This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Stakeholder Scheduling Application.

OMB Number: 1651-NEW.

Current Actions: New collection of information.

Type of Review: This is a new information collection.

Affected Public: Individuals and Businesses.

Abstract: The Stakeholder Scheduling capability is a mobile application within the “CBP One™” app that will standardize and automate the manual process of brokers and travelers making and updating appointments with CBP for various services. Currently, Customs and Border Protection Officers (CBPOs) and CBP Agriculture Specialists (CBPAS) spend significant time exchanging phone calls, faxes, and emails from stakeholders to schedule inspection services. This includes inspections of perishable cargo, non-perishable cargo that have been identified for mandatory examinations, and commercial vessel and commercial or private air arrivals. Based on security vetting, CBP notifies stakeholders that certain cargo requires a scan by CBP Non-Intrusive Inspection technology prior to release. Stakeholders then schedule with CBP a time and location for the scans to be conducted. Pilots and other stakeholders contact CBP to schedule a time and location for the inspections of commercial and private carriers (including occupants) or commercial vessels upon arrival from foreign countries. Additionally, travelers who carry-on sensitive agriculture via air carrier are required to be inspected by CBP and they must notify CBP prior to their arrival into the United States.

The following legal authorities permit CBP’s collection of border crossing information: Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), Pub. L. 108-458, 118 Stat. 3638; Immigration and Nationality Act, as codified at 8 U.S.C. 1185 and 1354; Aviation and Transportation Security Act of 2001 (ATSA); Enhanced Border Security and Visa Reform Act of 2002; and Tariff Act of 1930 as amended, 19

U.S.C. 66, 1433, 1459, 1485, 1624, and 2071.

Overview of This Information Collection

Title: Electronic Visa Update System (EVUS).

OMB Number: 1651-0139.

Form Number: N/A.

Current Actions: Revision of an existing information collection with no change in burden.

Type of Review: Revision.

Affected Public: Individuals.

Abstract: DHS developed the Electronic Visa Update System (EVUS)

to assure robust screening of foreign nationals prior to travel to the United States. EVUS provides for robust traveler screening and verification to better identify foreign nationals who may be inadmissible to the United States. This results in enhanced national security, improved public safety, and a reduced number of delays upon arrival in the United States, all while facilitating legitimate travel.

Initially, the program is limited to nonimmigrant aliens presenting passports issued by the People's Republic of China (PRC) containing unrestricted, maximum validity B-1 (business visitor), B-2 (visitor for pleasure), or combination B-1/B-2 visas, generally valid for 10 years. PRC membership in EVUS became possible on November 12, 2014, when, in a reciprocal agreement, the U.S. Department of State expanded the validity of U.S. visitor visas issued to PRC nationals from one to ten years.

To ensure compliance with the Visa Waiver Program Improvement and Terrorist Travel Prevention Act of 2015, Pub. L. 114-113, 129 Stat. 2242, CBP will continuously update the application question with the list of nationals ineligible to travel to the United States under the VWP, as designated in accordance with section 217(a)(12) of the Immigration and Nationality Act, as amended (8 U.S.C. 1187(a)(12)).

Recent Changes: On May 31, 2019, the Department of State updated its immigrant and nonimmigrant visa application forms to request additional information, specifically social media identifiers, from most U.S. visa applicants worldwide. As a result, DHS is changing the EVUS application social media data field from optional to mandatory. National security is the top priority when adjudicating EVUS applications, and every prospective traveler to the United States undergoes extensive security screening. CBP is continually working to find mechanisms to improve our screening processes to protect U.S. visitors while supporting legitimate travel to the United States. DHS already requests information on contacts, travel history, and family members from all EVUS applicants. Changing the social media field to mandatory in the EVUS application will enhance our vetting capabilities and assist in confirming applicants' identities. While the field is mandatory, applicants will still have the ability to select "none".
