

#### D. Special Circumstances

The licensee has asserted that continuing to maintain DAFAS in the plant licensing basis represents an undue hardship in accordance with 10 CFR 50.12(a)(2)(iii) due to its obsolescence. DAFAS is no longer supported by the vendor and spare parts are not readily available for the system. Significant engineering resources are required to reverse-engineer parts and frequent fiber optic communications problems often affect DAFAS system reliability. DAFAS operates on a vendor-supplied proprietary platform that is unique to Palo Verde. The vendor is no longer in business and Palo Verde can no longer obtain the Modicon programmable logic controllers, displays and associated equipment to maintain DAFAS. Since these replacement parts can no longer be obtained through generally available sources, the licensee has established that maintaining or replacing DAFAS in the given circumstances is a hardship. Furthermore, the Statement of Considerations associated with 10 CFR 50.62(c)(1) (49 FR 26038, dated June 26, 1984) state that the installation of diverse equipment to trip the turbine and initiate auxiliary feedwater have only a marginally favorable value/ impact for Combustion Engineering plants such as Palo Verde. The NRC staff has concluded that the licensee has demonstrated that removal of DAFAS from the Palo Verde licensing basis represents low risk and only a minimal safety impact. Therefore, the maintaining or replacing of DAFAS in the given circumstances is an undue hardship on the licensee. For these reasons, granting an exemption to allow removal of DAFAS from the Palo Verde licensing basis supports the claimed special circumstance of undue hardship.

#### E. Supplemental Information

For more technical details, refer to the SE associated with this exemption under ADAMS Accession No. ML22054A005 (Enclosure 2).

#### F. Environmental Considerations

The NRC staff determined in the associated SE that the exemption discussed herein meets the eligibility criteria for the categorical exclusion set forth in 10 CFR 51.22(c)(9) because the granting of this exemption involves: (i) No significant hazards consideration, (ii) no significant change in the types or a significant increase in the amounts of any effluents that may be released offsite, and (iii) no significant increase in individual or cumulative occupational radiation exposure.

Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the NRC's consideration of this exemption request.

#### IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants APS an exemption from the specific requirement of 10 CFR 50.62(c)(1) to provide equipment that is diverse from the reactor trip system to automatically initiate the auxiliary (or emergency) feedwater system under conditions indicative of an ATWS. As stated above, APS will continue to meet all other requirements of 10 CFR 50.62(c)(1) at Palo Verde Units 1, 2, and 3.

Dated at Rockville, Maryland, this 23rd day of March 2022.

**SUPPLEMENTARY INFORMATION:** The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information contained in its regulation on Rules for Administrative Review of Agency Decisions (29 CFR part 4003) (OMB control number 1212-0061;

expires July 31, 2022). This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

PBGC's regulation on Rules for Administrative Review of Agency Decisions (29 CFR part 4003) prescribes rules governing the issuance of initial determinations by PBGC and the procedures for requesting and obtaining administrative review of initial determinations. Certain types of initial determinations are subject to administrative appeals, which are covered in subpart D of the regulation. Subpart D prescribes rules on who may file appeals, when and where to file appeals, contents of appeals, and other matters relating to appeals. Most appeals filed with PBGC are filed by individuals (participants, beneficiaries, and alternate payees) in connection with benefit entitlement or amounts. A small number of appeals are filed by companies in connection with other matters, such as plan coverage under section 4021 of ERISA or liability under sections 4062(b)(1), 4063, or 4064. For appeals of benefit determinations, PBGC has optional forms for filing appeals (Form 724) and requests for extensions of time to appeal (Form 723). PBGC needs the required information to resolve matters raised in appeals of PBGC's initial determinations.

PBGC is proposing some minor editorial and formatting changes to Forms 723 and 724. In addition, it is proposing to make the forms fillable online. These are intended to make the forms easier for appellants to complete.

The collection of information under the regulation has been approved under OMB control number 1212-0061 (expires July 31, 2022). PBGC intends to request that OMB extend its approval for another 3 years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that each year there will be 300 appeals and 75 requests for extensions filed annually under this regulation. The total estimated annual burden of the collection of information is 293 hours and \$37,400.

PBGC is soliciting public comments to—

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodologies and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
