

these two States was 530 hours and the associated labor cost was \$17,400. Using these estimates, NHTSA calculates an average of 265 hours per State, with an annual labor cost of \$8,700. There are 51 respondents per year (the 50 States and the District of Columbia). Therefore, total annual burden hours for maintenance and infrastructure is estimated to be 13,515 hours (51 respondents × 265 hours). The total annual maintenance and infrastructure labor cost per year is estimated to be \$443,700 (\$8,700 × 51).

To ensure that the information contained in the NDR is accurate, States sometimes submit a “clean file” which is a confirmation of all drivers of that State who should be listed in the NDR file. NHTSA estimates that an average of 28 clean files will be submitted annually by States. States use SFTP to submit this information, and NHTSA estimates it takes an IT specialist 8 hours to prepare and run the data. NHTSA estimates the cost for IT personnel burden hours using the Bureau of Labor Statistics’ mean wage estimate for Software and Web

Developers, Programmers, and Testers (Standard Occupational Classification #15–1250, May 2020) of \$52.86.¹ The Bureau of Labor Statistics estimates that for State and local government workers, wages represent 61.9% of total compensation.² Therefore, the total hourly cost associated with the IT burden hours is estimated to be \$85.40 (\$52.86 ÷ 61.9%) per hour. The total annual burden hours to prepare and submit clean files is 224 hours (8 × 28). The total annual clean file labor cost per year is estimated to be \$19,130 (\$85.40 × 224).

General Description of Reports

The Market Risk Regulatory Report for Institutions Subject to the Market Risk Capital Rule (FFIEC 102) is filed quarterly with the agencies and provides information for market risk institutions, defined for this purpose as those institutions that are subject to the market risk capital rule as incorporated into Subpart F of the agencies' regulatory capital rules¹ (market risk

Each market risk institution is required to file the FFIEC 102 for the agencies' use in assessing the reasonableness and accuracy of the institution's calculation of its minimum capital requirements under the market risk capital rule and in evaluating the institution's capital in relation to its risks. Additionally, the market risk information collected in the FFIEC 102:

(a) Permits the agencies to monitor the market risk profile of, and evaluate the impact and competitive implications of, the market risk capital rule on individual market risk institutions and the industry as a whole; (b) provides the most current statistical data available to identify areas of market risk on which to focus for onsite and offsite examinations; (c) allows the agencies to assess and monitor the levels and components of each reporting institution's risk-based capital requirements for market risk and the adequacy of the institution's capital under the market risk capital rule; and (d) assists market risk institutions in
