CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1235

[Docket No. CPSC–2016–0023]

Safety Standard for Baby Changing Products

AGENCY: Consumer Product Safety Commission.

ACTION: Direct final rule.

SUMMARY: In June 2018, the U.S. Consumer Product Safety Commission (CPSC or Commission) published a consumer product safety standard for baby changing products under section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA). The standard incorporated by reference the 2018 ASTM International (ASTM) voluntary standard for baby changing products that was in effect at the time. The CPSIA sets forth a process for updating mandatory standards for durable infant or toddler products that are based on a voluntary standard, when a voluntary standards organization revises the standard. Consistent with the CPSIA update process, this direct final rule updates the mandatory standard for baby changing products to incorporate by reference ASTM’s 2021 version of the voluntary standard.

DATES: The rule is effective on July 31, 2022, unless CPSC receives a significant adverse comment by May 26, 2022. If CPSC receives such a comment, it will publish a notification in the Federal Register, withdrawing this direct final rule before its effective date. The incorporation by reference of the publication listed in this rule is approved by the Director of the Federal Register as of July 31, 2022.

ADDRESSES: You can submit comments, identified by Docket No. CPSC–2016–0023, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: https://www.regulations.gov. Follow the instructions for submitting comments. CPSC does not accept comments submitted by electronic mail (email), except through https://www.regulations.gov, and as described below. CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Mail/hand delivery/courier Written Submissions: Submit comments by mail/hand delivery/courier to: Division of the Secretariat, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. Alternatively, as a temporary option during the COVID–19 pandemic, you may email such submissions to: cpsc-os@cpsc.gov.

Instructions: All submissions must include the agency name and docket number for this direct final rule. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: https://www.regulations.gov. Do not submit electronically: Confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: For access to the docket to read background documents or comments received, go to: https://www.regulations.gov, and insert the docket number, CPSC–2016–0023, into the “Search” box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Keysha Walker, Compliance Officer, U.S. Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; telephone: (301) 504–6820; email: KWalker@cpsc.gov.

SUPPLEMENTARY INFORMATION:

A. Background

1. Statutory Authority

Section 104(b)(1) of the CPSIA requires the Commission to assess the effectiveness of voluntary standards for durable infant or toddler products and adopt mandatory standards for those products. 15 U.S.C. 2056a(b)(1). The mandatory standard must be "substantially the same as" the voluntary standard, or it may be "more stringent than" the voluntary standard, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the product. Id.

Section 104(b)(4)(B) of the CPSIA specifies the process for updating the Commission’s rules when a voluntary standards organization revises a standard that the Commission incorporated by reference under section 104(b)(1). First, the voluntary standards organization must notify the Commission of the revision. Once the Commission receives this notification, the Commission may reject or accept the revised standard. The Commission may reject the revised standard by notifying the voluntary standards organization, within 90 days of receiving notice of the revision, that it has determined that the revised standard does not improve the safety of the consumer product and that it is retaining the existing standard. If the Commission does not take this action to reject the revised standard, the revised voluntary standard will be considered a consumer product safety standard issued under section 9 of the Consumer Product Safety Act (15 U.S.C. 2058), effective 180 days after the Commission receives notification of the revision or on a later date specified by the Commission in the Federal Register. 15 U.S.C. 2056a(b)(4)(B).

2. Safety Standard for Baby Changing Products

Under section 104(b)(1) of the CPSIA, the Commission adopted a mandatory rule for baby changing products, codified in 16 CFR part 1235. The rule incorporated by reference ASTM F2388–18, Standard Consumer Safety Specification for Baby Changing Products for Domestic Use, with no modifications. 83 FR 29672 (June 26, 2018). At the time the Commission published the final rule, ASTM F2388–18 was the current version of the voluntary standard.

On February 1, 2022, ASTM notified CPSC that it had revised the voluntary standard for baby changing products, approving ASTM F2388–21 on November 15, 2021. As discussed below, based on CPSC staff’s review of

B. Revisions to ASTM F2388

The ASTM standard for baby changing products includes performance requirements, test methods, and requirements for warning labels and instructional literature, to address hazards associated with baby changing products, including structural integrity, stability, barriers, retention of contoured changing pads and add-on changing units, entrapment, self-closing steps, and restraints. This section describes the changes in ASTM F2388–21, as compared to ASTM F2388–18, which is the current mandatory standard, and includes an assessment of those changes. ASTM F2388–21 contains substantive revisions, as well as editorial, non-substantive revisions.

1. Substantive Revisions

ASTM F2388–21 includes two substantive changes. The first revision is in Figure 9, Webbing Tension Pull Device, which is in section 7 of the standard. Section 7 specifies test methods to address hazards associated with baby changing products. Section 7.8 provides tests to assess restraint systems, which include components of the baby changing product that contribute to the capability to restrict upward or lateral movement of an occupant’s torso within the product. Part of the restraint system test involves using a webbing tension pull device to adjust the restraint before applying a specified pull force to the restraint. Figure 9 depicts the webbing tension pull device that must be used. In ASTM F2388–21, two notes have been added to Figure 9 to provide the overall width and length dimensions for the tool, and a metric equivalent dimension has been added for one of the dimensions shown in the figure. CPSC staff considers these revisions neutral with respect to the safety of baby changing products because they provide dimension notes and equivalent metric measurements, which clarify how to fabricate the test tool, but do not change the test tool or test procedure. Moreover, the revisions are consistent with figures of similar webbing tension devices used in other ASTM standards, such as ASTM F833–21, Standard Consumer Safety Performance Specification for Carriages and Strollers.

The second revision is in section 9.5 of the standard, which provides warning statements that must be addressed on product labels and requires that the warnings align with the format and text requirements illustrated in the standard. The warning statements provided in section 9.5.1 address fall hazards, including the hazard statement “Fall Hazard,” at the beginning of the warning statement. In ASTM F2388–21, this hazard statement has been revised to be capitalized as “FALL HAZARD.” Likewise, the warning statements provided in section 9.5.3 address suffocation hazards, including the hazard statement, “Suffocation Hazard,” at the beginning of the warning statement. In ASTM F2388–21, this warning statement has also been revised to be capitalized as “SUUFFOCATION HAZARD.” CPSC staff considers these revisions an improvement to the safety of baby changing products because capitalization emphasizes the hazard statements and makes them more conspicuous, thereby increasing the likelihood that a caregiver will pay attention to the warning statements.

2. Non-Substantive Revisions

ASTM F2388–21 also includes minor revisions that are editorial and do not alter any substantive requirements in the standard. These changes are as follows:

- Footnote 1 has been revised to include “baby changing products,” instead of “changing tables,” as part of the correct name for the subcommittee that developed the standard and has been revised to include the approval and publication dates of the revised standard.

- Figure 11, which provides examples of left-aligned warning label text, has been renumbered as Figure X1.1 and relocated from section 9, Marking and Labeling, to section X1, Rationale. This revision has not changed the figure content or illustration. Although section 9 is a mandatory portion of the standard and section X1 is not mandatory, moving Figure 11 is a non-substantive change because the figure merely provides examples of the mandatory message panel text layout specified in section 9.4.6.1, and already was not mandatory.

- ASTM F2388–21 includes minor wording changes and grammatical corrections, including changing “example warning labels” to “example warning statements” (section 9.4.7), changing the warning label statement regarding fall hazards from “stay within arm’s reach of your child” (section 9.5.1); and correcting the title of updated Figure X1.1 from “Example of Left Aligned Text” to “Example of Left-aligned Text.”

- In section 9, Marking and Labeling, and section 10, Instructional Literature, several figure names have been revised, including changing “sample label” to “example warning statements” (revised Figures 11 through 15), and changing “Sample Warning in Instructions—for example, Changing Table” to “Example Warning Statement in Instructions—e.g., Changing Table” (updated Figure 16). These revisions are consistent with wording that was already in the standard, which describes these figures as “examples” (sections 9.4.7 and 10.4). Because these revisions do not change any substantive requirements, they are neutral with respect to the safety of baby changing products.

C. Incorporation by Reference

Section 1235.2 of the direct final rule incorporates by reference ASTM F2388–21. The Office of the Federal Register (OFR) has regulations regarding incorporation by reference. 1 CFR part 51. Under these regulations, agencies must discuss, in the preamble to a final rule, ways in which the material the agency incorporates by reference is reasonably available to interested parties, and how interested parties can obtain the material. In addition, the preamble to the final rule must summarize the material. 1 CFR 51.5(b).

In accordance with the OFR regulations, section B. Revisions to ASTM F2388 of this preamble summarizes the major provisions of ASTM F2388–21 that the Commission here incorporates by reference into 16 CFR part 1235. The standard is reasonably available to interested parties. Until the direct final rule takes effect, a read-only copy of ASTM F2388–21 is available for viewing, at no cost, on ASTM’s website at: https://www.astm.org/CPSC.htm. Once the rule
tackles this direct final rule in an approach and provides notice of the standard that takes effect by statute.

Specifically, under the process set out in section 104(b)(4)(B) of the CPSIA, when ASTM revises a standard that the Commission has incorporated by reference under section 104(b)(1)(B) of the CPSIA, that revision will become the new CPSC standard, unless the Commission determines that ASTM’s revision does not improve the safety of the product and so notifies ASTM. Thus, unless the Commission makes such a determination, the ASTM revision becomes CPSC’s standard by operation of law. The Commission is allowing ASTM F2388–21 to become CPSC’s new standard because its provisions either improve product safety or are neutral with respect to safety. The purpose of this direct final rule is to update the reference in the Code of Federal Regulations (CFR) so that it reflects the version of the standard that takes effect by statute.

This rule update to the ASTM F2388 as a consumer product safety standard under section 104(b) of the CPSIA. Under these circumstances, notice and comment are unnecessary.

In Recommendation 95–4, the Administrative Conference of the United States (ACUS) endorses direct final rulemaking as an appropriate procedure to expedite rules that are noncontroversial and that are not expected to generate significant adverse comments. See 60 FR 43108 (Aug. 18, 1995). ACUS recommends that agencies use the direct final rule process when they act under the “unnecessary” prong of the good cause exemption in 5 U.S.C. 553(b)(B). Consistent with the ACUS recommendation, the Commission is publishing this rule as a direct final rule, because CPSC does not expect any significant adverse comments.

Unless CPSC receives a significant adverse comment within 30 days of this notification, the rule will become effective, by operation of law, on July 31, 2022. In accordance with ACUS’s recommendation, the Commission considers a significant adverse comment to be “one where the commenter explains why the rule would be inappropriate” and an assertion challenging “the rule’s underlying premise or approach,” or a claim that
the rule “would be ineffective or unacceptable without a change.” 60 FR 43108, 43111 (Aug. 18, 1995). As noted, this rule merely updates a reference in the CFR to reflect a change that occurs by statute, and public comments should address this specific action. If the Commission receives a significant adverse comment, the Commission will withdraw this direct final rule. Depending on the comment and other circumstances, the Commission may then incorporate the adverse comment into a subsequent direct final rule or publish a notice of proposed rulemaking, providing an opportunity for public comment.

G. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA; 5 U.S.C. 601–612) generally requires agencies to review proposed and final rules for their potential economic impact on small entities, including small businesses, and prepare regulatory flexibility analyses. 5 U.S.C. 603, 604. The RFA does not apply to a rule that is subject to notice and comment procedures under section 553 of the APA. Id. As discussed in section F. Direct Final Rule Process of this preamble, the Commission has determined that notice and the opportunity to comment are unnecessary for this rule. Therefore, the RFA does not apply. CPSC also notes the limited nature of this document, which merely updates the incorporation by reference to reflect the mandatory CPSC standard that takes effect under section 104 of the CPSIA.

H. Paperwork Reduction Act

The current mandatory standard for baby changing products includes requirements for marking, labeling, and instructional literature that constitute a “collection of information,” as defined in the Paperwork Reduction Act (PRA; 44 U.S.C. 3501–3521). The revised mandatory standard does not alter these requirements. The Commission took the steps required by the PRA for information collections when it adopted 16 CFR part 1235, including obtaining approval and a control number. Because the information collection is unchanged, the revision does not affect the information collection requirements or approval related to the standard.

I. Environmental Considerations

The Commission’s regulations provide a categorical exclusion for the Commission’s rules from any requirement to prepare an environmental assessment or an environmental impact statement where they “have little or no potential for affecting the human environment.” 16 CFR 1021.5(c)(2). This rule falls within the categorical exclusion, so no environmental assessment or environmental impact statement is required.

J. Preemption

Section 26(a) of the CPSA provides that where a consumer product safety standard is in effect and applies to a product, no state or political subdivision of a state may either establish or continue in effect a requirement dealing with the same risk of injury unless the state requirement is identical to the federal standard. 15 U.S.C. 2075(a). Section 26(c) of the CPSA also provides that states or political subdivisions of states may apply to CPSC for an exemption from this preemption under certain circumstances. Section 104(b) of the CPSIA deems rules issued under that provision “consumer product safety standards.” Therefore, once a rule issued under section 104 of the CPSA takes effect, it will preempt in accordance with section 26(a) of the CPSA.

K. Effective Date

Under the procedure set forth in section 104(b)(4)(B) of the CPSIA, when a voluntary standards organization revises a standard that the Commission adopts as a mandatory standard, the revision becomes the CPSC standard within 180 days of notification to the Commission, unless the Commission notifies the standards organization that it has determined that the revision does not improve the safety of the product, or the Commission sets a later date in the Federal Register. 15 U.S.C. 2056a(b)(4)(B). The Commission is taking neither of those actions with respect to the standard for baby changing products. Therefore, ASTM F2388—21 will take effect as the new mandatory standard for baby changing products on July 31, 2022, 180 days after February 1, 2022, when the Commission received notice of the revision.

L. Congressional Review Act

The Congressional Review Act (CRA; 5 U.S.C. 801–808) states that before a rule may take effect, the agency issuing the rule must submit the rule, and certain related information, to each House of Congress and the Comptroller General. 5 U.S.C. 801(a)(1). The CRA submission must indicate whether the rule is a “major rule.” The CRA states that the Office of Information and Regulatory Affairs determines whether a rule qualifies as a “major rule.” Pursuant to the CRA, this rule does not qualify as a “major rule,” as defined in 5 U.S.C. 804(2). To comply with the CRA, CPSC will submit the required information to each House of Congress and the Comptroller General.

List of Subjects in 16 CFR Part 1235

For the reasons discussed in the preamble, the Commission amends 16 CFR chapter II as follows:

PART 1235—SAFETY STANDARD FOR BABY CHANGING PRODUCTS

1. Revise the authority citation for part 1235 to read as follows:

2. Revise § 1235.2 to read as follows:

§ 1235.2 Requirements for baby changing products.

Each baby changing product shall comply with all applicable provisions of ASTM F2388—21, Standard Consumer Safety Specification for Baby Changing Products for Domestic Use, approved on November 15, 2021. The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A read-only copy of the standard is available for viewing on the ASTM website at https://www.astm.org/READINGLIBRARY/. You may obtain a copy from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959; telephone (610) 832–9585; www.astm.org. You may inspect a copy at the Division of the Secretariat, U.S. Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814, telephone (301) 504–7479, email cpsc-os@cpsc.gov, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fr.inspection@nara.gov, or go to: www.archives.gov/federal-register/cfr/ibr-locations.html.

Alberita E. Mills,
Secretary, Consumer Product Safety Commission.
