Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP), for Nine Metal Fabrication and Finishing Area Sources (40 CFR part 63, subpart XXXXXX) were proposed on April 3, 2008, and promulgated on July 23, 2008. These regulations apply to owners or operators of any existing or new metal fabrication and finishing facility that is an area source of hazardous air pollutant (HAP) emissions and either uses or has the potential to emit metal fabrication or finishing metal HAP (MFHAP), defined to be the compounds of cadmium, chromium, lead, manganese, and nickel, or any of these metals in the elemental form with the exception of lead. The affected sources consist of several types of metal fabrication and finishing processes, including any abrasive blasting, metalworking (which includes machining, and dry grinding and dry polishing with machines), spray painting, and welding operations. New facilities include those that either commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart XXXXXX.

Form Numbers: None.*Respondents/affected entities:*

Owners or operators of existing metal fabrication and finishing area sources.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXXXXX).*Estimated number of respondents:* 5,800 (total).*Frequency of response:* Semiannually, annually.

Total estimated burden: 39,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,620,000 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed significantly over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no significant changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Summary of the Hearing Designation Order

1. A broadcast licensee's authorization to use radio spectrum in the public interest carries with it the obligation that the station must serve its community, providing programming responsive to local needs and interests. Broadcast licensees also are required to operate in compliance with the Communications Act of 1934, as amended (Act) and the Commission's rules (Rules). These requirements include the obligation to transmit potentially lifesaving national level Emergency Alert System (EAS) messages in times of emergency and to engage in periodic tests to ensure that their stations are equipped to do so.

2. The basic duty of broadcast licensees to serve their communities is reflected in the license renewal provisions of the Act. In 1996, Congress revised the Commission's license renewal process and the renewal standards for broadcast stations by adopting section 309(k) of the Act, 47
