not authorized to prescribe controlled substances in schedules II through V in Montana, Respondent is not eligible to maintain a DEA registration. Accordingly, I will order that Respondent’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MM0938261 issued to Lezlie McKenzie, N.P. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Lezlie McKenzie, N.P., to renew or modify this registration, as well as any other pending application of Lezlie McKenzie, N.P., for additional registration in Montana. This Order is effective May 11, 2022.

Anne Milgram, Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF LABOR
Agency Information Collection Activities; Submission for OMB Review; Comment Request; International Training Application

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Bureau of Labor Statistics (BLS)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before May 11, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT:
Mara Blumenthal by telephone at 202–693–8538, or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The BLS is given broad authority under Title 29 of the U.S. Code “to acquire and diffuse among the people of the United States useful information on subjects connected with labor, in the most general and comprehensive sense of that word.” The BLS has provided international training in labor market information and price indexes since 1945. Each year, the BLS conducts training programs of 1 to 2 weeks duration at its training facilities in Washington, DC. This information collection request allows the BLS to collect the information needed to register trainees for the international training programs. For additional substantive information about this ICR, see the related notice published in the Federal Register on January 21, 2022 (87 FR 3355).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6. DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL—BLS.
Title of Collection: International Training Application.
OMB Control Number: 1220–0179.
Affected Public: Individuals or households.
Total Estimated Number of Respondents: 100.
Total Estimated Number of Responses: 100.
Total Estimated Annual Time Burden: 34 hours.
Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Dated: April 4, 2022.

Mara Blumenthal,
Senior PRA Analyst.

DEPARTMENT OF LABOR
Mine Safety and Health Administration
Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA’s Office of Standards, Regulations, and Variances on or before May 11, 2022.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2022–0018 by any of the following methods:

2. Fax: 202–693–9441.
3. Email: petitioncomments@dol.gov.

Attention: S. Aromie Noe, Acting Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist’s desk in Suite 4E401. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor’s COVID–19 policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), Petitionsformodification@dol.gov (email), or 202–693–9441 (fax).

[These are not toll-free numbers.]
SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2022–009–M.

Petitioner: TATA Chemicals Soda Ash Partners, P.O. Box 531, Green River, Wyoming 82935.

Regulation Affected: 30 CFR 57.22305, Approved equipment (III mines).

Modification Request: The petitioner requests a modification of 30 CFR 57.22305 to permit the use of non-MSHA approved electronic total stations/theodolites in or beyond the last open crosscut and where methane may enter the air current.

The petitioner states that:

(a) A Wild/Leica T16 theodolite is used to perform all surveying work in the return and past the last open crosscut. This instrument is becoming obsolete, according to the petitioner’s surveying equipment supplier.

(b) There are no MSHA-approved electronic total stations or theodolites.

(c) Electronic total stations allow surveying personnel to measure distances without entering an area. A built-in electronic distance meter allows remote measurement by reflecting light off an object, such as the face, with no reflector. Use of the electronic total stations eliminates miner travel through areas with poor roof or rib conditions and allows measurement in unbolted areas. Its use also significantly reduces surveying personnel’s exposure to poor ground conditions.

(d) Nineteen of the 21 electronic total stations/theodolites listed in the petitioner’s proposal have an IP (Ingress Protection) 66 rating; two have an IP 65 rating.

(e) The lithium batteries used for the instruments listed in the petitioner’s proposal meet the UL 1642 standard or IEC (International Electrotechnical Commission) 62133 standard.

(f) The instruments listed in the petitioner’s proposal will provide the most accurate and safest means of surveying in methane-containing air and will improve the quality and accuracy of surveys, which will improve the safety of the mining operation.

The petitioner proposes the following alternative method:

(a) Use the following non-MSHA approved electronic total stations/theodolites under normal mining conditions in or beyond the last open crosscut and where methane may enter the air current:

1. Sokkia Electronic Total Station Model SET50RX–3
2. Sokkia Electronic Total Station Model SET50R
3. Sokkia Electronic Total Station Model SET50RX
4. Sokkia Electronic Total Station Model SET300
5. Sokkia Intelligent Measurement Total Station Model IM–100
6. Sokkia Intelligent Measurement Total Station Model IM–50
7. Sokkia Compact X-ellence Station CX
8. Sokkia Compact X-ellence Station CX–60
9. Topcon Electronic Total Station Model GTS–225
10. Topcon Electronic Total Station Model GTS–300W
11. Topcon Digital Theodolite Model DT–270L
12. Topcon Digital Theodolite Model DT–209L
13. Topcon Electronic Total Station Model GTS–301D
14. Topcon Electronic Total Station Model GTS–235W
15. Topcon Electronic Total Station Model GM–50
16. Topcon Electronic Total Station Model GM–100
17. Leica Flexline Total Station Model TS03
18. Leica Flexline Total Station Model TS07
19. Leica Flexline Total Station Model TS10
20. Leica Nova TM60 Monitoring Total Station (IP 65)
21. Leica Nova TS60 Robotic Total Station (IP 65)

(b) While not in operation, the electronic total station/theodolite will be charged out-by the last open crosscut utilizing the manufacturer’s approved battery charger.

(c) The mine surveyor will follow manufacturer’s instruction on how to properly inspect the unit to ensure it is in proper working order before using it past the last open crosscut or where methane may enter the air current.

(d) If 1.0 percent or more methane is detected, the procedures in 30 CFR 57.22234 will be followed.

The petitioner asserts that the alternative method proposed will at all times guarantee no less than the same measure of protection afforded those miners under the mandatory standard.

Song-ae Aromie Nae,
Acting Director, Office of Standards, Regulations, and Variances.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2022–037]

National Industrial Security Program Policy Advisory Committee (NISPPAC); Meeting

AGENCY: Information Security Oversight Office (ISOO), National Archives and Records Administration (NARA).

ACTION: Notice of federal advisory committee meeting.

SUMMARY: We are announcing an upcoming National Industrial Security Program Policy Advisory Committee (NISPPAC) meeting in accordance with the Federal Advisory Committee Act and implementing regulations.

DATES: The meeting will be on April 27, 2022, from 10:00 a.m. to 12:00 p.m. EDT.

ADDRESSES: This meeting will be a virtual meeting. See supplementary procedures below.

FOR FURTHER INFORMATION CONTACT: Heather Harris Pagan, ISOO Senior Program Analyst, by telephone at 202.357.5351 or by email at NISPPAC@nara.gov. Contact ISOO at ISOO@nara.gov and the NISPPAC at NISPPAC@nara.gov.

SUPPLEMENTARY INFORMATION: This virtual meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. app 2) and implementing regulations at 41 CFR 101–6. The Committee will discuss National Industrial Security Program policy matters.

Procedures: Members of the public must register in advance through the
