

electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301-415-1969, or by email at Wendy.Moore@nrc.gov or Betty.Thweatt@nrc.gov.

MATTERS TO BE CONSIDERED:

Week of May 16, 2022

There are no meetings scheduled for the week of May 16, 2022.

Week of May 23, 2022—Tentative

There are no meetings scheduled for the week of May 23, 2022.

Week of May 30, 2022—Tentative

Wednesday, June 1, 2022

10:00 a.m. Transformation at the NRC—Sustaining Progress as Modern, Risk-Informed Regulator; (Contact: Aida Rivera-Varona: 301-415-4001)

Additional Information: The meeting will be held in the Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Friday, June 3, 2022

10:00 a.m. Meeting with Advisory Committee on Reactor Safeguards; (Contact: Larry Burkhart: 301-287-3775)

Additional Information: The meeting will be held in the Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Week of June 6, 2022—Tentative

There are no meetings scheduled for the week of June 6, 2022.

Week of June 13, 2022

Tuesday, June 14, 2022

10:00 a.m. Briefing on Human Capital and Equal Employment Opportunity; (Contact: Nicole Newton: 301-415-8316)

Additional Information: The meeting will be held in the Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Thursday, June 16, 2022

10:00 a.m. Briefing on Results of the Agency Action Review Meeting; (Contact: Nicole Fields: 630-829-9570)

Additional Information: The meeting will be held in the Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Week of June 20, 2022—Tentative

There are no meetings scheduled for the week of June 20, 2022.

CONTACT PERSON FOR MORE INFORMATION:

For more information or to verify the status of meetings, contact Wesley Held at 301-287-3591 or via email at Wesley.Held@nrc.gov.

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: May 11, 2022.

For the Nuclear Regulatory Commission.

Wesley W. Held,

Policy Coordinator Office of the Secretary.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2022-0096]

Modeling High Energy Arcing Fault Hazards and Zones of Influence

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft research information letter reports; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment two draft Research Information Letter reports, "Predicting High Energy Arcing Fault Zones of Influence for Aluminum Using a Modified Arc Flash Model, Evaluation of a modified model bias, uncertainty, parameter sensitivity and zone of influence estimation, Draft for public comment," and "Determining the Zone of Influence for High Energy Arcing Faults using Fire Dynamics Simulator, Draft for public comment."

DATES: Submit comments by June 13, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods;

however, the NRC encourages electronic comment submission through the Federal Rulemaking website:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0096. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN-7-A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Gabriel J. Taylor, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-0781, email: Gabriel.Taylor@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2022-0096 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0096.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to PDR.Resource@nrc.gov. The draft research information letter reports "Predicting High Energy Arcing Fault Zones of Influence for Aluminum Using a Modified Arc Flash Model, Evaluation of a modified model bias, uncertainty, parameter sensitivity and zone of influence estimation, Draft for public comment" is available in ADAMS under Accession No. ML22095A236, and "Determining the Zone of Influence for

High Energy Arcing Faults using Fire Dynamics Simulator, Draft for public comment," is available in ADAMS under Accession No. ML22095A237.

- *NRC's PDR*: You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2022-0096 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS.

The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS. All comments should reference the applicable report.

II. Discussion

The NRC Office of Nuclear Regulatory Research (RES) is advancing the understanding and state-of-practice for modeling High Energy Arcing Faults (HEAF) in fire Probabilistic Risk Assessment (PRA). One important aspect of this research is the ability to reliably predict the HEAF hazard for various scenarios important for nuclear safety. The high intensity and short duration of a HEAF has not been explicitly modeled in past fire PRA methodologies. As such, there was a need to advance HEAF modeling capabilities to reliably predict the scenario specific HEAF hazards to support refinements to the zones of

influence (ZOI) used in fire PRA. The NRC worked with its collaborative research partners to develop two models to predict the HEAF hazard.

In the report titled, "Predicting High Energy Arcing Fault Zones of Influence for Aluminum Using a Modified Arc Flash Model, Evaluation of a modified model bias, uncertainty, parameter sensitivity and zone of influence estimation, Draft for public comment," the NRC worked with Sandia National Laboratories to evaluate an existing base model and nuclear power plant fire PRA scenarios were identified. Modification of the base model established from existing literature and test data was used to minimize these differences. The modified model was evaluated against NRC datasets to understand the model prediction and relative uncertainties. Finally, a range of fire PRA ZOIs were developed based on the modified model and draft update HEAF PRA methodology. The results are expected to be used to inform an update to ZOIs used in fire PRA.

In the report titled, "Determining the Zone of Influence for High Energy Arcing Faults using Fire Dynamics Simulator, Draft for public comment," the NRC worked with the Electric Power Research Institute and the National Institute of Standards and Technology to adapt a computational fluid dynamic code known as the Fire Dynamics Simulator (FDS) to predict the HEAF hazard. This report documents (1) the development of the approach to use FDS to predict thermal exposures to targets from a HEAF, (2) validation of the model and (3) application of the model to estimate HEAF ZOI for a broad range of fire PRA HEAF scenarios.

The draft research information letter reports present the NRC-RES/Sandia National Laboratories (SNL) and NRC-RES/Electric Research Power Institute (EPRI) working groups efforts to predict realistic HEAF hazards. The two approaches to model HEAF hazards present complementary but diverse methods to estimating the hazard ZOI. For most scenarios the two approaches provide results that are consistent with each other. The NRC-SNL report can be viewed as a first order approximation providing a single value scenario specific ZOI estimate, while the NRC-RES/EPRI report provides additional geometric detail to the ZOI estimate.

Dated: May 9, 2022.

For the Nuclear Regulatory Commission.

Mark H. Salley,

Chief, Fire and External Hazards Analysis Branch, Division of Risk Analysis, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-P

POSTAL REGULATORY COMMISSION

[Docket No. CP2022-62; Order No. 6167]

Competitive Price Adjustment

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is recognizing a recently filed Postal Service document with the Commission concerning changes in rates of general applicability for competitive products. The changes are scheduled to take effect July 10, 2022. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* June 6, 2022.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction and Overview
- II. Initial Administrative Actions
- III. Ordering Paragraphs

I. Introduction and Overview

On May 6, 2022, the Postal Service filed notice with the Commission concerning changes in rates and classifications of general applicability for Competitive products.¹ The Postal Service represents that, as required by 39 CFR 3035.102(b) and 39 CFR 3035.104(b), the Notice includes an explanation and justification for the changes, the effective date, and a schedule of the changed rates. *See* Notice at 1-2. The changes are

¹ USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, May 6, 2022 (Notice). Pursuant to 39 U.S.C. 3632(b)(2), the Postal Service is obligated to publish the Governors' Decision and record of proceedings in the **Federal Register** at least 30 days before the effective date of the new rates.
