All these standard routine uses apply to Risk Analysis and Management Records, State-78.

A description of standard Department of State policies concerning storage of electronic records is found at <https://fam.state.gov/FAM/05FAM/05FAM0440.html>. Annual refresher training is mandatory. In addition, all Department OpenNet network users are required to take, on a biennial basis, the Foreign Service Institute distance learning course instructing employees on privacy and security requirements, including the rules of behavior for handling PII and the potential consequences if it is handled improperly. Before being granted access to Risk Analysis and Management Records, a user must first be granted access to the Department of State computer network.

Department of State employees and contractors may remotely access this system of records using non-Department-owned information technology. Such access is subject to approval by the Department's mobile and remote access program and is limited to information maintained in unclassified information systems. Remote access to the Department's information systems is configured in compliance with OMB Circular A-130 multifactor authentication requirements and includes a time-out function.

All Department of State employees and contractors with authorized access to records maintained in this system of records have undergone a thorough background security investigation. Access to the Department of State, its annexes and posts abroad is controlled by security guards and admission is limited to those individuals possessing

a valid identification card or individuals under proper escort. Access to computerized files is password-protected and under the direct supervision of the system manager. The system manager has the capability of printing audit trails of access from the computer media, thereby permitting regular and ad hoc monitoring of computer usage. When it is determined that a user no longer needs access, the user account is disabled.

II. Background

On February 3, 2022, FMCSA published a notice announcing receipt of applications from 12 individuals requesting an exemption from vision requirement in 49 CFR 391.41(b)(10) and requested comments from the public (87 FR 6229). The public comment period ended on March 7, 2022, and two comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(10).

The physical qualification standard for drivers regarding vision found in § 391.41(b)(10) states that a person is physically qualified to drive a CMV if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40
