

form of egg products.<sup>2</sup> As such, FSIS estimates the total potential egg products available for export to be approximately 3,200 tons<sup>3</sup> (17.2 percent of 18,800 tons). Assuming that the European Union will continue to be Lithuania's largest trading partner, the amount of egg products to be exported to the U.S. is likely to be less than 3,200 tons.

From 2015 to 2019, the U.S. had an annual average of 375 million egg laying hens<sup>4</sup> that produced 6.6 million tons of eggs, of which approximately 5.6 million tons were consumed domestically.<sup>5</sup> While the U.S. imports around 11,200 tons of egg products annually, it is a net exporter of egg products.<sup>6</sup>

With only one establishment intending to export egg products to the U.S., Lithuanian egg products exports volume to the U.S. are likely to be low in comparison to the total U.S. egg products market and are expected to have little or no effect on U.S. egg products supplies or their prices. U.S. consumers, however, are expected to enjoy more choices when purchasing egg products.

<sup>2</sup>Detailed data on Lithuanian egg products is limited. We use the available egg data to estimate the potential amount of egg products Lithuania would be able to export to the United States. Lithuania's production, trade and consumption data are based on the Food and Agricultural Organization of the United Nations (FAO, 2021) Food Balance Sheet: Available at <http://www.fao.org/faostat/en/#data/FBS>. The maximum expected exports potential is based on production plus imports minus consumption and assuming zero ending stock. FSIS calculated 17.2 percent as a five-year average based on 2015–19 FAO data.

*Title:* Family Day Care Home (FDCH) Participation Study.

*Form Number:* N/A.

*OMB Number:* Not Yet Assigned.

*Expiration Date:* Not Yet Determined.

*Type of Request:* New Collection.

*Abstract:* The Child and Adult Care Food Program (CACFP), administered by the Food and Nutrition Service

(FNS), plays a critical role in supporting the health and wellness of children by reimbursing providers for nutritious meals served to eligible children in their care. The FDCH Participation Study aims to understand FDCH provider experiences with the CACFP by asking a nationally representative sample of both current and former CACFP-participating FDCH providers about their experiences with the program.

Data collection will occur during the spring of 2023. The primary data collection activity will include the FDCH Provider Experience Survey, designed to gather information from FDCH providers to address the three main objectives for the study:

1. Identify and describe the reasons why FDCH providers discontinue their participation in CACFP;

2. Determine and describe CACFP program statutory and regulatory requirements, operational and financial considerations, and Federal, State, and local specifics frequently cited as burdensome by stakeholders. Classify challenges as Federal, State, and local and describe in detail; and

3. Gather and summarize recommendations from FDCH providers on how to reduce barriers or challenges to CACFP participation.

The sample frame for this study will consist of all FDCH providers listed in FNS' list of CACFP-participating providers for program years 2019 and 2022. The sampling frame will be created by comparing the 2019 list of providers with the 2022 list. Those FDCH providers included only on the 2019 list will be the frame of former participants. Those that are on the 2022 list will form the frame of current participants. The survey will include a screener to verify CACFP participation status of the providers and ask follow-up questions related to their

experiences—including reasons they discontinued their CACFP participation, program factors they consider burdensome, and recommendations to facilitate CACFP participation for FDCH providers. In addition to comparing responses by the current and former CACFP participants, results will be compared by the following subgroups: Tier status (Tier I/II), program size (small/large), and urbanicity (urban/rural).

*Affected Public:* State and local government respondents are CACFP State agency managers. For-profit and not-for-profit business respondents are FDCH providers and their sponsors.

*Estimated Number of Respondents:* The estimated number of respondents is 5,921. This includes 1,878 responses and 4,043 nonresponses. The number of unique respondents for this study are 51 State Agencies, 478 CACFP sponsors, and 1,340 FDCH providers.

*Estimated Number of Responses per Respondent:* All respondents will be asked to respond to each specific data collection activity only once. The overall average number of responses per respondent across the entire collection is 11.88.

*Estimated Total Annual Responses:* The estimated number of total annual responses is 70,362.

*Estimated Time per Response:* 0.0575 minutes. The estimated time of response varies from 1 minute to 1 hour depending on respondent group, as shown in the table below.

*Estimated Total Annual Burden on Respondents:* 4,045.1 hours. This includes 3,754.4 hours for respondents and 290.7 hours for non-respondents. See the table below for estimated total annual burden for each type of respondent.
