BILLING CODE 4510–24–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2021–022]

Privacy Act of 1974; System of Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice revising a system of records.

SUMMARY: We propose to revise a system of records in our existing inventory of systems subject to the Privacy Act of 1974. The system is NARA 1, Researcher Application Files. We are adding a new purpose/routine use to notify researchers who use our facilities if they might have been exposed to COVID–19 while at our facility, to allow

for similar notifications in the event of future public health emergencies, and to allow notification of health departments for collaborative efforts to address exposure and meet reporting requirements. We are also updating the SORN to reorganize the SORN into the current required format. In this notice, we publish the system of records notice in full for public notice and comment.

DATES: Submit comments on this system of records by April 15, 2022. This revised systems of records, NARA 1, is effective on April 25, 2022 unless we receive comments that necessitate revising the SORN.

ADDRESSES: You may submit comments, identified by “SORN NARA 1” by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- Due to COVID-19 restrictions, we do not have staff at the building to receive mail, so we are temporarily suspending the mailing option. If you are not able to submit comments using the eRulemaking portal and need to make other arrangements, please email us at regulation_comments@nara.gov and we will work with you on an alternative.

Instructions: All submissions must include SORN NARA 1 so we can identify what the comment is responding to. We may publish any comments we receive without changes, including any personal information you include.

FOR FURTHER INFORMATION CONTACT: Kimberly Keravuori, Regulatory and External Policy Program Manager, by email at regulation_comments@nara.gov or by phone at 301.837.3151.

SUPPLEMENTARY INFORMATION: Our Researcher Application Files system of records (NARA 1) includes personal and contact information we collect from members of the public who use our facilities for research purposes. Due to the COVID-19 pandemic and requests to report and track cases of confirmed coronavirus infection, we are revising this system of records in order to add a new purpose/routine use. In addition to other purposes previously identified, we will use the researcher contact information to contact the researcher if they were in one of our research facilities on a given day and we later receive notice of a confirmed case of the coronavirus in another person who was also in the facility that day, to notify researchers of other local or facility-specific health information as appropriate, and to provide researchers with updates related to researcher services.

We do not provide personal or health information about another person in these notifications. In the case of COVID-19 notifications, we just notify visitors that there was a confirmed case in that facility on the same day they were there, so that the recipient can take appropriate actions to determine whether they have been infected as well, identify where and when, minimize exposure to others, and receive treatment as needed. In anticipation of possible future needs for similar notifications in other crisis situations, we have written the new purpose to not be COVID-19-specific and to allow additional kinds of researcher services updates, and we have also added a new routine use for reporting exposures to health departments and officials as required, as well as to facilitate efforts to address exposure.

The Privacy Act of 1974, as amended (5 U.S.C. 552a) (“Privacy Act”), provides certain safeguards for an individual against an invasion of personal privacy. It requires Federal agencies that disseminate any record of personally identifiable information to do so in a manner that assures the action is for a necessary and lawful purpose, the information is current and accurate for its intended use, and the agency provides adequate safeguards to prevent misuse of such information. NARA intends to follow these principles when transferring information to another agency or individual as a “routine use,” including assuring that the information is relevant for the purposes for which it is transferred.

David S. Ferriero,
Archivist of the United States.
