

Request for Public Comments

We request comment on our analyses, the proposed authorization, and any other aspect of this notice of proposed IHA for the proposed marine site characterization surveys. We also request at this time comment on the potential Renewal of this proposed IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform decisions on the request for this IHA or a subsequent Renewal IHA.

On a case-by-case basis, NMFS may issue a one-time, one-year Renewal IHA following notice to the public providing an additional 15 days for public comments when (1) up to another year of identical or nearly identical, or nearly identical, activities as described in the Description of Proposed Activity section of this notice is planned or (2) the activities as described in the Description of Proposed Activity section of this notice would not be completed by the time the IHA expires and a Renewal would allow for completion of the activities beyond that described in the *Dates and Duration* section of this notice, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to the needed Renewal IHA effective date (recognizing that the Renewal IHA expiration date cannot extend beyond one year from expiration of the initial IHA);
- The request for renewal must include the following:

(1) An explanation that the activities to be conducted under the requested Renewal IHA are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (e.g., reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take); and

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

Upon review of the request for Renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

Dated: February 2, 2022.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold a public meeting of its Mackerel, Squid, and Butterfish Advisory Panel. See **SUPPLEMENTARY INFORMATION** for agenda details.

DATES: The meeting will be held on Wednesday, February 23, 2022, from 9 a.m. until 12 p.m.

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the calendar prior to the meeting at www.mafmc.org.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Council's Mackerel, Squid, and Butterfish Advisory Panel will meet via webinar. The purpose of this meeting is for the Advisory Panel to develop fishery performance reports (FPRs) for *Illex* squid and Atlantic mackerel. The intent of the FPR is to facilitate structured input from the Advisory Panel on recent fishery performance. The FPR will be considered as 2022 *Illex* specifications are reviewed and as mackerel rebuilding revisions are considered.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 3, 2022.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration**

[RTID 0648–XB786]

Marine Mammals; File No. 26345

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Sealight Pictures, 51A Seaview St, Balgowlah, Sydney NSW 2093 Australia (Responsible Party: Adam Geiger), has applied in due form for a permit to conduct commercial photography on pinnipeds.

DATES: Written, telefaxed, or email comments must be received on or before March 10, 2022.

ADDRESSES: These documents are available upon written request via email to NMFS.Pr1Comments@noaa.gov.

Written comments on this application should be submitted via email to NMFS.Pr1Comments@noaa.gov. Please include File No. 26345 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to NMFS.Pr1Comments@noaa.gov. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Sara Young or Carrie Hubbard, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to film pinnipeds on Monomoy Island and the Isle of Shoals for a documentary film showcasing the Cape Cod, Massachusetts region. The applicant proposes to film up to 30 gray seals (*Halichoerus grypus*) and 20 harbor seals (*Phoca vitulina*) annually. Seals may be filmed from land, a vessel, an

unmanned aircraft system, and underwater via divers. The permit would be valid for two years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: February 2, 2022.

Julia M. Harrison,

*Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Licensing of Private Remote-Sensing Space Systems

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before April 11, 2022.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at NOAA.PRA@noaa.gov. Please reference OMB Control Number 0648-0174 in the subject line of your comments. Do not submit Confidential

Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or specific questions related to collection activities should be directed to Tahara Dawkins, Director, Commercial Remote Sensing Regulatory Affairs, 1335 East-West Highway, G101, Silver Spring, Maryland 20910; 301-713-3385; tahara.dawkins@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for revision and extension to an approved information collection.

The Department of Commerce (DOC), through the National Oceanic and Atmospheric Administration (NOAA) Commercial Remote Sensing Regulatory Affairs (CRSRA), has the authority to regulate private space-based remote sensing under the Land Remote Sensing Policy Act of 1992, 51 U.S.C. 60101 *et seq.* (the Act) and regulations at 15 CFR part 960. The regulations facilitate the development of the U.S. private remote sensing industry and thus promote the collection and widespread availability of remote sensing data, while preserving essential U.S. national security interests and observing international obligations.

Applications are made in response to the requirements in the Act, as amended, and no collection forms are used. The application information received is used to determine if the applicant meets the legal criteria for issuance of a license to operate a private remote sensing space system, *i.e.*, the proposed system will be operated in accordance with the Act, U.S. national security concerns and international obligations. Application information includes information about the applicant (such as corporate information), the launch dates of any components going to space, and technical specifications of all components (especially the components in space that are capable of collecting imagery data).

If a licensee wishes to modify its license, either to reflect changes in its business practices or technical changes to its system, or to request different license conditions, it may submit such a request to CRSRA and explain why the change is sought. CRSRA need this information to be able to keep licenses accurate and to respond to the regulated community's needs.

Licensees are required to notify CRSRA when a spacecraft launches or deploys; upon disposal of an on-orbit component of the licensed system; upon detection of an anomaly; and upon the

licensee's financial insolvency or dissolution. This information is critical to fulfilling one of the United States' key international obligations, which is to authorize and continually supervise U.S. nationals' activities in space. CRSRA, therefore, must be notified when spacecraft are deployed and disposed of so that CRSRA can supervise the space activities of U.S. nationals. Similarly, anomalies may indicate loss of control of a spacecraft, so CRSRA must monitor any anomalies to meaningfully supervise the activities of U.S. nationals in space. Finally, the financial insolvency or dissolution of a licensee may indicate that a change in control of the spacecraft will follow, because an insolvent licensee may go through a bankruptcy process that might put the licensed system's ownership in question. It is critical that CRSRA be able to intervene as early as possible in this process so that a sensitive system does not pass into the ownership of an entity who might jeopardize national security or international obligations.

CRSRA will require licensees to submit an annual compliance certification, which requires the licensee to verify that all facts in the license remain true. Facts that must be verified in this certification include the technical specifications of the system and other foundational facts that CRSRA relies upon in reviewing license applications. This information is critical to ensuring that only those entities who are legally fit to obtain a license do so.

NOAA is proposing to add two additional forms to this information collection. The optional information is being collected to reduce the total paperwork required to support regulation of the private space-based remote sensing industry, which involves (1) determining whether an applicant is required to apply for a license and (2) comparing the capabilities of remote sensing systems to other foreign and domestic remote sensing systems.

The optional Initial Contact Form (ICF) information includes contact information and general remote sensing system information. The ICF may be submitted electronically through the NOAA website prior to the submission of a full application. The ICF information received is used to determine if the applicant is required to submit a full application for the issuance of a license to operate a private remote sensing space system *i.e.*, the proposed system falls under the authority defined in the Act and the regulations. If NOAA determines after reviewing the ICF that an application is not required, the potential applicant will save 40-50 hours of paperwork by
