

with different power system characteristics, and potentially electrifying significant sectors of the economy. The Council grappled throughout the power plan process, including through consideration of the comments received on the draft, with a host of issues arising out of that transformation.

At the Council's regularly scheduled public meeting in February 2022, held in Portland, Oregon via webinar, the Council formally adopted the 2021 Northwest Power Plan. The revised power and conservation plan meets the requirements of the Northwest Power Act, which specifies the components the power plan is to have, including an energy conservation program, a recommendation for research and development; a methodology for determining quantifiable environmental costs and benefits; a 20-year demand forecast; a forecast of power resources that the Bonneville Power Administration will need to meet its obligations; and an analysis of reserve and reserve reliability requirements. The power and conservation plan also includes the Council's Columbia River Basin Fish and Wildlife Program, as amended pursuant to Section 4(h) under the Northwest Power Act prior to beginning this review of the power plan. The Council followed the adoption of the 2021 Northwest Power Plan with a decision at its regular monthly meeting in May 2022, in Whitefish, Montana, to approve a Statement of Basis and Purpose and Response to Comments to accompany the final plan.
