their race, color, religion, sex (including sexual orientation, gender identity and expressions, and pregnancy), national origin, age, disability, genetic information (including family medical history), marital status, parental status, political affiliation, military service, and reprisal and seeks EEO counseling, the assigned EEO Counselor will conduct the pre-complaint (Informal) with the intentions of resolving the complaint within the Agency. At the conclusion of pre-complaint (Informal) process and if resolution was unsuccessful, the EEO Counselor during the final interview with the aggrieved person must discuss what occurred during the counseling process and provide the aggrieved with information to move the matter forward. Pursuant to 29 CFR 1614.105(c), if the aggrieved individual decides to file a Formal complaint (*i.e.*, NRC Form 646), the EEO Counselor must submit a written report (*i.e.*, EEO Counselors Report) within fifteen (15) calendar days to the Office of Small Business and Civil Right Director or designated official that will contain relevant information about the aggrieved individual, jurisdiction, claims, bases, Responding Management Officials, witnesses, requested remedies, and the EEO Counselor's checklist. SUPPLEMENTARY INFORMATION: The Pacific Northwest Electric Power Planning and Conservation Act of 1980 (Northwest Power Act) requires the Council to adopt and periodically review and revise a regional power plan, the northwest conservation and electric power plan. The Council first adopted the power and conservation plan in 1983, with significant amendments or complete revisions adopted in 1986, 1991, 1998, 2004, 2010, and 2016. For the 2021 Northwest Power Plan, the Council formally began the review process in February 2019, and in September 2021 the Council released for public review and comment the draft power plan. During the comment period, the Council held four public hearings on the draft plan, all of them held virtually due to the limitations imposed by the Covid-19 pandemic restrictions, but with each denoted as the public hearing for one of the four states of the Council, consistent with the requirements of the Northwest Power Act. In addition, the Council engaged in consultations about the power and conservation plan with Bonneville Power Administration (Bonneville), Bonneville's utility customers, other utilities, various state, federal, tribal and local agencies and governments, public interest organizations, business and trade associations, and the public at large, and, accepted and considered substantial written and oral comments, with the Council receiving nearly 200 formal and informal written public comments on the draft plan. The Council's work on the 2021 Northwest Power Plan came in the middle of a transformation in the power system in the northwest and the western US as a whole, driven by policies and economic trends that are pushing out fossil-fueled generation, adding renewable resources
