SURPLUS INFORMATION: CPSC is proposing to amend CPSC 23—Equal Employment Opportunity (EEO) Disability/Accommodation Files. The amendment will expand the authorities for maintenance of the system, the purposes of the system, the categories of individuals covered by the system, the record source categories, and the records contained in the system, to include records of requests for accommodation based on sincerely held religious beliefs, practices, or observances.

DATES: Comments must be received no later than January 19, 2022. The modified system of records described here will become effective January 19, 2022.

CPSC expanded the Categories of Individuals Covered by the System beyond the Rehabilitation Act and the Americans with Disabilities Act to include “race, color, religion, sex (including gender identity and pregnancy), national origin, disability, age, genetic information, sexual orientation, parental status, and/or any basis covered by Executive Order 11478.” Categories of Records in the System now includes supporting documentation, in addition to correspondence. The Authority Section was expanded beyond the Rehabilitation Act and the Americans with Disabilities Act to include Title VII of the Civil Rights Act, relevant Executive Orders, and CPSC’s EEO Directive. The Purposes were expanded to cover religious beliefs, in addition to disabilities, as well as prospective, current, and former employees; and to provide more detail. The Routine Uses now refer to the 12 exceptions found in the Privacy Act, as well as additional circumstances that require sharing information with external entities, including medical personnel, other federal agencies not already referenced in the Privacy Act exceptions, and contractors. The Retention section was changed to refer generally to the National Archives and Record Administration applicable records-retention requirements if the timeframe changes later. Other minor changes were made, including formatting and title corrections.

CPSC sent a report to Congress and the Office of Management and Budget for their evaluation.

For the public’s convenience, CPSC’s amended system of records is published in full below, with changes italicized.

Title of Collection: School Pulse Panel Data Collection Activities.

OMB Control Number: 1850–0963.

Type of Review: A revision of a currently approved collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 17,280.

Total Estimated Number of Annual Burden Hours: 4,752.

Abstract: The School Pulse Panel is a new study conducted by the National Center for Education Statistics (NCES), part of the Institute of Education Sciences (IES), within the United States Department of Education, to collect extensive data on issues concerning the impact of the COVID–19 pandemic on students and staff in U.S. public primary, middle, high, and combined-grade schools. The survey will ask school district staff and sampled school principals about topics such as instructional mode offered; enrollment counts of subgroups of students using various instructional modes; learning loss mitigation strategies; safe and healthy school mitigation strategies; special education services; use of federal relief funds; and information on staffing. Because this data collection is extremely high priority and time sensitive, it will undergo Emergency Clearance. Because this data collection is extremely high priority and time sensitive, it will undergo Emergency Clearance. It will not go through a 60-day public comment period and will only undergo a 30-day public comment period after clearance has been granted. NCES has also submitted a parallel ICR package to undergo the usual 60-day and 30-day clearance processes so that data collection can continue beyond the expiration of the emergency clearance.

The administration of the School Pulse Panel study is in direct response to President Biden’s Executive Order 14000: Supporting the Reopening and Continuing Operation of Schools and Early Childhood Education Providers. It will be one of the nation’s few sources of reliable data on a wealth of information focused on school reopening efforts, virus spread mitigation strategies, services offered for students and staff, and technology use, as reported by school district staff and principals in U.S. public schools. About 1,200 public elementary, middle, high, and combined-grade schools will be selected to participate in a panel where school and district staff will be asked to provide requested data monthly during the 2021–22 school years. This approach provides the ability to collect detailed information on various topics while also assessing changes in reopening efforts over time. Given the high demand for data collection during this time, the content of the survey may change on a quarterly basis.

Emergency Justification: In October 2021, the SPP was suspended for the months of October, November, and December due to low response rates for the first month of the collection (OMB 1850–0963 v.6). During that pause, the Institute of Education Sciences used that time to redesign the study to improve response rates. A primary strategy for that was to reduce burden in each month’s collection and to rotate content to address data needs of the agencies across months. Additionally, we are actively recruiting schools in a more comprehensive manner in order to start the January collection with a more robust, committed panel of schools. This submission includes planned communication materials and items to be collected in January, February, and March. The SPP study itself is extremely important particularly now that COVID–19 has not waned, and the pulse model is one that the agency will need after the pandemic subsides for other quick-turnaround data needs.
