Needs and Uses: On May 9, 2019, the Commission adopted a Report and Order, Amendment of Part 74 of the Commission's Rules Regarding FM Translator Interference, FCC 19-40, MB Docket No. 18-119 (FM Translator Interference Report and Order), adopting proposals to streamline the rules relating to interference caused by FM translators and to expedite the translator interference complaint resolution process. These measures are designed to limit or avoid protracted and contentious interference disputes, provide translator licensees additional investment certainty and flexibility to remediate interference, and provide affected stations earlier and expedited resolution of interference complaints. Under this new information collection, the following information collection requirements require OMB approval.

Specifically, the FM Translator Interference Report and Order pertains to this new Information Collection as it codifies the translator interference listener complaint requirements under section 74.1201(k) and sections 74.1203(a)(3) (actual interference) and 74.1204(f) (predicted interference) of the rules. The Commission defines the requirements for a listener complaint submitted with a translator interference claim in section 74.1201(k) as a complaint that is signed and dated by the listener and contains the following information: (1) The complainant's full name, address, and phone number; (2) a clear, concise, and accurate description of the location where the interference is alleged to occur; (3) a statement that the complainant listens to the desired station using an over-the-air signal at least twice a month, to demonstrate the complainant is a regular listener; and (4) a statement that the complainant has no legal, employment, financial, or familial affiliation or relationship with the desired station, to demonstrate the complainant is disinterested. Electronic signatures are acceptable for this purpose.

The FM Translator Interference Report and Order establishes a minimum number of listener complaints ranging from 6 to 25 depending on the population served within the protected contour of the complaining station. The Commission explains that a proportionate approach, which was supported by multiple commenters, would be fairer and more effective than a single minimum number for all
