

**Description of the Need for the Information and Proposed Use of the Information**

Improving agency programs requires ongoing assessment of service delivery—systematic review of the operation of a program compared to a set of explicit or implicit standards—as a means of contributing to the continuous improvement of the those programs. The Agency will collect, analyze, and interpret information gathered through this generic clearance to identify strengths and weaknesses of current services and make improvements in service delivery based on that feedback. The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information were not collected, vital feedback from customers and stakeholders on the Agency’s services would be unavailable and the Agency would not know if adjustments would be warranted.
