

produced, we use the maximum mean seasonal (*i.e.*, 3-month) abundance prediction for purposes of comparison as a precautionary smoothing of month-

to-month fluctuations and in consideration of a corresponding lack of data in the literature regarding seasonal distribution of marine mammals in the

GOM. Information supporting the small numbers determinations is provided in Table 1.

TABLE 1—TAKE ANALYSIS

Species	Authorized take <sup>1</sup>	Abundance <sup>2</sup>	Percent abundance
Rice's whale <sup>3</sup> .....	0	51	n/a
Sperm whale .....	32	2,207	1.4
<i>Kogia</i> spp. ....	413	4,373	0.3
Beaked whales .....	163	3,768	4.3
Rough-toothed dolphin .....	29	4,853	0.6
Bottlenose dolphin .....	95	176,108	0.1
Clymene dolphin .....	79	11,895	0.7
Atlantic spotted dolphin .....	38	74,785	0.1
Pantropical spotted dolphin .....	483	102,361	0.5
Spinner dolphin .....	74	25,114	0.3
Striped dolphin .....	34	5,229	0.6
Fraser's dolphin .....	10	1,665	3.9
Risso's dolphin .....	20	3,764	0.5
Melon-headed whale .....	52	7,003	0.7
Pygmy killer whale .....	16	2,126	0.7
False killer whale .....	22	3,204	0.7
Killer whale .....	0	267	n/a
Short-finned pilot whale .....	12	1,981	0.6

<sup>1</sup> Scalar ratios were not applied in this case due to brief survey duration.

<sup>2</sup> Best abundance estimate. For most taxa, the best abundance estimate for purposes of comparison with take estimates is considered here to be the model-predicted abundance (Roberts *et al.*, 2016). For those taxa where a density surface model predicting abundance by month was produced, the maximum mean seasonal abundance was used. For those taxa where abundance is not predicted by month, only mean annual abundance is available. For the killer whale, the larger estimated SAR abundance estimate is used.

<sup>3</sup> The final rule refers to the GOM Bryde's whale (*Balaenoptera edeni*). These whales were subsequently described as a new species, Rice's whale (*Balaenoptera ricei*) (Rosel *et al.*, 2021).

<sup>4</sup> Includes 1 take by Level A harassment and 12 takes by Level B harassment.

Based on the analysis contained herein of Equinor's proposed survey activity described in its LOA application and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the affected species or stock sizes and therefore is of no more than small numbers.

**Authorization**

NMFS has determined that the level of taking for this LOA request is consistent with the findings made for the total taking allowable under the incidental take regulations and that the amount of take authorized under the LOA is of no more than small numbers. Accordingly, we have issued an LOA to Equinor authorizing the take of marine mammals incidental to its geophysical survey activity, as described above.

Dated: January 7, 2022.

**New England Fishery Management Council; Public Meeting**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public meeting.

**SUMMARY:** The New England Fishery Management Council (Council, NEFMC) will hold a three-day meeting to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Due to ongoing public safety considerations related to COVID-19, this meeting will be conducted entirely by webinar.

**DATES:** The webinar meeting will be held on Tuesday, Wednesday, and Thursday, February 1, 2, and 3, 2022, beginning at 10 a.m. on Tuesday and 9 a.m. on Wednesday and Thursday.

**ADDRESSES:** All meeting participants and interested parties can register to join the webinar at <https://register.gotowebinar.com/register/3241130900598780683>.

*Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950; telephone: (978) 465-0492; [www.nefmc.org](http://www.nefmc.org).

**FOR FURTHER INFORMATION CONTACT:** Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492, ext. 113.

**SUPPLEMENTARY INFORMATION:**

**Agenda**

*Tuesday, February 1, 2022*

After introductions and brief announcements, the Council will receive reports on recent activities from its Chair and Executive Director, the Greater Atlantic Regional Fisheries Office (GARFO) Regional Administrator, the Northeast Fisheries Science Center (NEFSC) Director, the NOAA Office of General Counsel, the Mid-Atlantic Fishery Management Council liaison, staff from the Atlantic States Marine Fisheries Commission (ASMFC), and representatives from the U.S. Coast Guard, NOAA's Office of Law Enforcement, and the Northeast Trawl Advisory Panel. Next, the Council will receive the Skate Committee report and take final action on Framework Adjustment 9 to the Northeast Skate

Complex Fishery Management Plan (FMP). This framework will revise: (1) The FMP's objectives; and (2) conditions for open access federal skate fishing permits.

Following the lunch break, the Council will take up ecosystem-based fishery management (EBFM) and receive brief updates on: (1) Informational EBFM workshops using public outreach materials, focusing on potential application to a Georges Bank example fishery ecosystem plan (eFEP); and (2) initial work to develop a Beta Management Strategy Evaluation (MSE) for EBFM and the Georges Bank eFEP. Then, the Council will go into the Habitat Committee report, which will cover three items. First, the Council will initiate a framework adjustment to designate Habitat Areas of Particular Concern in Southern New England. Second, the Council will receive a report on recent discussions between New England and Mid-Atlantic Council leadership about the Great South Channel Habitat Management Area (HMA) and consider next steps, including a clam industry request for secretarial emergency action to gain additional access to the HMA. The Council will conclude the habitat report with updates on offshore energy and other ongoing habitat-related work. It then will adjourn for the day. Following adjournment, the Council will go into a closed session to discuss two items: (1) Scientific and Statistical Committee appointments; and (2) Council policies on U.S. Equal Employment Opportunity (EEO) harassment in the workplace issues.

*Wednesday, February 2, 2022*

The Council will begin the day with the Scallop Committee report. First, the Council will receive and discuss the final report for the evaluation of the scallop fishery's rotational area management program. The Council also will receive a brief update on work being conducted by the Scallop Survey Working Group. This will be followed by an initial update on upcoming scoping sessions for potential development of a limited access leasing program. Next, the Council will receive a presentation from GARFO on the formation of the Atlantic Sturgeon Bycatch Working Group and an overview of the working group's planned activities. This will be followed by a report on: (1) Results from the 27th Regular Meeting of the International Commission for the Conservation of Atlantic Tunas (ICCAT); and (2) recommendations from the Advisory Committee to the U.S. Section of ICCAT. Next, members of the public will have

the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. The Council asks the public to limit remarks to 3–5 minutes. These comments will be received through the webinar. A guide for how to publicly comment through the webinar is available on the Council website at [https://s3.amazonaws.com/nefmc.org/NEFMC-meeting-remote-participation\\_generic.pdf](https://s3.amazonaws.com/nefmc.org/NEFMC-meeting-remote-participation_generic.pdf).

Following the lunch break, the Council will receive a congressional update about ongoing federal legislative activities. Next, the Council will receive a briefing on Atlantic mackerel stock status and work being done by the Mid-Atlantic Council to revise the mackerel rebuilding program based on results from the 2021 Atlantic Mackerel Management Track Stock Assessment. This will be followed by an update on the East Coast Climate Change Scenario Planning initiative, which will include: (1) A summary of the August/September 2021 kick-off webinars that were held to introduce scenario planning to stakeholders; and (2) an outline of next steps, including information about the upcoming February/March 2022 webinars that are intended to explore physical, biological, and social/economic drivers and uncertainties about how the marine ecosystem could be affected by climate change. The Council then will adjourn for the day.

*Thursday, February 3, 2022*

The Council will devote the third day of its meeting to the Groundfish Committee report, which includes three primary components. These are: (1) A presentation on and Council discussion of the final report from the 2021 series of Atlantic Cod Stock Structure Workshops, which covered both science and management issues; (2) a progress report from the Atlantic Cod Research Track Working Group, followed by Council discussion on the potential number of cod stocks that should be considered for assessment purposes and potential management units; and (3) the development of recommendations on fishing year 2022 recreational measures for Gulf of Maine cod and Gulf of Maine haddock. These recommendations will be submitted to GARFO.

The Council has scheduled a lunch break, which will be taken at a convenient time during the Groundfish Committee report. Following the conclusion of groundfish business, the Council will close out the meeting with other business.

Although non-emergency issues not contained on this agenda may come

before the Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

### Special Accommodations

This meeting is being conducted entirely by webinar. Requests for auxiliary aids should be directed to Thomas A. Nies (see **ADDRESSES**) at least 5 days prior to the meeting date.

#### North Pacific Fishery Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public meetings.

**SUMMARY:** The North Pacific Fishery Management Council (Council) and its advisory committees will meet via webconference January 31, 2022 through February 11, 2022.

**DATES:** The Council's Scientific and Statistical Committee (SSC) will begin at 8 a.m. on Monday, January 31, 2022 and continue through Friday, February 4, 2022. The Council's Advisory Panel (AP) will begin at 8 a.m. on Tuesday, February 1, 2022 and continue through Friday, February 4, 2022. The Council will begin at 8 a.m. on Monday, February 7, 2022 and continue through Friday, February 11, 2022. All times listed are Alaska Standard Time.

**ADDRESSES:** The meetings will be by webconference. Join online through the links at <https://www.npfmc.org/upcoming-council-meetings>.
