

to voluntary SMS programs, it describes the general SMS framework and serves as a non-binding basis for the development and implementation of voluntary SMS programs. The AC provides guidance to organizations on how to use SMS principles included in part 5 as a basis to develop and implement a voluntary SMS program and how to submit such a voluntary program to the FAA's Office of Hazardous Materials Safety (AXH) for acceptance.

Each organization that implements a voluntary SMS program would collect and analyze safety data and maintain training and communications records for its SMS. Data and records are essential for an SMS. Any organization that volunteers for this process would maintain records of SMS outputs, training records, and communications materials used to promote safety. An organization may create a gap analysis to identify what already exists within that organization and what needs to be created to complete the SMS implementation plan. The organization's implementation plan is submitted once to FAA for approval. As needed, other information may be requested or submitted as part of ongoing SMS evaluation.

Respondents: The FAA estimates that a total of three companies will voluntarily implement an SMS.

Frequency: The FAA assumes that the implementation plan is a one-time burden that takes place over three (3) years for organizations that choose to comply.

Estimated Average Burden per Response: 6,680 hours reporting and 170 hours recordkeeping.

Estimated Total Annual Burden: 20,040 hours reporting and 510 hours recordkeeping.

For the estimated total annual burden, the prior notice contained a miscalculation of 6,120 hours of recordkeeping. This notice corrects that miscalculation to 510 hours of recordkeeping.

Issued in Washington, DC, on April 5, 2022.

Daniel Benjamin Supko,
Executive Director, FAA, Office of Hazardous Materials Safety.
