued codes. In the CY 2015 PFS final rule with comment period (79 FR 67606 through 67608), we modified this process whereby the public and stakeholders may nominate potentially misvalued codes for review by submitting the code with supporting documentation by February 10th of each year. Supporting documentation for codes nominated for the annual review of potentially misvalued codes may include the following:

- Documentation in peer reviewed medical literature or other reliable data that demonstrate changes in physician work due to one or more of the following: Technique, knowledge and technology, patient population, site-of-service, length of hospital stay, and work time.
- An anomalous relationship between the code being proposed for review and other codes.
- Evidence that technology has changed physician work.

- Analysis of other data on time and effort measures, such as operating room logs or national and other representative databases.
- Evidence that incorrect assumptions were made in the previous valuation of the service, such as a misleading vignette, survey, or flawed crosswalk assumptions in a previous evaluation.
- Prices for certain high cost supplies or other direct PE inputs that are used to determine PE RVUs are inaccurate and do not reflect current information.
- Analyses of work time, work RVU, or direct PE inputs using other data sources (for example, VA, NSQIP, the STS National Database, and the MIPS data).
- National surveys of work time and intensity from professional and management societies and organizations, such as hospital associations.

We evaluate the supporting documentation submitted with the nominated codes and assess whether the nominated codes appear to be potentially misvalued codes appropriate for review under the annual process. In the following year's PFS proposed rule, we publish the list of nominated codes and indicate for each nominated code whether we agree with its inclusion as a potentially misvalued code. The public has the opportunity to comment on these and all other proposed potentially misvalued codes. In that year's final rule, we finalize our list of potentially misvalued codes.

a. Public Nominations

In the proposed rule, we solicited comments regarding the codes that were nominated by the public and stakeholders as potentially misvalued. In this final rule, we review and summarize the comments we received regarding such codes, and we explain whether we are finalizing such codes as potentially misvalued. We received public nominations for potentially misvalued codes by February 10th and we displayed those nominations on our public website, where we also included the submitter's name and their associated organization for full transparency. Some submissions were for specific, PE-related inputs for codes, and we refer readers to section II.B. of this final rule Determination of PE RVUs for further discussions on PE-related submissions. Discussed below is the summary of this year's submissions under the potentially misvalued code initiative and the comments received from the proposed rule.

A stakeholder nominated CPT code 22551 (*Fusion of spine bones with removal of disc at upper spinal column, anterior approach, complex*) ''and common related services'' as potentially misvalued. Citing the CY 2021 PFS final rule (84 FR 84501) where CMS agreed with the public nomination of CPT code 22867 (*Insertion of interlaminar/interspinous process stabilization/distraction device, without fusion, including image guidance when performed, with open decompression, lumbar; single level*) as potentially misvalued, and discussed the relationship between CPT code 22867 and CPT code 63047 (*Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s], [e.g., spinal or lateral recess stenosis]), single vertebral segment; lumbar*), this stakeholder suggests that there are additional CPT code values related to spine procedures that are in need of contemporaneous review with CPT code 22867. The stakeholder believes that CMS has an interest in reviewing associated anterior cervical discectomy and fusion (ACDF) procedures as well, and suggests that CPT code 22551 ''and common related services'' can result in cumulative RVUs that do not sufficiently reflect physician work, time, or outcomes.

In their submission, the stakeholder expressed concern that there is a discrepancy between the typical total RVUs for codes billed for vertebral fusion procedures performed using three synthetic cage devices with plate and vertebral fusion procedures performed using three allografts with plate. Both methods of vertebral fusion are described by CPT code 22551 (includes a 90-day global period), which has a work RVU of 25.00. Both methods of vertebral fusion involve two units of CPT code 22552 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2, each additional interspace (List separately in addition to code for primary procedure) (ZZZ global period)*) with a total work RVU of 13.00 (6.50×2); and both methods of vertebral fusion involve 1 unit of CPT code 22846 (*Anterior instrumentation; 4 to 7 vertebral segments (List separately in addition to code for primary procedure) (ZZZ global period)*) with a work RVU of 12.40. The vertebral fusion method employing three synthetic cage devices with a plate would involve CPT code 22853 (*Insertion of interbody biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure) (ZZZ global period)*) for the insertion of synthetic cage devices for a total work RVU of 12.75 (4.25×3), and CPT code 20930 (*Allograft, morselized, or placement of osteopromotive material, for spine surgery only (List separately in addition to code for primary procedure)*) with a work RVU of 0.00 (because Medicare considers this code to be bundled into codes for other services). The stakeholder stated that the total work RVUs for the typical vertebral fusion employing three synthetic cage devices with plate would be 63.15 work RVUs.

In contrast, the stakeholder asserted that the vertebral fusion method employing three allografts with plate involves the same set of services and codes (CPT code 22551 (090 global period) and CPT code 22846 (ZZZ global period)), but instead of CPT codes 22853 or 20930, involve CPT code 20931 (*Allograft, structural, for spine surgery only (List separately in addition to code for primary procedure) (ZZZ global period)*) with a work RVU of 1.81. Altogether, the total work RVUs for CPT codes involved in this vertebral fusion method is 52.21. The stakeholder suggested that this difference in total work RVUs, 63.15 versus 52.21, is evidence that these services are misvalued, and that the total work RVUs do not reflect the differences in the amount of work, resources, and intensity between the two vertebral fusion methods.

This stakeholder's description of the potential misvaluation of CPT code 22551 ''and common related services'' differs from the CMS approach to identifying potentially misvalued services by using certain criteria, as described in the beginning of this section. Our determination that one or more codes are potentially misvalued generally revolves around the specific RVUs assigned to an individual code, or several codes within a family of codes. CMS generally does not examine the summed differences in total RVUs based on billing patterns using different codes in different scenarios, representing different physician work, and then comparing the two methods of a procedure, in this case, the use or non-use, of the synthetic cage devices in the vertebral fusion with removal of the disc in the upper spinal column. We do not believe that the stakeholder has provided support for the premise that CPT code 22551 alone is misvalued, or

that any of the codes identified as common related services are misvalued. Therefore, we were not inclined to propose this code as potentially misvalued. However, we solicited comment, including any analysis or studies demonstrating that one or more of these codes meet the criteria listed above under ''Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources to providing a service, or are otherwise potentially misvalued.

A stakeholder nominated CPT code 49436 (*Delayed creation of exit site from embedded subcutaneous segment of intraperitoneal cannula or catheter*) as potentially misvalued, as it has not been valued for payment in the non-facility/office setting. This stakeholder did not include in their submission detailed recommendations for the items, quantities, and unit costs for the supplies, equipment types, and clinical labor (if any), that might be incurred in the non-facility/office setting, all of which are key factors when determining potential valuation or mis-valuation of a service. Medicare claims data for 2018, 2019, and 2020 show that CPT code 49436 is solely performed in the facility ASC setting. We solicited comment, including any analysis or studies demonstrating that this code meets the criteria listed above under ''Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources to providing a service, or is otherwise potentially misvalued.

A stakeholder nominated CPT code 55880 (*Ablation of malignant prostate tissue, transrectal, with high intensity-focused ultrasound (HIFU), including ultrasound guidance*) as potentially misvalued, as it has not been valued in the non-facility/office setting. This stakeholder also did not include in their submission detailed recommendations for items, quantities, and unit costs for the supplies, equipment types, and clinical labor (if any), that might be incurred in the non-facility/office setting, all of which are key factors when determining valuation or mis-valuation. This stakeholder stated that the advances in High Intensity Focused Ultrasound (HIFU) technology toward the destruction of cancerous tissues in the prostate gland have matured to the point where this procedure is now equally as effective and as safe as the cryoablation procedure described by CPT code 55873 (*Cryosurgical ablation of the prostate (includes ultrasonic guidance and monitoring)*), which is currently valued in the non-facility/office setting (186.69 total RVUs, approximately $6,514) and has been for approximately 10 years. We note that CPT code 55880 was reviewed and valued in the CY 2021 PFS final rule (85 FR 84614 through 84615) in the facility setting only. Accordingly, we do not have enough claims data for this code to make accurate comparisons to similar codes that may be furnished in non-facility settings. In the proposed rule, we explained that there was no case presented that constituted a misvaluation of CPT code 55880, and therefore, we were not inclined to put this code forward as potentially misvalued for CY 2022; however, we solicited comment, including any analysis or studies demonstrating that this code meets the criteria listed above under ''Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources to providing a service, or is otherwise potentially misvalued.

A stakeholder nominated CPT code 59200 (*Insertion cervical dilator (e.g., laminaria, prostaglandin)*) as potentially misvalued because the direct PE inputs do not include the supply item, Dilapan-S. This stakeholder had sought to establish a Level II HCPCS code for Dilapan-S, but CMS did not find sufficient evidence to support that request. The stakeholder submitted Dilapan-S to be considered as PE supply input to a Level I CPT code(s). This stakeholder seeks to add Dilapan-S to the nonfacility/office PE inputs for CPT code 59200. Specifically, the stakeholder recommends adding 4 rods of Dilapan-S at $80.00 per unit, for a total of $320.00, as a replacement for the current PE supply item, laminaria tent (a small rod of dehydrated seaweed that when inserted in the cervix, rehydrates, absorbing the water from the surrounding tissue in the woman's body), which is currently listed at $4.0683 per unit, with a total of 3 units, for a total of $12.20. We solicited comment, including any analysis or studies demonstrating that this code meets the criteria listed above under ''Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources to providing a service, or is otherwise potentially misvalued.

A stakeholder nominated CPT codes 66982 through 66986 as potentially misvalued, as they have not been valued in the non-facility/office setting. This stakeholder did not submit other details or reasoning to support their nomination. We note that some of these cataract-related procedures were initially reviewed and valued in CY 2020 PFS final rule (84 FR 62751), and that presently, additional codes in this family are scheduled to be reviewed and valued in this CY 2022 PFS final rule (we refer readers to section II.E. of this final rule, Valuation of Specific Codes). The highest utilization of these cataract codes are CPT code 66982 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique* (*e.g., irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery* (*e.g., iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; without endoscopic cyclophotocoagulation)*) and CPT code 66984 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique* (*e.g., irrigation and aspiration or phacoemulsification); without endoscopic cyclophotocoagulation*). In 2018 and 2019, these services were almost all performed in the ASC facility setting, but based on 2020 claims, the most common setting appears to have shifted to the hospital inpatient or hospital outpatient facility setting. In the proposed rule, we noted that there was no case presented that constituted a misvaluation of CPT codes 66982 to 66986, and therefore, we were not inclined to put this code family forward as potentially misvalued for CY 2022; however, we solicited comment, including any analysis or studies demonstrating that one or more of these codes meet the criteria listed above under ''Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources involved in providing a service, or that the code(s) are otherwise potentially misvalued. See Table 14.

TABLE 14: Stakeholders' Nominations of CPT Codes as Potentially Misvalued for CY 2022

CPT	CPT Descriptor
22551	Neck spine fuse&remov bel c2
49436	Embedded ip cath exit-site
55880	Abltj mal prst8 tiss hifu
59200	Insert cervical dilator (PE supply)
66982 to 66986	Cataract codes

In response to the proposed rule, we received public comments on the CY 2022 identification and review of potentially misvalued services. The following is a summary of the comments we received and our responses.

Comment: We received one comment regarding CPT code 22551 ''and other common related services typically billed with CPT 22551'' on the same day of service, with the same patient, with the same provider(s). The commenter stated they believe that this code is not misvalued.

Response: We do not typically look at a collection of services to see if any one combination of services is misvalued against any other combination of services. This is true not just of vertebral fusion procedures, but of any combination of codes that are furnished by a billing physician. We generally only examine the potential misvaluation of a single code, and not a possible mix of multiple codes/services that might be furnished and billed together. Since CPT code 22551 was not nominated as being potentially misvalued for any of the reasons that we have described above in our criteria of being potentially misvalued, we are finalizing our proposal that this code will not be considered as potentially misvalued for CY 2022.

Comment: We received one comment for CPT code 55880, informing us that this service is expected to see further review for valuation recommendations with the AMA RUC in 2022 for possible CY 2024 recommendations to CMS, and that we should reconsider the valuation of CPT code 55880 at that later time.

Response: We appreciate this information, and note that this CPT code is already slated for review by the AMA RUC in the coming year. Therefore, we are finalizing our proposal that CPT code 55880 will not be considered as potentially misvalued for CY 2022.

Comment: We received comments regarding CPT code 59200 concerning the addition of the supply item Dilapan-S, and one of the comments was from the stakeholder that nominated CPT code 59200 as potentially misvalued. The commenters restated that Dilapan-S is not on the list of direct PE supplies for this code, and that the much less costly equivalent item, ''laminaria tent,'' is on the list of direct PE supplies for this code. One commenter cited evidence suggesting an increased risk of infections in using the laminaria tent as compared to Dilapan-S and that Dilapan-S achieves faster cervical ripening for quicker deliveries by 4 hours. This information was not echoed by other commenters and there were no other reasons given as to why Dilapan-S should replace the item laminaria tent and no evidence that Dilapan-S was in any other way a better performing supply that is widely used as a replacement.

Response: Based on these public comments, and the absence of broader support from any additional commenters on this nomination, we are not finalizing CPT code 59200 as potentially misvalued for CY 2022.

Comment: One commenter posited that the drug administration CPT codes 96401 to 96549 are potentially misvalued because claims in that code range are being adjusted by Medicare Administrative Contractors (MACs) and replaced with the less complex CPT codes [96360 to 96379].

Response: These ''Complex Biological Agent Administration'' codes (that is, CPT codes 96401 to 96549 and CPT codes 96360 to 96379) were not nominated as potentially misvalued for our consideration in the CY 2022 PFS proposed rule, and therefore, we did not address them in the proposed rule. As such, they are outside the scope of this CY 2022 PFS rulemaking process. Therefore, we decline to directly address this comment. However, we note that it is not clear to us how the commenter's assertion that MACs are making adjustments to the codes they use in their drug administration claims is relevant to the question of whether the codes are potentially misvalued. If the commenter continues to believe there is a potential code misvaluation, we suggest they consider submitting a nomination that addresses the criteria we use to assess whether a code is potentially misvalued, as explained above, before our February 10th deadline for a future rulemaking cycle.

Comment: We received comments on the nomination of CPT code 49436 only from the nominator of the code. The nominator provided additional documentation that CPT code 49436 can be safely performed in the nonfacility/office setting. The nominator noted that the total Medicare payment amount for this procedure when done in the nonfacility/office setting would be less than when furnished in the HOPD or ASC facility setting. The nominator stated that performing this procedure in the nonfacility/office rather than in an ASC is a significant ease in burden to the practitioner and the patient since there would be no need to coordinate and schedule an ASC time slot, travel to and from the ASC, or incur the cost involved in utilizing the ASC facility. The nominator also states that easing access to this service would promote peritoneal dialysis in the home setting (and may avoid in-center hemodialysis with a central venous catheter). The nominator also noted that dialysis in the home may be favorable to the patient during the public health emergency (PHE) for COVID–19, which imposes social distancing and self-isolation for a measure of safety from the transmission of infection. The nominator states that the PHE for COVID–19 may also be constraining access to ASC operating facilities due to their restricted schedules of operation.

Response: We agree with the nominator that CPT code 49436 can be safely performed in the nonfacility/office setting. We are also aware that the PHE for COVID–19 may also be constraining access to ASC operating facilities where CPT code 49436 is performed, and if this service were to be done in the nonfacility/office setting, there may well be an ease in the burden to the provider and the patient, when trying to coordinate access with the current PHE ASC restricted schedules. We expect that a nonfacility/office valuation for CPT code 49436, would include the similar supplies, equipment, and clinical labor (if any), that is part of

the ASC/Hospital Outpatient facility's service, plus the payment of the physician's work. The sum of these PEs incurred in the nonfacility/office, will likely be less than current amount paid to the ASC/Hospital Outpatient facility and may result in a net savings when CPT code 49436 is provided in the nonfacility/office setting. After considering the additional information provided by the nominator in combination with our above criteria that a code's typical site of service may need to change since it was last valued, we believe it may be appropriate to explore establishing a value for CPT code 49436 in the non-facility/office setting, and therefore, we are finalizing this code as potentially misvalued for CY 2022.

We received no comments recommending that CPT codes 66982 through 66986 should be valued for payment in the non-facility/office setting, and the nominator supplied no reasoning in support of their nomination of these codes as potentially misvalued codes. Since, as we explained in the proposed rule, there is no case presented with this nomination that constitutes a potential code misvaluation, we are finalizing our proposal that these codes will not be considered as potentially misvalued for CY 2022.

We received two comments requesting that CMS establish a national payment rate for Category III CPT code 0583T (*Insertion of ventilating tube in eardrum using an automated tube delivery system under local anesthesia*), also known as tympanostomy under local anesthesia (Tula). This code is currently carrier-priced and was not discussed in the CY 2022 PFS proposed rule. As such, these comments are outside the scope of the CY 2022 PFS rulemaking process, and we will not formally respond to them. However, the commenters are welcome to submit this code by February 10 of the coming year for consideration as potentially misvalued for the CY 2023 PFS proposed rule. See above for more information on how to submit a nomination for a potentially misvalued code.

D. Telehealth and Other Services Involving Communications Technology, and Interim Final Rule With Comment Period for Coding and Payment of Virtual Check-In Services—Payment for Medicare Telehealth Services Under Section 1834(m) of the Act

As discussed in prior rulemaking, several conditions must be met for Medicare to make payment for telehealth services under the PFS. See further details and full discussion of the scope of Medicare telehealth services in the CY 2018 PFS final rule (82 FR 53006) and CY 2021 PFS final rule (85 FR 84502) and in 42 CFR 410.78 and 414.65.

1. Payment for Medicare Telehealth Services Under Section 1834(m) of the Act

a. Changes to the Medicare Telehealth Services List

In the CY 2003 PFS final rule with comment period (67 FR 79988), we established a regulatory process for adding services to or deleting services from the Medicare telehealth services list in accordance with section 1834(m)(4)(F)(ii) of the Act (42 CFR 410.78(f)). This process provides the public with an ongoing opportunity to submit requests for adding services, which are then reviewed by us and assigned to categories established through notice and comment rulemaking. Specifically, we assign any submitted request to add to the Medicare telehealth services list to one of the following two categories:

- *Category 1:* Services that are similar to professional consultations, office visits, and office psychiatry services that are currently on the Medicare telehealth services list. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter, a practitioner who is present with the beneficiary in the originating site. We also look for similarities in the telecommunications system used to deliver the service; for example, the use of interactive audio and video equipment.
- *Category 2:* Services that are not similar to those on the current Medicare telehealth services list. Our review of these requests includes an assessment of whether the service is accurately described by the corresponding code when furnished via telehealth and whether the use of a telecommunications system to furnish the service produces demonstrated clinical benefit to the patient. Submitted evidence should include both a description of relevant clinical studies that demonstrate the service furnished by telehealth to a Medicare beneficiary improves the diagnosis or treatment of an illness or injury or improves the functioning of a malformed body part, including dates and findings, and a list and copies of published peer reviewed articles relevant to the service when furnished via telehealth. Our evidentiary standard of clinical benefit does not include minor or incidental benefits. Some examples of other clinical benefits that we consider include the following:
  - Ability to diagnose a medical condition in a patient population without access to clinically appropriate in-person diagnostic services.
  - Treatment option for a patient population without access to clinically appropriate in-person treatment options.
  - Reduced rate of complications.
  - Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).
  - Decreased number of future hospitalizations or physician visits.
  - More rapid beneficial resolution of the disease process treatment.
  - Decreased pain, bleeding, or other quantifiable symptom.
  - Reduced recovery time.
- *Category 3:* In the CY 2021 PFS final rule (85 FR 84507), we created a third category of criteria for adding services to the Medicare telehealth services list on a temporary basis following the end of the PHE for the COVID–19 pandemic. This new category describes services that were added to the Medicare telehealth services list during the PHE for which there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition under the Category 1 or Category 2 criteria. Services added on a temporary, Category 3 basis will ultimately need to meet the criteria under Category 1 or 2 in order to be permanently added to the Medicare telehealth services list. To add specific services on a Category 3 basis, we conducted a clinical assessment to identify those services for which we could foresee a reasonable potential likelihood of clinical benefit when furnished via telehealth. We considered the following factors:

++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns for patient safety if the service is furnished as a telehealth service.

++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns about whether the provision of the service via telehealth is likely to jeopardize quality of care.

++ Whether all elements of the service could fully and effectively be performed by a remotely located clinician using two-way, audio/video telecommunications technology.

In the CY 2021 PFS final rule (85 FR 84507), we also temporarily added several services to the Medicare

telehealth services list using the Category 3 criteria described above. In this final rule, we are considering additional requests to add services to the Medicare telehealth services list on a Category 3 basis using the previously described Category 3 criteria.

The Medicare telehealth services list, including the additions described later in this section, is available on the CMS website at *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html.*

Beginning in CY 2019, we stated that for CY 2019 and onward, we intend to accept requests through February 10, consistent with the deadline for our receipt of code valuation recommendations from the RUC (83 FR 59491). For CY 2022, requests to add services to the Medicare telehealth services list must have been submitted and received by February 10, 2021. Each request to add a service to the Medicare telehealth services list must have included any supporting documentation the requester wishes us to consider as we review the request. Because we use the annual PFS rulemaking process as the vehicle to make changes to the Medicare telehealth services list, requesters are advised that any information submitted as part of a request is subject to public disclosure for this purpose. For more information on submitting a request in the future to add services to the Medicare telehealth services list, including where to mail these requests, see our website at *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html.*

b. Requests To Add Services to the Medicare Telehealth Services List for CY 2022

Under our current policy, we add services to the Medicare telehealth services list on a Category 1 basis when we determine that they are similar to services on the existing Medicare telehealth services list for the roles of, and interactions among, the beneficiary, physician (or other practitioner) at the distant site and, if necessary, the telepresenter. As we stated in the CY 2012 PFS final rule with comment period (76 FR 73098), we believe that the Category 1 criteria not only streamline our review process for publicly requested services that fall into this category, but also expedite our ability to identify codes for the Medicare telehealth services list that resemble those services already on the Medicare telehealth services list.

We received several requests to permanently add various services to the Medicare telehealth services list effective for CY 2022. We found that none of the requests we received by the February 10th submission deadline met our Category 1 or Category 2 criteria for permanent addition to the Medicare telehealth services list. The requested services are listed in Table 15.

BILLING CODE 4120–01–P

TABLE 15: Requests for Permanent Addition – Services Not Proposed for Addition

Service Type	HCPCS	Long Descriptor
Urodynamics	51741	Complex uroflowmetry (e.g., calibrated electronic equipment)
Biofeedback	90901	Biofeedback training by any modality
	90912	Biofeedback training, perineal muscles, anorectal or urethral sphincter, including EMG and/or manometry, when performed; initial 15 minutes of one-on-one physician or other qualified health care professional contact with the patient
	90913	Biofeedback training, perineal muscles, anorectal or urethral sphincter, including EMG and/or manometry, when performed; each additional 15 minutes of one-on-one physician or other qualified health care professional contact with the patient (List separately in addition to code for primary procedure)
Neurological & Psychological Testing	96130	Psychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report, and interactive feedback to the patient, family member(s) or caregiver(s), when performed; first hour
	96131	Psychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report, and interactive feedback to the patient, family member(s) or caregiver(s), when performed; each additional hour (List separately in addition to code for primary procedure)
	96132	Neuropsychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report, and interactive feedback to the patient, family member(s) or caregiver(s), when performed; first hour
	96133	Neuropsychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report, and interactive feedback to the patient, family member(s) or caregiver(s), when performed; each additional hour (List separately in addition to code for primary procedure)
	96136	Psychological or neuropsychological test administration and scoring by physician or other qualified health care professional, two or more tests, any method; first 30 minutes
	96137	Psychological or neuropsychological test administration and scoring by physician or other qualified health care professional, two or more tests, any method; each additional 30 minutes (List separately in addition to code for primary procedure)
	96138	Psychological or neuropsychological test administration and scoring by technician, two or more tests, any method; first 30 minutes
	96139	Psychological or neuropsychological test administration and scoring by technician, two or more tests, any method; each additional 30 minutes (List separately in addition to code for primary procedure)
Therapy Procedures	97110	Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility
	97112	Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities
	97116	Therapeutic procedure, 1 or more areas, each 15 minutes; gait training (includes stair climbing)
	97150	Therapeutic procedure(s), group (2 or more individuals)
Physical Therapy Evaluations	97161	Physical therapy evaluation: low complexity, requiring these components: A history with no personal factors and/or comorbidities that impact the plan of care; An examination of body system(s) using standardized tests and measures addressing 1-2 elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with stable and/or uncomplicated characteristics; and Clinical decision making of low complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 20 minutes are spent face-to-face with the patient and/or family.
	97162	Physical therapy evaluation: moderate complexity, requiring these components: A history of present problem with 1-2 personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures in addressing a total of 3 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; An evolving clinical presentation with changing characteristics; and Clinical decision making of moderate complexity using standardized patient assessment instrument and/or measurable

Service Type	HCPCS	Long Descriptor
		assessment of functional outcome. Typically, 30 minutes are spent face-to-face with the patient and/or family.
	97163	Physical therapy evaluation: high complexity, requiring these components: A history of present problem with 3 or more personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures addressing a total of 4 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with unstable and unpredictable characteristics; and Clinical decision making of high complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 45 minutes are spent face-to-face with the patient and/or family.
	97164	Re-evaluation of physical therapy established plan of care, requiring these components: An examination including a review of history and use of standardized tests and measures is required; and Revised plan of care using a standardized patient assessment instrument and/or measurable assessment of functional outcome Typically, 20 minutes are spent face-to-face with the patient and/or family.
Therapy Procedures	97530	Therapeutic activities, direct (one-on-one) patient contact (use of dynamic activities to improve functional performance), each 15 minutes
Therapy Personal Care	97535	Self-care/home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of assistive technology devices/adaptive equipment) direct one-on-one contact, each 15 minutes
	97537	Community/work reintegration training (e.g., shopping, transportation, money management, avocational activities and/or work environment/modification analysis, work task analysis, use of assistive technology device/adaptive equipment), direct one-on-one contact, each 15 minutes
	97542	Wheelchair management (e.g., assessment, fitting, training), each 15 minutes
Therapy Tests and Measurements	97750	Physical performance test or measurement (e.g., musculoskeletal, functional capacity), with written report, each 15 minutes
	97755	Assistive technology assessment (e.g., to restore, augment or compensate for existing function, optimize functional tasks and/or maximize environmental accessibility), direct one-on-one contact, with written report, each 15 minutes
	97763	Orthotic(s)/prosthetic(s) management and/or training, upper extremity(ies), lower extremity(ies), and/or trunk, subsequent orthotic(s)/prosthetic(s) encounter, each 15 minutes
Personal Care	98960	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient
	98961	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 2-4 patients
	98962	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 5-8 patients
Evaluative and Therapeutic Services	92607	Evaluation for prescription for speech-generating augmentative and alternative communication device, face-to-face with the patient; first hour
	92608	Evaluation for prescription for speech-generating augmentative and alternative communication device, face-to-face with the patient; each additional 30 minutes (List separately in addition to code for primary procedure)
	92609	Therapeutic services for the use of speech-generating device, including programming and modification

BILLING CODE 4120–01–C

We remind stakeholders that the criterion for adding services to the Medicare telehealth list under Category 1 is that the requested services are similar to professional consultations, office visits, and office psychiatry services that are currently on the Medicare telehealth services list, and that the criterion for adding services under Category 2 is that there is evidence of clinical benefit if provided as telehealth. As explained below, we find that none of the requested services met the Category 1 criterion.

We received a request to permanently add CPT code 51741 (*Complex uroflowmetry* (*e.g., calibrated electronic equipment*)) to the Medicare telehealth services list. This CPT code describes the acquisition of uroflowmetric information and analysis of that information. The code includes a technical component and a professional component. The technical component describes the acquisition of the uroflowmetric information when billed as a standalone service. The professional component describes the analysis for the uroflowmetric information when it is billed as a standalone service. As we have explained in previous rulemaking (see 83 FR 59483), the remote interpretation of diagnostic tests is not considered to be a telehealth service under section 1834(m) of the Act or our regulation at § 410.78. We do not believe that the technical component, which includes acquisition of the uroflowmetric information, will meet the criterion to

be added on a Category 1 basis, because it is not similar to other services on the Medicare telehealth list. Moreover, we do not believe the uroflowmetric information can be accurately and effectively collected using two-way, audio/video communications technology to the degree that will make the results clinically useful. We believe the patient would need to be in the same location as the equipment; thus, making it impracticable to achieve via telehealth. Due to these concerns, we do not believe that the submitted information demonstrates sufficient clinical benefit to support the addition of CPT code 51741 to the Medicare telehealth services list.

We received a request to permanently add several biofeedback, services, CPT codes 90901, 90912, and 90913, to the Medicare telehealth services list. We do not believe these services are similar to Category 1 services on the Medicare telehealth list in that these services describe the application of electrodes directly to the patient's skin and using them to monitor the patient's response. Therefore, we do not believe they meet the criterion for addition to the Medicare telehealth services list on a Category 1 basis. We also believe that proper application of electrodes and monitoring of the patient's response would require the furnishing practitioner to be in the same physical location as the beneficiary. As such, we do not believe these services meet the criteria for addition to the Medicare telehealth list on a Category 2 basis. When we reviewed these biofeedback services on a Category 2 basis, we found that the information supplied with the requests was not detailed enough to determine if the objective functional outcomes (that is, Activities of Daily Living (ADLs) and Instrumental Activities of Daily Living (IADLs) of the telehealth patients) were similar to that of patients treated in person. Moreover, we believe that the ADLs/IADLs alone are not sufficient to determine if these services, when performed via telehealth, demonstrate a clinical benefit to a patient. We request that stakeholders supply a more comprehensive set of objective data in order to fully illustrate any benefits, to better enable us to evaluate all outcomes.

We received requests to permanently add Neuropsychological/Psychological Testing services, CPT codes 96130–96133 and 96136–96139, to the Medicare telehealth services list. We separately reviewed each of the services in these two code families. In prior years' rulemaking, we have declined to add these services on a Category 1 basis because, in contrast to other services on the telehealth list, these services require close observation by the furnishing practitioner to monitor how a patient responds and progresses through the testing (see 81 FR 80197). We continue to believe that this is the case. All of these codes describe services that involve a very thorough observation and testing process, and require the tester to observe the following: Speed of responses; the ability to adjust focus; written, sometimes manual tasks; following tasks that display the patients' visuospatial mapping abilities, pattern recognition, abstraction, calculation—all while appreciating that the patient may be distracted or aided by environmental cues. The tester must also maintain some subjective amount of flexibility to allow the patient to be in their environment. Additionally, the tester has to maintain professional scrutiny through dynamic tasks. Given all of the above, remote observation by the furnishing practitioner to accomplish the testing in question seems impractical and potentially creates the risk of inaccuracies in diagnosis and subsequent treatment. We note that the information supplied by stakeholders did not address these concerns, and as such, we have concerns over patient safety and the ability of these services to be accurately and thoroughly performed via telehealth to demonstrate a clinical benefit to Medicare beneficiaries. Therefore, we do not believe these services meet the Category 2 criteria for permanent addition to the Medicare telehealth list of services. Consequently, we did not propose to add these services to the Medicare telehealth services list. We encourage stakeholders to submit information addressing the concerns we have stated in any future requests to have these services added to the Medicare telehealth list of services.

We received requests to add Therapy Procedures, CPT codes 97110, 97112, 97116, 97150, and 97530; Physical Therapy Evaluations, CPT codes 97161–97164; Therapy Personal Care services, CPT codes 97535, 97537, and 97542; and Therapy Tests and Measurements services, CPT codes 97750, 97755, and 97763, to the Medicare telehealth services list. In the CY 2017 PFS final rule (81 FR 80198), we noted that section 1834(m)(4)(E) of the Act specifies the types of practitioners who may furnish and bill for Medicare telehealth services as those practitioners under section 1842(b)(18)(C) of the Act. Physical therapists (PTs), occupational therapists (OTs), and speech-language pathologists (SLPs) are not among the practitioners identified in section 1842(b)(18)(C) of the Act. We also stated in the CY 2017 PFS final rule that, because these services are predominantly furnished by PTs, OTs, and SLPs, we did not believe it would be appropriate to add them to the Medicare telehealth services list at that time. In a subsequent request to consider adding these services for 2018, the original requester suggested that we might propose these services be added to the Medicare telehealth services list so that payment can be made for them when furnished via telehealth by physicians or practitioners who can serve as distant site practitioners. We stated that, since the majority of the codes are furnished over 90 percent of the time by therapy professionals who are not included on the statutory list of eligible distant site practitioners, we believed that adding therapy services to the Medicare telehealth services list could result in confusion about who is authorized to furnish and bill for these services when furnished via telehealth. We continue to believe this to be true; however, we reviewed each therapy service separately, and have categorized them together here for convenience as the same set of information accompanied the request for each of these services.

We determined that these services did not meet the Category 1 criteria for addition to the Medicare telehealth services because they are therapeutic in nature and in many instances involve direct physical contact between the practitioner and the patient. In assessing the evidence that was supplied by stakeholders in support of adding these services to the Medicare telehealth services list on a Category 2 basis, we concluded that it did not provide sufficient detail to determine whether all of the necessary elements of the service could be furnished remotely, and whether the objective functional outcomes of ADL and IADL for the telehealth patients were similar to those of patients receiving the services in person. As we stated above when discussing the request to add certain biofeedback services to the telehealth list, we do not believe ADLs and IADLS alone are sufficient to demonstrate clinical benefit to a Medicare beneficiary. We have enumerated above some examples of the types of clinical benefits we will consider when evaluating services using the Category 2 criterion.

Therefore, we do not believe the supplied information demonstrates that the services meet either the Category 1 or the Category 2 criteria. We did not propose to add these services to the Medicare telehealth services list. We

continue to encourage commenters to supply sufficient data for us to be able to see all measurements/parameters performed, so that we may evaluate all outcomes.

We received requests to add the services in Table 16, and we note that these services are generally not separately payable under the Medicare PFS. Given that these services are not separately payable when furnished in-person, they likewise will not be separately payable when furnished as telehealth. Section 1834(m)(2)(A) of the Act provides that payment for a service when furnished as a telehealth services is equal to the payment when the service is furnished in person. CPT code 90849 has a restricted payment status, indicating that claims must be adjudicated on a case-by-case basis when furnished in-person. Accordingly, any separate payment for that service will require special consideration and not be routine. Therefore, we do not believe this service should be added to the Medicare telehealth list. CPT codes 98960–98962 are bundled services, and therefore, payment for these services is always bundled into payment of other services. For that reason, we did not propose to add them to the Medicare list of telehealth services.

BILLING CODE 4120–01–P

TABLE 16: Requests for Permanent Addition—Services with Non-paid Status Not Proposed for Addition

Service Type	HCPCS	Long Descriptor	Medicare Payment Status Indicator
Psychotherapy	90849	Multiple-family group psychotherapy	R (Restricted)
Education and Training for Patient Self-Management	98960	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient	B (Bundled)
	98961	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 2-4 patients	
	98962	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 5-8 patients	

BILLING CODE 4120–01–C

We received requests to temporarily add Neurostimulators, CPT codes 95970–95972, and Neurostimulators, Analysis-Programming services, CPT codes 95983 and 95984, to the Medicare telehealth services list using the Category 3 criteria (see Table 17). In their submission, the requestor noted they would conduct a future study and would submit the study data to CMS at a later date. These services are on the expanded telehealth services list for the PHE, but were not added by CMS on a category 3 basis in the CY 2021 PFS final rule. We do not yet have sufficient information to adjudicate whether these services are likely to meet the category 1 or category 2 criteria given additional time on the Medicare telehealth services list, without having evaluated the full data, and we encourage commenters to submit all available information, when available, for future consideration. As a result, we did not propose to add these services to the Medicare telehealth list of services on a Category 3 basis at this time.

TABLE 17: Requests for Temporary Addition – Services Not Proposed for Addition

Service Type	HCPCS	Long Descriptor
Neurostimulators	95970	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain, cranial nerve, spinal cord, peripheral nerve, or sacral nerve, neurostimulator pulse generator/transmitter, without programming
	95971	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with simple spinal cord or peripheral nerve (e.g., sacral nerve) neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional
	95972	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with complex spinal cord or peripheral nerve (e.g., sacral nerve) neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional
Neurostimulators, Analysis-Programming	95983	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, first 15 minutes face-to-face time with physician or other qualified health care professional
	95984	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, each additional 15 minutes face-to-face time with physician or other qualified health care professional (List separately in addition to code for primary procedure)

We received public comments on the requests to add services to the Medicare telehealth services list. The following is a summary of the comments we received and our responses.

Comment: Commenters expressed disappointment that CMS did not propose to add Neurostimulators, CPT codes 95970–95972, and Neurostimulators, Analysis-Programming services, CPT codes 95983 and 95984, to the Medicare telehealth services list on a Category 3 basis. Commenters stated that, by not adding these services to the Medicare telehealth list on a Category 3 basis, CMS is risking disruption of care for patients who may have become accustomed to receiving these services as telehealth during the PHE.

Some commenters requested that CMS add all codes that were added to the Medicare telehealth services list on an interim basis (in response to the PHE for COVID–19) to the Medicare telehealth list on a Category 3 basis (Table 18), but these commenters did not provide any additional clinical information.

Many commenters opposed CMS' decision not to add CPT codes describing therapy services permanently to the list of Medicare telehealth services. They stated that adding these CPT codes to the list of covered telehealth services would better ensure a seamless transition if additional practitioners, such as physical therapists, become eligible to furnish and bill for telehealth services under Medicare.

Some commenters stated that CMS should maintain payment for Medicare telehealth services at the non-facility, rather than facility payment rates.

Response: We added services temporarily to the Medicare telehealth services list on an emergency basis to allow practitioners and beneficiaries to have access to medically necessary care while avoiding both risk for infection and further burdening healthcare settings during the PHE for COVID–19. The comments provided did not include sufficient clinical information to support adding these services to the telehealth services list. Absent additional clinical information from the commenters, we still believe that these services are not appropriate for addition on either a permanent or Category 3 basis; however, we are continuing to collect information on the use of these services during the PHE for COVID–19, and we invite stakeholders to provide additional information and to submit requests for addition to the telehealth list through our usual process. With regard to the comment requesting Medicare telehealth payment at the non-facility versus facility rate, we refer readers to discussion of this issue in the CY 2017 PFS final rule (81 FR 80199–

80201). Payment for telehealth services using the facility PE RVUs is consistent with our belief that the direct practice expense costs are generally incurred at the originating site where the beneficiary is located, and not by the distant site practitioner. With respect to commenters' concerns about potential disruption of care, we do not agree that this will occur. These services have been included on the Medicare telehealth services list only in response to the PHE for COVID–19. We believe patients and practitioners have a longstanding history of in-person delivery of care. We anticipate that the end of the PHE will not be declared abruptly, and note that healthcare has already begun to transition back to typical, in-person delivery.

After consideration of public comments, we are finalizing our proposal not to add the aforementioned codes to the telehealth list.

c. Revised Timeframe for Consideration of Services Added to the Telehealth List on a Temporary Basis

In the CY 2021 PFS final rule (85 FR 84506), in response to the PHE for COVID–19, we created a third category of criteria for adding services to the Medicare telehealth services list on a temporary basis. We included in this category the services that were added during the PHE for COVID–19 for which we believed there is likely to be clinical benefit when furnished via telehealth, but for which there is not yet sufficient evidence available to consider the services as permanent additions under Category 1 or Category 2 criteria. We recognized that the services we added on a temporary basis under Category 3 will ultimately need to meet the criteria under Categories 1 or 2 in order to be permanently added to the Medicare telehealth services list, and that there was a potential for evidence development that could continue through the Category 3 temporary addition period. We also stated that any service added on a temporary basis under Category 3 will remain on the Medicare telehealth services list through the end of the calendar year in which the PHE for COVID–19 ends.

We added 135 services to the Medicare telehealth list in CY 2020 on an interim basis in response to the PHE for COVID–19 through the interim final rule with comment period (IFC) (March 31st COVID–19 IFC (85 FR 19234–19243) and the subregulatory process established in the May 8th COVID–19 IFC (85 FR 27550–27649). Since the publication of the May 8th COVID–19 IFC, we have added several services to the Medicare telehealth list of services using this subregulatory process (please see *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/Telehealth-Codes* for the list of codes available for telehealth under the PFS). As discussed in the CY 2021 PFS final rule (FR 85 84507), at the conclusion of the PHE for COVID–19, associated waivers and interim policies will expire, payment for Medicare telehealth services will once again be limited by the requirements of section 1834(m) of the Act, and we will return to the policies established through the regular notice-and-comment rulemaking process, including the previously established Medicare telehealth services list, as modified by subsequent changes in policies and additions to the telehealth services list adopted through rulemaking. Many services that were temporarily added on an interim basis during the PHE for COVID–19 will not be continued on the list after the end of the PHE for COVID–19.

Numerous stakeholders have continued to note that there is uncertainty about when the PHE for COVID–19 may end, and express concerns that the services added to the telehealth list on a temporary basis could be removed from the list before practitioners have had time to compile and submit evidence to support the permanent addition of these services on a Category 1 or Category 2 basis. To respond to these continuing concerns, we proposed to revise the timeframe for inclusion of the services we added to the Medicare telehealth services list on a temporary, Category 3 basis. Extending the temporary inclusion of these, Category 3 services on the telehealth list will allow additional time for stakeholders to collect, analyze, and submit data on those services to support their consideration for permanent addition to the list on a Category 1 or Category 2 basis.

We proposed to retain all services added to the Medicare telehealth services list on a Category 3 basis until the end of CY 2023. We noted that this proposal would allow us time to collect more information regarding utilization of these services during the pandemic, and provide stakeholders the opportunity to continue to develop support for the permanent addition of appropriate services to the telehealth list through our regular consideration process, which includes notice-and-comment rulemaking. By keeping these services on the Medicare telehealth services list through CY 2023, we will facilitate the submission of requests to add services permanently to the Medicare telehealth services list for consideration in the CY 2023 PFS rulemaking process and for consideration in the CY 2024 PFS rule.

We recognize that, during the time between the publication of the CY 2021 PFS final rule and this final rule, practitioners may have used that time to compile new evidence of clinical benefit to support addition to the Medicare telehealth services list on a Category 3 basis, including information that suggests that a certain service will likely meet the Category 1 or Category 2 criteria if provided with more time. We solicited comment on whether any of the services that were added to the Medicare telehealth list for the duration of the PHE for COVID–19 should now be added to the Medicare telehealth list on a Category 3 basis, to allow for additional data collection for submission for CMS to consider as part of the rulemaking process described in prior paragraphs.

We received public comments on the proposed revised timeframe for consideration of services added to the telehealth list on a temporary basis and our comment solicitation on any additional services we should consider under Category 3 criteria. The following is a summary of the comments we received and our responses.

Comment: Commenters supported our proposal to maintain services temporarily added to the Medicare telehealth services list on a Category 3 basis through the end of CY 2023. Commenters stated that by extending the inclusion of these services on the telehealth services list through a set date that is not linked to the end of the PHE, CMS is eliminating the unnecessary suspense and confusion that would have come from a more abrupt change. Some commenters suggested that CMS extend the timeframe beyond the end of 2023, if the PHE is extended beyond that point.

Response: We appreciate commenters support for a more definitive timeframe for Category 3 codes to remain available on the Medicare telehealth services list. Consideration of any extensions at this time is outside the scope of this final rule.

Comment: Some commenters requested that CMS add certain therapy, audiology, and speech-language pathology services to the Medicare telehealth list on a Category 3 basis to facilitate the collection of information on how these services can be furnished via telehealth and so that these services may be furnished via telehealth outside of the PHE, billed incident to a physician's professional services. These commenters also suggested that this may also aid in CMS' efforts to continue to gather information on these services

when performed via telehealth. These commenters did not provide any additional clinical information to support their request.

Response: The commenters did not provide any additional clinical information with their request, especially clinical information that would satisfy our criteria for inclusion on the Medicare telehealth list, in any category. We are not finalizing addition of these services to the Medicare telehealth list.

Comment: Some commenters requested that CMS add CPT codes 93797 (Physician or other qualified health care professional services for outpatient cardiac rehabilitation; without continuous ECG monitoring (per session)) and 93798 (Physician or other qualified health care professional services for outpatient cardiac rehabilitation; with continuous ECG monitoring (per session)) and HCPCS codes G0422 (Intensive cardiac rehabilitation; with or without continuous ecg monitoring with exercise, per session) and G0423 (Intensive cardiac rehabilitation; with or without continuous ecg monitoring; without exercise, per session) to the Medicare telehealth list on a Category 3 basis. These commenters provided a number of studies on the safety and efficacy of at-home cardiac rehabilitation services.

Response: We agree with commenters that it would be appropriate to add CPT codes 93797 and 93798 and HCPCS codes G0422 and G0423 to the telehealth services list on a Category 3 basis. We also remind commenters that any services added on a Category 3 basis would ultimately need to meet the criteria for addition to the telehealth services list on either a Category 1 or 2 basis in order to be permanently added to the Medicare telehealth services list. In the future, we would expect to see evidence that the risk:benefit ratio of these services when provided via telehealth is clearly in favor of the patient and that the welfare of beneficiaries is not compromised nor are their outcomes diminished. We would also be interested in considering the patient characteristics which allow the treating practitioner to select the most appropriate recipients of these services via telehealth. As the evidence evolves on this subject matter, we welcome further discussion with stakeholders on this topic.

Comment: Many commenters requested that CPT codes 99441–99443 (Telephone evaluation and management services by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment) be added to the Medicare telehealth list on a Category 3 basis. The commenters noted that these codes could be used for mental health services and should be permanently available as part of the expansion of availability of mental health services via telehealth.

Response: We note that for services for the diagnosis, evaluation or treatment of mental health conditions, we are finalizing a policy to revise the definition of ''telecommunications system'' for purposes of section 1834(m) of the Act to allow the use of audio-only technology under certain circumstances, described in detail below, that will allow visits and others services furnished via audio-only technology to be reported as telehealth services with the appropriate modifier. For example, the office/outpatient E/M codes are on the telehealth list permanently and when used to describe care for mental health conditions, will be reportable when furnished via audio-only technology to patients in their homes. Since audio-only telecommunications technology can be used to furnish mental health telehealth services to patients in their homes, the addition of these codes to the telehealth services list is unnecessary for mental health telehealth services. For telehealth services other than mental health care, we continue to believe that two-way, audio/video communications technology is the appropriate, general standard that will apply for telehealth services after the PHE, so we do not believe it would be appropriate for these codes to remain on the telehealth list after the end of the PHE.

After consideration of public comments, we are finalizing as proposed the revised timeframe for inclusion of the services we added to the Medicare telehealth services list on a temporary, Category 3 basis. We will retain all services added to the Medicare telehealth services list on a Category 3 basis until the end of CY 2023. Additionally, we are adding CPT codes 93797 and 93798 and HCPCS codes G0422 and G0423 to the Category 3 Medicare telehealth services list. These services appear on the list of telehealth services on the CMS telehealth website at *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html* with a status of ''Available through December 31, 2023.''

d. Implementation of Provisions of the Consolidated Appropriations Act, 2021 (CAA)

The Consolidated Appropriations Act, 2021 (CAA) (Pub. L. 116–260, December 27, 2020) included a number of provisions pertaining to Medicare telehealth services. The Medicare telehealth statute at section 1834(m)(4)(C) of the Act generally limits the scope of telehealth services to those furnished in rural areas and in certain enumerated types of ''originating sites'' including physician offices, hospitals, and other medical care settings. Section 1834(m)(7) of the Act, (as added by section 2001(a) of the SUPPORT for Patients and Communities Act (Pub. L. 115–271, October 24, 2018), specifies that the geographic restrictions under section 1834(m)(4)(C)(i) of the Act do not apply, and includes the patient's home as a permissible originating site, for telehealth services furnished to a patient with a diagnosed substance use disorder (SUD) for treatment of that disorder or a co-occurring mental health disorder. Section 123(a) of Division CC of the CAA amended section 1834(m)(7)(A) of the Act to broaden the scope of services for which the geographic restrictions under section 1834(m)(4)(C)(i) of the Act do not apply and for which the patient's home is a permissible originating site to include telehealth services furnished for the purpose of diagnosis, evaluation, or treatment of a mental health disorder, effective for services furnished on or after the end of the PHE for COVID–19.[1]

Section 123(a) of the CAA also added subparagraph (B) to section 1834(m)(7) of the Act to prohibit payment for a telehealth service furnished in the patient's home under paragraph (7) unless the physician or practitioner furnishes an item or service in-person, without the use of telehealth, within 6 months prior to the first time the physician or practitioner furnishes a telehealth service to the beneficiary, and thereafter, at such times as the Secretary determines appropriate. However, section 123(a) of the CAA added a clarification at section 1834(m)(7)(B)(ii) of the Act that the periodic requirement for an in-person item or service does not apply if payment for the telehealth service furnished would have been allowed without the new amendments. As such, the requirement for a periodic

[1] We note that neither the SUPPORT Act nor the CAA amended section 1862 of the Act. Section 1862(a)(4) of the Act and our corresponding regulation at 42 CFR 411.9 prohibit Medicare payment for services that are not furnished within the United States. Both the originating site and the distant site are subject to the statutory payment exclusion.

in-person item or service applies only for telehealth services furnished for purposes of diagnosis, evaluation, or treatment of a mental health disorder other than for treatment of a diagnosed SUD or co-occurring mental health disorder, and only in locations that do not meet the geographic requirements in section 1834(m)(4)(C)(i) of the Act or when the originating site is the home of the patient, regardless of geography. We solicited comments on whether we should adopt a claims-based mechanism to distinguish between the mental health telehealth services that are within the scope of the CAA amendments and those that are not (in other words, the services for which payment was newly authorized by the CAA amendments, and those for which payment was authorized before the CAA amendments), and if so, what that mechanism should be. In the event that we need to distinguish between the mental health telehealth services that are within the scope of the CAA amendments and those that are not, we also solicited comments on whether a clarification should be added to the regulation at § 410.78 as follows (which will take into account the other amendments we proposed to § 410.78):

The requirement that the physician or practitioner must furnish an item or service in person, without the use of telehealth, within a specified time frame shall not apply to telehealth services furnished for treatment of a diagnosed substance use disorder or co-occurring mental health disorder, or to services furnished in an originating site described in paragraphs (b)(3)(i) through (viii) or (xiii) that meets the geographic requirements specified in paragraph (b)(4) other than paragraph (b)(4)(iv)(D).

As we noted above, section 123(a) of the CAA amends section 1834(m)(7)(B)(i)(I) of the Act to prohibit payment for telehealth services under that paragraph unless the physician or practitioner furnished an item or service to the patient in person, without the use of telehealth, within 6 months before the first telehealth service. Thereafter, section 1834(m)(7)(B)(i)(II) of the Act leaves the Secretary discretion to specify the times or intervals at which an in-person, non-telehealth service is required as a condition of payment for these telehealth services. Therefore, in order to implement the new statutory requirement to specify when an in-person service is required, we proposed that, as a condition of payment for a mental health telehealth service described in section 1834(m)(7)(A) of the Act other than services described in section 1834(m)(7)(B)(ii) of the Act (that is, services for which payment was authorized before the CAA amendments), the billing physician or practitioner must have furnished an in-person, non-telehealth service to the beneficiary within the 6-month period before the date of the telehealth service.

We also solicited comments on whether the required in-person, non-telehealth service could also be furnished by another physician or practitioner of the same specialty and same subspecialty within the same group as the physician or practitioner who furnishes the telehealth service. We note that the language in the CAA states that the physician or practitioner furnishing the in-person, non-telehealth service must be the same person as the practitioner furnishing the telehealth service. There are several circumstances, however, under which we have historically treated the billing practitioner and other practitioners of the same specialty or subspecialty in the same group as if they were the same individual. For instance, for purposes of deciding whether a patient is a new or established patient, or whether to bill for initial or subsequent visit, practitioners of the same specialty/subspecialty in the same group are treated as the same person. For example, when Physician A and Physician B are of the same specialty and subspecialty and in the same group, if Physician A furnishes an initial critical care service to a patient, and Physician B subsequently furnishes additional critical care services to the same beneficiary for the same condition on the same day, Physician B will bill for a subsequent critical care service rather than an initial critical care visit. As we explain in section II.F of this final rule, because practitioners in the same specialty and same group often cover for one another to provide concurrent services, we believe the total time for critical care services furnished to a patient on the same day by the practitioners in the same group with the same specialty should be reflected as if it were a single set of critical care services furnished to the patient. See section II.F.2 of this final rule for further discussion of our current policies for billing critical care services. Similarly, if Physician A furnished a service to a patient, and then Physician B furnished a service to the patient a few months later, that patient will be considered an established patient with respect to both Physician A and Physician B. For example, Physician B could initiate care management services for the patient as an established patient. An example of guidance to this effect can be found in the Medicare Claims Processing Manual (IOM Pub. 100–04, Chapter 12, § 30.6.7), which defines ''new patient'' as a patient who has not received any professional services, that is, E/M service or other face-to-face service (for example, surgical procedure) from the physician or physician group (same physician specialty) within the previous 3 years, for E/M services.

We note that this manual provision is also consistent with CPT guidance on whether a patient is a new or established patient.[2]

We solicited comments regarding the extent to which a patient routinely receiving mental health services from one practitioner in a group might have occasion to see a different practitioner of the same specialty in that group for treatment of the same condition. This might occur when practitioners in a group cover for each other when a particular practitioner is unavailable or when a practitioner has left the group, but the beneficiary continues to receive services furnished by the group. In addition, fee-for-time compensation arrangements (formerly referred to as locum tenens arrangements), as described in section 1842(b)(6)(D) of the Act, allow for payment to be made to a physician for physicians' services (and services furnished incident to such services) furnished by a second physician to patients of the first physician if the first physician is unavailable to provide the services, and the services are furnished pursuant to an arrangement that is either informal and reciprocal, or involves per diem or other fee-for-time compensation for such services.

Recognizing the importance of ensuring access to mental health telehealth services for beneficiaries who are unable to see the same practitioner who furnished the prerequisite in-person services due to the practitioner's unavailability, we solicited comments on an alternative policy to also allow the prerequisite in-person, non-telehealth service for certain mental health telehealth services to be furnished by a practitioner in the same specialty/subspecialty in the same group when the physician or practitioner who furnishes the telehealth service is unavailable or the two professionals are practicing as a team.

As amended by the CAA, section 1834(m)(7)(B)(i)(II) of the Act specifies that for subsequent mental health telehealth service, an in-person, non-telehealth service is required at such

[2] American Medical Association. (2020). *CPT 2021 professional edition*. Chicago, Ill.: American Medical Association.

times as the Secretary determines appropriate. We proposed to require that an in-person, non-telehealth service must be furnished by the physician or practitioner at least once within 6 months before each telehealth service furnished for the diagnosis, evaluation, or treatment of a mental health disorder by the same practitioner, other than for treatment of a diagnosed SUD or co-occurring mental health disorder, and that the distinction between the telehealth and non-telehealth services must be documented in the patient's medical record. We are clarifying here that, consistent with the conditions specified in section 1834(m)(7)(B)(i) of the Act, the in-person non-telehealth service requirements apply only to telehealth services furnished to a patient in a home originating site. We distinguish between mental health services furnished for a diagnosed SUD or co-occurring mental health disorder and those furnished to beneficiaries without a SUD diagnosis on the basis of ICD–10 diagnosis codes included on claims when the services are billed. We chose this interval because we are concerned that an interval less than 6 months may impose potentially burdensome travel requirements on the beneficiary, but that an interval greater than 6 months could result in the beneficiary not receiving clinically necessary in-person care/observation. The 6-month interval also matches the specified statutory interval for the initial telehealth service. We believe that a 6-month interval strikes an appropriate balance between these competing considerations, but solicited comments on whether a different interval, whether shorter, such as 3–4 months or longer, such as 12 months, may be appropriate to balance program integrity and patient safety concerns with increased access to care. We noted, however, that regardless of the time interval we establish, the practitioner is not precluded from scheduling in-person visits at a more frequent interval, should such visit be determined to be clinically appropriate or preferred by the patient.

As discussed below in this section of this final rule, ''e. Payment for Medicare Telehealth Services Furnished Using Audio-Only Communications Technology,'' we proposed to revise our regulatory definition of ''interactive telecommunications system'' to permit use of audio-only communications technology for mental health telehealth services under certain conditions when provided to beneficiaries located in their home. Therefore, we solicited comments on whether it would be appropriate to establish a different interval for these telehealth services, for the diagnosis, evaluation, or treatment of mental health disorders, other than for treatment of diagnosed SUD or co-occurring mental health disorder, when furnished as permitted through audio-only communications technology.

In any event, we proposed that there would need to be an in-person visit within 6 months of any telehealth service furnished for the diagnosis, evaluation, or treatment of mental health disorders (other than for treatment of a diagnosed SUD or co-occurring mental health disorder), and the in-person visit would need to be documented in the patient's medical record. Payment would not be made for these telehealth services unless the required in-person service was furnished within 6 months of the telehealth service.

Given the addition of the home of the individual as a permissible originating site for telehealth services for purposes of diagnosis, evaluation, or treatment of a mental health disorder, we proposed to revise our regulation at § 410.78(b)(3) to add a new paragraph (xiv) to identify the home of a beneficiary as an originating site for telehealth services for the diagnosis, evaluation, or treatment of a mental health disorder, effective for services furnished on or after the first day after the end of the PHE as defined § 400.200 of our regulations; and to provide that payment will not be made for a telehealth service furnished under this paragraph unless the physician or practitioner has furnished an item or service in person, without the use of telehealth, for which Medicare payment was made (or would have been made if the patient were entitled to, or enrolled for, Medicare benefits at the time the item or service is furnished) within 6 months of the telehealth service. We also proposed to revise our regulation at § 410.78(b)(4)(iv)(D) to specify that the geographic restrictions in § 410.78(b)(4) do not apply to telehealth services furnished for the diagnosis, evaluation, or treatment of a mental health disorder, effective for services furnished on or after the first day after the end of the PHE as defined in our regulation at § 400.200.

In addition, section 125(c) of the CAA amended section 1834(m)(4)(C)(ii) of the Act to add to the list of permissible telehealth originating sites a rural emergency hospital, which is a new Medicare provider type added by section 125 of the CAA effective beginning in CY 2023.

We also proposed to amend our regulation at § 410.78, Telehealth services, to conform with the statutory change to include rural emergency hospitals as telehealth originating sites beginning in CY 2023. In accordance with section 1834(m)(4)(C)(ii)(XI) of the Act, as added by section 125(c) of the CAA, we proposed to revise § 410.78(b)(3) of our regulations to add a rural emergency hospital, as defined in section 1861(kkk)(2) of the Act, as a permissible originating site for telehealth services furnished on or after January 1, 2023.

We received public comments on the implementation of provisions of the CAA, 2021. The following is a summary of the comments we received and our responses.

Comment: Commenters generally supported our proposals to implement sections 123 and 125 of the CAA, 2021.

Many commenters opposed our proposal to require an in-person, non-telehealth visit every 6 months for beneficiaries receiving mental health telehealth services in their home under the amendments made by section 123 of the CAA, 2021. They opined that requiring another in-person visit would be excessive and limit access to services, particularly given the ongoing shortage of mental health practitioners, and that the telehealth practitioner should be able to use professional judgement as to when an in-person interaction is necessary. Some commenters also noted that, during the PHE for COVID–19, there have been no requirements for in-person visits, and this illustrates that the in-person requirement is unnecessary. Other commenters stated that if we do require a subsequent in-person, non-telehealth visit, then the required in-person visit interval should be extended as long as possible, for example at least 12 months. Some commenters also suggested, in keeping with the definition of an established patient, that if CMS were to implement a requirement for in-person services, they should consider an interval of once every 3 years. Other commenters suggested CMS implement a list of exceptions to any in-person visit requirement that could be noted in the medical record, and allow the patient to opt out of the requirement.

Some commenters, such as MedPAC, supported our proposal to require in-person, non-telehealth visits for beneficiaries receiving mental health services via telehealth, stating that this policy would help safeguard beneficiaries and the Medicare program from fraud. MedPAC also noted that this requirement may limit access to mental health services via telehealth, and encouraged CMS to study the impact of this policy and consider adjustments through future rulemaking. MedPAC

also recommended that CMS apply additional scrutiny to outlier clinicians who bill many more telehealth services per beneficiary than other clinicians or who bill for a high number of services in a week or a month, and prohibit ''incident to'' billing for telehealth services provided by any clinician who can bill Medicare directly.

Response: We appreciate the many comments and suggestions regarding our implementation of the amendments made by section 123 of the CAA, especially regarding the frequency with which a beneficiary receiving mental health services in their home through telehealth would need to receive an in-person, non-telehealth service. While we agree with MedPAC and others that requiring an in-person, non-telehealth service for beneficiaries receiving mental health services via telehealth in their home may help to safeguard beneficiaries and the Medicare program from possible program integrity issues we must balance those concerns with concerns raised by commenters about ensuring access to valuable (and underutilized) mental health services. We are also concerned about access to services, particularly given the ongoing shortage of mental health practitioners, and that there is not a ''one size fits all'' model in the management of mental health where some patients may require more frequent in-person visits and some may require less, which is also why we have an exceptions process. Therefore, in response to comments, we are finalizing an interval for the in-person visit requirement of 12 months, rather than the proposed 6-month timeframe.

We note that patients and practitioners should ultimately determine the cadence of meeting during the year, who may decide to meet more often than annually, which is permissible under our policy, as driven by clinical needs on a case-by-case basis. Further, the exceptions process will allow for situations where an in-person annual visit is not needed. CMS will monitor claims data regarding use of telehealth mental health services to identify areas for further investigation and to inform future rulemaking, including situations where there is evidence beneficiaries are potentially experiencing adverse health outcomes or increased difficulty accessing in-person care, or if inappropriate use or billing of telehealth mental health services is suspected.

We also agree with commenters that there may be specific circumstances when an in-person visit requirement within 12 months of each mental health telehealth service furnished in a beneficiary's home may be inadvisable or impracticable for an individual beneficiary. If the patient and practitioner consider the risks and burdens of an in-person service and agree that, on balance, these outweigh the benefits (such as the opportunity to assess in-person body language or conducting a physical exam to monitor for medication side effects), and the practitioner documents the basis for that decision in the patient's medical record, then the in-person visit requirement is not applicable for that 12-month period. Therefore, we are finalizing our proposed policy with a modification to require, in general, that after the first mental health telehealth service in the patient's home, there must be an in-person, non-telehealth service within 12 months of each mental health telehealth service—but to allow for limited exceptions to the requirement. Specifically, if the patient and practitioner agree that the benefits of an in-person, non-telehealth service within 12 months of the mental health telehealth service are outweighed by risks and burdens associated with an in-person service, and the basis for that decision is documented in the patient's medical record, the in-person visit requirement will not apply for that particular 12-month period. For example, situations in which the risks and burdens associated with an in-person service may outweigh the benefit could include, but are not limited to instances when an in-person service is likely to cause disruption in service delivery or has the potential to worsen the patient's condition(s). The risks and burdens associated with an in-person service could also outweigh the benefit if a patient is in partial or full remission and only requires a maintenance level of care. Other examples of such instances may include the clinician's professional judgement that the patient is clinically stable and/or that an in-person visit has the risk of worsening the patient's condition, creating undue hardship on self or family, or if it is determined that the patient is at risk for disengagement with care that has been effective in managing the illness. Practitioners must also document that the patient has the ability to obtain any needed point of care testing, including vital sign monitoring and laboratory studies. Practitioners must note the exception for any applicable 12-month interval. We note that there is no exception to the statutory requirement that the physician or practitioner must furnish to the beneficiary an in-person, non-telehealth service within 6 months prior to initiation of mental health services via telehealth.

Comment: Many commenters agreed with the alternative policy we considered to allow the required in-person, non-telehealth service to be furnished by another physician or practitioner of the same specialty and subspecialty in the same group as the practitioner who furnishes the mental health telehealth service to the beneficiary if the practitioner who furnishes the telehealth service is unavailable.

Response: We are adopting the alternative policy discussed in the proposed rule to allow a clinician's colleague in the same subspecialty in the same group to furnish the in-person, non-telehealth service to the beneficiary if the original practitioner is unavailable. This is also consistent with longstanding policy, which defines an established patient as an individual who receives professional services from the physician/NPP or another physician of the same specialty and subspecialty who belongs to the same group within the previous three years, for purposes of billing for E/M services.

Comment: A few commenters provided suggestions as to how CMS would distinguish between mental health services provided to beneficiaries in their homes via telehealth that co-occur with a SUD (and therefore, would not be subject to the requirement for an in-person, non-telehealth visit every 6 months) and those that are not co-occurring with a SUD. A few commenters stated that use of a mental health or behavioral health diagnosis code(s) on the claim (for which no substance use disorder code is reported), place of service is home, and for which modifier 95 is used would identify a mental health telehealth visit that is newly covered under the CAA.

Response: We will consider these suggestions and undertake future rulemaking as necessary. We note that we are not finalizing any changes to our policies regarding payment for telehealth services furnished for treatment of a patient with a diagnosed SUD or co-occurring mental health disorder, although we are clarifying that these telehealth services are considered mental health services for purposes of the audio-only policy we are finalizing as discussed in the section that follows below.

Comment: A few commenters requested that CMS implement a broad definition of the term ''home'' in terms of mental healthcare delivery site, as a strict definition would only serve to exacerbate existing socioeconomic barriers and reduce access to care for an already underserved and vulnerable patient population. For example, some

patients may not have access to traditional living space, as they may be living in places such as shelters and transitional housing or lack access to housing entirely. According to these commenters, requiring patients to access telehealth from their own residence creates an unnecessary barrier to telehealth services and may reinforce health inequities for individuals of lesser financial means. Commenters further pointed out that, for privacy reasons, a beneficiary may not be comfortable receiving mental health services in their home and may wish to receive mental health services in a temporary location, such as a car or other private location.

Response: Our definition of home, both in general and for this purpose, can include temporary lodging, such as hotels and homeless shelters. We clarify that for circumstances where the patient, for privacy or other personal reasons, chooses to travel a short distance from the exact home location during a telehealth service, the service is still considered to be furnished ''in the home of an individual'' for purposes of section 1834(m)(4)(C)(ii)(X) of the Act.

After consideration of public comments, we are finalizing the proposed amendments to our regulation at § 410.78, Telehealth services, to implement the amendments made by section 123 of the CAA as explained above, with some modifications. We are finalizing amendments to § 410.78(b)(3) and (4) to add the home of a beneficiary as an originating site for telehealth services for the diagnosis, evaluation, or treatment of mental health disorders, to specify that the geographic restrictions do not apply to these services, to add the conditions of payment requiring an in-person, non-telehealth visit within 6 months of the mental health telehealth service in the patient's home, and to add the exception for subsequent mental health telehealth services when the risks and burdens outweigh the benefits of this requirement. Specifically, we are modifying the proposed amendments to clarify that payment will not be made for a telehealth service furnished under § 410.78(b)(3)(xiv) unless the following conditions are met:

(1) The physician or practitioner has furnished an item or service in-person, without the use of telehealth, for which Medicare payment was made (or would have been made if the patient were entitled to, or enrolled for, Medicare benefits at the time the item or service is furnished) within 6 months prior to the initial telehealth service;

(2) The physician or practitioner has furnished an item or service in-person, without the use of telehealth, at least once within 6 months of each subsequent telehealth service described in this paragraph, with exceptions as noted above.

(3) The requirements of paragraph (2) may be met by another physician or practitioner of the same specialty and subspecialty in the same group as the physician or practitioner who furnishes the telehealth service, if the physician or practitioner who furnishes the telehealth service described under this paragraph is not available.

We are also finalizing our proposal to add a rural emergency hospital, as defined in section 1861(kkk)(2) of the Act, as a permissible originating site.

We are also clarifying that, as proposed, our definition of home can include temporary lodging such as hotels and homeless shelters as well as locations a short distance from the beneficiary's home.

e. Payment for Medicare Telehealth Services Furnished Using Audio-Only Communications Technology

Section 1834(m) of the Act outlines the requirements for Medicare payment for telehealth services that are furnished via a ''telecommunications system,'' and specifies that, only for purposes of Medicare telehealth services through a Federal telemedicine demonstration program conducted in Alaska or Hawaii, the term ''telecommunications system'' includes asynchronous, store-and-forward technologies. We further defined the term, ''telecommunications system,'' in the regulation at § 410.78(a)(3) to mean an interactive telecommunications system, which is defined as multimedia communications equipment that includes, at a minimum, audio and video equipment permitting two-way, real-time interactive communications between the patient and distant site physician or practitioner.

During the PHE for COVID–19, we used waiver authority under section 1135(b)(8) of the Act to temporarily waive the requirement, for certain behavioral health and/or counseling services and for audio-only evaluation and management (E/M) visits, that telehealth services must be furnished using an interactive telecommunications system that includes video communications technology. Therefore, for certain services furnished during the PHE for COVID–19, we make payment for these telehealth services when they are furnished using audio-only communications technology. Emergency waiver authority is no longer available after the PHE for COVID–19 ends, and telehealth services will again be subject to all statutory and regulatory requirements.

In the CY 2021 PFS final rule (85 FR 84535), we noted that we continued to believe that our longstanding regulatory definition of ''telecommunications system'' reflected the intent of statute and that the term should continue to be defined as including two way, real-time, audio/video communications technology.

Historically, we have not proposed any permanent modifications to the definition of ''interactive telecommunications system'' to allow for use of audio-only communications technology due to our interpretation of the statutory requirements, as well as concerns over program integrity and quality of care. Specifically, we were concerned that the use of audio-only communications technology for Medicare telehealth services could lead to inappropriate overutilization, and believed that video visualization of the patient generally was necessary to fulfill the full scope of service elements of the codes included on the Medicare telehealth list. We believe it is reasonable to reassess these concerns, given the now widespread utilization during the PHE for COVID–19 of Medicare telehealth services furnished using audio-only communications technology. Based upon an initial review of claims data collected during the PHE for COVID–19, which describe audio-only telephone E/M services, we observed that the audio-only E/M visits have been some of the most commonly performed telehealth services during the PHE, and that most of the beneficiaries receiving these services were receiving them for treatment of a mental health condition. Given the generalized shortage of mental health care professionals (*https://bhw.hrsa.gov/data-research/review-health-workforce-research*), and the existence of areas and populations where there is limited access to broadband due to geographic or socioeconomic challenges, we believe beneficiaries may have come to rely upon the use of audio-only communications technology in order to receive mental health services, and that a sudden discontinuation of this flexibility at the end of the PHE could have a negative impact on access to care.

As explained above, section 123 of the CAA removes the geographic restrictions for Medicare telehealth services for the diagnosis, evaluation, or treatment of a mental health disorder, and adds the patient's home as a permissible originating site for these telehealth services. We also believe that mental health services are different from

most other services on the Medicare telehealth services list in that many of the services primarily involve verbal conversation where visualization between the patient and furnishing physician or practitioner may be less critical to provision of the service. While we continue to believe that two-way, audio/video communications technology is the appropriate, general standard for telehealth services, and that there may be particular instances where visual cues may help a practitioner's ability to assess and treat patients with mental health disorders, especially where opioids or mental health medications are involved (for example, visual cues as to patient hygiene, or indicators of self-destructive behavior), we note that stakeholders have suggested to us that the availability of telehealth services for mental health care via audio-only communications technology will increase access to care. This is especially true in areas with poor broadband infrastructure and among patient populations that do not wish to use, do not have access to, and/or are unable to utilize devices that permit a two-way, audio/video interaction. Our preliminary analysis of Medicare claims data, as well as information provided to us by stakeholders on the popularity of these services, indicates that use of interactive communications technology for mental health care will likely continue to be high even beyond the circumstances of the COVID–19 pandemic. According to our analysis of Medicare Part B claims data for services furnished via Medicare telehealth during the PHE for COVID–19, utilization of telehealth for many professional services spiked around April 2020 and has diminished over the ensuing months. In contrast, preliminary analysis of Medicare claims data suggests that, for many mental health services that were permanently and temporarily added to the Medicare Telehealth list, there is a steady utilization trend from April 2020 and thereafter. Furthermore, as described above, according to preliminary analysis of claims data which examined utilization by diagnosis, the codes for audio-only E/M services have been highly utilized during the PHE, particularly for beneficiaries with mental health conditions.

Given these considerations, we now believe that it will be appropriate to revisit our regulatory definition of ''interactive telecommunications system'' beyond the circumstances of the PHE to allow for the inclusion of audio-only services under certain circumstances. Therefore, we proposed to amend our regulation at § 410.78(a)(3) to define interactive telecommunications system to include audio-only communications technology when used for telehealth services for the diagnosis, evaluation, or treatment of mental health disorders furnished to established patients when the originating site is the patient's home. We believe this proposal is consistent with the expansion of at-home access to mental health telehealth services in section 1834(m)(7) of the Act, as amended by section 123 of the CAA, which required that the beneficiary must have received a Medicare-paid (or payable), in-person item or service from the physician or practitioner furnishing the mental health services through telehealth within 6 months of the first mental health telehealth service. We proposed to adopt a similar, ongoing requirement that an in-person item or service must be furnished within 6 months of such a mental health telehealth service. We reiterate that our policy to permit audio-only telehealth services is limited to services where the home is the originating site. This is because the other enumerated telehealth originating sites are medical settings that are far more likely to have access to reliable broadband internet service. When a patient is located at one of these originating sites, access to care is far less likely to be limited by access to broadband that facilitates a video connection. In contrast, access to broadband, devices, and user expertise to enable a video connection is less likely to be available in the patient's home. As described in prior paragraphs, we also believe that mental health services are distinct from other kinds of services on the Medicare telehealth list in that many of the services do not necessarily require visualization of the patient to fulfill the full scope of service elements

We also proposed to limit payment for audio-only services to services furnished by physicians or practitioners who have the capacity to furnish two-way, audio/video telehealth services but are providing the mental health services via audio-only communication technology, in instances where the beneficiary is unable to use, does not wish to use, or does not have access to two-way, audio/video technology. We believe that this requirement will ensure that mental health services furnished via telehealth are only conducted using audio-only communications technology in instances where the use of audio-only technology is facilitating access to care that would be unlikely to occur otherwise, given the patient's technological limitations, abilities, or preferences. In the interests of monitoring utilization and program integrity concerns for audio-only telehealth services furnished under the terms of this exception, we proposed to create a service-level modifier that would identify these mental health telehealth services furnished to a beneficiary in their home using audio-only communications technology. The use of this modifier will also serve to certify that the audio-only telehealth service meets the requirements for the exception specified in § 410.78(a)(3), including that the furnishing physician or practitioner has the capacity to furnish the service using interactive two-way, real-time audio/video communications technology, but instead used audio-only technology under the conditions specified in the regulation.

We proposed to amend our regulation at § 410.78(a)(3) to specify that an interactive telecommunications system can include interactive, real-time, two-way audio-only technology for telehealth services furnished for the diagnosis, evaluation, or treatment of a mental health disorder as described under paragraph (b)(4)(D), under the following conditions: The patient is located in their home at the time of service as described at § 410.78 (b)(3)(xiv); The distant site physician or practitioner has the technical capability at the time of the service to use an interactive telecommunications system that includes video; and the patient is not capable of, or does not consent to, the use video technology for the service.

We solicited comments on these proposals, as well as what, if any, additional documentation should be required in the patient's medical record to support the clinical appropriateness of providing audio-only telehealth services for mental health in the event of an audit or claims denial. Additional required documentation could include information about the patient's level of risk and any other guardrails that are appropriate to demonstrate clinical appropriateness, and minimize program integrity and patient safety concerns.

We solicited comment on whether, for purposes of the proposed audio-only mental health telehealth services exception, we should exclude certain higher-level services, such as level 4 or 5 E/M visit codes, when furnished alongside add-on codes for psychotherapy, or codes that describe psychotherapy with crisis. We solicited comment on whether the full scope of service elements for these codes could be performed via audio-only communications technology. However, we also noted that maintaining the

availability of these services through audio-only communications technology might give patients access to care needed to address their higher level or acute mental health needs in instances where they are unable to access two-way, audio/video communications technology.

We received public comments on the payment for Medicare telehealth services furnished using audio-only communications technology. The following is a summary of the comments we received and our responses.

Comment: Commenters were very supportive of our proposal to allow for mental health services to be furnished using audio-only communications technology. A few commenters, while supportive of the use of audio-only communications technology during the PHE, urged CMS to further study and evaluate the safety and effectiveness of the audio-only modality for various levels of care and treatments to determine appropriateness of continuing payment after the PHE expires.

Some commenters requested that CMS allow office/outpatient E/M services furnished via telehealth to be conducted via audio-only communications technology, at least through the end of year in which the PHE ends. Some commenters requested that CMS clarify that SUD services are considered mental health services for purposes of the expanded definition of ''interactive telecommunications system'' to include audio-only services under § 410.78(a)(3), as well as to ensure that the periodic in-person non-telehealth visit requirements would not apply when audio-only communications technology is used for services for the treatment of a SUD or co-occurring mental health disorder to established patients with a SUD diagnosis. Other commenters suggested that CMS allow all Medicare telehealth services, not just mental health services, to be conducted via audio-only communications technology. Some commenters requested that CMS permit audio-only communications technology to be used to furnish psychological and neuropsychological testing evaluation (CPT codes 96130–96133) and Health Behavior Assessment and Intervention (HBAI) services (CPT codes 96156–96171) as these services do not require visualization of the patient. Some commenters expressed disappointment that CMS did not propose to continue payment beyond the PHE for COVID–19 for CPT codes 99441–99443, which describe audio-only office/outpatient visits, as the commenter believes these services are also important for beneficiaries who do not have access to two-way, audio/video communications technology.

Response: As we explain above, we continue to believe that mental health services are different from most other services on the Medicare telehealth services list in that they primarily involve verbal conversation where visualization between the patient and the furnishing physician or practitioner may be less critical to provision of the service. We continue to believe that office/outpatient E/M visits furnished via telehealth that are not for the diagnosis, evaluation, or treatment of a mental health disorder are most appropriately furnished via an interactive telecommunications system that includes two-way, audio/video communications technology. We would like to clarify that SUD services are considered mental health services for purposes of the expanded definition of ''interactive telecommunications system'' to include audio-only services under § 410.78(a)(3). CMS used waiver authority under section 1135(b)(8) of the Act to waive the video requirement under the regulation at § 410.78(a)(3) during the pandemic for certain behavioral health and/or counseling services, and this waiver expires with the expiration of the PHE. We proposed to amend the definition of interactive telecommunications system to include audio-only technology only for certain mental health telehealth services; and we continue to believe that, except for those mental health services and outside the circumstances of the PHE, it is appropriate to continue the current policy of defining ''interactive telecommunications system'' as technology that allows two-way, real-time interactive audio and video communications.

Regarding telephone E/M services CPT codes 99441, 99442, and 99443, please see above for a discussion of these services These telephone E/M codes will remain on the telehealth services list temporarily through the end of the PHE for COVID–19.

Comment: A few commenters suggested other conditions for which audio-only communications technology could be appropriate, such as neurologic services in treatment for headache, seizure, dementia, pain, along with adherence and side-effect follow-up. Other commenters stated that audio-only technology could also be used for other conditions such as patients with chronic pain or for provision of MNT services.

Response: As stated earlier, we continue to believe that mental health services are different from other services because they principally involve verbal exchanges between patient and practitioner. We note that the home is not a permissible originating site for the vast majority of telehealth services; that the geographic limitations for telehealth originating sites apply outside the circumstances of the PHE; and that, when telehealth services are furnished in an originating site other than the patient's home, the facility/office that serves as the originating site should have available broadband/video to allow the patient the ability to have real-time, audio/video interaction with their physician/practitioner. Additionally, given that payment for Medicare telehealth services under section 1834(m) of the Act is at the same rate as for in-person services, we have some concerns about making sure that the telehealth service provided is a sufficiently close substitute for what the patient would get in an in-person service. As such, we are not expanding the scope of Medicare telehealth services for which audio-only communications technology may be used to include services other than those furnished in the home to diagnose, evaluate or treat a mental health condition.

Comment: Commenters supported the proposal to create a service-level modifier to identify mental health telehealth visits ''furnished to a beneficiary in their home using audio-only communications technology.'' Some commenters stated that the creation of a service-level modifier to identify telehealth services furnished using audio-only would help facilitate further study of the use of audio-only technology for telehealth services.

Some commenters did not support additional documentation requirements for audio-only visits beyond those already required, while others recommended that CMS require practitioners to document the reason the beneficiary declined to participate in a live, two-way video visit and specify if it was due to lack of access, the inability to use the technology, or the patient's unwillingness to consent.

A few commenters suggested that CMS remove the requirement that the practitioner have access to two-way, audio/video communications technology in order to furnish audio-only telehealth services, stating that practitioners in rural areas may not have access to reliable broadband and should not be precluded from providing audio-only telehealth services due to this lack of access.

Response: We appreciate commenters' concerns. However, we continue to believe that, because a telehealth service

is generally analogous to and must include the elements of the in-person service, it is generally appropriate to continue to require the use of two-way, real-time audio/video communications technology to furnish the service. Therefore, we are maintaining the requirement that distant site physicians and practitioners must have the technical capability to use an interactive telecommunications system that includes two-way, real-time, interactive audio and video communications at the time that an audio-only telehealth service is furnished. With regard to documentation requirements, we are finalizing a requirement that the reason for using audio-only technology to furnish a telehealth service must be documented in the patient's medical record.

Comment: A few commenters provided examples of services that they believe should not be conducted via audio-only communications technology. These included: Level 4 and 5 office visits as well as services describing psychotherapy for crisis (CPT codes 90839–90840), group psychotherapy (CPT code 90853), psychological and neuropsychological testing (CPT codes (96130–96133 and 96136–96139), psychological and neuropsychological testing), and Applied Behavior Analysis Therapy (CPT codes 97151–97157).

Other commenters stated that there should be no restrictions on furnishing higher level mental health telehealth visits to patients in the home via audio-only technology.

In response to our statement regarding utilization of CPT codes 99441–99443 (telephone E/M services), a few commenters requested the agency share with the public the audio-only utilization data that has been collected during the public health emergency to provide stakeholders with a better understanding of how these services have been utilized outside of the treatment of mental health conditions.

Response: We would like to thank commenters for their support and suggestions. We continue to believe that real-time, audio-video telehealth interactions are the standard for Medicare telehealth services in most instances. We will continue to consider how the delivery of certain services via telehealth impacts patient care, and we encourage stakeholders to submit requests with supporting documentation using our process for the addition or removal of services on the Medicare telehealth services list. Regarding CPT codes 99441–99443, which describe telephone E/M services, please find our discussion earlier in this preamble. In response to the request for utilization data on audio-only telehealth services furnished during the PHE for COVID–19, we refer readers to publicly available utilization data (an example available at *https://www.cms.gov/Research-Statistics-Data-and-Systems/Research-Statistics-Data-and-Systems*).

After consideration of public comments, we are finalizing as proposed creation of a service-level modifier for use to identify mental health telehealth services furnished to a beneficiary in their home using audio-only communications technology. We are also amending our regulation at § 410.78(a)(3) to specify that an interactive telecommunications system can include interactive, real-time, two-way audio-only technology for telehealth services furnished for the diagnosis, evaluation, or treatment of a mental health disorder as described under paragraph (b)(4)(iv)(D), under the following conditions: The patient is located in their home at the time of service as described at § 410.78 (b)(3)(xiv); the distant site physician or practitioner has the technical capability at the time of the service to use an interactive telecommunications system that includes video; and the patient is not capable of, or does not consent to, the use of video technology for the service. We are also clarifying that SUD services are considered mental health services for purposes of the amended definition of ''interactive telecommunications system'' to include audio-only services under § 410.78(a)(3). We anticipate that this will have a positive impact on access to care for mental health conditions and contribute to overall health equity.

2. Other Non-Face-to-Face Services Involving Communications Technology Under the PFS

a. Expiration of PHE Flexibilities for Direct Supervision Requirements

Under section 1861 of the Act and at § 410.32(b)(3) of the regulations, Medicare requires certain types of services to be furnished under specific levels of supervision of a physician or practitioner, including diagnostic tests, services incident to physician services, and other services. For professional services furnished incident to the services of a billing physician or practitioner (see § 410.26) and many diagnostic tests (see § 410.32), direct supervision is required. Additionally, for pulmonary rehabilitation services (see § 410.47) and for cardiac rehabilitation and intensive cardiac rehabilitation services (see § 410.49), requirements for immediate availability and accessibility of a physician are considered to be satisfied if the physician meets the requirements for direct supervision for physician office services at § 410.26 and for hospital outpatient services at § 410.27. Outside the circumstances of the PHE, direct supervision requires the immediate availability of the supervising physician or other practitioner, but the professional need not be present in the same room during the service, and we have interpreted this ''immediate availability'' requirement to mean in-person, physical, not virtual, availability.

Through the March 31st COVID–19 IFC, we changed the definition of ''direct supervision'' during the PHE for COVID–19 (85 FR 19245 through 19246) as it pertains to supervision of diagnostic tests, physicians' services, and some hospital outpatient services, to allow the supervising professional to be immediately available through virtual presence using real-time audio/video technology, instead of requiring their physical presence. In the CY 2021 PFS final rule (85 FR 84538 through 84540), we finalized continuation of this policy through the later of the end of the calendar year in which the PHE for COVID–19 ends or December 31, 2021. In that rule, we also solicited comment on issues related to the policy allowing virtual provision of direct supervision, specifically whether there should be any additional guardrails or limitations put in place to ensure patient safety/clinical appropriateness, beyond typical clinical standards, and whether we should consider potential restrictions to prevent fraud or inappropriate use. We also stated that we will consider this and other information as we contemplate future policy regarding use of communications technology to satisfy supervision requirements, as well as the best approach for safeguarding patient safety while promoting use of technology to enhance access.

We also noted that the temporary exception to allow immediate availability for direct supervision through virtual presence facilitates the provision of telehealth services by clinical staff of physicians and other practitioners incident to their own professional services. This is discussed in the March 31st COVID–19 IFC (85 FR 19246). This is especially relevant for services such as physical therapy, occupational therapy, and speech language pathology services, since those practitioners can only bill Medicare directly for telehealth services under telehealth waivers that are effective only during the PHE for COVID–19. We note that sections 1834(m)(4)(D) and (E) of the Act specifies the types of clinicians

who may furnish and bill for Medicare telehealth services, and include only physicians as defined in section 1861(r) of the Act and practitioners described in section 1842(b)(18)(C) of the Act.

We solicited information on whether this flexibility should be continued beyond the later of the end of the PHE for COVID–19 or CY 2021. Specifically, we solicited comments on the extent to which the flexibility to meet the immediate availability requirement for direct supervision through the use of real-time, audio/video technology is being used during the PHE, and whether physicians and practitioners anticipate relying on this flexibility after the end of the PHE. We solicited comments on whether this flexibility should potentially be made permanent, meaning that we would revise the definition of ''direct supervision'' at § 410.32(b)(3)(ii) to include immediate availability through the virtual presence of the supervising physician or practitioner using real-time, interactive audio/video communications technology without limitation after the PHE for COVID–19, or if we should continue the policy in place for a short additional time to facilitate a gradual sunset of the policy. We solicited comment on whether the current timeframe for continuing this flexibility at § 410.32(b)(3)(ii), which is currently the later of the end of the year in which the PHE for COVID–19 ends or December 31, 2021, remains appropriate, or if this timeframe should be extended through some later date to facilitate the gathering of additional information in recognition that, due to the on-going nature of the PHE for COVID–19, practitioners may not yet have had time to assess the implications of a permanent change in this policy. We also solicited comment regarding the possibility of permanently allowing immediate availability for direct supervision through virtual presence using real-time audio/video technology for only a subset of services, as we recognize that it may be inappropriate to allow direct supervision without physical presence for some services, due to potential concerns over patient safety if the practitioner is not immediately available in-person. We also solicited comments on, if this policy to be made permanent, whether a service-level modifier should be required to identify when the requirements for direct supervision were met using two-way, audio/video communications technology.

We received public comments on the expiration of PHE flexibilities for direct supervision requirements. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported continuing to allow requirements for direct supervision of services to be met through virtual presence using telecommunications technology beyond the PHE. They stated that COVID–19 may not be completely eradicated for at least a year after the end of the PHE, and that health professionals will need time to recover from the pandemic's effects. Other commenters stated that CMS should permanently modify the definition of direct supervision to include the presence of the supervising practitioner via real-time, interactive audio/video technology in certain cases. Some commenters encouraged CMS to create a service-level modifier for purposes of identifying advanced practice provider involvement in care and requested that CMS consult with specialty societies as this change is developed.

Some commenters supported use of a service-level modifier to identify services furnished under direct supervision where the supervising physician was available through two-way, audio/video communications technology.

Some commenters specifically requested that CMS maintain the flexibility for the supervising physician to be available using two-way, audio/video when a nurse practitioner is furnishing a behavioral health service, as these are services that do not require a physical exam.

MedPAC, while supportive of our extension of this policy through the year in which the PHE ends, stated two concerns about making it permanent after the PHE in the absence of evidence about its effects on safety, quality, and spending. First, allowing clinicians to supervise ''incident to'' services virtually could pose a safety risk to beneficiaries because the clinician would not be physically available to help the individual being supervised, if necessary, which is important if the service is a complex procedure. Second, allowing virtual supervision could potentially enable a clinician to supervise many individuals at multiple locations at the same time. It could be difficult for a clinician to address urgent, clinical needs while virtually supervising many people at multiple locations simultaneously. This scenario could also lead to higher spending by allowing clinicians to bill for more ''incident-to'' services during a single day.

Some commenters stated that, if CMS were to make this policy permanent, certain services should be precluded, such as complex drug therapies or anesthesia services.

Response: We thank commenters for their input and will consider addressing the issues raised by these comments in future rules or guidance, as appropriate.

b. Interim Final Provisions in the CY 2021 PFS Final Rule

In the CY 2021 PFS final rule (85 FR 84536), we finalized the establishment of HCPCS code G2252 (Brief communication technology-based service, *e.g., virtual check-in service, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11–20 minutes of medical discussion*) on an interim basis. We stated that, given the widespread concerns expressed by commenters about the continuing need for audio-only conversations with patients and our determination that we will not continue to pay for audio-only E/M visits after the conclusion of the PHE (see 85 FR 84533 through 84535 for further discussion of that policy), we believed it will be expedient to establish additional coding and payment for an extended virtual check-in, which could be furnished using any form of synchronous communications technology, including audio-only, on an interim basis for CY 2021. We stated that we believed establishing payment for this service on an interim basis will support access to care for beneficiaries who may be reluctant to return to in-person visits unless absolutely necessary, and allow us to consider whether this policy should be adopted on a permanent basis. In that rule, we finalized a direct crosswalk to CPT code 99442, the value of which we believe most accurately reflects the resources associated with a longer service delivered via synchronous communications technology, which can include audio-only communications. Commenters supported the creation and interim final adoption of this service. Commenters stated that, as beneficiaries and practitioners may be reluctant to return to primarily in-person services post-PHE, payment for a longer virtual check-in will be necessary to account for circumstances where more time is spent determining whether an in-person visit is needed beyond the 5–10 minutes accounted for by HCPCS code G2012 (*Brief communication technology-based service, e.g. virtual check-in, by a physician or other qualified health care*

professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 5–10 minutes of medical discussion). Commenters also supported valuing HCPCS code G2252 through a direct crosswalk to CPT code 99442. We agree with commenters that additional time may be needed to assess the necessity of an in-person service given concerns over exposure to illnesses beyond the duration of the PHE for COVID–19 and that current coding may not accurately reflect that time. Based on support from commenters, we proposed to permanently adopt coding and payment for CY 2022, HCPCS code G2252 as described in the CY 2021 PFS final rule.

We received public comments on the interim final provisions in the CY 2021 PFS final rule. The following is a summary of the comments we received and our responses.

Comment: Commenters supported CMS' finalizing separate coding and payment for a longer virtual check-in.

Some commenters, including the AMA RUC, supported valuing HCPCS code G2252 through a direct crosswalk to the value of CPT code 99442 but recommended that CMS work with the CPT Editorial Panel to editorially revise CPT codes 99441–99443 so that the CPT codes may be consistently reported by all payors to describe audio-only services.

Some commenters stated that CMS should create a parallel code to HCPCS code G2252 billable by those practitioners who cannot independently bill for E/M services. Commenters pointed out that, in the CY 2021 PFS final rule, CMS implemented a similar policy for HCPCS codes G2010 and G2012.

Response: With regard to HCPCS code G2252 being billable by those practitioners who cannot independently bill for E/M services, we appreciate commenters bringing this issue to our attention, and we will consider these comments for future rulemaking.

After consideration of public comments, we are finalizing our proposal to permanently establish separate coding and payment for the longer virtual check-in service described by HCPCS code G2252 for CY 2022 using a crosswalk to the value of CPT code 99442, as proposed. As described in the CY 2021 PFS final rule (85 FR 84536), we believe that the value of CPT code 99442 most accurately reflects the resources associated with a longer service delivered via synchronous communications technology, which can include audio-only communications. This is consistent with our approach to valuing the virtual check-in service (HCPCS code G2012), which used CPT code 99441 as the basis for valuation. In the case of HCPCS code G2252 and CPT code 99442, both codes describe 11–20 minutes of medical discussion when the practitioner may not necessarily be able to visualize the patient, and is used when the acuity of the patient's problem is not necessarily likely to warrant a visit, but when the needs of the particular patient require more assessment time from the practitioner. In the case of HCPCS code G2252, the additional time would be used to determine the necessity of an in-person visit and result in a work time/intensity that is similar to the crosswalk code.

3. Telehealth Originating Site Facility Fee Payment Amount Update

Section 1834(m)(2)(B) of the Act established the Medicare telehealth originating site facility fee for telehealth services furnished from October 1, 2001 through December 31, 2002, at $20.00.

For telehealth services furnished on or after January 1 of each subsequent calendar year, the telehealth originating site facility fee is increased by the percentage increase in the Medicare Economic Index (MEI) as defined in section 1842(i)(3) of the Act. The originating site facility fee for telehealth services furnished in CY 2022 is $27.59.

The MEI increase for CY 2022 is 2.1 percent and is based on the most recent historical percentage increase of the MEI for the second quarter of 2021 (2.3 percent), and the most recent historical productivity adjustment for calendar year 2020 (0.2 percent).

Therefore, for CY 2022, the payment amount for HCPCS code Q3014 (Telehealth originating site facility fee) is $27.59. The Medicare telehealth originating site facility fee and the MEI increase by the applicable time period is shown in Table 18.

TABLE 18: The Medicare Telehealth Originating Site Facility Fee

Time Period	MEI (%)	Facility Fee for Q3014
Oct. 1, 2001 to Dec. 31, 2002	NA	$ 20.00
2003	3.0	$ 20.60
2004	2.9	$ 21.20
2005	3.1	$ 21.86
2006	2.8	$ 22.47
2007	2.1	$ 22.94
2008	1.8	$ 23.35
2009	1.6	$ 23.72
2010	1.2	$ 24.00
2011	0.4	$ 24.10
2012	0.6	$ 24.24
2013	0.8	$ 24.43
2014	0.8	$ 24.63
2015	0.8	$ 24.83
2016	1.1	$ 25.10
2017	1.2	$ 25.40
2018	1.4	$ 25.76
2019	1.5	$ 26.15
2020	1.9	$ 26.65
2021	1.4	$ 27.02
2022	2.1	$ 27.59

E. Valuation of Specific Codes

1. Background: Process for Valuing New, Revised, and Potentially Misvalued Codes

Establishing valuations for newly created and revised CPT codes is a routine part of maintaining the PFS. Since the inception of the PFS, it has also been a priority to revalue services regularly to make sure that the payment rates reflect the changing trends in the practice of medicine and current prices for inputs used in the PE calculations. Initially, this was accomplished primarily through the 5-year review process, which resulted in revised work RVUs for CY 1997, CY 2002, CY 2007, and CY 2012, and revised PE RVUs in CY 2001, CY 2006, and CY 2011, and revised MP RVUs in CY 2010, CY 2015, and CY 2020. Under the 5-year review process, revisions in RVUs were proposed and finalized via rulemaking. In addition to the 5-year reviews, beginning with CY 2009, CMS and the RUC identified a number of potentially misvalued codes each year using various identification screens, as discussed in section II.C. of this final rule, Potentially Misvalued Services under the PFS. Historically, when we received RUC recommendations, our process had been to establish interim final RVUs for the potentially misvalued codes, new codes, and any other codes for which there were coding changes in the final rule with comment period for a year. Then, during the 60-day period following the publication of the final rule with comment period, we accepted public comment about those valuations. For services furnished during the calendar year following the publication of interim final rates, we paid for services based upon the interim final values established in the final rule. In the final rule with comment period for the subsequent year, we considered and responded to public comments received on the interim final values, and typically made any appropriate adjustments and finalized those values.

In the CY 2015 PFS final rule with comment period (79 FR 67547), we finalized a new process for establishing values for new, revised and potentially misvalued codes. Under the new process, we include proposed values for these services in the proposed rule, rather than establishing them as interim final in the final rule with comment period. Beginning with the CY 2017 PFS proposed rule (81 FR 46162), the new process was applicable to all codes, except for new codes that describe truly new services. For CY 2017, we proposed new values in the CY 2017 PFS proposed rule for the vast majority of new, revised, and potentially misvalued codes for which we received complete RUC recommendations by February 10, 2016. To complete the transition to this new process, for codes for which we established interim final values in the CY 2016 PFS final rule with comment period (81 FR 80170), we reviewed the comments received during the 60-day public comment period following release of the CY 2016 PFS final rule with comment period (80 FR 70886), and re-proposed values for those codes in the CY 2017 PFS proposed rule.

We considered public comments received during the 60-day public comment period for the proposed rule before establishing final values in the CY 2017 PFS final rule. As part of our established process, we will adopt interim final values only in the case of wholly new services for which there are no predecessor codes or values and for which we do not receive recommendations in time to propose values.

As part of our obligation to establish RVUs for the PFS, we thoroughly review and consider available information including recommendations and supporting information from the RUC, the Health Care Professionals Advisory Committee (HCPAC), public commenters, medical literature, Medicare claims data, comparative databases, comparison with other codes within the PFS, as well as consultation with other physicians and healthcare professionals within CMS and the Federal Government as part of our process for establishing valuations. Where we concur that the RUC's

recommendations, or recommendations from other commenters, are reasonable and appropriate and are consistent with the time and intensity paradigm of physician work, we proposed those values as recommended. Additionally, we continually engage with stakeholders, including the RUC, with regard to our approach for accurately valuing codes, and as we prioritize our obligation to value new, revised, and potentially misvalued codes. We continue to welcome feedback from all interested parties regarding valuation of services for consideration through our rulemaking process.

2. Methodology for Establishing Work RVUs

For each code identified in this section, we conduct a review that includes the current work RVU (if any), RUC-recommended work RVU, intensity, time to furnish the preservice, intraservice, and postservice activities, as well as other components of the service that contribute to the value. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). When referring to a survey, unless otherwise noted, we mean the surveys conducted by specialty societies as part of the formal RUC process.

Components that we use in the building block approach may include preservice, intraservice, or postservice time and post-procedure visits. When referring to a bundled CPT code, the building block components could include the CPT codes that make up the bundled code and the inputs associated with those codes. We use the building block methodology to construct, or deconstruct, the work RVU for a CPT code based on component pieces of the code. Magnitude estimation refers to a methodology for valuing work that determines the appropriate work RVU for a service by gauging the total amount of work for that service relative to the work for a similar service across the PFS without explicitly valuing the components of that work. In addition to these methodologies, we frequently utilize an incremental methodology in which we value a code based upon its incremental difference between another code and another family of codes. Section 1848(c)(1)(A) of the Act specifically defines the work component as the resources that reflect time and intensity in furnishing the service. Also, the published literature on valuing work has recognized the key role of time in overall work. For particular codes, we refine the work RVUs in direct proportion to the changes in the best information regarding the time resources involved in furnishing particular services, either considering the total time or the intraservice time.

Several years ago, to aid in the development of preservice time recommendations for new and revised CPT codes, the RUC created standardized preservice time packages. The packages include preservice evaluation time, preservice positioning time, and preservice scrub, dress and wait time. Currently, there are preservice time packages for services typically furnished in the facility setting (for example, preservice time packages reflecting the different combinations of straightforward or difficult procedure, and straightforward or difficult patient). Currently, there are three preservice time packages for services typically furnished in the nonfacility setting.

We developed several standard building block methodologies to value services appropriately when they have common billing patterns. In cases where a service is typically furnished to a beneficiary on the same day as an E/M service, we believe that there is overlap between the two services in some of the activities furnished during the preservice evaluation and postservice time. Our longstanding adjustments have reflected a broad assumption that at least one-third of the work time in both the preservice evaluation and postservice period is duplicative of work furnished during the E/M visit.

Accordingly, in cases where we believe that the RUC has not adequately accounted for the overlapping activities in the recommended work RVU and/or times, we adjust the work RVU and/or times to account for the overlap. The work RVU for a service is the product of the time involved in furnishing the service multiplied by the intensity of the work. Preservice evaluation time and postservice time both have a long-established intensity of work per unit of time (IWPUT) of 0.0224, which means that 1 minute of preservice evaluation or postservice time equates to 0.0224 of a work RVU.

Therefore, in many cases when we remove 2 minutes of preservice time and 2 minutes of postservice time from a procedure to account for the overlap with the same day E/M service, we also remove a work RVU of 0.09 (4 minutes $\times$ 0.0224 IWPUT) if we do not believe the overlap in time had already been accounted for in the work RVU. The RUC has recognized this valuation policy and, in many cases, now addresses the overlap in time and work when a service is typically furnished on the same day as an E/M service.

The following paragraphs contain a general discussion of our approach to reviewing RUC recommendations and developing proposed values for specific codes. When they exist we also include a summary of stakeholder reactions to our approach. We note that many commenters and stakeholders have expressed concerns over the years with our ongoing adjustment of work RVUs based on changes in the best information we had regarding the time resources involved in furnishing individual services. We have been particularly concerned with the RUC's and various specialty societies' objections to our approach given the significance of their recommendations to our process for valuing services and since much of the information we used to make the adjustments is derived from their survey process. We are obligated under the statute to consider both time and intensity in establishing work RVUs for PFS services. As explained in the CY 2016 PFS final rule with comment period (80 FR 70933), we recognize that adjusting work RVUs for changes in time is not always a straightforward process, so we have applied various methodologies to identify several potential work values for individual codes.

We have observed that for many codes reviewed by the RUC, recommended work RVUs have appeared to be incongruous with recommended assumptions regarding the resource costs in time. This has been the case for a significant portion of codes for which we recently established or proposed work RVUs that are based on refinements to the RUC-recommended values. When we have adjusted work RVUs to account for significant changes in time, we have started by looking at the change in the time in the context of

the RUC-recommended work RVU. When the recommended work RVUs do not appear to account for significant changes in time, we have employed the different approaches to identify potential values that reconcile the recommended work RVUs with the recommended time values. Many of these methodologies, such as survey data, building block, crosswalks to key reference or similar codes, and magnitude estimation have long been used in developing work RVUs under the PFS. In addition to these, we sometimes use the relationship between the old time values and the new time values for particular services to identify alternative work RVUs based on changes in time components.

In so doing, rather than ignoring the RUC-recommended value, we have used the recommended values as a starting reference and then applied one of these several methodologies to account for the reductions in time that we believe were not otherwise reflected in the RUC-recommended value. If we believe that such changes in time are already accounted for in the RUC's recommendation, then we do not make such adjustments. Likewise, we do not arbitrarily apply time ratios to current work RVUs to calculate proposed work RVUs. We use the ratios to identify potential work RVUs and consider these work RVUs as potential options relative to the values developed through other options.

We do not imply that the decrease in time as reflected in survey values should always equate to a one-to-one or linear decrease in newly valued work RVUs. Instead, we believe that, since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, significant decreases in time should be reflected in decreases to work RVUs. If the RUC's recommendation has appeared to disregard or dismiss the changes in time, without a persuasive explanation of why such a change should not be accounted for in the overall work of the service, then we have generally used one of the aforementioned methodologies to identify potential work RVUs, including the methodologies intended to account for the changes in the resources involved in furnishing the procedure.

Several stakeholders, including the RUC, have expressed general objections to our use of these methodologies and deemed our actions in adjusting the recommended work RVUs as inappropriate; other stakeholders have also expressed general concerns with CMS refinements to RUC-recommended values in general. In the CY 2017 PFS final rule (81 FR 80272 through 80277), we responded in detail to several comments that we received regarding this issue. In the CY 2017 PFS proposed rule (81 FR 46162), we requested comments regarding potential alternatives to making adjustments that would recognize overall estimates of work in the context of changes in the resource of time for particular services; however, we did not receive any specific potential alternatives. As described earlier in this section, crosswalks to key reference or similar codes are one of the many methodological approaches we have employed to identify potential values that reconcile the RUC-recommend work RVUs with the recommended time values when the RUC-recommended work RVUs did not appear to account for significant changes in time.

We received several comments regarding our methodologies for work valuation in response to the CY 2022 PFS proposed rule and those comments are summarized below.

Comment: Several commenters disagreed with our reference to older work time sources, and stated that their use led to the proposal of work RVUs based on flawed assumptions. Commenters stated that codes with ''CMS/Other'' or ''Harvard'' work time sources, used in the original valuation of certain older services, were not surveyed, and therefore, were not resource-based. Commenters also stated that it was invalid to draw comparisons between the current work times and work RVUs of these services to the newly surveyed work time and work RVUs as recommended by the RUC.

Response: We agree that it is important to use the recent data available regarding work times, and we note that when many years have passed since work time has been measured, significant discrepancies can occur. However, we also believe that our operating assumption regarding the validity of the existing values as a point of comparison is critical to the integrity of the relative value system as currently constructed. The work times currently associated with codes play a very important role in PFS ratesetting, both as points of comparison in establishing work RVUs and in the allocation of indirect PE RVUs by specialty. If we were to operate under the assumption that previously recommended work times had been routinely overestimated, this would undermine the relativity of the work RVUs on the PFS in general, in light of the fact that codes are often valued based on comparisons to other codes with similar work times. Such an assumption would also undermine the validity of the allocation of indirect PE RVUs to physician specialties across the PFS.

Instead, we believe that it is crucial that the code valuation process take place with the understanding that the existing work times that have been used in PFS ratesetting are accurate. We recognize that adjusting work RVUs for changes in time is not always a straightforward process and that the intensity associated with changes in time is not necessarily always linear, which is why we apply various methodologies to identify several potential work values for individual codes. However, we reiterate that we believe it would be irresponsible to ignore changes in time based on the best data available, and that we are statutorily obligated to consider both time and intensity in establishing work RVUs for PFS services. For additional information regarding the use of old work time values that were established many years ago and have not since been reviewed in our methodology, we refer readers to our discussion of the subject in the CY 2017 PFS final rule (81 FR 80273 through 80274).

Comment: Several commenters disagreed with the use of time ratio methodologies for work valuation. Commenters stated that this use of time ratios is not a valid methodology for valuation of physician services. Commenters stated that treating all components of physician time (preservice, intraservice, postservice and post-operative visits) as having identical intensity is incorrect, and inconsistently applying it to only certain services under review creates inherent payment disparities in a payment system, which is based on relative valuation. Commenters stated that in many scenarios, CMS selects an arbitrary combination of inputs to apply rather than seeking a valid clinically relevant relationship that would preserve relativity. Commenters suggested that CMS determine the work valuation for each code based not only on surveyed work times, but also the intensity and complexity of the service and relativity to other similar services, rather than basing the work value entirely on time.

Response: We disagree and continue to believe that the use of time ratios is one of several appropriate methods for identifying potential work RVUs for particular PFS services, particularly when the alternative values recommended by the RUC and other commenters do not account for survey information that suggests the amount of

time involved in furnishing the service has changed significantly. We reiterate that, consistent with the statute, we are required to value the work RVU based on the relative resources involved in furnishing the service, which include time and intensity. When our review of recommended values reveals that changes in time are not accounted for in a recommended work RVU, we believe we have an obligation to account for that change in establishing work RVUs since the statute explicitly identifies time as one of the two elements of the work RVUs.

We recognize that it would not be appropriate to develop work RVUs solely based on time given that intensity is also an element of work, but in applying the time ratios, we are using derived intensity measures based on current work RVUs for individual procedures. We clarify again that we do not treat all components of physician time as having identical intensity. If we were to disregard intensity altogether, the work RVUs for all services would be developed based solely on time values and that is not the case, as indicated by the many services that share the same time values but have different work RVUs. For example, among the codes reviewed in this CY 2022 PFS final rule, CPT codes 63053 (*Laminectomy, facetectomy, or foraminotomy* (*unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [eg, spinal or lateral recess stenosis]*), *during posterior interbody arthrodesis, lumbar; each additional segment*), 67335 (*Placement of adjustable suture(s) during strabismus surgery, including postoperative adjustment(s) of suture(s)*), 80504 (*Pathology clinical consultation; for a moderately complex clinical problem, with review of patient's history and medical records and moderate level of medical decision making. When using time for code selection, 21–40 minutes of total time is spent on the date of the consultation*), and 99425 (*Principal care management services, for a single high-risk disease; additional 30 minutes provided personally by a physician or other qualified health care professional, per calendar month*) all share the same intraservice and total work time of 30 minutes. However, these codes have very different proposed work RVUs of 2.31 and 3.23 and 0.91 and 1.00 respectively. These examples demonstrate that we do not value services purely based on work time; instead, we incorporate time as one of multiple different factors employed in our review process. Furthermore, we reiterate that we use time ratios to identify potentially appropriate work RVUs, and then use other methods (including estimates of work from CMS medical personnel and crosswalks to key reference or similar codes) to validate these RVUs. For more details on our methodology for developing work RVUs, we direct readers to the discussion CY 2017 PFS final rule (81 FR 80272 through 80277).

We also clarify for the commenters that our review process is not arbitrary in nature. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). With regard to the invocation of clinically relevant relationships by the commenters, we emphasize that we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

Comment: Several commenters discouraged the use of valuation of codes based on work RVU increments. Commenters stated that this methodology for valuing codes inaccurately treats all components of the physician time as having identical intensity and would lead to incorrect work valuations. Commenters stated that CMS should carefully consider the clinical information justifying the changes in physician work intensity provided by the RUC and other stakeholders.

Response: We believe the use of an incremental difference between the work RVUs of codes is a valid methodology for setting values, especially in valuing services within a family of revised codes where it is important to maintain appropriate intra-family relativity. Historically, we have frequently utilized an incremental methodology in which we value a code based upon the incremental work RVU difference between the code and another code or another family of codes. We note that the RUC has also used the same incremental methodology on occasion when it was unable to produce valid survey data for a service. We have no evidence to suggest that the use of an incremental difference between the work RVUs of codes conflicts with the statute's definition of the work component as the resources in time and intensity required in furnishing the service. We do consider clinical information associated with physician work intensity provided by the RUC and other stakeholders as part of our review process, although we remind readers again that we do not believe that it is necessary for codes to share the same site of service, patient population, or utilization level in order to serve as an appropriate crosswalk.

Comment: Several commenters stated that they were concerned about CMS' lack of consideration for compelling evidence that services have changed. Commenters stated that CMS appeared to dismiss the fact that services may change due to technological advances, changes in the patient population, shifts in the specialty of physicians providing services or changes in the physician work or intensity required to perform services. Commenters stated that CMS' failure to discuss compelling evidence does not reflect the long history of reviewing potentially misvalued codes, first through the statutorily mandated 5-year review processes and more recently from continuous annual reviews. Commenters stated that CMS has discussed compelling evidence in rulemaking since the inception of the RBRVS and has informed public commenters to consider compelling evidence to identify potentially misvalued codes. Commenters requested that CMS address the compelling evidence submitted with the RUC recommendations when the agency does not accept the RUC's recommended work RVUs.

Response: The concept of compelling evidence was developed by the RUC as part of its work RVU review process for individual codes. The RUC determines whether there is compelling evidence to justify an increase in valuation. The

RUC's compelling evidence criteria include documented changes in physician work, an anomalous relationship between the code and multiple key reference services, evidence that technology has changed physician work, analysis of other data on time and effort measures, and evidence that incorrect assumptions were made in the previous valuation of the service. While we appreciate the submission of this additional information for review, we emphasize that the RUC developed the concept of compelling evidence for its own review process; an evaluation of ''compelling evidence,'' at least as conceptualized by the RUC, is not part of our review process, as our focus is the time and intensity of services, in accordance with the statute. With that said, we do consider changes in technology, patient population, and other compelling evidence criteria, as such evidence may affect the time and intensity of a service under review. For example, new technology may cause a service to become easier or more difficult to perform, with corresponding effects on the time and intensity of the service. However, we are under no obligation to adopt the same review process or compelling evidence criteria as the RUC. We instead focus on evaluating and addressing the time and intensity of services when reviewing potentially misvalued codes because section 1848(c)(1)(A) of the Act specifically defines the work component as the resources that reflect time and intensity in furnishing the service.

Comment: A commenter stated that there has been a disparate impact on the valuation of cardiothoracic services over the past decade. The commenter stated that CMS has taken a prejudicial approach to services from this specialty over the period 2009–2019 by making refinements to the RUC's recommended work RVUs at a higher percentage than all other specialties.

Response: We disagree with the commenter that there has been any prejudicial approach to the valuation of services from the cardiothoracic specialty or any other specialty. We value services on an individual case-by-case basis using time and intensity as directed by the statute. When the recommended work RVUs from the RUC do not appear to account for significant changes in time, we have employed different approaches (such as survey data, building block, crosswalks to key reference or similar codes, and magnitude estimation) to identify potential values that reconcile the recommended work RVUs with the recommended time values. We continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another, and the dominant specialty of the service under review is not part of our work valuation methodology.

Comment: Several commenters raised the issue of the refinement panel which was last reformed in CY 2016. Commenters stated that the refinement panel was not obsolete and was not mutually exclusive with the change to include all proposed valuations in each year's proposed rule. Commenters stated that for two decades, the refinement panel process was considered by stakeholders to be an appeals process and its elimination discontinued CMS' reliance on outside stakeholders to provide accountability through a transparent appeals process. Commenters requested that CMS consider these issues and create an objective, transparent and consistently applied formal appeals process that would be open to any commenting organization.

Response: We did not propose any changes to the refinement panel and we are not finalizing any changes to the refinement panel for CY 2022. As we stated in the CY 2016 PFS final rule (80 FR 70917–70918), the refinement panel was established to assist us in reviewing the public comments on CPT codes with interim final work RVUs and in balancing the interests of the specialty societies who commented on the work RVUs with the budgetary and redistributive effects that could occur if we accepted extensive increases in work RVUs across a broad range of services. We did not believe that the refinement panel had generally served as the kind of ''appeals'' or reconsideration process that some stakeholders envisioned in their comments. We also believe that the refinement panel was not achieving its intended purpose. Rather than providing us with additional information, balanced across specialty interests, to assist us in establishing work RVUs, the refinement panel process generally served to rehash the issues raised and information already discussed at the RUC meetings and considered by CMS. In contrast to the prior process of establishing interim final values and using a refinement panel process that generally was not observed by members of the public, we continue to believe that the current process of proposing the majority of code values in a proposed rule, giving the public the opportunity to comment on those proposed values, and then finalizing those values in a final rule offers greater transparency and accountability.

We also note that we did not finalize our proposal to eliminate the refinement panel completely in CY 2016. We retain the ability to convene refinement panels for codes with interim final values under circumstances where additional input provided by the panel is likely to add value as a supplement to notice and comment rulemaking. We also remind stakeholders that we have established an annual process for the public nomination of potentially misvalued codes. This process, described in the CY 2012 PFS final rule (76 FR 73058), provides an annual means for those who believe that values for individual services are inaccurate and should be readdressed through notice and comment rulemaking to bring those codes to our attention.

Comment: Several commenters requested that CMS use the interim RUC recommendations from the April 2021 meeting for several code families which had previously been reviewed at the October 2020 RUC meeting or the January 2021 RUC meeting. Commenters stated that the earlier RUC recommendations were made on an interim basis and requested an expedited review of the recommendations from the April 2021 RUC meeting; the RUC resubmitted its recommendations for these code families as part of its comment submission.

Response: We finalized a policy in the CY 2015 PFS final rule to make all changes in the work and MP RVUs and the direct PE inputs for new, revised, and potentially misvalued services under the PFS by proposing and then finalizing such changes through notice and comment rulemaking, as opposed to initially finalizing changes on an interim final basis (79 FR 67602 through 67609). As we stated when promulgating the CY 2015 PFS final rule, this approach has the significant advantage that the RVUs for all services under the PFS are established using a full notice and comment procedure, including consideration of the RUC recommendations, before they take effect, providing the public the opportunity to comment on a specific proposal prior to it being implemented. We continue to believe that this is a far more transparent process which assures that we have the full benefit of stakeholder comments before establishing values. Since we did not make proposals on the code families in question using the RUC's recommendations from the April 2021 meeting, we would be forced to finalize valuation for these codes on an interim

final basis, without the opportunity for public comment. This would contradict the policy that we finalized in the CY 2015 PFS final rule, and we do not believe that it would serve the interests of transparency. Although we will consider any information submitted by stakeholders for valuation during the comment period, as we do for all codes which are subject to notice and comment rulemaking, we will formally review the recommendations from the April 2021 RUC meeting next year as part of the CY 2023 PFS rulemaking cycle.

In response to comments, in the CY 2019 PFS final rule (83 FR 59515), we clarified that terms ''reference services'', ''key reference services'', and ''crosswalks'' as described by the commenters are part of the RUC's process for code valuation. These are not terms that we created, and we do not agree that we necessarily must employ them in the identical fashion for the purposes of discussing our valuation of individual services that come up for review. However, in the interest of minimizing confusion and providing clear language to facilitate stakeholder feedback, we will seek to limit the use of the term, ''crosswalk,'' to those cases where we are making a comparison to a CPT code with the identical work RVU. We also occasionally make use of a ''bracket'' for code valuation. A ''bracket'' refers to when a work RVU falls between the values of two CPT codes, one at a higher work RVU and one at a lower work RVU.

We look forward to continuing to engage with stakeholders and commenters, including the RUC, as we prioritize our obligation to value new, revised, and potentially misvalued codes; and will continue to welcome feedback from all interested parties regarding valuation of services for consideration through our rulemaking process. We refer readers to the detailed discussion in this section of the valuation considered for specific codes. Table 21 contains a list of codes and descriptors for which we proposed work RVUs; this includes all codes for which we received RUC recommendations by February 10, 2021. The finalized work RVUs, work time and other payment information for all CY 2022 payable codes are available on the CMS website under downloads for the CY 2022 PFS final rule at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/index.html*).

3. Methodology for the Direct PE Inputs To Develop PE RVUs

a. Background

On an annual basis, the RUC provides us with recommendations regarding PE inputs for new, revised, and potentially misvalued codes. We review the RUC-recommended direct PE inputs on a code by code basis. Like our review of recommended work RVUs, our review of recommended direct PE inputs generally includes, but is not limited to, a review of information provided by the RUC, HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, and consultation with physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. When we determine that the RUC's recommendations appropriately estimate the direct PE inputs (clinical labor, disposable supplies, and medical equipment) required for the typical service, are consistent with the principles of relativity, and reflect our payment policies, we use those direct PE inputs to value a service. If not, we refine the recommended PE inputs to better reflect our estimate of the PE resources required for the service. We also confirm whether CPT codes should have facility and/or nonfacility direct PE inputs and refine the inputs accordingly.

Our review and refinement of the RUC-recommended direct PE inputs includes many refinements that are common across codes, as well as refinements that are specific to particular services. Table 22 details our refinements of the RUC's direct PE recommendations at the code-specific level. In section II.B. of this final rule, Determination of Practice Expense Relative Value Units (PE RVUs), we addressed certain refinements that will be common across codes. Refinements to particular codes are addressed in the portions of that section that are dedicated to particular codes. We noted that for each refinement, we indicated the impact on direct costs for that service. We noted that, on average, in any case where the impact on the direct cost for a particular refinement is $0.35 or less, the refinement has no impact on the PE RVUs. This calculation considers both the impact on the direct portion of the PE RVU, as well as the impact on the indirect allocator for the average service. In the proposed rule, we also noted that many of the refinements listed in Table 21 of the proposed rule resulted in changes under the $0.35 threshold and were unlikely to result in a change to the RVUs.

We note that the direct PE inputs for CY 2022 are displayed in the CY 2022 direct PE input files, available on the CMS website under the downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.* The inputs displayed there have been used in developing the CY 2022 PE RVUs as displayed in Addendum B.

b. Common Refinements

(1) Changes in Work Time

Some direct PE inputs are directly affected by revisions in work time. Specifically, changes in the intraservice portions of the work time and changes in the number or level of postoperative visits associated with the global periods result in corresponding changes to direct PE inputs. The direct PE input recommendations generally correspond to the work time values associated with services. We believe that inadvertent discrepancies between work time values and direct PE inputs should be refined or adjusted in the establishment of proposed direct PE inputs to resolve the discrepancies.

(2) Equipment Time

Prior to CY 2010, the RUC did not generally provide CMS with recommendations regarding equipment time inputs. In CY 2010, in the interest of ensuring the greatest possible degree of accuracy in allocating equipment minutes, we requested that the RUC provide equipment times along with the other direct PE recommendations, and we provided the RUC with general guidelines regarding appropriate equipment time inputs. We appreciate the RUC's willingness to provide us with these additional inputs as part of its PE recommendations.

In general, the equipment time inputs correspond to the service period portion of the clinical labor times. We clarified this principle over several years of rulemaking, indicating that we consider equipment time as the time within the intraservice period when a clinician is using the piece of equipment plus any additional time that the piece of equipment is not available for use for another patient due to its use during the designated procedure. For those services for which we allocate cleaning time to portable equipment items, because the

portable equipment does not need to be cleaned in the room where the service is furnished, we do not include that cleaning time for the remaining equipment items, as those items and the room are both available for use for other patients during that time. In addition, when a piece of equipment is typically used during follow-up postoperative visits included in the global period for a service, the equipment time will also reflect that use.

We believe that certain highly technical pieces of equipment and equipment rooms are less likely to be used during all of the preservice or postservice tasks performed by clinical labor staff on the day of the procedure (the clinical labor service period) and are typically available for other patients even when one member of the clinical staff may be occupied with a preservice or postservice task related to the procedure. We also noted that we believe these same assumptions will apply to inexpensive equipment items that are used in conjunction with and located in a room with non-portable highly technical equipment items since any items in the room in question will be available if the room is not being occupied by a particular patient. For additional information, we refer readers to our discussion of these issues in the CY 2012 PFS final rule with comment period (76 FR 73182) and the CY 2015 PFS final rule with comment period (79 FR 67639).

(3) Standard Tasks and Minutes for Clinical Labor Tasks

In general, the preservice, intraservice, and postservice clinical labor minutes associated with clinical labor inputs in the direct PE input database reflect the sum of particular tasks described in the information that accompanies the RUC-recommended direct PE inputs, commonly called the ''PE worksheets.'' For most of these described tasks, there is a standardized number of minutes, depending on the type of procedure, its typical setting, its global period, and the other procedures with which it is typically reported. The RUC sometimes recommends a number of minutes either greater than or less than the time typically allotted for certain tasks. In those cases, we review the deviations from the standards and any rationale provided for the deviations. When we do not accept the RUC-recommended exceptions, we refine the proposed direct PE inputs to conform to the standard times for those tasks. In addition, in cases when a service is typically billed with an E/M service, we remove the preservice clinical labor tasks to avoid duplicative inputs and to reflect the resource costs of furnishing the typical service.

Comment: Several commenters stated that CMS is proposing to refine the facility pre-service clinical labor times for major procedures to conform to the 000-day or 010-day global period standards for ''Extensive use of clinical staff'' despite the RUC recommendation of standard 090-day preservice clinical labor times. Commenters stated that these procedures are performed under general anesthesia in the facility setting and require specialized supplies and equipment and pre-operative coordination between multiple specialists necessitating office clinical staff time typical of 90-day global procedures performed in the facility setting. Commenters stated that reassignment of global periods for select codes does not negate the fact that a major procedure is a major procedure and the pre-service facility clinical staff time for a major procedure is independent of the global period assignment. Commenters stated that each procedure should be evaluated on a case-by-case basis.

Response: We agree with the commenters that the direct PE inputs for each service should be evaluated on a case-by-case basis based on our criteria of what would be reasonable and medically necessary in the typical case. We reviewed the individual codes in question and concluded that the use of 000-day or 010-day global period standards for ''Extensive use of clinical staff'' would be most typical in these cases. As we noted under the Standardization of Clinical Labor Tasks (section II.B) part of this final rule, we continue to believe that setting and maintaining clinical labor standards provides greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes. For additional discussion, we direct readers to the individual code families affected by our proposed preservice clinical labor times (CPT codes 46020 and 46030 and CPT codes 61736 and 61737).

We refer readers to section II.B. of this final rule, Determination of Practice Expense Relative Value Units (PE RVUs), for more information regarding the collaborative work of CMS and the RUC in improvements in standardizing clinical labor tasks.

(4) Recommended Items That Are Not Direct PE Inputs

In some cases, the PE worksheets included with the RUC's recommendations include items that are not clinical labor, disposable supplies, or medical equipment or that cannot be allocated to individual services or patients. We addressed these kinds of recommendations in previous rulemaking (78 FR 74242), and we do not use items included in these recommendations as direct PE inputs in the calculation of PE RVUs.

(5) New Supply and Equipment Items

The RUC generally recommends the use of supply and equipment items that already exist in the direct PE input database for new, revised, and potentially misvalued codes. However, some recommendations include supply or equipment items that are not currently in the direct PE input database. In these cases, the RUC has historically recommended that a new item be created and has facilitated our pricing of that item by working with the specialty societies to provide us copies of sales invoices. For CY 2022 we received invoices for several new supply and equipment items. Tables 23 and 24 detail the invoices received for new and existing items in the direct PE database. As discussed in section II.B. of this final rule, Determination of Practice Expense Relative Value Units, we encourage stakeholders to review the prices associated with these new and existing items to determine whether these prices appear to be accurate. Where prices appear inaccurate, we encourage stakeholders to submit invoices or other information to improve the accuracy of pricing for these items in the direct PE database by February 10th of the following year for consideration in future rulemaking, similar to our process for consideration of RUC recommendations.

We remind stakeholders that due to the relativity inherent in the development of RVUs, reductions in existing prices for any items in the direct PE database increase the pool of direct PE RVUs available to all other PFS services. Tables 23 and 24 also include the number of invoices received and the number of nonfacility allowed services for procedures that use these equipment items. We provide the nonfacility allowed services so that stakeholders will note the impact the particular price might have on PE relativity, as well as to identify items that are used frequently, since we believe that stakeholders are more likely to have better pricing information for items used more frequently. A single invoice may not be reflective of typical costs and we encourage stakeholders to provide additional invoices so that we might identify and use accurate prices in the development of PE RVUs.

In some cases, we do not use the price listed on the invoice that accompanies

the recommendation because we identify publicly available alternative prices or information that suggests a different price is more accurate. In these cases, we include this in the discussion of these codes. In other cases, we cannot adequately price a newly recommended item due to inadequate information. Sometimes, no supporting information regarding the price of the item has been included in the recommendation. In other cases, the supporting information does not demonstrate that the item has been purchased at the listed price (for example, vendor price quotes instead of paid invoices). In cases where the information provided on the item allows us to identify clinically appropriate proxy items, we might use existing items as proxies for the newly recommended items. In other cases, we include the item in the direct PE input database without any associated price. Although including the item without an associated price means that the item does not contribute to the calculation of the final PE RVU for particular services, it facilitates our ability to incorporate a price once we obtain information and are able to do so.

(6) Service Period Clinical Labor Time in the Facility Setting

Generally speaking, our direct PE inputs do not include clinical labor minutes assigned to the service period because the cost of clinical labor during the service period for a procedure in the facility setting is not considered a resource cost to the practitioner since Medicare makes separate payment to the facility for these costs. We address code-specific refinements to clinical labor in the individual code sections.

(7) Procedures Subject to the Multiple Procedure Payment Reduction (MPPR) and the OPPS Cap

We note that the list of services for the upcoming calendar year that are subject to the MPPR on diagnostic cardiovascular services, diagnostic imaging services, diagnostic ophthalmology services, and therapy services; and the list of procedures that meet the definition of imaging under section 1848(b)(4)(B) of the Act, and therefore, are subject to the OPPS cap; are displayed in the public use files for the PFS proposed and final rules for each year. The public use files for CY 2022 are available on the CMS website under downloads for the CY 2022 PFS final rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysisianFeeSched/PFS-Federal-Regulation-Notices.html.* For more information regarding the history of the MPPR policy, we refer readers to the CY 2014 PFS final rule with comment period (78 FR 74261 through 74263).

Effective January 1, 2007, section 5102(b)(1) of the Deficit Reduction Act of 2005 (Pub. L. 109–171) (DRA) amended section 1848(b)(4) of the Act to require that, for imaging services, if—(i) The TC (including the TC portion of a global fee) of the service established for a year under the fee schedule without application of the geographic adjustment factor, exceeds (ii) The Medicare OPD fee schedule amount established under the prospective payment system (PPS) for HOPD services under section 1833(t)(3)(D) of the Act for such service for such year, determined without regard to geographic adjustment under paragraph (t)(2)(D) of such section, the Secretary shall substitute the amount described in clause (ii), adjusted by the geographic adjustment factor [under the PFS], for the fee schedule amount for such TC for such year. As required by the section 1848(b)(4)(A) of the Act, for imaging services furnished on or after January 1, 2007, we cap the TC of the PFS payment amount for the year (prior to geographic adjustment) by the Outpatient Prospective Payment System (OPPS) payment amount for the service (prior to geographic adjustment). We then apply the PFS geographic adjustment to the capped payment amount. Section 1848(b)(4)(B) of the Act defines imaging services as ''imaging and computer-assisted imaging services, including X-ray, ultrasound (including echocardiography), nuclear medicine (including PET), magnetic resonance imaging (MRI), computed tomography (CT), and fluoroscopy, but excluding diagnostic and screening mammography.'' For more information regarding the history of the cap on the TC of the PFS payment amount under the DRA (the ''OPPS cap''), we refer readers to the CY 2007 PFS final rule with comment period (71 FR 69659 through 69662).

For CY 2022, we identified new and revised codes to determine which services meet the definition of ''imaging services'' as defined above for purposes of this cap. Beginning for CY 2022, we proposed to include the following services on the list of codes to which the OPPS cap applies: CPT codes 0633T (*Computed tomography, breast, including 3D rendering, when performed, unilateral; without contrast material*), 0634T (*Computed tomography, breast, including 3D rendering, when performed, unilateral; with contrast material(s)*), 0635T (*Computed tomography, breast, including 3D rendering, when performed, unilateral; without contrast, followed by contrast material(s)*), 0636T (*Computed tomography, breast, including 3D rendering, when performed, bilateral; without contrast material(s)*), 0637T (*Computed tomography, breast, including 3D rendering, when performed, bilateral; with contrast material(s)*), 0638T (*Computed tomography, breast, including 3D rendering, when performed, bilateral; without contrast, followed by contrast material(s)*), 0648T (*Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session*), 0649T (*Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)*), 77089 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk*), 77090 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk, technical preparation and transmission of data for analysis to be performed elsewhere*), 77091 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk, technical calculation only*), 77092 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk interpretation and report on fracture risk only, by other qualified health care professional*), 91113 (*Gastrointestinal tract imaging, intraluminal (eg, capsule endoscopy), colon, with interpretation and report*), and 93319 (*3D echocardiographic*

imaging and postprocessing during transesophageal echocardiography or transthoracic echocardiography for congenital cardiac anomalies for the assessment of cardiac structure(s) (eg, cardiac chambers and valves, left atrial appendage, intraterial septum, interventricular septum) and function, when performed). We believe that these codes meet the definition of imaging services under section 1848(b)(4)(B) of the Act, and thus, should be subject to the OPPS cap.

We did not receive public comments on this proposal. We are finalizing the addition of the services listed above to the list of codes to which the OPPS cap applies, as proposed.

4. Valuation of Specific Codes for CY 2022

(1) Anesthesia for Cardiac Electrophysiologic Procedures (CPT Code 00537)

In October 2019, the RUC reviewed CPT code 00537 (*Anesthesia for cardiac electrophysiologic procedures including radiofrequency ablation*) and recommended that the code be surveyed for the October 2020 meeting. This service was identified by the RUC via the high volume growth screen for services with total Medicare utilization of 10,000 or more that have increased by at least 100 percent from 2009 through 2014. Additionally, at the October 2019 RUC meeting, the RUC approved an anesthesia reference service list (RSL) and a method to assess the relativity among services on the anesthesia fee schedule that uses a revised building block methodology and a regression line analysis. The RUC has stated that the revised building block methodology generates ''proxy RVUs'' that are then compared against the RSL regression line to assess relativity among anesthesia services. The RUC has indicated that their primary and approved method for anesthesia base unit valuation continues to be the anesthesia survey results, and that the building block and regression line analysis are used as a supplemental validation measure.

The RUC recommended a valuation of 12 base units for CPT code 00537. We disagree with the RUC-recommended valuation of 12 base units for CPT code 00537. After performing a RUC database search of codes with similar total times and post-induction period procedure anesthesia (PIPPA) times, 12 base units appears to be on the very high range. We proposed a valuation of 10 base units supported by reference codes CPT code 00620 (*anesthesia for procedures on the thoracic spine and cord, not otherwise specified*) and CPT code 00600 (*Anesthesia for procedures on cervical spine and cord; not otherwise specified*), which both have a valuation of 10 base units. CPT code 00620 has a very similar total time of 235 minutes and CPT code 00600 has a higher total time of 257 minutes and the same base unit value of 10, which indicates that this is an appropriate valuation. Additionally, we note that the survey total time for CPT code 00537 increased from 150 to 238 minutes, resulting in a survey result 25th percentile valuation of 10 base units.

We proposed the RUC-recommended direct PE inputs for CPT code 00537.

Comment: Commenters disagreed with the proposed valuation of 10 base units for CPT code 00537 and stated that CMS should instead finalize the RUC-recommended valuation of 12 base units. Commenters disagreed with CMS using reference codes CPT code 00620 (*anesthesia for procedures on the thoracic spine and cord, not otherwise specified*) and CPT code 00600 (*Anesthesia for procedures on cervical spine and cord; not otherwise specified*) as a basis for the valuation of 10 base units. Commenters stated that CMS ignored the reference codes chosen by the RUC and instead used reference codes that were not surveyed, which makes the time source unknown. They also stated that CMS ignored the validation measures that the RUC used to support their recommendations and that CMS only considered the total times of the reference codes and not all inputs of time, such as post induction time. Additionally, commenters stated that they believe CMS did not consider the intensity of the service for CPT code 00537, as the supporting reference codes have a lower intensity and are not clinically similar.

Response: We disagree and continue to believe that using multiple methodologies for identifying potential base units for anesthesia services is appropriate. Codes are, and have been over many years, often valued by comparisons to codes with similar times, including the total time of a service. Therefore, we consider total time to be an appropriate measure for comparison. We also use reference codes to validate a base unit valuation. When using reference codes to support a proposed valuation, we do not consider them as a direct ''cross-walk'' between the CPT code that is being revalued and the chosen reference code. Instead, a reference code is used as a supportive check in validating times. For CPT code 00600 and CPT code 00620, we believe that the similarities in time, as well as the base unit value of 10 being the survey 25th percentile result, make them appropriate reference codes. We continue to believe that the relative value system of the PFS is such that all services are appropriately subject to comparison to one another. We do not agree that codes must share the same patient population, utilization, age of the CPT code, or survey tool to serve as an appropriate reference code. We do consider clinical information associated with the intensity of a physician's work provided by the RUC and other stakeholders as part of our review process, although we remind readers again that we do not agree that codes must share the same clinical aspects of work to serve as an appropriate reference code. For CPT code 00537, we considered the intensity of the service as it relates to other CPT codes on the fee schedule, the total time of the service, as well as aspects of time compared to supporting reference codes to determine the base unit valuation for this CPT code. For additional information regarding our use of supporting reference codes and our use of time inputs as a tool for comparison, we refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2. of the final rule).

Comment: We received one comment in support of our proposed valuation for CPT code 00537.

Response: We acknowledge and appreciate the support of a base unit valuation of 10 for CPT code 00537.

After consideration of these public comments, we are finalizing the base unit valuation and direct PE inputs for CPT code 00537 as proposed.

(2) Anesthesia Services for Image-Guided Spinal Procedures (CPT Codes 01937, 01938, 01939, 01940, 01941, and 01942)

In 2017, the RUC identified CPT code 01936 (*Anesthesia for percutaneous image guided procedures on the spine and spinal cord; therapeutic*) as possibly needing refinement due to inaccurate reporting via the high-volume growth screen. The Relativity Assessment Workgroup reviewed data on what procedures were reported with this anesthesia code. In October 2019, the Workgroup reviewed this service and recommended that it be referred to the CPT Editorial Panel to create more granular codes. In October 2020, the CPT Editorial Panel replaced CPT codes 01935 and 01936 with six new codes to report percutaneous image-guided spine and spinal cord anesthesia procedures. These CPT codes are 01937 (*Anesthesia for percutaneous image-guided*

injection, drainage or aspiration procedures on the spine or spinal cord; cervical or thoracic), 01938 (*Anesthesia for percutaneous image guided injection, drainage or aspiration procedures on the spine or spinal cord; lumbar or sacral*), 01939 (*Anesthesia for percutaneous image guided destruction procedures by neurolytic agent on the spine or spinal cord; cervical or thoracic*), 01940 (*Anesthesia for percutaneous image guided destruction procedures by neurolytic agent on the spine or spinal cord; lumbar or sacral*), 01941, (*Anesthesia for percutaneous image guided neuromodulation or intravertebral procedures*) (*e.g., Kyphoplasty, vertebroplasty) on the spine or spinal cord; cervical or thoracic*) and 01942 (*Anesthesia for percutaneous image guided neuromodulation or intravertebral procedures* (*e.g., Kyphoplasty, vertebroplasty) on the spine or spinal cord; lumbar or sacral*).

We proposed the RUC-recommended valuation of 4 base units for CPT codes 01937, 01938, 01939, and 01940.

We disagreed with the RUC-recommend valuation of 6 base units for CPT codes 01941 and 01942. After performing a RUC database search of codes with similar total times and post-induction period procedure anesthesia (PIPPA) times, 6 base units for CPT codes 01941 and 01942 appeared to be a high valuation. We proposed a valuation of 5 base units for both codes supported by a reference code, CPT code 00813 (*Anesthesia for combined upper and lower gastrointestinal endoscopic procedures, endoscope introduced both proximal to and distal to the duodenum*). CPT code 00813 has a valuation of 5 base units with a higher PIPPA time of 40 minutes, as well as a higher total time of 70 minutes. The RUC noted that CPT codes 01941 and 01942 should have a higher base unit valuation than the other similar codes within this family due to the complex nature of these procedures that have a more intensive anesthesia process. The RUC supported their recommendation with a crosswalk code, CPT code 00732 (*Anesthesia for upper gastrointestinal endoscopic procedures, endoscope introduced proximal to duodenum; endoscopic retrograde cholangiopancreatography (ECRP)*). CPT code 00732 has a valuation of 6 base units, a total time of 100 minutes, and a PIPPA time of 65 minutes. CPT codes 01941 and 019427 have a total time of 58 minutes and a PIPPA time of 20 minutes. We agreed that a more complex procedure may require a higher base unit valuation within a code family; however, given the disparity in total and PIPPA time, we disagreed with the use of this crosswalk code to support a valuation of 6 base units and instead proposed a valuation of 5 base units supported by reference CPT code 00813, which has higher times and the same base unit valuation.

We proposed the RUC-recommended direct PE inputs for all six codes in the family.

Comment: Commenters disagreed with the proposed valuation of 5 base units for CPT code 01941 and CPT code 01942 and stated that CMS should finalize the RUC-recommended base unit of 6 for both CPT codes. Commenters disagreed with our use of CPT code 00813 (*Anesthesia for combined upper and lower gastrointestinal endoscopic procedures, endoscope introduced both proximal to and distal to the duodenum*) as a reference code for the proposed valuation of 5 base units for CPT code 01941 and CPT code 01942. Commenters stated that from a clinical perspective, the RUC's reference code was more appropriate and similar in complexity.

Response: We disagree that a supporting reference code must have similar clinical features. We believe that other methods of comparison, such as total and intra-service time, can also be used to reach appropriate valuations when clinical features are disparate. The relativity of the PFS allows for comparisons amongst all codes. We also do not consider supporting reference codes as direct ''cross-walks''. We use supporting reference codes to further validate valuations that are based on comparisons of time and intensity, but not necessarily clinical similarities. The higher total and post induction times for our chosen reference code, with a base unit value of 5, make it an appropriate code for purposes of comparison with CPT code 01941 and CPT code 01942 to reach a base unit valuation. Additionally, we note that the RUC chose the survey 25th percentile result or lower for every other CPT code in this family, but for CPT code 01941 and 01942 they chose a survey result value that is above the 25th percentile. We believe that using the survey 25th percentile of 5 base units is appropriate to maintain consistency within the family for purposes of valuation and that a base unit valuation of 5 will also account for the increase in intensity of CPT code 01941 and CPT code 01942. For additional information regarding our use of supporting reference codes, we refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2. of this final rule).

After consideration of these public comments, we are finalizing the base unit valuation and direct PE inputs for this code family as proposed.

(3) Closed Treatment of Nasal Bone Fracture (CPT Codes 21315 and 21320)

We agreed with the RUC's recommendation to change CPT codes 21315 (*Closed treatment of nasal bone fracture; without stabilization*) and 21320 (*Closed treatment of nasal bone fracture; with stabilization*) to 000-day global period codes from 010-day global period codes to account for the degree of swelling within 10 days post-procedure, and because the patient can remove their own splint at home for CPT code 21320. For CPT codes 21315 and 21320, we disagreed with the RUC-recommended work RVUs of 2.00 and 2.33, respectively, as we believe these values do not adequately reflect the surveyed reductions in physician time and the change to a 000-day global period from a 010-day global period for these CPT codes. We proposed a work RVU of 0.96 for CPT code 21315 and 1.59 for CPT code 21320 based on the reverse building block methodology to remove the RVUs associated with the 010-day global period and the surveyed reductions in physician time. We believe that the proposed work RVU of 0.96 for CPT code 21315 adequately accounts for the 50 percent decrease in intraservice and postservice time, a 31-minute decrease in total time, and a change to a 000-day global period which will allow for separately billable E/M visits as medically necessary. We believe that the proposed work RVU of 1.59 for CPT code 21320 adequately accounts for the 5-minute decrease in intraservice time, 3-minute decrease in total time, and 48 percent decrease in postservice time. Absent an explicitly stated rationale for an intensity increase for CPT codes 21315 and 21320, we proposed to adjust the work RVU to reflect significant decreases in surveyed physician time.

The global period changes from 010-day to 000-day allow for separately billable E/M visits relating to CPT codes 21315 and 21320, therefore we removed RVUs that we believed were attributable to the currently bundled E/M visits totaling 1.30 RVUs for CPT code 21315 and 0.35 RVUs for CPT code 21320. CPT code 21315 is currently bundled with one post-operative follow up office visit, CPT code 99213 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low*

level of medical decision making. When using time for code selection, 20–29 minutes of total time is spent on the date of the encounter). CPT code 21320 is currently bundled with half of a post-operative follow up office visit, CPT code 99212 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10–19 minutes of total time is spent on the date of the encounter*). We do not believe the RUC adequately accounted for the loss of these E/M visits in their recommended work RVUs for CPT codes 21315 and 21320. The RUC's recommendations also seem to dismiss the significant changes in surveyed physician time, without a persuasive explanation of a significant increase in IWPUT that results from the RUC's recommended work RVUs for CPT codes 21315 and 21320. We believe the surveyed decreases in physician time in conjunction with the loss of the post-operative visits for CPT codes 21315 and 21320 merit decreases in the work RVUs from the current work RVUs.

We considered using a modified total time ratio methodology given the age and potentially flawed methodology used to arrive at the current valuation. The modified total time ratio calculation does not include the loss of 8 minutes of post-operative time attributable to the change from a 010-day global period to a 000-day global period for CPT code 21320 and loss of 23 minutes of post-operative time for CPT code 21315. This modified time ratio methodology reflects how the physician time is changing in the pre-, intra-, and postservice periods when a code's global period is changing, given that E/M services can be billed as medically necessary and appropriate for a 000-day global code. The total time ratio between the current and proposed total times for CPT code 21315, excluding the 23 minutes of post-operative time in the current total time, equals 1.64. We arrived at 1.64 by modifying the original total time ratio equation to equal the proposed new total time divided by the current time, less any time attributable to the post-operative global period, then multiplied by the current work RVU. The current total time for CPT code 21315 without the 23 minutes of post-operative time that will be lost by going from a 010-day to a 000-day global period code is 76 minutes, therefore, the modified total time ratio = (68 minutes/(99 minutes − 23 minutes)) * 1.83 = 1.64. When using the original total time ratio methodology for CPT code 21315, it shows a 31 percent decrease in total time [(68 minutes − 99 minutes)/99 minutes = −0.31], whereas the modified methodology shows that there is only an 11 percent decrease in newly proposed pre-, intra-, and postservice time from the current times [(68 minutes − 76 minutes)/76 minutes = −0.11].

The same modified total time ratio methodology could be applicable to CPT code 21320. The current total time for CPT code 21320 without the 8 minutes of post-operative time that will be lost by going from a 010-day to a 000-day global period code is 70 minutes, therefore, the modified total time ratio = (75 minutes/(78 minutes − 8 minutes) * 1.88 = 2.01. The modified methodology shows that the pre-, intra-, and postservice time is increasing by 7 percent for CPT code 21320, whereas the original methodology, which accounts for the loss of the 8 post-operative minutes in the total time ratio, shows a 4 percent decrease in total time that would indicate the need for a work RVU decrease. We recognize that we have not previously used a modified total time approach to consider work RVU values when there is a change in the global period for a service in conjunction with significant surveyed changes to the pre-, intra-, and postservice times; therefore, we solicited comment on application of the modified total time ratio approach to value services that have a global period change and significant surveyed physician time changes. We believe this methodology may account for the loss of post-operative visits and the surveyed changes in the pre-, intra-, and postservice times in this unique situation.

Comment: Commenters stated that CMS did not address the compelling evidence submitted with the RUC recommendations for CPT codes 21315 and 21320. Commenters stated that CMS dismisses the fact that services may change due to technological advances, changes in the patient population, shifts in the specialty of physicians providing services or changes in the physician work or intensity required to perform services, and CMS only proposes blanket reductions instead of considering how a service may have changed or increased over time. Commenters requested that CMS address the compelling evidence submitted with the RUC recommendations when the agency does not accept the RUC's recommended work RVUs.

Response: The concept of compelling evidence was developed by the RUC as part of its work RVU review process for individual codes. The RUC determines whether there is compelling evidence to justify an increase in valuation. The RUC's compelling evidence criteria include documented changes in physician work, an anomalous relationship between the code and multiple key reference services, evidence that technology has changed physician work, analysis of other data on time and effort measures, and evidence that incorrect assumptions were made in the previous valuation of the service. While we appreciate the submission of this additional information for review, we emphasize that the RUC developed the concept of compelling evidence for its own review process; an evaluation of ''compelling evidence,'' at least as conceptualized by the RUC, is not part of our review process, as our focus is the time and intensity of services, in accordance with the statute. With that said, we do consider changes in technology, patient population, and other compelling evidence criteria, as such evidence may affect the time and intensity of a service under review. For example, new technology may cause a service to become easier or more difficult to perform, with corresponding effects on the time and intensity of the service. However, we are under no obligation to adopt the same review process or compelling evidence criteria as the RUC. We instead focus on evaluating and addressing the time and intensity of services when reviewing potentially misvalued codes because section 1848(c)(1)(A) of the Act specifically defines the work component as the resources that reflect time and intensity in furnishing the service.

Comment: Commenters disagreed with our reference to older work time sources, and stated that their use led to the proposal of work RVUs based on flawed assumptions. Commenters also stated that it was invalid to draw comparisons between the current work times and work RVUs to the newly surveyed work time and work RVUs as recommended by the RUC, particularly with regards to the removal of RVUs that we believed were attributable to the global period. Commenters unanimously disagreed with the subtraction of the increased CY 2021 office/outpatient E/M work RVUs of 0.70 and 1.30 for CPT codes 99212 and 99213, respectively, to arrive at our proposed work RVUs for CPT codes 21315 and 21320.

Response: The global period changes from 010-day to 000-day allow for separately billable E/M visits relating to CPT codes 21315 and 21320, therefore we removed RVUs that we believed

were attributable to the currently bundled E/M visits totaling 1.30 RVUs (when billed separately) for CPT code 21315 and 0.35 RVUs (when billed separately) for CPT code 21320. We used the reverse building block methodology to calculate the proposed work RVUs, which accounts for the longstanding time and intensity associated with CPT code 99212 and CPT code 99213 for bundled office visits in the surgical global period, rather than the increased CY 2021 office/outpatient E/M work RVUs of 0.70 and 1.30 for CPT codes 99212 and 91213, respectively, as commenters suggested. In the proposed rule, we stated that CPT code 21315 is currently bundled with one post-operative follow up office visit, CPT code 99213. When separately furnished, practitioners could bill for a total of 1.30 work RVUs, as the post-operative follow up office visit would no longer be bundled in the global period, therefore the practitioner could bill for the increased CY 2021 office/outpatient E/M value. CPT code 21320 is currently bundled with half of a post-operative follow up office visit, CPT code 99212. When separately furnished, practitioners could bill for the increased CY 2021 office/outpatient E/M value a total of 0.35 work RVUs for the half of a post-operative follow up office visit, CPT code 99212, as the half of a post-operative follow up office visit would no longer be bundled in the global period. We continue to believe that the RUC did not adequately account for the removal of these E/M visits as a result of the global period changes in their recommended work RVUs for CPT codes 21315 and 21320.

We believe that it is crucial that the code valuation process take place with the understanding that the existing work times that have been used in PFS ratesetting are accurate. We recognize that adjusting work RVUs for changes in time is not always a straightforward process and that the intensity associated with changes in time is not necessarily always linear, which is why we apply various methodologies to identify several potential work values for individual codes. However, we reiterate that we believe it would be irresponsible to ignore changes in time based on the best data available, and that we are statutorily obligated to consider both time and intensity in establishing work RVUs for PFS services. For additional information regarding the use of old work time values that were established many years ago and have not since been reviewed in our methodology, we refer readers to our discussion of the subject in the CY 2017 PFS final rule (81 FR 80273 through 80274).

Comments: Commenters opposed our proposed work RVUs for CPT codes 21315 and 21320 and urged us to finalize the RUC-recommended work RVUs for these codes. Commenters stated that CMS' reverse building block, total time ratio, and modified total time ratio calculations ignore magnitude estimates as indicated by physicians who perform these services and compromise the correct relativity of these services. Commenters also stated that CMS' calculations ignore and discount the intensity of these services.

Response: We disagree with the commenters and continue to believe that reverse building block and time ratio calculations are appropriate methods for identifying potential work RVUs for PFS services, particularly when the alternative values recommended by the RUC and other commenters do not account for information provided by surveys which suggests that the amount of time involved in furnishing the service has changed significantly. For additional information regarding the use of old work time values that were established many years ago and have not since been reviewed in our methodology, we refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.), as well as a comprehensive discussion in the CY 2017 PFS final rule (81 FR 80273 through 80274). We note that the modified total time ratio discussed above was not used to arrive at the valuation for CPT codes 21315 or 21320, but was discussed solely to seek comment on a potential approach to value services that have a global period change and significant surveyed physician time changes.

We continue to believe that using the reverse building block methodology to calculate a proposed work RVU of 0.96 for CPT code 21315 and 1.59 for CPT code 21320 was appropriate. Based on the aforementioned references to section II.E.2. and the CY 2017 PFS final rule (81 FR 80273 through 80274) and consideration of the comments, we are finalizing the work RVUs for CPT codes 21315 and 21320 as proposed. We believe the work RVU of 0.96 for CPT code 21315 adequately accounts for the 50 percent decrease in intraservice and postservice time, a 31-minute decrease in total time, and a change to a 000-day global period which will allow for separately billable E/M visits as medically necessary for CPT code 21315. We also believe that the work RVU of 1.59 for CPT code 21320 adequately accounts for a 5-minute decrease in intraservice time, 3-minute decrease in total time, 48 percent decrease in postservice time, and a change to a 000-day global period which will allow for separately billable E/M visits as medically necessary for CPT code 21320.

We are also finalizing the RUC-recommended direct PE inputs without refinements and the surveyed physician times for CPT codes 21315 and 21320 as proposed.

(4) Insertion of Interlaminar/Interspinous Device (CPT Code 22867)

We proposed the RUC-recommended work RVU of 15.00 for CPT code 22867 (*Insertion of interlaminar/interspinous process stabilization/distraction device, without fusion, including image guidance when performed, with open decompression, lumbar; single level*). The RUC did not recommend changes to the current PE inputs, and we did not propose any changes to the current PE inputs.

Comment: Several commenters stated that they supported the proposal of the RUC-recommended work RVU 15.00 for CPT code 22867.

Response: We appreciate the support from the commenters for our proposed RUC-recommended work RVU of 15.00 for CPT code 22867.

Comment: Some commenters expressed appreciation for the acceptance of the new, higher work RVU of 15.00, but urged consideration of adding additional work RVUs to the adjusted value to represent the physician work and intensity of CPT code 22867. The commenters stated that CPT code 22867 includes the work of an open laminectomy, which is coded as CPT code 63047 (*Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s], [eg, spinal or lateral recess stenosis]), single vertebral segment; lumbar*). One commenter stated that a work RVU of 19.62 would be more appropriate for CPT code 22867. This work RVU was derived by adding the work RVU of CPT code 63047, valued at 15.37, to the work RVU of add-on CPT code 22853 (*Insertion of interbody biomechanical device(s) (eg, synthetic cage, mesh) with integral anterior instrumentation for device anchoring (eg, screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)*), valued at 4.25. Other commenters asserted that a work RVU of 20.00 is more appropriate.

Commenters stated that new research was available as of July 1, 2021 that suggests CPT code 22867 requires more physician work than CPT code 63047 alone.

Response: We appreciate the additional information, but we continue to believe that the original survey results and RUC's reaffirmed value for CPT code 22867 accurately reflect the time and intensity of CPT code 22867. At the January 2021 meeting, the RUC agreed that a third survey would not be useful at the time and agreed to reaffirm the January 2016 RUC recommendations. Although we will consider any information submitted by stakeholders for valuation during the comment period, as we do for all codes which are subject to notice and comment rulemaking, the newly available research was not discussed in the proposed rule, and CMS did not broach the topic of the amount of physician work that factors into CPT code 22867 versus CPT code 63047 alone. Further, CMS did not propose a work RVU of 20.00 for CPT code 22867, therefore the public has not had notice or the opportunity to comment on this potential policy. Lastly, the AMA RUC did not review or consider the validity of the assertions in the research in their recommendations for CPT code 22867. We continue to believe that this is important to be transparent and have the full benefit of stakeholder comments before establishing values, so we are not finalizing a work RVU of 20.00 for CPT code 22867. We expect that new research would be considered in any future recommendations or rulemaking.

After consideration of the comments, we are finalizing the proposed work RVU of 15.00 for CPT code 22867.

(5) Treatment of Foot Infection (CPT Codes 28001, 28002, and 28003)

Through a screen of codes with 010-day global period service with more than one post-operative follow-up office visit, the RUC identified this family of major surgical codes that did not have consistent global periods. The RUC conducted a survey of these codes as 000-day globals for their April 2020 meeting, and the review was postponed until October 2020. CPT code 28001 (*Incision and drainage, bursa, foot*) (work RVU of 2.78 with 31 minutes of intraservice time) currently has a 010-day global period with one post-operative follow-up office visit, CPT code 99212 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A problem focused history; A problem focused examination; Straightforward medical decision making. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self limited or minor. Typically, 10 minutes are spent face-to-face with the patient and/or family*). Survey results from podiatrists and orthopedic surgeons yielded a median work RVU of 2.00 with 17 minutes of preservice evaluation time, 3 minutes of preservice positioning time, 5 minutes of preservice scrub/dress/wait time, 20 minutes intraservice time, and 15 minutes immediate postservice time for a total of 60 minutes total time. We proposed the RUC-recommended work RVU of 2.00 and the surveyed physician times for this 000-day global code.

CPT code 28002 (*Incision and drainage below fascia, with or without tendon sheath involvement, foot; single bursal space*) (work RVU of 5.34 with 30 minutes of intraservice time) currently has a 010-day global period with two post-operative follow-up office visits, CPT code 99213 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: An expanded problem focused history; An expanded problem focused examination; Medical decision making of low complexity. Counseling and coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low to moderate severity. Typically, 15 minutes are spent face-to-face with the patient and/or family*); and a half day hospital discharge CPT code 99238 (*Hospital discharge day management; 30 minutes or less*). For CPT code 28002, the RUC recommended 30 minutes of preservice evaluation time, 5 minutes of preservice positioning time, 15 minutes of preservice scrub/dress/wait time, 30 minutes of intraservice time, and 20 minutes of immediate postservice time, for a total of 100 minutes total time. The RUC recommended a work RVU of 3.50 and the surveyed physician times for this 000-day global code.

We note that the result from the survey's 50th percentile work RVU was 3.73 and that the survey's 25th percentile work RVU was 2.80. As this CPT code is converting from a 010-day global to a 000-day global we find the reference CPT code 43193 (*Esophagoscopy, rigid, transoral; with biopsy, single or multiple*) as a more suitable value of 2.79 work RVUs with a similar 30 minutes of intraservice physician time and 106 minutes of total time. We proposed a work RVU of 2.79 for CPT code 28002 and we proposed the RUC surveyed physician times for this 000-day global code.

CPT code 28003 (*Incision and drainage below fascia, with or without tendon sheath involvement, foot; multiple areas*) currently has a 090-day global period with two post-operative follow-up office visits, CPT code 99212 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A problem focused history; A problem focused examination; Straightforward medical decision making. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self limited or minor. Typically, 10 minutes are spent face-to-face with the patient and/or family*); three post-operative follow-up office visits, CPT code 99213 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: An expanded problem focused history; An expanded problem focused examination; Medical decision making of low complexity. Counseling and coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low to moderate severity. Typically, 15 minutes are spent face-to-face with the patient and/or family.*); one post-operative CPT code 99231 (*Subsequent hospital care, per day, for the evaluation and management of a patient, which requires at least 2 of these 3 key components: A problem focused interval history; A problem focused examination; Medical decision making that is straightforward or of low complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the patient is stable, recovering or improving. Typically, 15 minutes are spent at the bedside and on the patient's hospital floor or unit*); one post-operative CPT code 99232 (*Subsequent hospital care, per day, for the evaluation and*

management of a patient, which requires at least 2 of these 3 key components: An expanded problem focused interval history; An expanded problem focused examination; Medical decision making of moderate complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the patient is responding inadequately to therapy or has developed a minor complication. Typically, 25 minutes are spent at the bedside and on the patient's hospital floor or unit), and one hospital discharge CPT code 99238 (*Hospital discharge day management; 30 minutes or less*), for a total of eight post op follow-up visits, across five types of E/M and hospital care codes. For CPT code 28003, the RUC recommends 40 minutes of preservice evaluation time, 10 minutes of preservice positioning time, 15 minutes of preservice scrub/dress/wait time, 45 minutes of intraservice time, and 20 minutes of immediate postservice time, for a total time of 130 minutes. We proposed the RUC-recommended work RVU of 5.28 and surveyed physician times for this 000-day global code.

In order to complete the adjustments for making these Treatment of Foot Infection codes consistent as 000-day global codes, the RUC adjusted the PE inputs for these codes to reflect their proposed global periods from 010 and 090-day globals to 000-day global, and to reflect the use of more typical supplies, equipment, and clinical labor employed now, than what was necessary a decade ago. Some relatively small valued supply items were removed, while other items were added, and clinical labor times were largely adjusted to remove minutes from the post-operative follow-up office visit times in the 010 and 090-day global codes. We proposed all of the PE refinements as recommended by the RUC for these codes.

Comment: Commenters supported CMS' proposal to adopt the AMA RUC-recommended work RVU of 2.00 for CPT code 28001 and work RVU of 5.28 for CPT code 28003, in this family of codes. However, commenters objected to the CMS proposed work RVU of 2.79 for CPT code 28002, as the AMA RUC recommended a higher work RVU of 3.50. Commenters stated that a work RVU of 2.79 for this code is too low and does not reflect the work intensity of CPT code 28002. Commenters objected to CMS' consideration of the physician work value 25th percentile survey result, which has a work RVU of 2.80. Commenters noted that the AMA RUC's 50th percentile survey result—a work RVU of 3.73—was too high, indicating that the AMA RUC recommend work RVU should fall somewhere between these two percentiles.

Response: We note that the current work RVU for CPT code 28002 as a 010-day global code with 30 minutes of intra-service time and 163 minutes of total time is 5.34. Since the AMA RUC recommended that this family of codes (Treatment of Foot Infection (CPT codes 28001, 28002, and 28003)) be revised to 000-day globals, any post-op follow-up visits included with CPT code 28002 and this family of codes, would be billed separately. We would expect that total time for CPT code 28002 would be revised to reflect this change. Specifically, CPT code 28002, a 010-day global code, is bundled with two E/M visits: CPT code 99213 (0.97 work RVUs and 23 minutes total time) and one half-day CPT code 99238 Hospital Discharge Day service (1.28 work RVUs and 38 minutes total time). Removing these postoperative services from the bundle should change the total time of CPT code 28002 from 163.0 minutes to 100.0 minutes.

Removing the post-op follow-up visits from the total time of CPT code 28002 results in a total time decrease of 65 minutes, but the AMA RUC recommended adding 2 minutes to the procedure's pre-positioning time, which nets to removing 63 minutes from current total of 163 minutes to a new total time of 100 minutes. This is a reduction of about 39 percent from the current total time for CPT code 28002. CPT code 99213 has a work RVU of 0.97. CMS multiplies this work RVU by two post-op visits, which totals 1.94, and the half-day Hospital discharge of CPT code 99239 is 0.64 work RVUs (1.28 divided by 2). CMS adds 1.94 and 0.64 work RVUs to get 2.58 work RVUs. Subtracting 2.58 work RVUs from the original 5.34 work RVUs for CPT code 28002 is 2.76 work RVUs. This 2.76 value, plus the survey's 25th percentile level work RVU of 2.80, and the comparator CPT code 43193 with a work RVU of 2.79, in combination suggests that the proposed work value of 2.79 is a proper valuation for CPT code 28002. This value maintains a proper relative relationship of work RVUs and time within this family of codes.

Comment: Commenters suggested alternative cross walk codes for CPT code 28002 that differed from the comparator code proposed by CMS (CPT code 43193). Specifically, they suggested CPT codes with the same 000-day global periods and the same intra-service minutes but with much higher work RVUs. The AMA RUC specifically suggested several codes as alternative crosswalks, including CPT code 31287 (*Nasal/sinus endoscopy, surgical, with sphenoidotomy;* with a work RVU of 3.50, 30 minutes of intra-service time, and 86 minutes of total time), CPT code 41530 (*Submucosal ablation of the tongue base, radiofrequency, 1 or more sites, per session;* with a work RVU of 3.50, 20 minutes intra-service time, and 95 minutes total time), CPT code 52334 (*Cystourethroscopy with insertion of ureteral guide wire through kidney to establish a percutaneous nephrostomy, retrograde*; with a work RVU of 3.37, 30 minutes intra-service time, and 75 minutes total time), CPT code 43194 (*Esophagoscopy, rigid, transoral; with removal of foreign body(s);* with a work RVU of 3.51, 30 minutes of intra-service time, and 107 minutes total time) and CPT code 58558 (*Biopsy and/or removal of polyp of the uterus using an endoscope;* with a work RVU of 4.17, 30 minutes of intra-service time, and 106 minutes total time), all of which are varying in levels of work and intensity, but all equal in intra-service times.

Response: The AMA RUC recommended a median intra-service time of 20 minutes for CPT code 28001, which is a reduction from 31 minutes, which is indicative of a reduction in this procedure's work intensity. The AMA RUC recommended median intra-service time for CPT code 28002 remains the same at 30 minutes, and indicates that the work intensity for this procedure has not changed. The AMA RUC recommended median intra-service time of 45 minutes for CPT code 28003 is a reduction from 53 minutes, which indicates a reduction in this procedure's work intensity. The AMA RUC has not recommended an increase in median intra-service time for any of the codes in this family, which indicates that work intensity for these codes is not increasing. Even so, the AMA RUC has recommended that physician time be added back to these services in pre-times and in immediate post-times. CMS' comparator CPT code 43193 accounts for these increases in pre-service and immediate post service minutes, whereas the example comparison codes that the AMA RUC has recommended, do not, and we believe them to be a less suitable match than CPT code 43193. CPT code 28002 maintains its intra-service time and is not changing its intensity to justify a higher work RVU as recommended by the AMA RUC.

Comment: One commenter stated that CMS' decision to reduce the work RVU for CPT code 28002 for CY 2010 unfairly

devalued CPT code 28002, and that CMS is further perpetuating that undervaluation now. This commenter stated that a flawed assumption about the site of service for CPT code 28002 was based on early 2009 data indicating that this service was performed in the inpatient setting 49.2 percent of the time. Subsequent utilization information indicated that the service was actually performed over 50 percent of the time in the inpatient setting. The commenter stated that this incorrect assumption led to the inclusion of only a half-day CPT code 99238 hospital discharge day for CPT code 28002's post-op services and a recommended reduction of 10 percent in work RVU. The commenter offered recent Medicare utilization claims for CPT code 28002 suggesting that the service is furnished in the inpatient setting over 60 percent of the time, which likely indicates that it was probably always an inpatient procedure, and that the CY 2010 work RVU reduction was unjustified because CMS assumed that this service was performed in the inpatient setting less than half of the time.

Response: The values for CPT code 28002 were finalized in CY 2010 and have been the basis of payment ever since then. Even if the AMA RUC agreed that CPT code 28002 was performed more often in the inpatient setting as compared to the outpatient setting in 2010, and recommended a full day hospital discharge instead of a half day discharge and reduced the payment for CPT code 28002, we still cannot say what their recommended final valuation might have been back then. CMS expects that any changes in valuation that reflect new information would come to CMS in the form of AMA RUC recommendations and if there was a flaw in the CY 2010 final valuation, commenters would have flagged this code for CMS review sooner, as 11 years have passed since CY 2010. CPT code 28002's current conversion to 000-day global code from a 010-day global code, makes the original half-day CPT code 99238 hospital discharge assignment irrelevant, since 000-day global codes do not have post-service discharge activities, and include no post-service follow-up visits.

After review of comments, we are finalizing the proposed work RVU value of 2.79 for CPT code 28002, as well as our proposal of the AMA RUC-recommended work RVUs for the other two codes in the family: CPT code 28001 and CPT code 28003. We are also finalizing the direct PE inputs recommended by the AMA RUC for all three CPT codes, as proposed.

(6) Percutaneous Cerebral Embolic Protection (CPT Codes 33370)

CPT code 33370 (*Transcatheter placement and subsequent removal of cerebral embolic protection device(s), including arterial access, catheterization, imaging, and radiological supervision and interpretation, percutaneous (List separately in addition to code for primary procedure)*) was created in October 2020, by the CPT Editorial Panel as a new add-on code to report transcatheter placement and subsequent removal of cerebral embolic protection device(s). The CPT Editorial Panel also added instructions to report the new code in the Aortic Valve guidelines. The RUC reviewed the survey results for the new add-on code and noted that the survey respondents likely overvalued the physician work involved in performing this service, with a 25th percentile work value of 3.43. The RUC recommends a work RVU of 2.50 for CPT code 33370.

We proposed the RUC-recommended work RVU of 2.50 for CPT code 33370. This is a facility-based add-on code with no direct PE inputs.

Comment: Commenters stated that they were pleased that CMS accepted the RUC-recommended values for CPT code 33370.

Response: We are finalizing a work RVU of 2.50 for this code as proposed.

(7) Exclusion of Left Atrial Appendage (CPT Codes 33267, 33268, and 33269)

In May 2020, the CPT Editorial Panel approved the creation of three new codes to describe open and thoracoscopic left atrial appendage management procedures when performed as stand-alone procedures or in conjunction with other procedures. The codes represent new technology and surgical techniques that may be used to treat atrial fibrillation at the time of another surgical procedure and include CPT code 33267 (*Exclusion of left atrial appendage, open, any method (e.g., excision, isolation via stapling, oversewing, ligation, plication, clip*), CPT code 33268 (*Exclusion of left atrial appendage, open, performed at the time of other sternotomy or thoracotomy procedure(s), any method (e.g., excision, isolation via stapling, oversewing, ligation, plication, clip) (List separately in addition to code for primary procedure)*), and CPT code 33269 (*Exclusion of left atrial appendage, thoracoscopic, any method (e.g., excision, isolation via stapling, oversewing, ligation, plication, clip*)). CPT codes 33267 and 33269 are 090-day global codes while CPT code 33268 is a ZZZ global code.

In October 2020, the RUC reviewed and recommended work and PE values for the three new codes. Recommended work values include 18.50 RVUs for CPT code 33267, 2.50 work RVUs for CPT code 33268, and 14.31 work RVUs for CPT code 33269.

We proposed the RUC-recommended work RVUs for the three new codes. We also proposed the RUC-recommended direct PE inputs for CPT codes 33267 and 33269. We note that CPT code 33268 has no direct PE inputs.

Comment: A few commenters supported our decision to propose the RUC-recommended valuations on the proposed values for the three new Exclusion of the Left Atrial Appendage codes.

Response: We thank commenters for their feedback. We are finalizing the proposed values for the codes: 18.50 RVUs for CPT code 33267, 2.50 work RVUs for CPT code 33268, and 14.31 work RVUs for CPT code 33269. We are also finalizing the direct PE inputs as proposed for all three codes.

(8) Endovascular Repair of Aortic Coarctation (CPT Codes 33894, 33895, and 33897)

In October 2020, the CPT Editorial Panel created CPT codes 33894 (*Endovascular stent repair of coarctation of the ascending, transverse, or descending thoracic or abdominal aorta, involving stent placement; across major side branches*) and 33895 (*Endovascular stent repair of coarctation of the ascending, transverse, or descending thoracic or abdominal aorta, involving stent placement; not crossing major side branches*) to report endovascular stent repair of coarctation of the thoracic or abdominal aorta; and CPT code 33897 (*Percutaneous transluminal angioplasty of native or recurrent coarctation of the aorta*) to report trans-liminal angioplasty for repair of native or recurrent percutaneous coarctation of the aorta. For CY 2022, the RUC recommended a work RVU of 21.70 for CPT code 33894, a work RVU 17.97 for CPT code 33895, and a work RVU 14.00 for CPT code 33897.

We disagree with the RUC-recommended work RVUs for the CPT code family of 33894, 33895, and 33897. We found that the recommended work RVUs for these CPT codes were high when compared to other codes with similar time values. Therefore, we proposed the RUC survey 25th percentile of 18.27 as the work RVU for 33894, we proposed a work RVU of

14.54 for 33895, and we proposed a work RVU of 10.81 for 33897.

When we reviewed CPT code 33894, we found that the recommended work RVU was high compared to other codes with similar time values. The RUC survey 25th percentile of 18.27 falls within the range of RVUs with similar intra service time. This is supported by the reference CPT codes we compared to CPT code 33894 with intra service time similar to the 134 minutes of intra service time for CPT code 33894; reference CPT code 37231 (*Revascularization, endovascular, open or percutaneous, tibial, peroneal artery, unilateral, initial vessel; with transluminal stent placement(s) and atherectomy, includes angioplasty within the same vessel, when performed*) has a work RVU of 14.75 with 135 minutes of intra service time, and CPT code 93590 (*Percutaneous transcatheter closure of paravalvular leak; initial occlusion device, mitral valve*) has a work RVU of 21.70 with 135 minutes of intra service time. We note that the RUC-recommended RVU of 21.70 is a crosswalk from CPT code 93590 and is the highest value code within the range of reference codes we reviewed with similar intra service time. Again, we believe the RUC survey 25th percentile of 18.27 is a more appropriate value overall than 21.70 when compared to the range of codes with similar intra service time.

The RUC-recommended RVU of 17.97 for CPT code 33895 was higher than other codes with the same 120 minutes of intra service time and similar total time. Although we disagree with the RUC-recommended work RVU for 33895, we concur that the relative difference in work between CPT codes 33894 and 33895 is equivalent to the RUC-recommended interval of 3.73 RVUs. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Therefore, we proposed a work RVU of 14.54 for CPT code 33895, based on the RUC-recommended interval of 3.73 RVUs below our proposed work RVU of 18.27 for CPT code 33894.

The RUC-recommended work RVU of 14.00 for CPT code 33897 was higher than other codes with the same 90 minutes of intra service time and similar total time and we believe it will be more accurate to propose a work RVU that maintains the 3.73 incremental difference between the codes in this family. Therefore, for CPT code 33897, we proposed a work RVU of 10.81 which also continues the 3.73 incremental difference used between CPT codes 33894 and 33895, instead of the RUC incremental difference of 3.97 between CPT codes 33895 and 33897. Although the work RVU of 10.81 we proposed for CPT code 33897 is lower than the RUC recommendation, the 3.73 incremental difference between CPT codes 33895 and 33897 we proposed is more generous than the RUC incremental difference of 3.97 between CPT codes 33895 and 33897.

We proposed no direct PE inputs for the CPT code family of 33894, 33895, and 33897, as recommended by the RUC. These services are provided exclusively in the facility setting.

Comment: Commenters disagreed with our proposal and stated that we did not provide any clinical foundation for the proposed alternate value of CPT code 33894 and that we made no acknowledgement that this service is for pediatric patients with congenital defects and the extra work that goes into working with these special patients. Also, there are no 000-day global services with similar times. Some commenters stated that our use of CPT code 37231 as a reference code for CPT code 33894 was not suitable since it has 81 fewer minutes of total time. Commenters stated that beyond having similar intra-service time, reference CPT code 37231 has few similarities to CPT code 33894 and is a service that is less intensive to perform than CPT code 33894. In addition, commenters noted that CPT code 37231 is vastly different than CPT code 33894. The other reference code we used for CPT code 33894 was CPT code 93590, and commenters noted that CPT code 93590 was the code that the RUC had recommended to use as a direct work RVU crosswalk. Code 93590 has much less total time than CPT code 33894, though it was used by the RUC as a crosswalk due to the lack of services with similar total times.

Response: We continue to believe that the RUC-recommended work RVU of 21.70 for CPT code 33894 was high when compared to other codes with similar time values, and that the RUC survey 25th percentile work RVU of 18.27 is appropriate for CPT code 33894. We did use other 000-day Global services within a range of 120 to 135 minutes of intra-service time, and 203 to 223 minutes of total time, in our comparisons. Such comparison codes included reference CPT code 37231 on the low end of the range and CPT code 93590 on the high end of the range. The 25th percentile work RVU of 18.27 falls within the range of RVUs with similar intra-service time and total time. A direct work RVU crosswalk from CPT code 93590 would have put CPT code 33894 at the top end of the reference code range between CPT codes 37231 and 93590.

We continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparison to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

Comment: Commenters stated that relative to adult patients with normal cardiac anatomy, the pre-service evaluation time for pediatric patients with congenital defects includes additional time to discuss a patient's procedure with the parent. Commenters went on to say that similarly, the post-procedure work includes additional time to explain the pathology of the child to the parent. Also, commenters stated that congenital heart programs are now required to enter hemodynamic data and other procedural details into national registries which can add significant post procedure work time. By solely comparing CPT code 33894 to adult patient population services with much lower total times, commenters argue that we are not providing adequate consideration for the additional work or that a pediatric population with congenital defects is a more intense and complex patient population. In addition, commenters said we did not provide any discussion regarding the clinical attributes of CPT code 33894 or any of the reference codes and strongly recommended that we accept the RUC-recommended work RVU of 21.70 for CPT code 33894.

Response: We continue to believe that the RUC-recommended work RVU of 21.70 for CPT code 33894 was high when compared to other codes with similar time values, and that the RUC survey 25th percentile of 18.27 is appropriate for CPT code 33894. Regarding consideration of the clinical attributes and the complexity of working with the pediatric population for CPT code 33894, the review we conducted included the RUC-recommended work RVU, intensity, time to furnish the preservice, intra-service, and post-service activities, as well as other components of the service that contributed to the value. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, other public commenters, medical literature,

as well as a comparison with other codes within the PFS, and consultation with other physicians and health care professionals within CMS and the Federal Government. We are obligated under the statute to consider both time and intensity in establishing work RVUs for PFS services. As stated in the response above, we also continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

Comment: Commenters disagreed with our proposed work RVU of 14.54 for CPT code 33895, which was calculated by subtracting the 3.73 incremental difference between the RUC-recommend work RVUs for CPT codes 33894 and 33895 from our proposed work RVU of 18.27 for CPT code 33894 (18.27 − 3.73 = 14.54). Commenters noted that our rejection of the RUC-recommended work RVU of 21.70 for 33894 is flawed, and therefore, the proposed work RVU of 14.54 for 33895 instead of the RUC-recommended work RVU of 17.97 is inaccurate.

Response: In the responses above, we address the work RVU of 18.27 that we proposed for CPT code 33894. Although we disagreed with the RUC-recommended work RVU for CPT code 33895, we concurred that the relative difference in work between CPT codes 33894 and 33895 is equivalent to the RUC-recommended interval of 3.73 RVUs. Therefore, the work RVU of 14.54 for CPT code 33895 is valid, based on the RUC-recommended interval of a 3.73 reduction in RVUs below our proposed work RVU of 18.27 for CPT code 33895.

Comment: Commenters disagreed with our proposal to continue to use the 3.73 incremental difference between the other codes in this family (CPT codes 33894 and 33895) to calculate the proposed work RVU of 10.81 for CPT code 33897. Commenters said the RUC recommendation of a work RVU of 14.00 for CPT code 33897 does not have that increment with the other services in this family so CMS' rationale does not make sense, and the incremental difference between the other codes in this family should not be used as the basis to derive a new value for CPT code 33897.

Response: The 3.73 incremental difference is based on the RUC-recommended incremental difference between CPT codes 33894 and 33895. We believe that it is appropriate to have the same incremental difference of 3.73 between all three codes in the family. Therefore, we applied the same 3.73 increment to the work RVUs for 33895 and 33897 which resulted in our proposed work RVU of 10.81 for CPT code 33897. The RUC recommended incremental difference between CPT codes 33895 and 33897 was 3.97, which would have resulted in a lower proposed work RVU for 33897 if we had applied that same incremental difference to our proposed work RVU of 14.54 for CPT code 33895. Using the RUC-recommended incremental difference between CPT codes 33895 and 33897 would have brought our proposed work RVU for CPT code 33897 down to 10.57 instead of 10.81.

We believe the use of an incremental difference between codes is a valid methodology for setting work RVUs, especially in valuing services within a family of codes where it is important to maintain appropriate intra-family relativity. Historically, we have frequently utilized an incremental methodology in which we value a code based upon its incremental difference between another code or another family of codes.

Comment: Commenters stated that in general, CMS' review process for this code family and the reference code comparison seemed like CMS selecting an arbitrary and capricious value from the vast array of possible mathematical calculations, rather than seeking a valid, clinically relevant relationship that would preserve relativity between work RVUs. Also, commenters stated that CMS did not provide any clinical foundation for the proposed alternate value and made no acknowledgement that this service is for pediatric patients with congenital defects. Further, commenters thought that CMS did not provide a discussion regarding the clinical attributes of the surveyed procedure or any of the reference codes.

Response: We clarify for the commenters that our review process is not arbitrary in nature. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). With regard to clinically relevant relationships, we emphasize that we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk. We also refer readers to the discussion of this subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.) for more information.

After consideration of the public comments, we are finalizing the proposed work RVU of 18.27 for CPT code 33894, the work RVU of 14.54 for CPT code 33895, and the work RVU of 10.81 for CPT code 33897. There are no direct PE inputs for the CPT code family of 33894, 33895, and 33897, as these services are provided exclusively in the facility setting.

(9) Harvest of Upper Extremity Artery (CPT Codes 33509 and 35600)

In May 2020, the CPT Editorial Panel created CPT code 33509 (*Harvest of upper extremity artery, 1 segment, for coronary artery bypass procedure, endoscopic*) to describe endoscopic radial artery harvest via an endoscopic approach, and CPT code 35600 (*Harvest of upper extremity artery, 1 segment, for coronary artery bypass procedure, open*) was modified to only include an open approach for the upper extremity harvesting procedure. The RUC also stated that CPT codes 33509 and 35600 are almost always exclusively performed in conjunction with coronary artery bypass grafting (CABG) procedures. For CY 2022, the RUC-recommended a work RVU of 3.75 for CPT code 33509 and a work RVU of 4.00 for CPT code 35600.

We disagree with the RUC-recommended RVUs for the CPT code family of 33509 and 35600. We found that the recommended work RVUs for these CPT codes were high when compared to other codes with similar

time values. Therefore, we proposed 3.34 as the work RVU for 33509 and we proposed a work RVU of 3.59 for 35600.

We disagree with the RUC-recommended work RVU for CPT code 33509 and we proposed an RVU of 3.34 which is a direct work RVU crosswalk from CPT code 35686 (*Creation of distal arteriovenous fistula during lower extremity bypass surgery (non-hemodialysis) (List separately in addition to code for primary procedure)*). The RUC-recommended value of 3.75 is higher than other codes with similar intra service time and total time. This is supported by the reference CPT codes we compared to CPT code 33509 with the same 35 minutes of intra service time and 35 minutes of total time as CPT code 33509; reference CPT code 74713 (*Magnetic resonance (e.g., proton) imaging, fetal, including placental and maternal pelvic imaging when performed; each additional gestation (List separately in addition to code for primary procedure)*) has a work RVU of 1.85, and CPT code 35686 has a work RVU of 3.34.

Although we disagree with the RUC-recommended work RVU for CPT code 35600, we concur that the relative difference in work between CPT codes 33509 and 35600 is equivalent to the RUC-recommended interval of 0.25 RVUs. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Therefore, we proposed a work RVU of 3.59 for CPT code 35600, based on the RUC-recommended interval of 0.25 RVUs above our proposed work RVU of 3.34 for CPT code 33509.

We proposed no direct PE inputs for the CPT code family of 33509 and 35600 as recommended by the RUC. These services are provided exclusively in the facility setting.

The RUC acknowledged that CPT codes 33509 and 35600 are almost always exclusively performed in conjunction with coronary artery bypass grafting (CABG) procedures. Such codes are designated as add-on procedures and are assigned a ZZZ-day global period (that is, code related to another service and is always included in the global period of the other service). The RUC also requested that the global period for both CPT codes 33509 and 35600 be an XXX-day global period (that is, global concept does not apply) and not a ZZZ-day global period as is customary for add-on codes. The RUC stated that an XXX-day global period would allow the individual that performs the harvest of upper extremity artery procedure (often separate from the surgeon performing the base CABG procedure) to report it under their own provider number. The RUC noted that it is often a nurse practitioner (NP) or physician's assistant (PA) who performs the harvest procedure. However, the RUC surveyed CPT codes 33509 and 35600 using reference codes with the ZZZ-day global period. Therefore, we believe it is appropriate to use that same ZZZ-day global period for CPT codes 33509 and 35600, and we proposed to assign the ZZZ-day global period to CPT codes 33509 and 35600 for CY 2022. Through our scrutiny of comparing the code descriptions of codes with matching intra service times, we find much more clinically coherent similarities with codes with a ZZZ-day global period (procedures complementary, and sometimes necessary, to complete a larger procedure) than codes with an XXX-day global period.

However, we were compelled to understand more about the billing circumstances presented by the RUC and stakeholders that have presented this approach for CPT codes 33509 and 35600 to CMS for consideration. We solicited comments and requested information that could inform why CPT codes 33509 and 35600 should have an XXX-day global period instead of the ZZZ-day global period that is customary for add-on codes.

Comment: Commenters disagreed with our proposed work RVU of 3.34 for CPT code 33509 and stated that unlike reference CPT codes 35686 and 74713, CPT code 33509 is typically performed by a separate practitioner than the one that is performing the base procedure. Also, there were concerns that we did not take into consideration the intraoperative evaluation, the total physician work, and the intensity associated with the procedure, which also contributed to the RUC's recommendation for a value that is higher than other procedures with similar intra and total times.

Response: We disagree with the commenters regarding our use of CPT codes 35686 and 74713 as reference codes to determine our proposed work RVU of 3.34 for CPT code 33509. Whether or not the practitioner performing CPT code 33509 is the same practitioner who performed the base procedure or is a separate practitioner does not change the work RVU for this procedure. For CPT code 33509, we proposed an RVU of 3.34 which is a direct work RVU crosswalk from CPT code 35686. When we looked at codes with the same 35 minutes of intra-service time and 35 minutes of total time as CPT code 33509, reference CPT code 35686 had the highest RVU of the codes with the same 35 minutes of intra-service time and total time.

Comment: Commenters stated that the reference code CMS used, CPT code 35686, as a direct work RVU crosswalk for CPT code 33509 has not been reviewed by the RUC or CMS in 20 years and has virtually no volume. Furthermore, the reference code that CMS cited as support for their proposal—CPT code 74713—is an imaging code that has no clinical similarities to the survey code.

Response: We disagree with the commenters' statement that CPT code 35686 should not be used as a reference code because it has not been reviewed in 20 years and has low utilization. We also disagree with the commenters' statement that CPT code 74713 should not be used as a reference code because it is not a service similar to CPT code 33509. We agree that it is important to use the recent data available regarding time, and we acknowledge that when many years have passed since work time is measured, significant discrepancies can occur. However, we also believe that our operating assumption regarding the validity of the existing values as a point of comparison is critical to the integrity of the relative value system as currently constructed. The times currently associated with codes are a very important element in PFS ratesetting, both as points of comparison in establishing work RVUs and in the allocation of indirect PE RVUs by specialty. If we were to operate under the assumption that previously recommended work times had routinely been underestimated or overestimated, this would undermine the relativity of the work RVUs on the PFS in general, given the process under which codes are often valued by comparisons to codes with similar times and it undermines the validity of the allocation of indirect PE RVUs to physician specialties across the PFS. Instead, we believe that it is crucial that the code valuation process take place with the understanding that the existing work times used in the PFS ratesetting process are accurate. We recognize that adjusting work RVUs for changes in time is not always a straightforward process and that the intensity associated with changes in time is not necessarily always linear, which is why we apply various methodologies to identify several potential work values for individual codes. However, we reiterate that we believe it would be irresponsible to ignore changes in time based on the best data available and that we are statutorily

obligated to consider both time and intensity in establishing work RVUs for PFS services. For additional information regarding the use of old work time values in our methodology, we refer readers to our discussion of the subject in the CY 2017 PFS final rule (81 FR 80273 through 80274).

We continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

Comment: Commenters disagreed with our proposed work RVU of 3.59 for CPT code 35600 based on the increment of 0.25 between the RUC-recommended values of CPT codes 33509 and 35600, and stated that we did not list any specific reference codes for this service to support our proposed work RVU of 3.59. Commenters also stated that our proposed work RVU of 3.59 lowers the intensity to an amount well below that of the other surgical add-on procedures, and that the RUC's recommended RVU of 4.00 was already leading to a decrease of 19 percent even though the surveys supported the same intra and total time for CPT code 35600 which has a higher valuation of 4.94.

Response: Although we disagreed with the RUC-recommended work RVU for CPT code 35600, we concurred that the relative difference in work between CPT codes 33509 and 35600 is equivalent to the recommended interval of 0.25 RVUs. Therefore, the work RVU of 3.59 for CPT code 35600 is valid, based on the recommended interval of a 0.25 increase in RVUs above our proposed work RVU of 3.34 for CPT code 33509. Also, as stated in our response above, for CPT code 33509, the reference codes we used were CPT codes 35686 and 74713. We reiterate that, consistent with the statute, we are required to value the work RVU based on the relative resources involved in furnishing the service, which include time and intensity. We apply various methodologies to identify several potential work RVU values for individual codes. We also refer readers to the discussion of this subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.) for more information.

Comment: Two commenters responded to our request for information regarding the RUC's request that the global period for both CPT codes 33509 and 35600 be an XXX-day global period (that is, global concept does not apply) and not a ZZZ-day global period as is customary for add-on codes. The commenters both provided very similar information, and stated that the rationale for assigning an XXX global period instead of a ZZZ add-on global period for CPT codes 33509 and 35600, even though these services are almost exclusively performed in conjunction with an arterial Coronary arterial bypass graft (CABG) procedure, is that an XXX global would allow the individual who performs the harvest of an upper extremity artery procedure (often separate from the surgeon performing the base CABG procedure and not the first assistant) to report it under their National Provider Identifier (NPI) number. The societies involved in surveying CPT codes 33509 and 35600 had also indicated that sometimes a separate physician or other qualified health professional (QHP), typically a PA or NP, performing these codes is not part of the same practice as the surgeon performing the CABG procedure or is not the first assistant at surgery for the CABG procedure. Therefore, there would be no established mechanism for paying this practitioner for their work.

Similarly, commenters stated if the physician or QHP who performs the upper extremity artery harvest is in the same practice but is not the first assistant at surgery for the CABG surgery, they have no mechanism to report an add-on code since they are not reporting the base arterial CABG code. In both situations, the individual performing CPT codes 33509 or 35600 does not have a primary code to report with it, which would result in these codes being denied for payment. In many cases, even if the individual performing CPT codes 33509 and 35600 is the first assistant at surgery and reports an arterial CABG procedure with an appropriate assistant at surgery modifier (-80, -82 or -AS), the add-on code, which is only reported by the assistant at surgery, is not recognized by payers. Commenters noted that by assigning an XXX-day global period to these codes and valuing them as ZZZ-day global codes, the individual that performs CPT codes 33509 and 35600 can report these codes without also having to report an arterial CABG code, thereby ensuring that the practitioner performing the service is reimbursed at the appropriate rate (for example, physician vs NP or PA). The reason that the two codes were surveyed using a reference service list with ZZZ-day global codes is to ensure that the codes were valued in the same manner as an add-on code with no pre or post service work included in the procedure. Commenters stated that this is the case because, as CMS points out, they are worded in the same manner as other add-on codes and only include the additional work of harvesting the upper extremity artery. While these codes are in essence an add-on code, they are unique in that the additional intra-operative work represented by the procedures is typically performed by individuals that specialize in harvesting the grafts for CABG procedures. These individuals may or may not be associated with the same practice as the surgeon performing the procedure, and it is often the only service that individual provides for the case.

In addition, commenters stated that when referencing that the harvest procedure is almost always performed with a CABG procedure, CMS noted that ''. . . such codes are designated as add-on procedures and are assigned a ZZZ-day global period (that is, a code related to another service and is always included in the global period of the other service).'' However, commenters stated that is not the case for services that are performed by a separate provider than the surgeon performing the primary procedure. A relatively recent example of services like this are the separate practitioner moderate sedation CPT code 99155 (*Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; initial 15 minutes of intraservice time, patient younger than 5 years of age),* 99156 *(Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; initial 15 minutes of intraservice time, patient age 5 years or older),* and 99157 *(Moderate sedation services provided by a physician or other qualified health care professional other than the physician or other qualified health care professional performing the diagnostic or therapeutic service that the sedation supports; each additional 15 minutes intraservice time (List separately in addition to code for primary service)*) which CMS assigned an XXX-day global period.

Response: We solicited comments and requested information that could inform why CPT codes 33509 and 35600 should have an XXX-day global period instead of the ZZZ-day global period that is customary for add-on codes, and received two comments. After reviewing

the comments, it remains unclear that the solution to a billing issue which does not seem to affect the majority of the practitioners billing for these add-on services is to revise the global period for CPT codes 33509 and 35600 in order to bypass our existing standard policies and payment procedures. For instance, CPT code 35600 has been in use as a ZZZ-day global period code since 2001, and we are unaware of any information from stakeholders suggesting that they were unable to get their claims paid because of the ZZZ-day global period in the past. We are concerned that assigning an XXX-day global period instead of a ZZZ-day global period for CPT codes 33509 and 35600 would be inconsistent with current standard policies and payment procedures. These codes are not relative to the other services with an XXX-day global period. We find much more clinically coherent similarities with ZZZ-day global codes (procedures complementary, and sometimes necessary, to complete a larger procedure) than XXX-day global period codes. A ZZZ-day global add-on code is a code that is related to another service and is always included in the global period of the other service. (Note: Physician work is associated with intra-service time and in some instances the post service time.) Both commenters also agreed that CPT codes 33509 and 35600 are, in essence, add-on procedures. Therefore, we believe that a ZZZ-day global period is appropriate for both of these codes because they would not be done on their own, and would always be performed with another surgical procedure. Codes with ZZZ-day global periods are always listed separately in addition to the primary procedure and included in the global period of the other service, while the global period concept does not apply to codes with an XXX-day global period. However, we also believe there may be another solution to the billing issue described by the two commenters. Instead of altering the global periods for these codes, we suggest that stakeholders consider coding options that describe when a different practitioner is performing the add-on procedure, the same way the practitioner performing the preoperative or postoperative care during the global period of a surgery can be distinguished from a different practitioner who performed that surgery through the use of modifiers. This would be similar to the example provided by the commenters who highlighted how the separate practitioner moderate sedation CPT codes 99155, 99156, and 99157 were created. Unlike the descriptions for CPT codes 33509 and 35600, the descriptions for CPT codes 99155, 99156, and 99157 specifically state that these codes identify situations in which moderate sedation services are provided by a practitioner who is not performing the diagnostic or therapeutic service that the sedation supports. Also, we note that while CPT codes 99155 and 99156 both have an XXX-day global period, CPT code 99157 has a ZZZ-day global period and not an XXX-day global period as stated by the commenters.

After consideration of the public comments, we are finalizing the proposed work RVU of 3.34 for CPT code 33509 with a ZZZ-day global period, and the proposed work RVU of 3.59 for CPT code 35600 with a ZZZ-day global period. There are no direct PE inputs for this CPT code family, as these services are provided exclusively in the facility setting.

(10) Needle Biopsy of Lymph Nodes (CPT Code 38505)

CPT code 38505 (*Biopsy or excision of lymph node(s); by needle, superficial (eg, cervical, inguinal, axillary)*) was identified in October 2019 as Harvard Valued with a utilization of over 30,000 claims. In January 2020, the RUC recommended that the code be surveyed for October 2020 RUC meeting. The RUC recommended increasing the work RVU to 1.59 which is the survey 25th percentile, acknowledging a change in the service, which now involves larger tissue samples, as well as a change in technology, and a change in the dominant specialty now reporting the service.

We proposed the RUC-recommended work RVU of 1.59 for CPT code 38505. We also proposed the RUC-recommended direct PE inputs for this code.

Comment: One commenter suggested that we give the primary specialties that use CPT code 38505 time to investigate and identify the root cause of the claim submission, provide appropriate education to their practitioners regarding appropriate use criteria, and present that data to the RUC subcommittee or workgroup for evaluation.

Response: We believe this comment is directed towards the RUC. We will consider any future RUC recommendations for the work RVU for CPT code 38505 when they are submitted.

Comment: Commenters appreciated that CMS proposed the RUC-recommended work RVU and direct PE inputs for CPT code 38505.

Response: We thank the commenters for their support.

After consideration of the public comments, we are finalizing the proposed work RVU of 1.59 for CPT code 38505. We are also finalizing the RUC-recommended direct PE inputs for code 38505 without refinement.

(11) Drug Induced Sleep Endoscopy (CPT Codes 42975)

CPT code 42975 (*Drug induced sleep endoscopy; with dynamic evaluation of velum, pharynx, tongue base, and larynx for evaluation of sleep disordered breathing; flexible, diagnostic*) is a new code created to report drug induced sleep endoscopy (DISE) flexible, diagnostic. The RUC recommended, and we agree, that the survey 25th percentile for the work RVU of 1.90 accurately reflects the typical physician work necessary to perform this service.

Since this is a drug induced sleep endoscopy, we proposed CPT code 31575 (*Diagnostic laryngoscopy*) as the endoscopic base code for CPT code 42975 because the description of the proposed CPT code is the same as what is described for CPT code 31575 with the additional component of the patient being sedated. The procedure is performed with a flexible endoscope or laryngoscope. CPT code 42975 is not an add-on code, it has a 0-day global period. The endoscopic base code that it is using is a specific type of multiple procedure discount that applies to some endoscopy codes.

We proposed the RUC-recommended work RVU of 1.90 for CPT code 42975. We also proposed the RUC-recommended direct PE inputs for this code.

Comment: Commenters appreciated that CMS proposed the RUC-recommended work RVU of 1.90 and the RUC-recommended direct PE inputs for CPT code 42975.

Response: We thank commenters for their support.

After consideration of the public comments, we are finalizing the RUC-recommended work RVU of 1.90 and the RUC-recommended direct PE inputs for CPT code 42975 as proposed.

(12) Per-Oral Endoscopic Myotomy (POEM) (CPT Codes 43497)

In May 2020, the CPT Editorial Panel created a new CPT code 43497 (*Lower esophageal myotomy, transoral (i.e., peroral endoscopic myotomy [POEM]*) to describe a Per-Oral Endoscopic Myotomy (POEM), which involves the visualization and dissection of the esophageal muscle layers via an endoscope to treat esophageal motility disorders such as achalasia. This

procedure accomplishes a comparable myotomy to what traditional open and laparoscopic myotomy (Heller) accomplishes. POEM utilizes an endoscope and specially designed dissecting, cutting, and cauterizing instruments to create a long submucosal tunnel beginning in the mid-esophagus and extending several centimeters into the cardia. For CY 2022, the RUC recommended a work RVU of 15.50 for CPT code 43497.

We disagreed with the RUC-recommended work RVU for CPT code 43497 and proposed a work RVU of 13.29 based on a direct work RVU crosswalk from CPT code 36819 (*Arteriovenous anastomosis, open; by upper arm basilic vein transposition*). CPT code 36819 has the same 120 minutes of intra service time as CPT code 43497, and has 283 minutes of total time, which is 2 minutes more than the 281 minutes of total time than for 43497. The RUC used CPT codes 43279 (*Laparoscopy, surgical, esophagomyotomy (Heller type), with fundoplasty, when performed*) and 43180 (*Esophagoscopy, rigid, transoral with diverticulectomy of hypopharynx or cervical esophagus (e.g., Zenker's diverticulum), with cricopharyngeal myotomy, includes use of telescope or operating microscope and repair, when performed*) as reference codes for CPT code 43497. However, the intra service time of 150 minutes and total time of 404 minutes for the RUC reference CPT code 43279, and intra service time of 60 minutes and total time of 201 minutes for the RUC reference CPT code 43180, are not adequate comparisons since they do not have similar time values to those of CPT code 43497. Therefore, we believe the proposed work RVU of 13.29 for CPT code 43497 based on a direct work RVU crosswalk from CPT code 36819 is a better representation of the work being performed and is more appropriate based on the same intra service time and similar total time.

We proposed the RUC-recommended direct PE inputs for CPT code 43497 without refinement.

Comment: Commenters disagreed with our proposal to crosswalk the work RVU of 13.29 from CPT code 36819 to CPT code 43497. The commenters stated that crosswalking to CPT code 36819 based on time alone is inappropriate and fails to consider the physician work necessary to perform this service. Beyond comparing the time similarities, it is unclear whether any other criteria were used to identify the CMS recommended work RVU as CMS did not include any clinical comparisons or quantifiable inputs. Also, commenters stated that CMS failed to provide justification on why the survey data was ignored in the analyses used to determine the work RVU for this service. Most importantly, commenters noted that CMS does not provide a rationale that would warrant the work RVU to fall below the survey 25th percentile from a robust survey. They said that a crosswalk based on time alone is not an appropriate justification for any code, especially a new code.

Response: We believe that the proposed work RVU of 13.29 for CPT code 43497 is appropriate. CPT code 36819 was reviewed in 2013 and has the same intra-service time of 120 minutes and 2 additional minutes of total time than the 281 minutes of total time for CPT code 43497, and is close to an exact crosswalk. We compared CPT code 43497 to the other codes with the same 120 minutes of intra-service time and with total times ranging from 271 to 291 minutes. We found the work RVUs ranged from a low of 5.90 (represented by CPT code 33220 (*Repair of 2 transvenous electrodes for permanent pacemaker or implantable defibrillator) with 276 minutes of total time*) to a high of 17.71 (represented by CPT code 58572 (*Laparoscopy, surgical, with total hysterectomy, for uterus greater than 250 g*) with 271 minutes of total time). The RUC recommended RVU of 15.50 was high in comparison to the range of RVUs for the comparison CPT codes with the same intra-service time and similar total times, therefore we believe this work RVU crosswalk from CPT code 36819 to CPT code 43497 is a valid crosswalk. Also, the Total Time Ratio of 12.62 between the 2nd key reference code of CPT code 43180 and CPT code 43497 supports a value closer to 13.00 RVUs. The survey data ranged from a minimum value of 5.00 to a maximum value of 39.00. We looked at the RUC survey 25th percentile value of 15.50, which is also the RUC-recommended work RVU. We also looked at the 25th percentile value of each of the surveys listed on the RUC Summary Report, and note that there was a wide range of 25th percentile values shown, ranging from 12.00 to 21.00. Our proposed work RVU crosswalk of 13.29 for CPT code 43497 from CPT code 36819 is above the lowest 25th percentile value that was provided in the RUC Summary Report, and is closer to the Total Time Ratio of 12.62 described above. We believe this provides additional support for a work RVU that is closer to 13.00, and therefore, our proposed work RVU of 13.29 for CPT code 43497 is appropriate.

Comment: Commenters stated that CPT code 43497 should have a work RVU value of 15.50 based on the RUC's 119 survey results and physician input, and that a work RVU of 15.50 accurately reflects the physician work necessary to perform this service. They noted that the flawed crosswalk work RVU of 13.29 for CPT code 43497 creates inconsistencies within the RBRVS as the intensity level for CPT code 43180 would be higher if the proposed work RVU is accepted.

Response: We believe the RUC-recommend work RVU of 15.50 for CPT code 43497 is high in comparison to the range of work RVUs for the comparison CPT codes with the same intra-service time and similar total times, and therefore, we believe this work RVU crosswalk from CPT code 36819 to CPT code 43497 is a valid crosswalk. CPT code 36819 has the same intra-service time of 120 minutes and 2 additional minutes of total time than the 281 minutes of total time for CPT code 43497, and is close to an exact crosswalk. We compared CPT code 43497 to the other codes with the same 120 minutes of intra-service time and with total times ranging from 271 to 291 minutes. We found the work RVUs ranged from a low of 5.90 (represented by CPT code 33220 with 276 minutes of total time) to a high of 17.71 (represented by CPT code 58572 with 271 minutes of total time). Also, the Total Time Ratio of 12.62 between the 2nd key reference code of CPT code 43180 and CPT code 43497 supports a value closer to 13.00 RVUs. Therefore, we believe that the proposed work RVU of 13.29 for CPT code 43497 is appropriate.

Comment: Commenters stated that the reference CPT codes 43279 and 43180 provided by the RUC were never meant to be crosswalk codes; they are reference codes that act as bookends to demonstrate how the value of CPT code 43497 falls appropriately between them thereby maintaining relativity. It is logical that the survey takers migrated towards CPT codes 43279 and 43180 as the top two key reference services based on their familiarity with these procedures and the disease states treated by these procedures. Commenters stated that the reference codes are intended to act as supporting rationale to demonstrate relativity within the PFS. Commenters assert that CPT codes 43279 and 43180 are representative of this concept in that they demonstrate the validity of the 15.50 RVU recommendation for 43497, which falls between the established RVUs of CPT code 43279, the longer more intense procedure, and CPT code 43180, the shorter less intense procedure. Also, there are numerous codes with a similar intra-service time

and intensity with higher work RVUs that CMS could have selected as a more appropriate crosswalk for CPT code 43497. Commenters believe that a work RVU of 15.50 most accurately reflects the physician work and intensity necessary to perform this service.

Response: We believe the RUC-recommended work RVU of 15.50 is high. We compared CPT code 43497 to the other codes with the same 120 minutes of intra-service time and with total times ranging from 271 to 291 minutes. We found the work RVUs ranged from a low of 5.90 (represented by CPT code 33220 with 276 minutes of total time) to a high of 17.71 (represented by CPT code 58572 with 271 minutes of total time). Therefore, we believe the work RVU crosswalk from CPT code 36819 to CPT code 43497 is appropriate. CPT code 36819 has the same intra-service time of 120 minutes and 2 additional minutes of total time than the 281 minutes of total time for CPT code 43497, and is close to an exact crosswalk. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). With regard to the invocation of clinically relevant relationships by the commenters, we emphasize that we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk. We also refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.)

Comment: Commenters stated that CMS' recommendation to crosswalk CPT code 43497 to 36819 is based only on time and fails to take into consideration the difference in intensity between the procedures. CPT code 36819 represents one of many codes that CMS could have selected to use as a crosswalk based on time. Value is based on multiple factors including procedure time, technical skill required, physical effort involved, mental effort and judgment, and stress due to the potential risks to the patient. Commenters stated that if CMS were to truly have considered intensity in addition to time, the selected crosswalk should have reflected this consideration by selecting a code with similar intensity. A search of the RUC database for 90-day global codes with 120 minutes of intra- service time yields 235 CPT codes with an intra-service work per unit of time (IWPUT) ranging from -0.036 to 0.1983. CMS' recommended work RVU of 13.29 for CPT code 43497 creates a rank-order anomaly in the intensities of related procedures.

Response: We continue to believe that crosswalking the work RVU of 13.29 from CPT code 36819 to CPT code 43497 is appropriate. CPT code 36819 has the same intra-service time of 120 minutes and 2 additional minutes of total time than the 281 minutes of total time for CPT code 43497, and is close to an exact crosswalk for CPT code 43497. In general, CMS considers a variety of factors when we review the RUC recommendations as indicated in the response above. Again, we refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.).

Comment: Commenters disagreed with crosswalking the work RVU of CPT code 36819 to CPT code 43497 and urged CMS to accept the RUC-recommended RVU of 15.50 for CPT code 43497. CPT code 36819 is an open, three-dimensional procedure with a multi-person surgical team using a wide field of view, operating on an upper extremity with local anesthesia from nerve block. Also, CPT code 36819 is not an endoscopic procedure, involves completely different work and has an IWPUT of 0.0755. The IWPUT of CPT code 43497 is significantly higher at 0.091.

Response: We continue to believe that the RVU of 13.29 for CPT code 43497 based on a crosswalk from CPT code 36819 is more appropriate than the RUC-recommended work RVU of 15.50. CPT code 36819 has the same intra-service time of 120 minutes and 2 additional minutes of total time than the 281 minutes of total time for CPT code 43497, and is close to an exact crosswalk for CPT code 43497. In more general terms, we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

After consideration of the public comments, we are finalizing the proposed work RVU of 13.29 for CPT code 43497. We are also finalizing the RUC-recommended direct PE inputs for CPT code 43497 without refinement.

(13) Placement-Removal of Seton (CPT Codes 46020 and 46030)

For CPT codes 46020 (*Placement of seton*) and 46030 (*Removal of anal seton, other marker*), we disagree with the RUC-recommended work RVUs of 3.50 and 2.00, respectively, as we believe these values do not adequately reflect the surveyed reductions in physician time for CPT code 46020 and the change to a 000-day global period from a 010-day global period for these CPT codes. Instead, we proposed a work RVU of 1.86 for CPT code 46020 and 1.48 for CPT code 46030 based on a reverse building block methodology.

The survey showed that total time and intraservice time are decreasing for CPT code 46020 by 26 minutes and 5 minutes, respectively. We believe the surveyed decreases in physician time in conjunction with the loss of the post-operative visits for CPT code 46020 merit a decrease in work RVU from the current work RVU.

We note that the proposed work RVU of 1.48 for CPT code 46030 falls between CPT code 57410 *(Pelvic examination under anesthesia (other than local))*, which has a work RVU of 1.75, and CPT code 64487 *(Transversus abdominis plane (TAP) block (abdominal plane block, rectus sheath block) unilateral; by continuous infusion(s) (includes imaging guidance, when performed))*, which has a work RVU of 1.48. Both of these bracketing reference codes have identical intraservice times and similar total time values. While we understand that total time is going up for CPT code 46030, this increase is a result of significant increases to evaluation, positioning, and scrub, dress, wait preservice times,

which is mostly low-intensity physician work.

We agree with the RUC's recommendation to change CPT codes 46020 and 46030 to 000-day global period codes from 010-day global period codes to account for the highly variable follow-up care for these services, but we note that the differences in RUC-recommended work RVUs and our proposed work RVUs largely reflect the change in global period and loss of physician time to provide the E/M services. The global period changes from 010-day to 000-day allow for separately billable E/M visits relating to CPT codes 46020 and 46030, therefore we removed RVUs that we believed were attributable to the currently bundled E/M visits totaling 2.04 RVUs for CPT code 46020 and 0.35 RVUs for CPT code 46030. CPT code 46020 is currently bundled with two post-operative follow up office visits, CPT code 99212 *(Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10–19 minutes of total time is spent on the date of the encounter),* and a half hospital discharge CPT code 99238 (*Hospital discharge day management; 30 minutes or less*). CPT code 46030 is currently bundled with half of a post-operative follow up office visit, CPT code 99212 *(Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10–19 minutes of total time is spent on the date of the encounter).* We do not believe the RUC adequately accounted for the loss of these E/M visits in their recommended work RVUs for CPT codes 46020 and 46030.

The RUC proposed the standard 090-day preservice times for the clinical labor activities CA001, CA002, CA003, CA004, and CA005 for CPT code 46020 in the facility. We note that the RUC recommended 090-day preservice clinical labor times despite surveying the service as a 000-day service. We disagree with the RUC-recommended 090-day preservice clinical labor times as we believe 000-day services should have times consistent with 000-day services, not 090-day services. However, we recognize there is time needed to coordinate this service. Therefore, we proposed the following standard clinical labor times for extensive use of clinical staff for a 000-day global code for CPT code 46020 in the facility:

- Complete preservice diagnostic and referral forms (CA001) 5 minutes.
- Coordinate pre-surgery services (including test results) (CA002) 10 minutes.
- Schedule space and equipment in facility (CA003) 5 minutes.
- Provide preservice education/obtain consent (CA004) 7 minutes.
- Complete pre-procedure phone calls and prescription (CA005) 3 minutes.

We also proposed to refine the direct PE input for Coordinate post-procedure services (CA038) to 0 minutes from the RUC-recommended 3 minutes to align with 000-day standards instead of 090-day standards for CPT code 46020.

For CPT code 46030, the RUC recommended the standard 000-day extensive use of clinical staff preservice times for clinical activities CA001, CA002, CA003, CA004, and CA005 in the facility and non-facility settings. Preservice times for 000-day codes are presumed to be zero unless there is sufficient justification that preservice time is warranted. We do not agree that sufficient justification was presented to warrant preservice time in the non-facility setting, therefore, we proposed the following standard clinical labor times for use of clinical staff in the non-facility setting. We also proposed the standards for minimal use of clinical staff in the facility setting, as we recognize there is time needed to coordinate this service for CPT code 46030:

- Complete preservice diagnostic and referral forms (CA001) 0 minutes for non-facility and 3 minutes for facility.
- Coordinate pre-surgery services (including test results) (CA002) 0 minutes for non-facility and 3 minutes for facility.
- Schedule space and equipment in facility (CA003) 0 minutes for non-facility and 3 minutes for facility.
- Provide preservice education/obtain consent (CA004) 0 minutes for non-facility and 3 minutes for facility.
- Complete pre-procedure phone calls and prescription (CA005) 0 minutes for non-facility and 3 minutes for facility.

We also proposed to refine the direct PE input for Coordinate post-procedure services (CA038) to 0 minutes from the RUC-recommended 3 minutes to align with 000-day standards instead of 090-day standards for CPT code 46030.

Comment: Commenters opposed the use of reverse building block methodology and stated that the calculations of work RVUs for these CPT codes were not transparent. Commenters stated that we removed work RVUs based on the CY 2021 E/M increased work RVU of 0.70 for CPT code 99212. Commenters also stated that CPT code 46020 was originally misvalued. Commenters disagreed with our reference to older work time sources, and stated that their use led to the proposal of work RVUs based on flawed assumptions. Commenters also stated that it was invalid to draw comparisons between the current work times and work RVUs to the newly surveyed work time and work RVUs as recommended by the RUC.

Response: The global period changes from 010-day to 000-day allow for separately billable E/M visits relating to CPT codes 46020 and 46030; therefore, we removed RVUs that we believed were attributable to the currently bundled E/M visits totaling 2.04 RVUs (when billed separately) for CPT code 46020 and 0.35 RVUs (when billed separately) for CPT code 46030 using the reverse building block methodology. Reverse building block methodology accounts for the longstanding times and work RVU associated with CPT code 99212 *(Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using time for code selection, 10–19 minutes of total time is spent on the date of the encounter)* for bundled office visits in the surgical global period, rather than the increased CY 2021 office/outpatient E/M work RVU of 0.70 for CPT code 99212, as commenters suggested. The longstanding times and work RVUs accounted for in the reverse building block methodology are 16 minutes and 0.48 work RVUs for CPT code 99212 and 38 minutes and 1.28 work RVUs for CPT code 99238. Therefore, we did not subtract the increased CY 2021 office/outpatient E/M work RVU of 0.70 for CPT code 99212 as the commenters suggested. CPT code 46020 is currently bundled with two post-operative follow up office visits (CPT code 99212) and a half hospital discharge day (CPT code 99238). In CY 2022, when the currently bundled visits in the global period are furnished, practitioners could bill for a total of 2.04 work RVUs, as the visits would no longer be bundled in the global period. CPT code 46030 is currently bundled with half of a post-operative follow up office visit, CPT code 99212. In CY 2022, when the currently bundled visits in the global period are furnished, practitioners could bill for a total of 0.35 work RVUs, as the visit would no longer be bundled in the

global period. We continue to believe that the RUC did not adequately account for the removal of these E/M visits as a result of the global period changes in their recommended work RVUs for CPT codes 46020 and 46030.

We agree with commenters that it is important to use the recent data available regarding work times, and we note that when many years have passed between when time is measured, significant discrepancies can occur. However, we also believe that our operating assumption regarding the validity of the existing values as a point of comparison is critical to the integrity of the relative value system as currently constructed. The work times currently associated with codes play a very important role in PFS ratesetting, both as points of comparison in establishing work RVUs and in the allocation of indirect PE RVUs by specialty. If we were to operate under the assumption that previously recommended work times had routinely been underestimated, this would undermine the relativity of the work RVUs on the PFS in general, given the process under which codes are often valued by comparisons to codes with similar times.

Instead, we believe that it is crucial that the code valuation process take place with the understanding that the existing work times that have been used in PFS ratesetting are accurate. We recognize that adjusting work RVUs for changes in time is not always a straightforward process and that the intensity associated with changes in time is not necessarily always linear, which is why we apply various methodologies to identify several potential work values for individual codes. However, we reiterate that we believe it would be irresponsible to ignore changes in time based on the best data available, and that we are statutorily obligated to consider both time and intensity in establishing work RVUs for PFS services. For additional information regarding the use of old work time values that were established many years ago and have not since been reviewed in our methodology, we refer readers to our discussion of the subject in the CY 2017 PFS final rule (81 FR 80273 through 80274).

Comment: Some commenters stated that they were concerned about CMS' lack of consideration for compelling evidence that services have changed. Commenters stated that CMS appeared to dismiss the fact that services may change due to technological advances, changes in the patient population, shifts in the specialty of physicians providing services or changes in the physician work or intensity required to perform services. Commenters requested that CMS address the compelling evidence submitted with the RUC recommendations when the agency does not accept the RUC's recommended work RVUs.

Response: The concept of compelling evidence was developed by the RUC as part of its work RVU review process for individual codes. The RUC determines whether there is compelling evidence to justify an increase in valuation. The RUC's compelling evidence criteria include documented changes in physician work, an anomalous relationship between the code and multiple key reference services, evidence that technology has changed physician work, analysis of other data on time and effort measures, and evidence that incorrect assumptions were made in the previous valuation of the service. While we appreciate the submission of this additional information for review, we emphasize that the RUC developed the concept of compelling evidence for its own review process; an evaluation of ''compelling evidence,'' at least as conceptualized by the RUC, is not part of our review process, as our focus is on the time and intensity of services, in accordance with the statute. With that said, we do consider changes in technology, patient population, and other compelling evidence criteria, as such evidence may affect the time and intensity of a service under review. For example, new technology may cause a service to become easier or more difficult to perform, with corresponding effects on the time and intensity of the service. However, we are under no obligation to adopt the same review process or compelling evidence criteria as the RUC. We instead focus on evaluating and addressing the time and intensity of services when reviewing potentially misvalued codes because section 1848(c)(1)(A) of the Act specifically defines the work component as the resources that reflect time and intensity in furnishing the service.

Based on the aforementioned references and consideration of the comments, we are finalizing the work RVUs as proposed for CPT codes 46020 and 46030 based on the reverse building block methodology. We continue to believe the proposed work RVU for CPT code 46020 adequately accounts for the 5-minute decrease in intraservice time, 26-minute decrease in total time, 51-minute decreased in postservice time, and a change to a 000-day global period which will allow for separately billable E/M visits as medically necessary. We continue to believe that the 1.48 work RVUs for CPT code 46030 adequately accounts for the 3-minute decrease in intraservice time, 8-minute decrease in post-service time, and a change to a 000-day global period which will allow for separately billable E/M visits as medically necessary.

Comment: Some commenters stated that CMS is proposing to refine the preservice clinical labor times for major procedures to conform to the 000-day global period standards despite the RUC recommendation of standard 090-day preservice clinical labor times. Commenters stated that CPT codes 46020 and 46030 are major procedures performed under general anesthesia when performed the facility setting. Commenters stated that the change to a 000-day global period was requested to account for variable post-operative care and does not change the need for clinical staff time typical of 90-day global procedures performed in the facility setting. Commenters stated that reassignment of global periods for select codes does not negate the fact that a major procedure is a major procedure and the pre-service facility clinical staff time for a major procedure is independent of the global period assignment. Commenters stated that each procedure should be evaluated on a case-by-case basis.

Response: We agree with the commenters that the direct PE inputs for each service should be evaluated on a case-by-case basis based on our criteria of what would be reasonable and medically necessary in the typical case. We reviewed the individual codes in question and concluded that the use of 000-day global period standards for ''Extensive use of clinical staff'' for CPT code 46020 and 000-day global period standards for ''Minimal use of clinical staff'' for CPT code 46030 in the facility would be most typical in these cases. As we noted under the Standardization of Clinical Labor Tasks section (section II.B) of this final rule, we continue to believe that setting and maintaining clinical labor standards provides greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes.

We refer readers to section II.B of this final rule, Determination of Practice Expense Relative Value Units (PE RVUs), for more information regarding the collaborative work of CMS and the RUC in improvements in standardizing clinical labor tasks.

After consideration of the comments, we are finalizing the work RVUs as proposed for CPT codes 46020 and 46030. We are also finalizing our

clinical labor inputs as proposed for CPT codes 46020 and 46030.

(14) Periurethral Balloon Continence Device Procedures (CPT Codes 53451, 53452, 53453, and 53454)

In October 2020, the CPT Editorial Panel replaced four CPT Category III codes with four new CPT Category I codes to report periurethral adjustable balloon continence devices. Given the low utilization and the low survey response rate for the four new codes, the RUC recommended that CMS assign contractor pricing to these procedures. We agree with the RUC and we proposed contractor pricing for all four codes in the family, CPT codes 53451 *(Periurethral transperineal adjustable balloon continence device; bilateral insertion, including cystourethroscopy and imaging guidance),* 53452 *(Periurethral transperineal adjustable balloon continence device; unilateral insertion, including cystourethroscopy and imaging guidance),* 53453 *(Periurethral transperineal adjustable balloon continence device; removal, each balloon)* and 53454 *(Periurethral transperineal adjustable balloon continence device; percutaneous adjustment of balloon(s) fluid volume).*

Comment: Several commenters supported the proposal to assign contractor pricing for CPT Codes 53451–53454.

Response: We appreciate the support for our proposal from the commenters.

After consideration of the comments, we are finalizing our proposal of contractor pricing for all four codes in the family.

(15) Intracranial Laser Interstitial Thermal Therapy (LITT) (CPT Codes 61736 and 61737)

In October 2020, the CPT Editorial Panel approved the addition of two codes to report laser interstitial thermal therapy (LITT) of lesion, intracranial, including burr hole(s), with magnetic resonance (MR) imaging guidance for a single trajectory for 1 simple lesion and multiple trajectories for multiple or complex lesion(s). LITT is a novel procedure that involves multiple steps and movements of the patient through the hospital for different stages of the procedure. The typical facility does not have an interoperative MRI suite (a small minority of academic medical centers may), so patient transport is necessary.

The RUC recommended a work RVU of 20.00 for CPT code 61736 *(Laser interstitial thermal therapy (LITT) of lesion, intracranial, including burr hole(s), with magnetic resonance imaging guidance, when performed; single trajectory for 1 simple lesion)* based on the survey median response. CPT code 61736 was surveyed with having one subsequent hospital visit, CPT code 99232 *(sbsq hospital care/day 25 minutes)* and 40 minutes of immediate postservice time. The RUC noted that although the survey median immediate postservice time was 40 minutes, for 61736, the CMS 23-Hour Stay Outpatient Surgical Services with Subsequent Hospital Visits Policy was applied which resulted in the 99232 visit being removed and its 20 minutes of intraservice time being applied to the 40 minutes of immediate postservice time resulting in 60 minutes of immediate postservice time. See the 2011 PFS final rule (75 FR 73226) for an in-depth explanation of the 23-hour policy. We believe the RUC partially applied the 23-hr policy when it applied the policy to the immediate post service time but not to the work RVU. We believe the 23-hour policy in its entirety should be applied to CPT code 6173661736 which includes the work RVUs along with the immediate postservice time.

Following the valuation methodology we established for 23-hour stay services in the CY 2011 PFS final rule, CPT code 61736 will have a work RVU of 19.06.

The steps are as follows:

- Step (1): CPT code 61736 does not have a hospital discharge day management service; therefore, we will skip this step.
- Step (2): 20 − 1.39 ** = 18.61.
- Step (3): 18.61 + (20 minutes × 0.0224)*** = 19.06 RVUs.

* Value associated with 1/2 hospital discharge day management service.

** Value associated with an inpatient hospital visit, CPT code 99232.

*** Value associated with the reallocated intraservice time multiplied by the postservice intensity of the 23-hour stay code.

Therefore, for CY 2022 we proposed a work RVU of 19.06 for CPT code 61736.

In reviewing the RUC-recommended direct PE inputs for 61736 we noticed the RUC proposed the standard 090-day preservice times for the following clinical labor activities:

- Complete preservice diagnostic and referral forms (CA001) 5 minutes.
- Coordinate pre-surgery services (including test results) (CA002) 20 minutes.
- Schedule space and equipment in facility (CA003) 8 minutes.
- Provide preservice education/ obtain consent (CA004) 20 minutes.

Complete pre-procedure phone calls and prescription (CA005) 7 minutes.

We note that the RUC recommended 090-day preservice times despite surveying the service as a 000-day service. We disagree with the RUC-recommended 090-day times as we believe this is a 000-day service and should have times consistent with 000-day services. However, we recognize there is time needed to coordinate this service. Therefore, for CY 2022 we proposed the following standard clinical labor times for a 000-day extensive:

- Complete preservice diagnostic and referral forms (CA001) 5 minutes.
- Coordinate pre-surgery services (including test results) (CA002) 10 minutes.
- Schedule space and equipment in facility (CA003) 5 minutes.
- Provide preservice education/ obtain consent (CA004) 7 minutes.
- Complete pre-procedure phone calls and prescription (CA005) 3 minutes.

For CPT code 61737 *(Laser interstitial thermal therapy (LITT) of lesion, intracranial, including burr hole(s), with magnetic resonance imaging guidance, when performed; multiple trajectories for multiple or complex lesion(s)),* the RUC recommended a work RVU of 24.00 which is the survey median. The RUC's recommendation also included 40 minutes of immediate postservice time and one hospital visit, CPT code 99233 *(sbsq hospital care/day visit 35 minutes).* We believe it will be appropriate to apply the 23-hr policy to CPT code 61737 as well.

The steps are as follows:

- Step (1): CPT code 61737 does not have a hospital discharge day management service. Therefore, we will skip this step.
- Step (2): 24 − 2 ** = 22
- Step (3): 22 + (30 minutes × 0.0224) *** = 22.67 RVUs

* Value associated with hospital discharge day management service.

** Value associated with an inpatient hospital visit, CPT code 99233.

*** Value associated with the reallocated intraservice time multiplied by the postservice intensity of the 23-hour stay code.

This results in a work RVU of 22.67, and an immediate post service time of 70 minutes. Therefore, for CY 2022 we proposed a work RVU of 22.67 and 70 minutes of immediate postservice time for CPT code 61737.

For the direct PE, the RUC proposed identical preservice times for CPT codes 61736 and 61737. For the reasons stated above concerning the direct PE inputs for CPT code 61736, we proposed the standard clinical labor times associated with a 000-day extensive for CPT code 61737 for CY 2022.

Comment: A commenter stated that CMS proposed to apply a formulaic

reduction to the work RVU attributed to the CMS 23-Hour Stay Outpatient Surgical Services with Subsequent Hospital Visits Policy when it proposed its work valuation for CPT code 61736. The commenter also noted that the LITT codes have 000-day global periods, which typically do not allow for an E/M visit on the same day as the procedure. However, in its recommendation the RUC applied the CMS 23-hour policy related to the post-service time for the base code. Although the median survey post-service time for CPT code 61736 was 40 minutes, the CMS 23-hour stay policy was applied resulting in 60 minutes of immediate post-service time. The intra-service time was reallocated from the same-day E/M code 99232 to the immediate post-service time of the outpatient service (adding 20 minutes of intra-service time from 99232). Lastly, the commenters stated that mathematically reducing work RVUs, despite a valid RUC survey, was not warranted and was not previously implemented by CMS when other services eligible for the 23-hour stay policy were reviewed.

Response: As we have stated earlier in this rule and in the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), CMS uses a variety of methodologies and approaches to develop work RVUs, including survey data, building blocks, crosswalk to key reference or similar codes, and magnitude estimation. In the CY 2011 PFS final rule, we also discussed the 23-hour policy and provided the formula for applying the policy to the work RVUs and the times of the outpatient service and the same-day E/M code. The commenter's statement reaffirms our belief that the RUC partially applied the 23-hour policy in its calculation of the recommended RVUs. When the policy is applied correctly, a work RVU of 19.06 is the appropriate valuation for CPT code 61736.

We also note, had we used the 25th percentile in the RUC's survey, which the RUC frequently recommends for valuing services, CPT code 61736 would have an RVU of 17.78, which is more than one RVU lower that CMS' proposed value. We also note that the RUC-recommended work RVU of 20.00 for CPT code 61736 is significantly higher than similarly timed codes which could imply that the service is overvalued. The commenter noted that the LITT codes have 000-day global periods, which typically do not allow for an E/M visit on the same day as the procedure. However, CPT code 61736 was surveyed as having one same-day E/M visit of CPT code 99232. We do not believe it is appropriate to apply select portions of the 23-hour policy. As we stated in the proposed rule, the 23-hour policy, when applied, should be applied in its entirety and applying the 23-hour policy in this context resulted in the work RVU of 19.06 for CPT code 61736. Lastly, we believe we have consistently applied the CMS 23-hour stay policy where applicable, in accordance with the policy that we finalized in the 2011 PFS final rule (75 FR 73226).

Comment: A commenter stated their objection to any proposed valuation that uses reverse building block methodology, or any other purely formulaic approach, to systematically reduce work RVUs for services. In the case of CPT code 61737, the commenter noted that, although these codes have 000-day global periods which typically do not allow for an E/M visit on the same day as the procedure, code 61737 typically involves a full 2-midnight admission which justifies the same-day E/M visit.

The commenter also stated when compared to patients undergoing LITT for a single lesion, the complexity of code 61737 and the level of patient medical instability and risk is greater. The typical number of ''multiple'' trajectories is two, thus in many aspects the physician work is doubled.

Response: In the CY 2011 PFS final rule we stated we believed that the 23-hour stay issue encompasses several scenarios. The typical patient under the 23-hour policy is commonly in the hospital for less than 24 hours, which often means the patient may indeed stay overnight in the hospital. On occasion, the patient may stay longer than a single night in the hospital; however, in both cases (one night or more than one night), the patient is considered for Medicare purposes to be a hospital outpatient, not an inpatient, and our claims data support that the typical 23-hour stay service is billed as an outpatient service. Accordingly, we believe that the valuation of the codes that fall into the 23-hour stay category should not reflect work that is typically associated with an inpatient service.

The RUC surveyed and recommended CPT code 61737 with a CPT code 99233 subsequent hospital visit. In the CY 2010 PFS proposed rule and final rule with comment period (74 FR 33556 and 74 FR 61777, respectively), we stated that we believed the use of inpatient E/M visit codes for services rendered in the post-service period for outpatient 23-hour stay procedures would result in overpayment for pre- and post-service work that would not be furnished. In CY 2011, we modified our proposed CY 2010 approach and suggested that in the future, when the AMA RUC reviews new and potentially misvalued codes that are identified as 23-hour stay services, the AMA RUC would apply the 23-Hour Stay Outpatient Surgical Services with Subsequent Hospital Visits Policy. Therefore, we believe it would be inappropriate to not apply the policy we established for services in this scenario.

With regards to the commenter's statement on the physician's work being doubled for CPT code 61737, we note the RUC-recommended a difference of four RVUs between CPT codes 61736 and 61737. We proposed a work RVU of 19.06 for CPT code 61736 and a work RVU of 22.67 for CPT code 61737, which would maintain a 3.61 RVU difference between these codes. We believe that a difference of 3.61 RVUs is fairly consistent with the RUC's recommendation and values the physician's work appropriately.

Comment: One commenter noted that CMS proposed the standard clinical labor times associated with the pre-service time package for 000-day global ''Extensive use of Clinical Staff'' facility inputs for CPT codes 61736 and 61737 while the RUC had recommended time associated with 090-day global periods. The commenter stated that it is most appropriate for the specialties to be able to advocate for the appropriate pre-service time for any given service. The commenters also suggested that with evidence some subset of codes may require extensive use of clinical staff and has allocated time when appropriate despite the assigned global period.

Response: We agree with the commenter that the direct PE inputs for each service should be evaluated on a case-by-case basis based on our criteria of what would be reasonable and medically necessary in the typical case. We reviewed the individual codes in question and concluded that the use of 000-day or 010-day global period standards for ''Extensive use of clinical staff'' would be most typical in these cases. As we noted under the Standardization of Clinical Labor Tasks (section II.B) part of this final rule, we continue to believe that setting and maintaining clinical labor standards provides greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes. For additional discussion, we direct readers to the individual code families affected by our proposed preservice clinical labor times (CPT codes 46020 and 46030 and CPT codes 61736 and 61737).

After consideration of the public comments, we are finalizing our

proposals for CPT codes 61736 and 61737 as proposed.

(16) Arthrodesis Decompression (CPT Codes 63052 and 63053)

For CPT codes 63052 (*Laminectomy, facetectomy, or foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [e.g., spinal or lateral recess* stenosis]), during posterior interbody arthrodesis, lumbar; single vertebral segment (List separately in addition to code for primary procedure)) and 63053 (*Laminectomy, facetectomy, or foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [e.g., spinal or lateral recess stenosis]), during posterior interbody arthrodesis, lumbar; each additional segment (List separately in addition to code for primary procedure)*), we disagree with the RUC-recommended work RVUs of 5.55 and 4.44, respectively, because these values are anomalously high in comparison to other similar add-on codes that have longer intraservice times, and we proposed a work RVU of 3.08 for CPT code 63052 and a work RVU of 2.31 for CPT code 63053.

CPT codes 63052 and 63053 are new add-on codes to report decompression when performed in conjunction with posterior interbody arthrodesis at the same interspace. The proposed work RVU for CPT code 63052 is based on an intraservice time ratio between the proposed 40 minutes of intraservice time for CPT code 63052 and the 45 minutes of intraservice time for CPT code 63048 (*Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s], [e.g., spinal or lateral recess stenosis]), single vertebral segment; each additional segment, cervical, thoracic, or lumbar (List separately in addition to code for primary procedure)*). We believed that CPT code 63048 was a stronger reference code for CPT code 63052 than the RUC-recommended reference CPT codes 33924 (*Ligation and takedown of a systemic-to-pulmonary artery shunt, performed in conjunction with a congenital heart procedure (List separately in addition to code for primary procedure)*) and 22614 (*Arthrodesis, posterior or posterolateral technique, single level; each additional vertebral segment (List separately in addition to code for primary procedure)*) because of the similarities in the long descriptors, physician time, and intensity of intraservice work for CPT codes 63052 and 63048. The intraservice time ratio between CPT codes 63048 and 63052 equals a work RVU of 3.08 for CPT code 63052 ((40 minutes/45 minutes) * 3.47 = 3.08). Therefore, we proposed a work RVU of 3.08 for CPT code 63052. The intraservice time ratio between CPT codes 63048 and 63052 was selected to value CPT code 63052 because of the similarities in the descriptions of intraservice work provided in the RUC's summary of recommendations for CPT code 63052 and the RUC Database for CPT code 63048. We proposed a work RVU of 2.31 for CPT code 63053 based on an intraservice time ratio between the proposed 30 minutes of intraservice time for CPT code 63053 and the proposed 40 minutes of intraservice time for CPT code 63052 ((30 minutes/40 minutes) * 3.08 = 2.31), given that the RUC contends that there are some efficiencies in providing an additional level of decompression, evidenced by the 10 minutes less of intraservice time for CPT code 63053 compared to CPT code 63052. These work RVU proposals are further supported by brackets of other 30 and 40 minute ZZZ codes.

We note that the proposed work RVU for CPT code 63052 falls between CPT code 19294 (*Preparation of tumor cavity, with placement of a radiation therapy applicator for intraoperative radiation therapy (IORT) concurrent with partial mastectomy (List separately in addition to code for primary procedure)*), which has a work RVU of 3.00, and CPT code 37185 (*Primary percutaneous transluminal mechanical thrombectomy, noncoronary, non-intracranial, arterial or arterial bypass graft, including fluoroscopic guidance and intraprocedural pharmacological thrombolytic injection(s); second and all subsequent vessel(s) within the same vascular family (List separately in addition to code for primary mechanical thrombectomy procedure)*), which has a work RVU of 3.28. Both of these bracketing reference codes have identical intraservice times as CPT code 63052. The proposed work RVU for CPT code 63053 falls between CPT code 43273 (*Endoscopic cannulation of papilla with direct visualization of pancreatic/common bile duct(s) (List separately in addition to code(s) for primary procedure)*), which has a work RVU of 2.24, and CPT code 22870 (*Insertion of interlaminar/interspinous process stabilization/distraction device, without open decompression or fusion, including image guidance when performed, lumbar; second level (List separately in addition to code for primary procedure)*), which has a work RVU of 2.34. Both of these bracketing reference codes have identical intraservice times as CPT code 63053. When we compared the RUC-recommended work RVU of 5.55 for CPT code 63052 and 4.44 for CPT code 63053 to other spinal add-on codes in the 63000 CPT code series in the RUC database, we found that CPT code 63052 would have the highest work RVU and the second shortest intraservice time (with CPT code 63053 having the shortest intraservice time), and CPT code 63053 would have the third highest work RVU and shortest intraservice time compared to the 10 other nationally-priced spinal add-on codes in the 63000 CPT code series. We do not agree that decompression when performed in conjunction with posterior interbody arthrodesis at the same interspace should have an anomalously high work value in comparison to other similar add-on codes in the 63000 CPT code series that have longer intraservice times. 6305263053We note that the specialty societies did not survey the two new add-on codes with the base codes for the January 2021 RUC, which is a standard to provide assurance that the respondents followed instruction to only consider the work of the add-on codes. CPT codes 63052 and 63053 were reviewed again with their base codes at the April 2021 RUC meeting. There were also revisions to the base codes' definitions, guidelines, and parenthetical instructions, which were approved by the CPT Editorial Panel for CY 2022.

The RUC did not recommend any direct PE inputs for these codes and we did not propose any direct PE inputs.

Comment: Several commenters requested that CMS use the interim RUC recommendations from the April 2021 meeting for these add-on codes which had previously been reviewed at the January 2021 RUC meeting. Commenters stated that the earlier RUC recommendations were made on an interim basis and requested an expedited review of the recommendations from the April 2021 RUC meeting; the RUC resubmitted its recommendations for these code families as part of its comment submission.

Response: We finalized a policy in the CY 2015 PFS final rule to make all changes in the work and MP RVUs and the direct PE inputs for new, revised, and potentially misvalued services under the PFS by proposing and then finalizing such changes through notice and comment rulemaking, as opposed to initially finalizing changes on an interim final basis (79 FR 67602–67609). As we stated when promulgating the CY 2015 PFS final rule, this approach has the significant advantage that the RVUs

for all services under the PFS are established using a full notice and comment procedure, including consideration of the RUC recommendations, before they take effect, providing the public the opportunity to comment on a specific proposal prior to it being implemented. We continue to believe that this is a far more transparent process which assures that we have the full benefit of stakeholder comments before establishing values. Since we did not make proposals on the code families in question using the RUC's recommendations from the April 2021 meeting, we would be forced to finalize valuation for these codes on an interim final basis, without the opportunity for public comment. This would contradict the policy that we finalized in the CY 2015 PFS final rule and we do not believe that it would serve the interests of transparency. Although we will consider any information submitted by stakeholders for valuation during the comment period, as we do for all codes which are subject to notice and comment rulemaking, we will formally review the recommendations from the April 2021 RUC meeting next year as part of the CY 2023 rule cycle.

Comment: Commenters unanimously disagreed with the intraservice time ratio between CPT codes 63048 and 63052, stating that CPT code 63048 is an inappropriate comparator because of differences in procedure and patient elements. Commenters stated that part of the work and time involved in CPT code 63048 is that of exposure of bony and soft tissue elements of the adjacent level. Commenters stated that CPT code 63052 does not require additional work of exposure because it is completed as part of the base interbody fusion code, and therefore, CPT code 63052 describes only the high intensity, dangerous aspects of neural element and spinal cord decompression. Commenters agreed that the procedures are similar, but differ in intensity.

Response: We appreciate the additional information provided by the commenters and are compelled to utilize a different methodology than the proposed intraservice time ratio between CPT codes 63048 and 63052, to value CPT code 63052 because the commenters provided sufficient information about how CPT codes 63048 and 63052 differ in intensity.

After consideration of the public comments regarding CPT code 63052, we are finalizing a work RVU of 4.25 for CPT code 63052 based on a crosswalk to CPT code 22853 (*Insertion of interbody biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)*), which has a work RVU of 4.25 and an intraservice time of 45 minutes. CPT code 22853 has only 5 more minutes of intraservice time than CPT code 63052, is a spinal procedure, and is an add-on code to the same base codes as CPT code 63052. We note that the finalized work RVU of 4.25 is supported by the commenters. Commenters supported the bracket of key reference service CPT code 22552 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2, each additional interspace (List separately in addition to code for primary procedure)*) and MPC CPT code 34812 (*Open femoral artery exposure for delivery of endovascular prosthesis, by groin incision, unilateral (List separately in addition to code for primary procedure)*). CPT code 22552 has a work RVU of 6.50 and an intraservice time of 45 minutes, and commenters noted that CPT code 22552 has a higher intensity as anticipated for a surgical procedure and in comparison, with a lumbar procedure. CPT code 34812 has a work RVU of 4.13 and 40 minutes of intraservice time, and commenters noted that this code involves open femoral artery exposure by groin incision and closure of the wound, typically for separately reported delivery of an endovascular prosthesis for an asymptomatic infrarenal abdominal aortic aneurysm. In comparison, exposure and closure for CPT code 63052 are performed as part of the primary arthrodesis code and the intraservice time includes higher intensity bony and soft tissue resection, therefore, although both codes require the same time, the physician work and intensity of CPT code 63052 is greater than CPT code 34812.

After consideration of the public comments regarding CPT code 63053, we are finalizing a work RVU of 3.19 for CPT code 63053 based on an intraservice time ratio between CPT codes 63052 and 63053 ((30 minutes/40 minutes) * 4.25 = 3.19). As we stated above, we are also finalizing a work RVU of 4.25 for CPT code 63052 based on a crosswalk to CPT code 22853. The RUC did not recommend any direct PE inputs for these codes and we are not finalizing any direct PE inputs.

(17) Hypoglossal Nerve Stimulator Services (CPT Codes 64582, 64583, and 64584)

In October 2020, the CPT Editorial Panel added three new CPT Category I codes to report open implantation, revision or replacement, and removal of hypoglossal nerve stimulator array. These new CPT codes replaced three CPT Category III codes which were reported with CPT codes 64568 (*Incision for implantation of cranial nerve (e.g., vagus nerve) neurostimulator electrode array and pulse generator*), 64569 *(Revision or replacement of cranial nerve (e.g., vagus nerve) neurostimulator electrode array, including connection to existing pulse generator)* and 64570 *(Removal of cranial nerve (e.g., vagus nerve) neurostimulator electrode array and pulse generator).*

CPT code 64582 (*Open implantation of hypoglossal nerve neruostimulator array, pulse generator, and distal respiratory sensor electrode or electrode array*) was previously reported using the now deleted Category III CPT code 0466T (*Insertion of chest wall respiratory sensor electrode or electrode array, including connection to pulse generator (List separately in addition to code for primary procedure)*) along with CPT code 64568. We did not propose the RUC-recommendation to use the survey median work RVU of 16.00 for CPT code 64582. We proposed a work RVU of 14.00 based on the intraservice time ratio of CPT code 64568 compared to the RUC-recommended intraservice time for CPT code 64582. CPT code 64568 has a work RVU of 9.00, intraservice time of 90 minutes and total time of 275 minutes. CPT code 64582 has a RUC-recommended work RVU of 16.00, intraservice time of 140 minutes and total time of 294 minutes. Additionally, when we reviewed CPT code 64582, we found that the RUC-recommended work RVU was higher than other global 90-day codes with similar time values. We did not agree that it would be typical to value this code so much higher than services with similar work time values. Additionally, we note that the proposed work RVU of 14.00 is also the survey 25th percentile. Therefore, as previously stated, we believe 14.00 is a more appropriate value overall than 16.00 when compared to the range of codes with similar work times.

We did not propose the RUC-recommended work value of 16.50 for CPT code 64583 (*Revision or replacement of hypoglossal nerve neruostimulator array and distal respiratory sensor electrode or electrode*

array, including connection to an existing pulse generator), rather we proposed a work RVU of 14.50. Although we disagree with the RUC-recommended work RVU, we concur that the relative difference in work between CPT codes 64582 and 64583 is equivalent to the recommended increment of 0.50 RVUs. Therefore, we proposed a work RVU of 14.50 for CPT code 64583 based on the recommended increment of 0.50 additional RVUs above our proposed work RVU of 14.00 for CPT code 64582. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Additionally, we note that the proposed work RVU of 14.50 is also nearly identical to the 25th percentile survey value for CPT code 64583 of 14.63. Therefore, as previously stated, we believe 14.50 is a more appropriate value than 16.50 to maintain an appropriate intra-family relativity.

We did not propose the RUC-recommended work value of 14.00 for CPT code 64584 (*Removal of hypoglossal nerve neruostimulator array, pulse generator, and distal respiratory sensor electrode or electrode array*), rather we proposed a work RVU of 12.00. Although we disagree with the RUC-recommended work RVU, we concur that the relative difference in work between CPT codes 64582 and 64584 is equivalent to the recommended increment of −2.0 RVUs. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Therefore, we proposed a work RVU of 12.00 for CPT code 64584 based on the recommended increment of 2.0 RVUs below our proposed work RVU of 14.00 for CPT code 64582. Additionally, we note that the proposed work RVU of 12.00 is also the RUC 25th percentile survey value for CPT code 64584.

We proposed the RUC-recommended direct PE inputs without refinements for CPT codes 64582, 64583 and 64584.

Comment: A few commenters including the RUC urged CMS to finalize a work RVU of 16.00 for CPT code 64582, 16.50 for CPT code 64583 and 14.00 for CPT code 64584 based on the survey median. The commenters disagreed with CMS calculating intra-service time ratios for valuing 64582, and also disagreed with CMS utilizing the incremental difference for valuing 64583 and 64584. The commenters also indicated that the survey median is more appropriate, given the physician work, intensity and complexity of the service.

Response: We disagree with the commenters and continue to believe that the use of time ratios is one of several appropriate methods for identifying potential work RVUs for particular PFS services, particularly when the alternative values recommended by the RUC and other commenters do not account for survey information that suggests the amount of time involved in furnishing the service has changed significantly. We reiterate that, consistent with the statute, we are required to value the work RVU based on the relative resources involved in furnishing the service, which include time and intensity. Therefore, when our review of recommended values reveals that changes in time are not accounted for in a recommended work RVU, we believe we have an obligation to account for that change in establishing work RVUs since the statute explicitly identifies time as one of the two elements of the work RVUs. We recognize that it would not be appropriate to develop work RVUs solely based on time given that intensity is also an element of work, but in applying the time ratios, we are using derived intensity measures based on current work RVUs for individual procedures. Again, we clarify that we do not treat all components of physician time as having identical intensity. If we were to disregard intensity altogether, the work RVUs for all services would be developed based solely on time values and that is definitively not the case, as indicated by the many services that share the same time values but have different work RVUs. We have responded to concerns about our methodology earlier in this section. We disagree with the commenters and continue to believe that finalizing a work RVU of 14.00 is more appropriate than a work RVU of 16.00 for CPT code 64582 based on the intraservice time ratio of CPT code 64568 compared to the RUC-recommended intraservice time for CPT code 64582. As stated in the proposed rule, the AMA RUC surveyed 25th percentile work RVU for CPT code 64582 was 14.00. Additionally, we also note that the RUC has also used the surveyed 25th percentile work value as a basis to recommend the work RVU for a code.

We believe the use of an incremental difference between the work RVUs of codes is a valid methodology for setting values, especially in valuing services within a family. Historically, we have frequently utilized an incremental methodology in which we value a code based upon the incremental work RVU difference between the code and another code or another family of codes. We note that the RUC has also used the same incremental methodology on occasion when it was unable to produce valid survey data for a service. We have no evidence to suggest that the use of an incremental difference between the work RVUs of codes conflicts with the statute's definition of the work component as the resources in time and intensity required in furnishing the service. We do consider clinical information associated with physician work intensity provided by the RUC and other stakeholders as part of our review process, although we remind readers again that we do not believe it is necessary for codes to share the same site of service, patient population, or utilization level to in order to serve as an appropriate crosswalk. Therefore, we are finalizing a work RVU of 14.50 for CPT code 64583 based on the recommended increment of 0.50 additional RVUs above the finalized work RVU of 14.00 for CPT code 64582, and we are finalizing a work RVU of 12.00 for CPT code 64584 based on the recommended increment of 2.0 RVUs below the finalized work RVU of 14.00 for CPT code 64582.

Comment: A commenter supported CMS' proposal to accept the RUC-recommended direct PE inputs without refinements for CPT codes 64582, 64583 and 64584.

Response: We appreciate the support for our proposed direct PE inputs.

After consideration of public comments, we are finalizing work RVUs of 14.00 for CPT code 64582, 14.50 for CPT code 64583 and 12.00 for CPT code 64584. We are finalizing the RUC-recommended direct PE inputs without refinement for CPT codes 64582, 64583 and 64584.

(18) Destruction by Neurolytic Agent (CPT Codes 64633, 64634, 64635, and 64636)

In September 2014, the Relativity Assessment Workgroup identified a work neutrality issue for CPT codes 64633 (*Destruction by neurolytic agent, paravertebral facet* joint nerve(s), with imaging guidance (fluoroscopy or CT); cervical or thoracic, single facet joint), 64634 (*Destruction by neurolytic agent, paravertebral facet joint nerve(s), with imaging guidance (fluoroscopy or CT); cervical or thoracic, each additional facet joint (List separately in addition to code for primary procedure)), 64635 (Destruction by neurolytic agent, paravertebral facet joint nerve(s), with*

imaging guidance (fluoroscopy or CT); lumbar or sacral, single facet joint), and 64636 (Destruction by neurolytic agent, paravertebral facet joint nerve(s), with imaging guidance (fluoroscopy or CT); lumbar or sacral, each additional facet joint (List separately in addition to code for primary procedure)) related to incorrect coding relative to how the services were originally valued. In May 2015, the CPT Editorial Panel revised the parenthetical instructions for the five codes describing paravertebral facet joint nerve destruction to clarify that these codes are reported per joint, not nerve. Due to the extensive growth and original incorrect assumptions about distribution of reporting, the RUC recommended that CPT codes 64633–64636 be surveyed. We proposed the RUC-recommended work RVU of 1.32 for CPT code 64634 and the RUC-recommended work RVU of 1.16 for CPT code 64636.

For CPT codes 64633 and 64635, we did not propose the RUC-recommended work RVU of 3.42 for both codes, as we believe this value understates the decrease in physician work time for these codes. An analysis of all 010-day global period codes indicates that these proposed values will place these codes among the highest valued for codes with similar time values. We are instead using a total-time ratio methodology to propose work RVUs of 3.31 for CPT code 64633 and 3.32 for CPT code 64635. We support these values by noting that they fall between CPT codes 54164 (*Frenulotomy of penis*), with a work RVU of 2.82, and CPT code 68371 (*Harvesting conjunctival allograft, living donor*), with a work RVU of 5.09; these reference codes have total time values that are similar to, and intraservice time values that are identical to those recommended for CPT codes 64633 and 64635.

We proposed the RUC-recommended direct PE inputs without refinement.

Comment: Commenters supported the proposal of the RUC-recommended work RVUs for the add-on codes, CPT codes 64634 and 64636, and the RUC-recommended direct PE inputs for all codes. However, many commenters opposed the proposed work RVUs for CPT codes 64633 and 64635 and urged CMS to finalize the RUC-recommended work RVUs for these codes. According to commenters, the proposed values for these codes placed these services out of rank order with similar services such as the top key reference code, CPT code 64625 (*Radiofrequency ablation, nerves innervating the sacroiliac joint, with image guidance (ie, fluoroscopy or computed tomography*) (work RVU = 3.39, 30 minutes intra-service time and 98 minutes total time)). Commenters stated that CPT codes 64633 and 64635 are slightly more intense and complex than CPT code 64625 due to the anatomical differences in anatomic locations; while CPT code 64625 requires more injections, CPT codes 64633 and 64635 are in a much more clinically complex location, requiring greater clinical expertise. CPT codes 64633 and 64635 also require more total time than 64625 and the RUC-recommended median work RVU of 3.42 maintains the proper rank order between these services. Commenters stated that CMS' time ratio calculation ignored magnitude estimates as indicated by physicians who perform these services and compromises the correct relativity of these services. Commenters also stated that CMS' calculation also ignored the intensity of these services and discounted it by arriving at a value by calculation. The RUC requested that CMS provide clinical rationale on why CPT codes 64633 and 64635 require less physician work or intensity than other similar services. The RUC recommended that the work RVU for CPT codes 64633 and 64635 be the same. According to commenters, the CMS references to CPT codes 54164 and CPT code 68371 are inappropriate as they describe procedures that are too clinically different.

Response: We disagree that our time ratio calculation is inaccurate and we continue to believe that the use of time ratios is one of several appropriate methods for identifying potential work RVUs for PFS services, particularly when the alternative values recommended by the RUC and other commenters do not account for information provided by surveys which suggests that the amount of time involved in furnishing the service has changed significantly. We have responded to concerns about our methodology earlier in this section. For additional information regarding the use of old work time values that were established many years ago and have not since been reviewed in our methodology, we refer readers to our discussion of the subject in the Methodology for Establishing Work RVUs section of this final rule (section II.E.2.), as well as a detailed discussion in the CY 2017 PFS final rule (81 FR 80273 through 80274). We do not agree that the proposed work RVU for CPT code 64633 would create a rank order anomaly with CPT code 64625, as the proposed value for CPT code 64633 recognizes that this is a higher intensity procedure than CPT code 64625. We understand that the RUC asserts that CPT code 64633 and 64635 describe services of similar intensity, and therefore, we are finalizing work RVUs of 3.32 for both codes, rather than 3.31 for CPT code 64633 and 3.32 for CPT code 64635 as proposed. Given the identical intensity of these two services, we used total time ratios to estimate a value that we believe more accurately captures the time as proposed, then we used the relative relationship between the two codes to further refine the value for 64633 from 3.31 to 3.32. With regard to the invocation of clinically relevant relationships by the commenters, we emphasize that we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that they are necessarily more appropriate crosswalks. We disagree that our proposed RVUs undervalued these codes in reference to other similar procedures, and we note that even considering our proposed work RVUs reductions, these codes would still be among the highest valued of all 010-day global period codes.

After consideration of the comments, we are finalizing the proposed work RVUs for CPT codes 64634, 64635, and 64636, as proposed. For CPT code 64633, we are instead finalizing a work RVU of 3.32 to match the work RVU of CPT code 64635. We are also finalizing the RUC-recommended direct PE inputs for these codes as proposed without refinement.

(19) Destruction of Intraosseous Basivertebral Nerve (CPT Codes 64628 and 64629)

In October 2020, the CPT Editorial Panel added two Category I codes to report thermal destruction of intraosseous basivertebral nerve, inclusive of all imaging guidance for the first two vertebral bodies (lumbar or sacral) and for each additional vertebral body (lumbar or sacral).

We did not propose the RUC-recommended work value of 8.25 for CPT code 64628 (*Thermal destruction of intraosseous basivertebral nerve, inclusive of all imaging guidance; first two vertebral bodies, lumbar or sacral*). When we reviewed CPT code 64628, we found that the RUC-recommended work RVU was higher than codes with the same 10-day global period, same intraservice time and similar total times. The RUC-recommended work RVU of 8.25 would value CPT code 64628 at the 90th percentile of comparable 10-day global and we do not agree that it will

be typical to value this code so much higher than services with similar work time values. We believed it would be more accurate to propose a work RVU of 7.15 based on a crosswalk to CPT code 63650 (*Percutaneous implantation of neurostimulator electrode array, epidural*) with a work RVU of 7.15, identical intraservice time of 60, and similar total time of 170. We believe the crosswalk to CPT code 63650 serves as a more accurate valuation for CPT code 64628.

We also did not propose the RUC-recommended work value of 4.87 for CPT code 64629 (*Thermal destruction of intraosseous basivertebral nerve, inclusive of all imaging guidance; each additional vertebral body, lumbar or sacral (List separately in addition to code for primary procedure)*). Although we disagree with the RUC-recommended work RVU, we concur that the relative difference in work between CPT codes 64628 and 64629 is equivalent to the recommended increment of −3.38 RVUs. However, since the recommended work RVU of code 64628 was higher than other codes with the same 10-day global period, same intraservice time, and similar total times, we refined the work RVU for code 64629 to preserve the incremental difference between the two codes. We believe that these refinements maintain the relationship between the two codes in the family while better preserving relativity with other similar 10-day global codes on the wider PFS. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Therefore, we proposed a work RVU of 3.77 for CPT code 64629 based on the recommended increment of 3.38 RVUs below our proposed work RVU of 7.15 for CPT code 64628.

We proposed the RUC-recommended direct PE inputs without refinements for CPT code 64628. CPT code 64629 is an add-on code and does not have any direct PE inputs.

Comment: Several commenters including the RUC urged CMS to finalize the RUC-recommended work RVU of 8.25 for CPT code 64628 and 4.87 for CPT code 64629 which are both based on the survey 25th percentile. The commenters disagreed that the proposed crosswalk to CPT code 63650 serves as a more accurate valuation for CPT code 64628 and supports the RUC's recommendation for code 64628 with comparisons to the reference CPT code 22514 (*Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (e.g., kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; lumbar*) with a work RVU of 7.99, and CPT code 22513 (*Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (e.g., kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; thoracic*) with a work RVU of 8.65. The commenters suggested that CMS proposals and methodology consider survey data, review by specialty societies and cross-specialty comparison. A commenter urged CMS to finalize a work RVU of 9.75 for CPT code 64628 and 4.87 for 64629. Another commenter urged CMS to finalize a work RVU of 10.40 for the base CPT code 64628, and agreed that the additional level code, CPT code 64629, should have a work RVU of approximately 50 percent of the base code, and be assigned a work RVU of 5.20. A few commenters noted that CMS' proposal does not accurately reimburse physicians for their work and that the proposed values will negatively impact access to care. For CPT code 64629, commenters including the RUC urged CMS to finalize a work RVU of 4.87 based on the survey 25th percentile for this add-on code. A few commenters disagreed with CMS utilizing incremental differences for valuing services.

Response: We appreciate the feedback from commenters, and we are sensitive to the need for appropriate payment under the PFS to ensure that beneficiaries maintain access to care. However, we disagree with the commenters that the RUC's recommended 25th percentile bracketed to CPT codes 22514 and 22513 is a more accurate choice than our proposed reference code CPT code 63650. We continue to believe that CPT code 63650 is a more accurate reference code for 64628, and note that the CPT Editorial Panel assigned the Destruction of Intraosseous Basivertebral Nerve family to the 60000 series.

We continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate code comparison or an appropriate crosswalk.

Additionally, we believe the use of an incremental difference between the work RVUs of codes is a valid methodology for setting values, especially in valuing services within a family. Historically, we have frequently utilized an incremental methodology in which we value a code based upon the incremental work RVU difference between the code and another code or another family of codes. We note that the RUC has also used the same incremental methodology on occasion when it was unable to produce valid survey data for a service. We have no evidence to suggest that the use of an incremental difference between the work RVUs of codes conflicts with the statute's definition of the work component as the resources in time and intensity required in furnishing the service. We do consider clinical information associated with physician work intensity provided by the RUC and other stakeholders as part of our review process, although we remind readers again that we do not believe that it is necessary for codes to share the same site of service, patient population, or utilization level in order to serve as an appropriate crosswalk.

Comment: Some commenters supported CMS proposing the RUC-recommended direct PE inputs without refinements for CPT code 64628.

Response: We appreciate the support for our proposed direct PE inputs.

After consideration of the comments, we are finalizing a work RVU of 7.15 for CPT code 64628 and 3.77 for CPT code 64629, as proposed. We are also finalizing the RUC-recommended direct PE inputs as proposed without refinement for CPT code 64628.

(20) Dilation of Aqueous Outflow Canal (CPT Codes 66174 and 66175)

These services were identified through the New Technology/New Services List. In January 2020, the specialty societies submitted an action plan and the RUC recommended referral to the CPT Editorial Panel in 2020 to possibly revise the descriptor and add exclusionary parentheticals for CPT code 66174 (*Transluminal dilation of aqueous outflow canal; without retention of device or stent*). In October 2020, the CPT Editorial Panel revised this code to add a parenthetical to restrict reporting this code in conjunction with CPT code 65820 (*Goniotomy*).

We did not propose the RUC-recommended work RVUs of 8.53 for CPT code 66174 and 10.25 for CPT code 66175 (*Transluminal dilation of*

aqueous outflow canal; with retention of device or stent), as we believe these values do not adequately reflect the surveyed reductions in physician time. These RVUs will rank these codes among the highest valued 090-day global period codes of similar time values. We proposed a work RVU of 9.34 for CPT code 66175 using a reverse building block methodology. We then subtract the incremental difference between the two RUC-recommended work RVUs, an increment of 1.72, from our proposed work RVU of 9.34 for CPT code 66175 to propose a work RVU of 7.62 for CPT code 66174. We believe this approach is consistent with the RUC's assumption that the intensity and complexity of CPT code 66174 is the same as that of CPT code 66175, the only difference between the two procedures being the additional intraservice time associated with placement of the stent. As further support for these values, we note that they fall between CPT code 66984 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification); without endoscopic cyclophotocoagulation*), with 7.35 work RVUs, and CPT code 15150 (*Tissue cultured skin autograft, trunk, arms, legs; first 25 sq cm or less*), with 9.39 work RVUs.

We proposed the RUC-recommended PE inputs without refinement.

Comment: The RUC urged CMS to accept a work RVU of 8.53 for CPT code 66174 and 10.25 for CPT code 66175. The RUC disagreed with CMS utilizing reverse building block methodology for valuing services and stated that both CMS recommended work values are below the survey 25th percentile and well below the current values. The RUC stated that the reverse building block methodology, or any other purely formulaic approach, should not be used as the primary methodology to value services. Commenters stated that this was inappropriate as magnitude estimation has been used to establish work RVUs for services since the publication of the first Medicare PFS in 1992.

Response: We disagree with the commenter regarding the validity of the building block methodology. We note that our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). We believe an alternative valuation methodology, in this case the building block methodology, more accurately reflects the reductions in physician time values.

We continue to believe that our proposed values more accurately reflect both the surveyed physician time, as well as the relative relationship among these codes and other services of similar time values as compared to the RUC-recommended values, which would overvalue these codes relative to other 090-day global period codes. The proposed work RVUs for CPT codes 66174 and 66175 are among the highest of 90-day global period codes with these time values. Therefore, we are finalizing work RVUs of 7.62 for CPT code 66174 and 9.34 for CPT code 66175, as proposed. We are finalizing the RUC-recommended direct PE inputs without refinement.

(21) Cataract Removal With Drainage Device Insertion (CPT Codes 66989, 66991, 66982, 66984, 66987, 66988, and 0671T)

The RUC identified CPT code 0191T (*Insertion of anterior segment aqueous drainage device, without extraocular reservoir, internal approach, into the trabecular meshwork; initial insertion*) via the Category III codes with High Utilization screen (2018 estimated Medicare utilization over 1,000). In January 2020, the RUC recommended that the specialty societies develop a coding application for Category I status for CPT code 0191T and CPT code 0376T (*each additional device insertion (List separately in addition to code for primary procedure*). In October 2020, the CPT Editorial Panel replaced two Category III codes (CPT codes 0191T and 0376T) with two new codes, CPT codes 66989 and 66991, to report extracapsular cataract removal with insertion of intraocular lens prosthesis and one Category III code to report insertion of anterior segment aqueous drainage device without concomitant cataract removal.

The RUC recommended a work RVU of 12.13 for CPT code 66989 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (e.g., iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with insertion of intraocular (e.g., trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more*) based on the survey 25th percentile.

In its recommendation, the RUC noted that the recommended intraservice time of 28 minutes for CPT code 66989 is 2 minutes less than the intraservice time of 30 minutes associated with CPT code 66982 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (e.g., iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; without endoscopic cyclophotocoagulation*). The RUC further noted this should not be the case, as the insertion of the intraocular lens prosthesis should take the same amount of time and be represented by the same relative work for both procedures and that it is counterintuitive that the intraservice time for CPT code 66989 will be lower than the intraservice time for CPT code 66982, as CPT code 66989 includes both complex cataract surgery and the insertion of the intraocular anterior segment aqueous drainage device. The specialty society that surveyed the codes explained that this is likely because the early adopters of this new technology service are highly skilled surgeons who will likely perform these procedures quickly. They stated that as this procedure diffuses into the wider population of ophthalmologic surgeons over the next few years, the intraservice time will likely rise above the intraservice time associated with CPT codes 66982 and 66984 and will come

in line for both CPT codes 66989 and 66991.

CPT code 69982 has a work RVU of 10.25, 125 minutes of total time and 30 minutes of intraservice time. CPT code 66989 has a RUC-recommended work RVU of 12.13, 176 minutes of total time and 28 minutes of intraservice time. We agree with the RUC assessment that both procedures, CPT code 66982 and CPT code 66989, are almost identical in time and intensity. However, we disagree with the RUC-recommended work RVU of 12.13 for CPT code 66989 noting that CPT code 66982 has a work RUV of 10.25. We proposed a work RVU of 10.31 based on the current total time ratio of CPT code 66982 compared to the RUC-recommended total time for CPT code 66989.

For CPT code 66991, the RUC recommended a work RVU of 9.23. The RUC determined that it would be appropriate to use the increment between the 25th percentile work RVU value for CPT code 66989 and the current RUC-reviewed work RVU value for CPT code 66982 to build a work RVU recommendation for CPT code 66991. The RUC determined that the increment between the 25th percentile work RVU value for CPT code 66989 (work RVU = 12.13) and the current RUC-reviewed work RVU value for CPT code 66982 (work RVU = 10.25) will yield an increment between those two codes of 1.88. The RUC added the 1.88 increment to 7.35, the current work RVU for 66984, which yields a RUC-recommended work RVU value of 9.23. This comparison results in a work RVU recommendation of 9.23 for CPT code 66991. We proposed a work RVU of 7.41, which is the increment between the current RUC-reviewed work RVU value for CPT code 66982 and CPT code 66984. The increment between CPT code 66982 (work RVU = 10.25) and CPT code 66984 (work RVU = 7.35) yields a work RUV of 2.90. We subtracted this 2.90 increment from 10.31, to determine our proposed work RVU of 7.41 for CPT code 66989.

We proposed the RUC-recommended indirect PE values for CPT codes 66989 and 66991.

We did not propose any new valuations but reaffirmed the work RVUs and direct PE inputs that we previously finalized for CPT codes 66982 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (e.g., iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; without endoscopic cyclophotocoagulation*) and 66984 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification); without endoscopic cyclophotocoagulation*). For CPT codes 66987 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (e.g., iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with endoscopic cyclophotocoagulation*) and 66988 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification); with endoscopic cyclophotocoagulation*) we continue to believe these services should be contractor priced.

Comment: One commenter urged CMS to finalize its proposed valuation for CPT codes 66989 and 66991, stating that these new services are overpriced and underperformed.

Response: We appreciate the commenter's feedback.

Comment: Commenters requested that CMS finalize the RUC-recommended work RVU of 12.13 for CPT code 66989 and the RUC-recommended work RVU of 9.23 for CPT code 66991. The commenters urged CMS to consider the intensity of CPT code 66989 and to also provide clinical rationale on why CPT code 66989 should only be valued 0.06 more work RVUs than CPT code 66982. Commenters stated that CMS is only focusing on time and not the clinical work and intensity required to perform CPT code 66989. Furthermore, this code is more intense than CPT code 66982 because it includes both complex cataract surgery and the insertion of the intraocular anterior segment aqueous drainage device. The commenters stated that CMS' proposed value for CPT code 66991 assumes that the CMS proposed value for CPT code 66989 is appropriate and commenters disagreed that the proposed value for CPT code 66989 is correct as indicated above.

Response: We appreciate the additional information supplied by commenters regarding the clinical work and intensity required to perform CPT codes 66989 and 66991, particularly their relationship in terms of intensity with CPT code 66982. After consideration of these comments, we are not finalizing our proposed work RVUs and will instead finalize the RUC-recommended work RVU for both codes.

Comment: Commenters requested that CMS finalize the RUC-recommended work RVU of 13.15 for CPT code 66987 and 10.25 for CPT code 66988. They note that these services will be reported more than 7,000 times per year and contractor pricing, as proposed, is burdensome.

Response: We appreciate commenters' feedback. However, we continue to believe that CPT codes 66987 and 66988 should be contractor priced. We previously finalized the use of contractor pricing in the CY 2020 PFS final rule due to a lack of survey data and crosswalks to support the RUC-recommended work RVUs (84 FR 62751–62753). Since the RUC and commenters merely reaffirmed the same work RVUs from CY 2020 without providing new information, we continue to believe that contractor pricing is the most appropriate choice for these codes.

Comment: Many commenters expressed concern that the proposed change to bundle minimally invasive glaucoma surgery (MIGS) procedures with cataract surgery would make the reimbursement rate too low for providers to offer the procedure which could impact beneficiary access to the service.

Response: We agree with commenters concerns regarding the payment rate of these services. We are concerned that the recommended values of these new services might not fit within the family of services as currently valued given concerns raised by stakeholders. In consideration of stakeholder concerns, including early feedback on how the instraservice time for these services may not be reflective of what will be considered typical in how these services may be furnished, we encourage the RUC and other stakeholders to reconsider the valuation of the cataract procedure family as a whole, including the new codes, in the near term.

After consideration of comments we are finalizing the RUC-recommended work RVUs of 12.13 and 9.23 for CPT codes 66989 and 66991; respectively. We are finalizing the proposal to maintain contractor pricing for CPT codes 66987 and 66988. We are also finalizing the RUC-recommended direct PE inputs as proposed for this code family.

(22) Retinal Detachment Prophylaxis (CPT Codes 67141 and 67145)

CPT code 67145 (*Prophylaxis of retinal detachment (e.g., retinal break, lattice degeneration) without drainage, 1 or more sessions; photocoagulation (laser or xenon arc)*) was identified in October 2019 as a Harvard Valued service with utilization over 30,000. In January 2020, the RUC agreed with the specialty societies that surveyed the service and recommended that CPT code 67145, as well as its parent CPT code 67141 (*Prophylaxis of retinal detachment (e.g., retinal break, lattice degeneration) without drainage, 1 or more sessions; cryotherapy, diathermy*), be referred to the CPT Editorial Panel for a descriptor and global period change. The codes were edited to remove the reference to ''1 or more sessions'' so that the services may be valued as a 010-day procedure versus the current 090-day global. At the May 2020 CPT Editorial Panel meeting, the Panel approved revision of the two codes to remove ''1 or more sessions'' from the descriptors and deletion of the Eye and Ocular Adnexa Prophylaxis guidelines.

For CY 2022, we proposed the RUC-recommended work RVU of 2.53 for CPT codes 67141 and 67145. We also proposed the RUC-recommended direct PE inputs without refinements.

Comment: One commenter urged CMS to adopt the 25th percentile survey work values reviewed by the RUC and recommended to CMS.

Response: We appreciate the commenters feedback. For CPT codes 67141 and 67145, we are finalizing the RUC-recommended work RVU of 2.53 for CPT codes 67141 and 67145 and the RUC-recommended direct PE inputs without refinements, as proposed.

(23) Strabismus Surgery (CPT Codes 67311, 67312, 67314, 67316, 67318, 67320, 67331, 67332, 67334, 67335, and 67340)

In April 2020, The RUC recommend that add-on CPT codes 67320, 67331, 67332, 67334, 67335, and 67340 be surveyed along with the base codes in which these services are typically reported (CPT codes 67311, 67312, 67314, 67316 and 67318). When AMA staff compiled a list of 010-day and 090-day services for increases in physician work and time during the surgical global period, they noticed that several low volume codes that were converted to ZZZ global periods in 1999 still included office visits (specifically CPT codes 67320, 67331, 67332, 67334, 67340). It appeared that these office visits may not be appropriate for these services. This issue was deferred until October 2020.

We proposed the RUC-recommended work RVUs for all base codes within this family. This includes a work RVU of 5.93 for CPT code 67311 (*Strabismus surgery, recession or resection procedure; 1 horizontal muscle*), 9.50 for CPT code 67312 (*Strabismus surgery, recession or resection procedure; 2 horizontal muscles*), 5.93 for CPT code 67314 (*Strabismus surgery, recession or resection procedure; 1 vertical muscle (excluding superior oblique)*), 10.31 for CPT code 67316 (*Strabismus surgery, recession or resection procedure; 2 or more vertical muscles (excluding superior oblique)*), and 9.80 for CPT code 67318 (*Strabismus surgery, any procedure, superior oblique muscle*).

We also proposed the RUC-recommend work RVUs for all of the add-on codes within this family. This includes a work RVU of 3.00 for CPT code 67320 (*Transposition procedure (e.g., for paretic extraocular muscle), any extraocular muscle (specify)(List separately in addition to code)*), 2.00 for CPT code 67331 (*Strabismus surgery on patient with previous eye surgery or injury that did not involve the extraocular muscles (List separately in addition to code for primary procedure)*), 3.50 for CPT code 67332 (*Strabismus surgery on patient with scarring of extraocular muscles (e.g., prior ocular injury, strabismus or retinal detachment surgery) or restrictive myopathy (e.g., dysthyroid opthalmopathy) (List separately in addition to code for primary procedure)*), 2.06 for CPT code 67334 (*Strabismus surgery by posterior fixation suture technique, with or without muscle recession (List separately in addition to code for primary procedure)*), 3.23 for CPT code 67335 (*Strabismus surgery by posterior fixation suture technique, with or without muscle recession (List separately in addition to code for primary procedure)*), and 5.00 for CPT code 67340 (*Strabismus surgery by posterior fixation suture technique, with or without muscle recession (List separately in addition to code for primary procedure)*).

We proposed the RUC-recommended direct PE inputs for this code family without refinements.

Comment: Commenters unanimously opposed the RUC-recommended RVUs for every code in this family. Commenters did not agree with the reference codes used by the RUC to support their recommended values. They stated that they believe it is inappropriate to use reference codes to support a valuation that is lower than the 25th percentile survey result for CPT code 67311, CPT code 67314, and CPT code 67320, while valuing all other CPT codes within the family at the 25th percentile. Commenters asked that CMS raise the RVUs for these CPT codes to also be the 25th percentile survey result, which would make the family consistently valued. Commenters also asked that the reduction in RVUs be phased in over a 3 to 5-year timeframe instead of the statutory 2 years.

Response: We generally agree that there should be consistency within code families. The recommendations presented to us by the RUC for this CPT code family, however, include a review of surveys for time changes, intensity, clinical aspects, and a thoughtful review of survey results with the intent for the revaluation to minimize rank order anomalies and have valuations consistent with and accounting for the reductions in intraservice and total times for each CPT code. In regards to the possibility of an extended phase-in, section 1848(c)(7) of the Act, as added by section 220(e) of the PAMA, specifies that for services that are not new or revised codes, if the total RVUs for a service for a year would otherwise be decreased by an estimated 20 percent or more as compared to the total RVUs for the previous year, the applicable adjustments in work, PE, and MP RVUs shall be phased-in over a 2-year period. CPT codes 67311, 67314, 67320, 67331, 67332, and 67334 were subject to the phase-in transition and it was applied in calculating their proposed RVUs; we direct readers to the Codes Subject to Phase-In public use file for the CY 2022 PFS proposed rule for additional details. The statute defines the phase-in transition as taking place over 2 years. For additional information regarding the phase-in of significant RVU reductions, we direct readers to the CY 2016 PFS final rule with comment period (80 FR 70927 through 70929).

Comment: Commenters stated that CMS should revise the policy finalized in the 2021 PFS final rule (85 FR 84472) that revalued E/M office visits but excluded the valuations from 90 and 10-day postoperative global surgery packages. Commenters requested the revised values be applied to the postoperative visits in global surgery CPT code families as well, and they noted this is particularly relevant to this and other CPT code families.

Response: We did not address the exclusion of postoperative office visits within global surgery packages from the E/M revaluation for this service, or other services, in the proposed rule. Therefore, this policy is out of scope for the CY 2022 PFS proposed and final

rules. We refer readers to our discussion on this topic in the CY 2021 PFS final rule (84 FR 84472).

Comment: Commenters raised several concerns about potential impacts on clinicians, as well as beneficiaries due to the large reduction in work RVUs for each code. Commenters were also concerned about a further reduction in the surgical ophthalmology workforce which they say suffers an existing shortage. The commenters stated that the further reduction could be caused by the proposed reimbursement cuts, low reimbursement compared to other ophthalmology services, and lingering financial impacts from the PHE. Commenters also stated that a reduction will disproportionately impact pediatric beneficiaries, minorities, and rural areas. They also stated that it could increase health disparities, generally, because the patient population for this service is primarily comprised of children insured by Medicaid. Commenters were concerned that Medicaid and private insurance payers will follow Medicare reimbursement and reduce payment for these services as well.

Response: We remain committed to minimizing health disparities and increasing health equity across all patient populations and demographics. We also are committed to minimizing impacts on clinicians as they relate to burden and workforce shortage. We acknowledge that impacts could potentially occur to special populations outside of Medicare as a result of reimbursement cuts to certain covered services. We appreciate that stakeholders have raised concerns about these CPT codes and we believe that it would be worthwhile for stakeholders, including the RUC to review these services in light of the concerns that stakeholders presented. We are also interested in engaging with stakeholders in light of concerns about beneficiary access to these services.

After consideration of these public comments, we are finalizing the work RVUs and direct PE inputs for the Strabismus Surgery CPT code family as proposed.

(24) Lacrimal Canaliculus Drug Eluding Implant Insertion (CPT Codes 68841)

CPT code 68841 (*Insertion of drug-eluting implant, including punctal dilation, when performed, into lacrimal canaliculus, each*) was recommended for RUC review in October 2020 since the CPT Editorial Panel replaced CPT Category III (temporary) code 0356T with a new CPT Category I code to report the insertion of a drug eluting implant into the lacrimal canaliculus. We proposed the RUC-recommended work RVU of 0.49 for CPT code 68841.

For the direct PE inputs, we proposed to refine the equipment time for the ''lane, screening (oph)'' (EL006) from the RUC-recommended 9 minutes of equipment time to the 5-minute equipment standard for CPT code 68841. Five minutes is the standard equipment time associated with EL006 for this procedure. The recommended materials for this code family from the RUC state that the screening lane is used for the duration of setup, procedure, cleaning, and counselling post procedure and that the standard formulas are applied. We believe that the RUC inadvertently failed to update the equipment time associated with this procedure when CPT code 68841 was reviewed. The recommended materials for CPT code 68841 state the standard equipment time formula will be typical for this service, which will be 5 minutes in this case (the CA013 and CA024 equipment times are included but not the CA035 equipment time). We proposed to refine the equipment time for the equipment item lane, screening (oph) (EL006) from 9 minutes to 5 minutes to match this change in equipment time and solicited additional comments from stakeholders regarding the RUC-recommended non-standard equipment time of 9 minutes. We do not agree that it would be typical for CPT code 68841 to require an additional 4 minutes of equipment time totaling 9 minutes.

Comment: Several commenters opposed the proposed work RVU of 0.49 for CPT code 68841, stating that the payment is too low and much lower than what they were paid under the temporary CPT category III code 0356T, when carrier-priced. Commenters suggested that CMS return to using the temporary CPT category III code 0356T and its same payments for CY 2022.

Response: Since CPT has established a category I code—CPT code 68841—to replace the temporary CPT category III code 0356T, this temporary code will be replaced by the new category I CPT code 68841, so maintaining payment for CPT category III code 0356T is not possible.

Comment: Commenters urged CMS to withdraw the proposed RUC-recommended value of 0.49 work RVUs for CPT code 68841 and offered a series of other possible CPT codes with higher work RVU values as crosswalks for CPT code 68841. Some commenters also asked that the 4 minutes of equipment time for the ''lane, screening (oph)'' (EL006) be restored to the total of 9 minutes. Another commenter thanked CMS for correcting the equipment time to 5 minutes.

Response: After reviewing the procedure itself, its intra-service time and the RUC-recommended work RVUs for this service, we believe that this work is appropriate and maintains a proper relativity to similar codes within the PFS. After considering all the suggestions from commenters and reviewing the RUC-recommended work RVUs with the RUC-recommended physician times for this CPT code, and re-examining the surveyed work RVU of 0.74 at the 25th percentile with 3 minutes of intraservice physician time and 11 minutes of total time, we are finalizing the work and PE inputs for CPT code 68841 as proposed.

(25) Transcutaneous Passive Implant-Temporal Bone (CPT Codes 69714, 69717, 69716, 69719, 69726, and 69727)

In October 2020, the CPT Editorial Panel deleted two codes used for mastoidectomy and replaced them with four new codes for magnetic transcutaneous attachment to external speech processor. The CPT Editorial Panel made additional revisions to differentiate implantation, removal, and replacement of the implants.

We proposed the RUC-recommended work RVU for all six of the codes in this family. We proposed a work RVU of 8.69 for CPT code 69714 (*Implantation, osseointegrated implant, skull; with percutaneous attachment to external speech processor*), a work RVU of 9.77 for CPT code 69716 (*Implantation, osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor*), a work RVU of 8.80 for CPT code 69717 (*Revision/replacement (including removal of existing device), osseointegrated implant, skull; with percutaneous attachment to external speech processor*), a work RVU of 9.77 for CPT code 69719 (*Revision/replacement (including removal of existing device), osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor*), a work RVU of 5.93 for CPT code 69726 (*Removal, osseointegrated implant, skull; with percutaneous attachment to external speech processor*), and a work RVU of 7.13 for CPT code 69727 (*Removal, osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor*).

For the direct PE inputs, we proposed to refine the clinical labor time for the ''Post-operative visits (total time)'' (CA039) activity from the RUC-recommended 108 minutes to 99 minutes for CPT codes 69714 and 69717. 99 minutes is the clinical labor time associated with one Level 2 postoperative office visit and two Level

3 postoperative office visits; we believe that the RUC inadvertently failed to update the clinical labor time associated with these postoperative office visits when CPT codes 69714 and 69717 were reviewed. We also proposed to refine the equipment time for all equipment items other than the basic instrument pack (EQ137) from 108 minutes to 99 minutes to match this change in clinical labor time.

Comment: Several commenters stated that they supported the proposed work RVUs for all six codes in the family. Commenters noted that the work RVUs recommended by the RUC were interim and updated work RVUs will be submitted following an upcoming RUC meeting.

Response: We appreciate the support for our proposed work RVUs; we will consider any future RUC recommendations when they are submitted.

Comment: Several commenters stated that they agreed with the direct PE refinements.

Response: We appreciate the support for our proposed direct PE refinements.

After consideration of the comments, we are finalizing the work RVUs and direct PE inputs as proposed for all six of the codes in the family.

(26) X-Rays at Surgery Add-On (CPT Code 74301)

The RUC recommended that CPT code 74301 (*Cholangiography and/or pancreatography; additional set intraoperative, radiological supervision and interpretation (List separately in addition to code for primary procedure)*) be deleted for October 2020. The specialty societies that typically bill for this service submitted a code change application to delete CPT code 74301 at the February 2020 CPT meeting. However, the specialty societies withdrew the deletion request after receiving feedback from the dominant provider of CPT code 74301 (general surgery), indicating the code is still necessary and should not be deleted. The RUC recommended to maintain the work RVU of 0.21 for CPT code 74301. The specialty societies did not resurvey CPT code 74301 due to its low utilization (2019 Medicare utilization = 63) and the difficulty of obtaining 30 survey responses from service providers with experience in the past 12 months. Since there was no survey done, there is no new information and the RUC recommended to maintain the current value. The work RVU suggested by the RUC is a reaffirmation of the current value.

We proposed the RUC-recommended work RVU of 0.21 for CPT code 74301. This is an add-on code with no direct PE inputs.

Comment: The commenters appreciated that CMS proposed the RUC-recommended work RVU for CPT code 74301.

Response: We thank the commenters for their support.

We are finalizing the proposed work RVU of 0.21 for CPT code 74301. We did not propose and we are not finalizing any direct PE inputs.

(27) Trabecular Bone Score (TBS) (CPT Codes 77089, 77090, 77091, and 77092)

We proposed the RUC-recommended work RVUs of 0.20 for CPT codes 77089 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk) and 77092 (Trabecular bone score (TBS), structural condition of the bone microarchitecture; using dual X-ray absorptiometry (DXA) or other imaging data on gray-scale variogram, calculation, with interpretation and report on fracture risk interpretation and report on fracture risk only, by other qualified health care professional*). CPT codes 77090 (*Trabecular bone score (TBS), structural condition of the bone microarchitecture; technical preparation and transmission of data for analysis to be performed elsewhere) and 77091 (Trabecular bone score (TBS), structural condition of the bone microarchitecture; technical calculation only*) are PE only codes; the RUC did not recommend and we did not propose a work RVU for these codes.

The RUC PE recommendations for CPT codes 77089 and 77091 include a new ''TBS iNsight Software'' supply input. The submitted invoice for this supply indicates that it is a licensing fee associated with the use of the software, which is not typically considered to be a form of direct PE under our methodology. Historically, we have considered most computer software and associated licensing fees to be indirect costs tied to associated costs for hardware considered to be medical equipment. However, as we noted in II.B of this final rule, stakeholders have routinely expressed concerns with this policy, especially for evolving technologies that rely primarily on software and licensing fees with minimal costs in equipment or hardware. Most of the recommended resource costs for CPT codes 77089 and 77091 are for this analysis fee and these costs are not well accommodated by the PE methodology since these sorts of technological applications did not exist when the data that underlie the PE allocation was last collected in 2007 through 2008.

Therefore, we proposed to value the PE for CPT codes 77089 and 77091 through the use of a crosswalk to a comparable service, CPT code 71101 (*Radiologic examination, ribs, unilateral; including posteroanterior chest, minimum of 3 views*), which, for CY 2021, had a PE RVU of 0.94. We proposed that the PE RVU for CPT code 77091 equals the PE RVU from code 77089 minus the PE RVU from codes 77090 and 77092 so that the three codes sum to the valuation of code 77089. (CPT code 77089 is the global code in this family and CPT codes 77090, 77091, and 77092 must sum together to equal the value of 77089.) CPT code 71101 is another type of bone imaging procedure that we believe reflects codes 77089 and 77091 similar direct PE resource costs as CPT codes 77089 and 77091. We recognize that the services being performed in this crosswalk code are not the same as the services in CPT codes 77089 and 77091, however; we believe that the direct resource costs will typically be analogous across these codes. We believe that this is the most accurate way to incorporate the costs of the software employed in CPT codes 77089 and 77091 which will not typically be considered direct PE under our current methodology. We solicited comments, both on the specific proposal for the Trabecular Bone Score codes, as well as our broader discussion of this topic in section B of this final rule.

Comment: Some commenters supported our proposed methodology of calculating PE RVU values for CPT codes 77089 and 77091 through the use of a crosswalk to CPT code 71101, stating that this is a reasonable interim solution until CMS' PE methodology is updated to better account for these technologies. Other commenters did not support our proposed approach, urging CMS to accept the RUC-recommended direct PE inputs for CPT codes 77089 and 77091, which include the TBS iNsight Software supply input. These commenters stated that the TBS iNsight Software is currently sold ''per click'' or per scan. The invoice submitted by the RUC depicts a TBS iNsight 1-year License and covers a total of 100 scans. The total unit price for the license is $2,500; therefore, the cost is estimated to be $25 per patient (or scan). As this is a single-use item used per patient encounter, the RUC included it as a direct expense supply item, not an equipment item, which is typically accounted for by minutes used. One commenter disagreed with our assertion that software costs would not typically

be considered direct PE, as there are many codes including ''software'' direct inputs, and noted that CMS would therefore not be setting a precedent by potentially including software as a direct input in the work RVUs for CPT codes 77089 and 77091.

Response: We are finalizing as proposed the RUC-recommended work RVUs of 0.20 for CPT code 77089 and 77092, as well as direct PE inputs for CPT codes 77089 and 77091 based on a crosswalk approach to CPT code 71101. As we stated in the CY 2019 PFS final rule (83 FR 59557), we have considered most computer software and associated analysis and licensing fees to be indirect costs tied to costs for associated hardware that is considered to be medical equipment, and we continue to consider that to be the case for these CPT codes 77089 and 77091. We refer readers to section II.B of this final rule (the PE section) for a comprehensive discussion of our policy for accounting for computer software and associated licensing fees in the PE methodology.

(28) Pathology Clinical Consult (CPT Codes 80503, 80504, 80505, and 80506)

The Relativity Assessment Workgroup identified CPT code 80500 (*Clinical pathology consultation; limited, without review of patient's history and medical records*) via the CMS/Other source codes with the Medicare utilization over 20,000 screen. In October 2019, the RUC referred this issue to the CPT Editorial Panel to define this service more specifically as the current descriptor is vague. In October 2020, the CPT Editorial Panel replaced CPT codes 80500 and 80502 (*Clinical pathology consultation; comprehensive, for a complex diagnostic problem, with review of patient's history and medical records*) with four new codes, CPT codes 80503 (*Pathology clinical consultation; for a clinical problem with limited review of patient's history and medical records and straightforward medical decision making. When using time for code selection, 5–20 minutes of total time is spent on the date of the consultation. (For consultations involving the examination and evaluation of the patient, see 99241, 99242, 99243, 99244, 99245, 99251, 99252, 99253, 99254, 99255)), 80504 (for a moderately complex clinical problem, with review of patient's history and medical records and moderate level of medical decision making. When using time for code selection, 21–40 minutes of total time is spent on the date of the consultation), 80505 (for a highly complex clinical problem, with comprehensive review of patient's history and medical records and high level of medical decision making. When using time for code selection, 41–60 minutes of total time is spent on the date of the consultation), and 80506 (prolonged service, each additional 30 minutes (List separately in addition to code for primary procedure)(Use 80506 in conjunction with 80505)(Do not report 80503, 80504, 80505, 80506 in conjunction with 88321, 88323, 88325) (Prolonged pathology clinical consultation service of less than 15 additional minutes is not reported separately) (For consultations involving the examination and evaluation of the patient, see 99241–99255)*) to report pathology clinical consultation and creation of guidelines to select and document the appropriate level of service.

The RUC recommended a work RVU of 0.50 for CPT code 80503 based on the 25th percentile of the survey. The RUC-recommended 15 minutes of intraservice and total times for CPT code 80503 are 2 minutes above the current instraservice and total times for CPT code 80500. This represents a 15 percent increase in the respective times. However, the RUC-recommended work RVU of 0.50 is 35 percent higher than the current work RVU of 0.37 for CPT code 80500. We believe that the increase or decrease in times should be commensurate with the increase or decrease in the work RVU. Therefore, we proposed a work RVU of 0.43. This represents the ratio of total time between the current total time of CPT code 80500 and the proposed total time of CPT code 80503 (0.15) applied to the current value of CPT code 80500 (0.37 $\times$ 0.15 = 0.43).

We proposed the RUC-recommended work RVU of 0.91 without refinements for CPT code 80504.

The RUC recommended a work RVU of 1.80 for CPT code 80505 based on the 25th percentile of the survey. The current intraservice and total times for CPT code 80502 are 42 minutes. The RUC-recommended times for CPT code 80505 are 54 minutes. Similar to the scenario described above for CPT code 80503, the intraservice and total times for CPT code 80505 increased 28.6 percent while the work RVU increased 35 percent. As stated above, we believe the increase or decrease in time should be commensurate with the increase or decrease in the work RVU. Therefore, for CPT code 80505 we proposed a work RVU of 1.71, which is the current total time ratio of CPT code 80502 compared to the RUC-recommended total time for CPT code 80505.

We proposed the RUC-recommended work RVU of 0.80 for CPT code 80506 without refinement.

For the direct PE inputs of CPT codes 80503, 80504, and 80505, we proposed to refine the time associated with the clinical labor activity PA001 (Accession and enter information) from the RUC-recommended time of 4 minutes to 0 minutes as we believe the time is duplicative with clinical labor activity PA008 (File specimen, supplies, and other materials).

The RUC recommended 15, 30, 54, and 30 minutes of equipment time for EP024 (microscope, compound) for CPT codes 80503, 80504, 80505, and 80506, respectively. We note that there is no indication from the code descriptors that the pathologist is reviewing physical slides. The code descriptor and description of work indicate that the pathologist is reviewing paper records and/or electronic health record (EHR), and therefore, we proposed to remove the equipment time associated with EP024 (microscope, compound) from CPT codes 80503, 80504, 80505, and 80506.

Additionally, the proposed Levels of Decision Making for Table for Pathology Clinical Consult codes includes ''Assessment requiring an independent historian(s)'' as an element of ''Amount and/or Complexity of Data to be Reviewed and Analyzed *—Each unique test, order, or document contributes to the combination of 2 or combination of 3 in Category 1 below.'' Neither the code descriptors nor the descriptions of work indicate that this type of assessment is typical in a pathology clinical consult as was discussed for the office visit Levels of Decision Making table. For these reasons, CMS proposes that this element not be included as an element that we will recognize as an element of medical decision making. We note that CMS will monitor the use of these replacement codes per our usual practice to ensure appropriate billing and inform future rulemaking as needed. We also solicited comments on how these replacement codes will most typically be billed relative to use of existing pathology coding. Such information will also inform future rulemaking as needed.

Comment: A commenter urged CMS to accept the RUC-recommended work RVU of 0.50 for 80503 and 1.80 for 80505. The commenter stated CMS' use of a total time ratios to value 80503 and 80505 was flawed as the predecessor code 80500 was deleted and split out into three base codes and one add-on code with different reporting requirements. The commenter stated CMS should not compare the time of 80503 to the deleted code 80500 because the code descriptor for 80503, in contrast to 80500, includes the

review of patient's history and medical records. The commenter also noted that the descriptor for 80502 described a clinical pathology consultation for a ''complex diagnostic problem'', whereas new code 80505 describes a ''highly complex clinical problem''.

Response: In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalk to key reference or similar codes, and magnitude estimation. As we have previously stated, section 1848(c)(1)(A) of the Act requires CMS to consider time and intensity when developing work RVUs. Therefore, we believe it is appropriate to compare CPT code 80503 to CPT code 80500 and CPT code 80505 to code 80502, which CPT code 80505 replaced, as the PFS is a relative value system. We continue to believe that the increases or decreases in work times should be commensurate with the increase or decrease in the work RVU, which is why we proposed a work RVU of 0.43 for CPT code 80503 and a work RVU of 1.71 for CPT code 80505 based on the time methodology detailed above.

Comment: Several commenters disagreed with the proposal to remove the equipment time associated with EP024 (microscope, compound) from CPT codes 80503, 80504, 80505, and 80506. Commenters noted that the RUC's Summary of Recommendation (SOR) states that a patient's medical record is reviewed focusing on recent and relevant remote clinical and diagnostic findings and all applicable diagnostic material, slides, primary analytical data are retrieved/unarchived for the pathologist's examination and review. Commenters stated it is typical for a consulting pathologist performing CPT codes 80503–80506 to review all relevant information about the patient that is available, and a physical component of the patient material within the case review is the patient's specimen slides. Commenters stated that these slides are typically reviewed on a high grade professional microscope at the pathologist's workstation and during the service, the microscope itself is not available for other personnel to use on other patients, as the pathologist may review the slides multiple times during the service. Commenters stated that the RUC understood that pathologists require a microscope to perform this and numerous other pathology related professional services which is why the RUC included equipment time for the EP024 compound microscope in its recommendations. Therefore, commenters urged CMS to accept and implement the RUC-recommended times of 15, 30, 54, and 30 minutes of equipment time for EP024 (microscope, compound) for CPT codes 80503, 80504, 80505, and 80506.

Response: We appreciate the additional information provided by commenters. We found the affirmation from commenters that pathologists typically review the patient's specimen slides compelling, and we agree that the use of the EP024 microscope would be typical for these codes based on this additional information. Therefore, we are finalizing a policy to restore the RUC-recommended times of 15, 30, 54, and 30 minutes of equipment time for EP024 (microscope, compound) for CPT codes 80503, 80504, 80505, and 80506.

Comment: Commenters urged CMS to accept and implement the RUC-recommended time of 4 minutes for clinical labor activity PA001 for CPT codes 80503, 80504, and 80505. Commenters stated for these services, accessioning and entering information on the patient case is a preservice clinical labor task that is not duplicative with the post service work of filing specimen slides, filing reports and all relevant patient information retrieved for the pathologist to review. The preservice clinical labor work here involves the careful documentation of the connection between the requesting physician and the pathologist onto a worksheet or accession form. The form is used to transcribe the request for consult, the primary complaint, patient encounter, and other related information so that it becomes part of the patient's EHR. This is one of the first steps of the complete service.

Response: We thank commenters for the additional information. However, we believe the majority of the accessioning tasks performed in the PA001 activity constitute forms of indirect PE. Although we agree that the unique nature of pathology and laboratory services can make comparisons across codes more difficult than for other services, we believe the comparison of similar clinical labor activities across different services is important to maintaining the relativity of the direct PE inputs. As we stated in the CY 2017 PFS final rule (81 FR 80324), we agree with the commenters that patient documentation and entering patient data into information systems is an important task, and we agree that these would take more than zero minutes to perform. However, we continue to believe that these activities are correctly categorized as indirect PE as administrative functions, and therefore, we do not recognize the entry of patient data as direct PE inputs, and we do not consider this task as typically performed by clinical labor on a per-service basis. While we do not agree that the data entry tasks described in this activity would constitute direct PE, we note that the recommended materials for these codes state that multiple existing forms of data will need to be identified and incorporated into this accession. We believe that these interpretive tasks do constitute a form of direct PE as they are individually allocable to a particular patient for a particular service. Therefore, we are finalizing 1 minute of clinical labor activity associated with PA001 for CPT codes 80503, 80504, and 80505 to capture the labor performed in these interpretive tasks. We note that we have also previously finalized 1 minute for the PA001 clinical labor activity in other pathology services such as CPT codes 88360 and 88361.

For CY 2022, we are finalizing the work RVUs of 0.43, 0.91, 1.71, and 0.80 for 80503, 80504, 80505, and 80506 as proposed. For the direct PE, we are finalizing a policy to restore the RUC-recommended times of 15, 30, 54, and 30 minutes of equipment time for EP024 (microscope, compound) for CPT codes 80503, 80504, 80505, and 80506 and 1 minute of clinical labor activity associated with PA001 for CPT codes 80503, 80504, and 80505 to capture the labor performed in these interpretive tasks.

We reiterate that CMS will monitor the use of these replacement codes per our usual practice to ensure appropriate billing and inform future rulemaking as needed. We continue to look for stakeholder input on how these replacement codes will most typically be billed relative to use of existing pathology coding. Such information will also inform future rulemaking as needed.

(29) Revaluing End-Stage Renal Disease (ESRD) Monthly Capitation Payment Services (MCP) (CPT Code 90954)

In the CY 2021 PFS final rule (85 FR 84551 through 84554), we revalued most, but not all, of the ESRD MCP services. We finalized an increase in valuations for those ESRD MCP codes with values tied to the values of Outpatient/Office Evaluation and Management (O/O E/M) codes. We did not revalue CPT code 90954 (*End-stage renal disease (ESRD) related services monthly, for patients 2–11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face visits by a physician or other qualified health care*

professional per month) because it was originally valued by a crosswalk.

Stakeholders stated that CPT code 90954 was different from the other ESRD MCP codes. Rather than using an O/O E/M code building block methodology as had been used originally to value the other ESRD MCP codes, CPT code 90954 was valued based upon a crosswalk to CPT code 99293 (*Inpatient pediatric critical care provided for children age 29 days through 24 months old, per day*). When CPT code 99293 was deleted, the value of CPT code 90954 was crosswalked to a replacement code, CPT code 99471 (*Initial inpatient pediatric critical care, per day, for the evaluation and management of a critically ill infant or young child, 29 days through 24 months of age*). By crosswalking CPT code 90954 to CPT code 99471, the rank order across the ESRD MCP code family at that time was preserved.

Since we finalized the revalued ESRD MCP values for CY 2021, stakeholders have requested that we revalue CPT code 90954 because by not updating it, we created a rank order anomaly for work RVUs and time within the ESRD MCP code family. A stakeholder suggested that we address the rank order anomaly by revaluing CPT code 90954 based upon a new crosswalk to CPT code 33977 (*Removal of a ventricular assist device; extracorporeal, single ventricle*). The stakeholder stated that CPT code 33977 more appropriately represented the time and effort of the service provided over one month than the existing crosswalk to CPT code 99471 relative to the revalued services within the MCP code family.

In response to stakeholder requests to update the value of CPT code 90954, we proposed to increase the value of CPT code 90954, a global code with a current work RVU of 15.98, by crosswalking it to CPT code 33977, a 090 day procedural code with a work RVU of 20.86 to preserve relativity within the ESRD MCP family. We also solicited comments on our proposal to increase the value of CPT code 90954.

Comment: A few commenters supported our proposal to increase the value of the ESRD MCP CPT code 90954.

Response: We appreciate the support of the commenters.

Comment: One commenter stated that it was unfair and inconsistent to increase the value of CPT code 90954 in order to eliminate a rank order anomaly that resulted from our having revalued the other ESRD MCP codes in the CY 2021 PFS final rule. The commenter noted that as a global code, CPT code 90954 was initially valued based upon magnitude estimation with additional negotiations at the RUC. The commenter concluded that all the global codes should thus be revalued using the same methodology.

Response: We understand that some commenters disagree with our revaluation of CPT code 90954. We maintain that revaluing CPT code 90954 was important to maintaining rank order within the ESRD MCP family. The code identifies ESRD services for our youngest beneficiaries, infants and toddlers diagnosed with ESRD. We note that CPT code 90954 is not a global code. Nevertheless, we concur with the commenter that the group of global codes demands further review and possibly revaluation in the future as we come to better understand the nature of the services furnished during global periods.

In response to the majority of commenters and because of our desire to eliminate a rank order anomaly, we are finalizing our proposal to increase the value of CPT code 90954 to a work RVU of 20.86 in order to preserve relativity within the ESRD MCP family. In future rules, we will likely revisit the valuing of global codes.

(30) Colon Capsule Endoscopy (CPT Codes 91110, 91111, and 91113)

In October 2020, the CPT Editorial Panel replaced Category III code 0355T (*Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), colon, with interpretation and report) with a new Category I code 91113 (Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), colon, with interpretation and report*) to report gastrointestinal tract imaging. CPT codes 91110 (*Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus through ileum, with interpretation and report*) and 91111 (*Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus with interpretation and report*) were added as part of the family and surveyed for the January 2021 RUC meeting.

We proposed the RUC-recommended work RVU for two of the codes in this family. We proposed a work RVU of 2.24 for CPT code 91110 and a work RVU of 2.41 for CPT code 91113 as recommended by the RUC in both cases. For CPT code 91111, we disagree with the RUC-recommended work RVU of 1.00 and we proposed a work RVU of 0.90 based on a crosswalk to CPT code 95923 (*Testing of autonomic nervous system function; sudomotor, including 1 or more of the following: quantitative sudomotor axon reflex test (QSART), silastic sweat imprint, thermoregulatory sweat test, and changes in sympathetic skin potential*). CPT code 95923 is an autonomic nervous system testing procedure that shares the identical intraservice work time of 15 minutes with CPT code 91111 and has 5 additional minutes of immediate postservice work time. When we reviewed CPT code 91111, we noted that the surveyed intraservice work time had decreased by 3 minutes, from 18 minutes to 15 minutes, while the RUC recommended maintaining the current work RVU of 1.00. Although we do not imply that the decrease in time as reflected in survey values must equate to a one-to-one or linear decrease in the valuation of work RVUs, we believe that since the two components of work are time and intensity, decreases in time should typically be reflected in decreases to work RVUs. In the case of CPT code 91111, we believe that it will be more accurate to propose a work RVU of 0.90 based on a crosswalk to CPT code 95923 to account for these decreases in the surveyed work time.

For the direct PE inputs, we proposed to refine the clinical labor time for the ''Prepare, set-up and start IV, initial positioning and monitoring of patient'' (CA016) activity from the RUC-recommended 9 minutes to 6 minutes for CPT code 91111. The recommended materials for this code family state that the 6 minutes for the CA016 activity are used to connect the equipment, fit belt to patient, put data recorder on patient, and sync capsule to each sensor on belt. This description of this clinical labor activity is identical for CPT codes 91110 and 91113 and each code has the same recommended time of 6 minutes. However, the recommended materials for CPT code 91111 state that 6 minutes are used to connect the equipment, fit belt, put data recorder on patient, sync capsule to each sensor and then an additional 3 minutes are used to position the patient (assist patient onto table lying down on right side and then into a sitting position after the capsule is swallowed). We do not agree that it will be typical for CPT code 91111 to require an additional 3 minutes for positioning as compared with the other codes in the family, particularly in light of the clinical similarities between these services. We are refining the clinical labor time to 6 minutes for CPT code 91111 to maintain relativity within the family.

We also proposed to refine the equipment time for the capsule endoscopy recorder kit (EQ146) from 64 minutes to 61 minutes and the exam table (EF023) from 44 minutes to 41 minutes to match this change in clinical labor time for CPT code 91111.

Comment: A commenter disagreed that the work time had decreased for CPT code 91111. The commenter stated that although there was a minor reduction in intra-service time, the total time reported by the survey takers was 7 minutes greater than the current total time even though this time was ultimately not added to pre- and post-service time. Therefore, the commenter stated that in practice CPT code 91111 does not take less total time than in the past.

Response: We disagree with the commenter that the work time for CPT code 91111 has not decreased. The survey showed a decrease of 3 minutes in the intra-service work time from 18 minutes to 15 minutes and the RUC recommended maintaining the same pre-service and post-service work time of 5 minutes. The RUC routinely makes adjustments to pre-service and post-service surveyed work times in its recommendations as it did here for CPT code 91111. We agree with the RUC that the typical pre-service and post-service work time has not increased for CPT code 91111 which results in an overall decrease for the code.

Comment: Several commenters disagreed with the CMS proposed work RVU of 0.90 for CPT code 91111 and stated that CMS should instead finalize the RUC-recommended work RVU of 1.00. Commenters disagreed with the CMS crosswalk to CPT code 95923 and stated that although there was a decrease in surveyed work time for CPT code 91111, the intensity level required to perform the service has stayed the same. Commenters stated that the decrease of 3 minutes of work time for CPT code 91111 may be due to efficiencies in the healthcare setting, not with the overall complexity of delivering the service. Commenters stated that the intra-service time, intensity level, and RUC-recommended RVU of 1.00 properly fell within a relative range compared to similar codes. Commenters compared the work of CPT code 91111 to CPT codes 70470 (*Computed tomography, head or brain; without contrast material, followed by contrast material(s) and further sections*) and 76391 (*Magnetic resonance (e.g., vibration) elastography) and 95819 (Electroencephalogram (EEG); including recording awake and asleep*) to support their belief that the intensity relativity is appropriate and that the recommended current work value of 1.00 placed the survey code well within the relativity of the family.

Response: We disagree with the commenters and continue to believe that the proposed work RVU of 0.90 is a more accurate choice for CPT code 91111. As we stated in the proposed rule, since the two components of work are time and intensity, decreases in time should typically be reflected in decreases to work RVUs. The survey for CPT code 91111 found that the typical intraservice time required to perform the procedure had decreased by 3 minutes and we believe that this decrease in work time should be reflected in the work RVU. Even if the decrease in work time was due to greater efficiencies in delivering the service, this decrease in work time should be reflected in the work RVU for the service in question.

We do not agree with commenters that there has been a corresponding increase in intensity for CPT code 91111 which would justify maintaining the work RVU at 1.00 despite this surveyed decrease in work time. The CPT Editorial Panel did not revise the code descriptor for CPT code 91111 and both the survey vignette and the clinical description of work remain unchanged for CY 2022. Our proposed work RVU of 0.90 maintains the current intensity of the procedure, and we also note that the intensity of this procedure would be noticeably higher than the rest of the code family at the recommended work RVU of 1.00 which we do not believe would serve the interests of relativity. We also note that our proposed work RVU of 0.90 does reflect a small increase in the intensity of this service as compared to its previous intensity.

We also disagree that the work RVU of CPT codes 70470, 76391, or 95819 would be more appropriate comparisons for CPT code 91111. All of these procedures have similar work times but employ more complex forms of imaging such as CT imaging or magnetic resonance imaging. For example, CPT code 76391 makes use of an MR room (EL008) equipment item with a cost over $1.5 million in comparison to the capsule endoscopy video system (ES029) used in CPT code 91111 which costs approximately $10,000. While we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another, we believe that CPT code 95923 is a more accurate crosswalk for CPT code 91111.

Comment: Several commenters disagreed with the CMS proposal to refine the clinical labor time for the ''Prepare, set-up and start IV, initial positioning and monitoring of patient'' (CA016) activity from the RUC-recommended 9 minutes to 6 minutes for CPT code 91111. Commenters stated that there had been a detailed accounting of time for clinical labor activities included with the recommended materials for the code family. Commenters stated that for capsule endoscopy of the esophagus (CPT code 91111), clinical staff position the patient on the bed with a pillow (6 cm or 2.5 inches high) under the head to facilitate drinking and ingestion. The patient is typically assisted from supine to the left side to delay capsule transit across the gastroesophageal junction and then into a sitting position after the capsule is swallowed. Commenters stated that capsule endoscopy of the gastrointestinal tract (CPT code 91110) and colon (CPT code 91113) do not require these additional steps for positioning, as noted in the recommended materials.

Response: We appreciate the additional information provided by the commenters clarifying the clinical labor tasks taking place during the CA016 activity for CPT code 91111. The commenters explained that for CPT code 91111 the patient is typically assisted from supine to the left side to delay capsule transit across the gastroesophageal junction and then into a sitting position after the capsule is swallowed, which justifies the additional 3 minutes of clinical labor time recommended by the RUC. We are therefore not finalizing our proposed refinement to the clinical labor time and will instead finalize the RUC-recommended time of 9 minutes for this activity. We are correspondingly also not finalizing our proposed refinements the equipment time for the capsule endoscopy recorder kit (EQ146) and the exam table (EF023) for CPT code 91111; we are finalizing the RUC-recommended equipment time of 64 minutes and 44 minutes respectively.

After consideration of the comments, we are finalizing our proposed work RVUs for all three codes in the family. We are not finalizing our proposed direct PE refinements and are instead finalizing the RUC-recommended direct PE inputs for all three codes.

(31) External Cardiovascular Device Monitoring (CPT Codes 93228 and 93229)

For CPT code 93228 (*External mobile cardiovascular telemetry with electrocardiographic recording, concurrent computerized real time data analysis and greater than 24 hours of accessible ECG data storage (retrievable with query) with ECG triggered and patient selected events transmitted to a remote attended surveillance center for up to 30 days; review and interpretation with report by a physician or other qualified health care professional*), we disagreed with the RUC-recommended work RVU of 0.52, and we proposed a

work RVU of 0.43. The proposed work RVU is based on an intraservice time ratio between the current and RUC-recommended intraservice times for CPT code 93228 ((10 minutes/12 minutes)*0.52), yielding a work RVU of 0.43. This proposed work RVU reflects the decrease in total time and is a direct work RVU crosswalk to CPT code 93290 (*Interrogation device evaluation (in person) with analysis, review and report by a physician or other qualified health care professional, includes connection, recording and disconnection per patient encounter; implantable cardiovascular physiologic monitor system, including analysis of 1 or more recorded physiologic cardiovascular data elements from all internal and external sensors*). CPT code 93290 has the same pre-, intra-, and postservice times as the survey times for CPT code 93228 and was reviewed in October 2016. While we recognize that the number of ECG tracings and daily reports have increased because of the increase in average wear time from 14 days to 20 days, the specialty societies and the RUC contend that this is offset by technology advancements, integrations with EHRs, and online portals that make it easier to manage and review the data in a chronological and efficient manner. Therefore, we proposed a work RVU that accounts for decrease in total time to provide this service, given that the increased tracings and daily reports are offset by the efficiencies gained by technological advancements.

The RUC recommended 10 minutes for ''Provide education/obtain consent'' (CA011) for CPT code 93228, based on a direct crosswalk and duplication of CPT code 93229 (*External mobile cardiovascular telemetry with electrocardiographic recording, concurrent computerized real time data analysis and greater than 24 hours of accessible ECG data storage (retrievable with query) with ECG triggered and patient selected events transmitted to a remote attended surveillance center for up to 30 days; review and interpretation with report by a physician or other qualified health care professional*). We disagree with the RUC-recommended duplication of clinical labor to provide education that the patient will hear for a second time from the IDTF technician. While we understand that the duplication is by design, we do not agree with a direct crosswalk from CPT code 93229, because the provider of CPT code 93229 will likely have more in-depth education, specific to the patient, including materials and instructions for the patient to review. Therefore, we proposed the standard 2 minutes for CA011 in the non-facility for CPT code 93228.

The RUC recommended the addition of 24 minutes for quality assurance ''overread'' done by a second, senior technician, Clinical Activity Code CA021, Line 67 on the RUC-recommended PE Spreadsheet, for CPT code 93229. This is a new clinical activity for CPT code 93228, and we solicited public comments about the typicality of a second senior technician. We requested additional information about the IDTF's current quality assurance measures and parameters within the ECG recording program that should act as some degree of quality assurance. We also solicited additional information from IDTFs about the current error rate for improperly transmitted tracings to the physician that would indicate that it is typical for a second, senior technician to perform ''overread.'' We proposed 0 minutes for Clinical Activity Code CA021, Line 67 on the RUC-recommended PE Spreadsheet, unless commenters could provide compelling information that a second, senior technician typically performs quality assurance measures. Otherwise, we agree with the RUC-recommended direct PE inputs and proposed the refinements as recommended.

In addition to the proposed work RVU and direct PE input refinements, we requested additional information about the acquisition costs for equipment item EQ340 Patient Worn Telemetry System. Due to the proprietary nature of this equipment, invoices were unattainable to update this equipment item. Substantial technological improvements have been made to these devices since the last update in 2008, but they are proprietary devices, owned and manufactured for each IDTF. We solicited public comments on the manufacturing costs and other information to help update the equipment item for CY 2022. Second, we requested additional information about the useful lifetime of EQ340. We currently assign 3 years of useful life to EQ340, but the RUC notes that this is the only equipment item and CPT code 93228 is the only CPT code with an equipment item that has more than 500 minutes of equipment time and a useful life of 3 years or less. We solicited public comments to help update the useful life of EQ340, as it has not been updated since 2008, and the device has experienced significant technological changes.

Comment: Commenters disagreed with our use of the intraservice time ratio to value CPT code 93228, claiming it disproportionately decreased the work RVU by 17 percent, whereas the total time only decreased by 8 percent. Commenters also disagreed with the choice of reference CPT code 93920, stating that CPT code 93920 is often performed parallel to a separately reported pacemaker interrogation and wearable defibrillator interrogation service, thus making it less intense than CPT code 93229, which is usually performed without any separately reported services. Commenters stated that treating all components of physician time (preservice, intraservice, postservice and post-operative visits) as having identical intensity is incorrect, and inconsistently applying it to only certain services under review creates inherent payment disparities in a payment system, which is based on relative valuation. Commenters stated that in many scenarios, CMS selects an arbitrary combination of inputs to apply rather than seeking a valid clinically relevant relationship that would preserve relativity. Commenters suggested that CMS determine the work valuation for each code based not only on surveyed work times, but also the intensity and complexity of the service and relativity to other similar services, rather than basing the work value entirely on time.

Response: We disagree and continue to believe that the use of time ratios is one of several appropriate methods for identifying potential work RVUs for particular PFS services, particularly when the alternative values recommended by the RUC and other commenters do not account for information provided by surveys that suggests the intensity has not changed or the amount of time involved in furnishing the service has changed. We reiterate that, consistent with the statute, we are required to value the work RVU based on the relative resources involved in furnishing the service, which include time and intensity. When our review of recommended values reveals that changes in time have been unaccounted for in a recommended RVU, then we believe we have the obligation to account for that change in establishing work RVUs since the statute explicitly identifies time as one of the two elements of the work RVUs. Given the well-established assertion in the RUC recommendations that the increased tracings and daily reports from the increased average wear time (from 14 to 20 days) is offset by the fact that the technology has advanced to make it easier to manage and review the data, resulting in a net zero change in intensity, we are obligated to account

for the change in time. We also clarify for the commenters that our review process is not arbitrary in nature. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). With regard to the invocation of clinically relevant relationships by the commenters, we emphasize that we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, or utilization level to serve as an appropriate crosswalk.

Comment: Some commenters stated that the proposed work RVU for CPT code 93228 would result in an intensity that is dramatically lower than the intensity assigned to a level 1 established patient office visit, CPT code 99211 (Office or other outpatient visit for the evaluation and management of an established patient, that may not require the presence of a physician or other qualified health care professional. Usually, the presenting problem(s) are minimal.), which does not require the presence of a physician or other qualified healthcare professional.

Response: The RUC-recommended work RVU of 0.52 also assigns CPT code 93228 a lower intensity than code CPT code 99211; therefore, we do not agree that the proposed work RVU for CPT code 93228 would create a rank order anomaly. We agree with the RUC that CPT code 93228 is more accurately valued at a lower intensity than CPT code 99211. We also agree with the RUC that CPT code 93228 should have a lower intensity than key reference CPT codes 93298 (Interrogation device evaluation(s), (remote) up to 30 days; subcutaneous cardiac rhythm monitor system, including analysis of recorded heart rhythm data, analysis, review(s) and report(s) by a physician or other qualified health care professional) and 93015 (Cardiovascular stress test using maximal or submaximal treadmill or bicycle exercise, continuous electrocardiographic monitoring, and/or pharmacological stress; with supervision, interpretation and report) from the survey.

Comment: One commenter stated that while technology has advanced to negate some low intensity work, making review and management of data more efficient, the RUC-recommended RVU for CPT code 93228 accurately reflects the average wear time increasing from 14 to 20 days, the number of ECG tracings, and the increased daily reports.

Response: We agree with the initial statements in the RUC recommendations, such as that increased tracings and daily reports from the increased average wear time from 14 to 20 days are offset by the fact that the technology has advanced to make it easier to manage and review the data. The RUC and specialty societies stated that technology has advanced to make it easier to manage and review the data, which accounts for the reduced intra-service time. The interface for physician interaction with the reports has moved from primarily a fax and paper-based system, which resulted in large amounts of paper reports, to more streamlined digital reports with better organized and more easily accessible data. The number of episodes that the physician reviews and adjudicates have increased due to the increased wear time but the RUC agreed that the increased amount of data and the efficiency gained in reviewing that data directly offset each other. This supports the assertion that intensity of the service has not changed, given the offset discussed in the RUC recommendations. We believe the offset yields a net zero change in intensity, which is supported by the RUC and specialty societies' statements in the recommendations.

After consideration of public comments, we are finalizing a work RVU of 0.48 for CPT code 93228 based on a total time ratio between the current and RUC-recommended total times for CPT code 93228 ((23 minutes/25 minutes)*0.52). The finalized work RVU addresses commenters' concerns that the proposed work RVU was disproportionately decreased compared to the decrease in total time. The finalized work RVU also maintains the same intensity, which is supported by the statements in the RUC's recommendations that the increased amount of data and the efficiency gained in reviewing that data offset each other, yielding a net zero change in intensity. Based on this well-established assertion in the RUC recommendations, we believe it is appropriate to maintain the same intensity.

Comment: One commenter expressed concern with the proposed standard 2 minutes for ''Provide education/obtain consent'' (CA011) in the non-facility for CPT code 93228, and recommended a crosswalk of 5 minutes for this activity, similar to extended external ECG recording codes 93225, 93242, and 93246. The commenter stated that they believe the standard 2 minutes would be inadequate for clinical staff to explain next steps with the IDTF, to obtain the monitor, explain the goals and use of the device, and answer technology questions asked by this elderly population.

Response: The RUC recommended 10 minutes for ''Provide education/obtain consent'' (CA011) for CPT code 93228 based on a direct crosswalk and duplication of CPT code 93229. We continue to disagree with the RUC-recommended duplication of clinical labor because the patient will hear the same information from the IDTF technician and the provider of CPT code 93229 will likely have more in-depth education, specific to the patient, including materials and instructions for the patient to review. We are compelled by the additional information provided by the commenter and the provision of 5 minutes of clinal staff time to provide education and obtain consent (CA011) in some external extended ECG codes, particularly for CPT code 93224 (*External electrocardiographic recording up to 48 hours by continuous rhythm recording and storage; includes recording, scanning analysis with report, review and interpretation by a physician or other qualified health care professional*), as this is a code for review and interpretation by a physician or qualified healthcare professional similar to CPT code 93228.

After consideration of public comments, we are finalizing 5 minutes for CA011 in the non-facility for CPT code 93228 based on a crosswalk to the extended external ECG recording codes.

Comment: Commenters reiterated that the recommendation of the addition of 24 minutes for quality assurance ''overread'' done by a second, senior technician, Clinical Activity Code CA021, Line 67 on the RUC-recommended PE Spreadsheet, for CPT

code 93229 was based on two separate training/process documents that specifically discuss the role of a ''Senior Monitoring Technician'' and the typicality of this clinical labor activity. Commenters also corroborated the assertion in the Moran materials that a senior technician is contacted when the initial read of the transmitted data is unable to confirm the accuracy of the arrhythmias detected by the software algorithms. One commenter stated that an ''overread'' by a senior technician occurs for well over 50 percent of the services provided and that on average, the second ''read'' takes approximately 25 minutes of clinical staff time. The commenter gave the following two examples of when a second ''read'' is necessary: (1) There is enough motion artifact to interfere with the algorithm's ability to definitively identify arrhythmias; and (2) the occurrence of a complex arrhythmia that was not properly identified by the algorithm or the initial reviewer is high.

Response: We appreciate the additional information provided by the commenters. After consideration of the public comments, we agree with the commenters and are finalizing the RUC-recommended 24 minutes for CA021 for CPT code 93229.

Comment: In response to the request for additional information about the acquisition costs and useful life of equipment item EQ340 Patient Worn Telemetry System, commenters reiterated the uniqueness of mobile cardiac telemetry (MCT) and agreed that invoices were unattainable because the companies that furnish MCT manufacture their own devices and systems, so the equipment is not bought or sold in the marketplace. Commenters disagreed with the RUC's assertion that EQ340 has not been evaluated since 2008 and reiterated that the price was adjusted in the 2019 PFS final rule (83 FR 59478). Commenters opined that EQ340 has a relatively short life-span because it is worn continuously for several weeks, resulting in a high degree of wear, tear, damage, and loss. Commenters urged CMS to retain its current pricing and useful life for EQ340. One commenter urged consideration of the granularity of equipment input in comparison to other patient worn cardiac device monitoring systems. Other comments disagreed with the recommendation to consider granularity given the uniqueness of CPT code 93228.

Response: We believe that the additional information supplied by commenters reinforces that the current pricing and useful life of the EQ340 equipment item are accurate. We are maintaining the current price of $23,494 and useful life of 3 years for the EQ340 equipment item.

After consideration of the public comments, we are finalizing a work RVU of 0.48 for CPT code 93228, which is an increase from our proposed work RVU of 0.43. We are finalizing a clinical labor time of 5 minutes for the CA011 activity for CPT code 93228, an increase from our proposed clinical labor time of 2 minutes for this activity. We are finalizing the RUC-recommended direct PE inputs for CPT code 93229 without refinement.

(32) Electrophysiologic Evaluation (CPT Code 93621)

In October 2019, the RUC identified CPT code 93621 (*Comprehensive electrophysiologic evaluation including insertion and repositioning of multiple electrode catheters with induction or attempted induction of arrhythmia; with left atrial pacing and recording from coronary sinus or left atrium (List separately in addition to code for primary procedure*) as a high-growth service. It is an add-on code that can be used with several different procedures—base codes or other add-on codes, diagnostic, as well as therapeutic. CPT code 93621 is furnished in the facility only and thus has no direct PE inputs.

We disagree with the RUC-recommended work RVU of 1.75 based on a crosswalk to CPT code 36483 (*Endovenous ablation therapy of incompetent vein, extremity, by transcatheter delivery of a chemical adhesive (e.g., cyanoacrylate) remote from the access site, inclusive of all imaging guidance and monitoring, percutaneous; subsequent vein(s) treated in a single extremity, each through separate access sites (List separately in addition to code for primary procedure*). We proposed a work RVU of 1.50 based on a crosswalk to CPT code 16036 (*Escharotomy; each additional incision*). CPT code 16036 is also an add-on code for a surgical incision that shares both an identical intraservice work time and a total time of 20 minutes with CPT code 93621. While the RUC's recommended crosswalk code also has 20 minutes of intraservice and total time, CPT code 36483 is more intense than CPT code 93621, whereas CPT code 16036 has a similar level of intensity as CPT code 93621.

The RUC did not recommend and we did not propose any direct PE inputs for CPT code 93621.

Comment: Several commenters disagreed with the CMS proposed work RVU of 1.50 for CPT code 93621 and stated that CMS should instead finalize the RUC-recommended work RVU of 1.75. Commenters stated that the crosswalk to CPT code 36483 that the RUC recommended was based on discussions among the RUC reviewers and accounted for similarities between services that both rely upon catheters to execute complex maneuvers inside the cardiovascular system. Commenters stated that the proposed crosswalk was problematic because CPT code 16036 is completely different from cardiac procedures and can be billed multiple times. Commenters stated that the RUC-recommended crosswalk code (CPT code 36483) is a cardiovascular procedure and carries similar intensity of work to CPT code 93621.

Response: We disagree with the commenters that the RUC's recommended crosswalk to CPT code 36483 is a more accurate choice than our proposed crosswalk to CPT code 16036. We note that all three of the codes in question share the identical intraservice and total work time of 20 minutes, and therefore, differ only in their work RVUs and intensities. Commenters largely objected to the use of CPT code 16036 as a crosswalk code because it is an escharotomy procedure instead of a cardiovascular procedure. However, we continue to believe that the nature of the PFS relative value system is such that all services are appropriately subject to comparisons to one another. Although codes that describe clinically similar services are sometimes stronger comparator codes, we do not agree that codes must share the same site of service, patient population, utilization level, or (in this case) number of times billable per day to serve as an appropriate crosswalk.

We disagree that CPT code 36483 at a work RVU of 1.75 was the most accurate choice to use as a crosswalk for CPT code 93621; though this was the RUC's recommended work RVU, using it would have resulted in a substantial increase in intensity for CPT code 93621. We note that the CPT Editorial Panel did not revise the code descriptor for CPT code 93621 and the two surveys conducted on this code (at the 2020 April and October RUC meetings) both indicated that the work time had decreased from 30 minutes to 20 minutes. While we recognize that there have been several changes in technique since CPT code 93621 was last surveyed in 2001, we do not agree that these changes have resulted in a substantial increase in the intensity of the service, especially given that the work time typically required to perform the service has fallen by a third. We were also concerned that the intensity for add-on CPT code 93621 would potentially be

higher than the base codes that it is reported with. Although we agree that this can occur in some rare cases, we continue to believe that it is more accurate to value CPT code 93621 at a work RVU of 1.50. Our proposed valuation represents a modest increase in intensity rather than the large increase in intensity resulting from the recommended work RVU of 1.75, which we believe more accurately captures the typical case for this service.

After consideration of the comments, we are finalizing the proposed work RVU of 1.50 for CPT code 93621. The RUC did not recommend and we are not finalizing any direct PE inputs for CPT code 93621.

(33) Cardiac Ablation Services Bundling (CPT Codes 93653, 93654, 93655, 93656, and 93657)

The technologies and clinical practices associated with Cardiac Ablation Services have changed enough over the past decade (since 2011 when they were first developed) that the specialty societies recommended referring theses codes to CPT Editorial Panel to have the code descriptors for Cardiac Ablation Services updated to create new and more complete descriptors reflecting the fact that many of these services are commonly performed together and should be incorporated and bundled. In October 2020, the CPT Editorial Panel revised the three existing cardiac ablation codes to be bundled with 3D mapping and to include ''induction or attempted induction of an arrhythmia with right atrial pacing and recording, and catheter ablation of arrhythmogenic focus,'' and ''left atrial pacing and recording from coronary sinus or left atrium'' and ''intracardiac echocardiography including imaging supervision and interpretation'' into their descriptors.

A survey of the Cardiac Ablation Services was sent out using the newly revised CPT code descriptors asking cardiac electrophysiologists about the revised language in the existing CPT codes. From the survey results, the RUC advisory committee believes that many of the survey respondents may not have realized that the code descriptors had been substantially revised and that they may not have read the updated code descriptors thoroughly enough to understand that services that are separately billed, were now combined into the existing codes (since CPT did not issue new codes for the revised descriptors). The RUC recommended that these services be valued as interim to allow for re-survey and subsequent review at the April 2021 RUC meeting.

CPT code 93653 (*Comprehensive electrophysiologic evaluation with insertion and repositioning of multiple electrode catheters, induction or attempted induction of an arrhythmia with right atrial pacing and recording, and catheter ablation of arrhythmogenic focus, including intracardiac electrophysiologic 3-dimensional mapping, right ventricular pacing and recording, left atrial pacing and recording from coronary sinus or left atrium, and His bundle recording, when performed; treatment of supraventricular tachycardia by ablation of fast or slow atrioventricular pathway, accessory atrioventricular connection, cavo-tricuspid isthmus or other single atrial focus or source of atrial re-entry*) (previous work RVU of 14.75 with 000-day global) is now bundled with the add-on CPT codes 93613 (*Intracardiac electrophysiologic 3-dimensional mapping (List separately in addition to code for primary procedure)*) (work RVU of 5.23 with 90 minutes of intraservice time) and the add-on CPT code 93621 (*Comprehensive electrophysiologic evaluation including insertion and repositioning of multiple electrode catheters with induction or attempted induction of arrhythmia; with left atrial pacing and recording from coronary sinus or left atrium (List separately in addition to code for primary procedure)*) (work RVU of 2.10 with 30 minutes of intraservice time). The RUC-recommended work RVU for CPT code 93653 is 18.49, with 40 minutes of preservice evaluation, 3 minutes of preservice positioning, 15 minutes of preservice scrub/dress/wait time, 125 minutes of intraservice time and 30 minutes of immediate postservice time.

Since the two add-on codes are combined with the primary CPT code 93653, one would expect the intraservice time to have increased or remained similar to the current 180 minutes. Instead, the RUC-recommended intraservice time has decreased to 125 minutes. Accounting for changes in technologies and clinical practices from over 10 years since this code family's last review, we will expect better efficiencies and reductions in work times, but with the addition of two add-on codes whose work is mostly, if not all, added to the intraservice time, one would not expect a net decrease in minutes. This is not what the collected responses from this survey show and it is a concern. Some of CPT code 93653 add-on service times may have shifted over to the increases in preservice times, but there does appear to be a collective misunderstanding in the survey's work RVUs and physician work time responses.

In light of the RUC's intention to resurvey and re-review CPT code 93653 (and this family of codes) at the April 2021 RUC meeting, and to resolve any flaws from the initial survey, such as survey respondents probably not realizing that a new descriptor describing the inclusion of services is now bundled to the existing CPT code (and not a newly issued CPT code), we proposed to maintain the current physician times and current work RVU of 14.75, until the AMA RUC returns with a more definitive and accurate valuation.

For CPT code 93654 (*Comprehensive electrophysiologic evaluation with insertion and repositioning of multiple electrode catheters, induction or attempted induction of an arrhythmia with right atrial pacing and recording, and catheter ablation of arrhythmogenic focus, including intracardiac electrophysiologic 3-dimensional mapping, right ventricular pacing and recording, left atrial pacing and recording from coronary sinus or left atrium, and His bundle recording, when performed; with treatment of ventricular tachycardia or focus of ventricular ectopy including left ventricular pacing and recording, when performed*) (work RVU of 19.75), the RUC recommends 40 minutes of preservice evaluation, 3 minutes of preservice positioning, 20 minutes of preservice scrub/dress/wait time, 240 minutes of intraservice time and 33 minutes of immediate postservice time for a total of 336 minutes, an increase to the code's current 309 total minutes. Unlike CPT codes 93653 and 93656, CPT code 93654 already accounts for the work RVUs and physician times for 3-dimensional mapping of add-on CPT code 93613. The RUC recommended maintaining the current work RVU value of 19.75. We proposed the RUC-recommended updates to the physician times (net increase in total minutes) and to maintain the same work RVUs for CPT code 93654 for CY 2022.

CPT code 93655 (*Intracardiac catheter ablation of a discrete mechanism of arrhythmia which is distinct from the primary ablated mechanism, including repeat diagnostic maneuvers, to treat a spontaneous or induced arrhythmia (List separately in addition to code for primary procedure)*) has a current work RVU of 7.50 with a physician intraservice time of 90 minutes. The RUC recommended a revised intraservice time of 60 minutes and 6.50 work RVUs. The primary change to CPT code 93655 is the reduction of the intraservice time of

about 67 percent, which we use as a guide to determine a work RVU. We compare add-on CPT code 22854 (*Insertion of intervertebral biomechanical device(s)* (*e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring* (*e.g., screws, flanges*), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)) also with 60 minutes of intraservice and total time and a work RVU of 5.50 to CPT code 93655 and we believe that this is a more accurate valuation than the RUC's work RVU crosswalk to CPT code 34709 (*Placement of extension prosthesis(es) distal to the common iliac artery(ies) or proximal to the renal artery(ies) for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, penetrating ulcer, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed, per vessel treated (List separately in addition to code for primary procedure)*) with a work RVU of 6.50 and an intraservice and total time of 60 minutes because the proportional reduction in physician time should also reflect a similar proportional reduction in work RVUs. We proposed the RUC-recommended 60 minutes of intraservice and total time, but instead proposed a work RVU of 5.50 for CPT code 93655.

CPT code 93656 (*Comprehensive electrophysiologic evaluation including transseptal catheterizations, insertion and repositioning of multiple electrode catheters with intracardiac catheter ablation of atrial fibrillation by pulmonary vein isolation, including intracardiac electrophysiologic 3-dimensional mapping, intracardiac echocardiography including imaging supervision and interpretation, induction or attempted induction of an arrhythmia including left or right atrial pacing/recording, right ventricular pacing/recording, and His bundle recording, when performed*) is now bundled with the add-on CPT codes 93613 (*Intracardiac electrophysiologic 3-dimensional mapping (List separately in addition to code for primary procedure)*) (work RVU of 5.23 with 90 minutes of intraservice time) and the add-on CPT code 93662 (*Intracardiac echocardiography during therapeutic/diagnostic intervention, including imaging supervision and interpretation (List separately in addition to code for primary procedure*) (work RVU currently carrier-priced with 25 minutes of intraservice time) which previously were separately reported add-on services, similar to above CPT code 93653 and its add-on codes.

The RUC-recommended work RVU for CPT code 93656 is 20.00, with 40 minutes of preservice evaluation, 3 minutes of preservice positioning, 20 minutes of preservice scrub/dress/wait time, 210 minutes of intraservice time and 33 minutes of immediate postservice time, for a total of 306 minutes. The current physician times for CPT code 93656 are 23 minutes of preservice evaluation, 1 minutes of preservice positioning, 5 minutes of preservice scrub/dress/wait time, 240 minutes of intraservice time, and 40 minutes of immediate postservice time, for a total of 309 minutes, which is a net difference of 3 minutes less in the total proposed minutes, and the RUC is recommending a work RVU of 20.00, which is 0.23 more work RVUs than the current work RVU of 19.77.

In light of the RUC's intention to resurvey and review CPT code 93653 (and this family of codes) with its new bundling at their April 2021 RUC meeting to resolve any flaws from the initial survey, where many of the survey respondents may not have realized that the code descriptors had been substantially revised and that they may not have read the updated code descriptors thoroughly enough to respond correctly, we believe CPT code 93656 is in the same situation with its new bundling thus, we proposed the RUC-recommended updates to the physician times (a net decrease of 3 minutes in total time) and to maintain the current work RVU of 19.77.

From the survey of CPT code 93657 (*Additional linear or focal intracardiac catheter ablation of the left or right atrium for treatment of atrial fibrillation remaining after completion of pulmonary vein isolation (List separately in addition to code for primary procedure)*), a value of 8.00 work RVUs was obtained at the 25th percentile for this add-on code. The RUC recommended a work RVU of 6.50, for the 60 minutes of intraservice and total physician time. The current work RVU is 7.50, for 90 minutes of intraservice and total physician time.

We compare add-on CPT code 22854 (*Insertion of intervertebral biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)*) with 60 minutes of intraservice and total time and 5.50 work RVUs to CPT code 93657 and we believe that this is a more accurate valuation, since the primary change to CPT code 93657 is the reduction of the intraservice time of about 67 percent, which we use as a guide to determining a work RVU. The RUC-recommended work RVU is crosswalked from CPT code 34709 (*Placement of extension prosthesis(es) distal to the common iliac artery(ies) or proximal to the renal artery(ies) for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, penetrating ulcer, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed, per vessel treated (List separately in addition to code for primary procedure)*) with a work RVU of 6.50 and an intraservice and total time of 60 minutes, does not reflect the proportional reductions to the intraservice time and work. For CPT code 93657, we proposed the RUC-recommended 60 minutes of intraservice and total time, and a work RVU of 5.50, crosswalked from CPT code 22854.

There are no direct PE inputs for these facility-only CPT codes.

Comment: In light of the proposed CY 2022 reductions in payment for the Cardiac Ablation codes, commenters were concerned that there will be fewer providers of these services, which could cause beneficiaries to encounter longer waits for atrial fibrillation treatments as there will be fewer Cardiac Electrophysiologists to treat them. Longer waits to schedule for the earliest treatments possible are the exact opposite scenario to be the most effective in prevent strokes, heart failures, acute myocardial infarctions, trachycardia, etc. Some commenters requested that CMS and the AMA RUC withdraw their restructuring of these codes in their bundling. Commenters explained that in the typical progression of Cardiac Ablation treatment services, procedures are employed in a series, that services are additive in nature, and that subsequent services selected by practitioners are dependent on the outcomes of the previous procedures. Different individual patients do not necessarily receive the same group of services in every session of treatment,

which is what the bundling of services describes.

Response: We note that the restructuring of these procedures resulted from the AMA CPT deliberative process that CMS does not control. This restructuring was developed because of claims evidence showing that two or more procedures are observed occurring together on the same day, with the same practitioner, for the same beneficiary, frequently enough to justify a bundling of services under one new procedure code; the CPT panel decided to retain the old procedure code and only adjust its descriptor to include the new appended service. This appears to have created the misunderstanding with the survey respondents that yielded the flawed results and why the AMA RUC presented CMS with ''interim'' work RVUs rather than surveyed values. At this stage in the development of these codes, unbundling these services does not appear possible, so we have decided to maintain the current values where we can for another year, until we have new AMA RUC recommendations for next year, where stakeholders can comment further.

Comment: Some commenters stated that since these Cardiac Ablation services were going to be reviewed, their work RVUs should be increased to reflect more physician time and increases in physician work and work intensities. Instead, code bundling has reduced total payments.

Response: In consideration of concerns about a flaw in the original survey for these codes, CMS proposed to maintain the current work RVUs for some of the Cardiac Ablation services for CY 2022. We will re-review the new and revised AMA RUC recommendations for these codes when they become available and will consider for future rulemaking.

Comment: Commenters noted that the AMA RUC was aware of issues with the survey for these codes, but submitted work RVUs to CMS as recommended ''interim values''. Commenters noted that the AMA RUC informed CMS that they also intended to resurvey members of the American College of Cardiology & the Heart Rhythm Society, and to re-review those new survey results in their April 2021 meeting. The new results were discussed at that meeting and the updated work RVUs were proposed for recommendation to CMS at the conclusion of that meeting. The AMA RUC has included those recommendations in comment, and urges CMS to implement those corrected work RVUs for CY 2022, replacing the ''interim values'' first presented in January 2021.

Response: Stakeholders are aware that in recent years CMS revised its review process to align with our rulemaking timelines and to allow for consistency and transparency throughout the process. We thank the commenters for providing us with information from the April 2021 AMA RUC meeting, but note that these values along with recommendations from the subsequent October 2021 and January 2022 AMA RUC meetings will be considered as part of our CY 2023 PFS rulemaking cycle.

After consideration of comments on these Cardiac Ablation codes, we are finalizing all of the work RVUs as proposed. We did not propose and we are not finalizing any direct PE inputs for these facility-only codes.

(34) 3D Imaging of Cardiac Structures (CPT Code 93319)

In May 2020, the CPT Editorial Panel created one new add-on code to describe the 3D echocardiographic imaging and postprocessing during transesophageal or transthoracic echocardiography for congenital cardiac anomalies for the assessment of cardiac structure(s). The 3D imaging could be performed as a follow-up to a 2D transthoracic echocardiogram.

We proposed the RUC-recommended work RVU of 0.50 for CPT code 93319 (*3D echocardiographic imaging and postprocessing during transesophageal echocardiography, or during transthoracic echocardiography for congenital cardiac anomalies, for the assessment of cardiac structure(s) (e.g., cardiac chambers and valves, left atrial appendage, interatrial septum, interventricular septum) and function, when performed (List separately in addition to code for echocardiographic imaging*).

While we proposed no refinements to the direct PE inputs, we requested additional information about the 3D echocardiography probe equipment item. The RUC recommended that a 3D probe was required in addition to the base echocardiography machine. We received an invoice for $31,754.30 for this equipment item. It was unclear if the invoice reflected both the 3D probe and the base echocardiography machine or only the probe itself. We solicited additional information to know if this equipment item reflected both the 3D probe and the base echocardiography machine or only the probe.

Comment: Several commenters stated that they supported the proposal of the RUC-recommended work RVU of 0.50 for CPT code 93319.

Response: We appreciate the support for our proposed work RVU from the commenters.

Comment: A commenter stated that they had reviewed the submitted invoice and was able to confirm that the proposed price of $31,754.30 is for the 3D echocardiography probe (ER121) itself, not any other equipment. Another commenter agreed that the $31,754.30 cost on the submitted invoice was for the probe itself and stated that they were including additional invoices which reflected a range of costs between $34,678.00 to $36,556.44 for 3D probes to support this pricing.

Response: We appreciate the clarification of the pricing on the submitted invoice from the commenters. Unfortunately, we were unable to find the additional invoices mentioned by the commenter in their submission, and therefore, we were unable to review them for the stated range of costs between $34,678.00 to $36,556.44. Commenters are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at *PE_Price_Input_Update@cms.hhs.gov*.

After consideration of the comments, we are finalizing the proposed work RVU of 0.50 and the proposed direct PE inputs for CPT code 93319. We are also finalizing the proposed price of $31,754.30 for the 3D echocardiography probe (ER121) equipment.

(35) Cardiac Catheterization for Congenital Defects (CPT Codes 93593, 93594, 93595, 93596, 93597, and 93598)

In May 2020, the CPT Editorial Panel replaced a family of four cardiac catheterization codes with five new codes (CPT codes 93593–93597) to describe cardiac catheterization for congenital cardiac defect(s). The CPT Editorial Panel also replaced two cardiac output measurement codes with one new add-on code (CPT code 93598) to report cardiac output measurement(s), performed during cardiac catheterization for congenital cardiac defects.

We proposed the RUC-recommended work RVU for two of the codes in this family. We proposed a work RVU of 3.99 for CPT code 93593 (*Right heart catheterization for congenital heart defect(s) including imaging guidance by the proceduralist to advance the catheter to the target zone; normal native connections*) and a work RVU of 6.10 for CPT code 93594 (*Right heart catheterization for congenital heart defect(s) including imaging guidance by the proceduralist to advance the catheter to the target zone; abnormal native connections*) as recommended by the RUC in both cases.

For CPT code 93595 (*Left heart catheterization for congenital heart*

defect(s) including imaging guidance by the proceduralist to advance the catheter to the target zone, normal or abnormal native connections), we disagree with the RUC-recommended work RVU of 6.00 and we instead proposed a work RVU of 5.50 based on a crosswalk to CPT code 32607 (*Thoracoscopy; with diagnostic biopsy(ies) of lung infiltrate(s) (e.g., wedge, incisional), unilateral*). CPT code 32607 is a thorascopy procedure with three fewer minutes of intraservice work time (45 minutes) than CPT code 93595 but a higher total work time of 178 minutes. CPT code 93595 has similar surveyed work time to CPT code 93593 but the RUC recommended a work RVU of 3.99 for the first code in the family as compared to 6.00 for CPT code 93595. While we agree that CPT code 93595 is a more intensive procedure, we do not agree that it should be valued more than two full RVUs higher as compared to the first code in the family. We believe that it will be more accurate to propose a work RVU of 5.50 based on the aforementioned crosswalk to CPT code 32607. We note that the intensity of CPT code 93595 remains higher than the first two codes in the family at the proposed work RVU of 5.50.

For CPT code 93596 (*Right and left heart catheterization for congenital heart defect(s) including imaging guidance by the proceduralist to advance the catheter to the target zone(s); normal native connections*), we disagree with the RUC-recommended work RVU of 7.91 and we instead proposed a work RVU of 6.84 based on a crosswalk to CPT code 32608 (*Thoracoscopy; with diagnostic biopsy(ies) of lung nodule(s) or mass(es) (e.g., wedge, incisional), unilateral*). CPT code 32608 is another thorascopy procedure from the same family as CPT code 32607, with the same 60 minutes of intraservice work time as CPT code 93596 and a higher total work time of 195 minutes. In the same fashion as the previous code, CPT code 93596 has similar surveyed work time to CPT code 93594 but the RUC recommended a work RVU of 6.10 for the second code in the family as compared to 7.91 for CPT code 93596. While we agree that CPT code 93596 is a more intensive procedure, we do not agree that it should be valued almost two full RVUs higher as compared to the second code in the family. We believe that it will be more accurate to propose a work RVU of 6.84 based on the aforementioned crosswalk to CPT code 32608. We note that the intensity of CPT code 93596 remains the highest among the first four codes in the family at the proposed work RVU of 6.84. We believe that our proposed RVUs for CPT codes 93595 and 93596 better preserve relativity both within the family and also with other services on the PFS.

For CPT code 93597 (*Right and left heart catheterization for congenital heart defect(s) including imaging guidance by the proceduralist to advance the catheter to the target zone(s); abnormal native connections*), we disagree with the RUC-recommended work RVU of 9.99 and we instead proposed a work RVU of 8.88 based on the median work RVU from the survey. The RUC's recommendation of a work RVU of 9.99, based on maintaining the prior work RVU of deleted CPT code 93532 (*Combined right heart catheterization and transseptal left heart catheterization through intact septum with or without retrograde left heart catheterization, for congenital cardiac anomalies*), was nearly equal to the 75th percentile work RVU from the survey at 10.00. Since the RUC recommended the survey median work RVU for the other four non-measurement codes in the family, we do not understand the recommendation of a value for CPT code 93597 that sits within 0.01 RVUs of the survey 75th percentile. The survey for CPT code 93597 also revealed that it typically requires far less work time to perform as compared with predecessor code 93532 (83 minutes of intraservice work time as compared to 175 minutes for the predecessor code). Although we agree that CPT code 93597 is a more intensive procedure than its predecessor code, we do not believe that the work RVU should remain unchanged given the greatly reduced work time in the new procedure. Since the two components of work are time and intensity, we believe that decreases in time should typically be reflected in decreases to work RVUs. Therefore, we proposed a work RVU of 8.88 for CPT code 93597 based on the survey median outcome. We believe that our proposed RVU more accurately accounts for these changes in surveyed work time and better preserves relativity with the rest of the family.

For CPT code 93598 (*Cardiac output measurement(s), thermodilution or other indicator dilution method, performed during cardiac catheterization for the evaluation of congenital heart defects*), we disagree with the RUC-recommended work RVU of 1.75 and we instead proposed a work RVU of 1.44 based on a crosswalk to CPT code 37253 (*Intravascular ultrasound (noncoronary vessel) during diagnostic evaluation and/or therapeutic intervention, including radiological supervision and interpretation; each additional noncoronary vessel*). CPT code 37253 is an intravascular ultrasound procedure that shares the same intraservice work time of 20 minutes as CPT code 93598 and has 1 additional minute of immediate postservice time. We note that the intensity of CPT code 93598 as recommended by the RUC at a work RVU of 1.75 will be the second-highest in the family, higher than CPT code 93597 for example. We do not agree that this cardiac output measurement code will typically be more intensive to perform than the two types of heart catheterization taking place in CPT code 93597.

We also note that the recommended work RVU for CPT code 93598 was higher than the sum of its two predecessor codes. Former CPT codes 93561 (*Indicator dilution studies such as dye or thermodilution, including arterial and/or venous catheterization; with cardiac output measurement*) and 93562 (*Indicator dilution studies such as dye or thermodilution, including arterial and/or venous catheterization; subsequent measurement of cardiac output*) had CY 2021 work RVUs of 0.95 and 0.77 respectively. These two codes sum together to a work RVU of 1.72 which will be lower than the RUC's recommendation of 1.75 for CPT code 93598. The RUC's recommendation suggests that there will be no efficiencies gained or savings created in the process of creating CPT code 93598; we believe that the survey for the new code indicates otherwise, as the predecessor codes had work times of 15 minutes and 12 minutes respectively (27 minutes total) as compared to 20 minutes of surveyed work time for the new code. This lower work time suggests that the creation of CPT code 93598 has led to greater efficiencies in the service which, under the resource-based nature of the RVU system, lends further support for a reduction in the work RVU as compared to a sum of the predecessor codes. Therefore, we believe that it will be more accurate to a work RVU of 1.44 based on the aforementioned crosswalk to CPT code 37253.
