

provisions of the Federal railroad safety regulations contained at 49 CFR parts 215 (Railroad Freight Car Safety Standards) and 224 (Reflectorization of Rail Freight Rolling Stock). The relevant FRA Docket Number is FRA–2011–0009.

Specifically, NNR requested to extend its special approval pursuant to 49 CFR 215.203, *Restricted cars*, for a total of 13 cars, including 2 cabooses (NN 22 and NN 3), 2 flat cars (NN 23 and NN 100), 5 hopper cars (WSOR 102, WSOR 128, WSOR 134, WSOR 158, and WSOR 159), and 4 boxcars (NN 1021, NN 1023, NN 1024, and NN1025) that are more than 50 years from the date of original construction.¹ NNR also requests to extend its existing relief from 49 CFR 215.303, *Stenciling of restricted cars*, and 224.101, *General requirements*. NNR seeks to continue use of the cars in mobile storage, occasional tourist photographic events, and tourist excursion operations. In support of its request, NNR states that the relief would enable the cars to maintain historic integrity and that the cars would remain on NNR's track, not connected to the general railroad system.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. The requirements comply with the Common Grant Rule, and are also included in sections of the grant agreement. During the project management stage, the grantee will complete Quarterly Progress and Monitoring Reports to ensure that the project budget and schedule will be maintained to the maximum extent possible, that the project will be completed with the highest degree of quality, and that compliance with Federal regulations will be met. The substantive requirements of the report include: The project's overall status; project significant activities and issues; action items/outstanding issues; project scope overview; project schedule; project cost; an SF-425 Federal Financial Report; and certifications. This reporting requirement will greatly reduce the need for on-site visits by staff.

This electronic spreadsheet report is collected once, at least five (5) years after project completion from grantees to help measure the effectiveness of the grants as a program. Information provided will allow the Government to analyze project performance.
