Issued in Washington, DC, on January 13, 2022.

Daniel J. Commins,
Manager, Technical Writing Section.

Petition for Exemption

Petitioner: Swift Air LLC.

Sections of 14 CFR Affected: §§ 91.9(a) and (b), 121.153(a), 121.337(b)(9)(iii).

Description of Relief Sought:
Petitioner is seeking relief from the affected sections in order to transport cargo, subject to the FAA’s conditions, on the floor of the main deck of transport category airplanes, secured to seats or seat tracks, without revenue passengers on board. Petitioner states that due to the reduction in demand for passenger service, it has the capacity to carry cargo, including critical medical cargo, in-cabin and that an exemption would allow it to support COVID-19 response efforts.

SUPPLEMENTARY INFORMATION:

Background

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the Federal Register (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the Federal Register (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

Complete Innovations’ Application for Exemption

Complete Innovations applied for an exemption from 49 CFR 393.60(e)(1) to allow its Vision 2.0 device to be mounted lower in the windshield than is currently permitted to optimize its functionality. A copy of the application is included in the docket referenced at the beginning of this notice.

In its application, Complete Innovations states that its Vision 2.0 device includes the ability to alert drivers of road signs, distracted driving events, and high-risk driving behavior. Complete Innovations notes that it piloted the devices’ functionality and found that there was no obstruction to the driver’s normal sightlines to the road ahead, highway signs and signals, or any mirrors.

The Vision 2.0 device is approximately 61 mm (2.4 inches) tall by 108 mm (4.2 inches) wide, and will be mounted in the approximate center of the windshield with the bottom edge of the housing approximately 204 mm (approximately 8 inches) below the upper edge of the area swept by the windshield wipers. The device will be mounted outside the driver’s normal sight lines to the road ahead, signs, signals, and mirrors. This location will allow for optimal functionality of the safety features supported by the Vision 2.0 device.

Without the proposed exemption, Complete Innovations states that its clients will not be able to install these devices in an optimal location to maximize their safety features. The exemption would apply to all CMV drivers of road signs, distracted driving events, and high-risk driving behavior.

FMCSA Decision

FMCSA has evaluated the Complete Innovations exemption application. The Vision 2.0 device housing is approximately 2.4 inches tall and is mounted near the top of the center of the windshield, with the bottom of the housing located approximately 8 inches below the top of the area swept by the windshield wipers. The device needs to be mounted in this location for optimal functionality, which would not be achieved by mounting it (1) higher in the windshield, and (2) within 4 inches from the top of the area swept by the windshield wipers to comply with section 393.60(e)(1)(iii)(A).
The Agency believes that allowing placement of the Vision 2.0 device lower than currently permitted by Agency regulations will likely provide a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption because (1) based on the information available, there is no indication that the Vision 2.0 device would obstruct drivers’ views of the roadway, highway signs and signals, and surrounding traffic; (2) generally, trucks and buses have an elevated seating position that greatly improves the forward visual field of the driver and any impairment of available sight lines would be minimal; and (3) the mounting location where the bottom of the Vision 2.0 device housing does not extend more than 8 inches below the upper edge of the area swept by the windshield where the bottom edge of other vehicle safety technologies mounted on the interior of the windshield has resulted in any impairment of available sight lines, will be reasonable and enforceable at roadside. In addition, the Agency believes the use of the Vision 2.0 device by fleets is likely to improve the overall level of safety for the motoring public.

This action is consistent with the following previously issued Agency actions permitting the placement of similarly-sized devices on CMVs outside the driver’s sight lines to the road and highway signs and signals: Bendix Commercial Vehicle Systems, LLC 86 FR 17877 (April 6, 2021), Netradyne, Inc. 85 FR 82575 (Dec. 18, 2020), J.J. Keller & Associates, Inc. 85 FR 75106 (November 24, 2020), Samsara Networks, Inc. 85 FR 68409 (Oct. 28, 2020), Nauto Inc. 85 FR 64220 (Oct. 9, 2020), Lytx Inc. 85 FR 30121 (May 21, 2020), and Navistar Inc. 84 FR 64952 (Nov. 25, 2019). FMCSA is unaware of any evidence showing that installation of other vehicle safety technologies mounted on the interior of the windshield has resulted in any degradation in safety.

Terms and Conditions for the Exemption

The Agency hereby grants the exemption for a 5-year period, beginning January 20, 2022 and ending January 20, 2027. During the temporary exemption period, motor carriers are allowed to operate CMVs equipped with Complete Innovations’ Vision 2.0 device in the approximate center of the top of the windshield where the bottom edge of the technology housing is approximately 8 inches below the upper edge of the area swept by the windshield wipers, outside of the driver’s and passenger’s normal sight lines to the road ahead, highway signs and signals, and all mirrors. The exemption is valid for 5 years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) Motor carriers and/or commercial motor vehicles fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

Interested parties possessing information that would demonstrate that motor carriers operating CMVs equipped with Complete Innovations’ Vision 2.0 device are not achieving the requisite statutory level of safety should immediately notify FMCSA. The Agency will evaluate any such information and, if safety is being compromised or if continuation of the exemption is not consistent with 49 U.S.C. 31136(e) and 31315(b), will take immediate steps to revoke the exemption.

Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption with respect to a firm or person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to a firm or person operating under the exemption. The Agency believes that allowing the use of the Vision 2.0 device will be reasonable and enforceable at roadside.

Meera Joshi, Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

Qualification of Drivers; Exemption Applications; Hearing

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew exemptions for 17 individuals from the hearing requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) for interstate commercial motor vehicle (CMV) drivers. The exemptions enable these CMV drivers to continue to operate CMVs in interstate commerce.

DATES: Each group of renewed exemptions were applicable on the dates stated in the discussions below and will expire on the dates provided below. Comments must be received on or before February 22, 2022.

• Mail: Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

• Hand Delivery: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal Holidays.

• Fax: (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the “Public Participation” portion of the SUPPLEMENTARY INFORMATION section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, fmcsamedical@dot.gov, FMCSA, DOT, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., ET, Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket,
