

Title: Aviation Maintenance Technician Schools.

Form Numbers: FAA Form 8310-6.

Type of Review: This is a renewal of an information collection.

Background: 14 CFR part 147. The collection of information includes both reporting and recordkeeping requirements related to AMTS. The information collected is provided to the certificate holder/applicant's appropriate FAA Flight Standards office in order to allow the FAA to determine compliance with the part 147 requirements for obtaining and/or retaining an FAA air agency certificate. For applicants, when all part 147 requirements have been met, an FAA air agency certificate is issued, with the appropriate ratings. For FAA-certified AMTS, the FAA uses the information collected to determine if the AMTS provides appropriate training using an FAA-approved curriculum, keeps records that demonstrate each student's training, and to ensure that AMTS graduates receive an appropriate document showing the graduate is eligible to take the FAA tests required to obtain a mechanic certificate.

Respondents: Approximately 10 AMTS applicants, and 182 FAA-certified applicants respond to this collection annually.

Frequency: AMTS applicants respond one time, prior to certification. FAA-certified AMTS respond occasionally after certification, and have ongoing recordkeeping requirements.

Estimated Average Burden per Response: 96 hours.

Estimated Total Annual Burden: 54,957 hours/year.

Issued in Washington, DC, on November 17, 2021.
