Long-Term Follow-Up Study of HPOG 2.0 participants 5½ years after study enrollment, using a long-term survey (LTS) and administrative data. This notice provides a summary for public review and comment of the use and burden associated with the LTS instrument.

DATES: Comments due within 60 days of publication. In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing OPREinfocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION: Description: The HPOG 2.0 evaluation of non-tribal programs is assessing the implementation and impacts of HPOG in non-tribal HPOG programs and will include a cost-benefit analysis. Key participant outcomes of interest include (but are not limited to) educational progress, employment, and earnings.

The HPOG 2.0 Long-Term Follow-Up Study will use survey and administrative data to estimate longer-term (approximately 5½ years after random assignment) program impacts at the local and national level and to explore characteristics of local programs that are associated with more favorable outcomes. By extending data collection to include an LTS, OPRE can address important unanswered questions for policymakers and practitioners. The HPOG 2.0 LTS specifically will provide insights into the long-term impacts of HPOG 2.0 for outcomes that are not captured in administrative records, such as details about educational experiences, characteristics of employment, self-employment, and earnings from jobs not covered in administrative data, receipt of public assistance, physical and mental well-being, and child outcomes. There are two versions of the HPOG 2.0 LTS, the full version (Instrument 21) and a shorter version with critical items of interest only (Instrument 21a). Instrument 21a will be offered to reluctant participants who would otherwise not complete the survey to help maximize response rates and reduce item non-response for the most critical outcomes in the study.

Respondents: HPOG impact study participants from the 27 non-tribal HPOG 2.0 grantees (treatment and control group members) who enrolled between September 2017 and January 2018.

Annual Burden Estimates: This request is specific to the HPOG 2.0 Long-Term Follow-Up Survey (LTS) (both the full and critical items only versions). Currently approved materials and associated burden, which we plan to continue to use can be found at: https://www.reginfo.gov/public/do/PRAICList?ref_nbr=201904-0970-006.
