DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PF22-3-000, Docket No. PF22-4-000]

Columbia Gas Transmission, LLC; Transcontinental Gas Pipe Line Company, LLC Supplemental Notice of Scoping Period Requesting Comments on Environmental Issues for the Planned Virginia Reliability Project and Commonwealth Energy Connector Project, and Notice of Public Scoping Session

On February 22, 2022 the staff of the Office of Energy Projects issued *the Notice of Scoping Period Requesting Comments on Environmental Issues for the Planned Virginia Reliability Project and Commonwealth Energy Connector Project, and Notice of Public Scoping Session*. It has come to our attention that addressees on our intended mailing list may not have received the correct notice. As such, we are issuing a Supplemental Notice of Scoping Period.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental impacts of the Virginia Reliability Project and Commonwealth Energy Connector Project involving construction and operation of facilities by Columbia Gas Transmission, LLC (Columbia) and Transcontinental Gas Pipe Line Company, LLC (Transco), respectively. Columbia's project would be located in Greensville, Prince George, Sussex, Surry, Southampton, and Isle of Wight Counties, Virginia and in the cities of Suffolk and Chesapeake, Virginia. Transco's project would be located in Mecklenburg, Brunswick, and Greensville Counties, Virginia. Because of planned operational connections between the Virginia Reliability Project and the Commonwealth Energy Connector Project, the Commission will prepare a single environmental document as part of the National Environmental Policy Act (NEPA) review process. The Commission will use this environmental document in its decision-making process to determine whether the projects are in the public convenience and necessity.

This notice announces the extension of the scoping process the Commission will use to gather input from the public and interested agencies regarding the projects. As part of the NEPA review process, the Commission takes into account concerns the public may have about proposals and the environmental

impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on April 6, 2022. Comments may be submitted in written or oral form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written or oral comments during the preparation of the environmental document.

If you submitted comments on either of these projects to the Commission before the opening of the dockets on December 1, 2021, you will need to file those comments in Docket Nos. PF22-3-000 (Virginia Reliability Project) or PF22-4-000 (Commonwealth Energy Connector Project) to ensure they are considered.

This notice is being sent to the Commission's current environmental mailing list for these projects. State and local government representatives should notify their constituents of these planned projects and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a representative from Columbia or Transco may contact you about the acquisition of an easement to construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could
