SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is amending its regulations in parts 9, 37, 40, 50, 51, 52, 55, 71, 73, and 110 of title 10 of the *Code of Federal Regulations* (10 CFR). The NRC

is making these amendments to correct a grammatical error, punctuation, a reference, formatting, a mathematical formula, and spelling; clarify language; revise contact information; and update an authority citation and internal procedures.

II. Summary of Changes

10 CFR Part 9

Update Authority Citation. This final rule updates the authority citation for 10 CFR part 9 to include the reference for the Social Security Number Fraud Prevention Act of 2017.

10 CFR Parts 37 and 110

Correct Mathematical Formula. This final rule revises appendix A to 10 CFR part 37 and appendix P to 10 CFR part 110 to correct a sum of fractions formula. The correction is necessary to make the expression mathematically reflect that an indefinite number of nuclides may be included in the calculation, consistent with the explanations in the respective rule texts. An ellipsis and a plus sign are added at the appropriate locations, and the summation sign (sigma) and brackets are deleted as unnecessary.

10 CFR Parts 40 and 73

Update Internal Procedures. This final rule revises §§ 40.23(b)(1), 40.66(a), 40.67(a), 73.73(a)(1), and 73.74(a)(1) to add the email address that has been used for submitting advance notices for shipments of radioactive material.

10 CFR Part 50

Revise Contact Information. This final rule amends the introductory text of § 50.74 to refer licensees to the appropriate contact information in § 55.5.

Provide Clarity. This final rule revises section IV.F.2.j of appendix E to 10 CFR part 50 to clarify the emergency preparedness exercise scenarios that must be performed within an 8-year exercise cycle. This revision does not change the regulations; it only clarifies the regulations by adding paragraph numbers and organization.

10 CFR Part 51

Correct Spelling. This final rule amends footnote 4 to § 51.52 to correct “appiled” to read “applied.” This final rule also amends § 51.10(b)(2) to correct “acitivity” to read “activity.”

10 CFR Part 52

Correct Reference. This final rule amends § 52.136 by removing the reference “10 CFR 50.33(a) through (d) and (j)” and adding in its place the

reference “10 CFR 50.33(a) through (c) and (j).”

10 CFR Part 55

Correct Punctuation. This final rule amends § 55.33(a)(1) to correct the word “applicants” to read “applicant’s.”

10 CFR Part 71

Correct a Formatting Error. This final rule corrects § 71.4 to italicize the term *licensed material*.

10 CFR Part 110

Correct Grammatical Error. This final rule amends the definition for *medical isotope* in § 110.2 to correct the phrase “radiopharmaceutical for diagnostic, therapeutic procedures or for research and development” to read “radiopharmaceutical for diagnostic or therapeutic procedures or for research and development.”

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive publication in the **Federal Register** of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. Specifically, the revisions correct a grammatical error, punctuation, a reference, formatting, a mathematical formula, and spelling; clarify language; revise contact information; and update an authority citation and internal procedures. The Commission is exercising its authority under 5 U.S.C. 553(b) to publish these amendments as a final rule. The amendments are effective December 30, 2021. These amendments do not require action by any person or entity regulated by the NRC and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule would not constitute backfitting as defined in § 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward

Fitting, Issue Finality, and Information Requests.” These corrections also would not constitute forward fitting as that term is defined and described in MD 8.4 or affect the issue finality of any approval issued under 10 CFR part 52. The amendments are non-substantive in nature, including correcting a grammatical error, punctuation, a reference, formatting, a mathematical formula, and spelling; clarifying language; revising contact information; and updating an authority citation and internal procedures. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or that would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of this final rule would not constitute backfitting or be inconsistent with any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

V. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885).

VI. National Environmental Policy Act

The NRC has determined that this final rule is the type of action described in § 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

VII. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801–808).

IX. Compatibility of Agreement State Regulations

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the **Federal Register** on October 18, 2017 (82 FR 48535), NRC program elements (including regulations) are placed into compatibility categories A, B, C, D, NRC, or adequacy category Health and Safety (H&S). Compatibility Category A program elements are those program elements that are basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B program elements are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. An Agreement State should adopt Category B program elements in an essentially identical manner. Compatibility Category C program elements are those program elements that do not meet the criteria of Category A or B, but contain the essential objectives that an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D program elements are those program elements that do not meet any of the criteria of Category A, B, or C and, therefore, do not need to be adopted by Agreement States for purposes of compatibility. Compatibility Category NRC program elements are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of 10 CFR. These program elements should not be adopted by the Agreement States. Compatibility Category H&S program elements are program elements that are required because of a particular health and safety role in the regulation of agreement material within the State and should be adopted in a manner that embodies the essential objectives of the NRC program. The portions of this final rule that amend 10 CFR parts 37, 40, and 71 are a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among

Agreement State and NRC requirements, and are listed in the following table. The changes to 10 CFR parts 9, 50, 51, 52, 55, 73, and 110 categories are not subject to Agreement State jurisdiction and consequently are not required for compatibility.
