

electronic storage cost to industry (\$15.25 × 122 respondents): \$1,861. This calculation retains the previous estimate that storage of 1GB per year is \$15.25. We expect that this estimate should trend downward over time as the cost of electronic storage technology, including cloud storage, continues to decrease. For example, external hard drives of approximately 500GB are available for approximately \$50. In addition, cloud storage plans from multiple providers for 1TB of storage (with a reasonable amount of requests and data transfers) are available for less than \$35 per month.
