

on the America the Beautiful initiative from a broad set of stakeholders, this request for information offers a formal comment period to collect input specific to the development of the Atlas. The group is seeking input from the public on the following:

- *Science and Data.* What data sources, standards, and technical approaches should be applied to data included in the Atlas to ensure that it is an authoritative and useful tool for the public?

- *Conservation as a Continuum.* How can the Atlas reflect the meaningful conservation work already underway in America?

- What stewardship actions should be considered, in addition to permanent protections, to capture a more complete picture of conservation and restoration in America?

- What are the attributes of lands and waters that should be included in the Atlas? Considerations could include, for example, a clearly defined geographic boundary, status of ecological function, representation of species and habitats, extent of disturbance, expected future risks from climate change or other human stressors, ecosystem connectivity, or durability of management status.

- How can the Atlas best reflect the contributions of State, local, Tribal, territorial, and private lands?

- *Outcomes.* How can the Atlas best reflect land and water contributions to biodiversity, climate change mitigation and resilience, and equitable access to nature and its benefits?

Abstract: Reclamation is responsible for approximately 6.5 million acres of land which directly support Reclamation’s Federal water projects in the 17 Western States. Under Title 43 CFR part 429, individuals or entities wanting to use Reclamation’s lands, facilities, or waterbodies must apply using Form 7–2540. Examples of such uses are:

- other commercial activities such as “guiding and outfitting” and “filming and photography;” and,
- resource exploration and extraction, including sand and gravel removal and timber harvesting.

We review applications to determine whether granting individual use authorizations are compatible with Reclamation’s present or future uses of the lands, facilities, or waterbodies. When we find a proposed use compatible, we advise the applicant of the estimated administrative costs and estimated application processing time. In addition to the administrative costs, we require the applicant to pay a use fee based on a valuation or by competitive

bidding. If the application is for construction of a bridge, building, or other significant construction project, Reclamation may require that all plans and specifications be signed and sealed by a licensed professional engineer.
