

of Title III funds received to determine the amount of Title III funds that must be returned to the United States Treasury under section 304(b) of the Act. The Department of the Interior and the Bureau of Land Management are also authorized to participate in this information collection because the Bureau of Land Management administers Federal lands in western Oregon covered by the Act. The information will be reviewed by the appropriate Secretary, or designee, to verify that participating counties have certified that funds were expended as authorized in the Act and to identify amounts not obligated. The information also may be used by the Department of the Interior because it is relevant to its Payments in Lieu of Taxes (PILT) program.

The information will be collected in the form of conventional correspondence such as a letter and, at the respondent's option, attached tables or similar graphic display. The Forest Service provides an optional form for the convenience of respondents. At the respondent's discretion, the information may be submitted by hard copy and/or electronically scanned and included as an attachment to electronic mail. This becomes record keeping for audit purposes.

The Secure Rural Schools and Community Self-Determination Act of 2000 (the Act) (16 U.S.C. 7101 *et seq.*), as reauthorized in Public Law 117-58, requests Resource Advisor Committees (RAC's) who receive funds under Title II of the Act to submit proposal to the appropriate RAC Forest Service Designated Federal Officer (DFOs) that the funds are being requested for that specific project. Counties typically receive 20% or less of Secure Rural Schools funds under Title II, which are used by willing Federal agencies, State and local governments, private and nonprofit entities, and landowners for protection, restoration and enhancement of fish and wildlife habitat, and other natural resource objectives on Federal land and on non-Federal land where projects would benefit these resources on Federal land.

Rather than being distributed to the State, Title II funds are retained by the Forest Service and are allocated to specific projects that have been reviewed and recommended by a local Resource Advisory Committee.

Projects are considered for Title II funding if they make additional investments in, and create employment opportunities through:

Improvement of existing infrastructure maintenance.

Implementation of stewardship objectives that enhance forest ecosystems;

Restoration and improvement of land health and water quality.

Projects must comply with all applicable Federal laws and regulations.

Projects must be consistent with the applicable resource management plan and with any watershed or subsequent plan developed pursuant to the resource management plan. The funds may be used for projects that have broad-based support and with objectives that include: Road, trail, and infrastructure maintenance or obliteration; soil productivity improvement; forest ecosystem health improvements; watershed restoration and maintenance; wildlife and fish habitat restoration, maintenance, and improvement; noxious and exotic weeds control; and native species re-establishment.

At least 50% of all project funds are to be used for projects that are primarily dedicated to road maintenance, decommissioning, or obliteration; or to restoration of streams and watersheds.
