It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the

following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Title of Collection: School Pulse Panel Data Collection.

OMB Control Number: 1850-NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 17,280.

Total Estimated Number of Annual Burden Hours: 4,752.

Abstract: The School Pulse Panel (SPP) is a new data collection originally designed to collect voluntary responses from a nationally representative sample of public schools to better understand how schools, students, and educators are responding to the ongoing stressors of the coronavirus pandemic. Due to the immediate need to collect information from schools during the pandemic to satisfy the requirement of Executive Order 14000, an emergency clearance (OMB #1850-0963) was issued to develop and field the first several monthly collections of the SPP. This submission is seeking a request for a full review of the SPP data collection under the traditional clearance review process.

The School Pulse Panel is conducted by the National Center for Education Statistics (NCES), part of the Institute of Education Sciences (IES), within the United States Department of Education. The purpose of the study is to collect extensive data on issues concerning the impact of the COVID-19 pandemic on students and staff in U.S. public primary, middle, high, and combined-grade schools. The survey asks school staff about a wide range of topics, including but not limited to instructional mode offered; enrollment counts of subgroups of students using various instructional modes; strategies to address pandemic-related learning needs; safe and healthy school mitigation strategies; mental health services; use of technology; information on staffing, nutrition services, principal/parental/student/staff concerns, absenteeism, and overall principal experiences. It is planned that some new content will be rotated in (and

some rotated out) monthly. This package includes items that were fielded as part of the January, February, and March collections, as well as proposed new content to be collected in April, May, and June. Subsequent new content area additions (estimated to take place on a quarterly basis) will take place as revisions with 30-day public comment periods for each subsequent quarterly collection and may be followed by change requests to further refine items for each month.

The administration of the School Pulse Panel study is in direct response to President Biden's Executive Order 14000: Supporting the Reopening and Continuing Operation of Schools and Early Childhood Education Providers. It is one of the nation's few sources of reliable data on a wealth of information focused on school reopening efforts, virus spread mitigation strategies, services offered for students and staff, and technology use, as reported by school principals and other staff in U.S. public schools. About 2,400 (1,200 in an initial sample and 1,200 in a reserve sample) public elementary, middle, high, and combined-grade schools have been initially selected to participate in a panel where school staff will be asked to provide requested data monthly during the 2021-22 school years. This approach provides the ability to collect detailed information on various topics while also assessing changes in reopening efforts over time. Given the high demand for data collection during this time, the content of the survey will likely change monthly.

Dated: February 28, 2022.

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

Finally, UOCAVA mandates that FVAP work with the EAC and chief state election officials to develop standards for reporting UOCAVA voting information (52 U.S.C. 20302) and that FVAP will store the reported data and present the findings within the congressionally-mandated report to the President and Congress. Additionally, UOCAVA requires that "not later than 90 days after the date of each regularly scheduled general election for Federal office, each state and unit of local government which administered the election shall (through the state, in the case of a unit of local government) submit a report to the EAC on the combined number of absentee ballots transmitted to absent uniformed services voters and overseas voters for the election and the combined number of such ballots which were returned by such voters and cast in the election, and shall make such a report available to the general public." In order to fulfill the above requirements, the EAC is seeking information relating to the period from the Federal general election day 2020 +1 through the November 2022 Federal general election. The EAC will provide the data regarding UOCAVA voting to FVAP after data collection is completed. This data sharing reduces burden on local election offices because FVAP does not have to conduct its own data collection to meet its reporting requirements.
