Form Numbers: None.  
Respondents/affected entities: Entities potentially affected by this action are public water systems and primary agencies.  
Respondent’s obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.  
Estimated number of respondents: 146,808 (total).  
Frequency of response: Varies by requirement (i.e., on occasion, monthly, quarterly, semi-annually, and annually).  
Total estimated burden: 18,127,581 hours (per year). Burden is defined at 5 CFR 1320.03(b).  
Total estimated cost: $972,102,000 (per year), includes $228,972,000 annualized capital or operation & maintenance costs.  
Changes in Estimates: There is no estimated increase or decrease of hours in the total estimated respondent burden compared to what was identified in the ICR currently approved by OMB.  

Abstract: The Public Water System Supervision (PWSS) Program ICR examines public water systems, primary agencies (i.e., states and tribes with primary enforcement authority) and tribal operator certification provider burden, and costs for “cross-cutting” recordkeeping and reporting requirements (i.e., the burden and costs for complying with drinking water information requirements that are not associated with contaminant-specific rulemakings). EPA intends to collect information and data as part of the agency’s oversight of state primary programs and national SDWA implementation. The following activities have recordkeeping and reporting requirements that are mandatory for compliance with the Code of Federal Regulations (CFR) at 40 CFR parts 141 and 142: The Consumer Confidence Report Rule (CCR), the Variance and Exemption Rule (V/E Rule), General State Primacy Activities, the Public Notification Rule (PN), and Proficiency Testing Studies for Drinking Water Laboratories. The information collection activities for both the Operator Certification and the Capacity Development Program are driven by the grant withholding and reporting provisions under sections 1419 and 1420, respectively, of the Safe Drinking Water Act. The information collection for the Tribal Operator Certification Program is driven by grant eligibility requirements outlined in the Drinking Water Infrastructure Grant Tribal Set-Aside Program Final Guidelines and the Tribal Drinking Water Operator Certification Program Guidelines.  
Form Numbers: None.  
Respondents/affected entities: Entities potentially affected by this action are new and existing public water systems and primary agencies.  
Respondent’s obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.  
Estimated number of respondents: 148,674 (total).  
Frequency of response: Varies by requirement (i.e., on occasion, monthly, quarterly, semi-annually, and annually).  
Total estimated burden: 3,643,372 hours (per year). Burden is defined at 5 CFR 1320.03(b).  
Total estimated cost: $192,654,000 (per year), includes $38,121,000 in operation and maintenance costs.  
Changes in Estimates: There is an expected decrease of hours in the total estimated respondent burden compared to what was identified in the ICR currently approved by OMB, due to use of centralized software for data entry and rule compliance calculations. The updated, estimated burden will be incorporated into a revised supporting statement (which will be available in the docket) and in a second Federal Register notice (for public comment) at a later date, to be determined, before the ICR package is sent to OMB for approval.  

Abstract: The Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR examines public water system and primary agency burden and costs for recordkeeping and reporting requirements in support of the Disinfectants/Disinfection Byproducts, Chemical and Radionuclides Rules. These recordkeeping and reporting requirements are mandatory for compliance with 40 CFR parts 141 and 142. The following regulations are included: The Stage 1 Disinfectants and Disinfection Byproducts Rule (Stage 1 DBPR), the Stage 2 Disinfectants and Disinfection Byproducts Rule (Stage 2 DBPR), the Chemical Phase Rules (Phases II/III/V), the Radionuclides Rule, Disinfectant Residual Monitoring and Associated Activities under the Surface Water Treatment Rule (SWTR), the Arsenic Rule and the Lead and Copper Rule (LCR), including the Lead and Copper Rule Short Term Revisions. Future microbial-related rulemakings will be added to this consolidated ICR after the regulations are promulgated and the initial, rule-specific, ICRs are due to expire.
