

2. Information is requested on the criteria that should be used to evaluate scientific integrity policies: Content, implementation, outcomes, and impacts in Federal agencies and other components of the Executive Branch. Consider methods and metrics for evaluating elements such as, but not limited to: Policy provisions, practices, capacity, and actions so that determinations can be made on their efficacy to achieve desired outcomes and impacts.

3. Information is requested on how to ensure that scientific integrity evaluation findings, and other findings that evolve over time, such as findings on the emergent issues identified above, lead to iterative improvement of Federal scientific integrity policy and practices. Consider information covering, but not limited to: Types and frequency of evaluation of agency scientific integrity policies and practices; steps that OSTP, Federal agencies, and other components of the Executive Branch should take to ensure regular comprehensive evaluation and continuous improvement of scientific integrity policies and practices; and other mechanisms or process elements that should be included in the framework to ensure effective iterative improvement of Federal scientific integrity policy and practices.

4. Information is requested on how to ensure the long-term viability and implementation of Federal scientific integrity policies, practices, and culture through future Administrations. Consider information on, but not limited to: Ways to ensure Federal scientific integrity is robust through changes in government leadership, funding, and cultural shifts; how to institutionalize policies and practices that ensure the integrity of science, build and sustain a culture of scientific integrity, and encourage transparency; and how to provide accountability, such as through procedures to identify, address, and provide appropriate and meaningful consequences for instances when scientific integrity policies have been violated.
