

Total estimated cost: \$49,000,000 (per year), which includes \$20,400,000 in annualized capital/startup and/or operation & maintenance costs.

**Changes in the estimates:** There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This situation is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

### FOR FURTHER INFORMATION CONTACT:

General questions about the Fleet Access system should be made in writing to James Cunningham, (202) 564-7212, [Cunningham.James@epa.gov](mailto:Cunningham.James@epa.gov); Jackie Brown, (202) 564-0313, [Brown.Jackie@epa.gov](mailto:Brown.Jackie@epa.gov); and Jonathan Barnes, (202) 564-1950, [Barnes.Jonathan@epa.gov](mailto:Barnes.Jonathan@epa.gov).

**SUPPLEMENTARY INFORMATION:** EPA implemented Fleet Access (FA) in response to General Services Administration (GSA) Bulletin FMR B-15, which includes the requirement that each federal agency store and maintain vehicle asset data collected in a Fleet Management Information System (FMIS). FA stores vehicle-level data such as license plate, vehicle identification number (VIN), make, model, acquisition value/lease rates, and designations regarding alternative fuel, energy, and sustainability mandates. FA is also used to produce the yearly FAST Report. This end-of-year report is submitted to the federal agency that maintains the Federal Automotive Statistical Tool (FAST). The FAST Report summarizes each vehicle's annual data with respect to fuel, mileage, maintenance, acquisition, and disposal.

EPA is modifying FA to add a routine use that is related to FAST reporting, and to move FA information technology

infrastructure from a vendor-hosted system to an EPA-hosted system because the vendor for Fleet Access, AgileFleet, is not FedRAMP certified. In addition, moving FA to an EPA-hosted system will ensure that NIST-required security controls for a system categorized as low are in place, operating as expected, and producing the desired results. See National Institute of Standards and Technology (NIST) Special Publication 800–53, “Security and Privacy Controls for Information Systems and Organizations,” Revision 5. In addition, the vendor-hosted infrastructure is not FedRAMP compliant.

FA will continue to serve as a comprehensive standardized vehicle reservation system used by agency staff needing to reserve and utilize fleet vehicles for official agency business. FA will still require system users to register personal business information to reserve agency fleet assets. Other components of FA, including operational, functional, and day-to-day management will not change except for planned upgrades.

**SYSTEM NAME AND NUMBER:**

Fleet Access, EPA–85.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

FA is managed by the Office of Mission Support, Office of Administration, Environmental Protection Agency, 1301 Constitution Ave. NW, Washington, DC 20460. Electronically stored information is hosted at the EPA National Computer Center (NCC), 109 TW Alexander Drive, Research Triangle Park, Durham, NC 27711.

**SYSTEM MANAGER(S):**

James Cunningham, IT Project Manager, Office of Mission Support, Office of Administration, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460, Mail code 3101M, *Cunningham.James@epa.gov*, 202–564–7212.

Jonathan Barnes, Fleet Project Manager, Office of Mission Support, Office of Administration, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460, Mail code 3101M, *Barnes.Jonathan@epa.gov*, 202–564–1950.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

40 U.S.C. 17502 and 17503—Federal Motor Vehicle Expenditure Control; and General Services Administration (GSA) FMR B–15.

**PURPOSE(S) OF THE SYSTEM:**

FA is a commercial off-the-shelf software solution installed on EPA systems and operated by EPA personnel and contractors. EPA uses FA to manage the Agency’s fleet resources, and specifically to store and maintain vehicle asset data collected in the Agency’s Fleet Management Information System (FMIS). The FA system serves two primary purposes: First, to store vehicle level data such as license plate, VIN, make, model, acquisition value/lease rates, designations regarding alternative fuel, energy and sustainability mandates, all of which are used to produce the FAST Report. This end-of-year report is submitted jointly to the Department of Energy (DOE), the GSA, and the Idaho National Lab (INL). The FAST Report summarizes each vehicle’s annual data with respect to fuel, mileage, maintenance, acquisition, and disposal. Second, FA is used by EPA’s Fleet program management, regional and local staff, and support contractors as a standardized vehicle reservation system to reserve and utilize fleet vehicles for official agency business.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

The categories of individuals covered by this system include EPA employees and EPA contractors.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Personally Identifiable Information (PII) collected includes: Last Name, First Name, Work Phone Number, Work Email Address, Driver’s License Expiration Date, and Profile Picture.

**RECORD SOURCE CATEGORIES:**

FA is a data management system that allows authorized EPA employees and contractors to store/maintain vehicle asset data and reserve agency vehicles across various programs/regions. PII information is collected directly from the user via an online registration form.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:**

The routine uses below are both related to and compatible with the original purpose for which the information was collected. The following general routine uses apply to this system (86FR 62527): A, B, C, D, E, F, G, H, I, J, K, L, and M.

The following additional routine use applies to this system:

1. Per 40 CFR 102–34.335, information may be disclosed to the federal agency that maintains the Federal Automotive Statistical Tool (FAST) in connection with Federal Fleet

Reporting, requirements and other required reporting.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

The information collected within FA is maintained and stored in a database hosted by the EPA National Computer Center (NCC) located at 109 T.W. Alexander Drive, Research Triangle Park, NC 27711, per EPA Records Schedule 0090—Administrative Support Databases and EPA Records Schedule 1009—Motor Vehicles and Personal Property.

**POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:**

Records for FA are retrievable by User ID and last name.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

FA complies with EPA Records Schedule 0090—Administrative Support Databases and EPA Records Schedule 1009—Motor Vehicles and Personal Property. Personnel information is retained for as long as the user or administrator determines necessary; generally, as long as the individual is employed by EPA and requires vehicle reservation access. If a person no longer needs to reserve a vehicle for agency business, their user information is deleted permanently, in accordance with EPA Records Schedule 1009. Vehicle data are stored for a minimum of 3 years.

**ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

Security controls used to protect personal sensitive data in FA are commensurate with those required for an information system rated low for confidentiality, integrity, and availability, as prescribed in NIST Special Publication, 800–53, “Security and Privacy Controls for Information Systems and Organizations,” Revision 5.

1. *Administrative Safeguards:* Personnel are required to complete annual agency Information Security and Privacy training. Personnel are instructed to lock their computers when they leave their desks.

2. *Technical Safeguards:* Access to FA is restricted to authorized users via login by username and password. All application passwords are encrypted in the database. User passwords cannot be seen by the administrators. The application is web-based, and user sessions are encrypted.

3. *Physical Safeguards:* Equipment used for hosting FA is in a secure facility. Access to the secure facility is logged and restricted to employees displaying valid identification badges.

Power to the facility is insured by both battery backup and diesel generator. Fire suppression systems are in place. The facility is staffed 24 hours a day, seven days a week.

**RECORD ACCESS PROCEDURES:**

All requests for access to personal records should cite the Privacy Act of 1974 and reference the type of request being made (*i.e.*, access). Requests must include: (1) The name and signature of the individual making the request; (2) the name of the Privacy Act system of records to which the request relates; (3) a statement whether a personal inspection of the records or a copy of them by mail is desired; and (4) proof of identity (*e.g.*, driver's license, military identification card, employee badge or identification card). Additional identity verification procedures may be required, as warranted. Requests must meet the requirements of EPA regulations that implement the Privacy Act of 1974, at 40 CFR part 16. **Abstract:** Owners and operators of kraft pulp mills are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the applicable specific standards in 40 CFR part 60, subpart BB. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of excess emissions, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

**Form Numbers:** None.

**Respondents/affected entities:** Kraft pulp mills.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subpart BB).

**Estimated number of respondents:** 97 (total).

**Frequency of response:** Semiannually.

**Total estimated burden:** 13,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$5,650,000 (per year), which includes \$4,010,000 in annualized capital/startup and/or operation & maintenance costs.

**Changes in the Estimates:** There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This situation is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there is no significant industry growth, there are no changes in the capital/startup costs. There is an
